
Mauna Loa Solar Observatory Observer's Log

Tue Apr 17 16:13:02 GMT 2018

Year: 18 Doy: 107

Observer: waters

WEATHER COMMENT: waters: Tue Apr 17 16:15:56 GMT 2018

Temp 38F with windspeed at about 3-8mph from the Southeast. Cirrus covering most of the sky at present. Will hold off before opening the dome. Bottom portion of the board walk was a little bit slick.

GENERAL COMMENT BY waters: Wed Apr 18 01:29:03 GMT 2018

Bob Wiley came up for the safety visit. Talked about the fire extinguishers, building evacuation (both for fire and lava instances), AED-defib proper use and application, the different resources available to us on the UCAR website, proper gear (shoes, safety glasses, face masks etc.), tested the emergency pendants and discussed any issues that we came across during/after testing, updated some procedures/documents according to what we do/have here, talked about space heaters and fire hazards, discussed about different CPR and first aid training...I believe that is most of the topics that were covered today.

____end____

GENERAL COMMENT BY waters: Wed Apr 18 01:30:20 GMT 2018

Unfortunately, no data today. High clouds moved in after the thin cirrus and no visible sky was to be had. Hoping tomorrow will be better.
