GENERAL COMMENT BY berkey: Mon Jan 06 19:08:29 GMT 2020

Moved the SGS network cable from the mlso netowrk to the kcor internal network. SGS network address is now 192.168.0.100 but it is only accessable from the kcor2 machine.

I made changes to the kcor observing code to look for sgs data at the new ip address.

GENERAL COMMENT BY berkey: Mon Jan 06 22:52:54 GMT 2020

I forgot that with the sgs moved to hid behind kcor, means we will no longer see the SGS generate messages about New alignment looking good.

GENERAL COMMENT BY berkey: Tue Jan 07 03:22:21 GMT 2020

Testing a new button for the focus.vi

Tue Jan 07 03:22:51 GMT 2020 SGS Alignment complete

GENERAL COMMENT BY berkey: Tue Jan 07 03:23:45 GMT 2020

The above comment came from the kcor focus.vi . Previsiously this message was generated by a button click from the guider VI, but as that is no longer able to talk to kodiak the message can now come from kcor focous.
