PM Washed Kcor Field Lens

____end____

UCoMP COMMENT BY berkey: Wed Feb 17 00:07:54 GMT 2021

Move the two UCoMP O1 limit switches to try and recover ~2-3 more mm of range in the focus travel, old range looked to be 59mm new range is 62.05mm.

____end____

Wed Feb 17 02:32:50 GMT 2021 Kcor Focus/alignment program exited

UCoMP COMMENT BY berkey: Wed Feb 17 03:54:27 GMT 2021

Tried to align t-cam to the occulter in the 789 prefilter between passing clouds. Thought I had enough signal but found things too dim to find a better focus position running the focus. I think I was near the original 1083 position but I didn't find a big enough gap in the clouds new best position.

____end____

GENERAL COMMENT BY berkey: Wed Feb 17 04:01:52 GMT 2021

Nice morning, some fog/clouds in the early afternoon with some t-storms, afternoon cleared enough for sucker holes.
