GENERAL COMMENT BY berkey: Sun Mar 22 17:11:29 GMT 2020

The facility had a power outage Friday afternoon and it took until Saturday evening for th power company to resovle the is sue.

So far the issues found are:

Looks like moonfish and wahoo do not power backup when power is restored.

KCOR COMMENT BY berkey: Sun Mar 22 18:07:01 GMT 2020

Kcor pixe chassis not staying on. Seems like this is the too cold failure mode adding head to the nema box to try to bring the chassis up to temp

GENERAL COMMENT BY berkey: Mon Mar 23 00:19:46 GMT 2020
Fixed power recovery issues.

Wahoo and moonfish bios set to turn on on power recovery. They now should come backup automagically after the ups's restart.

Building camea system now periodically checks its mount with kodiak and attempts to remount as need. This should fix the bug we had this morning where the camera system came up before kodiak yesterday so we didn't start getting external images until the mount was manually reestablished.

GENERAL COMMENT BY berkey: Mon Mar 23 01:27:55 GMT 2020
We haven't been seeing moves from gong halpha for a little while.

Poking around it looks like the kodiak ldm luna scripts weren't parsing the gong website correctly any more. They must have made change to the page layout. Changing the excmds regular expressions in get_gongjps I was able to find set of commands that properly parsed the new web layout. In my mind most regular expressions are write only, to the point that I don't know what the old ones did to pull out the file names.

GENERAL COMMENT BY berkey: Mon Mar 23 03:14:06 GMT 2020
Sky conditions were marginal this morning, but after the cirrus cleared we had a rather nice afternoon. Some aerosols but compared to the average afternoon good.
