GENERAL COMMENT BY mcotter: Wed Oct 13 17:06:53 GMT 2021

Opened dome and aligned spar, but at the present time the sky is too overcast to observe at this time.

UCoMP COMMENT BY berkey: Wed Oct 13 21:31:26 GMT 2021

Saw a bunch of bad camera temps (ARR and PCB) in the data. This looks to be related to how we were polling the cameras. Changed the polling interval to be a little slower and current testing shows things looking a lot better. Testing will continue a bit longer to see if anything pops up over time.

GENERAL COMMENT BY mcotter: Thu Oct 14 01:30:17 GMT 2021

Removed Yaw Cam from spar. Built another mounting fixture for the camera and occulter, as the existing one was intended for a temporary period of time only and lacked the mechanical integrity to stand up to daily use and spar movements. The Yaw Cam has been reinstalled on the spar, but I was unable to get the video software to transmit an image. When Ben and I are in tomorrow we can get the software working and make the physical adjustments that are going to be necessary for proper alignment.

GENERAL COMMENT BY mcotter: Thu Oct 14 01:41:10 GMT 2021

Overcast skies all day.

No data today.
