GENERAL COMMENT BY berkey: Wed Jul 19 18:42:27 GMT 2017

Cirrus clouds came in during the kcor calibration. During the 112 degree cal pol measurment.

Darn thought I could sneak it in.

CoMP COMMENT BY berkey: Wed Jul 19 20:33:25 GMT 2017

First start at the diffuser test had a bad cookbook. Put the opal in while the badder filter was in oops.

But during the second run we started getting some clouds cover during the second set of opal flats.

May try again with this test later in the week or on Monday.
