Sat Aug 07 20:37:45 GMT 2021 UCOMP Paused for clouds

GENERAL COMMENT BY mcotter: Sat Aug 07 20:40:43 GMT 2021

Kcor and Ucomp instruments currently paused for passing clouds.

____end____

Sat Aug 07 20:51:53 GMT 2021 UCOMP Restarted from pause

Sat Aug 07 20:55:43 GMT 2021 UCOMP Paused for clouds

WEATHER COMMENT: mcotter: Sat Aug 07 21:03:28 GMT 2021

Clouds have increased dramatically and are now covering most of the summit of Maunaloa. The dome shutter doors and windows have been closed at this time.

____end____

WEATHER COMMENT: mcotter: Sat Aug 07 21:04:57 GMT 2021

Winds have increased and are now blowing steady, with an occasional gust, from the northwest.

____end____

WEATHER COMMENT: mcotter: Sat Aug 07 21:12:13 GMT 2021

****NOTE**** - Thick clouds of smoke or dust can clearly be seen at lower elevation on the leeward side of the Big Island. The smoke/dust clouds stretch from Waimea in the north to past Hualalai in the south. I have been observing the formation for over thirty minutes and the smoke/dust is rapidly making it's way into the interior and up in to the Saddle Valley.

____end____

WEATHER COMMENT: mcotter: Sat Aug 07 21:37:41 GMT 2021

The smoke/dust clouds have gained elevation and are now in the Western Saddle Valley. The clouds are dense and are completely blocking the view of the western shoreline of the Big Island, the Kohala Mountains, Wiakoloa and the lower parts of Hualalai. Additionally, the Pohakaloa Military Base is becoming obscured by the smoke/dust clouds. Winds continue to blow steady from the northwest and continue to carry the smoke and dust up in to the Saddle Valley and higher elevations beyond.

____end____

WEATHER COMMENT: mcotter: Sun Aug 08 00:40:29 GMT 2021

Temp: 45.8f, Humidity: 97%, Pressure: 28.718in, Wind: 6mph from 341degs, Skies: The sky is completely overcast with dark gray rainclouds. A medium rain is falling steadily and fog and mist are blowing through the science area. A very noticeable smell of smoke is in the air.

____end____

Sun Aug 08 00:54:51 GMT 2021 UCoMP Restarted from pause

GENERAL COMMENT BY mcotter: Sun Aug 08 01:06:10 GMT 2021

Emptied the trash containers in the dome and control room. Changed out the tack pad in the dome vestibule area.

___end___

GENERAL COMMENT BY mcotter: Sun Aug 08 01:18:04 GMT 2021

The early morning hours were quite clear and beautiful. At approximately 10:30 am HST Altocumulus clouds began to form over the Maunaloa summit and pretty quickly after that the sky was covered and the instruments were paused. By late morning the sky started turning a dark gray and the dome shutter doors and windows were closed. From late morning until approximately 14:00pm HST smoke/ dust could be observed on the down slopes of Maunakea and Maunaloa toward the Kohala Coast steadily making its way inland toward the Saddle Valley. The smoke and dust finally made its way up to higher altitude and became quite noticeable, blocking out all viewing of the leeward side of the Big Island and the Saddle Valley accompanied by the strong smell of smoke.
