

Winter Storm Warning Continues

Winter Storm Warning Details

- 3 AM today - 9 PM tonight for areas west of the Plateau
- 9 AM today - Saturday 3 AM for the Plateau

Forecast Details

- Travel impacts from snow developing west to east through tonight
- 4 to 6 inches will be common with localized 7-8 inch amounts
- Most of the snow will fall now through this evening
- Some sleet or rain near Alabama border, otherwise all snow
- Snow tapering off to flurries this evening, but significant travel impacts will continue overnight into Saturday
- Continued cold weather will result in slow melting. Partial thawing and refreezing could keep travel conditions hazardous for several days, especially in rural areas, secondary roads, sidewalks, and parking lots

Earliest End	6 PM
Most Likely	8 PM
Latest End	10 PM
3 Winter Weather Timing	
Earliest End	9 PM
Most Likely	11 PM
Latest End	1 AM

Forecaster Comments:

- Warmer air has resulted in a few areas south of I-40 seeing a transition of snow to sleet, especially along the Alabama border
- The rest of Middle TN will see only snow
- Snow intensity will come in spurts; if a heavier band sets up over an area, snowfall rates will increase
- Visibility will be limited in heavy snow
- Temperatures will drop below freezing tonight, freezing anything that has fallen
- Cold weather pattern to continue with another shot of very cold air next week
