MLSO logger just crashed: 'Python has stopped working-a problem caused the program to stop working correctly. Windows will
 close the program and notify you if a solution is available.'
It was working okay up until this message.

GONG COMMENT BY waters: Tue Feb 19 02:14:30 GMT 2019
Went down to the GONG shelter and stowed the turret. I also gently got the water off the outside lens with a kimwipe. Whil
e I was there, I looked for a replacement 9volt battery to replace the smoke alarm with. Turns out out of the two spares t
hat I found, only one seemed to be full. Will need to get spare 9volts for future chirping.

GENERAL OBSERVATORY COMMENT BY waters: Tue Feb 19 02:21:53 GMT 2019
Unfortunately, today was a wash; high winds in the morning made it dubious, if not impossible to open the dome and take da
ta and by the time it calmed down, mist, cloud and rain were upon us. If it does ice over tonight, becareful in the dog ho
use, as it still leaks when it rains.
