GENERAL COMMENT BY berkey: Mon May 04 22:42:16 GMT 2020

Some afternoon clouds

____end____

GENERAL COMMENT BY berkey: Tue May 05 02:01:42 GMT 2020

New webcam temporarily installed on the north side of the dome wall. Still testing things out I think this may not be its final location or orientation.

Ethernet cable feeding the camera is on a temporary route and could snag on things so we should be careful moving things a

round the dome particular the gray ladder.

___end___

GENERAL COMMENT BY berkey: Tue May 05 02:02:58 GMT 2020

Afternoon low clouds eventually broke, but then we got into patches of cirrus and high sky brightness so no afternoon data

.
