KCOR COMMENT BY berkey: Wed Mar 09 21:36:56 GMT 2016

Tried to clean the back side of the Kcor O1 with 3m magic tape in the area of the big bullet hole. Looks like we now have more scattered light in the realtime images; but I am not sure if it is related to my intervention or due to changes in sky conditions.

GENERAL COMMENT BY berkey: Wed Mar 09 21:41:32 GMT 2016

Images look horrible in the quick look but this does appear to be related to dust. Unfortunately the large buttle hole in the East side of the image remains.

____end____

Wed Mar 09 22:10:28 GMT 2016 KCOR End Patrol

GENERAL COMMENT BY berkey: Thu Mar 10 00:36:50 GMT 2016

Elevated winds from the east as well as lots of dust kicked up are gonig to force abandoning observing for the rest of the day.
