UCOMP COMMENT BY berkey: Tue Jul 26 17:09:45 GMT 2022

Added some more baffling around T-cam. This new baffling encircles the old bafflement and also covers the back end of the cameras.

Hopefully this will reduce an artifact that looks like a light leak in the camera.

GENERAL COMMENT BY berkey: Tue Jul 26 20:58:06 GMT 2022

Starting some tests/network changes. Since we are currently (and will be) taking data; there will likely be a data transfer interruption between Kodiak and Boulder at some point during this work.

GENERAL COMMENT BY berkey: Wed Jul 27 00:34:53 GMT 2022

Now running on the new network hardware. We still are outside of the Boulder firewall. But seems like we have normal operations on the new hardware.

UCOMP COMMENT BY berkey: Wed Jul 27 00:36:19 GMT 2022

New baffles don't seem to eliminate the light leak.

We still see it in darks with the dome closed and clouds.
