UCoMP COMMENT BY lisapg: Fri Aug 26 17:30:28 GMT 2022

UCoMP is stuck trying to move the filter wheel. I have put the shutter in and am stopping the UCoMP-controller.vi.

UCoMP COMMENT BY lisapg: Fri Aug 26 17:34:08 GMT 2022

Stopping and launching the reconnect filter wheel.bat did not solve the issue, restarting UComp computer

UCoMP COMMENT BY lisapg: Fri Aug 26 17:53:10 GMT 2022

After the restart, when starting up again, one of the images looked black and only a partial image. Shut down the UComp-controller.vi and power cycled the cameras. Brought up the controller and it seems to be working again.

Images for the Kcor NRGF looked a bit weird, as if it was polarized but fully, so I blew off the 01 and it seems to have helped.
