GONG COMMENT BY lisapg: Fri Mar 05 18:00:50 GMT 2021

Been down at the GONG shelter hooking up the oscilloscope and trying to get a signal from the DAS control all morning.

GONG COMMENT BY lisapg: Fri Mar 05 23:22:03 GMT 2021

Just came back up from the GONG shelter; was trouble shooting the Waveplate encoder. Replaced the Driver ISO and the Waveplate Driver. Then tried to hear the Encoder in the optical table; ended up having to pull the plug on the AC and turn off all the fans to hear it by ear. Seems like it is running, so changing the boards seemed to have helped. The oscilloscope is currently hooked up to the DATA Controller and the Data controller is closed as far as it can go without crimping the cable to the oscilloscope.
