UCOMP COMMENT BY lisapg: Thu May 26 16:49:39 GMT 2022

UComp is coming up with an error:

Error 7 occurred at Create Folder in UCOMP data Logger.vi->UCOMP-controller.vi
Possible reason(s): LabVIEW: File not found. The file might be in a different location or deleted. Use command prompt or the file explorer to verify that the path is correct.
Nonexistent GPIB interface

UCOMP COMMENT BY lisapg: Thu May 26 17:20:25 GMT 2022

Ben received a bunch of errors regarding the disk array. This could be the source of our error(s) when trying to start up UCOMP.

UCOMP PROBLEM COMMENT BY lisapg : Thu May 26 19:09:21 GMT 2022

Been talking with Ben and Tom via email and it's a possibility that it is the actual raid controller that has died.

We do not have a spare on the mountain, so UCOMP is down until the part comes in and we can verify whether or not that is the problem.

UCOMP PROBLEM COMMENT BY lisapg : Thu May 26 23:26:52 GMT 2022

UCOMP disk array said that disks 5-8 had failed. Tom believes that it's highly likely that the raid controller has died but to try switching out one of the 'failed' drives and see if the drive comes back.

The drives are labeled differently in the computer than on the Arch web manager; I am changing out disk 5 from the computer or disk 6 from the web manager.
