GENERAL PROBLEM COMMENT BY rose : Sun Jun 12 19:14:50 GMT 2016

Log was unresponsive after the morning weather comments. It did not log events of kcor or comp. Mlsoserver was unrespons
ive and none of the drive lights were flashing like usual. I did a hard reset of mlsoserver and it looks like it is worki
ng now. All drives show ok under drive information, and under unit information shows "rebuilding 47% (active)" On kcor s
end data to mlsoserver was turn OFF after I noticed mlsoserver was unresponsive.
