GENERAL COMMENT BY mcotter: Sat Jan 02 18:18:04 GMT 2021

Several attempts were made with the Focus routine before an acceptable parabola was ascertained. Kcor now running.

Sat Jan 02 20:08:53 GMT 2021 KCOR Start Calibration script: c:\kcor\mlso-calibration22deg-20171025.ini

Sat Jan 02 20:24:08 GMT 2021 KCOR End Calibration Script

GENERAL COMMENT BY mcotter: Sat Jan 02 21:37:45 GMT 2021

Something strange going on with the mouse and screen selector switch. The mouse does not always respond and it must be moved about several times, or hit the left button to bring to life. The selector switch does not register until the mouse left button is hit or after repeated attempts of hitting the screen button you want.
