
Mauna Loa Solar Observatory Observer's Log

Mon Jun 8 15:36:55 GMT 2020

Year: 20 Doy: 160

Observer: waters

WEATHER COMMENT: waters: Mon Jun 08 16:13:25 GMT 2020

Temp: 43.6f with windspeed at about 4-9mph from the South-Southwest. Sky covered in cirrus at present. Waiting for better conditions before opening up.

____end____

GENERAL COMMENT BY waters: Mon Jun 08 18:21:20 GMT 2020

Couldn't get SGS to lock on the Sun, RA kept dropping while the Dec remained constant where ever I left it. Even when it was directly on the Sun, the RA would just drop and keep dropping. Stopped SGS, closed it and restarted the GUI. Immediately started guiding. Adjusting PID values to what Ben them at on Friday

RA Prop: 70

INT: .015

Dec Prop: 300

INT: .006
