GENERAL COMMENT BY berkey: Fri May 04 19:42:49 GMT 2018

Shabar seeing estimate for sensor #2 oddly low.

___end___

GENERAL COMMENT BY berkey: Fri May 04 19:43:03 GMT 2018

.02 vs ~3 for other sensors.

___end___

GENERAL COMMENT BY berkey: Fri May 04 21:42:53 GMT 2018

Felt a series of earthquakes.

Looks like they reached a 5.6 mag, and was centered down near the eruption in Puna.

___end___

GENERAL COMMENT BY berkey: Fri May 04 22:08:57 GMT 2018

Shabar sensor 3 wasn't turning on. Reconnecting the power cables and flipping the switch seemed to bring it back.

___end___

GENERAL COMMENT BY berkey: Fri May 04 22:13:39 GMT 2018

May have just heard thunder.

___end___

GENERAL COMMENT BY berkey: Fri May 04 22:17:54 GMT 2018

Davis station got a low battery again today. Opened up and rotated the battery in the outside station. Looks like data came back a

fter that; but it is worrying that the new battery already failed.
