GENERAL PROBLEM COMMENT BY berkey : Fri Mar 11 17:00:16 GMT 2016

SGS at BIOS screen when I arrived. Looks like the controller is unable to see the hard drive.

GENERAL COMMENT BY berkey: Fri Mar 11 17:16:29 GMT 2016

Power cycling and reseating the PXIe motherboard fixed the issue. SGS has now booted up and appears to be running.

I am not sure why this crash happend but it looks like the last things in the event log happend at about 11:53pm. However these events don't seem related to a hardware/system crash.

GENERAL COMMENT BY berkey: Fri Mar 11 22:17:58 GMT 2016

O1 washed down. Looking forward to the construction getting done so we can get less dust in the building and fire up the flow bench.
