GENERAL COMMENT BY berkey: Fri Apr 17 17:32:39 GMT 2020

PM Washed Kcor O1. Tried blowing of the bullet hole dust particles seen in yesterdays data. However the particles were stubborn and would not move. O1 was taken down stairs and given a DI water rinse on both sides. This seemed to remove the offending dust.

GENERAL COMMENT BY berkey: Fri Apr 17 17:53:54 GMT 2020

Windows were opened upstairs before doing the O1 inspection cleaning.

KCOR COMMENT BY berkey: Fri Apr 17 17:55:48 GMT 2020

Rinsing seemed to remove a couple of the of the artifacts in the data. But it seems like the worst offending spot in the SE is still there but the diffraction signal is much more muted. So far I cant tell if the exact particle just got muted or we washed away the old particle replacing it with a smaller one.
