ABOUT MICS

Since the mid-1990s, 118 countries have carried out one or more Multiple Indicator Cluster Surveys, generating data on key indicators on the well-being of children and women, and helping shape policies for the improvement of their lives.

28
Years

120
Countries

358
Surveys

Sample design

HOUSEHOLD INFORMATION PANEL		HH
HH1. Cluster number: _____	HH2. Household number: _____	
HH3. Interviewer name and number: Name _____	HH4. Supervisor name and number: Name _____	
HH5. Day / Month / Year of interview: _____ / _____ / _____		
HH6. Area: Urban1 Rural2	HH7. Region: Region 1..... 1 Region 3..... 3 Region 2..... 2 Region 4..... 4	

Nationally* representative sample of households

Typically, around 10,000 – 30,000 HHs
(Min = 1,500; Max= 102,000)

*Some subnational populations and geography

WE ARE FROM (**country-specific affiliation**). WE ARE WORKING ON A PROJECT CONCERNED WITH FAMILY HEALTH AND EDUCATION. I WOULD LIKE TO TALK TO YOU ABOUT THESE SUBJECTS. THE INTERVIEW WILL TAKE ABOUT (**number**) MINUTES. ALL THE INFORMATION WE OBTAIN WILL REMAIN STRICTLY CONFIDENTIAL AND YOUR ANSWERS WILL NEVER BE SHARED WITH ANYONE OTHER THAN OUR PROJECT TEAM.

MAY I START NOW?

- Yes, permission is given ⇨ Go to HH18 to record the time and then begin the interview.
- No, permission is not given ⇨ Complete HH9. Discuss this result with your supervisor.

Multi-stage cluster sampling of HHs

Similar to Demographic and Health Surveys (DHS)

After all questionnaires for the household have been completed, fill in the following information:

HH8. Name of head of household: _____	
HH9. Result of household interview: Completed01 No household member or no competent respondent at home at time of visit02 Entire household absent for extended period of time03 Refused04 Dwelling vacant / Address not a dwelling05 Dwelling destroyed06 Dwelling not found07 Other (<i>specify</i>) _____ 96	HH10. Respondent to household questionnaire: Name: _____ Line Number: _____
HH11. Total number of household members: _____	

What is IPUMS?

Integrated - consistent codes, labels, and documentation

Public Use - free, anonymized, downloadable

Microdata - individual-level

Series - pooled data over time and place

Key Features of All IPUMS Data

Free
(grant-funded)

Harmonized
across time
and place

Thoroughly
documented

Customized
and **easy**

IPUMS MICS USER NOTES

WELCOME TO IPUMS MICS!

The Multiple Indicator Cluster Surveys (MICS) are the main source of information on health in the developing world. IPUMS MICS is designed to facilitate analysis of MICS data across time and space.

IPUMS MICS simplifies the use of MICS data, allowing researchers to easily explore comprehensive variable information, assess the feasibility of potential research before downloading data, and conduct pooled analyses with fully harmonized variables. IPUMS MICS is based on the original MICS data files; IPUMS MICS uses the original MICS data files as source material and does not distribute MICS data. When you request data from IPUMS MICS, you will download unaltered and original data from UNICEF, and will also be provided with a customized syntax file that will select and harmonize only the variables and samples that you have requested.

GETTING STARTED

CODES	DESCRIPTION	COMPARABILITY	UNIVERSE	AVAILABILITY	QUESTIONNAIRE TEXT
-------	-------------	---------------	----------	--------------	--------------------

Comparability — Index

GENERAL

Comparability

The variable is largely comparable across samples.

In early samples, surveys separately record whether the child received zinc tablets or zinc syrup. Those data are contained in separate variables ([DIARRZINCTAB](#) and [DIARRZINC SYRUP](#)) as well as being harmonized into this variable.

DOWNLOAD EXTRACT FROM UNICEF 

You are being directed to UNICEF to download your customized data extract. The data from UNICEF are paired with IPUMS generated Stata syntax. Unzip the download packet on your computer and run the syntax file to complete your extract.

IPUMS MICS USER NOTES

WELCOME TO IPUMS MICS!

The Multiple Indicator Cluster Surveys (MICS) are the main source of information on health in the developing world. IPUMS MICS is designed to facilitate analysis of MICS data across time and space.

IPUMS MICS simplifies the use of MICS data, allowing researchers to easily explore comprehensive variable information, assess the feasibility of potential research before downloading data, and conduct pooled analyses with fully harmonized variables. IPUMS MICS is based on the original MICS data files; IPUMS MICS uses the original MICS data files as source material and does not distribute MICS data. When you request data from IPUMS MICS, you will download unaltered and original data from UNICEF, and will also be provided with a customized syntax file that will select and harmonize only the variables and samples that you have requested.

Making Your Customized IPUMS MICS Data File

January 24, 2024 by mpcblg

By Anna Bolgrien

The newest IPUMS data collection, **IPUMS MICS**, has many similarities with other IPUMS microdata collections. However, there is one major difference: the IPUMS MICS Data Extract System only uses Stata.

Yes, you read that right. Users of IPUMS MICS must use Stata to open and create their customized data file.

Let's start with how using IPUMS MICS is the same as using other IPUMS microdata collections.

CHOOSE THE UNIT OF ANALYSIS FOR DATA BROWSING

WOMEN	EACH RECORD WILL BE A WOMAN OF CHILDBEARING AGE DESCRIPTION
CHILDREN 0-4	EACH RECORD WILL BE A CHILD UNDER AGE 5 DESCRIPTION
CHILDREN 5-17	EACH RECORD WILL BE A CHILD AGE 5 TO 17 DESCRIPTION
BIRTHS	EACH RECORD WILL BE A BIRTH REPORTED BY A WOMAN OF CHILDBEARING AGE DESCRIPTION
MEN	EACH RECORD WILL BE A MAN DESCRIPTION
HOUSEHOLD MEMBERS	EACH RECORD WILL BE A HOUSEHOLD MEMBER DESCRIPTION
HOUSEHOLD CHARACTERISTICS	EACH RECORD WILL BE A HOUSEHOLD DESCRIPTION

Linking across units

- Data are not linked by UNICEF
- User guide on web
 - List of linking variables
 - <https://mics.ipums.org/mics/linking.shtml>

Newly released at IPUMS MICS

New variables

- Child labor
- Alcohol and tobacco use
- Victimization
- Household energy use
- HH assets

New samples

- Afghanistan 2022-2023
- Fiji 2021 – NEW COUNTRY
- Vietnam 2020-2021
- Nigeria 2021
- Uzbekistan 2021-2022
- Thailand 2022
- Pakistan (Balochistan) 2019-2020
- Pakistan (Khyber Pakhtunkhwa) 2019

More new variables and samples
will be released in Summer 2024
