GENERAL COMMENT BY stueben: Fri Aug 12 01:30:48 GMT 2016
The sit/stand desk beneath the control room monitors would not move up/down when I arrived today. I found a damaged cable
connector - the cable was not tucked into its wire duct and probably snagged on something. Swapped the cable for the one f
rom the other desk. Will repair the cable when I find a pin extraction tool or new connector.

GENERAL COMMENT BY stueben: Fri Aug 12 02:31:48 GMT 2016
Another nice long observing day, 10-15 mph ENE winds kept the vog away and the clouds down.
