OceanPredict '19

Advancing the Science of Ocean Prediction

GODAE OceanView and MEOPAR invite you to experience three exciting days in the world of operational oceanography. You will learn about recent advances in the field, and how ocean prediction systems have evolved. This symposium will be an opportunity for you to interact with ocean prediction experts and users, and to learn about the potential that ocean forecasting has for use by private industry, government, and the general public.

(special science forum and user engagement sessions planned for 9&10 May 2019)

Informing science, industry, government, and the public's understanding about ocean forecasting capabilities and benefits

————

Promoting global and regional forecasting systems

————

Motivating operational oceanography research

————

Implementing a global network of ocean prediction systems
