Year: 21 Doy: 071

Observer: lisapg

WEATHER COMMENT: lisapg: Fri Mar 12 16:48:59 GMT 2021

Temp: 35.6f with windspeed at about 9-15mph from the Southwest. A few bands of cirrus cover the North and a little bit to the East-Southeast but it's clear above and to the West-Southwest. Hoping we can start observations today!

Road was a little patchy with ice from 8,000ft and frosty from 9,500ft all the way to the upper parking lot.

GENERAL COMMENT BY lisapg: Fri Mar 12 18:05:21 GMT 2021

SGS now clears the value when entering a new one; unfortunately this caused the spar to move too far since I entered the wrong number. A couple of bad images are the result.

GONG COMMENT BY lisapg: Fri Mar 12 22:27:17 GMT 2021
All (if not, most) boards that have been replaced within the last week or so have been repackaged and placed in a box labeled 'Bad' that is currently on the desk in the GONG shelter. Some are packed together in bubble wrap and labeled 'bad' with more specific labels on the actually packaging beneath said bubble wrap.

Contents:

Command Board
Servo Driver board
Waveplate Board
Drive ISO board
DAS Board

Added

CPU board

ADC board

to the 'Bad' box as Ben reminded me that they were swapped out 3/3. We're not too sure if they are bad boards but it would n't hurt to have them tested, unless they tell us otherwise.
