Permit Conditions – 803 Section 5.3

- 5.3.1 The permit shall expire five years from the date of issuance.
- 5.3.2 At the end of the permit period, the permittee shall remove and destroy all permitted plants, unless the permit is amended and approved by the Department.
- 5.3.3 If any additional *Ribes* plants are received by the permittee during this period, the permittee shall notify the Department in writing, and include variety information and location of plants.
- 5.3.4 The permit may be revoked at any time if the Department determines that the permittee did not follow permit conditions, if plants appear to be a risk of spread of white pine blister rust, or if white pine blister rust is discovered near the permitted location.

Inspections – 803 Section 6

- 6.1 Inspections by the Department of Agriculture shall proceed as follows:
 - 6.1.1 the permittee must allow Department access to site where the plants are grown.
 - 6.1.2 the Department may inspect plants at least once each year during the permit period to ensure freedom from white pine blister rust disease.
 - 6.1.3 If, upon inspection, white pine blister rust is found on the *Ribes* plants, the Department will issue a Control or Destruction order, in accordance with Title 3, Chapter 11, and at the permittee's expense.
- 6.2 Plants used for experimental, educational or scientific purposes are not exempted from these regulations.
