KCOR COMMENT BY berkey: Fri Aug 12 16:58:19 GMT 2016

To keep looking for the source of the fringing the paper lyot apature stop has been removed. We have also removed the baffle at the front of the fore-optics box (most sunward baffle in the entire instrument) as this is now the assumed source of the fringing. The bolt holes left over in the front panel after removing the baffle have been covered with black electrical tape to keep the fore-optics "light-tight"
