Couldn't get SGS to lock on the Sun, RA kept dropping while the Dec remained constant where ever I left it. Even when it w
as directly on the Sun, the RA would just drop and keep dropping. Stopped SGS, closed it and restarted the GUI. Immediatel
y started quiding. Adjusting PID values to what Ben them at on Friday
RA Prop: 70
 INT:
          .015
Dec Prop: 300
