GENERAL COMMENT BY waters: Sun Mar 08 20:10:38 GMT 2020

Thought we might have an opening in the cirrus but there is still some faintly covering the sky that is hard to see which is making things too bright.

KCOR COMMENT BY waters: Sun Mar 08 21:00:09 GMT 2020

The ILX lightwave temperature controller for K-Cor is acting strange. The temperature was dropping real fast, so I hit the output button off then on again. Then the TE current limit and TE open LEDs were red and the temperature started climbing past 35.0C.

Powered the whole thing down and then back on to see if that would help. It didn't, temperature kept climbing. Turned the dial down which had the limit set to 40C back to 35.0C. Temperature started to drop again, even below 35. Hit the output button off then on again and it seems to be working now. Currently holding stable at 35C

KCOR COMMENT BY waters: Sun Mar 08 21:06:24 GMT 2020

Labview crashed when trying to start up K-Cor Synoptic Acquisition Mode. Restarting Labview seems to have fixed the problem
