

**Incident Management Situation Report
Tuesday, October 29, 2024 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (77 fires)
New large incidents:	5
Large fires contained:	2
Uncontained large fires:	13
CIMTs committed:	5
NIMOs committed:	1

Nationally, there are three fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

One fire suppression crew from Saskatchewan, Canada is supporting fire suppression efforts in the Great Basin Area.

Active Incident Resource Summary

Southern Area (PL 3)

Fire Activity and Teams Assigned	Totals
New fires:	29
New large incidents:	2
Uncontained large fires:	3
CIMTs committed:	2
NIMOs committed:	1

NIMO Team 1 has been mobilized to assist Disaster Recovery Staff with organizing a safe, efficient and orderly transition from response to recovery in all hurricane impacted areas across the Southern Region.

Hurricane Helene Support – NC, North Carolina Forest Service. CIMT (NC State). Primary mission is to coordinate emergency road clearing efforts, perform damage assessments and deliver commodities throughout western North Carolina.

Rush, Wichita Mountains National Wildlife Refuge, FWS. CIMT (SA Team 1). Fifteen miles northwest of Lawton, OK. Timber, grass and brush. Active fire behavior with single tree torching and backing. Numerous structures threatened. Area, road and trail closures in effect.

* **Rupe-Market**, Oklahoma DOF. Five miles south of Garber, OK. Grass and timber. Extreme fire behavior with wind-driven runs, group torching and long-range spotting. Structures threatened. Road closures in effect.

* **Second Mtn**, Oklahoma DOF. Two miles north of Battiest, OK. Timber. Extreme fire behavior with torching and running.

Predictive Services Discussion:

Strong winds will develop ahead of a cold front, with southerly sustained winds of 20-40 mph and gusts of 35-60 mph. However, relative humidity is forecast to increase ahead of the front, especially in much of Texas and Oklahoma. The driest conditions with relative humidity of 10-20% are forecast near the dry line in the southern High Plains of New Mexico and Colorado, while marginally low humidity of 20-30% continues in Kansas and Nebraska. Elevated winds of 20-30 mph gusting to 30-45 mph amid humidity of 15-30% will also spread into the Mid-Mississippi Valley and Lower Great Lakes. Moisture return is expected to increase overnight, with showers and isolated thunderstorms developing along the front from central Texas and Oklahoma north-northeast into the northern Plains and Upper Mississippi Valley.

Mainly dry conditions will continue in the Southeast but relative humidity will be elevated, while southerly flow off the Atlantic brings increased moisture to the Northeast, with light showers possible for the Adirondacks and northern New England. In the West, showers, with snow above 6,000 to 7,000 feet will continue in much of the central Rockies into southern Montana, with drier conditions in California and Nevada. Another Pacific storm will begin to move into the Northwest overnight with moderate precipitation spreading into the Cascades.
