GENERAL COMMENT BY berkey: Tue Apr 25 01:50:29 GMT 2017

Clouds clouds all day.

Spent some time worknig with Gong guys. Including their fiber from the netgear switch up to the new cisco swich. We did a bit of testing and things seem ok but if there is an issue such that we need to reverted the fiber needs to moved from t he switch just above the kvm to the switch just below kodiak
