WEATHER COMMENT: waters: Fri Apr 14 16:16:59 GMT 2017

Temp 36.3f, Wind: 4-9mph from the South-Southwest. The vog is at least at 11,000ft and there are altostratus as well as some cirrus currently covering the whole sky. Will wait for the sky to clear up before opening and starting up.

GENERAL COMMENT BY waters: Sat Apr 15 01:30:16 GMT 2017

Unfortunately the clouds and fog did not give up the afternoon. Hopefully this weekend will be better.
