Department of Biomedical Engineering

The Ohio State University

Columbus, OH

WELCOME TO THE 2015 ANNUAL MEETING of the Biomedical Engineering Society!

Our Annual Meeting is the premier event for the Society and the field of biomedical engineering. This year's theme – "Innovation at the Interface" – epitomizes the multidisciplinary approach of biomedical engineers. I urge you to take advantage of the excellent technical program, plenaries, special events and myriad opportunities for professional development and networking.

This year also marks the 25th Anniversary of the Society's Annual Meeting. It was a significant milestone: the Annual Meeting launched an upsurge of interest for both the Society and the general field of BME. Look for artifacts from the first meeting near the registration area and please join in commemorating the anniversary throughout the meeting.

This year features familiar networking opportunities including the Celebration of Minorities in BME Luncheon and the Women in BMES Luncheon. This year also includes new networking opportunities including the LGBT Dessert Social on Wednesday night. And don't miss the Friday Night Bash at the Convention Center where BEDrock will be performing – a band comprised of biomedical engineering faculty and colleagues.

This year's meeting also features a new slate of sessions from the Society's Industry Committee. The special sessions will take place throughout the meeting and will include: Transitioning from Academia to Industry; Engineering to Entrepreneur; and Start-ups and Venture Capital: Navigating the Funding Process and Investment Pitches. The Industry Committee has done a great job putting together the three

days of programming, and I encourage you to take advantage of the sessions. These events promote BMES's vision to become the networking connection for academia and industry!

Student and Early Career programming has also been expanded for the 2015 meeting. The programming is specifically tailored for those navigating new careers. Topics include: How to Find a Job in Industry; How to get an Industry, Government or Academia job after your PhD; and Resume Review and Critique. The Annual Meeting Career Fair also returns this year on Friday from 1 pm to 5 pm.

Of special note, a terrific slate of keynote addresses starts Thursday morning with the Pritzker Distinguished Lecture by Martin Yarmush, MD, PhD, Rutgers University. And don't miss the special Friday night talk by Kevin Carroll, one of the researchers who helped develop a prosthetic tail for Winter the dolphin, whose story was featured in the movie *Dolphin Tale*.

In the 25-year history of the Annual Meeting, the Society has established itself as the premier organization for biomedical engineering and bioengineering. BMES has now grown to more than 7,000 members – up over 33% in just the past 4 years! The hard work of our members ensures that BMES will continue to lead the field. Special thanks are due to Conference Chair Steven C. George and Program Chair Angelique Louie, BMES Staff, NSF, NIH, our sponsors and our meeting attendees. My very best wishes to you for an enjoyable and productive meeting!

Richard T. Hart, PhD

BMES President

BMES

BIOMEDICAL ENGINEERING SOCIETY
Advancing Human Health and Well Being

A SHORT HISTORY OF THE FIRST STANDALONE BMES MEETING, OCTOBER 1990

THE FIRST PRACTITIONERS OF what became the discipline of biomedical engineering were systems physiologists and engineers, the latter largely trained in the traditional engineering disciplines. Both groups saw the value of more quantitative approaches to medicine and biology, and both were critically important to the creation of the BMES. However, each favored a different venue to present their work. Systems physiologists attended the Federation of American Societies for Experimental Biology (FASEB) annual meeting (since renamed “Experimental Biology”) in the spring. BMES was a guest of the American Physiological Society at FASEB, where it held its annual business meeting. Most of the engineers who were to become active in BMES presented their work at the fall Annual Conference on Engineering in Medicine and Biology (ACEMB). Over time, BMES became a major contributor to the ACEMB program.

Although these meetings provided platforms for researchers in the emerging discipline of biomedical engineering, the presence of two venues, one more biologically oriented and the other with an engineering orientation, inhibited interaction between the two populations. Meanwhile, interdisciplinary competition in the engineering world during the 1980’s compromised the financial viability of the ACEMB, the last of which was held in 1988. It became

clear that the impending loss of a platform for a growing number of interdisciplinary engineers, and the unhelpful distinction between engineers and quantitative physiologists, could both be addressed if BMES took the lead and ran a meeting that would welcome both populations. Furthermore, such a meeting would establish the Society as the society for all biomedical engineers and, in the longer term, establish by example biomedical engineering as a distinct discipline within engineering (see accompanying rationale).

The BMES President in 1988-9 (terms were for a single year at that time) was Mort Friedman, who created a Special Committee to explore the possibility that our Society could independently manage a technical meeting, distinct from FASEB, that would underline the broader aspects of our field. The committee met at the final ACEMB and was chaired by President-Elect H.K. Chang. In January 1989, the Special Committee filed a report recommending that BMES go forward with its first Annual Fall Meeting. As President of BMES from 1989-90, H.K. advanced the process in an important way by obtaining an essential grant from the Whitaker Foundation. The President of our Society in 1990-1 was Dan Schneck, who took the process the rest of the way, serving as Conference Chair of the first standalone meeting of BMES, in Blacksburg, Virginia, in October 1990.

Department of Biomedical Engineering
Washington University in St. Louis
St. Louis, MO*

CETACEANS. SEA. SCIENCE. We are excited to welcome you to the 2015 BMES meeting in Tampa, Florida!

This year's theme is Innovating at the Interface, which celebrates the highly interdisciplinary and collaborative nature of biomedical engineering. To highlight these types of interactions, in this year's program you will see the denotation "DREAMTEAM & CENTER" and Centers" next to some of the abstracts. These are works that self-identified to consist of teams of three or more principal investigators/labs working in collaboration. Although we are highlighting teams of >3 PIs, many other works presented may consist of collaborations between 2 PIs. Celebrate the strength of team-work by making note of successful collaborations and think about how you could enhance your own work through fruitful alliances.

As befitting the sunshine state, the program this year is full of bright gems. We have two fascinating Plenary Sessions: The Thursday night Plenary features three representatives from major funding agencies (NSF, NIH, Stand Up to Cancer) speaking on the future of funding. Come hear about these different funding models and where the leadership sees trends going in the future. Stand Up to Cancer is a relatively new funding agency with a unique funding model that focuses on "DREAM TEAM & CENTER". Come to the plenary to find out more about it! Friday night we have a special treat with speaker Kevin Carroll, engineer of the prosthetic fin worn by Winter the dolphin. Winter lost her tail fin when she was entangled in a crab trap line at only 3 months old. Though her tail had to be amputated, she was able to swim again with the aid of a prosthetic tail. Hear Dr. Carroll speak about advancement in human rehabilitation engineering as well as how these advancements can aid other species.

You will also see several technical sessions that are jointly listed between Tracks in the Program-at-a-Glance (beginning page 229) in order to highlight and promote the cross-disciplinary nature of research.

There are several new features to this year's meeting. First, this year in the Exhibit Hall is the "Meet the Expert" theater. Throughout the meeting, experts from various disciplines and careers will be featured, who will give a more in depth view of a variety of BME topics and potential career paths. Programming for the theater can be found on page 74 and 132. Drop by and meet an expert! Second, there are cash awards for the winners of the "Best Poster" competition. This year there will be five awards, and in addition to the cash award, each winner will receive a certificate and recognition on the BMES website. Third, we are having a series of "Student and Early Career" sessions that will cover a range of topics from how to get your first job in industry to protecting intellectual property. And, of course, don't forget the BMES BASH on Friday evening.

This meeting also would not be possible without your participation. There were a record-breaking 2,885 abstract submissions this year. The efforts and dedication of our many volunteers are truly appreciated. From the Track Chairs, Abstract Reviewers/Session Chairs to the student volunteers at the meeting, it takes a village and we want to take this moment to acknowledge all of the volunteers—be sure to thank one when you see them around the meeting!

Big thanks also to the heroes behind the scenes such as Debby Tucker who is the force behind all aspects of the administration of the meeting, also Michele Ciapa and Ed Schilling who work tirelessly to garner the financial support required to offer the meeting and our many programmed events and activities, and the other BMES staff dedicated to provided quality programs for our students and early career members.

Don't forget to enjoy Florida! Winter the dolphin lives at the Florida Clearwater Aquarium, about an hour from the Tampa Convention Center. You might think about scheduling a visit while you are in Florida. Manatee viewing opportunities are also possible around the state. Soak up the science (see some of our recommended highlights below), then soak up the sea and sun (but wear SPF!!)

At a glance meeting highlights from the Chairs:

- Meet the Expert Theater (*Exhibition Hall*)
- *Thursday night* plenary on "The Future of Funding"
- *Friday night* plenary featuring Kevin Carroll, developer of the prosthetic dolphin tale
- DREAMTEAM & CENTER and Centers talks
- Student and Early Career workshops
- BMES BASH - **Friday, October 9, 6:30 - 9:00 PM - Convention Center**
- Women in BME Luncheon - **Friday, October 9, 12:15 - 1:30 PM - Convention Center**
- Celebration of Minorities Luncheon - **Thursday, October 8, 12:30 - 1:45 PM - Convention Center**
- BMES-NSF Special Session on Research in Biomedical Engineering and Grant Writing - **Friday, October 9, 1:45 - 5:00 PM - Convention Center**
- ABET workshop - **Thursday, October 8, 8:00 - 9:30 AM - Convention Center**
- Tech Transfer and Licensing - Best Practices in Transferring Technologies from Academia and the Clinic Into Industry - **Friday, October 9, 3:15 - 5:00 PM - Convention Center**
- Start-ups and Venture Capital: Navigating the Funding Process and Investment Pitches - **Friday, October 9, 2:00 - 3:00 PM - Convention Center**
- Biomedical Engineering Technology for the Elimination of Health Disparities - **Thursday, October 8, 2:00 - 4:00 PM - Convention Center**
- Get involved: attend a BMES committee meeting, see meeting times posted in program
- Support undergraduate research and attend the Undergraduate Research, Design, and Leadership sessions on Saturday
- Visit the Exhibit Hall
- Enjoy the sea!

Pritzker Distinguished Lecturer:

Martin L. Yarmush, MD, PhD

Paul and Mary Monroe Chair and Distinguished Professor of Biomedical Engineering, Rutgers University, and Director of the Center for Engineering in Medicine at the Massachusetts General Hospital/Harvard Medical School.

THURSDAY OCTOBER 8, 2015
10:30AM
BALLROOM BC
TAMPA CONVENTION CENTER

Emerging Technologies and Biomedical Engineering Innovation

THIS PRESENTATION WILL COVER a diverse set of key topics that have the potential to make a real difference in biomedical research and healthcare in the coming decades. The discussion of certain "hot" fields (e.g. organs-on-a-chip, stem cells, tissue engineering, synthetic biology, personalized medicine, nanobiotechnology, etc.) will attempt to distinguish between what will likely be within the realm of scientific advancement and technology development, and not merely fodder for "scientific entertainment."

Martin L. Yarmush is an internationally recognized bioengineer and translational scientist whose laboratory has been a pioneer and leader in multiple fields including: tissue engineering and regenerative medicine, applied immunology and biotechnology, BioMEMS and nanotechnology, and metabolic engineering and functional genomics. Dr. Yarmush currently serves as the Paul and Mary Monroe Chair and Distinguished Professor of Biomedical Engineering at Rutgers University, and Director of the Center for Engineering in Medicine at the Massachusetts General Hospital/Harvard Medical School. Over the last 30 years, Dr. Yarmush has: 1) published more than 450 peer-reviewed journal articles, 2) has co-authored more than 50 patents and patent applications, 3) has mentored over 130 postdoctoral fellows and graduate students, and 4) has taught a spectrum of courses from Molecular Genetics and Immunology, to Thermodynamics and Transport Phenomena, to Innovation and Entrepreneurship for Science and Technology and Bioengineering in the Biotechnology and Pharmaceutical Industries. More than 70 of his former fellows have

gone on to successful careers in academia both here and abroad, while many others have gone on to become leaders in the pharmaceutical, biotechnology and medical device industries. In addition to his teaching and research achievements, Dr. Yarmush has contributed to the advancement of science and engineering through service as: (1) a member of NIH, NSF, FDA, and Office of Technology Assessment review panels; (2) an advisory board member for foundations (e.g. the Whitaker Foundation, Juvenile Diabetes Foundation, and Doris Duke Foundation), academic-based centers, and industrial firms; and 3) an editor of several science and engineering journals. A frequent invited speaker at major conferences and institutions, and winner of over 25 local and national awards, Dr. Yarmush's research "pushes the envelope" on several healthcare technology frontiers. He has been credited with many pioneering scientific and technological advances including: innovative cell culture systems, stem cell therapies, dynamic cell and tissue microsystems, point-of-care devices, bioartificial organs development, targeted therapies for tumors and infections, recombinant protein purification techniques, and recombinant retrovirus production and purification techniques. Some of these developments have resulted in licensed patents and the formation and development of > 10 companies based on these advances. Dr. Yarmush received his BA from Yeshiva University, his MD degree from Yale University, and completed PhD work at The Rockefeller University in biophysical chemistry and at MIT in chemical engineering.

Future of Funding

THURSDAY OCTOBER 8, 2015
6:15PM - 7:30PM
BALLROOM BC
TAMPA CONVENTION CENTER

This special plenary session is about the funding landscape in biomedical research. This session will discuss the future of funding as well as innovative approaches to funding. The speakers bring their unique expertise to the discussion.

Advances in Biomechanical Simulation of Complex Hand Motion

PERSONS WITH RECENT HAND amputations expect modern hand prostheses to function like intact hands. Because of this, advances in mechanical hardware are directed toward providing functionality comparable to the intact human hand. Despite such advances, the performance of sophisticated hand prostheses remains limited by the ability to control them via physiological (e.g., electromyographic) signals sensed from the user.

Currently, my laboratory leads a NIBIB-funded study with the long-term objective of advancing biomechanical simulation of the hand and wrist in order to facilitate control algorithms capable of predicting the motions that would occur in an intact hand given the electromyographic (EMG) signals measured from the residual muscles of an amputee's forearm. Given the paucity of experimental data describing complex hand motions, in general, we first developed experimental protocols that enabled .

Dr. Murray is an Associate Professor at Northwestern University with appointments in the Departments of Biomedical Engineering, Physical Medicine and Rehabilitation, and Physical Therapy and Human Movement Sciences. She is the Director of the Applied Research in Musculoskeletal Simulation (ARMS) laboratory at the Rehabilitation Institute of Chicago, where she is appointed as a Research Scientist; she also holds an appointment as a Research Health Scientist at the Edward Hines VA Medical Center. Dr. Murray received her Bachelor of Science in Mathematics from the University of Notre Dame in 1990. She obtained her M.S. and Ph.D. in Biomedical Engineering from Northwestern University. She completed post-doctoral training in Biomedical Engineering at the Cleveland FES Center at Case Western Reserve University, where she was named an NIDRR Mary

Switzer Fellow, and was also awarded post-doctoral funding from the Paralyzed Veterans of America. From 2000 to 2006, she developed an NIH-funded research program as an independent investigator for the Department of Veterans Affairs at the VA Palo Alto. She joined the Northwestern faculty in 2007.

The foundation for Dr. Murray's work is the development of biomechanical models that accurately represent the mechanical actions of the upper extremity muscles. The models and corresponding anatomical databases that Dr. Murray has shared with the scientific community have been cited hundreds of times. The main thrust of her current research is the application of these models to better understand and, ultimately, to help improve function of the disabled upper limb. Her work has relevance over a broad scope, including basic motor control, the design of control systems for exoskeletons and upper limb prosthetics, restoration of hand and arm function following cervical spinal cord injury, rehabilitation of hand and arm function following stroke, orthopaedic interventions for osteoarthritis, and prevention of injuries in baseball pitching. In addition to the NIH and VA investigator-initiated award funding that has enabled her research program to thrive, the trainees in her program have been awarded pre- and post-doctoral fellowships from NIH, the Neilsen Foundation, and the American Heart Association. She served as co-Track Chair of the Orthopaedics and Rehabilitation Engineering Track at the 2014 Biomedical Engineering Society Annual Meeting, and Program Chair of the 2011 Annual Meeting of the American Society of Biomechanics. She is a member-at-large of the Executive Board of the US National Committee on Biomechanics and is also a member of the Multi-Scale Modeling Consortium, sponsored by the Inter-agency Modeling and Analysis Group.

Engineering Self-Assembled Porphyrin Nanoparticles for Biomedical Applications in Imaging and Drug Delivery

C **PORPHYRINS HAVE PLAYED NUMEROUS** historic roles in development of approaches to the diagnosis and treatment of diseases, in particular based on how these molecules interact with light. This lecture will cover some of our recent efforts to develop new self-assembled materials from porphyrins and related molecules and how these nanomaterials have potentially advantageous properties for disease diagnosis and therapy. In particular, several recently reported nanoscale systems will be discussed that are being investigated preclinically: First, porphyrin nanovesicles have been developed that can release drugs in response to red laser irradiation, leading to enhanced drug deposition in irradiated tumors. Second, these porphyrin nanovesicles can be chelated with cobalt for simple functionalization using polyhistidine ligands. Finally, a family of highly light-absorbing nanoparticles have been developed for safe and real-time gastrointestinal imaging following oral administration.

JONATHAN F. LOVELL is an assistant professor of biomedical engineering at the State University of New York at Buffalo. He is a faculty of both the School of Engineering and Applied Sciences, and the School of Medicine and Biomedical Sciences. Dr. Lovell received a Bachelor of Applied Sciences in Systems Design Engineering from the University of Waterloo in 2004. He went on to a M.S. degree in Biochemistry at McMaster University working in the group of

Dr. David Andrews where he developed liposomal systems to study membrane permeabilization during cell death. Dr. Lovell pursued doctoral studies in biomedical engineering at the Institute of Biomaterials and Biomedical Engineering at University of Toronto. Working under Dr. Gang Zheng, Dr. Lovell discovered new liposome-like nanovesicles formed from porphyrin-phospholipids conjugates, which exhibit unique characteristics useful for biomedical imaging and therapy. In 2012, Dr. Lovell received his Ph.D. and joined the University at Buffalo faculty the same year. In 2013, Dr. Lovell was awarded an Early Independence Award from the National Institutes of Health. To date, he has co-authored over 40 peer-reviewed journal publications and 7 patents. His group at University at Buffalo has published numerous works involving the engineering of porphyrin-based materials, in journals including *Advanced Materials*, *Nature Chemistry*, *Nature Communications* and *Nature Nanotechnology*. Dr. Lovell is a council member and newsletter editor for the American Society for Photobiology, and is a member of the American Chemical Society as well as BMES. Dr. Lovell is on the editorial board of several journals including *Theranostics* and is a senior editor for the *Journal of Interdisciplinary Nanomedicine*. He has participated in numerous federal and international grant review panels. His main research interests involve developing clinically translatable nanoplatforms for improving disease diagnosis and treatment.

BMES established this award in 2000 to honor Rita M. Schaffer, former BMES Executive Director. Rita's gift of her estate, along with contributions from her family, friends, and associates, has enabled BMES to create the Rita Schaffer Young Investigator Award, which includes the Rita Schaffer Memorial Lecture.

Diversity Lecture:

**Department of Biomedical Engineering
The City College of New York**

SATURDAY, OCTOBER 10, 2015
11:15AM
BALLROOM BC
TAMPA CONVENTION CENTER

**Biomedical Engineering at The City College of New York:
Experiences in Diversity and Success**

THE DEPARTMENT OF BIOMEDICAL ENGINEERING at The City College of New York was created in 2002 with a mission that placed equal emphasis on academic excellence and diversity. We are uniquely positioned for this mission, given the rich legacy of City College and its historical core commitments to offer an affordable education and to recruit and support a diverse student population, reflective of both New York City and the global society in which we live. We will discuss our approaches, failures and successes en route to achieving a faculty and student body diversity that is extraordinary among engineering programs in the United States.

DEPARTMENT OF BIOMEDICAL ENGINEERING AT THE CITY COLLEGE OF NEW YORK

Founded originally in 1847 as the Free Academy of the City of New York, the mission of The City College of New York (CCNY) was and remains: "To provide the children of immigrants and the poor access to free higher education based on academic merit alone." The CCNY Department of Biomedical Engineering has 13 faculty members, with research concentrations in Cardiovascular Biomechanics, Musculoskeletal Biomechanics, Neural Engineering and Tissue Engineering & Biomaterials. Among our faculty are members of the National Academy of Engineering, National Academy of Sciences, Institute of

Medicine and 8 Fellows of the American Institute of Medical and Biological Engineering. We are also among the most diverse faculties in the country; 7 of our 12 faculty are women and/or under-represented minorities.

Education: The PhD program in Biomedical Engineering at CCNY started in 1999. In the most recent NRC Rankings of PhD programs, it was ranked 1st in diversity, 7th in overall research productivity and among the top 20 programs in overall quality. Our undergraduate program started in 2006 and has rapidly grown into one of the most successful in the NYC area. True to our CCNY mission, diversity and outreach remain our priority. **The New York Center for Biomedical Engineering (NYCBE)** The CCNY Department of Biomedical Engineering also anchors the NYCBE - a consortium established in 1994 to serve as a center for promoting interactions between CCNY and partner clinical institutions in NYC (Albert Einstein College of Medicine, Hospital for Special Surgery, Weill Medical College of Cornell University, Mount Sinai School of Medicine, New York University Schools of Medicine and Dentistry, Memorial Sloan-Kettering Cancer Center, CUNY School of Medicine). The NYCBE enables research and educational collaborations, program and training grants, and provides opportunities for CCNY BME students in research laboratories at partner institutions.

Lecture to be presented by:
John Tarbell, PhD
CUNY and Wallace Coulter Distinguished
Professor of Biomedical Engineering

Our faculty: Gilda Barabino, PhD, Marom Bikson, PhD, Luis Cardoso, PhD, Jacek Dmochowski, PhD, Susannah Fritton, PhD, Bingmei Fu, PhD, Steven Nicoll, PhD, Lucas Parra, PhD, Mitchell Schaffler, PhD, John Tarbell, PhD, Maribel Vazquez, PhD, Sihong Wang, PhD, Sheldon Weinbaum, PhD

2016 BMES/FDA Frontiers in Medical Devices Conference

May 22-25, 2016, Washington DC

The College Park Marriott Hotel and
Conference Center at the University of Maryland

The Biomedical Engineering Society and the US Food and Drug Administration have formed a partnership to co-host the BMES/FDA Frontiers in Medical Devices Conference, a meeting for researchers, engineers, clinicians and other professionals in the fields of designing, building and using medical devices.

Meeting Co-chairs

Tina Morrison

Regulatory Advisor of Computational Modeling for Center for Devices and Radiological Health, U.S. Food and Drug Administration

Jeff Bischoff

Zimmer, Inc

Registration opens

March 2, 2016

Earlybird registration deadline

April 19, 2016

For more information

meddevicesregistration](http://www.bmes.org/meddevicesregistration)

Please visit:

www.bmes.org/meddevicessig
for additional information about
the meeting.

EXHIBITS

ANNUAL REVIEWS SPARK A CONNECTION

Annual Review of Biomedical Engineering

bioeng.annualreviews.org • Volume 17 • September 2015

Editor: **Martin L. Yarmush**, *Rutgers University Center for Engineering in Medicine, Massachusetts General Hospital*

The *Annual Review of Biomedical Engineering*, in publication since 1999, covers the significant developments in the broad field of biomedical engineering, including biomechanics, biomaterials, computational genomics and proteomics, tissue engineering, biomonitoring, health care engineering, drug delivery bioelectrical engineering, biochemical engineering, and biomedical imaging topics.

Congratulations to Editor Martin L. Yarmush—the 2015 recipient of the Pritzker Distinguished Lectureship Award.

Come by booth #510 on Thursday to meet Dr. Yarmush and enjoy a celebratory treat!

TABLE OF CONTENTS:

- *Advances in Antibody Design*, Kathryn E. Tiller, Peter M. Tessier
- *Biological Soft Robotics*, Adam W. Feinberg
- *Biomaterial Strategies for Immunomodulation*, Nathan A. Hotaling, Li Tang, Darrell J. Irvine, Julia E. Babensee
- *Biosensors for Cell Analysis*, Qing Zhou, Kyungjin Son, Ying Liu, Alexander Revzin
- *Coherent Raman Scattering Microscopy in Biology and Medicine*, Chi Zhang, Delong Zhang, Ji-Xin Cheng
- *Digital Microfluidic Cell Culture*, Alphonsus H.C. Ng, Bingyu Betty Li, M. Dean Chamberlain, Aaron R. Wheeler
- *Hamiltonian Systems and Optimal Control in Computational Anatomy: 100 Years Since D'arcy Thompson*, Michael I. Miller, Alain Trouvé, Laurent Younes
- *High-Throughput Assessment of Cellular Mechanical Properties*, Eric M. Darling, Dino Di Carlo
- *Image-Based Predictive Modeling of Heart Mechanics*, V.Y. Wang, P.M.F. Nielsen, M.P. Nash
- *Large-Volume Microfluidic Cell Sorting for Biomedical Applications*, Majid Ebrahimi Warkiani, Lidan Wu, Andy Kah, Ping Tay, Jongyoon Han
- *Microfluidic Sample Preparation for Medical Diagnostics*, Francis Cui, Minsoung Rhee, Anup Singh, Anubhav Tripathi
- *Modeling Signaling Networks to Advance New Cancer Therapies*, Julio Saez-Rodriguez, Aidan MacNamara, Simon Cook
- *Molecular-Scale Tools for Studying Mechanotransduction*, Andrew S. LaCroix, Katheryn E. Rothenberg, Brenton D. Hoffman
- *Positron Emission Tomography: Current Challenges and Opportunities for Technological Advances in Clinical and Preclinical Imaging Systems*, Juan José Vaquero, Paul Kinahan
- *Synergizing Engineering and Biology to Treat and Model Skeletal Muscle Injury and Disease*, Nenad Bursac, Mark Juhas, Thomas A. Rando
- *The Mechanobiology of Aging*, Jude M. Phillip, Ivie Aifuwa, Jeremy Walston, Denis Wirtz
- *Viral Vectors for Gene Therapy: Translational and Clinical Outlook*, Melissa A. Kotterman, Thomas W. Chalberg, David V. Schaffer

Access all Annual Reviews journals via your institution at www.annualreviews.org.

Web: www.bme.cmu.edu

The Department of Biomedical Engineering at Carnegie Mellon is built upon a long tradition of interdisciplinary research across departmental borders. Its decades-old research program emphasizes a collaborative network that balances four synergistic areas: basic engineering principles of living cells and tissues, engineering tools for biomedical research, interface between living and artificial materials, and clinical applications of biomedical engineering. Training programs encourage students to expand their vision and prepare them for a wide range of careers from academic research in basic sciences, to engineering entrepreneurship, to medical care.

BOOTH # 300

Case Western Reserve University

CD-adapco is the world's largest independent CFD-focused provider of engineering simulation software, support and services. It has over 30 years of experience in delivering industrial strength engineering simulation to a wide range of industries and application.

**Ph.D. Program**

- Students receive full tuition support and a living stipend.
- Thesis research starts within one month of matriculation, allowing immediate immersion in research.
- Progress evaluation with faculty feedback is conducted each semester to ensure timely graduation (average time to degree < 4.5 years).
- CMU offers a highly collaborative environment to promote interactions across disciplines.

Research-Option M.S. Program

- Designed to provide intensive research experience leading to publishable results.
- Typically completed in 16-21 months.

Practicum-Option M.S. Program

- Designed to facilitate career transition and advancement.
- Accelerated program typically completed in 9-16 months.
- Students may take a course with a substantial project component or perform a project with clinical exposure at a local medical center to meet the practicum requirement
- Students have the option to apply to a dual M.S. program with the Engineering & Technology Innovation Management (E&TIM).

The Department of Biomedical Engineering at Columbia University offers biomedical engineering education and research through B.S., M.S., Ph.D., and M.D./Ph.D. degree programs. Our department provides a surprising mix of the intellectual atmosphere of an Ivy League institution and the sense of community of a small college enriched by the diversity of New York City.

Launch Your Technical Leadership Career

Full-time engineering development program for high caliber new grads

Ready for an innovative and meaningful career? Interested in applying your talents to solve complex challenges that will save lives?

Then there's never been a better time to join Edwards Lifesciences, the global leader in the science of heart valves and hemodynamic monitoring. You'll thrive in our formal engineering development program, which combines a summer networking and educational program with ongoing personal mentorship, technical peer support, and senior management collaboration and guidance. It's the ideal foundation for launching your career.

Create Your Profile Today

A number of engineering backgrounds are welcome, including biomedical, mechanical, chemical, electrical, packaging, industrial, materials, manufacturing, quality and engineering management. You should be on track to earn a B.S. or M.S. in engineering between Fall 2016 and Spring 2017, as well as have a 3.0 GPA and proof of U.S. citizenship or permanent residency authorization.

Deadline is early October 2016 for both programs.

We're also accepting 2016 Summer Internship applications, which will be reviewed and finalized in February 2016.

Apply online in August for the Engineering New Grad Programs at Edwards.com/University

Engineering New Grad Programs

We offer program participants two unique technical engineering tracks in our Irvine, California and Draper, Utah locations.

Technical Development Program

This 18-month, full-time, broad-spectrum rotational program offers four hands-on work rotations that deliver multi-product exposure across all businesses and functions.

University Engineering Program

Gain a highly-focused specialization in one of four business units: Advanced Technology, Critical Care, Heart Valve Therapy, or Transcatheter Heart Valves.

Email: bioengineering@imperial.ac.ukWeb: www.imperial.ac.uk/bioengineering

Imperial College London is the only UK university to focus entirely on science, engineering, medicine and business. Our international reputation for excellence in teaching and research sees us consistently rated in the top 10 universities worldwide. The Department of Bioengineering at Imperial is the leading Department in the UK. Our research spans the breadth of bioengineering and falls under five themes: biomechanics; cellular and molecular bioengineering; detection, devices, design; implants and regenerative medicine and neural engineering. We offer a full range of academic and research opportunities for undergraduate (MEng) and postgraduate (MSc, MRes and PhD).

The Bioengineering Program at Lehigh holds true to our University's tradition of world-class excellence in education and research. We accomplish this with outstanding and dedicated faculty, a vibrant curriculum, state of the art technologies and a highly integrated and interdisciplinary curriculum. We offer a full range of academic and research opportunities for BS, MS and PhD students, from the nano-scale to the systems levels, with a focus on the advancement of knowledge of biological systems, the generation of new diagnostic tools, the improvement of medical therapies and innovation of medical devices. Broad categories of bioengineering research include Biomaterials, Biomechanics, Biomedical Imaging and Analysis, Biosensors, Biophotonics and Bioelectronics, Biophysics, Cell and Tissue Engineering, Computational Engineering, Modeling of Biological Systems, Molecular Bioengineering and Neuroengineering

STUDENTS . . .

Interested in a career in academia, the medical device industry, or consulting? Prepare for any of these through graduate programs offered by the **Department of Biomedical Engineering at Marquette University** in collaboration with the **Medical College of Wisconsin**:

BE THE DIFFERENCE.

M.S. in Biomedical Engineering Ph.D. in Biomedical Engineering

- Major research areas include imaging, rehabilitation engineering, robotics, modeling and computation, orthopedics, biomechanics, visualization and cardiovascular technologies, neurosystems, biosystems, and others.

M.S. in Healthcare Technologies Management

Unique 12-month program combines business, technology, and healthcare

- Prepares graduates for career advancement and management positions with medical device companies, hospitals, and healthcare consulting firms

M.E. in Biomedical Engineering (non-thesis)

Ph.D. in Functional Imaging

- Cutting-edge MR, MEG, CT and SPECT technologies; emphasizes clinical applications

FOR MORE INFORMATION, visit marquette.edu/biomedical-engineering/graduate-programs.php or marquette.edu/engineering/hctm. CHECK OUR WEBSITE OVER THE NEXT FEW MONTHS FOR A MAJOR ANNOUNCEMENT REGARDING GRADUATE PROGRAMS AT MARQUETTE UNIVERSITY AND THE MEDICAL COLLEGE OF WISCONSIN.

Biomedical Engineering at Tufts University draws from core disciplines such as engineering, biology, computer science, physics, chemistry, and physiology emphasizing an interdisciplinary approach to research and education. Strong emphasis is placed on interactions with faculty in Arts and Sciences and the professional schools. The Tissue Engineering Resource Center (TERC) was initiated in August of 2004 as a Resource Center supported through the National Institutes of Health P41 program. The core themes in the Center focus on functional tissue engineering achieved through a systems approach – integrating cells, scaffolds and bioreactors to control the environment in vitro for translation in vivo.

The UC Irvine Department of Biomedical Engineering's mission is to inspire engineering minds for the advancement of human health. Engineering focus areas include biomedical photonics/optoelectronics, biomedical nano- and microscale systems/fabrication, biomedical computation/modeling, and tissue engineering. These technology areas intersect with clinical areas of focus such as cardiovascular disease, the nervous system, cancer, and ophthalmology. Included in these opportunities are major campus research centers at the Beckman Laser Institute (biophotonics), the Edwards Lifesciences Center for Advanced Cardiovascular Technology, the Chao Family Comprehensive Cancer Center, the Integrated Nano-systems Research Facility, the Laboratory of Fluorescence Dynamics, and the Micro/nano Fluidics Fundamentals Focus Center. UCI is located in Orange County, home to more than 300 medical device companies.

Biomedical Engineering Graduate Program

The Biomedical Engineering Graduate Program is a multi-disciplinary program spanning the Schulich School of Engineering, the Cumming School of Medicine, and the Faculties of Kinesiology, Veterinary Medicine, Science, and Nursing.

Broad research areas of the faculty in the program include:

- Bioelectricity
- Biomechanics
- Cell and Tissue Engineering
- Medical Imaging
- Biomedical Instrumentation

Graduate programs offered:

- MSc (thesis based, typical duration 2 years)
- PhD (thesis based, typical duration 4 years)

For Program Details including application deadlines visit,

APPLYING ENGINEERING SOLUTIONS TO HEALTH-RELATED PROBLEMS

Bioengineering at University of Colorado Denver | Anschutz Medical Campus: a comprehensive bioengineering education on a world-class medical campus where students get hands-on experience with faculty, clinicians, and industry professionals.

Degrees offered: BS, MS, PhD

Dual degrees: MD/PhD, MS/MBA, MD/MS

Research areas:

Cardiovascular biomechanics and hemodynamics
Diabetes
Imaging
Biophotonics
Rehabilitation engineering and assistive technology
Neuromuscular control and neuroscience engineering
Spinal and orthopedic biomechanics
Vascular surgery and interventional radiology
Polymers and drug delivery
Biomedical entrepreneurship

New College. New Medicine.

The Department of Bioengineering at the **University of Illinois at Urbana-Champaign** is proud to be a driving force in the creation of the first college of medicine focused, from the beginning, on the intersection of engineering and medicine.

The university expects to accept the first cohort of medical students in the new college in Fall 2018.

Further enhancing the integration of engineering and medicine is the exciting addition of the Jump Simulation Center, to be built within Everitt Laboratory. Scheduled for a \$55 million renovation beginning in 2016, Everitt Lab is the future home of the **Department of Bioengineering at Illinois.**

UF BME is made possible by the vision and generosity of Dr. J. Crayton Pruitt and his family. Since its inception in 2002, the department continues to excel in interdisciplinary research that merges engineering with biology and medicine. The department offers both a graduate program and an undergraduate program (2012 inaugural class), with particular strengths in Neural Engineering, Imaging and Medical Physics, Biomaterials and Regenerative Medicine, and Biomedical Informatics and Modeling. In the past year, the department has grown to 22 faculty and will continue that growth up to 25-30. UF BME is one of only a few departments in the nation to be co-localized with a top-ranked medical school, veterinary school, and dental school. The department is also uniquely positioned to contribute to clinical translation of biomedical technologies because of the outstanding resources for entrepreneurship and commercialization in the Gainesville area.

The Graduate Program in Biomedical Engineering at the University of Rochester provides training at the Masters and Doctoral level. Multiple active centers and affiliated groups offer collaborative research in Biomedical Optics; Neuroengineering; Biomechanics; Medical Imaging; Biomaterials, Nanotechnology and Cell & Tissue Engineering. With access to over 50 laboratories on the River Campus and the adjacent Medical Center, students can tailor their own interdisciplinary and translational training experience. We also offer an MS program focused on Medical Technology & Innovation, including a clinical practicum and full-year design experience.

PITT GRADUATE PROGRAM IN BIOENGINEERING

One of our distinctive strengths in interdisciplinary research is our relationship with Pitt's School of Medicine and Schools of the Health Sciences, as well as with the McGowan Institute for Regenerative Medicine. Bioengineering is also deeply embedded within clinical research at University of Pittsburgh Medical Center, one of the top ranked hospital networks in the country. Faculty have laboratories within clinical departments, which allow graduate students to apply engineering principles directly to patient care in bench-to-bedside settings.

Most importantly for our graduate students, Pitt is an urban campus in one of the most livable cities in the world. Its world-class research institutions, corporate headquarters, public amenities, healthcare, low cost of living and relative safety have earned Pittsburgh accolades from *Forbes*, *Kiplingers*, *National Geographic*, *The Economist*, and *US News & World Report*. Both the University and the City provide the perfect match for an outstanding graduate school environment.

Email: teasdalek@wustl.eduWeb: <http://bme.wustl.edu/>

In partnership with our world-class medical school, our department emphasizes interdisciplinary training from top-notch faculty. Our main research areas are biomaterials and tissue engineering; cardiovascular engineering; imaging; molecular, cell and systems engineering; and neural engineering. Our department has more than 75,000 sq. ft. of state-of-the-art facilities. We offer BS, MS, MEng, MS/MA, PhD and MD/PhD degrees.

Wayne State University

818 W. Hancock
Detroit, MI 48201

Phone: 313-577-1345

Email: nmurthy@wayne.eduWeb: www.bme.wayne.edu

The Biomedical Engineering Department at Wayne State University offers BS, MS, PhD and MD/PhD degrees. It is involved in some of the newest ground breaking research in the field. From the use of biomaterials to aid in the regeneration of nerves and the tailoring of these materials to optimize cellular response, to the use of advanced human modeling to study the biomechanics of impact injuries, and the study of sports related injuries and prevention of these injuries, Wayne State will play a major role in the development of new standards to better the quality of human life. Our past research has led to improvement in the standards of the automotive industry, better safer equipment for our soldiers, and a better understanding of injury biomechanics to help prevent and repair damage from these injuries.

BOOTH # 821

Whitaker International Program

809 United Nations Plaza
New York, NY 10017

Phone: 212-984-5442

Email: saltaf@iie.orgWeb: www.whitaker.org

The Whitaker International Program provides funding to emerging U.S.-based leaders in biomedical engineering, with a goal of building international bridges. Grant projects – including research, coursework, public policy work – are intended to enhance both the recipient's career and the BME field. Administered by the Institute of International Education.

Graduate students in WPI's Biomedical Engineering (BME) Department collaborate with scientists and engineers across disciplines, seeking breakthroughs in regenerative medicine, innovations in bioinstrumentation, and major steps forward in healthcare. Whether in the classroom or the lab, the focus remains squarely on solving real-world problems. BME graduates have gone on to rewarding careers at major medical and biomedical research centers across academia, government, and the medical device industry.

BIOENGINEERING AT THE JONSSON SCHOOL

The Erik Jonsson School of Engineering & Computer Science at The University of Texas at Dallas offers its students state-of-the-art facilities, 19 bioengineering tenure-track faculty, collaboration opportunities with affiliated universities, and a premier location near the Telecom Corridor—home to more than 600 high-tech companies.

OUR RESEARCH FOCUS AREAS INCLUDE:

- Biosensors and Bioelectronics
- Neuroengineering
- Systems Biology
- Biomechanics
- Biomaterials
- Prosthetics

Whitaker International Program: Fellows, Scholars & Summer Programs

Grants For Biomedical Engineering Study or Research Abroad

The **Whitaker International Program** provides young biomedical engineers, and those in a related field, the opportunity to expand their geographic and academic horizons.

Potential activities to pursue overseas include:

- conducting research at an academic institution or with a corporation
- interning at a policy institute
- studying for a post-baccalaureate degree
- pursuing post-doctoral work

For more information, including program details, application requirements, and the online application, visit our website.

ACTIVITIES

A Whitaker International grant experience will ideally advance your career, while also advancing the goal of increased international collaboration in BME.

Activities could include:

Type of Awards:

- **Fellows Award:** one year award after receiving your bachelor's degree.
- **Scholars Award:** for post-doctoral work.
- **Summer Award:** for BME coursework or research towards your Master's or Ph.D. degree.

GENERAL INFORMATION & PRESENTER INFORMATION

Meeting Location

Tampa Convention Center

333 S Franklin Street
Tampa, FL 33602
(813) 274-8511

Tampa Marriott Waterside

(Headquarters Hotel)
700 South Florida Avenue
Tampa, Florida 33602
(813) 221-4900

Registration

Paid registration is required for admission to all meeting functions including scientific sessions, posters, exhibits, breaks and the BMES BASH on Friday evening. BMES cancellation policy may be found on any registration form. Any applicable refunds will be issued post-meeting. Substitutions are permitted with written permission from the original registrant. Additional social event tickets including the Celebration of Minorities in BME Luncheon, and the Women in BME Luncheon are separate and above BMES meeting registration.

On-Site Registration Hours

Wednesday, October 7	1:00pm – 7:00pm
Thursday, October 8	7:00am – 6:00pm
Friday, October 9	7:00am – 6:00pm
Saturday, October 10	7:00am – 2:00pm

Exhibits

Exhibit Hall, Tampa Convention Center

Exhibits are located in the Exhibit Hall at the Tampa Convention Center. Exhibits will be open:

Thursday, October 8	9:30am – 5:00pm
Friday, October 9	9:30am – 5:00pm
Saturday, October 10	9:30am – 1:30pm

Dream Teams & Centers

Throughout the program, presentations are recognized as DREAM TEAMS & CENTERS. These teams consist of a minimum of three independent principal investigators. It truly highlights the team-nature of science and the ability of bioengineers to work effectively with others.

BMES Presenter Information Platform Presentations

Each technical session room will be equipped with a PC-compatible computer with a USB port and PowerPoint along with an LCD projector, screen and a lectern with microphone.

During the half hour before your session begins, please upload your presentation onto the computer using a memory stick or flash drive. Because of the potential difficulty transferring some Mac files to PC format, we encourage you to avoid use of animation if there is a question about transferability.

Please do not try to connect your own laptop. Please note, it will not be possible to provide special equipment. Any additional equipment will need to be supported by the presenter. Although BMES has paid for WiFi throughout the convention center during the Annual Meeting, there will not be specific dedicated hard-wired internet access in the meeting rooms.

Sessions chairs should keep sessions on the listed schedule so attendees can move back and forth among sessions. In most cases, presentations should be done in twelve minutes, allowing three minutes for questions and answers and transition to the next speaker.

Poster Presentations

Posters will be presented Thursday, Friday and Saturday. Posters are to be displayed all day on assigned day. Authors must be present during specified viewing with authors as listed in Scientific Program:

Thursday	9:30-10:30am and 3:30-4:30pm
Friday	9:30-10:30am and 4-5pm
Saturday	9:30-10:30am

All posters will be in the Exhibit Hall of the Tampa Convention Center. Posters are numbered with a card corresponding to the numbers assigned in the program.

Speaker Ready Room

Registration Area, Exhibit Hall of the Tampa Convention Center

In the BMES Speaker Ready Room you will find cables, LCD projector and screen to practice your presentation. Please bring your own laptop.

Wednesday, October 7	1:00pm – 5:00pm
Thursday, October 8	7:00am – 5:00pm
Friday, October 9	7:00am – 5:00pm
Saturday, October 10	7:00am – 2:30pm

Program Highlights

Don't Miss These Events

WEDNESDAY, October 7

Meet the Faculty Candidate Forum

3:30pm - 5:30pm

Exhibit Hall, Tampa Convention Center

The "Meet-the-Faculty Candidate" poster session provides a great opportunity for faculty, recruiters, and Department Chairs to speak directly with current graduate students and postdoctoral researchers who are seeking faculty positions.

The BMES 2015 Annual Meeting MEET THE FACULTY CANDIDATE FORUM was only open to those who are actively on the market for the 2015-2016 recruiting cycle. Candidates submitted for consideration in August. The accepted candidates' CVs can be viewed at www.bmes.org.

WEDNESDAY, October 7

Welcome Reception

5:30pm - 7:00pm

2nd Floor Foyer, Tampa Convention Center

Light refreshments will be served. All registrants are invited to attend.

Sponsored by

WEDNESDAY, October 7

VIP Reception *invitation only*

6:30pm - 7:30pm

Il Terrazzo, Tampa Marriott Waterside

Sponsored by

WEDNESDAY, October 7

LGBT Desert Social *ticket purchase required*

8:00pm - 9:00pm

Room 4, Tampa Marriott Waterside

***additional registration and \$10 ticket required.**

Wendy Thomas, Associate Professor of Bioengineering at the University of Washington, is the inaugural speaker for the BMES LGBT social hour. As a member of the LGBT community, Prof. Thomas has served as an open role model and mentor for numerous trainees and a champion for diversity issues. She will speak about her experiences as an out member of the community, her experiences communicating with students and colleagues, and the faculty search process. Introductory remarks will be made by Shelly Peyton, Assistant Professor of Chemical Engineering at the University of Massachusetts, Amherst. Prof. Thomas' talk will be followed by dessert and a cash bar.

LGBT Social Sponsored in part by: Georgia Tech and Emory University, University of Massachusetts, Rice Institute of Biosciences and Bioengineering, University of Washington and other anonymous donors.

THURSDAY, October 8

BMES State of the Society Address & Fellows Induction

10:30am

Ballroom BC, Tampa Convention Center

Please join us for a dialogue with BMES President Rich Hart and other leaders of the Society.

FRIDAY, October 9

BMES Bash at the Tampa Convention Center

6:30pm - 9:00pm

Riverwalk Terrace

Admission to the BMES BASH will require a wristband. **Please exchange your ticket (in your badge envelope) for your wristband at the Information Counter (Level 1) or BMES Registration.**

Refreshment Breaks

Please note your meeting registration includes morning and afternoon refreshments breaks on Thursday, Friday and Saturday. All refreshment breaks will be in the Exhibit Hall.

Thursday morning refreshment break sponsored by

Thursday afternoon refreshment break sponsored by

THURSDAY, October 8

Celebration of Minorities in BME Luncheon*

12:30-1:45pm

Ballroom D, Tampa Convention Center

***additional registration and \$25 ticket required**

This is the sixth year of this event hosted by the BMES Diversity Committee to create a community and network within the Society fostering support and professional development of minorities in BMES at all levels. Everyone is invited to attend, as diversity only increases when all groups play a part. The luncheon complements the Diversity Award lecture on Saturday and the Women in BME Luncheon on Friday.

Leveraged Innovation: Incorporating, New Opportunities, Varying Tactics, Opposing the Norm!

Christine S. Grant, PhD, Associate Dean of Faculty Affairs and Professor of Chemical and Biomolecular Engineering at North Carolina State University

In this presentation, Dr. Grant will share her experiential perspectives in engineering and inspire the audience to: (i) identify the interfaces in their lives, specifically at the intersection of the personal and professional realms, (ii) create exemplar examples of people and systems that manage seemingly conflicting realms well, and (iii) execute a plan aligned with their own life goals. The discussion will include strategic approaches to the myriad interfaces that exist in the professional and personal realms. The resulting plan will be both flexible and incorporate paradigm-shifting opportunities for "career upgrades." The balance between the public and private components of this plan enables us to selectively invite allies to successfully leverage our core strengths with their external networks, creating new pathways for success.

Dr. Christine Grant is a tenured Full Professor of Chemical and Biomolecular (CBE) engineering and serves as the Associate Dean of Faculty Advancement in the NC State College of Engineering. She is one of only 4 African-American women ChE Full Professors in the U.S. Grant is working to change the under-representation of women and minorities in STEM through targeted empowerment of both women and underrepresented minority (URM) academics at all levels in the STEM pathway. An NSF Presidential Award for Excellence in Science, Math and Engineering Mentoring (PAESMEM) awardee, Grant was selected as a Boeing Senior Fellow of the National Academy of Engineering's Center for the Advancement of Scholarship on Engineering Education (CASEE). She has received the AIChE Minority Affairs Committee Distinguished Service Award, Council for Chemical Research Diversity Award, and YWCA Academy of Women in Science and Technology award. An entrepreneur, her company, Leveraged Empowerment a unit of CoolSci Productions LLC empowers STEM students, faculty and professionals towards excellence in both academic career and personal development via workshops, keynotes and seminars.

FRIDAY, October 9

Women in BME Luncheon*

12:15pm-1:30pm

Ballroom D, Tampa Convention Center

***additional registration and \$25 ticket required**

Gordana Vunjak-Novakovic, PhD, Mikati Foundation Professor of Biomedical Engineering and a Professor of Medical Sciences at Columbia University

Achieving gender equality in science will require formulating and implementing strategies to overcome the political, administrative, financial, and cultural challenges that exist in the current environment. Dr. Vunjak-Novakovic will describe how she navigated her academic career path, becoming a leader in the field stem cells and tissue engineering and founder of EpiBone and TARA Biosystems. Dr. Vunjak-Novakovic will propose an initial shortlist of recommendations to promote gender equality in science and stimulate future efforts to level the field.

Gordana Vunjak-Novakovic is the Mikati Foundation Professor of Biomedical Engineering, and a Professor of Medical Sciences at Columbia University. She directs the Laboratory for Stem Cells and Tissue Engineering and the Stem Cell Imaging Core, and co-directs the NIH Tissue Engineering Center and the Craniofacial Regeneration Center. She is the lead for bioengineering for the Columbia Stem Cell Initiative. She obtained her Ph.D. in chemical engineering at the University of Belgrade in Serbia where she stayed on faculty and became Full Professor in 1993. She spent twelve years at MIT, to join Columbia University in 2005. The focus of her research is on engineering human tissues using stem cells, biomaterials and bioreactors, for regenerative medicine and study of development and disease. She was elected to the National Academy of Engineering and National Academy of Medicine.

Thursday, October 8

ABioM SIG Business Meeting

7:00am - 8:00am

Convention Center, Room 35

Organizer: Kaiming Ye

BMES Diversity Committee Meeting

7:00am - 8:00am

Convention Center, Room 36

Organizer: Guillermo Ameer and Debra August

BMES National Meetings Committee Meeting

8:00am - 10:00am

Convention Center, Room 31

Organizer: Christine Schmidt

Cellular and Molecular Bioengineering - Editorial Board

12noon - 1:30pm

Marriott, Florida Salon I

Organizer: Christina Dzikowski

BMES Membership Committee Meeting

1:30pm - 2:30pm

Convention Center, Room 36

Organizer: Martine LaBerge

BMES International Affairs Committee Meeting

1:30pm - 2:30pm

Convention Center, Room 31

Organizer: Phil LeDuc

Friday, October 9

BMES Education Committee

7:00am - 8:00am

Convention Center, Room 36

Organizer: Don Gaver

2016 BMES Annual Meeting Committee Meeting

8:00am - 10:00am

Convention Center, Room 31

Organizer: Song Li

Ethics Committee

9:30am - 10:30am

Convention Center, Room 36

Organizer: Subrata Saha

Medical Devices SIG Business Meeting

12:30pm - 1:30pm

Convention Center, Room 39

Organizer: Walt Baxter

Saturday, October 10

BMES Industry Advisory

Committee Meeting - (Invitation only)

8:30am - 9:30am

Convention Center, Room 39

Organizer: Ben Noe

BMES Student Affairs Committee Meeting

9:30am - 10:30am

Convention Center, Room 36

Organizer: Elizabeth DaSilva

BMES Board of Directors Meeting & New Board Orientation

1:00pm - 3:30pm

Convention Center, Room 24

Organizer: Rich Hart

CELEBRATING ONE YEAR!

PHYSICAL REVIEW APPLIED

journals.aps.org/prapplied

Physical Review Applied is APS's newest journal, dedicated to publishing the highest quality research at the intersection of physics and engineering.

The Editors encourage the submission of research that:

- Significantly advances the field of applied physics.
- Is forward thinking, with a clear vision for future directions.
- Offers qualitative, not merely quantitative or incremental, advances over prior work.
- Crosses disciplines, to interest more than a specialized group of readers.

CAREER AND PROFESSIONAL DEVELOPMENT SESSIONS

The career and professional development sessions offer career guidance for job seekers ranging from entry level to experienced professionals. The sessions will highlight both traditional and alternative careers available to BMEs.

Thursday, October 8

How to Find a Job in Industry

8:00am - 9:00am

Convention Center, Ballroom A

The biomedical engineering field is growing rapidly. Biomedical engineering opens the door to an ever-growing amount of job opportunities in industry. Hear from experts in human resources and BME professionals how to search for industry jobs and what to do when you find them.

BME Careers in Industry, Government and Academia

9:15am - 10:15am

Convention Center, Ballroom A

Biomedical Engineering professionals from industry, government and academia will share their career paths, educational training, insight into the hiring market, and suggestions for students and recent graduates.

Student and Early Career programming is sponsored by

Transitioning from Academia to Industry Panel

4:00pm - 5:30pm

Convention Center, Ballroom A

This session will explore the industry career paths available to biomedical engineers, what companies look for when hiring undergraduate and graduate students, the interview process, and desired skills of an entry-level biomedical engineer.

Rapid Resume... Review and Critique

Experienced BME professionals or BME related disciplines will review an electronic or hard copy of your resume and work with you to edit and improve your resume. While this has been done successfully at past meetings in a roundtable format, recommendations were made to revise the format so attendees can seek more one-on-one advice.

Convention Center, Room 24

Thursday, October 8

2:00pm - 4:00pm

Friday, October 9

2:00pm - 4:00pm

Friday, October 9

BMES Student Chapter Outstanding Chapter Best Practices

8:30am - 9:30am

Convention Center, Room 12

This workshop will feature the Student Chapter that was awarded the BMES Outstanding Student Chapter Award, along with the Student Chapter awarded the Commendable Achievement Award. During this workshop each Chapter will provide their chapter best-practices, allowing students to ask questions, exchange ideas and implement new goals for the upcoming year.

BMES Student Chapter - Outreach and Mentoring Best Practices

9:30am - 10:30am

Convention Center, Room 12

This workshop will feature the Student Chapter that was awarded the BMES Outstanding Mentoring Award, as well as the Student Chapter awarded the Outstanding Outreach Award. This workshop will begin with the Mentoring and Outreach presentations from both awardees, which will serve to provide information on chapter best-practices, allowing students to ask questions, exchange ideas and implement new goals for the upcoming year.

What You Need to Know to Get a Job in Industry, Government and Academia after Your Ph.D.

9:00am - 10:30am

Convention Center, Ballroom A

Take control of your career! Whether you are employed or searching for a job, this session will provide a structured "road-map" to help you develop and execute a short-term career plan. Learn action-packed steps to get started with and apply a new approach throughout your career. In addition, this session will teach you how to build a mentorship base. Who should your mentors be? Learn your role as the "mentee" and what to expect from your mentors. These are tips you will be able to implement successfully right away. Remember: nobody cares about your career more than you do; you owe it to yourself to learn new ways to get ahead!

BMES Undergraduate Student Design Competition – Friday

1:45pm - 3:15pm

Convention Center, Ballroom BC

(funding with a grant from Medtronic)

The theme of this year's first competition is Bioinstrumentation. The session will bring together the top 6 winning design teams that were selected out of 16 applicants. The top 6 include Columbia University, UC Berkeley, Virginia Commonwealth University, Virginia Tech, Worcester Polytechnic Institute and Yale University. This competition allows each design team to orally present their projects and students to ask questions after each presentation.

Upon completion of all presentations, the judges will select and announce the top 3 winners. Winners will receive First, Second and Third place prize money during the awards ceremony on Saturday, October 10th during the Plenary.

Career Fair – Friday

1:00pm - 5:00pm

Convention Center, Exhibit Hall

This event is designed to connect organizations looking to hire high-level people with specialized knowledge and innovation to new product and process development, teaching/training, scientific research, critical resource management, and more.

Start-ups and Venture Capital: Navigating the Funding Process and Investment Pitches

2:00pm - 3:00pm

Convention Center, Room 12

This will be a forum for start-up companies to pitch to venture capitalists, angel investors, and large company venture groups.

Tech Transfer and Licensing - Best Practices in Transferring Technologies from Academia and the Clinic into Industry

3:15pm - 5:00pm

Convention Center, Room 12

1st segment: The first segment of this session will describe what companies seek in transferrable technologies, when and how to transfer, the ins and outs of licensing, and best practices for commercializing inventions and technologies derived from academic and clinical settings. Panelists will include distinguished professionals with expertise in the fields of university tech transfer, law, incubator support, and venture capital investment.

2nd segment: The second segment of this session will be a forum for select researchers and academics to pitch to select companies interested in sponsoring research or licensing a technology. The technology topics will align with the commercial interests of the participating companies. All members are welcome to sit in the audience to watch pitches.

Alpha Eta Mu Beta (AEMB) Programs

Alpha Eta Mu Beta Annual Grand Meeting

Thursday, October 8

4:00pm - 5:00pm

Convention Center, Room 25

Session Co-chairs: Bhavit Vora, BS, Justin Huckaby, BS, Morgan Elliott, BS, David Wolfson, BS, Alicia Fernandez-Fernandez, DPT, PhD, Marcia A. Pool, PhD, Teresa A. Murray, PhD, Dominic E. Nathan PhD.

At this annual grand meeting, members representing chapters nationwide will come together to discuss important contemporary events relating to AEMB. (Attendance is mandatory for all AEMB members). If you would like to learn more about AEMB or start a new chapter at your school, please consider attending this session and speak to any of the national officers.

Alpha Eta Mu Beta Reception (Invitation Only)

Thursday, October 8

5:30pm - 7:00pm

The Annual AEMB reception will be held at the Embassy Suites Tampa (across the street from the Convention Center).

Session Co-chairs: Bhavit Vora, BS, Justin Huckaby, BS, Morgan Elliott, BS, David Wolfson, BS, Alicia Fernandez-Fernandez, DPT, PhD, Marcia A. Pool, PhD, Teresa A. Murray, PhD, Dominic E. Nathan PhD.

The Annual AEMB reception will be held at The Embassy Suites Tampa Downtown Convention Center. We will be presenting the national awards and charters for new chapters during this session. Furthermore, this session is a networking opportunity to meet with other fellow members from AEMB chapters, representatives from industry and academia. This session is open to all AEMB student and faculty members, however tickets are required. For tickets, please contact aemb@alphaetamubeta.org

Alpha Eta Mu Beta - Mentoring for INnovative Design Solutions (MINDS) Workshop (by invitation only)

Friday, October 9

9:00am - 10:30am

Convention Center, Room 25

Session Chairs: Teresa Murray, PhD, Alicia Fernandez, PhD, DPT, Marcia A. Pool, PhD, Bhavit Vora, BS, Dominic E. Nathan, PhD

Participation in this workshop is by invitation after successfully competing for a spot on a design team. Student applicants will submit an idea for a novel device that uses wearable electronics or telemetry technology for the biomedical applications (please see <http://www.alphaetamubeta.org/> for application instructions). Students will work in teams of 4 based on similar interests. Each team will have a men-

tor who will assist the team in creating a potentially marketable innovation. The mentor will help students incorporate key design considerations, including (i) market considerations for commercialization, (ii) design development and testing, (iii) quality control, (iv) regulatory strategy, and (v) intellectual property protection. After the workshop, students will meet virtually (e.g., via Skype) for up to 6 months to further refine their innovation. They will also be required to produce a more extensive presentation of their product, such as a video for a Kickstarter campaign, or a PowerPoint presentation for a group of potential investors. We will alert participants about opportunities for design contests, investment, and grant programs to further promote and develop their innovations.

Alpha Eta Mu Beta Annual Ethics Session - Genomic Testing and Personalized Medicine, to What Extent is Knowing a Good Thing?

Friday, October 9

2:00pm - 3:00pm

Convention Center, Room 25

Session Chair: Robert D. Frisina, PhD, Bhavit Vora, BS

Today's biomedical engineers are advancing many technical areas of bioengineering at a very rapid pace. Impacts of recent and ongoing advances in tissue engineering and microelectronic fabrication are revolutionizing progress in the arenas of personalized medicine, especially with regards to molecular genetics and genomic testing. Technological progress in these areas have significantly improved quality of care and the efficacy of treatment. However, one of the professional conundrums in the area of genomic testing pertains to moral and ethical challenges, especially with regards to newborns and children. The basic dilemma here focuses upon the decisions that parents have to make for their young children, since children cannot make the decision themselves, about how much genetic testing should be carried out, and what can or should be done with the results of that genetic testing. Genomic testing in children is becoming faster, more efficient and less expensive. So, now instead of testing for a few obvious genes for children who are born with birth defects, possible genetic syndromes, or easily diagnosed problems such as hearing loss or deafness, genetic screening immediately on the horizon will be able to screen for mutations in hundreds or thousands of genes routinely. So, for example, what if a newborn is discovered to have a gene that causes an age-related disorder such as Alzheimer's Disease? Should the parents be told? Should the child be told when they are old enough to know? What is the point of telling the family now, when there are still no preventative or curative treatments of Alzheimer's? Should it go in the child's medical record, where future employers, insurance companies or hackers can gain access to it? And you can imagine a number of biomedical scenarios where it is not obvious what to do with genetic information such as this. Another

challenging issue is how to obtain the necessary blood samples from a newborn, which has a relatively small blood volume. Umbilical cord blood has been mentioned as a good source, since the umbilical cord is normally cut (sometimes by the proud Father) and discarded with the placenta. However, even this seemingly innocent, harmless procedure has now been called into question as some new evidence suggests that babies do better when the cord blood is allowed to flow into the baby for awhile, precluding a quick cutting of the cord, as has traditionally been done. So, as biomedical engineers work with nurses, doctors, insurance companies and other players in our healthcare system, these issues will come up without clear-cut answers available to them.

Alpha Eta Mu Beta (AEMB), the International Biomedical Engineering Honor Society, is committed to promoting ethics in the field of biomedical engineering. This year, AEMB is honored to host Dr. Robert D. Frisina. Dr. Frisina is a Professor and Director of the Department of Chemical and Biomedical Engineering and also the director for the Communication Sciences and Disorders lab at the University of South Florida. In addition, Dr. Frisina is the director of the Global Center for Hearing and Speech Research and holds joint appointments as Professor at the National Technical Institute for the Deaf (one of two colleges for the deaf in the world), and at the University of Buffalo Center for Hearing and Deafness. Dr. Frisina's research is focused on the function and disorders of the auditory system, more specifically in the critical areas of hearing loss and deafness for which there are no existing cure. More information about Dr. Frisina can be found at his official website (<http://www.eng.usf.edu/~rfrisina/>).

Whitaker International Program: Funding Opportunity for Young Biomedical Engineers

Friday, October 9

8:00am - 9:30am

Convention Center, Room 39

The Whitaker International Program, founded in 2005 provides funding to emerging U.S.-based leaders in biomedical engineering to conduct a study and/or research project, with the underlying objective of building international bridges. Grant projects – including research, coursework, public policy work – are intended to enhance both the recipient's career and the BME field. The goal of the Whitaker Program is to assist the development of professional leaders who are not only superb scientists, but who will advance the profession through an international outlook. The Whitaker Program has two sub-programs: Fellows and Scholars Program, and the Summer Program. For more information, including program details, the online application and deadlines, visit: <http://www.whitaker.org>.

1. Sabeen Altaf (Session Chair)

Senior Program Manager, Science and Technology Programs
Institute of International Education

2. Caitlin Anderson

Whitaker International Fellow, 2013

Host Institution: Kilimanjaro Clinical Research Institute, Tanzania
Title: Sensitive antibody detection for Mycobacterium tuberculosis infection in the Tanzanian setting

3. Adam Gormley

Whitaker International Scholar, 2012

Host Institution: Imperial College London, UK
Title: Self-Assembled Biomaterials and Enzyme Enabled Polymerizations

4. Carson Ingo

Whitaker International Fellow, 2013

Host Institution: Leiden University, Netherlands
Title: An opportunity in innovation training in medical device development and how it has directed my future

5. Metasebya Solomon

Whitaker International Fellow, 2013

Host Institution: St. Paul's Hospital Millennium Medical College, Ethiopia
Topic: Biomedical Engineering Center in a Low-funding Hospital for Improved Healthcare: Challenges and Applied Practical Solutions

6. Kelli Summers

Whitaker International Fellow, 2013

Host Institution: Medical University of Graz, Austria
Topic: Novel IL-10 Coated Proticles for Detecting Unstable Atherosclerotic Lesions

2015 Awards Recipients

One of the more important — and most enjoyable — tasks of the Society is to recognize contributions to the intellectual and professional development of the field of biomedical engineering. On behalf of the awards committee we would like to thank all the members who submitted nominations and provided letters of support and for the high quality of their nominees. Congratulations to the following award winners.

Robert A. Pritzker Distinguished Award Lecture

Martin Yarmush, MD, PhD
Rutgers University

NIBIB Lecture

Wendy M. Murray, PhD
Northwestern University

Distinguished Service Award Winner

Gilda Barabino, PhD
The City University of New York

Rita Schaffer Young Investigator Award Lecture

Jonathan F. Lovell, PhD
State University of New York at Buffalo

Diversity Award Lecture

The City College of New York Department of Biomedical Engineering
New York, NY

Annals of Biomedical Engineering (ABME) Awards

Presented at Friday afternoon plenary session at 5:15pm

Each year, *The Annals of Biomedical Engineering*, the BMES flagship journal, offers awards for the most downloaded and the most cited papers. This year's awards go to:

Most Downloaded Article

Smartphones for Cell and Biomolecular Detection Smartphones for cell and biomolecular detection.

Xiyuan Liu, Tung-Yi Lin, Peter B. Lillehoj

November 2014, Volume 42, Issue 11, pp 2205-2217

Most Cited Article

Porous Implants Modulate Healing and Induce Shifts in Local Macrophage Polarization in the Foreign Body Reaction

Eric M. Sussman, Michelle C. Halpin, Jeanot Muster, Randall T. Moon, Buddy D. Ratner

July 2014, Volume 42, Issue 7, pp 1508-1516

BMES Extended Abstracts: Design and Research Awards:

Presented at Friday morning plenary session at 10:30am

Graduate Students

Sebastian Barreto
Johns Hopkins University

Brian Evans
Vanderbilt University

Lisa Tostanoski
University of Maryland - College Park

Abigail Tyson
Virginia Tech

Undergraduate Students

Garrett Cyprus
Virginia Commonwealth University

Sarah Denning
Bucknell University

Talia Greenstein
Rutgers University

Sagar Kaushik
University of Alabama at Birmingham

Andrea Mazzocchi
Rochester Institute of Technology

Katerina Stojkova
Illinois Institute of Technology

Kelly Tong
Bucknell University

BMES Student Chapter Awards

Presented at Saturday morning plenary session at 10:30am

2015 Outstanding Achievement Award
BMES Student Chapter at University of Pennsylvania

2015 Commendable Achievement Award
BMES Student Chapter at the University of California - Davis

2015 Outreach Program Award
BMES Student Chapter at University of Texas - Arlington

2015 Outstanding Mentoring Award
BMES Student Chapter at The Ohio State University

2015 Commitment to Excellence Award
BMES Student Chapter at University of California, Davis

2014 Fleetest Feet Award
BMES Student Chapter
Virginia Tech/Wake Forest - 105,672 miles

Cellular and Molecular Bioengineering

Congratulates the 2015 CMBE Young Innovators!

September 2015 issue, edited by Nicholas Peppas, Cynthia Reinhart-King, and Christine Schmidt

Danielle Benoit
Univ. Rochester
Akhilesh Gaharwar
Texas A&M Univ.
Anjelica Gonzalez
Yale Univ.
Zhen Gu
Univ. North
Carolina, and
North Carolina
State Univ.
Brenton Hoffman
Duke Univ.
**Princess
Imoukhuede**
Univ. Illinois
Urbana-
Champaign

Deok-Ho Kim
Univ.
Washington
Shelly Peyton
Univ.
Massachusetts

Univ.

*See the Young Innovators present their work
on Friday, October 9, 2015 at 8am and 1:45pm!*

- **Become a 2016 CMBE Young Innovator! Next competition is underway.**
- **Accepted authors will be invited to present their work in a special two-part platform session at the 2016 BMES Annual Meeting.**
- **To be eligible, candidates must be BMES members and hold a position at the Assistant Professor level or equivalent.**
- **Self nominations should include manuscript title with 200-word abstract, and a 2-page NIH-style biosketch, emailed to mike.king@cornell.edu.**

Key Dates for 2016 Young Innovators issue:
Nomination Deadline: November 6, 2015
Abstract Acceptance: December 11, 2015
Manuscript Submission: February 12, 2016
Print Publication: September 2016

**Celebration of Minorities
in BME Luncheon** 12:30pm - 1:45pm
Additional ticket purchase required
Convention Center, Ballroom D

PLATFORM SESSIONS Thurs-2 2:00pm - 3:30pm
See pages 82-89, Convention Center

Poster Viewing with Authors 3:30pm - 4:30pm
& Refreshment Break
Convention Center, Exhibit Hall

PLATFORM SESSIONS Thurs-3 4:30pm - 6:00pm
See pages 90-96, Convention Center

PLENARY SESSION 6:15pm - 7:30pm
Models for Funding Research
Convention Center, Ballroom BC

Hosted Receptions—Marriott
See page 57 for list

SPECIAL SESSION

Meet the Expert 2015 Schedule

New for 2015 is the "Meet the Expert" theater located on the Exhibition Hall floor. "Meet the Expert" was conceived as a method to allow attendees to explore various biomedical engineering disciplines and career options. The format of the theater allows closer interaction and personal connection with invited experts who will be presenting throughout the week.

Thursday, October 8

12:30 - 1:45PM

Engineer/Clinician to EntrepreneurSamit Gupta¹, Paul Torres²¹Graftworx, ²Universal Hospital Services

Description: The audience will be treated to an inside look of medical device entrepreneurship. The challenges and triumphs of entrepreneurship will be explained with real-world experiences from an engineer or clinician who launched a successful start-up. The speaker will be available for a Q&A session after the presentation.

2:00 - 3:30PM

Product Development Panel: From Idea to ProductRebecca DeLegge¹, Stuart Hart², Anthony Coston³, Elliot Botvinick⁴¹DeLegge Medical, ²Center for Advanced Learning and Simulation (CAMSLS), ³Alkermes, ⁴UC Irvine

Description: This session will provide an overview of the medical device development process. Join experts in medical device product development as they discuss aspects of the development process from idea to commercialization. They will share perspectives on product development relevant to start-ups (including university and clinician inventors) and large medical device manufacturers.

4:30 - 6:00 PM

Opportunity Recognition at the Interface of Medicine and TechnologyRashid Bashir¹, Amy Herr², Elliot Botvinick³¹Univ of Illinois at Urbana-Champaign, ²UC Berkeley, ³UC Irvine

Description: An in-depth look into what it takes to commercialize cutting edge technologies from academic labs through successful startups and spinoffs in medicine and healthcare. Meet entrepreneurs from academia and industry who worked on both sides of the equation, and learn how they identified the right opportunities and the right approaches for successful commercialization.

THURSDAY, October 8, 2015**8:00 AM - 9:30 AM****PLATFORM SESSIONS – THURS - I****Track: Cellular and Molecular Bioengineering
OP-Thurs-I-1 - Room 18****Cell Adhesion and Interactions with the Extracellular Matrix I****Chairs:** Michelle Previtera**8:00AM****High-throughput Matrix Platform Reveals Nonlinear Regulation of Oncogenic microRNA by Stiffness and Fibronectin Density**A. RAPE¹, M. ZIBINSKY¹, N. MURTHY¹, AND S. KUMAR¹¹University of California, Berkeley, Berkeley, CA**8:15AM****Biomechanical Characterization of Glycocalyx Mediated Leukocyte Adhesion**M. DRAGOVICH¹, K. GENEMARAS¹, AND X. F. ZHANG¹¹Lehigh University, Bethlehem, PA**8:30AM****Effect of Shear Stress on Streptococci gordonii Binding to Platelets in Infective Endocarditis**W. THOMAS¹, O. YAKOVENKO¹, B. BOURGEOIS¹, B. BENSING², T. IVERSON³, AND P. SULLAM²¹University of Washington, Seattle, WA, ²University of California San Francisco, San Francisco, CA, ³Vanderbilt University, Nashville, TN**8:45AM DREAM TEAM & CENTER****Disrupting Glycosphingolipid Biosynthesis on Human Myeloid Cells Results in Reduced Adhesion and Skipping Motion of Leukocytes**S. NEELAMEGHAM¹, N. MONDAL¹, G. STOLFA¹, A. ANTONOPOULOS², A. BUFFONE, JR.¹, G. ATILLA-GOKCUMEN¹, S. HASLAM², AND A. DELL²¹State University of New York, Buffalo, NY, ²Imperial College, London, United Kingdom**9:00AM****Mechanical Memory In Cadherin Mediated Cell Adhesion**S. SIVASANKAR¹, A. PRIEST¹, AND K. MANIBOG¹¹Iowa State University, Ames, IA**9:15AM****Provisional Matrix Citrullination Contributes to Altered Fibroblast Phenotypes**V. STEFANELLI¹ AND T. BARKER¹¹Georgia Institute of Technology, Atlanta, GA**Track: Cellular and Molecular Bioengineering
OP-Thurs-I-2 - Room 19****Cell Motility****Chairs:** Evan Scott**8:00AM****Confinement and Contractility Mediate Tumor Cell Decision Making in Bifurcating Microchannels**C. PAUL¹, D. SHEA¹, M. MAHONEY¹, A. CHAI¹, W-C. HUNG¹, AND K. KONSTANTOPOULOS¹¹Johns Hopkins University, Baltimore, MD**8:15AM****Immobilized and Soluble EGF Differentially Impact Cell Signaling and Migration in Keratinocytes**C. KIM¹, I. MITCHELL¹, M. KIM¹, P. KREEGER¹, AND K. MASTERS¹¹University of Wisconsin-Madison, Madison, WI**8:30AM****Collective Migration Slows Dynamics Of Directional Alignment During Electrotaxis**M. LALLI¹ AND A. ASTHAGIRI¹¹Northeastern University, Boston, MA**8:45AM****Matrix Alignment Mediates 3D Cell Protrusion Events Through Rac1 and FAK**S. CAREY¹, Z. GOLDBLATT¹, K. MARTIN¹, B. ROMERO¹, R. WILLIAMS¹, AND C. REINHART-KING¹¹Cornell University, Ithaca, NY**9:00AM****Integrated Modeling-Experimental Analysis of Actin Turnover Regulation in Migrating Glioma Cells**B. MCCULLOUGH¹ AND D. ODDE¹¹University of Minnesota, Minneapolis, MN**9:15AM****Role of Cytoskeletal Forces in Directional Cell Migration Within Three-dimensional Matrices**C. CHOI^{1,2}, M. KUTYS^{1,2}, K. DREZEK¹, AND C. CHEN^{1,2}¹Boston University, Boston, MA, ²Wyss Institute for Biologically Inspired Engineering at Harvard University, Boston, MA**Track: Cancer Technologies
OP-Thurs-I-3 - Room 20****Engineered Models of Cancer and Tumor Environment I****Chairs:** Claudia Fischbach, Bobak Mosadegh**8:00AM****Understanding and Modulation of the Glioma Stem Cell Microenvironment**L. NUSBLAT¹ AND C. ROTH¹¹¹Rutgers, The State University of New Jersey, Piscataway, NJ**8:15AM****Dynamic Matrix Stiffening Accelerates Tumor Progression in vivo**S. ALLEN¹, N. EBELT¹, R. STOWERS², C. VAN DEN BERG¹, AND L. SUGGS¹¹University of Texas at Austin, Austin, TX, ²Stanford University, Stanford, CA**8:30AM****Dynamically Stiffening Hydrogels Promote Malignant Transformation and Mechanical Signaling**M. ONDECK¹, S. WEI¹, J. YANG^{1,2}, AND A. ENGLER^{1,31}¹UC San Diego, La Jolla, CA, ²Moore's Cancer Center, La Jolla, CA, ³Sanford Consortium for Regenerative Medicine, La Jolla, CA**8:45AM****Non-microtubule Targeting Drug Increased Eradication Effect on Brain Tumor Cell Lines in Physical ConfinementL.**BUI¹, A. HENDRICKS¹, R. LEVINER¹, AND Y-T. KIM¹¹University of Texas at Arlington, Arlington, TX

9:00AM**Mesofluidic Platform for High Throughput Screening for Inhibitors of Metastasis**A. SPENCER¹, C. SPRUELL¹, S. NANDI¹, V. LE¹, M. CREXIELL¹, A. DUNN¹, AND A. BAKER¹¹University of Texas at Austin, Austin, TX**9:15AM****Changes in Extracellular Matrix Microarchitecture Drive Tumor Progression**K. WANG^{1,2}, B. R. SEO¹, M. QUIEN², L. HSU², S. MIN², C. FISCHBACH^{1,3}, AND D. GOURDON^{1,2}¹Biomedical Engineering, Cornell University, Ithaca, NY, ²Materials Science and Engineering, Cornell University, Ithaca, NY, ³Kavli Institute at Cornell for Nanoscale Science, Ithaca, NY**Track: Biomaterials****OP-Thurs-I-4 - Room 2 I****Biomaterials Scaffolds I****Chairs:** Anjana Jain, Yadong Wang**8:00AM****Electrochemical Compaction Yields Transparent and Stable Collagen Matrices for Corneal Applications**R. IYER¹ AND V. KISHORE¹¹Florida Institute of Technology, Melbourne, FL**8:15AM****Injectable Ultrathin Polymeric Films for Subretinal Cell Delivery**H. KAJI¹, T. KONDO¹, N. NAGAI¹, AND T. ABE¹¹Tohoku University, Sendai, Japa**8:30AM****Intrinsically Electroactive Biodegradable Photoluminescent Elastomers for Nerve Regeneration**D. SHAN¹ AND J. YANG¹¹Penn State University, State College, PA**8:45AM****Poling Electrospun Collagenous Scaffolds for Enhanced Piezoelectric Behavior and Cellular Response**A. H. RAJABI¹, T. LIVINGSTON ARINZEH¹, AND M. JAFFE¹¹New Jersey Institute of Technology, Newark, NJ**9:00AM****Versatile Click Alginate Hydrogels Crosslinked via Tetrazine-Norbornene Chemistry**R. DESAI^{1,2}, S. KOSHY^{1,2}, S. HILDEBRAND³, D. MOONEY^{1,2}, AND N. JOSHI^{1,2}¹Harvard University, Cambridge, MA, ²Wyss Institute for Biologically Inspired Engineering, Boston, MA, ³Harvard Medical School, Boston, MA**9:15AM****Improving Wound Healing in Diabetes via a Novel Cell Adhesive Thermoresponsive Dressing**Y. ZHU¹, Z. CANKOVA¹, M. MRKSICH¹, AND G. AMEER¹¹Northwestern University, Evanston, IL**Track: Translational Biomedical Engineering****OP-Thurs-I-5 - Room 22****Biomedical Device Design in Translational Research****Chairs:** Melinda Harman, Tamara Baynham**8:00AM****Compact Magnetic Levitation for Rapid, On-Site Disease Diagnostics**S. KNOWLTON¹ AND S. TASOGLU¹¹University of Connecticut, Storrs, CT**8:15AM****Multimolecule Electroporation-mediated Delivery Integrated on Chip (MEDiC) Towards Personalized Medicine**C. H. CHOI¹, M. OUYANG¹, AND S. C. HUR¹¹Rowland Institute at Harvard University, Cambridge, MA**8:30AM****Fiber Oscillation as a Mode for Gas Exchange Enhancement in the Paracorporeal Ambulatory Artificial Lung (PAAL) device**S. MADHANI¹, B. FRANKOWSKI¹, AND W. FEDERSPIEL¹¹University of Pittsburgh, Pittsburgh, PA**8:45AM DREAM TEAM & CENTER****Design And Development Of A Novel, Low-Cost, Portable, Autotransfusion Device For Application In Low Resource Settings**T. WONG¹, K. SIERZEGA¹, G. ROYTMAN¹, N. ROBINSON¹, P. KUTZ¹, S. GELLER¹, V. DOBIESZ¹, AND H. ESMALBEIGI¹¹University of Illinois at Chicago, Chicago, IL**9:00AM****Bedside Washing of Stored Red Blood Cells: A Simple Apparatus Based on Microscale Sedimentation in Normal Gravity**G. KHANAL¹, R. HUYNH¹, K. TORABIAN¹, S. GIFFORD¹, AND S. SHEVKOPLYAS¹¹University of Houston, Houston, TX**9:15AM****Endotracheal Tube Geometry and Restraint Affect Forces and Displacements Within the Upper Airway: System Design Considerations**J. WAGNER¹, M. DE ACHAVAL¹, C. LANNING¹, AND R. SHANDAS¹¹University of Colorado, Aurora, CO**Track: Biomaterials****OP-Thurs-I-6 - Room 23****Micro and Nano Structured Materials I****Chairs:** April Kloxin, Kristopher Kilian**8:00AM****Sequential Click Reactions for the Polymerization and Functionalization of PEG hydrogel Microparticles**R. YEGAPPAN¹, F. JIVAN¹, A. GAHARWAR¹, AND D. ALGE¹¹Texas A&M University, College Station, TX**8:15AM****Extracellular Matrix Nanoparticles Modulate Macrophage Phenotype**M. WOLF¹, J. KRILL¹, T. WANG¹, K. SADTLER¹, C. KIM¹, AND J. ELISSEFF¹¹Johns Hopkins University, Baltimore, MD

8:30AM**Osteogenesis on Microtextured Surfaces Is Suppressed In The Presence Of Cigarette Smoke Extract**G. CYPRIUS¹, S. HYZY¹, Z. SCHWARTZ¹, M. SAKAGAMI¹, B. BOYAN^{1,2}, AND R. OLIVARES-NAVARRETE¹¹Virginia Commonwealth University, Richmond, VA, ²Georgia Institute of Technology, Atlanta, GA**8:45AM****Nanohydroxyapatite Gelatin Hydrogels for Biomimetic Bone Tissue Engineering**T. THAKUR¹, J. XAVIER¹, L. CROSS¹, M. JAISWAL¹, AND A. The BMES Accreditation Activities Committee and BMES Education Committee will present a workshop with a panel discussion. The workshop will provide an informational overview of recent and proposed changes to the ABET criteria, including the program specific criteria for bioengineering and biomedical engineering, as well as a panel discussion on best practices for incorporating engineering standards into bioengineering and biomedical engineering capstone design projects

THURSDAY, October 8, 2015

2:00 PM - 3:30 PM

PLATFORM SESSIONS – THURS - 2

**Track: Cellular and Molecular Bioengineering
OP-Thurs-2-1 - Room 18****Cell Adhesion and Interactions with
the Extracellular Matrix II****Chairs:** Randy Ashton, Chris Jewell**2:00PM****Recognition in Tight Spaces**D. LECKBAND¹, N. SHASHIKANTH², AND M. KISTING²¹University of Illinois, Urbana, IL, ²Univ of Illinois, Urbana, IL**2:15PM****Recapitulating the Cytoskeletal Architecture of Cells of Interest Using
Cell-Derived, Biomimetic Patterns**J. SLATER¹, J. CULVER², B. LONG³, C. HU³, J. HU³, T. BIRK³, A. QUTUB³, M. DICKINSON⁴, AND J. WEST⁵¹University of Delaware, Newark, DE, ²University of California San Francisco School of Medicine, San Francisco, CA, ³Rice University, Houston, TX, ⁴Baylor College of Medicine, Houston, TX, ⁵Duke University, Durham, NC**2:30PM****Transglutaminase Cross-linking Inhibits DDR1 and DDR2 Activation on
Type I Collagen Extracellular Matrices**D. WANG¹, A. HSIEH², AND K. BHADRIRAJU³¹River Hill High School, Clarksville, MD, ²University of Maryland, College Park, MD, ³National Institute of Standards and Technology, Gaithersburg, MD**2:45PM****Cell Adhesion Chromatography Reveals Impaired Persistence of Rolling
Adhesion of Metastatic Cells to P-selectin**E. HANNEN^{1,2}, J. OH¹, P. M. MCCLATCHEY¹, AND S. N. THOMAS^{1,2,3}¹Georgia Institute of Technology, Atlanta, GA, ²Georgia Institute of Technology and Emory University, Atlanta, GA, ³Emory University School of Medicine, Atlanta, GA**3:00PM****Mechanical Feedback In Cell-Cell Adhesion: Cadherin Conformational
Shuttling Captured At The Single Molecule Level.**S. SIVASANKAR¹, K. MANIBOG¹, K. SANKAR¹, AND R. JERNIGAN¹¹Iowa State University, Ames, IA**3:15PM****Integrin-Dependent Mechanical Signaling Drives Glycoprotein-Rich
Matrix Production and Aggressiveness in Malignant Brain Cancer**M. BARNES¹, Y. MIROSHNIKOVA¹, J. LAKINS¹, AND V. WEAVER¹¹UCSF, San Francisco, CA**Track: Cellular and Molecular Bioengineering
OP-Thurs-2-2 - Room 19****Cancer Cell Mechanics and Engineering****Chairs:** Hossein Tavara, Carlos Rinaldi**2:00PM****Cell Motility in a Basement Membrane Gel Concentrates ECM Around
Breast Epithelial Cells, a Feature Lost in Malignant Cells**C. ROBERTSON¹ AND M. BISSELL¹¹Lawrence Berkeley National Lab, Berkeley, CA**2:15PM****Galectin-I Modulates E-selectin Ligand Function of Breast Cancer Cells**N. REYNOLDS¹, C. HALL¹, S. THOMAS¹, AND M. BURDICK¹¹Ohio University, Athens, OH**2:30PM****Engineered Multivalency Increases ErbB3 Affibody Efficacy in Cancer
Cell Signaling Inhibition**J. SCHARDT¹ AND S. JAY¹¹University of Maryland, College Park, College Park, MD**2:45PM****Bioreactor-Derived Fluid Flow Upregulates Expression Of Genes That
Affect Cell Adhesion in Breast Cancer Cells**K. FUH¹, B. KOOISTRA¹, R. SHEPHERD¹, AND K. RINKER¹¹University of Calgary, Calgary, AB, Canada**3:00PM****TRAIL-coated Leukocytes That Prevent the Bloodborne Metastasis of
Prostate Cancer**E. WAYNE¹, S. CHANDRASEKARAN¹, M. CHAN¹, R. LEE¹, C. SCHAFFER¹, M. KING¹, AND M. J. MITCHELL²¹Cornell University, Ithaca, NY, ²MIT, Cambridge, MA**3:15PM DREAM TEAM & CENTER****Mechanical Stimulation Of The Cellular Microenvironment Via Active
Surface Wrinkling Directly Influences The Control Of Cell Migration
Behavior**M. E. BRASCH^{1,2}, N. O. DEAKIN³, M. L. MANNING^{1,2}, C. E. TURNER³, AND J. H. HENDERSON^{1,2}¹Syracuse University, Syracuse, NY, ²Syracuse Biomaterials Institute, Syracuse, NY, ³SUNY Upstate Medical University, Syracuse, NY**Track: Cancer Technologies
OP-Thurs-2-3 - Room 20****Engineered Models of Cancer and
Tumor Environment II****Chairs:** Claudia Fischbach, Bobak Mosadegh**2:00PM****Models Cancer and Metastasis (invited)**

A. SKARDAL

Wake Forest University, Winston-Salem, NC

2:30PM**Paper-Based 3D Culture for the Study of Cancer Cells *in vitro***B. MOSADEGH¹¹Weill Cornell Medical College, New York, NY

2:45PM**Bioengineered Tissue Microenvironments for Studying Human Tumor Metastasis**J. LEE^{1,2} AND B. PAREKKADAN^{3,4,5}¹University of Massachusetts-Amherst, Amherst, MA, ²Institute for Applied Life Sciences, Amherst, MA, ³Massachusetts General Hospital & Harvard Medical School, Boston, MA, ⁴Shriners Hospital for Children, Boston, MA, ⁵Harvard Stem Cell Institute, Boston, MA**3:00PM DREAM TEAM & CENTER****Three-dimensional Vascularized Tumor-fibroblast Co-culture Platform for Drug-testing Applications**PRADHAN¹, A. LIU¹¹Texas A&M University Baylor College of Dentistry, Dallas, TX**3:15PM****3-D Constructs For Tissue Engineering or-Molded Vs. Printed: The Differences From A Cell Based Perspective**K-C. FENG¹ AND M. SIMON¹¹Stony Brook University, Stony Brook, NY**Track: Biomaterials****OP-Thurs-2-5 - Room 22****Therapeutic and Theranostic Biomaterials I****Chairs:** Mathumai Kanapathipillai, Craig Duvall**2:00PM****Nanoparticle Mediated Delivery of Metabolic Glutamate Enhancers to Restrain Autoimmune Disease**J. M. GAMMON¹ AND C. M. JEWELL^{1,2,3}¹University of Maryland - College Park, College Park, MD, ²University of Maryland Medical School, Baltimore, MD, ³Marlene and Stewart Greenebaum Cancer Center, Baltimore, MD**2:15PM****Capillary Alginate Gel (Cagel) Biomaterials Enhance Wound Healing**B. WILLENBERG¹, A. GOLOUBEV¹, A. BROWN¹, G. SCHULTZ², AND E. ROSS¹¹University of Central Florida, Orlando, FL, ²University of Florida, Gainesville, FL**2:30PM****Incorporation of Unnatural Amino Acid in Elastin-like Polypeptides by Genomically Recoded *E.coli* for Efficient Small Molecule Attachment**S. COSTA¹¹Duke University, Durham, NC**2:45PM****Novel Photoluminescent And Antioxidant UV-protective Biomaterials**J. YANG¹, R. VAN LITH¹, W. KASPRZYK¹, AND G. AMEER¹¹Northwestern University, Evanston, IL**3:00PM****Dextran Coated Cerium Oxide As A Reactive Oxygen Scavenger**E. ALPASLAN¹, H. YAZICI¹, M. VARGAS², A. ROY¹, J. GALLEGOS², T. WEBSTER¹, AND T. WEBSTER^{1,3}¹Northeastern University, Boston, MA, ²Universidad de Antioquia UdeA, Medellin, Colombia, ³King Abdulaziz University, Jeddah, Saudi Arabia**3:15PM****Tissue Responses to a New Calcium Aluminosilicate Endodontic Cement**L. A. OPPERMAN¹, K. F. WOODMANSEY¹, G. D. KAHOUT¹, R. WHITE¹, AND C. M. PRIMUS¹¹Texas A&M University Baylor College of Dentistry, Dallas, TX**Track: Biomaterials****OP-Thurs-2-6 - Room 23****Micro and Nano Structured Materials II****Chairs:** Jingjiao Guan, Hossein Taviana**2:00PM****Halloysite Nanotube Coatings Suppress Leukocyte Spreading**A. HUGHES¹, G. MARSH², R. WAUGH³, D. FOSTER², AND M. KING¹¹Cornell University, Ithaca, NY, ²University of Rochester, Rochester, NY, ³University of Rochester, Ithaca, NY**2:15PM****Carbon Nanotube Functionalization and Scaffold Geometry Promote Differentiation of Myoblasts**A. PATEL¹, S. MUKUNDAN¹, W. WANG², A. KARUMURI², V. SANT¹, S. MUKHOPADHYAY², AND S. SANT¹¹University of Pittsburgh, Pittsburgh, PA, ²Wright State University, Dayton, OH

2:30PM**Porous Silicon Nanoparticles: Protein Release, Photoluminescence, and Imaging in the Central Nervous System**

J. ZUIDEMA¹, A. NAGAHARA¹, J. JOO¹, G. HOLLETT¹, M. TUSZYNSKI^{1,2}, AND M. SAILOR¹
¹University of California San Diego, La Jolla, CA, ²Veterans Affairs Medical Center, San Diego, CA

2:45PM**Peptide Nanofiber-Calcium Carbonate Composite Microparticles for Mucosal Vaccine Delivery**

J. SNOOK¹, J. RUDRA¹, S. DANN¹, AND A. PENICHE¹
¹University of Texas Medical Branch, Galveston, TX

3:00PM**High-throughput Layer-by-layer (LbL) Platform For Assembly And Screening Of Multi-layered Nanofilm Libraries**

Z. DONG¹, L. TANG^{1,2}, AND W. LI¹
¹Texas Tech University, Lubbock, TX, ²Tongji Medical College, Wuhan, China, People's Republic of

3:15PM**Bulk and Nanoscale Polypeptide/ Nucleic Acid Complexes**

L. LEON¹, M. LUECKHEIDE¹, J. VIEREGG¹, E. J. CHUNG¹, Y. FANG¹, AND M. TIRRELL¹
¹University of Chicago, Chicago, IL

Track: Tissue Engineering, Cardiovascular Engineering**OP-Thurs-2-7 - Room I3****Cardiovascular Tissue Engineering II**

Chairs: Laura Suggs, Peter McFetridge

2:00PM**Capturing Endothelial Progenitor Cells under Shear with Peptide-grafted Hydrogels**

W. SEETO¹ AND E. LIPKE¹
¹Auburn University, Auburn, AL

2:15PM**Fabricating 3D Microvascular Structures with Cell & ECM Organization Recapitulating Native Vasculature**

S. BARRETO¹, J. FRADKIN¹, J. TRIVERO¹, B. GINN^{1,2}, H-Q. MAO^{1,2}, AND S. GERECHT¹
¹Johns Hopkins University, Baltimore, MD, ²Johns Hopkins School of Medicine, Baltimore, MD

2:30PM**Endothelial Cell Sprouting in Agarose-Hydroxyapatite-Fibrinogen Microbeads for Vasculogenesis**

E. DALEY¹, A. RIOJA¹, A. PUTNAM¹, AND J. STEGEMANN¹
¹University of Michigan, Ann Arbor, MI

2:45PM**Extracellular Matrix Microstructure And Composition Regulate 3D Endothelial Network Formation**

M. MCCOY¹ AND C. FISCHBACH¹
¹Cornell University, Ithaca, NY

3:00PM**Macrophage Phenotype and CD4+ T-cell Differentiation Impact Endothelial Sprouting**

B. KWEE¹, T. RAIMONDO¹, AND D. MOONEY¹
¹School of Engineering and Applied Sciences and Wyss Institute at Harvard University, Cambridge, MA

3:15PM**Implantable Tissue-Engineered Blood Vessels from Human Induced Pluripotent Stem Cells**

L. GUI¹, B. DASH¹, L. QIN¹, L. ZHAO¹, K. YAMAMOTO¹, T. HASHIMOTO¹, H. WU¹, G. TELLIDES¹, A. DARDIK¹, L. NIKLASON¹, AND Y. QYANG¹
¹Yale University, New Haven, CT

Track: Device Technologies and Biomedical Robotics**OP-Thurs-2-8 - Room I4****Biomedical Robotics**

Chairs: Helen Huang, Smitha Rao

2:00PM**Bioprinting Viable 3D Cell-Laden Constructs with a Complex Geometry**

S. DENNIS¹, M. YOST¹, AND T. TRUSK¹
¹Medical University of South Carolina, Charleston, SC

2:15PM DREAM TEAM & CENTER**Optogenetic Skeletal Muscle Powered 3D Printed Biological Machines**

R. RAMAN¹, C. CVETKOVIC¹, S. UZEL², P. SENGUPTA¹, R. D. KAMM², AND R. BASHIR¹
¹University of Illinois at Urbana-Champaign, Urbana, IL, ²Massachusetts Institute of Technology, Boston, MA

2:30PM**Optimizing the Performance and Lifetime of Muscle-Powered Biological Machines**

C. CVETKOVIC¹, C. WILDER², M. FERRALL², R. RAMAN¹, M. PLATT², AND R. BASHIR¹
¹University of Illinois at Urbana-Champaign, Urbana, IL, ²Georgia Institute of Technology and Emory University, Atlanta, GA

2:45PM**Novel Endoscopic Instrument Manipulator Utilizing Pre-curved Sliding Elements**

C. BRYSON¹, J. TILL¹, AND C. RUCKER¹
¹University of Tennessee Knoxville, Knoxville, TN

3:00PM**An Autonomous Robotic System for Rapid Blood Draws and Analysis**

M. BALTER¹, A. CHEN¹, T. MAGUIRE¹, AND M. YARMUSH¹
¹Rutgers University, Piscataway, NJ

3:15PM**Design Of A Robotic Assistive Device For Phlebotomy**

A. KESARI¹
¹Worcester Polytechnic Institute, Worcester, MA

Track: Biomechanics**OP-Thurs-2-9 - Room I5****Head Injury Molecular to Macro, Simulation and Protection**

Chairs: Susan Margulies, Steve Rowson

2:00PM**Limitations Of Standard Twin-Wire Drop Testing For Modeling Concussion Kinematics In Football**

F. HERNANDEZ¹, P. SHULL¹, AND D. CAMARILLO¹
¹Stanford University, Stanford, CA

2:15PM**Comparing the Ability of Head Impact Sensors to Measure Head Kinematics**A. TYSON¹, B. COBB¹, S. ROWSON¹, AND S. DUMA¹¹Virginia Tech, Blacksburg, VA**2:30PM****Mechanical Effects of Dynamic Binding Between Tau Proteins on Axonal Microtubules During Traumatic Brain Injury: Predictions from a Computational Model**H. SPECIAL SESSION**2:00 PM - 4:00 PM - Ballroom BC****Biomedical Engineering Technology for the Elimination of Health Disparities****Chairs:** Gilda Barabino, Cato Laurencin.

This session will explore the role of biomedical engineering for use in addressing health disparities. The use of technologies for addressing musculoskeletal conditions such as arthritis and osteoporosis will be explored. New emerging technologies involving mobile health (m-health) present possibilities for treatment of diabetes and hypertension. Finally, the session will address the use of biomedical technologies in developing countries, with an eye toward the adaptation of technologies to address issues here in the U.S. The 2015 BME Innovation and Career Development Travel Award winners will be announced at the session.

Speakers will include:

Cato T. Laurencin, MD, PhD

Musculoskeletal Conditions: The Role of Biomedical Device Technology in Addressing Health Disparities

Roderick Pettigrew, MD, PhD (invited) and Linda Barry, MD

Diabetes and Hypertension: M-Health Technologies for Prevention, Diagnosis and Treatment

Rebecca Richards-Kortum, PhD (invited)

The Use of Biomedical Engineering Technology in Developing Countries: Addressing Health Disparities throughout the World and in the U.S.

Tampa Convention Center, Tampa, Florida, USA

Invited Oral Session I: 4:00 – 5:10 PM

Co-Chairs: Ho-Wook Jun (University of Alabama at Birmingham), Hak-Joon Sung (Vanderbilt University)

Hanjoong Jo (Georgia Tech & Emory University): Introductory Remarks

Christine Schmidt (University of Florida): Plenary Speaker

Young-Sup Yoon (Emory University)

Hyung-Suk Lee (Yonsei University)

Hyun-Kwang Seok (KIST)

Poster Session: 5:10 - 5:50 PM

Co-Chairs: Jungkyu Kim (Texas Tech University), Jennifer Shin (KAIST), Min-Ho Kim (Kent State University)

Invited Oral Session II: 5:50 – 7:10 PM

Chairs: Deok-Ho Kim (University of Washington), James Moon (University of Michigan)

Ravi Bellamkonda (Georgia Tech and Emory University): Plenary Speaker

Jungkyu Kim (Texas Tech University)

Min-Ho Kim (Kent State University)

Claire Hur (Roland Institute, Harvard University)

Hyunjoon Kong (University of Illinois at Urbana Champaign)

KBMS-KOSOMBE Dinner: 7:10 – 9:00 PM

After the workshop, all attendees are invited to join us the reception and dinner

THURSDAY, October 8, 2015

4:30 PM - 6:00 PM

PLATFORM SESSIONS – THURS - 3

Track: Cellular and Molecular Bioengineering
OP-Thurs-3-1 - Room 18Cell Adhesion and Interactions with the
Extracellular Matrix III

Chairs: Stephanie Seidlits

Synthesis, Characterization and In Vivo Evaluation of RAGE Targeted Nanoparticles for Molecular Imaging of Prostate Cancer

C. Konopka^{1,2,3}, J. Hedhli^{1,2}, L. Lahood¹, A. Patel¹, I. Dobrucka², G. Munirathinam⁴, A. Kajdacsy-Balla², and L. Dobrucki^{1,2}¹University of Illinois, Urbana, IL, ²Beckman Institute for Advanced Science and Technology, Urbana, IL, ³University of Illinois College of Medicine, Urbana, IL, ⁴University of Illinois College of Medicine, Rockford, IL, ⁵University of Illinois at Chicago, Chicago, IL**5:45PM**

A Time-domain Fluorescence Lifetime Measurement System For Quantifying Ultrasound-switchable Fluorescence Contrast Agents

S. YU¹¹University of Texas at Arlington, Arlington, TX**Track: Neural Engineering****OP-Thurs-3-14 - Room 12****Neural Interfaces: Compatibility, Recording, and Stimulation III****Chairs:** Jeffrey Capadona, Kyle Lampe**4:30PM**

Towards a Retinal Prosthesis with Differential Stimulation of OFF and ON Pathways

J. TROY¹, C. ROUNTREE¹, S. INAYAT^{1,2}, AND L. SAGGERE²¹Northwestern University, Evanston, IL, ²University of Illinois at Chicago, Chicago, IL**4:45PM**

Optically Addressed Wireless Stimulator for Nano-engineered Retinal Prosthesis

S. HA¹, M. KHRAICHE¹, A. AKININ¹, G. SILVA¹, AND G. CAUWENBERGHS¹¹University of California San Diego, La Jolla, CA**5:00PM DREAM TEAM & CENTERS**

Porous Polydimethylsiloxane Substrates Demonstrate Feasibility as Regenerative Peripheral Nerve Interface Multi-Channel Electrodes

J. Mack¹, S. Woo¹, J. Seymour¹, X. Chen¹, E. Yoon¹, M. Urbanek¹, P. Cederna¹, and N. Langhals¹¹University of Michigan, Ann Arbor, MI**5:15PM**

The Dorsal Root Ganglion: A Promising Neural Target for Somatosensory Neuroprostheses

L. Fisher¹, C. Ayers¹, W. Cusack¹, A. Nanivadekar¹, R. Gaunt¹, and D. Weber¹¹University of Pittsburgh, Pittsburgh, PA**5:30PM**

Thermally Drawn Nerve Guidance Channels for PNS Regeneration and Interfacing

R. Koppes¹, S. Park¹, T. Hood¹, N. Poorheravi¹, X. Jia¹, and P. Anikeeva¹¹Massachusetts Institute of Technology, Cambridge, MA

5:45PM**Comparisons of Platinum and CNT-MEA Electrodes as Peripheral Muscular Interface**C. CHEN¹, W. YI¹, X. MENG², C. ZHOU¹, W. WANG², B. CHENG², J. CAVANAUGH¹, AND M. CHENG¹¹Wayne State University, Detroit, MI, ²Tsinghua University, Beijing, China, People's Republic of**Track: Bioinformatics, Computational and Systems Biology****OP-Thurs-3-15 - Room 17****From Molecules to Cells and Organs in Health and Disease****Chairs:** Denise Kirschner, Jose Vilar**4:30PM****Systems Biology Track Overview**L. SAIZ¹¹University of California, Davis, CA**4:45PM****QUANTITATIVE ANALYSIS OF IMMUNE CELL CYTOKINE SECRETION REVEALS ROLE OF CELL COMMUNICATION IN REGULATION OF CXCR² LIGANDS**S. SCHRIER¹, A. HILL¹, AND D. LAUFFENBURGER¹¹Massachusetts Institute of Technology, Cambridge, MA**5:00PM****The DIONESUS Algorithm Provides Scalable and Accurate Reconstruction of Biological Networks to Reveal New Drug Target**M. CIACCIO¹ AND N. BAGHERI¹¹Northwestern University, Evanston, IL**5:15PM****Exploring Cellular Heterogeneity in Development by Single-Cell Transcript Profiling**A. COSKUN¹ AND L. CAI¹¹Caltech, Pasadena, CA**5:30PM****An Agent-based Vision for Tissue Engineering: Quantifying Biocomplexity Exploit it**H. KAUL¹¹University of Sheffield, Sheffield, United Kingdom**5:45PM****Co-detection and Sequencing of Genomic DNA and Messenger RNA from the Same Single Cells Facilitated by a Microfluidic System**R. FAN¹¹Yale University, New Haven, CT**Track: Drug Delivery****OP-Thurs-3-16 - Room 10****Nano to Micro Devices in Delivery II****Chairs:** Edward Chow, Dean Ho**4:30PM****Nanoparticle-releasing Nanofiber Composites for Enhanced *In Vivo* Vaginal Retention**E. KROGSTAD¹, R. RAMANATHAN¹, C. NHAN¹, K. THORESON¹, AND K. WOODROW¹¹University of Washington, Seattle, WA**4:45PM****Microneedle-Array Patches Loaded with Hypoxia-Sensitive Vesicles for Rapid Glucose-Responsive Insulin Delivery**J. YU^{1,2}, Y. ZHANG^{1,2}, Y. YE^{1,2}, D. RANSON¹, F. LIGLER¹, J. BUSE³, AND Z. GU^{1,2,3}¹University of North Carolina at Chapel Hill and North Carolina State University, Chapel Hill, NC, ²University of North Carolina at Chapel Hill, Chapel Hill, NC, ³University of North Carolina School of Medicine, Chapel Hill, NC**5:00PM DREAM TEAM & CENTER****Development of Spray Dried Curcumin Loaded Nanoparticles to Mitigate Radiation Induced Cellular Damage**A. AKALKOTKAR¹, M. O'TOOLE¹, L. LANCETA¹, B. NUNN¹, J. EATON¹, R. KEYNTON¹, AND P. SOUCY¹¹University of Louisville, Louisville, KY**5:15PM****Release of Erythromycin from Injectable Calcium Polyphosphate-derived Brushite Cement**W. REN¹, W. SONG^{1,2}, AND D. MARKEL³¹Wayne State University, Detroit, MI, ²Virotech Biomaterials Inc., Detroit, MI, ³Providence Hospital, Southfield, MI**5:30PM****Using Affinity Polymers for the Local Slow Release of Corticosteroids in the Treatment of Osteoarthritis**E. RIVERA-DELGADO¹, E. LAVIK¹, AND H. VON RECUM¹¹Case Western Reserve University, Cleveland, OH**5:45PM****Asymmetric Biodegradable Microdevices for Cell-borne Drug Delivery**J. XIA¹, Z. WANG¹, D. HUANG¹, Y. YAN¹, Y. LI¹, AND J. GUAN¹¹Florida State University, Tallahassee, FL**Track: Nano and Micro Technologies****OP-Thurs-3-17 - Room 7-8****Nano/Microbiotechnology I****Chairs:** Zi Chen, Gabe Kwong**4:30PM****Molecular Typing of Rare Trafficking Leucocytes using a Nanowire Array Microchip for Evaluating Neurodegenerative Pathology**M. KWAK¹ AND R. FAN¹¹Yale University, New Haven, CT**4:45PM****Nanomagnetic Actuation: Remote Control Of Cell Signaling**J. DOBSON¹, H. BIN², AND A. EL HAJ³¹University of Florida, Gainesville, FL, ²Keele University, Stoke-on-Trent, United Kingdom, ³Keele University, stoke-on-Trent, United Kingdom**5:00PM****Development of Light-Induced Shape Memory Microparticles for Biomedical Applications**Q. GUO¹, C. BISHOP², R. MEYER¹, L. OLASOV¹, D. SCHESSINGER¹, J. SPICER¹, J. ELISSEFF¹, A. KUMAR¹, AND J. GREEN¹¹Johns Hopkins University, Baltimore, MD, ²Johns Hopkins University, Baltimore, China, People's Republic of**5:15PM****NanoCluster Beacons Enable Enzyme-Free N⁶-Methyladenine Detection**Y.-A. CHEN¹, C. LIU¹, Y.-L. LIU¹, AND H.-C. YEH¹¹University of Texas at Austin, Austin, TX

5:30PM

Explore Intracellular Dynamics and Behaviors of MBD3 Protein by Single-molecule Fluorescence Tools

Y. CUI¹ AND J. IRUDAYARAJ¹

¹Purdue University, West Lafayette, IN

5:45PM DREAM TEAM & CENTER

Single Cell Electroporation via Cell Rotation in Geometrically-Aided Field Amplification Microdevices

M. ZHENG¹, J. SHERBA¹, J. SHAN¹, H. LIN¹, D. SHREIBER¹, AND J. ZAHN¹

¹Rutgers University, Piscataway, NJ

Track: Respiratory Bioengineering**OP-Thurs-3-18 - Room 1****Surface Tension and Surfactant Function in the Lung**

Chairs: Carrie E. Perlman, Donald Gaver

4:30 PM

The Effect of the Hydrophobic Surfactant Proteins on the Curvature of Lipid Leaflets (*invited*)

S. HALL¹, M. CHAVARHA¹, R. LONEY¹, AND S. RANANAVARE²

¹Oregon Health & Science University, Portland, OR, ²Portland State University, Portland, OR

4:45 PM

A Three Dimensional Multiscale Model of Surfactant Replacement Therapy

J. GROTEBERG¹ AND M. FILOCHE²

¹University of Michigan, Ann Arbor, MI, ²Ecole Polytechnique, Palaiseau, France

5:00PM

Development of a Realistic Ventilated Infant Lung Model for Assessing the Delivery Efficiency and Effectiveness of Aerosolized Surfactants

L. HOLBROOK¹, K. BASS¹, M. HINDLE¹, AND W. LONGEST¹

¹Virginia Commonwealth University, Richmond, VA

5:15PM

Model Gastric Liquid Effect on Pulmonary Alveolar Surface Tension

T. NGUYEN¹ AND C. PERLMAN¹

¹Stevens Institute of Technology, Hoboken, NJ

5:30PM

The Influence of Pulsatile Flow on The Uniformity of Pulmonary Airway Recruitment.

E. YAMA GUCHI¹, L. P. NOLAN¹, AND D. P. GAVER III¹

¹Tulane University, New Orleans, LA

5:45PM

Microfluidic Evaluation of Mucolytic and Surfactant Therapies for Eustachian Tube Dysfunction

N. HIGUITA-CASTRO¹, J. MALIK¹, V. SHUKLA¹, J. D. SWAR TS², AND S. N. GHADIALI¹

¹The Ohio State University, Columbus, OH, ²University of Pittsburgh, Pittsburgh, PA

Track: Biomedical Imaging and Optics**OP-Thurs-3-19 - Room 9****PET, SPECT, and CT**

Chairs: Jonathan Butcher, Guohua Cao

4:30 PM

Using PET Imaging To Quantify Cell-Surface Biomarkers In Cancer Therapy (*invited*)

A. CHANG¹, R. PORT¹, G. FERL¹, AND S. WILLIAM S¹

¹Genentech, Inc., South San Francisco, CA

4:45PM DREAM TEAM & CENTER

Robust Low-Dose CT Perfusion Deconvolution via Non-Local Tensor Total Variation

R. FANG¹, M. NI², J. HUANG³, Q. LI², AND T. LI¹

¹Florida International University, Miami, FL, ²Nanjing University of Science and Technology, Nanjing, China, People's Republic of, ³University of Texas at Arlington, Arlington, TX

5:00PM

Comparison of Metallic Nanoparticles as Exogenous Soft Tissue Contrast for Non-Invasive 3D Live MicroCT Imaging of Avian Morphogenesis

C. GREGG¹ AND J. BUTCHER¹

¹Cornell University, Ithaca, NY

5:15PM

Automated Imaging Algorithms to Identify and Quantify Different Types of Fat

T. SZA BO¹, T. WELLMAN², M. RUTH³, G. MERCIER¹, C. APOVIAN¹, R. SUBRAMANIAM⁴, AND P. VERMILION⁵

¹Boston University, Boston, MA, ²inviCRO, LLC, Boston, MA, ³University of Calgary, Calgary, AB, Canada, ⁴Johns Hopkins Hospital, Baltimore, MD, ⁵University of Rochester Medical Center, Rochester, NY

5:30PM

Scatter Reduction And Correction For Multi-source Cardiac Computed Tomography

H. GONG¹ AND G. CAO¹

¹Virginia Polytechnic Institute and State University, Blacksburg, VA

POSTER SESSION
Th

THURSDAY, October 8, 2015

9:30 AM - 5:00 PM

POSTER SESSIONS – THURS**Biomedical Education:**
P-Th-1 to P-Th-29**Computational Modeling and Systems Approaches:**
P-Th-31 to P-Th-131**Device and Sensors:**
P-Th-132 to P-Th-209**Engineering Materials:**
P-Th-210 to P-Th-245**Molecular and Cellular Topics:**
P-Th-246 to P-Th-322**Musculoskeletal Injury and Mechanics:**
P-Th-323 to P-Th-373**Nano and Micro Technologies:**
P-Th-374 to P-Th-520**Neural Engineering:**
P-Th-529 to P-Th-570**Tissue Engineering:**
P-Th-571 to P-Th-704**Track: Biomedical Engineering Education (BME)****Biomedical Education:****Biomedical Engineering Classroom Experiences Posters****P-Th-1**

Student Adaptation to the Modular Use of the Flipped Classroom Model in an Introductory BME Course

J. FOO¹, I. DE VLAMINCK¹, AND K. WILLIAMS¹
¹Cornell University, Ithaca, NY**P-Th-2**

Does The Availability Of Recorded Lectures Improve Student Success Rate?

S. WILLERTH¹, C. SOUSA¹, AND H. STRUCHTRUP¹
¹University of Victoria, Victoria, BC, Canada**P-Th-3**

Sense Of Community Among BME Undergraduates In A First-Year Program

J. PAZ¹, M. COUSINS¹, AND M. MARKEY^{1,2}
¹The University of Texas at Austin, Austin, TX, ²The University of Texas MD Anderson Cancer Center, Houston, TX**P-Th-4**

Writing a Peer-Reviewed Article for Publication as a Group

A. N. BLAIZE¹ AND C. GOERGEN¹
¹Purdue University, West Lafayette, IN**P-Th-5**

Student Persistence, Achievement and Attitude in a Flipped Classroom using Web-enabled Tools

C. ANKENY¹
¹Arizona State University, Tempe, AZ**P-Th-6**

Encouraging Curiosity, Connections and the Creation of Value in a Materials/Biomaterials Sequence: Part I Materials Science

G. BLEDSOE¹ AND S. ZUSTIAK¹
¹Saint Louis University, St Louis, MO**P-Th-7**

Persistence in Biomedical Engineering and STEM in an Undergraduate Program

D. GAITAN¹, M. F. OLARTE-SIERRA¹, AND J. C. BRICENO¹
¹U de los Andes, Bogota, Colombia**Track: Biomedical Engineering Education (BME)****Biomedical Education:****Design in BME Education Posters****P-Th-8**

The Teaching Dead, Season II

J. LA BELLE¹
¹Arizona State University, Tempe, AZ**P-Th-9**

Student-Friendly BME Senior Design Project with Assessment of ABET student Outcomes

J-M. MAAREK¹
¹University of Southern California, Los Angeles, CA**P-Th-10**

Implementing an Electronic DHF for Senior Design: Lessons Learned

C. DRUMMOND¹
¹Case Western Reserve University, Cleveland, OH**P-Th-11**

Multi-Phase Integration of Design Elements into the Undergraduate Biomedical Engineering Practical Curriculum at the University of Toronto

A. SHUKALYUK¹ AND D. KILKENNY¹
¹Institute of Biomaterials & Biomedical Engineering, Faculty of Applied Science & Engineering, University of Toronto, Toronto, ON, Canada**P-Th-12**

Emphasizing Application In Bioelectricity Course

D. PEDERSON¹, R. BERGICH¹, AND P. IRAZOQUI¹
¹Purdue University, West Lafayette, IN**Track: Biomedical Engineering Education (BME)****Biomedical Education:****Immersive and Experiential Learning Posters****P-Th-13**

Establishment of the Illinois-Njala Sustainable & Innovative Global Healthcare Technologies (INSIGHT) Program

J. AMOS¹ AND K. LONG¹
¹University of Illinois at Urbana-Champaign, Urbana, IL**P-Th-14**

Engineering Summer Design Experience Has Greater Impact With International Collaboration

M. RUEGSEGGER¹, G. RUAN², T. NOCERA¹, AND R. JONES¹
¹The Ohio State University, Columbus, OH, ²Nanjing University, Nanjing City, China, People's Republic of

P-Th-15

Integrating Innovation and Entrepreneurship into the REU Experience

D. SHREIBER¹, S. ENGELHARDT¹, T. MAGUIRE¹, AND M. YARMUSH¹¹Rutgers, The State University of New Jersey, Piscataway, NJ**P-Th-16**

Examining the Impact of a Peer-to-peer Mentoring Program Through the Lens of Social Capital Theory

J. LE DOUX¹¹Georgia Institute of Technology, Atlanta, GA**P-Th-17**

Ph.D. Boot Camp: the Kickoff for Training Innovative Leaders in Biofabrication

K. BILLIAR¹, G. GAUDETTE¹, F. HOY¹, M. ROLLE¹, AND T. CAMESANO¹¹Worcester Polytechnic Institute, Worcester, MA**P-Th-18**

Enhancing High School STEM Education Through Research-related Bioengineering Experiences

L. TOSTANOSKI¹, A. JONES¹, AND C. JEWELL^{1,2,3}¹University of Maryland, College Park, MD, ²University of Maryland Medical School, Baltimore, MD, ³Marlene and Stewart Greenebaum Cancer Center, Baltimore, MD**Track: Biomedical Engineering Education (BME) Biomedical Education:****Innovative Learning Modules and Instructional Materials Posters****P-Th-19 DREAM TEAM & CENTER**

Improving Peer-Reviewing of Reports Through Calibration and Direct Instructor Feedback

J. LINNES¹, N. BAJAJ¹, A. ABOELZAHAB¹, A. BRIGHTMAN¹, AND A. RUNDELL¹¹Purdue University, West Lafayette, IN**P-Th-20**

Encouraging Curiosity, Connections, and the Creation of Value in a Materials/Biomaterials Sequence: Part II Biomaterials

S. ZUSTIAK¹¹Saint Louis University, St Louis, MO**P-Th-21**

An Interactive Training Tool to Help Reduce Error Rate Associated with Shared Infusion Volume

K. TSANG^{1,2}, S. PINKNEY¹, C. COLVIN¹, AND P. TRBOVICH^{1,2}¹University Health Network, Toronto, ON, Canada, ²University of Toronto, Toronto, ON, Canada**P-Th-22**

Bringing Real World Expertise Into Class: An Industry Partnership To Teach Biomedical Design

L. KHUON^{1,2}, J. B. ZURN^{3,4}, G. HERRERA^{5,6}, AND K. ZURN^{3,7}¹Drexel University, Philadelphia, PA, ²University of Pennsylvania, Philadelphia, PA, ³Villanova University, Villanova, PA, ⁴Sunshine Labs, Longwood, FL, ⁵Med Associates, Inc., St. Albans, VT, ⁶Catamount Research & Development, Inc., St. Albans, VT, ⁷Florida Research Instruments, Cocoa Beach, FL**P-Th-23**

Engaging Students to Enrich their Learning through Developing Course Materials

M. POOL¹ AND K. GRAY²¹University of Illinois at Urbana Champaign, Urbana, IL, ²West Virginia University Institute of Technology, Montgomery, WV**P-Th-24**

The 'Good', the 'Bad', and the 'Ugly' Biostatistics for Bioengineering Students

Y. KIM¹¹Purdue University, West Lafayette, IN**Track: Biomedical Engineering Education (BME) Biomedical Education:****Laboratory Modules and Instructional Materials Posters****P-Th-25**

Flipping the Lab: Introducing a Flipped Classroom Model Into a Laboratory Class

A. ABOELZAHAB¹ AND T. KINZER-URSEM¹¹Purdue University, West Lafayette, IN**P-Th-26**

Nanotechnology for Biomedical Engineers and STEM Majors: Bringing Multidisciplinary Nanotechnology into the Classroom

R. PEREZ-CASTILLEJOS¹¹NJIT, Newark, NJ**P-Th-27**

Educational Videos Help Improve Student Understanding in a Laboratory Course

R. RAMOS¹, B. GHOSN¹, AND C. LIVINGSTON¹¹Rice University, Houston, TX**P-Th-28**

Assessment of Student Value and Scientific Literacy in an Introductory Biomaterials Laboratory

C. ANKENY¹ AND S. STABENFELDT¹¹Arizona State University, Tempe, AZ**P-Th-29**

A Template for Multi-Disciplinary Team-Based Problem Solving, Design, and Assessment: Application in Biomedical Engineering

S. ZUSTIAK¹, S. SELL¹, AND G. GAUDETTE²¹Saint Louis University, St Louis, MO, ²Worcester Polytechnic Institute, Worcester, MA**Track: Bioinformatics, Computational and Systems Biology****Computational Modeling and Systems Approaches:****Algorithms for Computational/Systems Biology Posters****P-Th-30**

A Unified Sparse High-Dimensional Association Test for Quantitative Traits in Complex Relatedness

S. CAO¹, H. QIN¹, A. GOSSMANN¹, H-W. DENG¹, AND Y-P WANG¹¹Tulane University, New Orleans, LA**P-Th-31**

Online Remote Monitoring of Heart Rate Variability

M. THOME¹, J. SALINET¹, R. RODRIGUES¹, AND D. GOROSO¹¹Mogi das Cruzes University, Mogi das Cruzes, Brazil**P-Th-32**

Classifying Brain States Using Machine Learning Techniques

POSTER SESSION
Th

TODAY'S HIGHLIGHT

PLATFORM SESSIONS Fri- I

8:00am - 9:30am

See pages 133-140, Convention Center

EXHIBIT HALL OPEN

9:30am - 5:00pm

Convention Center, Exhibit Hall

POSTER SESSION Fri

9:30am - 5:00pm

See pages 152-186, TCC, Exhibit Hall

Poster Viewing with Authors & Refreshment Break

9:30am - 10:30am

PLENARY SESSION

10:30am - 12:00 noon

Convention Center Ballroom BC

NIH NIBIB Lecture
Wendy Murray

WOMEN IN BME Luncheon

12:15pm - 1:30pm

Convention Center, Ballroom D
Additional ticket purchase required

PLATFORM SESSIONS Fri-2

1:45pm - 2:45pm

See pages 141-145, Convention Center

PLATFORM SESSION Fri-3

3:00pm - 4:00pm

See pages 146-151, Convention Center

Poster Viewing with Authors & Refreshment Break

4:00pm - 5:00pm

Convention Center Exhibit Hall

PLENARY SESSION

5:15pm - 6:15pm

Convention Center, Ballroom BC

Prosthetics Advancements: How One Little
Dolphin Learned to Swim Again

Kevin Carroll, PhD

BMES BASH

6:30pm - 9:00pm

Convention Center, Riverwalk

Save time: exchange your ticket for a wristband before the event.

SPECIAL SESSION

Meet the Expert 2015 Schedule

New for 2015 is the "Meet the Expert" theater located on the Exhibition Hall floor. "Meet the Expert" was conceived as a method to allow attendees to explore various biomedical engineering disciplines and career options. The format of the theater allows closer interaction and personal connection with invited experts who will be presenting throughout the week.

Friday, October 9

9:30 - 10:30 AM

Industry Career Chat

Samit Gupta¹, Paul Torres²

Description: Networking event for students to meet with current industry professionals. Attendees are encouraged to bring business cards; please no resumes.

1:00 - 1:30 PM

Launch Your Big Idea - Research on the International Space Station National Lab

Debbie Wells¹¹Center for the Advancement of Science in Space

Description: Hear the latest in space research and opportunities to plug into research activities on the International Space Station

1:45 - 2:45 PM

Systems Biology Highlights

Shannon Hughes¹, Michelle Bery-Lang², Chang Liu³¹NCI, ²NIH, ³UC Irvine

Description: A dynamic panel discussion highlighting funding opportunities and research projects in systems biology, with a special emphasis on cancer and synthetic biology.

3:00 - 4:30 PM

BME Department Showcase:
The Industry Connection

Description: Meet faculty and students from various BME departments that have successfully collaborated with industry, and see how they enable their students to launch their careers in industry after graduation.

FRIDAY, October 9, 2015

8:00 AM - 9:30 AM

PLATFORM SESSIONS – FRI - I

**Track: Cellular and Molecular Bioengineering,
Stem Cell Engineering**

OP-Fri-1-1 - Room 18

Stem Cell Bioengineering

Chairs: Kris Saha, Deak-Ho Kim

8:00AM

Molecular Outcomes Of Biophysical Alterations To The Muscle Stem Cell Niche

R. CHENG¹, H. LIU¹, S. DAVOUDI¹, C. SIMMONS¹, AND P. GILBERT¹¹University of Toronto, Toronto, ON, Canada**8:15AM**

Vimentin Knockdown in Mesenchymal Stem Cells Modifies Cell Deformability

P. SHARMA¹, Z. BOLTEN¹, D. WAGNER², AND A. H. HSIEH^{1,3}¹University of Maryland, College Park, MD, ²University of Notre Dame, Notre Dame, IN, ³University of Maryland, Baltimore, MD**8:30AM**

Tensile Forces Induce Differentiation of Human Embryonic Stem Cells

T. TOPAL-AYDIN¹, L. G. VILLA-DIAZ¹, S. TAKAYAMA¹, AND P. H. KREBSBACH¹¹University of Michigan, Ann Arbor, MI**8:45AM**

CAMP and EPAC Signaling Functionally Replace OCT4 During iPSC Reprogramming

A. FRITZ¹, M. ADIL¹, S. MAO¹, AND D. SCHAFER¹¹University of California Berkeley, Berkeley, CA**9:00AM**

Live Multiplexed Imaging of Stem Cell Mechanotransduction and Mechanoadaptation

I. JALILIAN¹, R. OLDFIELD¹, P. GUNNING¹, AND M. KNOTHE TATE¹¹UNSW, Sydney, Australia**9:15AM**

Nanog Restores the Actin Polymerization Capacity of Senescent Cells

P. MISTRIOTIS¹, X. WANG¹, N. RONG¹, A. SHAHINI¹, V. BAJPAI¹, M. ASMANI¹, R. ZHAO¹, AND S. ANDREADIS¹¹University at Buffalo, Buffalo, NY**Track: Cellular and Molecular Bioengineering**

OP-Fri-1-2 - Room 19

Mechanotransduction II

Chairs: Eno Ebong

8:00AMKnockdown of Mechanosensitive miRNA cluster—miR-106b~25 Decreases Vascular Proliferation and Prevents Atherosclerosis in ApoE^{-/-} miceS. KUMAR¹, C. W. KIM¹, AND H. JO²¹Emory University, Atlanta, GA, ²Emory University and Georgia Tech, Atlanta, GA**8:15AM**

Mechanotransduction-Not Just a Local Affair

D. LECKBAND¹, I. MUHAMED¹, J. WU¹, P. SEGHAL², X. KONG², A. TAJIK², AND N. WANG²¹University of Illinois, Urbana, IL, ²Univ of Illinois, Urbana, IL**8:30AM**

Wnt On, Wnt Off: Aging Limits Wnt/ beta-catenin Signaling By Desensitizing Osteocytes To Repetitive Loading

N. HOLGUIN¹, M. BRODT¹, AND M. SILVA¹¹Washington University, Saint Louis, MO**8:45AM**

Global Endothelial Cell DNA Methylation Patterns Are Differentially Regulated By An Arteriogenesis-Amplifying Shear-Reversal Waveform

J. HEUSLEIN¹ AND R. PRICE¹¹University of Virginia, Charlottesville, VA**9:00AM**

Cellular Mechanosensing is Controlled by EMT and Paxillin Splicing in Triple Negative Breast Cancer

M. RUBASHKIN¹, J. MOUW¹, A. MEKHDJIAN², M. PICKUP¹, C. DUFORT¹, G. OU¹, A. DUNN², AND V. WEAVER¹¹University of California - San Francisco, San Francisco, CA, ²Stanford University, Stanford, CA**9:15AM**

Integrins Mediate Inflammation

M. PREVITERA^{1,2}, A. SENGUTPA¹, AND R. PATEL¹¹JFK Medical Center, Edison, NJ, ²Seton Hall University, South Orange, NJ**Track: Nano and Micro Technologies**

OP-Fri-1-3 - Room 20

Theranostics and Nanoparticles II

Chairs: James Moon, Leon Bellan

8:00AM

Antibacterial Efficacy and Mechanism of Selenium Nanoparticles on Reducing Infectious Bacteria

M. STOLZOFF¹, S. Q. WANG², AND T. J. WEBSTER¹¹Northeastern University, Boston, MA, ²Memorial Sloan Kettering Cancer Center, Basking Ridge, NJPLATFORM
SESSIONS

Fri-1

8:15AM**Development and Characterization of Oxygenated Microbubbles for Local Delivery of Oxygen**J. KUSUNOSE¹ AND C. CASKEY^{1,2}¹Vanderbilt University Institute of Imaging Science, Nashville, TN, ²Vanderbilt University, Nashville, TN**8:30AM****Optical Properties of Erythrocyte-Derived Particles Doped with Indocyanine Green**J. BURNS¹, B. BAHMANI¹, D. BACON¹, R. SAAGER², W. JIA², AND B. ANVARI¹¹University of California, Riverside, Riverside, CA, ²University of California, Irvine, Irvine, CA**8:45AM****Engineered Nanoparticles for Theranostics of Malignant Peripheral Nerve Sheath Tumors**E. SWEENEY¹, J. VOJTECH¹, R. SZE¹, C. LI¹, Y. ZHU¹, AND R. FERNANDES¹¹Children's National Medical Center, Washington, DC**9:00AM****Semiconductor Quantum Dots as Delivery and Imaging Platforms for Intracellular Assembly**L. FIELD^{1,2}, J. DELEHANTY¹, AND I. MEDINTZ¹¹Naval Research Lab, Washington, DC, ²University of Maryland, College Park, MD**9:15AM****Rational Design of Surface Modified Gold Nanoparticles for the Modulation of Amyloid- β Aggregation**N. VAN DER MUNNIK¹, D. SOTO-ORTEGA¹, M. MOSS¹, AND M. ULINE¹¹University of South Carolina, Columbia, SC**Tracks: Biomechanics, Biomaterials****OP-Fri-I-4 - Room 21****Biomechanics in Biomaterials and Tissue Engineering****Chairs:** Roland R. Kaunas, Tony Kim**8:00AM****Radiation Induced Changes in the Extracellular Matrix**J. MILLER¹, D. PARKER¹, AND C. REINHART-KING¹¹Cornell University, Ithaca, NY**8:15AM****Non-destructive Passive Measurement Of Mouse Embryonic Cardiomyocyte Contraction Metrics Using Phase Contrast Image Analysis**N. CALVO¹ AND C. SIMMONS¹¹University of Florida, Gainesville, FL**8:30AM****In-vivo Tensile Properties of Remodeled ECM Scaffolds in the Temporomandibular Joint**J. LOWE^{1,2}, W. CHUNG^{1,3}, B. BROWN^{1,3}, S. JOHNSON³, S. BADYLAK^{1,3}, AND A. ALMARZA^{1,2,3}¹University of Pittsburgh, Pittsburgh, PA, ²Center for Craniofacial Regeneration, Pittsburgh, PA, ³McGowan Institute of Regenerative Medicine, Pittsburgh, PA**8:45AM****Quantification and Localization of Damage in Collagenous Tissues using Collagen Mimetic Peptide**J. ZITNAY¹, Y. LI¹, S. M. YU¹, S. REESE¹, AND J. WEISS¹¹University of Utah, Salt Lake City, UT**9:00AM****Peak Extraction Force Of Kirschner (K-) Wire And Reference Probe Indentation Parameters As Predictors Of Bone Mineral Density (BMD).**S. DENNING¹, A. DINCER¹, R. PISANO¹, T. BOWEN², D. EBENSTEIN¹, AND E. KENNEDY¹¹Bucknell University, Lewisburg, PA, ²Geisinger Health System, Danville, PA**9:15AM****Mechanical Characterization of Patterned Single Layer Vascular Cell Sheets**B. LESAVAGE¹, D. BACKMAN¹, S. SHAH¹, AND J. WONG¹¹Boston University, Boston, MA**Track: Biomaterials****OP-Fri-I-5 - Room 22****Biomaterials for Immunoengineering II****Chairs:** Cheryl Gomillion**8:00AM****Spatially Localized Recruitment Of Anti-Inflammatory Monocytes And Microvascular Network Remodeling By SDF-1 Delivery From Heparin-Based Hydrogels**M. OGLE¹, J. KRIEGER¹, J. MCFALINE-FIGUEROA¹, C. SEGAR¹, J. TEMENOFF¹, AND E. BOTCHWEY¹¹Georgia Institute of Technology, Atlanta, GA**8:15AM****Electrospun Poly(Dimethyl Siloxane)-Based Microfibrous Meshes for Improved T Cell Expansion**A. DANG¹, S. DE LEO¹, D. BOGDANOWICZ¹, H. LU¹, AND L. KAM¹¹Columbia University, New York, NY**8:30AM****Bio-inspired Lymphoid tissues for B and T cell Lymphomas**Y. TIAN¹, L. CERCHIETTI², AND A. SINGH¹¹Cornell University, Ithaca, NY, ²Weill Cornell Medical College, New York, NY**8:45AM****Anti-PD1 and Artificial Antigen Presenting Cell Dual Therapy for Melanoma**R. MEYER¹, A. KOSMIDES¹, K. AJE¹, J. SCHNECK¹, AND J. GREEN¹¹Johns Hopkins University, Baltimore, MD**9:00AM****Macrophages Effect Vessel Development when Encapsulated with Endothelial Cells in a 3D Biomimetic PEG-based Hydrogel**E. MOORE¹ AND J. WEST¹¹Duke University, Durham, NC**9:15AM****Effect Of Lactoferrin and Lysozyme On Mucus Barrier Properties**T. CARLSON¹, J. LOCK¹, AND R. CARRIER¹¹Northeastern University, Boston, MA

Track: Biomaterials**OP-Fri-1-6 - Room 23****Bioinspired and Self Assembling Biomaterials II****Chairs:** Rachael Sirianni, Feng Zhao**8:00AM****Programmable Biofilm-Based Materials from Engineered Curli Nanofibers**P. NGUYEN^{1,2}, Z. BOTYANSZKI^{1,2}, P. K. TAY^{1,2}, AND N. JOSHI^{1,2}¹Harvard University, Cambridge, MA, ²Wyss Institute for Biologically Inspired Engineering, Boston, MA**8:15AM****Microfluidic Reconstitution of HDL-apoE for CNS Therapeutics**A. SANTIAGO-LOPEZ¹, Y. SEI¹, AND Y. KIM¹¹Georgia Institute of Technology, Atlanta, GA**8:30AM****8:00AM Fabrication of 3D Biomimetic Microfluidic Networks**K. HEINTZ¹, J. WEST², AND J. SLATER¹¹University of Delaware, Newark, DE, ²Duke University, Durham, NC**8:45AM DREAM TEAM & CENTER****Multivalent Polymers: From Drug Carriers to Receptor Oligomerizing Therapeutics**A. GORMLEY¹, R. CHANDRAWATI¹, A. CHRISTOFFERSON², C. LOYNACHAN¹, R. CHAPMAN¹, D. AIL³, I. YAROVSKY², AND M. STEVENS¹¹Imperial College London, London, United Kingdom, ²MIT University, Melbourne, Australia, ³Linköping University, Linköping, Sweden**SPECIAL SESSION****8:00 AM – 9:30 AM - Room 39****Whitaker International Program: Funding Opportunity for Young Biomedical Engineers**

The Whitaker International Program, founded in 2005 provides funding to emerging U.S.-based leaders in biomedical engineering to conduct a study and/or research project, with the underlying objective of building international bridges. Grant projects – including research, coursework, public policy work – are intended to enhance both the recipient's career and the BME field. The goal of the Whitaker Program is to assist the development of professional leaders who are not only superb scientists, but who will advance the profession through an international outlook. The Whitaker Program has two sub-programs: Fellows and Scholars Program, and the Summer Program. For more information, including program details, the online application and deadlines, visit: <http://www.whitaker.org>.

see page 65 for details.

**9:00AM****Peptide-Induced Localization of RNA to Protocell Membranes**N. KAMAT¹ AND J. SZOSTAK¹¹Harvard University and Massachusetts General Hospital, Boston, MA**9:15AM****Self-Assembly of Cationic Polymers and Regulatory Nucleic Acids to Restrain Immune Function**K. L. HESS¹ AND C. M. JEWELL^{1,2,3}¹University of Maryland - College Park, College Park, MD, ²University of Maryland Medical School, Baltimore, MD, ³Marlene and Stewart Greenebaum Cancer Center, Baltimore, MD**Track: Tissue Engineering****OP-Fri-1-7 - Room 13****Engineering Tissue Interfaces****Chairs:** Stelios Andreadis, Michael Detamore**8:00AM****Nanocomposite Gradient Hydrogel for Interface Tissue Engineering**L. CROSS¹, S. PALANI¹, AND A. K. GAHARWAR¹¹Texas A&M University, College Station, TX**8:15AM****On-Demand Dissolution of 3D Synthetic Extracellular Matrix for Systems Biology Assays**J. VALDEZ¹, C. CHOPKO-AHRENS¹, AND L. GRIFFITH¹¹MIT, Cambridge, MA**8:30AM****A Quantitative, High-Throughput Platform for Investigating Fusion of Multicellular Spheroids**M. SUSIENKA¹ AND J. MORGAN¹¹Brown University, Providence, RI**8:45AM****A Three-Dimensional Culture Model Of The Human Neuromuscular Junction**M. AFSHAR BAKOOSHLI¹, E. LIPPMANN², S. DAVOUDI¹, R. ASHTON², AND P. GILBERT¹¹University of Toronto, Toronto, ON, Canada, ²University of Wisconsin-Madison, Madison, WI**9:00AM****Bioinspired Silicate Nanocomposites For Osteochondral Therapy**J. K. CARROW¹, A. THAKUR¹, G. LOKHANDE¹, L. CROSS¹, AND A. K. GAHARWAR¹¹Texas A&M University, College Station, TX**9:15AM****Fabrication of a Fibrin-Based Myocardial Layer for Use in a Modular Cardiac Patch**M. O'BRIEN¹, K. HANSEN¹, G. GAUDETTE¹, AND G. PINS¹¹Worcester Polytechnic Institute, Worcester, MA**Track: Orthopedic and Rehabilitation Engineering, Tissue Engineering****OP-Fri-1-8 - Room 14****Musculoskeletal Tissue Engineering and Mechanobiology****Chairs:** Vincent Wang, Robert Bowles**8:00AM****Laminin-functionalized Hydrogels Promote Juvenile Cell Phenotype and Morphology for Nucleus Pulposus Cells of the Intervertebral Disc**P. HWANG¹, L. JING¹, R. FITCH¹, R. ISAACS¹, W. RICHARDSON¹, J. CHEN¹, AND L. SETTON¹¹Duke University, Durham, NC

8:15AM**Calcium Signaling of *In Situ* Chondrocytes Under Unconfined Compression**M. LV¹, Y. ZHOU¹, X. CHEN¹, L. WANG¹, AND L. LU¹¹University of Delaware, Newark, DE**8:30AM****Treadmill Running Mitigates the Post-Injury Hypoxic Response in a Murine Model of Tendinopathy**K. TRELLA^{1,2}, J. LI², J. GALANTE², R. WYSOCKI², J. SANDY², A. PLAAS², AND V. WANG^{1,2}¹University of Illinois-Chicago, Chicago, IL, ²Rush University Medical Center, Chicago, IL**8:45AM****Incorporation Of Laminin Into Collagen-GAG Scaffolds For Muscle Tissue Engineering**A. MOY¹, W. GRIER¹, K. GARG¹, M. BOPPART¹, AND B. HARLEY¹¹University of Illinois at Urbana - Champaign, Urbana, IL**8:45AM****Epigenetic CRISPRi Cell Engineering for the Treatment of Intervertebral Disc Degeneration**N. FARHANG¹, J. BRUNGER², J. STOVER¹, P. THAKORE², C. GERSBACH², B. LAWRENCE¹, F. GUILAK², L. SETTON², AND R. BOWLES¹¹University of Utah, SLC, UT, ²Duke University, Durham, NC**9:15AM****Functional TMJ Disc Engineering: Novel concurrent radial tension & uniaxial compression bioreactor.**C. JURAN¹, M. F. DOLWICK¹, AND P. MCFETRIDGE¹¹University of Florida, Gainesville, FL**SPECIAL SESSION****8:00 AM - 9:30 AM - Ballroom D****Special Session - Best Practices in Leadership and Management**

This session will explore best practices of executive leadership and mid-level management. Experience professionals will provide with real world examples and experiences to illustrate topics of discussion.

SPECIAL SESSION**12:45pm - 1:45pm - Room I2****Special Session - Best Practices in Quality & Regulatory**

This session will explore the best practices in ensuring highest product quality and navigating the regulatory process:

- Investigational Device Exemption / PMA Application Process
- Establishing and maintaining Design Controls

Track: Neural Engineering**OP-Fri-I-9 - Room I5****Neuro-rehabilitation****Chairs:** Anita Singh, Hananeh Esmalbeigi**8:00AM****Perturbation Awareness Cannot Change the Generalization of Treadmill-learning to Overground Walking**D. MARISCAL¹, P. ITURRALDE¹, AND G. TORRES-OVIEDO¹¹University of Pittsburgh, Pittsburgh, PA**8:15AM****Motor Unit Coherence Among Muscles Of The Flexion Synergy In Individuals With Chronic Hemiparetic Stroke**L. MILLER^{1,2}, F. NEGRO², C. HECKMAN¹, D. FARINA², AND J. DEWALD¹¹Northwestern University, Chicago, IL, ²Florida International University, Miami, FL, ³University Medical Center Gottingen, Gottingen, Germany**8:30AM****Using Bioengineering Scaffolds and Body Weight Supported Treadmill Training to Improve Motor Function after Spinal Cord Injury**A. SINGH^{1,2}, B. KING², J. WITKO², A. HERMAN², A. VERNENGO², AND B. TOM¹¹Widener University, Chester, PA, ²Rowan Univ, Glassboro, NJ**8:45AM****Gelatin Methacrylate with Graphene Nanoplatelets for Targeting Neural Cell Laden Printing**W. ZHU¹, B. HARRIS², AND L. G. ZHANG¹¹The George Washington University, Washington, DC, ²Georgetown University Medical Center, Washington, DC**9:00AM****Neuronal Response after Injury in Simulated and Cultured Networks**K. O'NEILL¹, T. SIU¹, T. SHINBROT¹, AND B. FIRESTEIN¹¹Rutgers University, Piscataway, NJ**9:15AM****Custom Peptide Modulation of the BK channel Alters Pre- and Postsynaptic Coding in Auditory Midbrain Neurons**E. BRECHT¹, B. BECK^{1,2}, L. SCOTT³, AND J. WALTON¹¹University of South Florida, Tampa, FL, ²University of Florida, Gainesville, FL, ³University of Texas-Austin, Austin, TX**Track: Translational Biomedical Engineering****OP-Fri-I-10 - Room I6****Translational Therapeutics for Regenerative Medicine****Chairs:** Jeremy Mercuri, Chao-Min Cheng**8:00AM****Side by Side Comparison of Electrospun Soy-based Scaffolds and Oasis® in a Rat Model of Full Thickness Excisional Wound Healing**Y.E. HAR-EL¹, J. A. GERSTENHABER¹, S. M. BAHARLOU¹, T. Y. LO¹, D. HINDIN², AND P. I. LELKES¹¹Temple University, Philadelphia, PA, ²Temple University School of Medicine, Philadelphia, PA**8:15AM****A Novel Insulin-Mediated Cell Therapy for Chronic Wound Closure**A. AIJAZ¹, R. FAULKNER¹, F. BERTHIAUME¹, AND R. OLABISI¹¹Rutgers University, Piscataway, NJ

8:30AM**Long-Term Mitigation of Hypertrophic Scar Contraction and Stiffening via a Biodegradable Scaffold**E. LORDEN¹, K. MILLER², L. BASHIROV², M. IBRAHIM², E. HAMMETT¹, Y. JUNG³, M. A. SELIM², K. W. LEONG⁴, AND H. LEVINSON²¹Duke University, Durham, NC, ²Duke University Medical Center, Durham, NC, ³Korea Institute of Science and Technology, Seoul, Korea, Republic of, ⁴Columbia University, New York, NY**8:45AM****Thin, Elastic Polymer Films Prevent Unwanted Adhesions in a Semi-Laparoscopic Rat Model**S. MAYES¹, S. ZAWKO¹, J. ALI², AND D. PETERSON^{1,3}¹Alafair Biosciences, Austin, TX, ²The University of Texas Dell Medical School, Dept. of Surgery, Austin, TX, ³Austin Brain & Spine, Austin, TX**9:00AM****Personalized Medicine Approach to Improving Reconstructive Surgery Outcomes for Breast Cancer Survivors**K. DEGEN^{1,2}, K. MOYER³, AND R. GOURDIE^{1,2}¹Virginia Tech, Roanoke, VA, ²Virginia Tech Carilion Research Institute, Roanoke, VA, ³Carilion Clinic, Roanoke, VA**9:15AM DREAM TEAM & CENTER****MK2 Inhibitory Peptide Delivered via Nano-Polyplexes Blocks Inflammation and Modulates Vascular Smooth Muscle Cell Phenotype**B. EVANS¹, K. HOCKING¹, M. OSGOOD², I. VOSKRESENSKY², C. BROPHY², AND C. DUVALL¹¹Vanderbilt University, Nashville, TN, ²Vanderbilt University Medical Center, Nashville, TN**Track: Cardiovascular Engineering****OP-Fri-I-II - Room 3-4****Microcirculation****Chairs:** Anjelica Gonzalez, Bingmei Fu**8:00AM****Sphingosine-1-phosphate (S1P) Can Preserve Endothelial Surface Glycocalyx (ESG) for the Maintenance of Normal Microvessel Permeability**L. ZHANG¹, J. FAN¹, M. ZENG¹, J. TARBELL¹, F.R. CURRY², AND B. FU¹¹The City College of the City University of New York, New York, NY, ²University of California, Davis, Davis, CA**8:15AM****Low Magnitude Shear Stress Stabilizes Microvessel Integrity**P. GALIE¹, A. BAGLEY², P. JANMEY³, AND C. CHEN⁴¹Rowan University, Glassboro, NJ, ²MIT, Boston, MA, ³University of Pennsylvania, Philadelphia, PA, ⁴Boston University, Boston, MA**8:30AM****Arteriogenesis And Inflammatory Cell Recruitment In A Murine Flap Delay Model**S. SEAMAN¹, Y. CAO¹, AND S. PEIRCE¹¹University of Virginia, Charlottesville, VA**8:45AM****Linking the Cathepsin B-Mediated Cleavage of Mac-1 Integrins to the Control of Neutrophil Adhesion by Fluid Shear Stress**M. AKENHEAD¹, Z. BRANHAM¹, AND H. SHIN¹¹University of Kentucky, Lexington, KY**9:00AM****Shape Matters: Effect of Red Blood Cell Shape on Perfusion of an Artificial Microvascular Network**N. PIETY¹, W. REINHART², P. POURREAU¹, R. ABIDI¹, AND S. SHEVKOPLYAS¹¹University of Houston, Houston, TX, ²Kantonsspital Graubünden, Chur, Switzerland**9:15AM****A Microfluidic Model of Bleeding**K. RANA¹, A. WUFSUS¹, AND K. NEEVES^{1,2}¹Colorado School of Mines, Golden, CO, ²University of Colorado, Aurora, CO**Track: Cellular and Molecular Bioengineering****OP-Fri-I-I2 - Room 5-6****Young Innovators Session I: Cellular Engineering****Chairs:** Michael King**8:00AM****Incorporation Of Retinoic Acid Releasing Microspheres Into Aggregates Of Pluripotent Stem Cells For Inducing Neuronal Differentiation**J. GOMEZ¹, J. EDGAR¹, E. BIBAULT¹, A. MONTGOMERY¹, N. KHADAM MOTARAM¹, AND S. WILLERTH¹¹University of Victoria, Victoria, BC, Canada**8:15AM****Proteomic Analysis of Pericyte Derived Extracellular Matrix**L. BROWN¹, P. SAVA¹, C. GARCIA¹, AND A. GONZALEZ¹¹Yale University, New Haven, CT**8:30AM****Quantitation of PDGFRs on Fibroblasts Reveals Serum, Intra-Family Ligand, And Cross-Family Ligand Regulation**S. CHEN¹, X. GUO¹, O. IMARENZOR¹, AND P. IMOUKHUEDE¹¹University of Illinois Urbana Champaign, Urbana, IL**8:45AM****Controlling Cell Geometry Affects the Spatial Distribution of Load Across Vinculin**K. ROTHENBERG¹, S. NEIBART¹, A. LACROIX¹, AND B. HOFFMAN¹¹Duke University, Durham, NC**9:00AM****Nanotopographically-Controlled Model of Duchenne Muscular Dystrophy Cardiomyopathy**J. MACADANGDANG¹, X. GUAN^{1,2}, S. CZERNIECKI¹, R. LUCERO¹, M. CHILDERS¹, D. MACK¹, AND D-H. KIM¹¹University of Washington, Seattle, WA, ²Wake Forest University, Winston-Salem, NC**9:15AM****Integrin Binding Dictates Smooth Muscle Stiffness Sensing via FAK**W. HERRICK¹, S. RATTAN¹, T. NGUYEN¹, M. GRUNWALD¹, C. BARNEY², A. CROSBY¹, AND S. PEYTON¹¹University of Massachusetts, Amherst, Amherst, MA, ²Purdue University, West Lafayette, IN**Track: Biomedical Imaging and Optics****OP-Fri-I-I3 - Room II****Image Guided Focused Ultrasound Therapies****Chairs:** Charles Caskey, Kim Butts Pauly**8:00AM****MR-guided Transcranial Focused Ultrasound in the Treatment of Essential Tremor: Comparison of Beam Simulations to MR Thermometry in 23 patients (invited)**K. BUTTS PAULY¹, U. VYAS¹, C. HALPERN¹, M. WINTERMARK¹, J. ELIAS², AND P. GHANOUNI¹¹Stanford University, Stanford, CA, ²University of Virginia, Charlottesville, VA

8:30AM**Development of an Optically-Guided System for Transcranial Ultrasound Neuromodulation**V. CHAPLIN¹, L. CLEMENTS², M. MIGA², AND C. CASKEY¹¹Vanderbilt University Institute of Imaging Science, Nashville, TN, ²Vanderbilt University, Nashville, TN**8:45AM****Methods to Accelerate Thermal Ablation with MR-guided Focused Ultrasound**V. CHAPLIN¹, P. GAUR¹, P. DAYTON², C. ARENA², W. GRISSOM¹, AND C. CASKEY¹¹Vanderbilt University Institute of Imaging Science, Nashville, TN, ²University of North Carolina, Chapel Hill, NC**9:00AM****Non-Invasive Estimation Of Acoustic Attenuation For High Intensity Focused Ultrasound Treatments**S. JOHNSON¹, A. FARRER¹, C. DILLON², D. CHRISTENSEN¹, AND A. PAYNE²¹University of Utah, Salt Lake City, UT, ²Utah Center for Advanced Imaging Research, Salt Lake City, UT**9:15AM****Development of MRI-guided Focused Ultrasound for Delivery of Neurotherapy in Mice**T. TROUARD¹, M. VALDEZ¹, S. YUAN¹, R. RATH¹, T. MATSUNAGA¹, AND M. ROMANOWSKI¹¹University of Arizona, Tucson, AZ**9:15AM****The MRI-Targeted Delivery of Brain-Penetrating Non-Viral GDNF Gene Vectors to the Striatum with Focused Ultrasound Reverses Neurodegeneration in a Parkinson's Disease Model**B. MEAD¹, P. MASTORAKOS², W. MILLER¹, J. S. SUK², A. KLIBANOV¹, J. HANES², AND R. PRICE¹¹University of Virginia, Charlottesville, VA, ²Johns Hopkins University, Baltimore, MD**Track: Bioinformatics, Computational and Systems Biology****OP-Fri-I-14 - Room 17****Multiscale Approaches****Chairs:** Stacey Finley, Victor Rodgers**8:00AM****A Systems Biology Approach to Uncovering Mechanisms Governing Host-Pathogen Interactions: Tuberculosis as a Case Study (invited)**D. KIRSCHNER¹¹The University of Michigan Medical School, Ann Arbor, MI**8:30AM****Hypoxia, Cancer Stem Cells, and CCR5: the Interplay In Triple-Negative Breast Cancer Invasion and Metastasis.**K-A. NORTON¹, N. PANDEY¹, T. WALLACE¹, AND A. POPEL¹¹Johns Hopkins University, Baltimore, MD**8:45AM****Validating An Agent-Based Model Of Collagen Network Remodeling**K. GOOCH¹ AND J. REINHARDT¹¹The Ohio State University, Columbus, OH**9:00AM****Agent-based Modeling Suggests Cell Contraction Drives Organization of Endometrial Cells**T. JARACZEWSKI¹, A. FLESZAR¹, M. LOHR¹, M. MURRELL¹, AND P. KREEGER¹¹University of Wisconsin-Madison, Madison, WI**9:15AM****Solving Multicomponent Reaction-transport with Coupled Cellular Trajectories and Data-driven Cellular Activation Models**Y. LU¹, M. Y. LEE¹, T. SINNO¹, AND S. DIAMOND¹¹University of Pennsylvania, Philadelphia, PA**Track: Drug Delivery, Tissue Engineering
OP-Fri-I-15 - Room 10****Drug Delivery in Tissue Engineering****Chairs:** Elizabeth Dirk, James Moon**8:00AM****Programmable Release of Multiple Growth Factors from Aptamer-functionalized Hydrogels for Angiogenesis**Y. WANG¹, M. BATTIG¹, X. ZHANG¹, L.J. DUAN², AND G-H. FONG²¹Penn State University, State College, PA, ²University of Connecticut Health Center, Farmington, CT**8:15AM****Engineering Extracellular Vesicles as Multifactorial Cell-Derived Delivery Vehicles for Therapeutic Vascolarization**T. LAMICHHANE¹, D. PATEL¹, A. JEYARAM¹, AND S. JAY¹¹University of Maryland, College Park, MD**8:30AM****On-demand Controlled Release of Acoustically-Responsive Scaffolds using Therapeutic Ultrasound**A. MONCION¹, K. J. ARLOTTA¹, O. D. KRIPFGANS¹, R. T. FRANCESCHI¹, A. J. PUTNAM¹, AND M. L. FABIILLI¹¹University of Michigan, Ann Arbor, MI**8:45AM****Dietary Lipids and Emulsifiers Affect Particle Transport in Intestinal Mucus**J. LOCK¹, T. CARLSON¹, AND R. CARRIER¹¹Northeastern University, Boston, MA**9:00AM****Sustained Release of a P2X7 Receptor Antagonist Using an Injectable Nanohydrogel Improves Locomotion And Bladder Function After Spinal Cord Injury**I. YAZDI¹, A. MUNOZ¹, C. RIVERA¹, N. TAGHIPOUR¹, T. B. BOONE¹, AND E. TASCOTTI¹¹Houston Methodist Research Institute, Houston, TX**9:15AM DREAM TEAM & CENTER****Evaluation of Ciprofloxacin, Metronidazole Encapsulated Injectable Self-Assembled Biomimetic Nanomatrix Gel on *Enterococcus faecalis* and *Treponema denticola***S. KAUSHIK¹, J. SCOFFIELD¹, G. ALEXANDER¹, A. ANDUKURI¹, T. WALKER¹, S. C. CHOI², B. BROTT¹, H-W. JUN¹, J-H. PARK³, AND K. CHEON¹¹University of Alabama at Birmingham, Birmingham, AL, ²Kyung Hee University, Birmingham, AL, ³Kyung Hee University, Birmingham, AL**Track: Nano and Micro Technologies****OP-Fri-I-16 - Room 7-8****Nano/Microbiotechnology II****Chairs:** Mandy Esch, Wilbur Lam**8:00AM****Virus-Dendron Hybrid Nanostructures for Cell Delivery and Imaging Applications**A. WEN¹, K. PANGILINAN¹, P. CAO¹, R. ADVINCOLA¹, AND N. STEINMETZ¹¹Case Western Reserve University, Cleveland, OH

8:15AM**The Sequence-Specific Cellular Uptake of Spherical Nucleic Acids**S. NARAYAN¹, C. H. CHOI¹, L. HAO¹, C. CALABRESE¹, AND C. MIRKIN¹¹Northwestern University, Evanston, IL**8:30AM****MEMS Device Integrated with Vertically Aligned Carbon Nanotubes for Virus Capture and Detection**Y.T. YEH¹ AND S. ZHENG¹¹The Pennsylvania State University, University Park, PA**8:45AM****Exosomal miR-122 Detection in Drug Induced Acute Liver Injury Patients by Tethered Lipoplex Nanoparticles (TLN)**X. WANG¹, K. KWAK¹, A. ZHANG¹, W. LEE², K. GHOSHAL¹, V. CHOWDHARY¹, AND J. LEE¹¹The Ohio State University, Columbus, OH, ²UT Southwestern Medical Center, Columbus, OH**9:00AM****Nanoparticle Ingestion Alters Iron and Zinc Absorption in the Small Intestine**Z. GUO¹, E. TAKO², AND G. MAHLER¹¹Binghamton University, Binghamton, NY, ²Cornell University, Ithaca, NY**9:15AM****Carbon Nanotube-Based Microdevices for Tracking Single Macrophages by Raman Scattering**Z. WANG¹, J. XIA¹, L. SUN¹, P. TRAN¹, S. LUO¹, Y. REN¹, T. LIU¹, AND J. GUAN¹¹Florida State University, Tallahassee, FL**Track: Respiratory Bioengineering, Translational Biomedical Engineering****OP-Fri-1-17 - Room I****Translational Engineering in Lung Disease****Chairs:** Jason H. Track: Biomedical Engineering Education (BME)

OP-Fri-I-19 - Room 9

Novel Techniques for Incorporating Design into BME Curricula

Chairs: Michealann Tartis, Craig Goergen

8:00AM

Biomedical Engineering Education: Anecdotes from New Mexico Tech (invited)

D. GROW^{1,2}

¹New Mexico Tech., Socorro, NM ²University of New Mexico, Albuquerque, NM

8:15AM DREAM TEAM & CENTER

MedTech Innovation Course: A Mutually Beneficial Model for Physicians, Industry, and Engineers

J. ALI¹, H. LANDAVERDE², AND S. MAYES³

¹University of Texas at Austin, Dell Medical School, Austin, TX, ²University of Texas at Austin, Austin, TX, ³Alafair Biosciences, Austin, TX

8:30AM

Capstone Projects Have Improved Outcomes From Combined Partnership With Clinical and Commercialization Experts

M. RUEGSEGGER¹, C. DIGIOVINE¹, T. BERNER¹, S. METZLER¹, AND T. NOCERA¹

¹The Ohio State University, Columbus, OH

8:45AM

Lessons Learned From A 10-Year Collaboration Between Biomedical Engineering And Industrial Design Students in Capstone Design Projects

J. GOLDBERG¹ AND P. MALASSIGNE²

¹Marquette University, Milwaukee, WI, ²Milwaukee Institute of Art and Design, Milwaukee, WI

9:00AM

Effectively Teaching Engineering Design in the Online Classroom

E. LOGSDON¹, A. MAYBHATE¹, A. DRUMMOND¹, AND E. HAASE¹

¹Johns Hopkins University, Baltimore, MD

9:15AM

Spiral Curriculum for Biomedical Engineering - Reinforcing Professional Skills

M. GRIMM¹ AND H. LAI¹

¹Wayne State University, Detroit, MI

PLATFORM SESSIONS
Fri-1

P = Poster Session
OP = Oral Presentation
🏆 = Reviewer Choice Award

FRIDAY, October 9, 2015**1:45 PM - 2:45 PM****PLATFORM SESSIONS – FRI - 2****Track: Stem Cell Engineering**
OP-Fri-2-1 - Room 18**Directing Stem Cell Differentiation II****Chairs:** Tim Downing, Eduardo Silva**1:45PM**

Lineage Specific Chemo- and Mechanosensitivity of Primary Cilia in Adipose-derived Stem Cells

J. BODLE^{1,2}, M. HAMOUDA¹, AND E. LOBOA^{1,2}¹North Carolina State University, Raleigh, NC, ²University of North Carolina, Chapel Hill, NC**2:00PM**

A Comparative Study Of Chondrogenesis Using Aggregated Or Single Mesenchymal Stem Cells In 3D Biomimetic Hydrogels

H. Rogan¹ and F. Yang¹¹Stanford University, Stanford, CA**2:15PM**

Nanoparticle-mediated Transdifferentiation of Astrocytes into Non-gial Cells

X. LI¹, K. KOZIELSKI¹, Y-H. CHENG¹, J. GREEN¹, AND H-Q. MAO¹¹JHU, Baltimore, MD**2:30PM**

Enhancing Cardiac Differentiation via Statistically Optimized Engagement of 3D Extracellular Matrix

J. JUNG¹ AND B. OGLE¹¹University of Minnesota - Twin Cities, Minneapolis, MN**Track: Cellular and Molecular Bioengineering**
OP-Fri-2-2 - Room 19**Mechanotransduction III****Chairs:** Naomi Chesler**1:45PM**

Injection of Cross-linked Hyaluronic Acid Alters the Mechanical Environment of Collagen Gel Type I Gels and Activates the Rho/ROCK Pathway in Aged Fibroblasts

A. DE JESUS¹, S. CHINNATHAMBI¹, M. EL-HATTAB¹, AND E. SANDER¹¹University of Iowa, Iowa City, IA**1:45PM**

M1-M2 Polarization Alters the Motility and Force Generation of Primary Human Macrophages

L. HIND¹, E. LURIER², K. SPILLER², M. DEMBO³, AND D. A. HAMMER⁴¹University of Wisconsin-Madison, Madison, WI, ²Drexel University, Philadelphia, PA, ³Boston University, Boston, MA, ⁴University of Pennsylvania, Philadelphia, PA**1:45PM**

Osteocyte Mechanobiology in Live Allograft Biological Systems (LABS)

E. BUDYN^{1,2}, M. BENSIDHOU³, S. SANDERS¹, E. SCHMIDT², S. SASNOUSKI⁴, P. TAUC¹, E. DEPREZ¹, AND H. PETITE³¹Ecole Normale Supérieure de Cachan, Cachan, France, ²University of Illinois at Chicago, Chicago, IL, ³University Paris 7, Paris, France, ⁴Ecole Normale Supérieure de Cachan, cachan, France**1:45PM**

Time Evolution of Photodamage in Fibroblasts as a Measure of Cell Contractility

S. KNOLL¹, W. AHMED², AND T. SAIF¹¹University of Illinois at Urbana-Champaign, Urbana, IL, ²Institut Curie, section de recherche, Paris, France**Track: Biomaterials****OP-Fri-2-3 - Room 20****Biomechanics, Injury I - Gait and Motion****Chairs:** Kyle Allen, Steve Fening**1:45PM**

In Vivo Assessment of Tissue Engineered Myocardial Patch for the Local Dynamic Stability in Single and Dual-Task Concussed Gait: Preliminary Results

P. C. FINO¹, P. G. BROLINSON², AND T. E. LOCKHART³¹Virginia Tech, Blacksburg, VA, ²Edward Via College of Osteopathic Medicine, Blacksburg, VA, ³Arizona State University, Tempe, AZ**2:00PM**

Temporo-Spatial Gait Parameters of Older Adults during Single vs. Dual-Task Gait

M. PLEVKA¹, A. WRIGLEY¹, AND E. VIEIRA¹¹Florida International University, Miami, FL**2:15PM**

Quantifying Rodent Locomotion Using Automated Gait Analysis Through Hues and Areas (AGATHA)

H. KLOEFKORN¹ AND K. ALLEN¹¹University of Florida, Gainesville, FL**2:30PM**

Loss of Anterior Stability of Shoulder Across a Range of Motion Due to Combined Bony Defects

P. WALIA^{1,2}, L. GOTTSCHALK¹, R. PATEL³, M. JONES¹, S. FENING⁴, AND A. MINIACI¹¹Cleveland Clinic, Cleveland, OH, ²Cleveland State University, Cleveland, OH, ³Hinsdale Orthopaedics, Hinsdale, IL, ⁴Case Western Reserve University, Cleveland, OH**Tracks: Biomechanics, Cellular and Molecular Bioengineering**
OP-Fri-2-4 - Room 21**OP-Fri-2-4 - Room 21****Cell and Tissue Biomechanics I****Chairs:** Brandon Dixon, Charles Corey Hardin**1:45PM**

Fiber-Enabled, 3D-Printed Cellular Micropatterning for Robust and Affordable Cellular Biomechanics Studies

D. WOLOZNY¹, M. ANDERSON¹, AND W. RUDER¹¹Virginia Tech, Blacksburg, VA**2:00PM**

Lamin A/C Deficiency Reduces Circulating Tumor Cell Resistance to Fluid Shear Stress

M. J. MITCHELL^{1,2}, C. DENAIS², M. CHAN², Z. WANG², J. LAMMERDING³, AND M. R. KING²¹MIT, Cambridge, MA, ²Cornell University, Ithaca, NY**2:15PM**

Modulation of the Sickle Cell Disease Erythrocyte Adhesion via ICAM-4 Activation

J. ZHANG¹, B. ANDEMARIAM², AND G. LYKOTRAFITIS¹¹University of Connecticut, Storrs, CT, ²University of Connecticut Health Center, Farmington, CT**2:30PM**

Mechanical Folding Instability Specifies Branch Locations During Airway Branching Morphogenesis

V. VARNER¹ AND C. NELSON¹¹Princeton University, Princeton, NJPLATFORM
SESSIONS

Fri-2

Track: Biomaterials**OP-Fri-2-5 - Room 22****Biomaterials for Immunoengineering III****Chairs:** David Zaharoff, Angela Pannier**1:45PM**

Injectable, Tough Alginate Cryogels for Delivery of Immunomodulatory Agents

T.Y. SHIH^{1,2}, S. BLACKLOW¹, W. A. LI^{1,2}, S. BENCHERIF^{1,2}, S. KOSHY^{1,2,3}, AND D. MOONEY^{1,2}¹School of Engineering and Applied Sciences, Harvard University, Cambridge, MA, ²Wyss Institute for Biologically Inspired Engineering at Harvard University, Boston, MA, ³Harvard-MIT Division of Health Sciences and Technology, Cambridge, MA**2:00PM**

Changes in Material Chemistry Enhance the Immunomodulatory Effect of Biomaterial Surface Energy

K. HOTCHKISS¹, S. L. HYZY¹, S. BRENNER², Z. SCHWARTZ¹, B. D. BOYAN^{1,3}, AND R. OLIVARES-NAVARRETE¹¹Virginia Commonwealth University, Richmond, VA, ²Institut Straumann AG, Basel, Switzerland, ³Georgia Institute of Technology, Atlanta, GA**2:15PM**

A Hemostatic, Tissue Adhesive With Immunomodulatory Properties

J. SKOUSEN¹, M. POLEI¹, AND P. TRESICO¹¹University of Utah, Salt Lake City, UT**2:30PM**

Biomaterials-Based Artificial Germinal Center Niches to Generate Antigen-Specific B Cells for Adoptive Immunotherapy

K-H. ROH¹, K. BAI¹, AND K. ROY¹¹Georgia Institute of Technology, Atlanta, GA**Track: Biomaterials****OP-Fri-2-6 - Room 23****Micro and Nano Structured Materials III****Chairs:** Deak-Ho Kim, Jay Henderson**1:45PM**

Amorphous Titanium Oxide Nanocoating Directs MSC Differentiation on Microstructured Stainless Steel

V. GARCIA-PEREZ¹, S. L. HYZY², S. E. RODIL¹, A. ALMAGUER-FLORES¹, Z. SCHWARTZ², B. D. BOYAN², AND R. OLIVARES-NAVARRETE²¹Universidad Nacional Autonoma de Mexico, Mexico City, Mexico, ²Virginia Commonwealth University, Richmond, VA**2:00PM**

Controlled Release of bFGF from Nano-film to Maintain Undifferentiated Human iPS Cell Cultures

J. HONG¹¹Chung-Ang University, Seoul, Korea, Republic of**2:15PM**

The Effects of Physical Cues on Reprogramming of Fibroblasts into Induced Cardiomyocytes

J. SIA¹, P.YU², R. SUN¹, AND S. LI¹¹UC Berkeley, Berkeley, CA, ²Gladstone Institutes, San Francisco, CA**2:30PM**

Influence of Synergistic Topographical and Biomolecular Cues on the Differentiation of Mesenchymal Stem Cells in Sparse-Fiber Composites Toward a Ligament Phenotype

P. THAYER¹, S. VERBRIDGE¹, K. EDGAR¹, T. GROVE¹, AND A. GOLDSTEIN¹¹Virginia Tech, Blacksburg, VA**Track: Tissue Engineering****OP-Fri-2-7 - Room 13****Bioreactor Systems for Tissue Engineering****Chairs:** Teng Ma, Eun Jung Lee**1:45PM**

Bioreactor System With Isolated Compartments Supporting Bilayer Barrier Tissue Models On Gelatin Biopapers.

R. PIRLO¹, L. BISCHEL², P. WU³, AND B. RINGEISEN¹¹U.S. Naval Research Laboratory, Washington, DC, ²American Society for Engineering Education, Washington, DC, ³Southern Oregon University, Ashland, OR**2:00PM**

Bioprocess Development for the Expansion of Skin Derived Precursor Schwann Cells

T. WALSH¹, J. BIERNASKIE¹, R. MIDHA¹, AND M. KALLOS¹¹University of Calgary, Calgary, AB, Canada**2:15PM**

Strategy for Efficient Perfusion of Microvessel Lumens in Engineered Tissues Using a Novel Perfusion Bioreactor

SPECIAL SESSION**1:45 PM - 5:00 PM - Ballroom A****BMES-NSF Special Session on Research in BME & Grant Writing**

Pre-registration required

BMES and the National Science Foundation (NSF) will convene a special session focused on innovative research in biomedical engineering and grant writing. The session will bring together NSF Bioengineering and Engineering Healthcare grantees, young investigators, junior and senior faculty, post-doctoral fellows and graduate students for idea exchange and networking related to conducting and funding cutting-edge research in BME. The session will showcase NSF funded research and researchers, foster collaboration and idea exchange, familiarize participants with NSF funding mechanisms, and provide strategies for preparing competitive grant proposals. The research areas where the NSF Biomedical Engineering Program supports fundamental and transformative research will also be discussed. Participants at all levels will gain an increased awareness of NSF funded research, a better understanding of NSF funding opportunities and how to prepare successful grant applications, and a chance to establish new relationships leading to future collaborations. This material is based upon work supported by the National Science Foundation under Grant No. CBET-1540059.

PLATFORM
SESSIONS

Fri-3

FRIDAY, October 9, 2015**3:00 PM - 4:00 PM****PLATFORM SESSIONS – FRI - 3****Track: Stem Cell Engineering****OP-Fri-3-1 - Room 18****Other Stem Cell Applications****Chairs:** Akhilesh Gaharwar, Jin Nam**3:00PM****Non-viral Genetically Engineered Adipose Mesenchymal Stem Cells for Brain Tumor Therapy**A. ¹University of Central Florida, Orlando, FL, ²State University of Maringá, Maringá, Brazil, ³Sanford-Burnham Medical Research Institute, Orlando, FL

3:45PM**Chitosan Interaction with the 'Universal' Bacterial Communication Molecule, Autoinducer-2**

M. RHOADS^{1,2} AND W. BENTLEY^{1,2}

¹University of Maryland College Park, College Park, MD, ²Institute for Bioscience and Biotechnology Research, College Park, MD

Track: Tissue Engine**OP-Fri-3-7 - Room I3****Tissue Engineered Models for Study of Disease and Drug Discovery I**

Chairs: Pamela Kreeger, Kristyn Masters

3:00PM**A 3D In Vitro Model Of Microvascular Remodeling In Adipose Tissue**

E. BELLAS^{1,2} AND C. CHEN^{1,2}

¹Boston University, Boston, MA, ²Harvard University, Boston, MA

3:15PM**Engineering an In Vitro Model of Human Non-alcoholic Fatty Liver Disease and Insulin Resistance**

M. DAVIDSON¹, K. BALLINGER¹, A. LEJEUNE¹, AND S. KHETANI¹

¹Colorado State University, Fort Collins, CO

3:30PM**Tumor Growth Response to Controlled Oxygen Gradients**

S. LAM¹ AND S. GEORGE¹

¹Washington University in St. Louis, St. Louis, MO

3:45PM**Design And Fabrication Of "EZ Imaging Perfusion Chamber" For Study Of Immune Cell-Endothelium Interaction In Tissue-Engineered Blood Vessel (TEBV)**

K. ADEBOWALE¹, Z. CHEN¹, W. LEONG¹, AND K. LEONG¹

¹Columbia University, New York, NY

Track: Orthopedic and Rehabilitation Engineering**OP-Fri-3-8 - Room I4****Rehabilitation Engineering**

Chairs: Gregory Sawick

3:00PM**Scoliosis Analog Model for the Evaluation of Bracing Technology**

D. DIANGELO¹ AND C. CHUNG¹

¹University of Tennessee Health Science Center, Memphis, TN

3:15PM**Voluntary Activation of Tendon Transfers to Restore Elbow Extension in Tetraplegia**

C. PETERSON^{1,2}, M. BEDNAR^{2,3}, A. BRYDEN^{4,5}, M. KEITH^{4,5}, E. PERREAULT^{1,6}, AND W. MURRAY^{1,2,6}

¹Rehabilitation Institute of Chicago, Chicago, IL, ²Edward Hines, Jr. VA Hospital, Hines, IL, ³Loyola University, Maywood, IL, ⁴Case Western Reserve University, Cleveland, OH, ⁵Cleveland FES Center at MetroHealth, Cleveland, OH, ⁶Northwestern University, Evanston, IL

3:30PM**Acquisition and Analysis of Underfoot Load Data from Lower Extremity Fracture Patients**

A. LAJEVARDI-KHOSH¹, B. I. TRESKO¹, M. ACKERMAN¹, T. PETELEZ¹, AND R. HITCHCOCK¹

¹University of Utah, Salt Lake City, UT

3:45PM**Children With Cerebral Palsy Achieve Lower Limb Muscle Stretch Through Climbing**

J. MILLER¹ AND S. RUSSELL¹

¹University of Virginia, Charlottesville, VA

Track: Neural Engineering**OP-Fri-3-9 - Room I5****Glial Cell Engineering/Addressing Degeneration**

Chairs: Stephanie Seidlits, Deanna Thompson

3:00PM**Brief Electrical Stimulation to Delay Onset of Glaucoma**

J. STUKEL¹, L. COUGHLIN^{2,3}, R. WILLITS¹, AND D. INMAN²

¹The University of Akron, Akron, OH, ²NEOMED, Rootstown, OH, ³Kent State University, Kent, OH

3:15PM**Quercetin And Metabolites Reduce A β -Induced Apoptosis Associated With Alzheimer's Disease**

K. PATE¹, M. ROGERS¹, AND M. MOSS¹

¹University of South Carolina, Columbia, SC

3:30PM**Directional Migration of Oligodendrocyte Precursors in an Applied Electric Field**

Y. LI¹, P-S. WANG², G. LUCAS³, R. LI², AND L. YAO⁴

¹Wichita State University, Wichita, KS, ²Stowers Institute of Medical Research, Kansas City, KS, ³School of Medicine-Wichita, University of Kansas Medical Center, Wichita, KS, ⁴Wichita State University, Wichita, KS

3:45PM**Fiber Diameter Alters the Initial Astrocyte Response to Electrospun Poly-L-lactic Acid Fibers**

C. JOHNSON¹, G. DESMOND¹, J. ZUIDEMA², N. SCHAUB¹, AND R. GILBERT¹

¹Rensselaer Polytechnic Institute, Troy, NY, ²University of California San Diego, La Jolla, CA

PLATFORM
SESSIONS
Fri-3

P = Poster Session
OP = Oral Presentation
 = Reviewer Choice Award

Track: Device Technologies and Biomedical Robotics, Cardiovascular Engineering
OP-Fri-3-10 - Room 16

Cardiovascular Devices

Chairs: Dan Moran, Baruch Lieber

3:00PM

Noninvasive Detection System for Estimating Cutaneous Blood Perfusion Level

Y.H. PENG¹ AND J-M. MAAREK¹

¹University of Southern California, Los Angeles, CA

3:15PM

Evaluation of Cardiac Energetics for a Transmural Cardiac Assist Device

E. HORD¹, C. BOLCH², E. TUZUN³, AND J. CRISCIONE¹

¹Texas A&M University, College Station, TX, ²Corlnnova, Inc., Houston, TX, ³Texas A&M Institute for Preclinical Studies, College Station, TX

3:30PM

3D-printing Elastomeric Bioresorbable Vascular Stents

J. YANG¹, E. BAKER², H. WARE¹, R. VAN LITH¹, F. ZHOU¹, C. SUN¹, AND G. AMEER¹

¹Northwestern University, Evanston, IL, ²Northwestern University, Evanston, IL

3:45PM

Evaluation of Flow Diversion Performance of Five Commercial Neurovascular Stents Through MicroCT Geometry Based Numerical Modeling in an Idealized Brain Aneurysm Model

R. DHOLAKIA¹, C. SADASIVAN¹, D. FIORELLA¹, H. WOO¹, AND B. LIEBER¹

¹Stony Brook University, Stony Brook, NY

Track: Cardiovascular Engineering
OP-Fri-3-11 - Room 3-4

Imaging in Cardiovascular Systems

Chairs: Albert Titus, Ngan Huang

3:00PM DREAM TEAM & CENTER

Aortic Blood Flow Characterization using Phase Contrast MRIs in Turner Syndrome

G. MYLAVARAPU¹, E. GUTMARK^{1,2}, S. RINGGARD³, C. TROLLE³, C. GRAVHOLT³, P. BACKELJAUW⁴, AND I. GUTMARK-LITTLE⁵

¹University of Cincinnati, Cincinnati, OH, ²University of Cincinnati Medical Center, Cincinnati, OH, ³Aarhus University Hospital, Aarhus, Denmark, ⁴Cincinnati Children's Hospital Medical Center, Cincinnati, OH, ⁵Cincinnati Childrens Hospital Medical Center, Cincinnati, OH

3:15PM

Effect of Core Temperature on Peripheral and Cerebral Vasculature in MRI Studies

A. CROUCH¹ AND J. GREVE¹

¹University of Michigan, Ann Arbor, MI

3:30PM

Relationship Between Microcalcifications In Fibrous Caps And Calcification Patterns In Human Atheroma

N. MALDONADO¹, A. KELLY-ARNOLD¹, D. LAUDIER¹, L. CARDOSO¹, AND S. WEINBAUM¹

¹The City College of New York, New York, NY

3:45PM

Enzyme-Dependent Fluorescence Recovery after Photobleaching (ED-FRAP) in a Whole Heart

A. MORENO¹, R. JAIMES¹, S. GLANCY¹, AND M. KAY¹

¹The George Washington University, Washington, DC

Track: Translational Biomedical Engineering, Biomedical Imaging and Optics
OP-Fri-3-12 - Room 5-6

Imaging Technologies in Clinical Translation

Chairs: Mark Palmer, Melinda Harman

3:00PM

Patient-Specific Assessment of pre-TPV Angioplasty Coronary Compression Using the Finite Element Method.

S. AMENDOLA¹, P. BHATLA², S. CHAKRAVARTI², A. LUDOMIRSKY², M. ARGILLA², P. BERMAN², D. MCELHINNEY³, AND V. FLAMINI¹

¹NYU, Brooklyn, NY, ²NYU, Manhattan, NY, ³Stanford University, Stanford, CA

3:15PM

Diffuse Optical Measurements of Head and Neck Tumor Hemodynamics for Early Prediction of Radiation Therapy Outcomes

L. DONG¹, D. IRWIN¹, Y. SHANG¹, L. CHEN¹, B. SHELTON¹, S. STEVENS¹, M. KUDRIMOTI¹, AND G. YU¹

¹University of Kentucky, Lexington, KY

3:30PM

Effect of Head Impacts on White Matter Fiber Tracts in Youth Football

N. BAHRAMI¹, D. H. SHARMA¹, C. T. WHITLOW¹, E. M. DAVENPORT¹, J. E. URBAN¹, Y. JUNG¹, G. A. GIOIA², J. D. STITZEL¹, AND J. A. MALDJIAN¹

¹Wake Forest University, School of Medicine, Winston Salem, NC, ²Children's National Medical Center, Washington DC, DC

3:45PM

A Non-Invasive, Image-Based, Smartphone App for Diagnosing Anemia

R. MANNINO^{1,2,3}, E. TYBURSKI^{1,2,3}, J. BOUDREAU^{2,3}, AND W. LAM^{1,2,3}

¹Georgia Institute of Technology and Emory University, Atlanta, GA, ²Emory University School of Medicine, Atlanta, GA, ³Children's Healthcare of Atlanta, Atlanta, GA

Tracks: Biomedical Imaging and Optics, Biomechanics

OP-Fri-3-13 - Room 11

Applications of Imaging in Biomechanics

Chairs: Elena Talkacheva, Peter Johansen

3:00PM

Architectural Basis of Lingual Muscular Hydrostats

G. ANINWENE II¹, E. TAYLOR¹, M. HOFFMAN¹, AND R. GILBERT¹

¹Northeastern University, Boston, MA

3:15PM

Microstructural Characterization of Human Ocular Tunics for Whole Eye Numerical Modeling

M. SPANG¹, T. SORENSEN², C. WHITFORD³, A. ELSHEIKH³, AND C. BOOTE¹

¹Cardiff University, Cardiff, United Kingdom, ²Diamond Light Source Ltd, Didcot, United Kingdom, ³University of Liverpool, Liverpool, United Kingdom

3:30PM

Bioprosthetic Heart Valve Leaflet 3D Strain Mapping using Digital Image Correlation

S. HEIDE-JØRGENSEN¹, J. TABORSKY¹, S. K. KRISHNA¹, T. BECHSGAARD², J. L. HØNGE², R. ZEGDI³, AND P. JOHANSEN¹

¹Faculty of Science and Technology, Aarhus University, Aarhus, Denmark, ²Aarhus University Hospital, Aarhus, Denmark, ³Hôpital Européen Georges Pompidou, Paris, France

3:45PM

Effects of an Exercise Surrogate on Lumen Expansion in Murine Models.

P. CASTLE¹, U. SCHEVEN¹, A. CAO¹, AND J. GREVE¹

¹University of Michigan, Ann Arbor, MI

Track: Bioinformatics, Computational and Systems Biology**OP-Fri-3-14 - Room 17****Cell Signaling and Therapeutics****Chairs:** Jose Luis Puglisi, Cheemeng Tan**3:00PM****Quantitative Analysis of the Akt/mTOR Signaling Axis**A. RAHMAN¹ AND J. HAUGH¹¹North Carolina State University, Raleigh, NC**3:15PM****Druggability of Cellular Network Motifs**F. WU¹, C. MA², AND C. TAN¹¹University of California Davis, Davis, CA, ²Zhejiang University, Hangzhou, China, People's Republic of**3:30PM****Mechanistic Model of Angiogenesis Inhibitor Thrombospondin-1 in Cancer**S. FINLEY¹¹University of Southern California, Los Angeles, CA**3:45PM****Dynamic Phosphorylation Signatures Following Stimulation Distinguish Latent HIV-Infected Primary CD4+ T Cells from Uninfected Cells**L. FONG¹, E. SULISTIJO¹, AND K. MILLER-JENSEN¹¹Yale University, New Haven, CT**Track: Drug Delivery****OP-Fri-3-15 - Room 10****Multifunctional or Hybrid Systems****Chairs:** Steven Jay, Tara Deans**3:00PM****A Multipurpose Prevention Technology or "Virus Trap and Safety Net" for the Delivery of Antivirals, Proteins, and Oligonucleotides against STIs**K. M. TYO¹, T. W. GROOMS-WILLIAMS¹, N. MATOBA¹, AND J. M. STEINBACH¹¹University of Louisville, Louisville, KY**3:15PM****Polyelectrolyte Multilayers Assembled from Immune Signals Promote Antigen-specific T Cell Response**P. ZHANG¹ AND C. JEWELL^{1,2,3}¹University of Maryland, COLLEGE PARK, MD, ²University of Maryland Medical School, Baltimore, MD, ³Marlene and Stewart Greenebaum Cancer Center, Baltimore, MD**3:30PM****Multispectral PLGA Nanoparticles To Assess Cellular Uptake And Distribution *In Vitro* and *In Vivo***D. MEDINA¹, J. YAMAGUCHI¹, K. HOUSEHOLDER¹, T. KOVALIK¹, S. BOWEN¹, AND R. SIRIANNI¹¹Barrow Neurological Institute, Phoenix, AZ**3:45PM*****In vivo* Delivery of Transcription Factors with Multifunctional Oligonucleotides**K. LEE¹, M. RAFI², X. WANG², R. TANG², N. LINGAMPALLI², AND N. MURTHY²¹University of California, Berkeley, Albany, CA, ²University of California, Berkeley, Berkeley, CA**Track: Nano and Micro Technologies****OP-Fri-3-16 - Room 7-8****Micro and Nano Total Analysis Systems****Chairs:** Beth Pruitt, Rong Fan**3:00PM****An Acoustofluidic Device for Liquefying Human Sputum Samples On-chip**P-H. HUANG¹, L. REN¹, S. LI¹, AND T. J. HUANG¹¹The Pennsylvania State University, University Park, PA**3:15PM****Enhancement of Surface Binding by Laser Heating Induced Mass Transport**B. WANG¹ AND X. CHENG¹¹Lehigh University, Bethlehem, PA**3:30PM****Single-Cell, 42-Plex Detection of Immune Effector Proteins Reveals Deep Functional Heterogeneity and Dynamic Population Architecture**R. POSTERS - FRIDAY SESSIONS

POSTER VIEWING WITH AUTHORS & REFRESHMENT BREAK | 9:30AM - 10:30AM, 4:00PM - 5:00PM

FRIDAY, October 9, 2015

9:30 AM - 5:00 PM

POSTER SESSIONS

Cancer:

P-Fr-1 to P-Fr-98

Cardiopulmonary Bioengineering:

P-Fr-99 to P-Fr-129

Cardiopulmonary Biomechanics:

P-Fr-130 to P-Fr-224

Drug Delivery:

P-Fr-225 to P-Fr-312

Engineering Materials:

P-Fr-316 to P-Fr-427

Imaging:

P-Fr-428 to P-Fr-521

Molecular and Cellular Topics:

P-Fr-529 to P-Fr-588

Neural Engineering:

P-Fr-589 to P-Fr-651

Stem Cell Engineering & Applications:

P-Fr-652 to P-Fr-724

Track: Cancer Technologies, Drug Delivery

Cancer:

Cancer Drug Delivery Posters

P-Fr-1

Non-thermal Radiofrequency Disrupts Normal Pancreatic Adenocarcinoma Phenotype

V. KESHISHIAN¹, M. WARE¹, N. LARA², S. CURLEY¹, AND S. CORR^{1,2}
¹Baylor College of Medicine, Houston, TX, ²Rice University, Houston, TX

P-Fr-2

Enhancing anti-Cancer Drug Uptake in Breast Cancer Tumor GEM Model Using Microbeam Radiation Therapy.

S. CHANG¹, A. J. MADDEN¹, J. N. RIVERA^{1,2}, C. SANTOS¹, D. DARR¹, L. HUNTER¹, AND W. C. ZAMBONI¹
¹University of North Carolina- Chapel Hill, Chapel Hill, NC, ²North Carolina State University, Chapel Hill, NC

P-Fr-3

Polymeric Nanoparticles for Non-Viral Gene Therapy Extend Brain Tumor Survival *In Vivo*

A. MANGRAVITI¹, S. TZENG¹, K. KOZIELSKI¹, Y. WANG¹, Y. JIN¹, D. GULLOTTI¹, M. PEDONE¹, N. BUARON², A. LIU¹, D. WILSON¹, S. HANSEN¹, F. RODRIGUEZ¹, G-D. GAO³, F. DIMECO⁴, H. BREM¹, A. OLIVI¹, B. TYLER¹, AND J. GREEN¹
¹Johns Hopkins University, Baltimore, MD, ²Ben Gurion University of the Negev, Be'er Sheva, Israel, ³The Fourth Military Medical University, Xi'an, China, People's Republic of, ⁴"C.Besta" Neurologica Istituto, Milan, Italy

P-Fr-4

Nano-'Carbobotaceae' for Sustained Inhibition of Cancer Stem Cells via STAT-3 Modulation

F. OSTADHOSSEIN^{1,2}, S. KUMAR MISRA^{1,2}, P. MUKHERJEE¹, R. BHARGAVA¹, AND D. PAN¹
¹University of Illinois at Urbana Champaign, Urbana, IL, ²Carle foundation hospital, Urbana, IL

P-Fr-5

HIFU in Synergy with Sorafenib-Loaded Thermosensitive Liposomes for Treatment of Prostate Cancer

H. MURAD¹, J. ARORA¹, G. HALLIBURTON¹, S. ASHE¹, V. JOHN¹, AND D. KHISMATULLIN¹
¹Tulane university, New Orleans, LA

P-Fr-6

Anti-angiogenic Heparin Conjugate on Orthotopic Glioblastoma Mouse Model

J. H. SEOL¹, S. J. PARK¹, AND D. Y. LEE¹
¹Hanyang university, Seoul, Korea, Republic of

P-Fr-7

Specific Binding of Functionalized Droplets to Integrin Receptor & αv & $\beta 3$

N. SMITH¹, M. FABIILLI², R. SEDA¹, D. LI¹, J. PITRE¹, B. FOWLKES¹, AND J. BULL¹
¹University of Michigan, Ann Arbor, MI, ²University of Michigan Medical School, Ann Arbor, MI

P-Fr-8

Localized activation of bacterial quorum sensing for bacteria-based drug delivery applications

E. LEAMAN¹, B. GEUTHER¹, AND B. BEHKAM¹
¹Virginia Tech, Blacksburg, VA

P-Fr-9

CXCR4-overexpressing Adipose-derived Stem Cells Exhibited Enhanced Tropism towards Brain Tumor in an intracranial glioblastoma xenograft model

X. JIANG¹, C. WANG¹, AND F. YANG¹
¹Stanford University, Stanford, CA

P-Fr-10

The Effect of Nonthermal Atmospheric Pressure Plasma for the Lung Cancer Cells Viability

S. KARKI¹ AND H. AYAN²
¹University of Toledo, Toledo, OH, ²University, Toledo, OH

P-Fr-11

In Vitro Binding Analysis of Phosphonate and Carboxylate Copolymers for Use as Bone-Targeting Radiopharmaceuticals

S. SMITH¹ AND C. BATICH¹
¹University of Florida, Gainesville, FL

P-Fr-12

Targeting Cancer-associated Fibroblasts In Pancreatic Adenocarcinoma

L. BRINTON¹, D. BAUKNIGHT¹, S. DASA¹, AND K. KELLY¹
¹University of Virginia, Charlottesville, VA

Track: Drug Delivery, Cancer Technologies

Cancer:

Cancer Drug Delivery Posters

P-Fr-13

Photosensitizer-loaded CD4+ And CD8+ T cells As Living Drug Delivery Vehicles

A-R. BLAUDSZUN¹, G. MOLDENHAUER², M. SCHNEIDER³, AND A. PHILIPPI¹
¹KIST Europe Forschungsgesellschaft mbH, Saarbrücken, Germany, ²German Cancer Research Center, Heidelberg, Germany, ³Saarland University, Saarbrücken, Germany

P-Fr-14

Viral Nanoparticles For Targeted Delivery To Ovarian Cancer

A. CZAPAR¹, M. KNARR¹, A. DIFEO¹, AND N. STEINMETZ¹
¹Case Western Reserve University, Cleveland, OH

P-Fr-15**Targeted Lung Cancer Dual Therapy Using Multi-Drug Core-Shell Nanoparticles**

J. MENON^{1,2}, A. KURIAKOSE^{1,2}, R. IYER^{1,2}, D. SAHA², AND K. NGUYEN^{1,2}
¹The University of Texas at Arlington, Arlington, TX, ²The University of Texas Southwestern Medical Center, Dallas, TX

P-Fr-16**Regulating Tumor Suppressing Gene Using a Pendant-Chain Delivery System**

K. M. RAO¹, C-S. HA¹, B. J. PARK², AND Y. H. YUN³
¹Pusan National University, Busan, Korea, Republic of, ²Pusan National University, Busan, Korea, Republic of, ³University of Akron, Akron, OH

P-Fr-17**A FRET-Based Imaging Strategy to Rapidly Quantify Biodegradation of Degradable Nanomedicines**

D. C. RADFORD¹, J. YANG¹, R. ZHANG¹, AND J. KOPECEK¹
¹University of Utah, Salt Lake City, UT

P-Fr-19**Intracellular Delivery of Bioactive Chemotherapeutic Using Dual-Crosslinked Alginate Microspheres**

S. FENN¹, T. MIAO¹, R. SCHERRER¹, AND R. OLDINSKI¹
¹University of Vermont, Burlington, VT

P-Fr-20**HIFU-Triggered Sorafenib-Loaded TSLs for Targeted Drug Therapy in Renal Cell Carcinoma**

P-Fr-368**Effect of Synthetic Vitreous Substitute on Epithelial Tight-Junctions**

J. DAVIS^{1,2}, N. ZAPATA^{1,2}, AND N. RAVI^{1,2}
¹Washington University in St Louis, St Louis, MO, ²VA Healthcare Systems, St Louis, MO

P-Fr-369**Leaching of Dopant from Doped Poly(dimethylsiloxane) into Liquid Media**

S. STONE¹ AND B. HOLLINS¹
¹Louisiana Tech University, Ruston, LA

P-Fr-370**Multifunctional Dynamic Surfaces for Engineering Cell Microenvironments**

B. XU¹ AND W. SHEN¹
¹University of Minnesota, Minneapolis, MN

P-Fr-371**The Development of a Facile Polymer Microbead-based Approach to Promoting Angiogenesis in Dense Epithelial Tissue**

M. SOFMAN¹, P. HAMMOND¹, AND L. GRIFFITH¹
¹MIT, Cambridge, MA

Track: Biomaterials**Engineering Materials:****Biomaterials for Immunoengineering Posters****P-Fr-372**

Educating Dendritic Cell Phenotype To Direct Immune Tolerance Towards Multiple Sclerosis-Specific Antigen

S. SRINIVASAN¹ AND J. BABENSEE¹
¹Georgia Institute of Technology, Atlanta, GA

P-Fr-373

Characterization of Indocyanine Green-Loaded Nanocarriers for the Targeting of Atherosclerotic Plaque-Resident Dendritic Cell Subsets

S. ALLEN¹ AND E. SCOTT¹
¹Northwestern University, Chicago, IL

P-Fr-374

Barium-gelled Alginate Microcapsules Do Not Exhibit Sodium-induced Isotropic Swelling Noted with Calcium-gelled Microcapsules

R. KRISHNAN¹, A. DALISAY¹, A. FLORES¹, K-H. CHAN², M. ALEXANDER¹, C. FOSTER III¹, E. BOTVINICK³, AND J. LAKEY^{1,3}
¹University of California Irvine, Orange, CA, ²University of California Irvine, Orange, CA, ³University of California Irvine, Irvine, CA

P-Fr-375

Evaluation of Alginate Biocompatibility by Analyzing Macrophage Activation during *In-vitro* Co-culture

G. FIORE¹, R. KRISHNAN¹, G. KUMMERFELD¹, T. LUU², N. NEEL¹, M. ALEXANDER¹, C. FOSTER III¹, W. LIU², AND J. LAKEY^{1,2}
¹University of California Irvine, Orange, CA, ²University of California Irvine, Irvine, CA

P-Fr-376

Evaluating Alginate Hydrogels and Transplant Sites for Encapsulated Islet Transplantation

K. LAUGENOUR¹, G. KUMMERFELD¹, R. KRISHNAN¹, K-H. CHAN¹, M. ALEXANDER¹, C. FOSTER III¹, AND J. LAKEY^{1,2}
¹University of California Irvine, Orange, CA, ²University of California Irvine, Irvine, CA

P-Fr-377

Keratin Biomaterials Modulate Primary Macrophage Polarization In-Vitro

M. WATERS¹, P. VANDEVORD¹, AND M. VAN DYKE¹
¹Virginia Polytechnic Institute and State University, Blacksburg, VA

P-Fr-378

Effect of Micro and Nano-patterned Topographical Cues on Macrophage Adhesion and Polarization

T. LUU¹, S. GOTT², M. RAO², AND W. LIU¹
¹University of California, Irvine, Irvine, CA, ²University of California, Riverside, Riverside, CA

P-Fr-379

Lipid Coated Silica Nanoparticles As CpG Adjuvant Carriers For Lymph Node Targeting

M-G. AN¹ AND H. LIU¹
¹Wayne State University, Detroit, MI

P-Fr-380

Amphiphilic Copolymers Mimic Molecular Chaperone Activity in Cell Injury Repair

R. LEE¹
¹University of Chicago, Chicago, IL

Track: Biomaterials**Engineering Materials:****Biomaterials Scaffolds Posters****P-Fr-381**

Carbonized Electrospun Fiber in a Three-Dimensional Coordination for Bone Tissue Regeneration

S. RYU¹, C. LEE¹, J. PARK¹, J. S. LEE¹, S. KANG¹, Y. D. SEO¹, J. JANG¹, AND B-S. KIM¹
¹Seoul National University, Seoul, Korea, Republic of

P-Fr-382

Biphasic Janus-Type Nanofibers for Tissue Engineering Scaffolds

A. KHANG¹, A. WOODS¹, S. SPEARS¹, P. B. DEVISSETY RAVISHANKAR¹, AND K. BALACHANDRAN¹
¹University of Arkansas, Fayetteville, AR

P-Fr-383

Drug Testing on Dielectrophoresis Induced Cell Assembly in Hydrogel Medium

M. GOEL¹, S. SINGH¹, AND S. GUPTA¹
¹Indian Institute of Technology, New Delhi, India

P-Fr-384

Stem Cell Delivery from Poly(ethylene glycol) Dimethacrylate Hydrogels - A Band-Aid Approach

R. ASAWA¹, J. MCGEE¹, D. SCHMITT¹, H. BACA¹, M. WATRY¹, AND D. DOROSKI¹
¹Franciscan University of Steubenville, Steubenville, OH

P-Fr-385

Fabrication Of Biomimetic Vascular Scaffolds For 3D Tissue Constructs Using Vascular Corrosion Casts As A Template

J. HULING¹, I. K. KO¹, A. ATALA¹, AND J. YOO¹
¹Wake Forest Institute for Regenerative Medicine, Winston-Salem, NC

P-Fr-386

Biodegradable And Biocompatible Pegylated Poly(Ester Amide) Elastomers With Increased Processability

Y. XUE¹, T. YATSENKO¹, A. PATEL¹, V. SANT¹, AND S. SANT¹
¹University of Pittsburgh, Pittsburgh, PA

P-Fr-387 DREAM TEAM & CENTER

Investigating Epithelial-Mesenchymal Transition Using Bioactive, Microfibrillar Scaffolds

A. RAVIKRISHNAN¹, T. OZDEMIR¹, Y. HAO¹, X. JIA¹, S. PRADHAN-BHATT^{1,2}, D. A. HARRINGTON³, R. L. WITT⁴, AND M. C. FARACH-CARSON^{1,3}
¹University of Delaware, Newark, DE, ²Center for Translational Cancer Research, Helen F. Graham Cancer Center & Research Institute, Newark, DE, ³Rice University, Houston, TX, ⁴Thomas Jefferson University, Philadelphia, PA

P-Fr-388

Calcium-accumulated Methacrylate-chondroitin Sulfate-based Hydrogels for Bone Scaffold

H. KIM¹ AND N. HWANG¹
¹Seoul National University, Seoul, Korea, Republic of

P-Fr-389

Transient Mesenchymal Stem Cell Adhesion To Poly(ethylene glycol) Dimethacrylate Hydrogels

J. MCGEE¹, R. ASAWA¹, H. BACA¹, D. SCHMITT¹, M. WATRY¹, AND D. DOROSKI¹
¹Franciscan University of Steubenville, Steubenville, OH

P-Fr-390

Development of PLLA Perforated Hollow Fiber Scaffold for Cartilage Regeneration by Electrospinning

Y. MORITA¹, R. NARISADA¹, K. TANAKA¹, T. KATAYAMA¹, AND E. NAKAMACHI¹
¹Doshisha University, Kyotanabe, Japan

P-Fr-391

Fabrication And Characterization Of An Electrospun PCL And Soy Lecithin Composite Material

J. GOOTEE¹, L. PARR¹, D. GRANT¹, AND S. GRANT¹
¹University of Missouri, Columbia, MO

POSTER VIEWING WITH AUTHORS & REFRESHMENT BREAK | 9:30AM - 10:30AM, 4:00PM - 5:00PM

P-Fr-392**Mechanical Characterization of 3D Twist-Braid Scaffolds for Ligament Replacement**S. MADHAVARAPU¹, R. RAO¹, E. FLEISHER¹, Y. YANKANNAH¹, AND J. FREEMAN¹
¹Rutgers University, Piscataway, NJ**P-Fr-393****Fabrication of Bioactive Poly(propylene carbonate)-Starch Blend for Biomedical Applications**I. MANAVITEHRANI¹, A. FATHI¹, AND F. DEGHANI¹
¹The University of Sydney, Sydney, Australia**P-Fr-394****Relationships between Porosity and Mass Transport and Mechanical Properties of Porous Polyurethane Scaffolds**Y.F. WANG¹, C. M. BARRERA¹, E. A. DAUER¹, W. GU², AND C-Y. C. HUANG¹
¹Department of Biomedical Engineering, University of Miami, Coral Gables, FL, ²Department of Mechanical and Aerospace Engineering, University of Miami, Coral Gables, FL**P-Fr-395****Engineering Microribbon-like Hydrogels with Diverse Biological Cues to Form 3D Scaffolds as Stem Cell Niche**X. TONG¹, C. GEGG¹, AND F. YANG¹
¹Stanford University, Stanford, CA**P-Fr-396****Development of Elastin-like Polypeptide Based Hydrogel Using Photoreactive Amino Acid Analogs**A. LEONARD¹ AND P. KORJA¹
¹University of South Florida, Tampa, FL**P-Fr-397****µ-Particle Scaffolds Support Osteogenic Differentiation**R. CLOHESSY¹, T. ARAPOVIC¹, B. D. BOYAN^{1,2}, AND Z. SCHWARTZ^{1,3}
¹Virginia Commonwealth University, Richmond, VA, ²Georgia Institute of Technology, Atlanta, GA, ³University of Texas Health Sciences Center San Antonio, San Antonio, TX**P-Fr-398****Fabrication of Silk Fibroin Cryogel Scaffolds with Osteoconductive Additives for Bone Tissue Regeneration**P. KADAKIA¹, E. JAIN¹, K. HIXON¹, AND S. SELL¹
¹Saint Louis University, St Louis, MO**P-Fr-399****Modular Assembly Approach to Engineer Prevascularized Large 3D Tissue Constructs**J. RIESBERG¹ AND W. SHEN¹
¹University of Minnesota, Minneapolis, MN**P-Fr-400****Concentrically and Axially Graded Hybrid Polymeric Scaffold**A. NAJARZADEH¹ AND D. PULEO¹
¹University of Kentucky, Lexington, KY**P-Fr-401****Biocompatibility Investigation of Near infrared Light and Gold Nanorods-assisted Photothermal Hydrogel Synthesis for Cell Encapsulation**H. LEE¹, S. CHUNG¹, S. KIM¹, AND J. LEE¹
¹GIST, Gwangju, Korea, Republic of**P-Fr-402****Biodegradable DNA-Enabled Poly(ethylene glycol) Hydrogels Prepared by Copper-Free Click Chemistry**K. BARKER¹, S. K. RASTOGI¹, W. BRITAIN¹, AND T. BETANCOURT¹
¹Texas State University, San Marcos, TX**P-Fr-403****Cancer Hyperthermia Studies: On the Aqueous Structure and Radiofrequency-induced Heating Properties of a Water-soluble [60]fullerene**Y. MACKEYEV¹, A. MUTO², M. CHENEY^{1,3}, R. SERDA³, S. CURLEY^{1,3}, AND L. WILSON¹

Computational Fluid Dynamic Modeling of Scaled-down Stirred Suspension Bioreactor for Pluripotent Stem Cell Bioprocessing

A. LE^{1,2}, D. RANCOURT^{1,3}, I. GATES^{1,4}, AND M. KALLOS^{1,4}¹University of Calgary, Calgary, AB, Canada, ²Pharmaceutical Production Research Facility (PPRF), Schulich School of Engineering, University of Calgary, Calgary, AB, Canada, ³Department of Biochemistry and Molecular Biology, Faculty of Medicine, University of Calgary, Calgary, AB, Canada, ⁴Department of Chemical and Petroleum Engineering, Schulich School of Engineering, University of Calgary, Calgary, AB, Canada**P-Fr-702**

The Effects Of ROCK Inhibitors On The In Vitro Expansion Of Glioblastoma Stem Cells

S. TILSON¹, E. HALEY¹, C. LANGFORD², G. Y. GILLESPIE², AND Y. I. KIM¹¹University of Alabama, Tuscaloosa, AL, ²University of Alabama at Birmingham, Birmingham, AL**P-Fr-703**

Structural Phenotyping for Stem Cell Derived Cardiomyocyte Quality Assessment

F. PASQUALINI¹, S. SHEEHY², A. AGARWAL¹, Y. ARATYN-SHAUS², AND K. K. PARKER²¹Harvard University, Boston, MA, ²Harvard University, Cambridge, MA**P-Fr-704**

Cell Mechanics-based Microfluidic Enrichment of Pluripotent Embryonic Stem Cells

T. BONGIORNO¹, J. GURA¹, G. WANG¹, T. C. MCDEVITT², AND T. SULCHEK¹¹Georgia Institute of Technology, Atlanta, GA, ²Gladstone Institutes, San Francisco, CA**P-Fr-705**

Assessing the Reprogramming of Gata-1 in ES Cells to Derive Red Blood Cells

A. SHIMPI¹, M. FITZGERALD¹, AND T. DEANS¹¹University of Utah, Salt Lake City, UT**Track: Cellular and Molecular Bioengineering, Stem Cell Engineering****Stem Cell Engineering & Applications:****Stem Cell Bioengineering Posters****P-Fr-706**

The Effect of a Simulated Diabetic Wound Environment on Keratinocyte Migration

W. KOSOL¹, R. FAULKNER¹, AND F. BERTHIAUME¹¹Rutgers University, Piscataway, NJ**P-Fr-707**

Preservation of Osteogenic Capacity Following Shape Memory Triggering of Foam and E-spun Scaffolds

J. WANG^{1,2}, L.F. TSENG^{1,2}, R. BAKER^{1,2}, AND J. HENDERSON^{1,2}¹Syracuse University, Syracuse, NY, ²Syracuse Biomaterials Institute, Syracuse, NY**P-Fr-708**

Live Tissue Imaging Reveals Dynamic Interplay of Spectrosome and Centrosome during Asymmetric Stem Cell Divisions

J. CHENG¹ AND C. BANG¹¹University of Illinois at Chicago, Chicago, IL**P-Fr-709**

Scar Eraser: Mechano-Responsive Cell System to Study, Detect and Treat Tissue Fibrosis

S. ZHANG¹, L. LIU¹, AND W. ZHAO¹¹University of California - Irvine, Irvine, CA**Track: Stem Cell Engineering****Stem Cell Engineering & Applications:****Stem Cells in Pre-clinical and Clinical Models Posters****P-Fr-710**

Effect of Pericytes on Skin Wound Healing in Diabetic (db/db) Mice

M. MARJANOVIC¹, J. LI¹, A. BOWER¹, Y. PINCU¹, E. CHANEY¹, M. BOPPART¹, AND S. BOPPART¹¹University of Illinois at Urbana-Champaign, Urbana, IL**P-Fr-711**

ARCAS: A Tool to Identify Enriched Spatial Colocalization in Biomedical Images

B. CORLISS¹, H. RAY¹, S. CRONK¹, P. YATES¹, AND S. PEIRCE¹¹University of Virginia, Charlottesville, VA**P-Fr-712**

Kindling Increases Type-I Progenitor Cell Division In The Dentate Gyrus Of Adult Rats

J. LEIBOWITZ¹, G. NATARANJAN¹, A. ASOKAN², M. KING¹, P. CARNEY¹, AND B. ORMEROD¹¹University of Florida, Gainesville, FL, ²Stanford University, Stanford, CA**P-Fr-713**

Introduction of Extracellular Matrix for Improved Hepatic Differentiation of Human Induced Pluripotent Stem Cells

M. JARAMILLO¹, M. YARMUSH¹, AND B. UYGUN¹¹Massachusetts General Hospital, Boston, MA**Track: Tissue Engineering, Stem Cell Engineering****Stem Cell Engineering & Applications:****Stem Cells in Tissue Engineering Posters****P-Fr-714**

Three-dimensional Neural Differentiation from Human Induced Pluripotent Stem Cells

Y. YAN¹, J. BEJOY¹, Y. ZHOU¹, AND Y. LI¹¹Florida State University, Tallahassee, FL**P-Fr-715**

Effects of Physiological Oxygen on Vascular Network Formation on Human Mesenchymal Stem Cell Sheets

M. TAHTINEN¹, L. ZHANG^{1,2}, Q. XING¹, Z. QIAN¹, S. QI², AND F. ZHAO¹¹Michigan Technological University, Houghton, MI, ²First Affiliated Hospital of Sun Yat-sen University, Guangzhou, China, People's Republic of**P-Fr-716**

Structural Changes in Bone Marrow Stem Cells to Oscillatory Flow: Relevance to Valve Development

G. CASTELLANOS¹, L. NASSAR¹, S. RATH¹, AND S. RAMASWAMY¹¹Florida International University, Miami, FL

P-Fr-717**Assessing an Engineered Periosteum in Reconstructing a Critical-Sized Femur Defect in Mice**R. ROMERO¹, L. CHUBB¹, J. TRAVERS¹, E. ASBURY¹, A. PENNYBAKER¹, R. ROSE¹, N. EHRHART¹, AND M. Annals of Biomedical Engineering

The *Annals of Biomedical Engineering* is an interdisciplinary, international journal which presents original and review articles in the major fields of bioengineering and biomedical engineering.

- The flagship journal of BMES
- Impact factor: 3.195
- 240 papers published per year out of 1,100 submissions
- Average turnaround time: 21 days

2015 Awards

Porous implants modulate healing and induce shifts in local macrophage polarization in the foreign body reaction

Eric M. Sussman, Michelle C. Halpin, Jeanot Muster, Randall T. Moon, Buddy D. Ratner
July 2014, Volume 42, Issue 7, pp 1508-1516.

Smartphones for cell and biomolecular detection

Xiyuan Liu, Tung-Yi Lin, Peter B. Lillehoj
November 2014, Volume 42, Issue 11, pp 2205-2217.

TODAY'S HIGHLIGHT**PLATFORM SESSION Sat I** 8:00am - 9:30am

See pages 188-194, Convention Center

EXHIBIT HALL OPEN 9:30am - 1:30pm

Convention Center, Exhibit Hall

POSTER SESSION SAT 9:30pm -1:00pm

See pages 208-226, TCC, Exhibit Hall

Poster Viewing with Authors & Refreshment Break 9:30am - 10:30am**PLENARY SESSION**

10:30am - 12:30pm

Convention Center Ballroom BC

**Rita Schaffer Memorial Young Investigator Lecture****ENGINEERING SELF-ASSEMBLED PORPHYRIN NANOPARTICLES FOR BIOMEDICAL APPLICATIONS IN IMAGING AND DRUG DELIVERY**

Jonathan F. Lovell, PhD

Diversity Lecture

The City University of New York

PLATFORM SESSION Sat 2 1:30pm - 3:00pm

See pages 195-201, Convention Center

PLATFORM SESSION Sat 3 3:15pm - 4:15pm

See pages 202-207, Convention Center

SPECIAL SESSION**8:00 AM - 9:30 PM - Ballroom A
BMES Industry Update**

An update from the Industry Committee Chair on industry trends, current BMES Industry offerings, and the Industry Committee's future plans for expansion of BMES industry programs and services. All BMES members are welcome to attend.

SATURDAY, October 10, 2015

8:00 AM - 9:30 AM

PLATFORM SESSIONS – SAT - I

Track: Drug Delivery

OP-Sat-I-1 - Room 18

Delivery Systems for Immune Modulation**Chairs:** Christopher Jewell, Kim Woodrow**8:00AM****S-Nitrosated Poly(Propylene Sulfide) Nanoparticles Exhibit Thiol-Dependent Transnitrosation and Toxicity Against Adult Female B. malayi Filarial Worms**A. SCHUDEL¹, T. KASSIS¹, J. DIXON¹, AND S. THOMAS¹¹Georgia Institute of Technology, Atlanta, GA**8:15AM****Immunogenicity of Rapidly Degrading Polymers Evolves During Degradation**J. I. ANDORKO¹ AND C. M. JEWELL^{1,2,3}¹University of Maryland - College Park, College Park, MD, ²University of Maryland Medical School, Baltimore, MD, ³Marlene and Stewart Greenebaum Cancer Center, Baltimore, MD**8:30AM****Modulation of Macrophage Polarization at the Tissue-Implant Interface by Local Release of IL-4 from a Nanometer Thickness Coating on Polypropylene Meshes**D. HACHIM¹, S. LOPRESTI¹, D. MANI¹, AND B. BROWN^{1,2}¹McGowan Institute/University of Pittsburgh, Pittsburgh, PA, ²Department of Obstetrics, Gynecology, and Reproductive Sciences, Pittsburgh, PA**8:45AM****Synthetic Glycopolymer-Antigen Conjugates Induce Antigen-Specific T Cell Deletion**D. WILSON¹, M. DAMO¹, S. KONTOS², G. DIACERI¹, AND J. HUBBELL^{2,3}¹EPFL, Lausanne, Switzerland, ²Anokion, Lausanne, Switzerland, ³The University of Chicago, Chicago, IL**9:00AM****Delivery of Mycobacterium Tuberculosis Lipid Antigens for CDI-restricted T Cell Vaccination**D. KATS¹, D. VELLUTO¹, S. SHANG², C-R. WANG², AND E. SCOTT¹¹Northwestern University, Evanston, IL, ²Northwestern University, Chicago, IL**9:15AM****Delivery Of Engineered LPS-Free Recombinant Outer Membrane Vesicle Vaccine Protects Mice Against Lethal Influenza Challenge**H. WATKINS¹, C. RAPPAZZO¹, C. GUARINO¹, G. WHITTAKER¹, M. DELISA¹, AND D. PUTNAM¹¹Cornell University, Ithaca, NY**Track: Cancer Technologies, Drug Delivers**

OP-Sat-I-2 - Room 19

Cancer Drug Delivery**Chairs:** Michael King, Vivek Gupta**8:00AM****Erlotinib-cyclodextrin Complex loaded PLGA Nanoparticles for Enhanced Anti-proliferative Efficacy against Lung Cancer Cell Lines**B. VAIDYA¹ AND V. GUPTA¹¹Keck Graduate Institute, Claremont, CAPLATFORM
SESSIONS**Sat-1**

8:15AM**Targeted Delivery of MicroRNA by Engineered Lipid Nanoparticles for the Treatment of Metastatic Breast Cancer**S. HAYWARD¹, D. FRANCIS¹, AND S. KIDAMBI¹¹University of Nebraska-Lincoln, Lincoln, NE**8:30AM****Super Natural Killer Cells That Target Metastases in the Tumor Draining Lymph Nodes**S. CHANDRASEKARAN¹, M. CHAN¹, J. LI¹, AND M. KING¹¹Cornell University, Ithaca, NY**8:45AM****Integrating Cold Atmospheric Plasma and Core-shell Nanoparticle Drug Delivery System for Breast Cancer Treatment**W. ZHU¹, S.-J. LEE¹, M. KEIDAR¹, AND L. G. ZHANG¹¹The George Washington University, Washington, DC**9:00AM****Tunneling Nanotubes as a Conduit for Drug Resistance Transfer**M. WARE¹, V. KESHISHIAN¹, S. CORR^{1,2}, B. GODIN³, AND S. CURLEY¹¹Baylor College of Medicine, Houston, TX, ²Rice University, Houston, TX, ³Methodist Research Institute, Houston, TX**9:15AM****Determining The Influence Of Dynamic Paracrine Signaling On Tumor Progression In An Evolving Microenvironment**M. GADDE¹ AND M. RYLANDER¹¹University of Texas at Austin, Austin, TX**Track: Cancer Technologies, Nano and Micro Technologies****OP-Sat-I-3 - Room 20****Micro and Nanotechnologies for Cancer I****Chairs:** Marissa Rylander, Rong Fan**8:00AM**

M. NICHOLE RYLANDER

University of Texas at Austin

8:15AM**Tumor Engineering to Elucidate The Effect of Mild Hyperthermia on Transport of Carbon Nanohorns**M. DEWITT¹, D. MARRINAN², A. PEKKANEN¹, R. DAVALOS¹, AND M. N. RYLANDER²¹Virginia Tech-Wake Forest, Blacksburg, VA, ²University of Texas at Austin, Austin, TX**8:30AM****Abnormal Cytokine Functions in “Normal”; Hematopoietic Cells Contribute to MPN Pathogenesis Revealed by Single-Cell, High-Plex Cytokine Analysis**R. FAN¹¹Yale University, New Haven, CT**8:45AM****Programmable Bacteria for Diagnosis and Treatment of Cancer**C. BUSS¹, T. DANINO¹, M. O. DIN², A. PRINDLE², J. HASTY², AND S. BHATIA^{1,3}¹Massachusetts Institute of Technology, Cambridge, MA, ²University of California, San Diego, La Jolla, CA, ³Howard Hughes Medical Institute, Cambridge, MA**9:00AM****Monitoring Protein Synthesis in Single Live Cancer Cells**C. TU¹, J. ZOLDAN¹, Z. SMILANSKY², AND N. RAJE³¹University of Texas at Austin, Austin, TX, ²Anima Cell Metrology, Inc, Kfar Sava, Israel, ³Massachusetts General Hospital, Boston, MA**9:15AM****Inhalable Protease Nanosensors For Urinary Monitoring Of Lung Cancer**A. WARREN¹, T. TAMMELA¹, T. JACKS¹, AND S. BHATIA¹¹Massachusetts Institute of Technology, Cambridge, MA**Track: Biomaterials****OP-Sat-I-4 - Room 21****Biomaterials Design****Chairs:** Nasim Annabi, Chandra Kothapalli**8:00AM****Writing in the Granular Gel Medium**T. BHATTACHARJEE¹, K. ROWE¹, T. ANGELINI¹, AND W. G. SAWYER¹¹University of Florida, Gainesville, FL**8:15AM****Engineering Sliding Hydrogels with Molecular Mobility as 3D Stem Cell Niche**X. TONG¹ AND F. YANG¹¹Stanford University, Stanford, CA**8:30AM****The Toughening Mechanism of the Aquatic Caddisworm Silk**N. ASHTON¹ AND R. STEWART²¹University of Utah, SLC, UT, ²University of Utah, Salt Lake City, UT**8:45AM****Novel Swelling Technique to Create Nitric Oxide (NO) Releasing Surfaces for Improved Hemocompatibility**E. BRISBOIS¹, T. MAJOR¹, H. HANDA², AND R. BARTLETT¹¹University of Michigan, Ann Arbor, MI, ²University of Georgia, Athens, GA**9:00AM DREAM TEAM & CENTER****Effect of Hydroxyapatite Materials Properties on Fibronectin Adsorption and Breast Cancer Metastasis**F. WU¹, K. WANG¹, J. H. CHANG¹, C. FISCHBACH^{1,2}, L. ESTROFF^{1,2}, AND D. GOURDON¹¹Cornell University, Ithaca, NY, ²Kavli Institute at Cornell for Nanoscale Science, Ithaca, NY**9:15AM****FEM based Multiphysics Modeling of Oxygen Release and Transport from OxySite for Pancreatic Islet Implants**M. CORONEL¹ AND C. STABLER¹¹University of Florida, Gainesville, FL**Track: Device Technologies and Biomedical Robotics****OP-Sat-I-5 - Room 22****Biosensors****Chairs:** Saion Sinha, Daniel Ratner**8:00AM****Sub-Wavelength Gratings For Label-Free Biological Sensing**S. SCHMIDT¹, J. FLUECKIGER², V. DONZELLA², L. CHROSTOWSKI², AND D. RATNER¹¹University of Washington, Seattle, WA, ²University of British Columbia, Vancouver, BC, Canada**8:15AM****Random And Aligned Buckypaper As Bionanosensor For DNA Detection**S. SINHA¹, S. KAEWYOO¹, AND Y. YOU¹¹University Of New Haven, West Haven, CT

8:30AM**Cell-Based, Label-Free Screening With Self-Assembled Monolayers and MALDI-Mass Spectrometry**E. BERNIS¹, M. CABEZAS¹, A. EISENBERG¹, AND M. MRKSICH¹¹Northwestern University, Evanston, IL**8:45AM****RT-LAMP On a Chip for Bloodborne Viral Load Diagnostics**G. DAMHORST¹, W. CHEN¹, C. DUARTE-GUEVARA¹, B. CUNNINGHAM¹, AND R. BASHIR¹¹University of Illinois at Urbana-Champaign, Urbana, IL**9:00AM****Effects of Different Modes of Vibratory Feedback on Muscle Use During a Redundant, One-Dimensional Myocontrol Task**S. LIYANAGAMAGE¹, M. BERTUCCO¹, N. BHANPURI², AND T. SANGER^{1,3}¹University of Southern California, Los Angeles, CA, ²NorthShore University HealthSystem, Chicago, IL, ³Children's Hospital Los Angeles, Los Angeles, CA**9:15AM****Smartphone-Based Absorption Spectroscopy: Moving Toward a Truly Handheld Device**K. LONG^{1,2}¹University of Illinois at Urbana-Champaign, Urbana, IL, ²University of Illinois College of Medicine, Urbana, IL**Track: Biomaterials****OP-Sat-1-6 - Room 23****Biomaterials for Controlling Cell Environment II****Chairs:** John Slater, Amrinder Nain**8:00AM****Poly(ethylene glycol) Hydrogels To Promote *In Vitro* Salivary Gland Morphogenesis From Primary Submandibular Gland Cells**A. SHUBIN¹, T. FELONG¹, C. OVITT¹, AND D. BENOIT¹¹University of Rochester, Rochester, NY**8:15AM****Gold Nanorod Incorporated Gelatin-based Hybrid Hydrogels for Myocardial Tissue Engineering**A. NAVEI¹, R. SULLIVAN¹, AND M. NIKKHAH¹¹Arizona State University, Tempe, AZ**8:30AM****Injectable Hydrogels with Double Network Formation To Promote Angiogenesis**L. CAI¹ AND S. HEILSHORN¹¹Stanford University, Stanford, CA**8:45AM****Modulating Kinetics of Vasculogenesis Through Control of MMP2 Activity**J. HAMMER¹, R. SCHWELLER¹, AND J. WEST¹¹Duke University, Durham, NC**9:00AM****Macroporous Microribbon-Based Hydrogels Accelerate Neocartilage Formation By Mesenchymal Stem Cells *In Vitro***B. CONRAD¹, L-H. HAN², AND F. YANG¹¹Stanford University, Stanford, CA, ²Drexel University, Philadelphia, PA**9:15AM****A 3D-printed Polymeric System for Cell Encapsulation and Controlled Drug Release**M. FARINA¹, C. FILGUEIRA¹, U. THEKKEDATH¹, D. FRAGA¹, O. SABEK¹, AND A. GRATTONI¹¹Houston Methodist Research Institute, Houston, TX**Track: Tissue Engineering****OP-Sat-1-7 - Room 13****Printing and Patterning in Tissue Engineering****Chairs:** Adam Feinberg, Jordan Miller**8:00AM DREAM TEAM & CENTER****DNA Programmed Assembling of Multiscale and Multicomponent 3D Tissues**M. TODHUNTER¹, N. JEE¹, A. HUGHES¹, M. COYLE¹, A. CERCHIARI¹, J. GARBE^{1,2}, T. DESAI¹, M. LABARGE², AND Z. GARTNER¹¹University of California, San Francisco, San Francisco, CA, ²Lawrence Berkeley National Lab, Berkeley, CA**8:15AM DREAM TEAM & CENTER****Engineered Ectopic Human Livers Organize And Proliferate In Vivo In Response To Regenerative Cues**V. RAMANAN¹, K. STEVENS¹, M. SCULL², R. CHATURVEDI³, C. FORTIN¹, Y. DE JONG², C. CHEN², C. RICE², AND S. BHATIA^{1,4}¹Massachusetts Institute of Technology, Cambridge, MA, ²The Rockefeller University, New York, NY, ³Boston University, Boston, MA, ⁴Howard Hughes Medical Institute, Cambridge, MA**8:30AM DREAM TEAM & CENTER****High-Resolution 3D Bio-Printing Apparatus for Applications in Patterning of Microvasculature**R. RAMAN¹, B. BHADURI¹, M. K. LEE¹, A. SHKUMATOV¹, G. POPESCU¹, H. J. KONG¹, AND R. BASHIR¹¹University of Illinois at Urbana-Champaign, Urbana, IL**8:45AM****Engineering Aligned Muscle Tissues in 3D using Microribbon-based Hydrogels**S. LEE¹, X. TONG¹, L-H. HAN¹, AND F. YANG¹¹Stanford University, Stanford, CA**9:00AM****Complex Cellular Manifolds in a Granular Gel**T. BHATTACHARJEE¹, K. ROWE¹, W. G. SAWYER¹, AND T. ANGELINI¹¹University of Florida, Gainesville, FL**9:15AM****Vascularized Skin Tissue with Dynamic Perfusion Created through 3D Bioprinting**V. LEE¹, P. KARANDE¹, S-S. YOO², AND G. DAI¹¹Rensselaer Polytechnic Institute, Troy, NY, ²Harvard Medical School / Brigham and Women's Hospital, Boston, MA

Track: Tissue Engineering, Drug Delivery**OP-Sat-I-8 - Room I4****Tissue Engineered Models for Study of Disease and Drug Discovery II****Chairs:** Claudia Fischbach, David Wood**8:00AM****Physiologically Relevant Drug Testing *In Vitro* - An Integrated Multiple Organoid-on-a-chip Approach**A. SKARDAL¹, A. KLEENSANG², M. DEVARASETTY¹, H-W. KANG¹, I. MEAD¹, C. BISHOP¹, T. SHUPE¹, S-J. LEE¹, J. JACKSON¹, J. YOO¹, T. HARTUNG², S. SOKER¹, AND A. ATALA¹¹Wake Forest School of Medicine, Winston-Salem, NC, ²Johns Hopkins University, Baltimore, MD**8:15AM****Engineering an *In Vitro* 3D Brain Inflammation Model**Y. LEE¹ AND H. CHO¹¹Virginia Tech, Blacksburg, VA**8:30AM****Characterization of Magnetic Nanoparticle Permeability by a Triple Co-cultured *In Vitro* Blood-Brain Barrier Model**D. SHI¹, G. MI¹, S. BHATTACHARYA², N. SUPRABHA², AND T. WEBSTER¹¹Northeastern University, Boston, MA, ²Materials Science and Technology Division, Jamshedpur, India**8:45AM****Synergistic Regulation of Breast Cancer Paclitaxel Resistance by 3D Culture, Hypoxia, and Bacterial Quorum-Sensing Signals**B. BALHOUSE¹ AND S. VERBRIDGE¹¹Virginia Tech, Blacksburg, VA**9:00AM****Microengineered Co-cultures of Human Liver Cells for Studying Drug-Inflammation Interactions**C. LIN¹ AND S. KHETANI¹¹Colorado State University, Fort Collins, CO**9:15AM****Human Mature White Adipose Tissue Model for Studying Lipolytic Responses**R. ABBOTT¹, R. WANG¹, M. REAGAN², F. BOROWSKY¹, I. GHOBRIAL², AND D. KAPLAN¹¹Tufts University, Medford, MA, ²Harvard Institute, Boston, MA**Track: Neural Engineering****OP-Sat-I-9 - Room I5****Neural Coding and Modeling****Chairs:** Ayesgul Gunduz, Samhita Rhodes, Cynthia Chestek**8:00AM****Computational Modeling of Neural Excitability at Colorectal Afferent Endings and Somata**B. FENG¹¹University of Connecticut, Storrs, CT**8:15AM****Prediction of the Outcome of Subthalamic Nucleus Deep Brain Stimulation in Patients with Parkinson's Disease**K. KOSTOGLOU¹ AND G. MITSIS¹¹Mcgill University, Montreal, QC, Canada**8:30AM****Characterization of Quantitative Electroencephalography and Heart Rate Variability during Simulated Drowsy Driving**C. CHEN¹, C. ZHANG², W. WANG², C. ZENG³, X. MENG², B. CHENG², AND J. CAVANAUGH¹¹Wayne State University, Detroit, MI, ²Tsinghua University, Beijing, China, People's Republic of, ³Shihezi University, Shihezi, China, People's Republic of**8:45AM****Near Field Axonal Communication Networks And Their Role In Neurodegenerative Diseases**S. MORGERA¹¹University of South Florida, Tampa, FL**9:00AM****Automated Classification of ECoG Signals using Component Analysis and Support Vector Machines**P. BALASUBRAMANIAN¹, P. FISHBACK², R. BOSSEMEYER¹, K. ELISEVICH³, AND S. RHODES¹¹Grand Valley State University, Grand Rapids, MI, ²Grand Valley State University, Allendale, MI, ³Spectrum Health Medical Group, Grand Rapids, MI**9:15AM****Technologies for Engineering Neuronal Architectures to Study Information Processing in Living Networks**B. Wheeler¹, T. DeMarse¹, A. Bhattacharya², and G. Brewer²¹University of Florida, Gainesville, FL, ²University of California, Irvine, Irvine, CA**Track: Device Technologies and Biomedical Robotics****OP-Sat-I-10 - Room I6****Wearable Sensors and Devices****Chairs:** Helen Huang, Smitha Rao**8:00AM****Noninvasive, Long-term Wearable, Multiparametric Epidermal Sensor Systems (ESS)**N. LU¹, S. YANG¹, Y-C. CHEN¹, AND L. NICOLINI¹¹University of Texas at Austin, Austin, TX**8:15AM****Combined Shear/Pressure Sensor for Monitoring of Prosthetic Socket Interface Stresses**F. AHMED¹, S. EILBEIGI¹, AND H. HUANG¹¹University of Texas Arlington, Arlington, TX**8:30AM****Iontronic Film: Flexible Transparent Ionic Gel for Interfacial Capacitive Pressure Sensing**B. NIE¹, J. CAO¹, R. LI¹, J. BRANDT², AND T. PAN¹¹University of California, Davis, Davis, CA, ²University of California, Davis, Sacramento, CA**8:45AM****Advancing the State of the Heart - ;the Integrated Vectorcardiogram (iVCG)**C. PERUMALLA¹, T. KETTERL¹, R. GITLIN¹, P. FABRI¹, AND G. ARROBO¹¹University of South Florida, Tampa, FL**9:00AM****Non-destructive and Rapid Plant Chlorophyll Quantification Using Google Glass**B. CORTAZAR¹, H. CEYLAN KOYDEMIR¹, D. TSENG¹, S. FENG¹, AND A. OZCAN¹¹UCLA, Los Angeles, CA

9:15AM**Telemedical Wearable Sensing Platform for Management of Chronic Venous Disorder**R. LI¹, B. NIE¹, C. ZHAI¹, J. CAO¹, J. PAN^{1,2}, J. LI¹, Y.W. CHI³, AND T. PAN¹¹University of California, Davis, Davis, CA, ²Zhejiang University of Technology, Hangzhou, China, People's Republic of, ³UC Davis Medical Group, Sacramento, CA**Track: Nano to Micro Technologies, Device Technologies and Biomedical Robotics****OP-Sat-1-11 - Room 3-4****Cardiac Regeneration and Stem Cells****Chairs:** Renita Horton, Lauren Black**8:00AM****3D Tissue-engineered Microenvironment Enhances Efficiency of Direct Cardiac Reprogramming**Y. LI¹, S. DAL-PRA¹, T. JAYAWARDENA¹, C. HODGKINSON¹, M. MIROTSOU¹, V. DZAU¹, AND N. BURSAC¹¹Duke University, Durham, NC**8:15AM****Development of Human Cardiac Tissues through Direct Hydrogel Encapsulation of Pluripotent Stem Cells**P. KERSCHER¹, I. TURNBULL², A. HODGE¹, J. KIM¹, D. SELIKTAR³, C. EASLEY¹, K. COSTA², AND E. LIPKE¹¹Auburn University, Auburn, AL, ²Icahn School of Medicine at Mount Sinai, New York, NY, ³Technion-Israel Institute of Technology, Haifa, Israel**8:30AM****A Computational Model of Neuregulin-Induced Proliferation Signaling Predicts Novel Drug Target Combinations for Cardiac Myocyte Regeneration.**L. WOO¹¹University of Virginia, Charlottesville, VA**8:45AM DREAM TEAM & CENTER****Modeling Familial Dilated Cardiomyopathy Using Human Pluripotent Stem Cells**C. WEAVER^{1,2}, H. TAYLOR-WEINER^{1,2}, D. DEACON³, P. MALI¹, E. ADLER³, N. CHI³, AND A. ENGLER^{1,2}¹UC San Diego, San Diego, CA, ²Sanford Consortium for Regenerative Medicine, San Diego, CA, ³UC San Diego School of Medicine, San Diego, CA**9:00AM****Design and Validation of a Biomimetic Human Whole-Heart Bioreactor**J. CHAREST¹, J. GUYETTE^{1,2}, AND H. OTT^{1,2}¹Massachusetts General Hospital, Boston, MA, ²Harvard Medical School, Boston, MA**9:15AM****Microenvironmental Control of Cardiac Reprogramming**Y. KONG¹, A. RIOJA¹, Y. SUN¹, J. FU¹, AND A. PUTNAM¹¹University of Michigan, Ann Arbor, MI**Track: Biomedical Imaging and Optics****OP-Sat-1-12 - Room 5-6****Molecular Imaging****Chairs:** Terry Matsunaga, Sourabh Shukla**8:00AM****Label-Free Molecular Imaging by Nanotip Ambient Ionization Mass Spectrometry**J. K. LEE^{1,2}, Z. ZHOU¹, H. G. NAM^{2,3}, AND R. ZARE¹¹Stanford University, Stanford, CA, ²Institute for Basic Science, Daegu, Korea, Republic of, ³DGIST, Daegu, Korea, Republic of**8:15AM****High Resolution Imaging of Biofunctionalized Rare-Earth Nanocomposites for Tumor Detection**L. HIGGINS¹, M. ZEVON¹, V. GANAPATHY¹, R. RIMAN¹, C. ROTH¹, P. MOGHE¹, AND M. PIERCE¹¹Rutgers, The State University of New Jersey, Piscataway, NJ**8:30AM****Design of Switchable Interpolymer Complex - Superparamagnetic Iron Oxide Nanoparticles (IPC-SPIOs) Based on Environmental Conditions with Potential for MR contrast Agents**E. YOO¹¹Binghamton University (SUNY), Binghamton, NY**8:45AM****Evidence for Intracellular Delivery and Ultrasound-Mediated Activation of Folate Receptor-Targeted Phase-Change Contrast Agents in Breast Tumor Cells *In Vitro*.**J. MARSHALEK¹, D. ROBLES¹, P. INGRAM¹, J. NETHERTON², R. WITTE¹, P. DAYTON³, P. SHEERAN⁴, AND T. MATSUNAGA¹¹University of Arizona, Tucson, AZ, ²University of Arizona, Tucson, AZ, ³University of North Carolina Chapel Hill, Chapel Hill, NC, ⁴University of Toronto, Toronto, Canada**9:00AM****Characterization of the Structural Morphology of PEG on Filamentous Viral Nanoparticles**N. GULATI¹, K. LEE¹, N. STEINMETZ¹, AND P. STEWART¹¹Case Western Reserve University, Cleveland, OH**9:15AM****Photoacoustic Microscopy of Gold Nanoparticles: Uptake Dynamics**E. YANG¹, H. ZHANG¹, AND B. DONG¹¹Northwestern University, Evanston, IL**Track: Biomedical Imaging and Optics****OP-Sat-1-13 - Room 11****Optical Imaging I****Chairs:** Jonathan Gunn, Javier A. Jo**8:00AM****Time-Reversed Ultrasonically Encoded (TRUE) Optical Focusing Deep Inside Dynamic Scattering Media**Y. LIU¹, P. LAI¹, C. MA¹, X. XU¹, A. GRABAR², AND L. WANG¹¹Washington University in St. Louis, Saint Louis, MO, ²Uzhgorod National University, Uzhgorod, Ukraine**8:15AM****Quantitative Fluorescence Molecular Tomography for *In Vitro* Measurement of Targeted and Activatable Near Infrared Fluorescent Molecular Probes.**D. Track: Drug Delivery OP-Sat-3-15 - Room 10

Targeted Delivery II

Chairs: Susan Thomas, James Lai

3:15PM DREAM TEAM & CENTER

Personalized Carbon Nanomedicine against Hepatocellular Carcinoma
E. CHOW¹, X. WANG¹, W. HOU¹, AND L. NURRUL ABDULLAH¹
¹National University of Singapore, Singapore, Singapore

3:30PM

Mechanism of Intracellular Delivery of Exogenous Molecules Using High Frequency Ultrasound
M. G. KIM¹, S. YOON¹, AND K. K. SHUNG¹
¹University of Southern California, Los Angeles, CA

3:45PM

Using Magnetic Forces to Enhance Targeted Delivery of SPIOs by Disrupting Endothelial Cell-Cell Interactions
Y. QIU^{1,2}, S. TONG², Y. SAKURAI^{1,2}, D. MYERS^{1,2}, G. BAO², AND W. LAM^{1,2}
¹Emory University, Atlanta, GA, ²Georgia Institute of Technology, Atlanta, GA

4:00PM

Polymer-based Nanoparticle Mediated Delivery of Beta-Galactosidase in the Treatment of a Neurodegenerative Disorder, GM1 Gangliosidosis
J. LARSEN¹, E. PEARCE¹, D. MARTIN¹, AND M. BYRNE^{1,2}
¹Auburn University, Auburn, AL, ²Rowan University, Glassboro, NJ

4:15PM

Nebulized and Aerosol Synthesis of Optimized Targeted Drug Delivery Composites
D. DENMARK¹, M. MAMONE¹, D. MUKHERJEE¹, K. BISHT¹, S. WITANACHCHI¹, AND P. MUKHERJEE¹
¹University of South Florida, Tampa, FL

4:30PM

Immunoliposome-Based Delivery Of Inflammatory Serine Protease Inhibitor Offers Cardiac Protection After Myocardial Ischemia In Mice
B. HOOSHARAN¹, M. KOLPAKOV¹, X. GUO¹, T. WANG¹, L. VLASENKO¹, Y. TANG¹, M. KIANI¹, AND A. SABRI¹
¹Temple University, Philadelphia, PA

Track: Nano and Micro Technologies OP-Sat-3-16 - Room 7-8

Microfluidics II

Chairs: Smitha Rao, Chia-Hung Chen

3:15PM

Automation of Serial Dilution by Microfluidic Digital Logic
M. RAJE¹, S. AHRAR¹, AND E. HUI¹
¹University of California Irvine, Irvine, CA

3:30PM

A High-Throughput Microfluidic Device for Removal of Activated Granulocytes from Recirculating Blood during Cardiopulmonary Bypass
B. STRACHAN¹, H. XIA¹, S. GIFFORD¹, AND S. SHEVKOPLYAS¹
¹University of Houston, Houston, TX

3:45PM

Static Gradients Generated with Biofabricated Semi-permeable Biopolymer Membranes in Microfluidics for Bacterial Chemotaxis Studies
X. LUO¹, C. WOLFRAM², H-C. WU², W. BENTLEY², AND G. RUBLOFF²
¹Catholic University of America, Washington, DC, ²University of Maryland, College Park, MD

Track: Undergraduate Research, Design and Leadership Special Session - Room 9

Undergraduate Research, Design and Leadership III

Chairs: Michelle Grimm, Pam VandeVord

3:15PM

The Yin and Yang of Apathy: Using a Novel 3D Statistical Method to Map Motivation and Movement in the Subthalamic Nucleus
A. GOURISAN KAR¹
¹Washington University in St. Louis, St. Louis, MO

3:24PM

Subject-Specific Atlas of Human Brainstem Structures
K. BRINTZ¹, L. M. ZITELLA¹, K. PAONE¹, AND M. D. JOHNSON¹
¹University of Minnesota, Minneapolis, MN

3:33PM

A Microfluidic Device For Concurrent Measurement Of Hemoglobin Concentration And HIV Antigens
R. PATNA IK¹, T. GUO¹, K. KUHLMANN¹, A. RAI², AND D S. SIA¹
¹Columbia University, New York, NY, ²Columbia University Medical Center, New York, NY

3:42PM

Changes in Vessel Properties During Early Progression of Murine Abdominal Aortic Aneurysms from *In Vivo* Ultrasound
L. AVILA^{1,2}, E. PHILLIPS¹, M. BERSI³, P. DI ACHILLE³, AND D C. GOERGEN¹
¹Purdue University, West Lafayette, IN, ²Florida International University, Miami, FL, ³Yale University, New Haven, CT

3:51PM

PET-Optical Imaging Of Receptor For Advanced Glycation End-Products (RAGE) In Androgen-Sensitive Prostate Cancer
C. MIZZONI^{1,2}, C. KONOPKA², L. LAHOOD², A. PATEL², I. LEE², A. PLOSKA^{2,3}, J. HEDHLI², I. T. DOBRUCKA², L. KALINOWSKI³, AND D L. W. DOBRUCKI²
¹Wenworth Institute of Technology, Boston, MA, ²University of Illinois, Urbana-Champaign, Urbana-Champaign, IL, ³Department of Laboratory Diagnostics, Medical University of Gdansk, Poland, Gdansk, Poland

4:00PM

Optical imaging of Cancer Cell Metabolism in a Matched Model of Radiation Resistance
K. ALHALLAK¹, R. DING², AND D N. RAJA RAM¹
¹University of Arkansas, Fayetteville, AR, ²University of Arkansas for Medical Sciences, Little Rock, AR

4:09PM

Development Of Non-Occluding Cerebral Shunts For The Treatment Of Pediatric Hydrocephalus
R. IZZO¹, N. GRIFFIN¹, R. SHAW¹, J. LEONARDO², R. REYNOLDS², C. IONITA^{1,3}, AND M. SPRINGER⁴
¹The State University of New York at Buffalo, Buffalo, NY, ²University at Buffalo Neurosurgery, Buffalo, NY, ³Toshiba Stroke and Vascular Research Center, Buffalo, NY, ⁴The Jacobs Institute, Buffalo, NY, NYT

Entrance

Registration

Saturday, October 10, 2015 - 9:30 AM - 1:00 PM

Track: Undergraduate Research, Design and Leadership**Bioinformatics, Computational and Systems Biology Posters****P-Sat-51**Agent-based Model of CD⁴T Cell Depletion in Lymphoid Tissue During HIV InfectionN. REDDY¹ AND S. PILLAI²¹University of California, Berkeley, Berkeley, CA, ²University of California, San Francisco, San Francisco, CA**P-Sat-52**

Graphical User Interface That Analyzes RNA Sequencing Data In MATLAB

L. SINGELMANN¹, J. HANSEN¹, AND D. EWERT¹¹North Dakota State University, Fargo, ND**P-Sat-53**

The Role of the ErbB Signaling in Chronic Mild Stress Induced Behavioral Dysfunction in Mice

S. MOED^{1,2}, H. TADMOR^{3,4}, A. WEINSTEIN^{1,2}, O. AVIEL⁵, I. GOLANI², I. KREMER^{4,6}, AND A. SHAMIR^{4,6}¹University of Pittsburgh, Pittsburgh, PA, ²Ort Braude College of Engineering, Karmiel, Israel, ³Bar-Ilan University, Tsfat, Israel, ⁴Mazra Mental Health Center, Akko, Israel, ⁵The Academic College, Tel Aviv Yaffo, Israel, ⁶Technion- Israel Institute of Technology, Haifa, Israel**P-Sat-54**

Determining Transcriptional Regulators Of Peroxisome Biogenesis Via In Silico Analysis

C. MAH¹ AND M. RAGSAC²¹UC San Diego, Saratoga, CA, ²UC San Diego, San Mateo, CA**P-Sat-55**

Single-cell Cytokine and Transcriptome Profiling of Circulating Tfh Cells in Patients with Systemic Lupus Erythematosus

S. KIM¹, M. KWAK¹, J-Y. CHO^{1,2}, L. HAN¹, I. XHANGOLLI¹, J. CRAFT², AND R. FAN^{1,2}¹Yale University, New Haven, CT, ²Yale School of Medicine, New Haven, CT**P-Sat-56**

Estimating Human Metabolism with Symbolic Regression Software

B. SHANER¹¹Vanderbilt University, Nashville, TN**P-Sat-57**

Detecting Gene-Deletion Events that Result in Beneficial Mutations in Next-generation Genomic Sequences

M. SALLOUM¹¹University of Washington, Seattle, WA**P-Sat-58**

Computational Analysis of Clipping Mitral Valve Leaflets with Increasing Papillary Muscle Displacement

S. CARROLL¹, M. TOMA¹, D. EINSTEIN², A. YOGANATHAN¹, R. COCHRAN³, AND K. KUNZELMAN³¹Georgia Institute of Technology, Atlanta, GA, ²Pacific Northwest National Laboratory, Richland, WA, ³University of Maine, Orno, ME**P-Sat-59**

Computational Model of VEGF-stimulated MAPK Signaling in Cancer Cells

S. LAI¹ AND S. FINLEY¹¹University of Southern California, Los Angeles, CA**P-Sat-60**

High Content Analysis of Diverse Cardiomyocytes: Segmentation, Subtype Determination, and Sarcomere Organization Measurement

M. SUTCLIFFE¹, P. TAN¹, N. MUNSHI², Y-J. NAM³, AND J. SAUCERMAN¹¹University of Virginia, Charlottesville, VA, ²University of Texas Southwestern, Dallas, TX, ³Vanderbilt University, Nashville, TN**P-Sat-61**

Determining the Accuracy of Density Functional Theory Calculations for c-x&pi Interactions

C. MILLER¹ AND K. RILEY²¹Tulane University, New Orleans, LA, ²Xavier University of Louisiana, New Orleans, LA**P-Sat-62**

Mechanistic Model of Thrombospondin-1 Intracellular Apoptosis Signaling

A. AYIOTIS¹ AND S. FINLEY¹¹University of Southern California, Los Angeles, CA**P-Sat-63**

A Statistical Computational Model To Investigate The Degradation Kinetics Of Composite Scaffold Systems For Bone Tissue Engineering

S. TOBIAS¹, C. LU¹, B. AKAR¹, E. BAYRAK¹, AND A. CINAR¹¹Illinois Institute of Technology, Chicago, IL**P-Sat-64**

Cardiac Inverse Problem Verification through Induced Arrhythmia with Body Surface Mapping

M. WANG¹, J. TATE¹, AND R. MACLEOD¹¹University of Utah, Salt Lake City, UT**P-Sat-65**

CFD-based Characterization of Gravity-Dependent Renal Calculi Transport Dynamics

D. SATHYANARAYAN¹ AND M. KASSEMI¹¹NASA - Glenn Research Center, Cleveland, OH**P-Sat-66**

Docking Of Purine-scaffold Series Of Heat Shock Protein 90 Inhibitors

M. NGUYEN^{1,2}¹The University of Texas at Austin, Austin, TX, ²Rice University, Houston, TX**P-Sat-67**

author cancellation

P-Sat-68

A Computational Model for the Metabolism of Inositol Hexakisphosphate

J. SMITH^{1,2}, C. WILLIAMS², G. GILLASPY³, J. DUCOSTE², B. PHILLIPPY², AND I. PERERA²¹The University of North Carolina at Chapel Hill, Chapel Hill, NC, ²North Carolina State University, Raleigh, NC, ³Virginia Tech, Blacksburg, VA**P-Sat-69**

VEGF-A Splice Variants Bind VEGFR2 with Differential Affinities

A. WITTENKELLER¹, S. MAMER¹, AND P. IMOUKHUEDE¹¹University of Illinois Urbana-Champaign, Urbana, IL**P-Sat-70**

Partial Least Squares Regression Analysis of VEGFR Adapter Model to Determine Therapeutic Potential of Adapter Protein Targeting

C. BLASSICK, J. WEDDELL, AND P. IMOUKHUEDE

University of Illinois at Urbana-Champaign, Champaign, IL

Track: Undergraduate Research, Design and Leadership**Biomaterials Posters****P-Sat-76**

Porous Three-Dimensional Carbon Nanotube Scaffolds For Tissue Engineering

M. D'AGATI¹, G. LALWANI¹, AND B. SITHARAMAN¹¹Stony Brook University, Stony Brook, NY**P-Sat-77**

PEG-Reinforcement of Alginate Hydrogels Improves Capsule Stability for Pancreatic Islet Transplantation

C. VERHEYEN¹, A. TOMEI^{1,2}, AND V. MANZOLI^{2,3}¹University of Miami, Coral Gables, FL, ²Diabetes Research Institute, Miami, FL, ³Politecnico di Milano, Milano, Italy

P-Sat-78**Analysis of Alginate Gels as a Medium for Immunoassay Cancer Screening Systems**

J. QUINLAN¹, N. NEAVLING¹, AND B. KAZAOKA¹
¹Drexel University, Philadelphia, PA

P-Sat-79**Delivery of Anti-Invasive Drugs To Prevent Invasion of Cancer Cells**

J. NAM¹, E. RIVERA-DELGADO¹, AND H. A. VON RECUM¹
¹Case Western Reserve University, Cleveland, OH

P-Sat-80**PEGylated Fibrinogen Electrospun Scaffolds for Cancer Cell Culture**

S. MARIS¹, A. ALLEN², J. ZOLDAN², AND L. SUGGS²

Track	8:00am – 9:30am	2:00pm – 3:30pm	4:30pm – 6:00pm
BIOINFORMATICS, COMPUTATIONAL AND SYSTEMS BIOLOGY			From Molecules to Cells and Organs in Health and Disease Room 17
BIOMATERIALS	Biomaterials Scaffolds I Room 21 Micro and Nano Structured Materials I Room 23	Biomaterials Scaffolds II Room 21 Micro and Nano Structured Materials II Room 23 Therapeutic and Theranostic Biomaterials I Room 22	Biomaterials Scaffolds III Room 21 Bioinspired and Self Assembling Biomaterials I Room 23 Biomaterials for Immunoengineering I Room 22
BIOMECHANICS	Concussion and Head Impact Measurement and Mitigation in Sports Room 15 Computational and Multiscale Modeling, Cellular and Cardiovascular Room 16	Head Injury Molecular to Macro, Simulation and Protection Room 15 Computational Modeling, Musculoskeletal and Whole Body Room 16	Blast Trauma Room 15 Organ and Cell Biomechanics Room 16
BIOMEDICAL ENGINEERING EDUCATION	ABET Workshop: Criteria for Your Next Accreditation Room 9		
BIOMEDICAL IMAGING & OPTICS	Magnetic Resonance Imaging Room 11	New Ultrasound Imaging Technologies Room 11 Image Processing and Analysis Room 9	Multi-modality Imaging Approaches Room 11 PET, SPECT, and CT Room 9
CANCER TECHNOLOGIES	Engineered Models of Cancer and Tumor Environment I Room 20	Engineered Models of Cancer and Tumor Environment II Room 20 Cancer Cell Mechanics and Engineering Room 19	
CARDIOVASCULAR ENGINEERING	Hemodynamics and Vascular Mechanics Room 3-4 Cardiac Electrophysiology Room 17 Cardiovascular Tissue Engineering I Room 13	Sickle Cell Disease – Pathophysiology Room 3-4 Heart Valves Room 17 Cardiovascular Tissue Engineering II Room 13	Sickle Cell Disease - Engineering Therapies Room 3-4
CELLULAR & MOLECULAR BIOENGINEERING	Cell Adhesion and Interactions with the Extracellular Matrix I Room 18 Cell Motility Room 19 Computational and Multiscale Modeling, Cellular and Cardiovascular Room 16	Cell Adhesion and Interactions with the Extracellular Matrix II Room 18 Cancer Cell Mechanics and Engineering Room 19	Cell Adhesion and Interactions with the Extracellular Matrix III Room 18 Mechanotransduction I Room 19
DEVICE TECHNOLOGIES AND BIOMEDICAL ROBOTICS	Biomedical Device Design in Translational Research Room 22	Biomedical Robotics Room 14	

Track	8:00am – 9:30am	2:00pm – 3:30pm	4:30pm – 6:00pm
DRUG DELIVERY	Responsive Delivery Systems Room 10	Nano to Micro Devices in Delivery I Room 10	Nano to Micro Devices in Delivery II Room 10
NANO AND MICRO TECHNOLOGIES	Medical Diagnostics and Screening I Room 7-8	Medical Diagnostics and Screening II Room 7-8 Nano to Micro Devices in Delivery I Room 10	Theranostics and Nanoparticles I Room 20 Nano/Microbiotechnology I Room 7-8 Nano to Micro Devices in Delivery II Room 10
NEURALENGINEERING	Neural Interfaces: Compatibility, Recording, and Stimulation I Room 12 Device-based Approaches for Axonal Growth and Guidance Room 1	Neural Interfaces: Compatibility, Recording, and Stimulation II Room 12 Neural Progenitor and Tissue Engineering Room 1	Neural Interfaces: Compatibility, Recording, and Stimulation III Room 12
ORTHOPEDIC AND REHABILITATION ENGINEERING			Articular Cartilage and Joint Room 14
RESPIRATORY BIOENGINEERING			Surface Tension and Surfactant Function in the Lung Room 1
STEM CELL ENGINEERING	Stem Cells in Pre-clinical and Clinical Models Room 5-6	Stem Cells in Pre-clinical and Clinical Models Room 5-6	Engineering Stem Cell Environments Room 5-6
TISSUE ENGINEERING	Cardiovascular Tissue Engineering I Room 13 Inflammation and Immunomodulation in Tissue Engineering I Room 14	Cardiovascular Tissue Engineering II Room 13	Engineering Replacement Tissues Room 13
TRANSLATIONAL BIOMEDICAL ENGINEERING	Biomedical Device Design in Translational Research Room 22		
OTHER	ABioM SIG Meeting Room 35	2-4pm – Room 24 Biomedical Engineering Technology for the Elimination of Health Disparities	
STUDENT AND EARLY CAREER	8-9am – Ballroom A How to Find a Job in Industry 9:15-10:15am – Ballroom A BME Careers in Industry, Government and Academia	2-4pm - Ballroom BC Resume Review & Critique	4-5:30pm – Ballroom A Transitioning from Academia to Industry Panel

Track	8:00am – 9:30am	1:45pm – 2:45pm	3:00pm – 4:00pm
BIOINFORMATICS, COMPUTATIONAL AND SYSTEMS BIOLOGY	Multiscale Approaches Room 17	Molecules and Molecular Systems Room 17	Cell Signaling and Therapeutics Room 17
BIOMATERIALS	Bioinspired and Self Assembling Biomaterials II Room 23 Biomechanics in Biomaterials and Tissue Engineering Room 21	Biomaterials for Immunoengineering III Room 22 Micro and Nano Structured Materials III Room 23	Therapeutic and Theranostic Biomaterials II Room 22 Biomaterials for Controlling Cell Environment Room 23
BIOMECHANICS	Biomaterials for Immunoengineering II Room 22 Biomechanics in Biomaterials and Tissue Engineering Room 21	Biomechanics, Injury I - Gait and Motion Room 20 Cell and Tissue Biomechanics I Room 21	Biomechanics, Injury II: Spine Room 20 Applications of Imaging in Biomechanics Room 1
BIOMEDICAL ENGINEERING EDUCATION	Novel Techniques for Incorporating Design into BME Curricula Room 9		Interactive Education: How to Engage, Excite, and Teach BME Students Room 21
BIOMEDICAL IMAGING & OPTICS	Image Guided Focused Ultrasound Therapies Room 11	Applications of Imaging in Tissue Engineering Room 11 Imaging in Cancer Room 9	Applications of Imaging in Biomechanics Room 11 Imaging Technologies in Clinical Translation Room 5-6 Imaging in Cardiovascular Systems Room 3-4
CANCER TECHNOLOGIES	Cancer Immunoengineering Ballroom BC	Imaging in Cancer Room 9	Personalized Medicine in Cancer Room 9
CARDIOVASCULAR ENGINEERING	Microcirculation Room 3-4	Stents Room 3-4	Imaging in Cardiovascular Systems Room 3-4 Cardiovascular Devices Room 16
CELLULAR & MOLECULAR BIOENGINEERING	Stem Cell Bioengineering Room 18 Mechanotransduction II Room 19 Young Innovators Session I: Cellular Engineering Room 5-6	Cell and Tissue Biomechanics I Room 21 Mechanotransduction III Room 19 Young Innovators Session I: Regenerative Medicine and Drug/Cell Delivery Room 5-6	
DEVICE TECHNOLOGIES AND BIOMEDICAL ROBOTICS		Verification and Validation of Computational Models of Medical Devices Room 201 Peripheral Neural Interfaces: Simulation & Recording Room 001B	Cardiovascular Devices Room 16
DRUG DELIVERY	Drug Delivery in Tissue Engineering Room 10	Translation to the Clinic / Personalized Medicine & Novel Materials and Self Assembly Room 10	Multifunctional or Hybrid Systems Room 10
NANO AND MICRO TECHNOLOGIES	Theranostics and Nanoparticles II Room 20 Nano/Microbiotechnology II Room 7-8	Paper Fluidics Room 7-8	Micro and Nano Total Analysis Systems Room 7-8
NEURAL ENGINEERING	Neuro-rehabilitation Room 15	Closed Loop Control of Neural Interfaces/ Networked Neural Sensors, Actuators, and Instrumentation Room 15	Glial Cell Engineering/Addressing Degeneration Room 15

Track	8:00am – 9:30am	1:45pm – 2:45pm	3:00pm – 4:00pm
ORTHOPEDIC AND REHABILITATION ENGINEERING	Musculoskeletal Tissue Engineering and Mechanobiology Room 14	Bone Room 14	Rehabilitation Engineering Room 14
RESPIRATORY BIOENGINEERING	Translational Engineering in Lung Disease Room 1	Ventilation of the Injured Lung Room 1	Airway Modeling and Imagination Room 1
STEM CELL ENGINEERING	Stem Cell Bioengineering Room 18	Directing Stem Cell Differentiation II Room 18	Other Stem Cell Applications Room 18
TISSUE ENGINEERING	Engineering Tissue Interfaces Room 13 Biomechanics in Biomaterials and Tissue Engineering Room 21 Musculoskeletal Tissue Engineering and Mechanobiology Room 14 Drug Delivery in Tissue Engineering Room 10	Bioreactor Systems for Tissue Engineering Room 13	Inflammation and Immunomodulation in Tissue Engineering II Room 19 Tissue Engineered Models for Study of Disease and Drug Discovery I Room 13
TRANSLATIONAL BIOMEDICAL ENGINEERING	Translational Therapeutics for Regenerative Medicine Room 16 Translational Engineering in Lung Disease Room 1		Imaging Technologies in Clinical Translation Room 5-6 Biomedical Products and Devices Room 25
OTHER	Whitaker International Session Room 39 Best Practices in Leadership and Management Ballroom A	12:45 – 1:45pm Best Practices in Quality & Regulatory Room 12 1:45 – 5pm BMES – NSF Special Session on Research & Grant Writing Room 12	
STUDENT AND EARLY CAREER	8:30 – 9:30am / 9:30 – 10:30am BMES Student Chapter Best Practices • Outstanding Chapter • Outreach and Mentoring Room 12 9:00 – 10:30am What You Need to Know to Get a Job in Industry, Government and Academia After Your PhD Ballroom A	1:45 – 3:15pm Undergraduate Student Design Competition Room Ballroom BC 2:00 – 4:00pm Resume Review & Critique Room 24 2:00 – 3:00pm Start – Ups and Venture Capital: Navigating the Funding Process and Investment Pitches Room 12	3:15 – 5:00pm Tech Transfer & Licensing – Best Practices in Transferring Technologies from Academia and the Clinic into Industry Room 12

Track	8:00am – 9:30am	1:30pm – 3:00pm	3:15pm – 4:45pm
BIOINFORMATICS, COMPUTATIONAL AND SYSTEMS BIOLOGY			Big Data, Single-Cell Measurements, and Clinical Applications Room 1
BIOMATERIALS	Biomaterials Design Room 21 Biomaterials for Controlling Cell Environment II Room 23	Biomaterials for Controlling Cell Environment III Room 23	
BIOMECHANICS	Cell and Tissue Biomechanics II Room 1	Cardiovascular Biomechanics I Room 15 Orthopedic I: Implants, Prosthetics, and Bone Room 16 Cell and Tissue Biomechanics III Room 17	
BIOMEDICAL IMAGING & OPTICS	Molecular Imaging Room 5-6 Optical Imaging I Room 11	Optical Imaging II: Oncology Applications Room 11	
CANCER TECHNOLOGIES	Cancer Drug Delivery Room 19 Micro and Nanotechnologies for Cancer I Room 20	Cancer Drug Delivery I Room 18 Micro and Nanotechnologies for Cancer II Room 20 Computation Modeling Strategies and Other Topics in Cancer Room 21 Optical Imaging II: Oncology Applications Room 11	
CARDIOVASCULAR ENGINEERING	Cardiac Regeneration and Stem Cells Room 3-4 Cardiovascular Flow Modeling in Health and Disease Room 1	Cardiovascular Biomechanics I Room 15 Angiogenesis I Room 3-4	
CELLULAR & MOLECULAR BIOENGINEERING	Cell and Tissue Biomechanics II Room 17	Molecular Bioengineering Room 19 Cell and Tissue Biomechanics III Room 17

8:00pm – 9:30pm	University Receptions - <i>Invitations Extended by Hosts</i>	Marriott Hotel

SCHEDULE AT-A-GLANCE

2015 | OCTOBER 9 | FRIDAY

FRIDAY, October 9, 2015

7:00am – 6:00pm	Registration	TCC, Exhibit Hall
7:00am – 8:00am	Education Committee Meeting	TCC, Room 36
8:00am – 10:00am	2016 Annual Meeting Planning Committee Meeting	TCC, Room 31
8:00am – 9:30am	PLATFORM SESSIONS - Fri - I	TCC – 19 sessions
8:00am – 9:30am	Whitaker Session	TCC, Room 39
8:00am – 9:30am	Best Practices in Leadership and Management	TCC, Ballroom D
8:30am – 9:30am	BMES Student Chapter: BMES Student Chapter/Outstanding Chapter Best Practices	TCC, Room 12
9:00am – 10:30am	Student & Early Career: What You Need to Know to Get a Job in Industry, Government and Academia after Your PhD	TCC, Ballroom A
9:00am – 10:30am	AEMB MINDS Workshop - <i>affiliate</i>	TCC, Room 25
9:30am – 10:30am	BMES Student Chapter: Outreach and Mentoring Best Practices	TCC, Room 12
9:30am – 10:30am	Ethics Meeting	TCC, Room 36
9:30am – 5:00pm	Exhibit Hall Open	TCC, Exhibit Hall
9:30am – 5:00pm	POSTER SESSION	TCC, Exhibit Hall
9:30am – 10:30am	POSTER VIEWING with Authors & Refreshment Break	TCC, Exhibit Hall
10:30am – 12:00noon	PLENARY SESSION – NIBIB Lecture / DEBUT Awards Ceremony	TCC, Ballroom BC
12:00noon – 1:30pm	Lunch on Your Own	
12:15pm – 1:30pm	Women in BME Luncheon - (<i>ticket purchase required</i>)	TCC, Ballroom D
12:30pm – 1:30pm	Medical Devices SIG Meeting	TCC, Room 39
12:45pm – 1:45pm	Best Practices in Quality & Regulatory	TCC, Room 12
1:00pm – 5:00pm	Career Fair	TCC, Exhibit Hall
1:45pm – 3:15pm	Student & Early Career: Undergraduate Student Design Competition	TCC, Ballroom BC
1:45pm – 2:45pm	PLATFORM SESSIONS – Fri - 2	TCC – 17 sessions
2:00pm – 3:00pm	AEMB Annual Ethics Session - <i>affiliate</i>	TCC, Room 25
2:00pm – 4:00pm	Rapid Resume Review and Critique	TCC, Room 24
2:00pm – 3:00pm	Student & Early Career: Start-ups and Venture Capital: Navigating the Funding Process and Investment Pitches	TCC, Room 12
1:45pm – 5:00pm	BMES-NSF Special Session on Research & Grant Writing & Reception	TCC, Ballroom A
3:00pm – 4:00pm	PLATFORM SESSIONS – Fri - 3	TCC – 17 sessions
3:15pm – 5:00pm	Student & Early Career: Tech Transfer and Licensing - Best Practices in Transferring Technologies from Academia and the Clinic Into Industry	TCC, Room 12
4:00pm – 5:00pm	POSTER VIEWING with AUTHORS & Refreshment Break	TCC, Exhibit Hall
5:15pm – 6:15pm	PLENARY SESSION – Prosthetics Advancements: How One Little Dolphin Learned to Swim Again	TCC, Ballroom BC
6:30pm – 9:00pm	BMES BASH	TCC, Riverwalk

8:00am – 9:30am	Undergraduate Research, Design & Leadership Orals #1	TCC, Room 9
8:30am – 9:30am	Industry Advisory Committee (<i>invitation only</i>)	TCC, Room 39
9:30am – 1:30pm	Exhibit Hall Open	TCC, Exhibit Hall
9:30am – 1:00pm	POSTER SESSION	TCC, Exhibit Hall
9:30am – 10:30am	POSTER VIEWING with AUTHORS & Refreshment Break	TCC, Exhibit Hall
9:30am – 10:30am	Student Affairs Committee Meeting	TCC, Room 36
9:30am – 10:30am	BMES Industry Update	TCC, Ballroom A
10:30am – 12:30pm	PLENARY SESSION – Rita Schaffer Young Investigator Lecture & Diversity Award Winner	TCC, Ballroom BC
12:30pm – 1:30pm	Lunch on Your Own	TCC
1:00pm – 3:30pm	BMES Board of Directors Meeting	TCC, Room 24
1:30pm – 3:00pm	PLATFORM SESSIONS - Sat-2	TCC – 18 sessions
1:30pm – 3:00pm	Undergraduate Research, Design & Leadership Orals #2	TCC, Room 9
3:15pm – 4:45pm	PLATFORM SESSIONS - Sat-3	TCC – 17 sessions
3:15pm – 4:45pm	Undergraduate Research, Design & Leadership Orals #3	TCC, Room 9

JOURNALS FOR THE

Biomedical Engineering Community

**ACS Biomaterials
Science & Engineering**

David Kaplan
Editor-in-Chief

“This new journal is timely as it reflects the tremendous growth in the field of biomaterials over the past decade and the importance of biomaterial designs on biological outcomes.”

pubs.acs.org/biomaterials

Bioconjugate Chemistry

Vincent Rotello
Editor-in-Chief

“*Bioconjugate Chemistry* is the one journal poised exactly at the interface of the biological and synthetic worlds, positioning the journal to contribute to advances in fields including drug delivery, bionanotechnology, and synthetic biology.”

pubs.acs.org/bioconjugate

2016 CMBE and ABioM Joint Conference **Biomanufacturing of Stem Cells and Regenerative Medicine**

January 6–10, 2016
Royal Sonesta New Orleans

Conference Chair
