Year: 18 Doy: 167

Observer: waters

WEATHER COMMENT: waters: Sat Jun 16 16:20:03 GMT 2018

Temp 39F with windspeed at about 4-9mph from the South. Thin cirrus covering the entire sky at present; will most likely be able to guide but may be too bright to take any data. Thick vog is sitting on Saddle till about 9,000ft with thinner vog above, possibly to about 13,000ft.

GENERAL OBSERVATORY COMMENT BY waters: Sat Jun 16 20:37:49 GMT 2018

Forgot to mention that I opened the dome windows when I opened the dome and I have shabar running at the moment.

\_\_\_\_end\_\_\_\_

GENERAL OBSERVATORY COMMENT BY waters: Sat Jun 16 21:41:07 GMT 2018

Fog is getting thick and clouds are coming in, closed the dome upstairs.

\_\_\_\_end\_\_\_\_

GENERAL OBSERVATORY COMMENT BY waters: Sat Jun 16 22:03:08 GMT 2018

I meant Vog, not Fog

\_\_\_\_end\_\_\_\_

GENERAL OBSERVATORY COMMENT BY waters: Sun Jun 17 01:24:17 GMT 2018

No corona data today, sky was too bright. Tomorrow doesn't look too much better but still hoping we get better conditions.
