WEATHER COMMENT: waters: Sat Jan 4 17:13:47 GMT 2020

Temp 37F with windspeed at about 16-21mph from the South-Southeast. There's a fog bank just Southeast of the observatory and I can feel moisture outside, however it is clear directly above. Will wait for better conditions before opening.

Besides pausing for a couple of fog banks, not too bad a day to take data; winds kept the aerosols away.
