 Chief, Climate Services Branch

Subject: Discontinuation of the Experimental Two-Class Seasonal Forecast
Products: Effective September 15, 2022

The NWS Climate Prediction Center (CPC) is discontinuing the Experimental Two-Class Seasonal Forecast effective September 15, 2022. This decision is made in response to an ongoing need to maintain consistent messaging in the context of the NWS operational climate forecasts, which are all either currently in a three-class format, or moving to that format in the near future.

CPC continues to issue the operational three-class, probabilistic seasonal forecast products in both standard graphic, Geographic Information System (GIS) and Google Earth formats, on the third Thursday of each month:

https://www.cpc.ncep.noaa.gov/products/predictions/long_range/

If you have questions, please contact:

Jon Gottschalck
Chief, Operational Prediction Branch
