KCOR COMMENT BY waters: Tue Jan 30 18:47:24 GMT 2018

I was able to get off some other specks on the 01 but unfortunately I think the one causing the bullet hole is stuck on the lens. I was able to see it but it would not budge.

Getting more and more shake from the wind as the dome turns more South-Southwest and it's starting to affect(?) the data. Instruments idled for a bit, but may end up closing the dome.

Unfortunately, since the wind may be observing hard this afternoon, we didn't get much data. Otherwise the sky was wonderfully. Hopefully tomorrow will calm down a little bit.
