GENERAL COMMENT BY berkey: Fri Mar 06 18:15:58 GMT 2020

New SGS code expected the copley amplifiers to be at COM4 and COM5 however the SGS computer had these configure as COM2,COM4. Port numbers in the device manager were updated to match the code and the MESA guide port numbers.

Troubleshooting took ~30 minutes.

New code seems to have corrected the outstanding issues and now the code starts up with the proper defaults.
