Year: 18 Doy: 097

Observer: waters

WEATHER COMMENT: waters: Sat Apr 7 16:40:49 GMT 2018

Temp 41F with windspeed negligible at this time. Sky is covered with cirrus and cumulus clouds to the Northeast to the Southeast. There were two thunderstorms coming up, one to the Southeast and the other to the West. It seems they might have dissipated but will keep an eye/ear out. Will wait for better conditions before opening up.
