WEATHER COMMENT: waters: Thu Apr 02 16:54:07 GMT 2020

Temp: 33.2f with windspeed at anpit 4-10mph from the Southwest. Sky looks clear.

Ice was on the road from about six miles below the observatory till the parking lot. Had to wait about 20 minutes after sunrise to make it all the way here. Boardwalk was slick, walked on the lava.

Just bright enough to not be able to see the edge, waiting before it to dim a bit before starting up.

KCOR COMMENT BY waters: Thu Apr 02 17:59:14 GMT 2020

Kcor Synoptic would not respond once it opened. And even after closing labview. Restarting the computer to see if that helps.

KCOR COMMENT BY waters: Thu Apr 02 18:34:00 GMT 2020

Getting errors when I try starting KCor synoptic. They are as follows:

Error in Function Bufin Internal Error. An error has occurred within the working thread. Look at error stack to find error.

Error in Function CircularWorkerThread. The worker thread has timed out. Try increasing the time out value in the camera file.

From Socketcam:

Acquisition has been aborted

Brd0 circular acquisition error has occurred

Brd0 circular acquisition error has occurred

Acquisition has been aborted

Seems like there was a power outage last night, as I just noticed the answering machine is also flashing cl. The PXI was off and therefore causing my errors this morning. Turning it back on wasn't a problem and things are back up and running now.

Thank you Ben for the help!
