****EVENT COMMENT BY waters**** : Mon Jan 16 02:12:05 GMT 2017

There is a prominence in the Northwest(?) quadrant of the Sun that starts off faint in the morning but changes and evolves, becoming more visible and elongated by this afternoon. Can be seen in GONG.

GENERAL OBSERVATORY COMMENT BY waters: Mon Jan 16 02:21:00 GMT 2017

I talked to Nash on Friday about getting some boards cut for our boardwalk. He told me to tag them with mason string so he could cut them for us. I have tagged a few with our white mason string; white string on a nail or two on the right side of the board going up to our observatory.
