

ACADEMIC BULLETIN

2024–2025

FORDHAM

2024-2025 BULLETIN

- Undergraduate Colleges (p. 14)
 - Fordham College at Rose Hill
 - Fordham College at Lincoln Center
 - Gabelli School of Business
 - School of Professional and Continuing Studies
- Gabelli Graduate School of Business (p. 384)
- Graduate School of Arts and Sciences (p. 489)
- Graduate School of Education (p. 702)
- Graduate School of Religion and Religious Education (p. 807)
- Graduate School of Social Service (p. 873)
- School of Professional and Continuing Studies (Graduate Programs) (p. 933)

Supplementary Information

- Course Descriptions (p. 966) (University-wide)
- Program Index (p. 1719)
- Attribute Code Index (p. 1712)
- Group Prerequisites (p. 1724)
- Instructional Modalities at the University (p. 1726)
- Past Bulletins (p. 1727)

TABLE OF CONTENTS

Undergraduate Bulletin	14	Educational Philosophy	63
Academic Policies, Procedures, and Resources (undergraduate and University-wide)	14	Degree Requirements	64
Academic Progress, Probation, Suspension, and Dismissal	14	Academic Policies and Procedures	64
Admissions Policy	15	Academic Advising	64
Attribute Code Index	15	Academic Progress	65
Dean's List	19	Business Coursework	66
Deferred Examinations	20	Registration	66
Grading System	20	Summer Courses	67
Important and Useful Links	22	Departments	68
Incomplete Coursework	22	Honors Program at FCRH	68
Integrity of Full-Time Study	23	Supporting Student Success	70
Limits on Number of Majors and Minors	23	Fordham College at Lincoln Center	71
Payment of Tuition and Fees	23	Academic Curriculum	73
Procedure for Appealing a Course Grade (FCRH, FCLC, and Gabelli School)	23	Educational Philosophy	74
Refund	24	Degree Requirements	75
Student Attendance	26	Academic Policies and Procedures	75
Transcript of Record	26	Academic Advising	75
Undergraduate Policy on Academic Integrity	27	Academic Progress	75
University Policies	30	Business Coursework	77

UNDERGRADUATE BULLETIN

2024-2025 Undergraduate Bulletin

This Bulletin describes the academic procedures, degree programs and requirements, and courses of instruction as projected for the undergraduate colleges of Fordham University during the 2024–2025 academic year.

- Fordham College at Rose Hill (p. 60)
- Fordham College at Lincoln Center (p. 71)
- Gabelli School of Business (p. 81)
- School of Professional and Continuing Studies (p. 97)

Fordham College at Rose Hill (FCRH) and Fordham College at Lincoln Center (FCLC) provide a wide variety of academic programs in the liberal arts and sciences at the Rose Hill and Lincoln Center campuses, respectively. The undergraduate program of the Gabelli School of Business offers business programs at both the Rose Hill and Lincoln Center campuses. FCRH, FCLC, and Gabelli primarily serve recent high school graduates interested in traditional, residential, full-time study. The School of Professional and Continuing Studies (PCS) primarily serves adult learners interested in part-time study at the Rose Hill, Lincoln Center, or Westchester campus.

The University reserves the right to withdraw or modify any course or program listed within, or to make any changes it considers necessary or desirable to improve undergraduate education, or for which it deems the registration insufficient.

Students are responsible for knowing and complying with all the regulations that may affect their status at Fordham University. Students are expected to acquaint themselves with the contents of this Bulletin and to read all notices posted regarding Fordham University regulations. Please refer all questions to the Office of the Dean or the chair of the department in the appropriate college.

Academic Policies, Procedures, and Resources (undergraduate and University-wide)

Academic policies, procedures, and resources that pertain to FCRH (p. 64), FCLC (p. 75), Gabelli (p. 89), and PCS (p. 117) may be found in their respective sections of this Bulletin.

Academic policies, procedures, and resources pertaining to all undergraduates:

- Academic Progress, Probation, Suspension, and Dismissal (p. 14)
- Admissions Policy (p. 15)
- Attribute Code Index (p. 15)
- Dean's List (p. 19)
- Deferred Examinations (p. 20)
- Grading System (p. 20)
- Important and Useful Links (p. 22)
- Incomplete Coursework (p. 22)
- Integrity of Full-Time Study (p. 23)
- Limits on Number of Majors and Minors (p. 23)

- Payment of Tuition and Fees (p. 23)
- Procedure for Appealing a Course Grade (FCRH, FCLC, and Gabelli School) (p. 23)
- Refund (p. 24)
- Student Attendance (p. 26)
- Transcript of Record (p. 26)
- Undergraduate Policy on Academic Integrity (p. 27)
- Withdrawal from the University and Leaves of Absence (p. 33)

Academic policies, procedures, and resources pertaining to all students University-wide:

- Affirmative Action Policy (p. 30)
- Campus Safety (p. 30)
- Equity in Athletics Disclosure Act (p. 30)
- Nondiscrimination and Director of Gender Equity/Title IX Coordinator (p. 30)
- Numbering of Undergraduate Courses (p. 30)
- Recruitment of Jesuits to the Faculty (p. 31)
- Reserved Rights (p. 31)
- Student Records (p. 31)
- Support Services for Students with Disabilities (p. 32)
- University Code of Conduct (p. 33)

Academic Progress, Probation, Suspension, and Dismissal

For policy on satisfactory academic progress, probation, suspension, and/or dismissal, please refer to the individual college chapters of this bulletin.

Midterm Assessments for Students

All students receive an assessment of their work at mid-semester, shortly after midterm exams. It indicates where they stand and, if they are in danger failing, urges them to make the necessary adjustments to better their performance. Once midterm assessments have been compiled, first-year students' advisers arrange individual meetings with the students to review their progress.

Midterm Appraisal

Students are responsible for learning their academic standing at midterm. Students who withdraw after the deadline for withdrawing will receive a grade of WF for the course.

Final Examinations

Final examinations will be administered in each course, except in special cases where a final project is pedagogically appropriate. The day, time, and room for the final examination are scheduled by the Office of Academic Records. The current version of the final exam schedule will be posted by Academic Records during the semester. For evening courses in any college/school, final examinations are scheduled for the same day, time, and room as the course itself.

Faculty are not allowed to move their final exams to the last days of class or to the reading period. Take-home exams must be distributed in

a timely fashion during the last week of classes and the due date should be no earlier than the regularly scheduled examination date. Faculty are required to meet with their students during the time scheduled for the final examination, whether the final is actually given during that time or is a take-home exam.

If a student has a conflict of examinations, he or she should notify and arrange with the instructor to take one exam at another time within two weeks of the final exam date. For example, it is recommended that students have a maximum of two exams per day (excluding evening courses). If a student anticipates the need to miss a final exam, this should be worked out in advance with the instructor and in consultation with the appropriate class dean/associate dean.

Deferred Final Examination: If a student experiences an illness, personal emergency, or some special contingency on the day of the final exam or when a final assignment is due, official written documentation of the reason for the absence must be provided to the class dean or associate dean within five University working days of the examination date. In the case of illness, an official doctor's note should be provided; in other situations, a written explanation by the student will be sufficient. This documentation will be used to determine whether approval of the request for a deferred examination will be granted. If the request is approved, the deferred examination must be completed by the date specified on the academic calendar. In most cases, the deferred exam should be completed in a timely enough manner that the professor can grade the exam and submit a change of grade request. Students should make arrangements with the instructor for making up the final with assistance from the home department if needed. If the request is rejected, then a grade of F should be recorded as the grade for the final examination.

Admissions Policy

Application Process

Applications will be reviewed holistically as we look for students who are a good match for Fordham. Our primary focus is that applicants will be academically successful and bring personal qualities of integrity, perseverance, and leadership to our campus communities. We learn about applicants through their transcripts, test scores (if submitted under our test-optional policy), essay, extracurricular activities, and a primary academic letter of recommendation. For many students, this part of our review provides a strong indication if Fordham is a place where they may find a home for their undergraduate studies. For some applicants, we need to know even more about them to inform our decision. Therefore, we will also consider elements such as additional recommendations or other supplementary materials.

Early Action

Students who would like to receive an admission decision early may submit an application by November 1. Students who choose to submit testing and are applying under the Early Action process should complete the SAT or ACT by October of their senior year. The Early Action process is non-binding, and students do not have to commit to the institution they plan to attend until May 1. Decision letters will be sent by December 20.

Note: Students applying to the theatre major or the Ailey/Fordham BFA in Dance program must apply by the Early Action deadline of November 1 and decisions will be rendered on a rolling basis after March 1. These programs have additional audition/interview requirements.

Early Decision I

Students who would like to receive an admission decision early may submit an application by November 1. Students who choose to submit testing and are applying under the Early Decision I process should complete the SAT or ACT by October of their senior year. The Early Decision I process is binding, and admitted students are required to commit to Fordham. Decision letters will be sent by December 20.

Early Decision II

Students who would like to receive an admission decision in mid-February may submit an application by January 3. Students who choose to submit testing and are applying under the Early Decision II process should complete the SAT or ACT by December of their senior year. The Early Decision II process is binding, and admitted students are required to commit to Fordham. Decision letters will be sent by mid-February.

Regular Decision

Students applying Regular Decision may submit an application by January 3. Students who choose to submit testing should complete the SAT or ACT by December of the senior year. The Regular Decision process is non-binding, and students do not have to commit to the institution they plan to attend until May 1. Decision letters will be sent by April 1.

Part-Time/Adult Admission

Fordham University offers highly regarded part-time/adult degree programs at three convenient locations in New York City and the metropolitan area—at the Lincoln Center campus in Manhattan, the Rose Hill campus in the Bronx, and the Westchester campus in West Harrison, New York. Our part-time/adult degree programs are flexible, personal, intellectually stimulating, and built on the same standards of excellence that have made the Fordham degree prestigious since the 1840s.

For more information, please refer to the Fordham School of Professional and Continuing Studies (p. 97) section of this Bulletin and call the Office of Admission at the campus of your choice: Rose Hill, 718-817-4600; Lincoln Center, 212-636-6372; or Westchester, 914-367-3303.

AP and IB Credit/College Courses Taken in High School

For information regarding Advanced Placement (AP) and International Baccalaureate (IB) credit, and transfer credit policies concerning college courses taken while in high school, consult the Office of Undergraduate Admissions website.

Attribute Code Index

This page is a list of all undergraduate course attributes and their use.

Dean's List

Undergraduate students demonstrating exceptional academic achievement are named to their home college's Dean's List based on the below criteria.

Fordham College at Rose Hill

Dean's List will be awarded and posted to students' transcripts each term, excluding summer. The following criteria must be met:

- Students must earn a term GPA of 3.600 or above.
- Students must have earned 12 or more credits for the term, graded on a letter scale; grades of "P" (Pass) are not included.
- Students with the following grades for the term *are* eligible: ABS, INC, NGR, F, F⁺, and WF.

Prior to Fall 2020, Dean's List was awarded based on students' performance in a given academic year (fall and spring semesters), with the following exceptions: (i) Dean's List was awarded based on performance in a given semester in Fall 2018 and Spring 2019; (ii) due to the impact of COVID-19, Dean's List was awarded based on performance in the academic year 2019-2020.

Fordham College at Lincoln Center

Dean's List will be awarded and posted to students' transcripts annually, each spring. The following criteria must be met:

- Students must earn a combined GPA for the fall and spring term of 3.600 or above.
- Students must have earned 24 or more credits for the fall and spring combined, graded on a letter scale; grades of "P" (Pass) are not included.
 - There is no minimum number of credits that must be earned per term (students meeting the criteria with courses taken all in one term may still be named to Dean's List).
- Students with the following grades for the term *are* eligible: ABS, INC, NGR, F, F⁺, and WF.

- Students studying abroad who complete a semester abroad and otherwise meet all of the above criteria in the term spent on campus may still be named to Dean's List.

Gabelli School of Business (Full-Time Students)

Dean's List will be awarded and posted to students' transcripts annually, each spring. The following criteria must be met:

- Students must earn a combined GPA for the fall and spring term of 3.600 or above.
- Students must have earned 24 or more credits for the fall and spring combined, graded on a letter scale; grades of "P" (Pass) are not included.
 - There is no minimum number of credits that must be earned per term (students meeting the criteria with courses taken all in one term may still be named to Dean's List).
- Students with the following grades for the term *are* eligible: ABS, INC, NGR, F, F^A, and WF.
- Students studying abroad who complete a semester abroad and otherwise meet all of the above criteria in the term spent on campus may still be named to Dean's List.

Gabelli School of Business (Part-Time/Evening Students)

Dean's List will be awarded and posted to students' transcripts annually, each spring. The following criteria must be met:

- Students must earn a combined GPA for the fall and spring term of 3.600 or above.
- Students must have earned 18 or more credits for the fall and spring combined, graded on a letter scale; grades of "P" (Pass) are not included.
 - There is no minimum number of credits that must be earned per term (students meeting the criteria with courses taken all in one term may still be named to Dean's List).
- Students with the following grades for the term *are* eligible: ABS, INC, NGR, F, F^A, and WF.
- Students studying abroad who complete a semester abroad and otherwise meet all of the above criteria in the term spent on campus may still be named to Dean's List.

School of Professional and Continuing Studies

Dean's List will be awarded and posted to students' transcripts annually, each spring. The following criteria must be met:

- Students must earn a combined GPA for the fall and spring term of 3.600 or above.
- Students must have earned 12 or more credits for the fall and spring combined, graded on a letter scale; grades of "P" (Pass) are not included.

- Students must be registered during the two regular terms of the given academic year (fall and spring) and complete at least four courses, graded on a letter scale, over the course of these two terms.
- Students with the following grades for the term *are* eligible: ABS, INC, NGR, F, F^A, and WF.
- Students studying abroad who complete a semester abroad and otherwise meet all of the above criteria in the term spent on campus may still be named to Dean's List.

Deferred Examinations

Absences for reasons of religious holidays, serious illness, death in the student's immediate family, or required participation in a University-sponsored event are, with the appropriate documentation, excused absences, and students will be given an opportunity to make up class examinations or other graded assignments. Faculty members are under no obligation to allow makeup work for unexcused absences.

Final exam: A student may be excused from taking the final examination at the normally scheduled time and be given a grade of ABS only for illness, personal emergency, or some special contingency. Official written documentation of the reason for the absence must be provided to the class dean or associate dean within five University working days of the examination date. In the case of illness, an official doctor's note should be provided; in other situations, a written explanation by the student may be sufficient. This documentation will be used to determine whether approval of the application will be granted. If the request is approved, the deferred examination should be completed in a timely enough manner, so that the professor can grade the exam and submit a change of grade form before the deadline for ABS removal specified in the academic calendar. Students should make arrangements with the instructor for making up the final with assistance from the home department if needed. If the application is rejected, then a grade of F will be recorded for the examination.

In case of conflicting examination times or an excessive number of examinations in one day, the student may consult with the instructor to see whether an examination may be rescheduled.

Grading System

The University uses a letter grading system with quality point equivalents.

Letter Grade	Numerical Equivalent	Grade Description
A	4.00	Excellent. Honors-level work, outstanding.
A-	3.67	Still excellent.
B+	3.33	Very Good. High level of performance.
B	3.00	Good. Solid and above-average level of performance.
B-	2.67	Good. Above average.
C+	2.33	Average level of performance.
C	2.00	Satisfactory. Acceptable level of performance.
C-	1.67	Minimally Acceptable.

D	1.00	Passing but unsatisfactory. Below the average level expected. The lowest passing grade.
F	0.00	Failure. Inferior performance.

PF/P This symbol indicates satisfactory work in a course for which the student gains credit but no grade points. Courses receiving a grade of P will not count towards fulfilling the core, major, or minor.

PF/F^ This symbol indicates failure in a course for which the only alternative grade would have been a pass. It is the equivalent of an F grade but is not included in grade point computation.

AF Failure for excessive absence in a course. (PCS only)

INC Temporary grade given when course requirements, other than just the final exam, have not been met.

IMS (Incomplete Due to Military Service) When a member of the Armed Forces (including reserve components) receives orders to perform a period of service (i.e. active duty, inactive duty training, or state service), the temporary grade of IMS is assigned by the Office of Academic Records. Students who receive a grade of IMS will have the opportunity to complete the given term after the period of service. Service members must provide a copy of their military orders to the Office of Military and Veterans' Services (veterans@fordham.edu) prior to receiving an IMS grade.

ABS Temporary grade granted by the instructor for absence from the final examination, due to extenuating circumstances, such as illness or death in the family.

W This symbol indicates that a student has a special justification for withdrawing from a course prior to the last day for dropping courses without academic penalty. It may be granted only by authorization of the dean or class dean.

WF Failure for dropping a course without the permission of the dean or class dean. It is the equivalent of an F.

Helpful Definitions for Reading Transcripts on My.Fordham

Attempted Hours: The number of credits assigned to each course for which the student registered.

Earned Hours: The actual number of credits earned in each course; cumulatively reflects the number of credits successfully completed to date, meaning all classes passed at Fordham plus any IB/AP/transfer credits awarded. Credit for courses taken pass/fail, while not counted toward quality hours, are counted in earned hours.

GPA Hours: The number of credits assigned for each course that was attempted for a regular grade. "Regular" grades are standard letter grades with a numerical value assigned (A-F). WF, or withdrawal failure, is the numerical equivalent of an F and is counted toward quality hours.

Quality Points: The numerical value of the earned grade in each course (not shown on My.Fordham, but see above) multiplied by the number of credits assigned for each course that was attempted for a regular grade (quality hours).

Grade Point Average: a weighted average used to indicate to the student and to the faculty the academic progress of each student. Since each course is added to the accumulated average of all courses pursued, it is a cumulative index and is computed by dividing the quality points by the

quality hours. This index is computed to three digits beyond the decimal point. Courses taken pass/fail are not counted towards quality hours, and are not included in the grade point average.

Pass/Fail

Sophomores, juniors, and seniors are allowed to register for one elective course per academic year on a Pass/Fail basis. Credit will be granted for a passing grade, and no credit awarded for a failing grade. Since there is no numerical equivalent, the grade is not computed in the student's GPA index.

No courses used to fulfill a core, major, or minor program requirement may be taken on a pass/fail basis. Once chosen, the P/F option cannot be rejected in anticipation of a high letter grade; conversely, the likelihood of a low letter grade is not grounds for a belated request for a P/F after the deadline. In order to take a course on a P/F basis, the approval of the appropriate advisor, class dean or associate dean is required.

Students are permitted to take one course per academic year on a pass/fail basis in their sophomore, junior, and senior years. (In the Gabelli School of Business, students are only permitted to exercise their pass/fail option for liberal arts electives. Pass/fail courses may not be used for the fulfillment of courses going toward majors, minors, or concentrations.)

Withdrawal from a Course

With the permission of the appropriate dean, a student may withdraw from a course or courses until the deadline specified in the academic calendar. If permission is obtained, the student will be awarded the grade of W, a grade which carries no academic penalty. A WF, a grade which is the equivalent of an earned F in the cumulative quality point index, may be given when the student ceases to attend a course without formal approval from the dean's office. If a student withdraws from a course after the deadline specified in the academic calendar, they will receive a WF. If a student is found in violation of the Academic Integrity Policy and receives an F in a course, and subsequently elects to withdraw from the course prior to the withdrawal deadline, the student shall receive the grade of WF. Students who withdraw from a course are responsible for discussing with the appropriate dean how the lost credits will be made up. In addition, they are advised to refer to the information on tuition refunds in the Academic Programs, Policies, and Procedures section of this bulletin for information about financial penalties.

Quality Point Index

The quality point index, or grade point average, is a weighted average used to indicate to the student and to the faculty the academic progress of each student. Since each course is added to the accumulated average of all courses pursued, it is a cumulative index and is computed in the following manner:

1. Multiply the numerical value of the letter grade in each course taken by the number of credits assigned to the course (exclude all classes taken on a pass/fail basis);
2. Add these products and divide by the total number of credits earned in these courses (exclude all classes taken on a pass/fail basis). This is your quality point index or grade point average.

This index is computed to three digits beyond the decimal point.

Notification of Grades

Grades are posted on My.Fordham at the end of each term. Students are expected to check My.Fordham for their final grades. Grade reports will not be mailed to students.

Undergraduate Bulletin Online Incomplete Coursework

When course requirements, **other than just the final exam**, have not been met, the instructor may report a temporary grade of INC (incomplete). The instructor and student must arrange a plan for the missing work to be completed. The instructor should send the plan in writing to the student and to the student's advisor or advising dean, listing the coursework that needs to be completed and the due date by which the student must submit it. Gabelli School students and students enrolled in the School of Professional and Continuing Studies should contact their class dean to initiate this procedure. Advising deans in the School of Professional and Continuing Studies will ensure that the necessary forms will be completed to document the INC grade and the associated requirements for completing the course.

On completion of the course requirements, the INC will be removed and replaced by a permanent grade using the instructor change of grade workflow accessed through the Faculty Dashboard in the portal. If the requirements are not completed by the date specified on the academic calendar, the INC will be changed automatically to an F.

Integrity of Full-Time Study

A university cannot compromise on its objective of the honest and wholehearted pursuit of academic excellence. Students must guard against allowing outside activities, including part-time employment, from interfering unduly with their academic pursuits. Full-time student status means just that. Therefore, students should not compromise their academic careers by losing sight of the primary objective of academic excellence.

Limits on Number of Majors and Minors

Fordham College at Rose Hill, Fordham College at Lincoln Center, and School of Professional and Continuing Studies

Students are limited to declaring at most two majors and two minors.

In rare instances, if there is an academically justifiable reason to do so and with the permission of the relevant associate dean, students may be able to declare a third major or minor.

Gabelli School of Business

Students are limited to declaring at most two majors (subject to restrictions (p. 83)).

In rare instances, and with the permission of the senior assistant dean and relevant advisor, students may be able to declare a third minor.

Payment of Tuition and Fees

Shortly after registration, students are sent a billing statement. Payment in full for all charges must be made to the University on or before the due date on the first bill of the semester. The due date that appears on each subsequent billing statement refers to newly billed charges only. Failure to make payment by the due date may result in late fees, and/or cancellation of registration and campus housing. The University will also deny access to registration and diplomas.

Fordham University accepts payment by cash, check, money order, wire transfer, or Automated Clearing House (ACH) transactions that directly debit an individual's bank account.

For credit card payments, please note the following:

- We accept payment by credit card, with a convenience fee, for tuition charges, room and board charges, and technology and general fees. (Exceptions to the convenience fee are noted below.)
- When making a credit card payment, via PayPath, a convenience fee of 2.65% of the transaction amount is assessed, in addition to the amount owed. The amount of the convenience fee will be displayed before you submit payment and will appear as a separate charge on your credit card statement. Make sure to note the total amount of the payment before initiating the transaction.

- Once the charge is assessed, the 2.65% fee is NON-REFUNDABLE, even if we refund your credit card for the amount owed. Fordham receives no part of the convenience fee.
- PayPath accepts Visa, Discover, and American Express.

Note: There are some exceptions to the convenience fee policy. Payment for tuition, fees, and room and board can be made by credit card without incurring a convenience fee for the following populations and charges:

- School of Professional and Continuing Studies and Evening Program students in the Gabelli School of Business
- For Summer Session: all undergraduates, Graduate School of Arts and Sciences, and Graduate School of Religion and Religious Education students
- Institute of American Language and Culture course fees
- Miscellaneous incidental fees (conferences, workshops, application fees, late fees)

For those students who are eligible to pay by credit card, payment may be made in person or by calling Enrollment Services during regular business hours at 718-817-4900 or by accessing My.Fordham and clicking on "Make a Payment." Credit card payments sent to the P.O. Box address will be returned to the sender.

The University also offers a Monthly Payment Plan managed by Nelnet.

For the most up-to-date payment methods, please go to the Student Accounts website.

Late Payment and Penalties

The amount due that appears on each bill is payable on or before the due date to be considered on time. The due date that appears on each bill refers to newly billed charges only. All balances must be paid in full, or, if necessary, a formal payment arrangement must be completed by the due date. The Office of Student Financial Services is available to counsel students and families on various financing options.

Balances that remain unpaid by the due date will incur a late fee of \$15 or 1.5% per month, whichever is greater. Unpaid tuition and fees or default on payment arrangements may result in cancellation of registration and loss of University housing. Additionally, holds will be placed on future registrations, University housing, and diplomas.

Procedure for Appealing a Course Grade (FCRH, FCLC, and Gabelli School)

The policy outlined below applies to all undergraduates except those in the School of Professional and Continuing Studies (PCS), whose policy can be found [here](#).

An undergraduate who claims to have received an incorrect grade in a course may use the following grievance procedure. The student must act in a timely manner following the steps below with the goal of resolving the grade grievance.

The timeline below refers to when classes are in session during the given semester.

Step One

The student should set a meeting time and discuss with the professor whose grade they are grieving during the semester or within one month of the beginning of the new semester. In the event that the instructor will not be available during the following semester, this meeting can be held by teleconference if needed.

Step Two

If the grade grievance is not resolved to the satisfaction of the student, the student may submit a written request for the grade change and the supporting justification to the chairperson of the pertinent department/area within two weeks of ending discussion with the professor. The chairperson will send a copy of this request to the professor.

Step Three

The department/area chairperson will meet with the student within two weeks of receiving the student's written request for the grade change. The chairperson will also review the request with the professor.

1. If the chairperson finds the request for a grade change without merit, they will convey this decision, in writing with explanation, to the student.
2. If the chairperson supports the request for a grade change, the chairperson will meet with the student and professor together or separately as the professor deems best. If the professor believes the grade change is not merited, he or she will make his or her reasons clear to the chairperson in writing if requested by the chairperson.
3. Should the student decide to appeal to the associate dean, the student should inform the chairperson within two weeks. The chairperson will act on this appeal by submitting a written report and supporting materials within two weeks to the associate dean of the college/school in which the course was taken.

Step Four

The associate dean will review the materials and assemble an appeals committee of their choosing to provide advice on how best to handle the grade grievance. Please note that to ensure procedures are fair and standardized, the associate dean does not meet with either party but may request additional information.

Step Five

The associate dean of the appropriate college/school will review the materials, make a decision to be given to the dean for final approval, and notify all parties of the decision. The dean's decision is final.

Refund

The University's refund policies and procedures ensure equitable refunds to students who withdraw from all or a portion of their studies or when payment(s) are in excess of total charges.

A refund request can be submitted to the Office of Student Accounts in writing, verbally, or by email at s(studentaccts@fordham.edu)tudentaccounts@fordham.edu (studentaccounts@fordham.edu). Credit balances are processed each business day. Refund processing for a term begins after the add/drop period, for the student's home school, has passed. Please allow 10 business days from when a credit balance is refundable for the processing to be completed.

Credit balances resulting from anticipated payments, third-party payments (i.e., outside scholarship providers, employers, governmental agencies, New York State Tuition Assistance Program [TAP], etc.), or personal checks will only be refunded once funds are received by the University and applied to the student's account. Refunds will be processed as follows: PLUS loans refunded to parents, monthly payment plan payments usually refunded to the sponsor; all other credits refunded to the student. Students are encouraged to enroll in direct deposit of their refunds by signing up online through the portal. Student refund checks are mailed to the student's local address unless otherwise specified on the refund request form.

Application fees and tuition deposits are not refundable. Registration, late payment, student activities, laboratory, maintenance of matriculation, and other special fees are not refundable after classes begin.

Room deposits are refundable according to the following schedule:

If the withdrawal notification is received by the Office of Residential Life:

	Due Fordham	Refund
On or before June 1	0%	100%
June 2 through June 30	50%	50%
Thereafter ¹	100%	0%

¹ Notification of withdrawal after August 1 for the fall and at the beginning of Christmas break for spring assignments are subject to a late withdrawal fee. This fee is in addition to the forfeit of any housing deposit paid.

A student is considered withdrawn from the University only if an official withdrawal form has been submitted to the Office of Academic Records. The effective date of withdrawal will be the date this form is signed by the Office of the Dean.

Refund of Institutional Charges

The following refund policies are based on 100 percent payment of all institutional charges for the enrollment period. The refund period begins on the first day of the enrollment period.

Institutional Refund Policy (Tuition)

Date of Withdrawal	Due Fordham	Refund
Prior to start of term	0%	100%
Prior to second week of term ¹	15%	85%
Prior to third week of term	30%	70%
Prior to fourth week of term	45%	55%
Prior to fifth week of term	60%	40%
Prior to sixth week of term	75%	25%
Thereafter	100%	0%

¹ The add/drop period for each school within the University is approximately seven days into the term. During this period changes in course work are permitted with no tuition penalty. However, if a student withdraws from the University during the add/drop period, the tuition liability will be calculated based on the above table.

Institutional Return Policy

(Residence hall charges, other than room deposits)

Date of Withdrawal	Due Fordham	Refund
Prior to availability	0%	100%
Prior to second week of availability	20%	80%
Prior to third week of availability	40%	60%
Prior to fourth week of availability	60%	40%
Prior to fifth week of availability	80%	20%
Thereafter	100%	0%

Refund Policy Appeal Process

A student may request an appeal in writing to the office of the appropriate dean. The request should include all relevant information describing the special circumstances on which the appeal is based.

Return of Financial Aid Funds Policies and Procedures

Financial aid that has been disbursed to a student's account for a period of enrollment from which the student has withdrawn is subject to the return of funds policy. Funds from federal Title IV assistance programs are subject to Return of Title IV Funds policy. Title IV funds include Direct Subsidized and Unsubsidized Loan, PLUS Loan, Pell Grants, and SEOG. (This policy does not apply to the Federal Work Study program.) Funds from Fordham University are subject to the Institutional Return of Funds policy.

The student is responsible for any unpaid institutional charges. The student is also responsible for any additional balances created as a result of the Title IV Return of Funds Procedure. Also refer to the Refund and Withdrawal Policies.

Procedure for Determining the Return of Institutional Funds for Non-Title IV Aid Recipients

Financial aid that has been disbursed to a student's account from Fordham University sources will be prorated at the same rate that the student is charged. See the percent in the column "Due Fordham" in the Institutional Refund Policy (Tuition) chart, located in the "Refund of Institutional Charges" section under the Academic Programs, Policies, and Procedures chapter of this bulletin, to determine the rate.

Procedure for Determining the Return of Financial Aid for Federal Title IV Aid Recipients

Changes to federal law may affect this policy.

Procedure for determining the Federal Return of Title IV Funds (This procedure is federally mandated.)

Step 1: Determine the Withdrawal Date Official Withdrawals

If the student officially withdraws, the withdrawal date is the date Fordham determines the student either began the withdrawal process, or the date the student provided official notification to Fordham, in writing or verbally, of his or her intent to withdraw.

Unofficial Withdrawals

If Fordham determines that a student did not provide official notification of his or her intent to withdraw because of illness, accident, grievous personal loss, or other such circumstances beyond the student's control, the withdrawal date will be determined in relation to that circumstance.

If a student does not return from an approved leave of absence, the withdrawal date is the date that institution determines the student began

the leave of absence. If a student takes a leave of absence that does not meet the requirements of an official leave of absence, the withdrawal date is the date that the student began the leave of absence.

Otherwise, the withdrawal date is the student's last date of attendance at an academic-related activity that is documented by Fordham.

Step 2: Calculate the Percentage of Enrollment Period Completed

The percentage of enrollment period completed is determined by dividing the total number of calendar days in the enrollment period into the number of calendar days completed in that period as of the withdrawal date. (The total number of calendar days in a payment period includes all days within the period. Scheduled breaks of at least five consecutive days are excluded from the total number of calendar days in the enrollment period and the number of calendar days completed in that period.)

Step 3: Calculate the Amount of Title IV Assistance the Student Can Keep

If the withdrawal date is greater than 60 percent of the enrollment period (semester), the student can keep 100 percent of the Title IV aid received for that semester. If the withdrawal date is less than or equal to 60 percent of the semester, the amount of Title IV funds that the student can keep is calculated by determining the percentage of Title IV funds that has been earned by the student for that semester. Then apply this percentage to the total amount of Title IV funds that was disbursable for the semester as of the withdrawal date.

The amount of Title IV funds that the student cannot keep is calculated by subtracting the amount of Title IV funds the student can keep from the total of Title IV aid received.

Step 4: Determine the Amount to be Returned or Repaid to the Financial Aid Program

Fordham is required to return the lesser of the total amount of Title IV funds the student cannot keep, or an amount equal to the charges if the total amount to be returned exceeds the charges incurred by the student. Charges include tuition, fees, room, and board (if the student contracts with Fordham for room and board) and can include other education-related expenses assessed by Fordham.

The student must return the total amount of Title IV funds the student cannot keep minus the amount Fordham is required to return.

The student (or parent in the case of a PLUS Loan) must return or repay, as appropriate, the amount determined to any Title IV loan program in accordance with the terms of the loan, and any Title IV grant program as an overpayment of the grant. However, a student is not required to return 50 percent of the grant assistance that is the responsibility of the student to repay.

Amounts to be returned by Fordham or the student will be credited to the appropriate programs in the following order: Federal Direct Subsidized/Unsubsidized loans, Federal Perkins loans, Federal PLUS loans received on behalf of the student.

If amounts to be returned remain after repayment of all outstanding loan amounts, the remaining excess must be credited to any amount awarded for the semester for which a return of funds is required in the following order: Federal Pell Grants, Federal SEOG Grants, other grant or loan assistance authorized by Title IV of the Higher Education Act, University funds. Federal Work Study is excluded from this policy.

Student Attendance

Students are expected to attend every class of every course for which they are registered. If an instructor wishes to have a different attendance policy, that policy must be stated in the syllabus distributed to each student registered for the course, including whether and how absences will affect the student's grade for the course.

In addition to faculty members keeping record of attendance, students are responsible for keeping a record of their own absences and may not exceed the maximum number allowed. While students may consult the instructor about their record of attendance, the instructor is the final judge of that record.

Absences for reasons of religious holidays, serious illness, death in the student's immediate family, or required participation in a University-sponsored event are, with the appropriate documentation, excused absences, and students will be given an opportunity to make up class examinations or other graded assignments. At FCRH, FCLC, and Gabelli, students can complete an Excused Absence Request if required by the instructor (this is not a requirement by the respective dean's offices) on their My.Fordham portal, but this should only be encouraged for instances when approval is needed for a make-up or to extend a deadline. In any other instances, faculty are asked to use their own discretion in granting excused absences consistent with the University's policies above. For University-sponsored events, documentation will be provided by the appropriate University office either directly to the faculty member or via the student. Students enrolled in PCS are asked to email their advising dean with their request, which should include the reason for the anticipated absence, along with supporting documentation.

The maximum number of total absences will not exceed six class meetings for a course that meets three days per week, four class meetings for a course meeting two days per week, or two class meetings for a course that meets once a week, unless otherwise noted in the syllabus.

If a faculty member chooses to allow unexcused absences, the number of excused and unexcused absences combined may be limited to the maximum number noted above. Faculty members are under no obligation to allow makeup work for unexcused absences. Faculty who choose to establish a more stringent attendance policy must have the approval of their department. All faculty must include their attendance policy in the course syllabus distributed at the first course meeting.

In cases where unusual circumstances cause a student to miss a significant amount of class time for reasons beyond the student's control, the student should confer with the faculty member and class/advising dean to ascertain if it is feasible to complete the work of the course.

For all students, the following guidelines apply.

Religious Holidays: A number of religious faiths are represented in the Fordham student body. Students who will be absent due to a religious holiday should notify their instructor at the beginning of the semester.

Participation in University-Sanctioned Activities: Students serve as representatives for the Fordham community in a variety of activities. The authorized administrator/director of the activity will provide a written list of the dates of the activities, including travel time, to each participating student at the beginning of the semester. Students will provide each of their professors with the scheduled list of excused absences at the beginning of each semester. The faculty will acknowledge the scheduled absence(s) by signing an accompanying letter. In some cases—such

as the scheduling of a championship tournament or a rescheduled competition—the actual timing of the event may not be known at the beginning of the semester. In such cases, the authorized administrator will make every effort to notify instructors as soon as possible.

Student Health Services will not provide notes excusing students from class. At FCRH, FCLC, and Gabelli, providing appropriate documentation is part of the Excused Absence Request review. At PCS, students are expected to provide their class/advising dean with appropriate documentation.

In all of the circumstances noted above, it is the student's responsibility to obtain any class notes or other course material missed due to absences. It is also the student's responsibility to speak with the instructor to make arrangements to make up missed examinations or graded assignments. The manner in which the work will be made up is left to the discretion of each faculty member.

Faculty members are encouraged to notify the appropriate class or advising dean of the student's home college/school about prolonged absences.

Transcript of Record

An official transcript is one bearing the seal of the University and the signature of the University Registrar.

Official academic transcripts may be issued to educational institutions, employers, scholarship/grant/fellowship organizations, application services, government agencies, etc., or to students (for personal use). Students may view their unofficial transcript online by using their credentials on fordham.edu. Official transcripts cannot be faxed to recipients.

Students and alumni who request an official transcript for personal use may not forward it to another party; doing so renders the transcript unofficial. Transcripts should always be issued to the intended final recipient.

The University offers online ordering for secure electronic transcripts as well as for mailed (paper) transcripts. Full details are available from the Office of Academic Records.

Students may request an unofficial transcript listing courses and credits marked "Unofficial." The University accepts no responsibility for the accuracy of an unofficial transcript after it has been issued.

Transcripts may be requested from the University via the National Student Clearinghouse. They should be requested well in advance of the date desired. No transcripts will be issued for students who have account holds that prevent transcript release. In compliance with New York State law, the University does not withhold transcripts for unpaid financial obligations. Fees apply for specialized transcript mailing services (i.e. certified mail, international mail, express mail). These fees and services are subject to change at any time.

The Office of Academic Records may use its discretion to limit the number of transcripts requested at any one time.

Students who attended (completed any of their coursework) at the University prior to 1990, or at Marymount College prior to Fall 2002, must use this Transcript Request Form and submit it to the Office of Academic Records. Such transcripts cannot be delivered electronically, and can only be delivered via mail (regular or express).

Fordham University will make every effort to promptly fill all requests for transcripts but will not assume responsibility for delays. All inquiries concerning issuance of transcripts must be made to the Office of Academic Records.

Undergraduate Policy on Academic Integrity

A university, by its nature, strives to foster and recognize originality of thought, which can be recognized only when people produce work that is theirs alone, properly acknowledging information and ideas that are obtained from the work of others. It is therefore important that students must maintain the highest standards with regard to honesty, effort, and performance.

As a Jesuit, Catholic university, Fordham is committed to ensuring that all members of the academic community strive not only for excellence in scholarship but also for integrity of character. In the pursuit of knowledge and personal development, it is imperative that students present their own ideas and insights for evaluation, critique, and eventual reformulation. As part of this process, each student must acknowledge the intellectual contributions of others.

I. The Academic Integrity Statement

The following statement will be read at the academic orientation by all incoming first-year and external transfer students to increase their awareness of the importance Fordham attaches to integrity within the academic community.

As a student of Fordham University, I recognize that I am part of a community dedicated to the disciplined and rigorous pursuit of knowledge and communication of truth. I therefore commit myself to the University Code of Conduct and upholding the highest standards of academic integrity. Any work that I claim to be my own will be my own; I will give appropriate credit where credit is due; I will be fair and honest in all of my interactions with members of the Fordham community.

By being enrolled at Fordham University, students are bound to comply with the University Code of Conduct, which includes, but is not limited to, the following Standards of Academic Integrity:

II. Standards of Academic Integrity

Academic integrity is the pursuit of scholarly activity in an honest, truthful and responsible manner. Fordham students are expected to accept the responsibility to be honest and to respect ethical standards in completing their academic assignments, assessments, and other requirements. Students are expected to adhere to academic integrity by completing all assignments and other requirements on their own without assistance from external resources (including any artificial intelligence or machine-learning tools) unless directly authorized by the instructor. It is the student's responsibility to give credit to any quotation, idea, or data used from an outside source. Students who fail to meet the responsibility for academic integrity subject themselves to sanctions ranging from a reduction in grade, course failure, or expulsion from the university. Below are instances of violations with which all members of the academic community should be familiar.

A. Plagiarism

Plagiarism occurs when individuals attempt to present as their own work what has come from another source. Plagiarism takes place whether

such theft is accidental or deliberate. It is no defense to claim that one has "forgotten" to document ideas or material taken from another source.

Examples of plagiarism include, but are not limited to

1. Using the ideas of another person, whether or not such ideas are paraphrased, from whatever source, including oral, print, broadcast, or computer-mediated communication;
2. Rewriting borrowed material by simply dropping a word here and there, substituting a few words for others, or moving around words or sentences;
3. Presenting borrowed material, whether a phrase, a sentence, or whole paragraphs without placing quotation marks around the borrowed material in the approved style;
4. Presenting as one's own an assignment, paper, or computer program partially or wholly prepared by another person, whether by another student, a friend, or by a business or online service that sells or distributes such papers and programs, or generative artificial intelligence when not expressly permitted;
5. Failing to use proper citation for information obtained from print sources or the Internet, according to citation criteria specified by the instructor or, in cases where instructor guidance is not given, by standard manuals of style (e.g., *The Chicago Manual of Style*).

B. Cheating

Cheating occurs when individuals use course materials, information, or devices (e.g., programmable calculator, cell phone) when such use is unauthorized or prohibited.

Examples of cheating include, but are not limited to

1. Having or using unauthorized materials, information, or an unauthorized device at an examination, test, or quiz: this includes accessing online sites that supply answers to questions students upload;
2. Copying from another student at an examination, test, or quiz, or copying another student's assignment, data, or laboratory report;
3. Permitting another student to copy from an assignment, paper, computer program, project, examination, test, or quiz;
4. Obtaining and/or using an unauthorized examination, test, or quiz prior to its administration;
5. Having another person act as proxy to take an examination, test, or quiz or to complete an assignment, paper, computer program, or project.

C. Falsification

Falsification occurs when individuals make false statements that mislead others.

Examples of falsification include, but are not limited to

1. The submission or presentation of a falsified excuse for an absence from a course requirement, examination, test, or quiz;
2. The presentation of false identification or credentials in order to gain admission to a course, examination, test, quiz, or degree program;
3. The creation of a false or misleading citation;
4. The manipulation or falsification of data for an academic assignment;
5. The usage of artificial intelligence to complete an assignment claimed to be one's own.

D. Unapproved Collaboration

Certain coursework and assignments such as team projects, papers, and laboratory work may involve collaboration. Unless expressly permitted or prescribed by the faculty member, students shall not engage in collaboration on graded assignments. It is the student's responsibility to ask for clarification from a faculty member as to what extent, if at all, collaboration with others is allowed.

E. Other Violations of Academic Integrity

Additional violations of academic integrity include, but are not limited to

1. Theft, destruction, or tampering with library materials, audio- and videotapes, and computer hardware or software;
2. Submission of a paper or project to more than one course during the time in which a student is attending Fordham University, without the explicit permission from all the instructors involved;
3. Submission of work previously done in high school or at another institution, whether modified or not, without permission of the instructor.

III. The Academic Integrity Committee

To foster a trusting environment that is essential for learning, it is the responsibility of both students and faculty to maintain and to promote the intellectual community. To ensure that all members of that community are represented in the process, a committee comprised of three faculty members, three students, and one academic administrator will be established for each college/school. This committee will oversee the procedures and appeals associated with courses taught in that college/school.

Responsibilities

The responsibilities of the Academic Integrity Committee (AIC) are as follows:

1. to record and verify receipt of Academic Violation Reports signed by the instructor and student;
2. to further investigate the incident if the student challenges the decision of the instructor, and schedule a case review;
3. to report the violation to the appropriate dean(s);
4. to provide annual reports of the academic integrity violations and final sanctions to the dean of the college/school;
5. to review periodically the functioning of the committee, including Standards of Academic Integrity and Procedures and Appeals to determine if changes are needed. This oversight review shall be communicated to the dean of the college/school;
6. to work with relevant student groups to develop workshops to promote and maintain academic integrity.

Membership

The dean of the college/school will solicit nominations for membership, including substitute faculty and students. The dean will forward a list of recommendations to the Office of the Provost, who will then appoint three faculty, three students, and one administrator from the college/school to serve on the committee, and the provost's office will identify substitute faculty and students who are willing to serve, if needed. The committee will be chaired by one member selected by the dean of the college/school from among the faculty and administrator members. Agreement to serve on the committee is a serious commitment. Faculty members will serve a term of three years, and student members will serve a term of two years with an initial staggering of terms to ensure continuity. The chair

of the committee will serve in that capacity for a one-year period with the possibility of yearly renewal. The committee membership is posted on the University web site in the section on Academic Integrity Policy.

Case Reviews

Case reviews are to be conducted by a quorum comprised of the AIC chair, two (additional) members of the faculty/administrator group, and two student members. The chair will verify members' attendance. A member of the AIC may be excused from a particular case review when a conflict of interest is disclosed to the chair. In the event that an academic integrity violation is filed against a senior just prior to graduation and the student challenges the instructor's claim, the chair of the AIC is empowered to convene an emergency ad hoc committee during senior week. This ad hoc committee will consist of two faculty and two students. Initially, the AIC membership will be contacted, but if they are not available, any faculty member and any student in the college/school may be asked to participate to ensure that two faculty and two students are present. The ad hoc members will be asked to sign the confidentiality statement.

Confidentiality

Faculty, administrators, and students engaged in academic integrity procedures involving academic integrity violations shall treat as confidential all information disclosed during such procedures, as well as the fact of occurrence of the case review. Persons nominated to the AIC as members will be permitted to serve only after they sign a nondisclosure agreement that limits the discussion of cases to committee members and the college/school deans on a need-to-know basis only.

IV. Procedures and Timeline for Academic Integrity Violation Reporting

Instructors are required to report any academic integrity violations they detect in their classes. This information is kept on file until students graduate in order to determine if multiple infractions have occurred.

- A. As soon as an academic integrity violation is identified, the instructor shall contact the student to schedule an in-person meeting to discuss the basis for the suspected violation and the sanction(s) to be imposed according to the Academic Integrity Policy Statement (Section VI). For charges at the end of the spring semester, when there may not be an opportunity to meet with the student, this process may be completed by teleconference. However, discussions over electronic mail may be disadvantageous to students in regards to comprehension and educational value. Therefore, in the event that an in-person meeting or teleconference is not immediately feasible, the process can be put on hold until classes resume. If a meeting with the student will be held in the fall instead, this should be determined by the instructor, with consultation from the respective Chair of the AIC, before the June deadline for finalizing NGRs; at that point the Chair can ask that this period be extended if given sufficient details from the faculty member.
- B. Prior to meeting with the student, the instructor shall fill out an Academic Integrity Violation Report and attach the appropriate documentation, including the syllabus.
- C. During the in-person meeting, both the instructor and student will sign the report. When signing the report, the student will be asked to either acknowledge that they have committed a violation of the Academic Integrity Policy and accept the instructor's sanctions, or indicate that they intend to challenge the instructor's claim that

they have committed an academic integrity violation. The student cannot challenge the instructor's sanction for the offense (see section below: The Student Challenge and Case Review). Failure of the student to sign the report without an expressed challenge made to the instructor's claim shall be deemed an acknowledgement of the violation and an acceptance of the sanction(s).

- D. Immediately following the meeting, the Academic Integrity Violation Report and documentation will be sent directly to the chair of the AIC of the school offering the course. The chair of the AIC will then notify the committee members that an Academic Integrity Report has been filed and apprise the members of the student's signed statement.
- E. If the student has signed an affirmative statement of violation and acceptance of the instructor's sanctions in accordance with this Policy Statement, the dean's office of the student's home college/school will be notified as such. Under this circumstance, no case review by the AIC will be held and the case report is sent directly to the dean/associate dean of the student's home college/school.
- F. When a charge is challenged, the instructor will file a grade of NGR pending the actions of the AIC and notification from the AIC chair of any relevant sanction (e.g., an F for the course; see Section VI) that is imposed by the dean/associate dean of the home college/school.

The Student Challenge and Case Review

- G. If the student indicates on the Academic Integrity Violation Report that they intend to challenge the instructor's claim, he or she must declare that intent to the AIC chair in writing within two weeks of the initial conference between the instructor and the student. This challenge declaration must include a descriptive statement that explains the student's reasons for the challenge.
- H. Upon receipt of the student's declaration to challenge, the AIC chair in consultation with the department/area chair or program director will seek a second reviewer in order to conduct a blind review of the Academic Integrity Report and the student's letter. The reviewer should be a member of the department or interdisciplinary program from which the report originated. The second reviewer will submit his or her evaluation to the chair of the AIC. A second reviewer from outside the university will be utilized only when circumstances warrant.
- I. Upon receipt of the second reviewer's evaluation, the chair shall schedule a case review (Section 3.C) with the AIC members.
- J. The AIC will review the case materials and the written statement (Section 4.F) of the student. After reviewing these, the committee will deliberate and vote on whether a violation has occurred. The AIC chair will notify the student, the instructor, and, in cases of a decision upholding the charge, the dean of the student's home college of the committee's evaluation.

Administration of Sanctions

- K. Upon receipt of the AIC case report (accepted charges) or at the completion of the AIC review (challenged charges), the assistant or associate dean of the student's home college/school will meet with the student to discuss the evaluation of the AIC case review and impose the sanctions described in Section VI according to the level of offense. The dean will also warn the student of sanctions for any future offenses. A report of the imposed sanctions will be made to the AIC for its records.

Record Keeping

- L. The AIC will keep for its records and analysis all reports and actions taken by the committee. These records are education records and subject to federal rules and regulations outlined in FERPA (Family

Educational Rights and Privacy Act). Records kept for the purpose of analysis and program evaluation by the AIC will have all personal identifying information removed.

V. Procedure for a Student to Report on an Academic Violation

If a student witnesses a violation of academic integrity or otherwise has reason to believe that a violation has occurred, he or she may choose among several possible courses of action.

1. Talk with the student urging him or her to report himself or herself to the instructor of the course or to the chair of the AIC.
2. Discuss the observed action with the instructor, not naming those involved, to obtain guidance and determine if an observed act merits action under the Academic Integrity Policy.
3. Submit a written report to the chair of the AIC. If the student wishes to remain anonymous, the AIC will honor that request during the initial inquiry prior to a case review.

VI. Sanctions for Violations of Academic Integrity

If a student is found in violation of academic integrity standards while an undergraduate at Fordham University, the following sanctions shall be imposed:

A. First Offense

1. The student shall receive an F on the assignment/examination, unless otherwise specified by the instructor. The student may in addition receive an F in the course at the discretion of the instructor.
2. The case shall be documented in the student's file, where it will remain until the time of the student's graduation from the college/school, at which time the material will be removed from his or her file. Any records kept for the purpose of analysis and program evaluation by the AIC and not destroyed will have all personal identifying information removed.

B. Second Offense

1. The student shall receive an F for the course and shall be subject to suspension or expulsion from the college/school, at the discretion of the dean. If the student is expelled, the notation—Withdrawn by the University—will appear on their transcript.
2. The case shall be documented in the student's file, where it will remain until the time of the student's graduation from the college/school, at which time the material will be removed from their file. Any records kept for the purpose of analysis and program evaluation by the AIC and not destroyed will have all personal identifying information removed.

C. Third Offense

If a student is found guilty of a third violation of academic integrity, the student will receive an F for the course and will be expelled from the University, at the discretion of the dean. If the student is expelled, the notation—Withdrawn by the University—will appear on their transcript.

For any offense, in the event that the student receives an F in the course as the penalty and elects to withdraw from the course prior to the withdrawal deadline, the student shall receive the grade of WF, a grade

that is equivalent to an earned F in the cumulative quality point index, if the penalty is accepted or upheld after a challenge.

VII. The Right to Grieve Grades in Relationship to Violations of Academic Integrity

Any other grades given for work in the same course, unless the grade itself is the sanction, can be grieved in accordance with the established college/school policy only after any and all questions of violations of academic integrity have been resolved through the processes stated above.

The complete policy and the Academic Integrity Violation Report is available on the University website.

University Policies

- Affirmative Action Policy (p. 30)
- Campus Safety (p. 30)
- Equity in Athletics Disclosure Act (p. 30)
- Nondiscrimination and Director of Gender Equity/Title IX Coordinator (p. 30)
- Numbering of Undergraduate Courses (p. 30)
- Recruitment of Jesuits to the Faculty (p. 31)
- Reserved Rights (p. 31)
- Student Records (p. 31)
- Support Services for Students with Disabilities (p. 32)
- University Code of Conduct (p. 33)

Affirmative Action Policy

The University continues its commitment to affirmative action in employment by providing the means to recruit, employ, and promote women and other underrepresented minorities in the interest of attaining a workplace that closely resembles the available qualified labor pool. The Office of Human Resources Management is available to all employees of Fordham University for consultation, training, and development of those methods and initiatives that advance a diversified workforce, and ensure nondiscrimination, access to equal employment opportunities, and fair treatment of individuals. It is the responsibility of the Vice President of Human Resources to monitor and report regularly on the University's efforts to achieve diversity and compliance with all laws pertaining to nondiscrimination in employment.

Campus Safety

The Advisory Committee on Campus Security will provide upon request all campus crime statistics as reported to the U.S. Department of Education. The U.S. Department of Education Website is www.ed.gov. Fordham University provides campus crime statistics on its website. Requests for a hard copy can be directed to the University Associate Vice President for Public Safety by phone at 718-817-2222 or in writing at

Associate Vice President
Public Safety
Thebaud Annex
Fordham University
441 East Fordham Rd.

Bronx, NY 10458

For more information

Visit the Public Safety web page.

Equity in Athletics Disclosure Act

In accordance with the "Equity in Athletics Disclosure Act," information regarding the intercollegiate athletics program is available for review at the following website:

<https://ope.ed.gov/athletics/#/>

Nondiscrimination and Director of Gender Equity/Title IX Coordinator

Fordham University is committed to maintaining a community in which its members live, work, and learn in a safe and respectful environment that is free from all forms of sex- and gender-based discrimination. This commitment applies to all members of the Fordham community regardless of race, color, national origin, religion, creed, age, ability, sex, gender, gender identity, gender expression, sexual orientation, familial status, pregnancy, predisposing genetic characteristics, military status, domestic violence victim status, criminal conviction, or any other protected class recognized under federal, state, or local law.

The University's Director of Gender Equity/Title IX Coordinator oversees the University's gender equity and Title IX compliance efforts and is responsible for coordinating the University's response to all reports of sexual and related misconduct, including sex- or gender-based discrimination involving educational programs, gender equity in athletic programs, employment, and admission. The Director of Gender Equity/Title IX Coordinator also collects data from all University reports of sex- and gender-based discrimination to identify and address any patterns or systemic issues that may arise, and collects data to analyze the outcome of reports involving sex- and gender-based discrimination. Fordham will take prompt and effective steps to end sexual and related misconduct, eliminate the hostile environment, prevent its recurrence, and remedy its effects.

Inquiries concerning the application of Title IX and its implementing regulations and/or the application of the gender equity provisions contained in the Sexual and Related Misconduct Policy and Procedures for the Fordham University Community may be referred to the University's Vice President for Human Resources and Interim Title IX Coordinator, Kay Turner, Esq., by email at titleix@fordham.edu or by dialing 718-817-4930.

The Office of Human Resources Management oversees the University's enforcement of anti-discrimination and anti-harassment in employment (Title VII, New York State Human Rights Law, and New York City and Westchester Human Rights Laws) and non-gender based anti-discrimination and anti-discriminatory harassment of students (Title VI). Inquiries concerning these issues may be referred to the Office of Human Resources Management at hr@fordham.edu or by dialing 718-817-4930.

Numbering of Undergraduate Courses

All undergraduate courses are numbered between 1000-4999. Introductory-level courses are numbered 1000-1999. Courses numbered

2000-4999 are intermediate/advanced-level courses. Courses ending in "999" denote a tutorial/independent study.

Recruitment of Jesuits to the Faculty

As a Jesuit, Catholic institution, Fordham University aims to create a community that is ever more diverse, committed, and deeply engaged in New York City and beyond. Grounded in the Jesuit tradition, we seek new ways to live out our mission in contexts very different from that in which Fordham was founded. Moreover, the Society of Jesus, the religious community that has helped sustain Fordham since 1846, itself shares in this attempt to respond to our times with creativity, confidence, and integrity.

Fordham University has been indebted to the presence and work of so many Jesuits throughout its history, and yet it has thrived, especially in the past 50 years, on account of a great variety of colleagues of diverse intellectual, philosophical, cultural, and religious commitments. We hope that all members of the Fordham faculty will find in our Jesuit, Catholic tradition opportunities for joyful and meaningful work.

We do not expect to return to a time when a large part of Fordham's workforce consisted of members of the Society of Jesus. And yet we recognize that excellent Jesuit colleagues, while few, continue to search not only for employment as teachers and scholars but also for a way specifically to contribute to the mission and identity of places like Fordham. Some have, in fact, been our own students, yet many more come from more national or international contexts than ever before. We continue to seek out those interested in being fine colleagues, teachers, scholars, administrators, pastors, and citizens of the University.

At any point, the number of Jesuits finishing terminal degrees or otherwise prepared to enter an academic position at Fordham is not large. Yet those who are so prepared stand to make an important contribution to our shared purpose and to give unique witness to the kind of educational values Fordham has long embraced.

For this reason, the recruitment and hiring of highly qualified Jesuits is considered an institutional priority. In an effort to clarify and make more transparent processes by which that can be done, a protocol has been established as identifying basic "rules of engagement" for those entities at the University that may wish to recruit a Jesuit for a position. This document applies only to Jesuits considered for full-time academic positions, either tenure-line or non-tenure-line.

The protocol document is available from the Office of the Provost and the Dean of Arts and Sciences.

Reserved Rights

The University reserves the right, at its discretion, at any time, to deny matriculated status, to cancel a student's registration, to refuse to award academic credits, or to deny or rescind a certificate or a degree in accordance with the University Statutes and its academic policies. All forms of dishonesty, including cheating and plagiarism, will result in appropriate disciplinary action, including denial or revocation of a degree or certificate.

Student Records

Notification of Rights Under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords enrolled students certain rights with respect to their education records. A student

is considered enrolled at Fordham University as of the first day of classes of the earliest term of the academic year in which the student is registered.

First time applicants to the University are not considered enrolled students until they are officially registered and attend the first day of classes. Requests for inspection of student records under FERPA cannot be considered until an individual is an enrolled student.

These rights include:

1. The right to inspect and review your education records within 45 days of the day Fordham University receives a written request for access. If you want to review your record, you should submit a request to the Office of Academic Records. Indicate the record(s) you wish to inspect. A University official will make arrangements for access and notify you of the time and place where the records may be inspected.
2. The right to request an amendment of your education record if you believe it is inaccurate or misleading. If you feel there is an error in your record, you should submit a statement to the University Registrar clearly identifying the part of the record you want changed, and why you believe it is inaccurate or misleading. A University official will notify you of their decision and advise you regarding appropriate steps if you do not agree with the decision.
3. The right to consent to disclosures of personally identifiable information contained in your education records, except to the extent that FERPA authorizes disclosure without consent. One exception which permits disclosure without consent is disclosure to school officials with "legitimate educational interests." A school official has a legitimate educational interest if the official has a "need to know" of information from your education record in order to fulfill his or her official responsibilities.
 - a. Examples of people who may have access, depending on their official duties, and only within the context of those duties, include: Staff employed by the University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, collection agent, contractor, consultant, volunteer, or technology provider), or other outside parties under the direct control of the University with respect to the use and maintenance of education records; a person serving on the Board of Trustees; or a student employed by the University or serving on an official committee, such as on a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Fordham University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is:

Student Privacy Policy Office (SPPO)
U.S. Department of Education
400 Maryland Avenue, SW
Washington, D.C. 20202-5920
Phone: 1-800-USA-LEARN (1-800-872-5327)

FERPA also protects course recordings, as outlined in the Class Recording Notice and Related Policy.

A copy of the Act, more details about your rights, and any University policies related to the Act are available from the Office of Academic Records at this page.

Questions concerning FERPA should be referred to the Office of Academic Records or the Office of Legal Counsel.

Directory Information

Release of student record information is generally not done at Fordham University without the expressed, written consent of the student. There are, however, some exceptions.

For example, Fordham University, at its discretion, may release the following Directory Information without the student's consent: student's name, address, telephone number, electronic mail address, Fordham ID Number (FIDN), photograph, date and place of birth, major field of study, dates of attendance, grade level, enrollment status (e.g. undergraduate or graduate; full-time or part-time), participation in officially recognized activities and sports, weight and height of members of athletic teams, degrees, honors and awards received (e.g., Dean's List recognition), and the most recent educational agency or institution attended, and other such similar information.

Please note that you have the right to withhold the release of directory information. To do so, you must complete the Educational Record Sharing (FERPA) Block form, also available on the Fordham.edu "Students" page under "Electronic Forms." Please note two important details regarding placing a "No Release" (FERPA Block) on your record:

- Fordham University receives many inquiries for directory information from a variety of sources outside the institution, including friends, parents, relatives, prospective employers, scholarship programs, the news media and honor societies. Having a "No Release" on your records will preclude release (block the sharing) of such information, even to those people.
- A "No Release" applies to all elements of directory information on your record. Fordham University does not apply a "No Release" differently to the various directory information data elements.

Dependent Status of Undergraduates

Generally, undergraduate students are considered holding "dependent" status unless written notification and adequate documentation of "independent" status has been submitted to the Office of Academic Records—Enrollment Group.

Veteran Information

Veterans and veteran dependents enrolled at Fordham University utilizing education benefits programs—such as Post 9/11 GI Bill[®], Montgomery GI Bill[®]-Active Duty, Montgomery GI Bill[®]-Selected Reserve, and Survivor's and Dependents' Education Assistance (DEA-Chapter 35)—must present their Certificate of Eligibility (COE) and DD214 (if applicable) to the military/veteran school certifying officials at the time of registration or as soon as possible thereafter. Those utilizing the Veteran Readiness and Employment (VR&E) Chapter 31 benefit should ensure that their counselor has authorized them for the semester and should inform the Fordham school certifying officials. Please refer to the VA website, www.gibill.va.gov, for eligibility criteria as well as type of education or training benefits available under each program. **The VA can also be reached at 888 442-4551.** Veterans who do not have such a letter (COE) must follow the same procedure for payment of tuition as

all other students. Specific tuition questions should be directed to the Financial Aid office of your home school.

All students using a VA education benefit will need to complete an **Enrollment Certification Request for Veteran Benefits** form. It is located on the student portal under Electronic Forms. It is to be submitted **after registration is complete for the term**. If you do not submit it, we will not know to certify you with the VA. For access to the form, please refer to:

https://myapps.web.fordham.edu/site/web/content/hyland/veterans_gibill.jsp

For information on Fordham University's participation in the Post 9/11 GI Bill[®] Yellow Ribbon Program, please refer to the Fordham website.

Support Services for Students with Disabilities

The Office of Disability Services (ODS) works closely with students, faculty, and administrators to ensure appropriate services for students with documented disabilities in accordance with Section 504 of the Federal Rehabilitation Act of 1973 and Title III of the Americans and Disabilities Act of 1990. Students who register with ODS will complete the same coursework as their peers, and registration does not become a part of a student's transcript. The University will make every attempt to provide reasonable accommodations to students who have a documented disability.

Please visit our webpage for new students. There, you will find the application, documentation upload instructions, and how to schedule your intake. If you have further questions, you can contact ODS by calling either our Rose Hill office (718-817-0655) or Lincoln Center office (212-636-6282). Both offices are open Monday to Friday from 9 a.m. to 5 p.m. Please note that a student is not eligible to receive any academic accommodations until formally registered via a completed intake appointment. Accommodations are not made retroactively, so it is best to contact ODS to begin this process the summer before entering Fordham. If a new, incoming student has one of the following types of disabilities: physical mobility, visual impairment, or a hearing impairment, it is essential to contact ODS by July 2 in order to ensure that accommodations can be put in place before classes begin in September. Please do not send documentation of a disability to the admissions office. Any information regarding a student's 504 Plan or IEP must be sent directly to ODS.

Students seeking a substitution for the foreign language core through the Office of Disability Services must complete the process by the end of their first semester at Fordham. Applying for the substitution does not guarantee you will be approved for this accommodation as this accommodation is the only one that changes degree requirements and therefore eligibility is jointly determined by ODS and the dean's office.

Applicants who have been accepted for admission, or current students who are seeking accommodation(s) for a disability, should contact the Office of Disability Services at the following locations:

Lincoln Center Campus
Lowenstein Room 408
212-636-6282

Rose Hill Campus
O'Hare Hall, Lower Level

718-817-0655

Westchester or online graduate students should contact the Rose Hill office at 718-817-0655.

For more information

Visit the Disability Services web pages.

University Code of Conduct

Rationale for University Discipline

The reasonableness of university discipline must be judged in its relation to the educational purposes of the university. If those purposes may be described as the pursuit of truth and the advancement of knowledge, university discipline exists to assure a setting wherein those purposes may be achieved.

The educational purposes of the university can best be protected through the clear communication and enforcement of certain standards of behavior judged essential to the achievement of those purposes. What follows is a statement of these standards of behavior developed through the cooperative efforts of the students, faculty, and administrative officers.

Jurisdiction

Persons: This Code shall apply to every member of the Fordham University community which includes faculty, students, administrative officials, and staff.

When any individual accused of violation of this University Code of Conduct maintains more than one of the above-mentioned statuses in the University, determination of his/her status in a particular situation will be made in the context of the surrounding facts.

Violations

The following actions are considered violations of the University Code of Conduct and are punishable by sanctions imposed in accordance with the published judicial procedures of the University:

1. All forms of dishonesty including cheating, plagiarism, supplying false information to any University official, as well as forgery or use of University documents or instruments of identification with intent to defraud.
2. Theft from or damage to University property and/or theft of, or damage to the property of another while located on property of the University. Knowingly receiving, retaining or disposing of the lost or mislaid property of a member of the University community or of the University itself.
3. Unauthorized entry, use or occupation of University facilities as well as the unauthorized possession, duplication or use of keys to University facilities.
4. Tampering with or misusing fire alarms, fire-fighting equipment or safety equipment.
5. Harassment (verbal or other) or physical abuse, threatening or attempting to inflict physical injury, or creating substantial risk of such injury to another member of the Fordham University community or to any person on University premises.
6. The unauthorized selling, purchasing, producing, or possessing of any lethal weapons, explosives, fireworks, or incendiary devices.
7. The unauthorized selling, purchasing, producing, possession or use of barbiturates, amphetamines, marijuana, hallucinogens, opiates, or other addictive and illegal drugs or drug paraphernalia.
8. Engaging in, or inciting others to engage in, conduct which interferes with or disrupts any University function, or which prevents or limits the free expression of ideas by others, or which physically obstructs or threatens to obstruct or restrain other members of the University community or visitors.
9. Failing to surrender upon request by clearly identified University personnel (this includes campus security guards) in the performance of their assigned duties, the University identification card which all members of the University community are required to carry.
10. Engaging in lewd, licentious or disorderly conduct.
11. Failing to comply with the direction of clearly identified University personnel (this includes campus security guards) in the performance of their assigned duties.
12. Violation of published University regulations including but not limited to those regarding motor vehicles, residence halls, and the McGinley Center.

For more information

Visit the University Code of Conduct page.

Withdrawal from the University and Leaves of Absence

Students who find it necessary to withdraw from the University should promptly file the required forms in the office of the dean of their college.

Withdrawal procedures should not be started without prior consultation with the class/advising dean. Refunds for withdrawals will be calculated on the basis of the date when the required written approval for withdrawals is received in the Office of Academic Records. (See Refund Policies and Procedures (p. 24).) Once withdrawn, students must apply for readmission through their college dean's office.

Veteran or ROTC students should be aware that if they are using any military education benefit, withdrawal from the University (which may involve withdrawal from classes) may create a debt with the VA, their Service Branch, **or** Fordham. Before withdrawing from the University, veteran students should consult with the VA Certifying Officials in the Office of Academic Records, and ROTC students should consult with their respective ROTC program.

Leave of Absence

Students in good standing may request a one-semester leave of absence (renewable on written request, and at the dean's discretion, for one additional semester). To request a leave of absence, a student must submit the leave of absence form to the appropriate advising dean, class dean, or advisor, indicating the reason (e.g., illness, family crisis) for the request. Late requests for a leave of absence cannot be accepted. The dean of the student's college, acting on a case-by-case basis, will have sole authority to grant leave requests. During a leave of absence and at least one month prior to the subsequent semester, the student must inform the advising dean in writing of an intention to return. The advising dean of the student's college, upon approval by the dean of the college, will inform the Office of Academic Records each time a leave is granted and also on receipt of written notice of intention to return.

Readmission

Students seeking readmission to Fordham University after a withdrawal or leave of absence should contact their college's advising dean regarding the reapplication or re-entry process.

Core Curriculum

Fordham's Core Curriculum is a central part of its larger mission and identity as a university in the Catholic and Jesuit tradition preparing its students for responsible leadership in a global society. The "core" plays a key role in the undergraduate curriculum as a whole. As students' majors and electives allow specialization and individualization in their studies, the Core Curriculum assures that every student's undergraduate education is anchored, as a whole, in the liberal arts. The Core Curriculum provides an ongoing developmental context for students' studies and a framework for the entire undergraduate education.

NOTE: Gabelli (p. 85), PCS (p. 100), FCRH Honors (p. 68), FCLC Honors (p. 79), and BFA (p. 226) students should refer to their respective sections of this bulletin to guide their selection of liberal arts core courses.

At the heart of Fordham College's academic program is the core curriculum. These courses are designed to nurture curiosity, inspire a love of learning and provide you with the foundation needed to engage in lifelong learning. In every core course, you think, speak, write, and act in fundamentally new ways, with a broadened appreciation for human values and a deepened commitment to the world. At its heart, is the practice of *Eloquentia Perfecta*, where students learn right use of reason joined to cultivated expression.

The Core Courses:

- Expose you to new intellectual vistas
- Enhance your understanding of ways of knowing within academic disciplines
- Allow you to make connections among various disciplines
- Develop writing, research, and quantitative and analytical skills

As a Jesuit university, Fordham helps you shape habits of heart and mind that are the hallmarks of liberally educated men and women. Our core curriculum blends reverence for tradition with openness to new challenges, and new ways of knowing and engaging the world.

Requirements

Initial Courses (p. 60)

The initial courses of the Core Curriculum begin the process of attaining the above goals and objectives with an emphasis on language mastery (English composition and foreign language preparation).

- ENGL 1102 Composition II
- Foreign Language and Literature (p. 60)

Disciplinary Ways of Knowing and Concepts (p. 52)

The second step of the core curriculum continues the development of writing and oral expression as well as social awareness in the study of ways of knowing characteristic of liberal arts disciplines.

- Mathematical/Computational Reasoning (p. 52): One required course
- Natural Science (p. 52): Two courses: Physical Science and Life Science
- PHIL 1000 Philosophy of Human Nature
- THEO 1000 Faith and Critical Reason
- Fine and Performing Arts (p. 53): One required course
- Texts and Contexts (p. 54): One required course
- Understanding Historical Change (p. 54): One required course
- Social Sciences (p. 54): One required course

Advanced Disciplinary Study (p. 35)

The third phase enables students to deepen and extend their disciplinary study and enrich their major courses, which they will be taking concurrently, through a diverse spectrum of advanced courses, thereby assuring the achievement of intellectual perspective with breadth. The following upper-level courses will build on the knowledge, skills, and methodological foundations of the disciplinary introductions to develop and extend their awareness of questions and approaches outside their majors. Courses at this level will generally be numbered in the 3000 range and may be taken when students have completed the introductory disciplinary courses in the area, beginning in sophomore year.

- PHIL 3000 Philosophical Ethics
- Sacred Texts and Traditions (p. 35): One required course
- Advanced Disciplinary Courses: Two required courses:
 - an advanced literature course (p. 36) and an advanced history course (p. 42); or
 - an advanced history course (p. 42) and an advanced social science course (p. 45); or
 - an advanced social science course (p. 45) and an advanced literature course (p. 36).

Capstone Courses (p. 48)

The final stage of learning through the core curriculum builds on themes introduced in earlier courses. One course completes the sequence of courses in literature, history, and/or social science, and enables students to recognize interrelations among disciplinary ways of knowing through interdisciplinary study. The second course reflects on the infusion of values in knowledge and human life, thereby forming a broader perspective that will provide a framework for the development of socially responsible wisdom after graduation. Courses at this level will be numbered in the 4000 range, and may be taken when students have completed or are completing the Advanced Disciplinary courses.

- Interdisciplinary Capstone in Literature, History, and/or Social Science (p. 48): One required course
- Values Seminar (p. 50): One required course

Distributive Requirements (p. 55)

Finally, students must complete a set of distributive requirements across their four years at Fordham.

- Eloquentia Perfecta (p. 55) Seminars: Four required courses
- Global Studies (p. 55): One required course
- American Pluralism (p. 58): One required course
- Community-Engaged Learning (p. 60): One encouraged course

Advanced Disciplinary Study

Philosophical Ethics

One Required Course

This course involves philosophical reflection on the major normative ethical theories underlying moral decision making in our everyday lives. The principal focus of the course is a systematic introduction to the main normative ethical theories, i.e., eudaimonism, natural law ethics, deontological ethics, utilitarianism, virtue ethics, and feminism. The differences among these approaches are illuminated by studying various moral issues. In each section of the course, at least half the readings will be selected from Aristotle and Kant. Each section will include writings by at least one contemporary figure.

Course	Title	Credits
PHIL 3000	Philosophical Ethics	3

Sacred Texts and Traditions

One Required Course

The second theology course, selected from a group of offerings called Sacred Texts and Traditions, builds on the foundation of critical reasoning about traditions in the first theology course through analytical study of one religious textual tradition. The sections of this course will offer students a variety of texts from which to choose. All sections will draw on the disciplines of history, literary analysis, and theology, interpreting religious traditions and texts as both historically embedded and always evolving responses to the experience of the transcendent in human life.

The following courses have the STXT (Sacred Texts and Traditions) attribute:

Course	Title	Credits
HPLC 2811	Honors Sacred Texts	3
THEO 3100	Introduction to Old Testament / Tanakh	3
THEO 3102	Book of Genesis	3
THEO 3105	The Torah	3
THEO 3120	The Prophets	3
THEO 3130	Bible as Migration Literature: Then and Now	4
THEO 3200	Introduction to New Testament	3
THEO 3207	The First Three Gospels	3
THEO 3212	Gospel of John	3
THEO 3250	Jesus in History and Faith	3
THEO 3300	Who Cares About the Bible?	3
THEO 3310	Early Christian Writings	3
THEO 3314	St. Augustine of Hippo	3
THEO 3316	Byzantine Christianity	3
THEO 3317	Women of the Christian East	3
THEO 3320	Augustine, Aquinas, and Luther	3
THEO 3330	Medieval Theology Texts	3
THEO 3332	Christians, Muslims, Jews in the Medieval Period	3
THEO 3335	Queer Interpretations of Sacred Texts and Theology	3
THEO 3340	Christian Mystical Texts	3
THEO 3345	The Book of Revelation	3
THEO 3350	Apocalyptic Literature: Ancient & Modern	3

THEO 3360	Reformation Texts	3
THEO 3361	Protestant Texts	3
THEO 3365	Pentecostal Christianity	3
THEO 3371	The American Transcendentalists: Spirituality Without Religion	3
THEO 3375	American Religious Texts and Traditions	3
THEO 3376	Spirituals, the Blues, and African-American Christianity	3
THEO 3380	US Latinx Spiritualities	3
THEO 3383	Latin American Liberation Theologies	3
THEO 3390	Church in Controversy	3
THEO 3542	Catholic Social Teaching	3
THEO 3546	The Bible and Social Justice	3
THEO 3605	Scripture and the Human Response to Trauma	3
THEO 3610	Christ in World Cultures	3
THEO 3611	Scripture and the Struggle for Racial Justice	3
THEO 3620	Great Christian Hymns	3
THEO 3652	Liturgy That Does Justice	3
THEO 3655	The Journey of Faith: Autobiography as Sacred Text	3
THEO 3711	Sacred Texts of the Middle East	3
THEO 3712	Shari'ah (Islamic Law)	3
THEO 3713	Classic Jewish Texts	3
THEO 3715	Classic Islamic Texts	3
THEO 3716	Islam and Modernity	3
THEO 3720	Hindu Literature and Ethics	3
THEO 3723	Tibetan Religion: Visionary Experience	3
THEO 3724	Classic Buddhist Texts	3
THEO 3725	Buddhism in America: A Multimedia Investigation	3
THEO 3728	Buddhist Meditation	3
THEO 3731	Japanese Religions: Texts and Arts	3
THEO 3733	Chinese Religions	3
THEO 3785	Spiritual Exercises and Culture	3
THEO 3854	Ignatian Spirituality	3
THEO 3882	Comparative Mysticism	3
THEO 3884	Sufism: Islam's Mystical Tradition	3

Advanced Disciplinary Courses

Two Required Courses

Following the introductory literature, history, and social science courses, these courses will enable the student to achieve a sharper focus and more detailed knowledge of complex literary, historical, and social methods, materials, interactions, and processes. To fulfill the requirement, two advanced disciplinary courses will be chosen from two different disciplines:

- an advanced literature course and an advanced history course; or
- an advanced history course and an advanced social science course; or
- an advanced social science course and an advanced literature course.

They will be taken before or simultaneously with the capstone requirements.

Advanced Literature Core Courses

The following courses have the ALC (advanced literature core) attribute:

Course	Title	Credits
AAST 3357	Writing Asian America	4
AAST 3359	Asian Diasporic Literatures	4
AAST 3647	Seeing Stories: Reading Race and Graphic Narratives	4
AAST 3838	Postcolonial Literature and Film	4
AFAM 3693	Contemporary African Literatures	4
AMCS 3320	The Writing Irish	4
AMCS 3333	American Catholic Fictions	4
AMCS 3535	Building the Ideal City: Ethics and Economics Foundations of Realizable Utopias	4
ARAB 2400	Approaches to Arabic Culture	4
ARAB 3000	Topics in Arabic Cultures	4
ARAB 3010	Human Rights in Arabic Literature	4
ARAB 3040	Topics in Arabic Literature	4
COLI 3010	Politics and Poetry in the Middle Ages: The Rise of Vernacular Culture in the Mediterranean	4
COLI 3031	Medieval Monsters	4
COLI 3102	Notre Dame de Paris: The Cathedral in Art, Literature, Culture, & History	4

Capstone Courses

Interdisciplinary Capstone in Literature, History, and/or Social Science

One Required Course

For this capstone in the literary, historical and social scientific sequence, courses will use interdisciplinary study to examine the role of disciplines in knowledge formation. Each course will feature at least two disciplines that conceive and study a common topic or problem. The Interdisciplinary courses will be team taught by professors representing contrasting disciplines, or taught by a single individual who has expertise in both disciplines. One discipline featured in each interdisciplinary course must use methods that are literary, historical, or based on a social science, which may include participants from English, history, the social sciences, classics, African and African American studies, languages and cultures, and interdisciplinary programs. The second or other disciplines in each course must be different from the first, but may be literary, historical, social scientific, or drawn from any other discipline, such as the sciences, fine arts, philosophy or theology.

The following courses have the ICC (Interdisciplinary Capstone Core) attribute:

Course	Title	Credits
AAST 4150	Race and Contemporary Film	4
AAST 4600	Anger in Asian American Literature and Culture	4
AAST 4603	Asian American Critique	4
AAST 4616	Contemporary Issues in Asian America	4
AFAM 4105	Queer Caribbean and Its Diasporas	4
AFAM 4147	Food and Globalization	4
AFAM 4148	Race, Religion, and Politics: Catholic and Civil Rights	4
AMCS 4950	Christianity and Gender/Sexual Diversity: Interdisciplinary Perspectives	4
AMST 4010	Approaches to American Studies	4
ANTH 4004	Art Worlds: Anthropology and Sociology Perspectives	4
ANTH 4006	Palestinian Culture at Home and in Diaspora	4
ANTH 4114	Anthropology of Health Healing and Social Justice	4
ANTH 4341	Race, Sex, and Science	4
ANTH 4344	Reproductive Technologies: Global Perspective	4
ANTH 4373	Environment and Human Survival	4

Values Seminar

One Required Course

In these courses, students will learn to identify, take seriously, and think deeply and fairly about complex ethical issues in contemporary and former times. Faculty from all departments in the Arts and Sciences will develop these capstone seminars. These small, writing intensive topical

seminars will be offered in the Eloquentia Perfecta format and fulfill the EP4 requirement (p. 55).

The following courses have the VAL (Values Seminar) attribute:

Course	Title	Credits
AFAM 4000	Affirmative Action and the American Dream	4
AFAM 4192	Race and Religion in the Transatlantic World	4
AFAM 4650	Social Welfare and Society	4
ARHI 4230	Art and Ethics: Articulating Function in the Visual Arts	4
ARHI 4562	Art and the Second World War	4
CISC 4650	Cyberspace: Issues and Ethics	4
CISC 4660	Minds, Machines, and Society	4
CLAS 4040	The Birth of Learning: Classical Education Then, Now, and in New York City	4
COLI 4420	Ethics and Intelligence	4
COLI 4570	Films of Moral Struggle	4
COMC 4360	Communication Ethics and the Public Sphere	4
COMC 4370	Ethical Controversies in 21st Century Media	4
COMC 4380	Media and Moral Philosophy	4
DANC 4000	Art and Ethics	4
STEM 4480	Digital Media and Public Responsibility	4
ECON 4110	Ethics and Economics	4
ENGL 4044	Incarceration: History, Literature, Film	4
ENGL 4096	Hobbits/Heroes/Hubris	4
ENGL 4126	Ten Short Films About Morality	4
ENGL 4135	Bible in English Poetry	4
ENGL 4141	Death in the Middle Ages	4

VART 4300	Representation in Art	4

Disciplinary Ways of Knowing

Mathematical/Computational Reasoning

One Required Course

The aim of this requirement is to develop the fundamental skills involved in mathematical and computational approaches to problem solving, reasoning, and an understanding of our world. These skills also form the basis for advanced reasoning in many areas and provide a basis for testing logic, solving problems, and evaluating mathematical and computational arguments and evidence in daily life. After completing this requirement, students will be prepared to explore quantitative and computational issues in the natural sciences, the social sciences and the humanities.

The following courses have the MCR (Mathematical/Computational Reasoning) attribute:

Course	Title	Credits
CISC 1100	Structures of Computer Science	3
CISC 1400	Discrete Structures	4
CISC 1600	Computer Science I	3
CISC 1800	Introduction to Computer Programming	3
MATH 1003	Mathematics and Democracy	3
MATH 1100	Finite Mathematics	3
MATH 1203	Applied Calculus I	3
MATH 1206	Calculus I	4
MATH 1700	Mathematical Modelling	4

Natural Science

Two Courses in Sequence: Physical Science and Life Science

Through core science courses, students will gain understanding of scientific methodology as a way of knowing and an appreciation of the social responsibility and ethics of science. By understanding how reasoning and experimental evidence lead to scientific conclusions, students will develop scientific literacy—the ability to understand the breakthroughs in science, medicine, and technology as educated, creative, responsible citizens. With knowledge of the basic principles of science, students will be able to evaluate the legal, moral, and ethical issues that will affect their lives after they graduate. In the science

courses, students will develop skills in critical thinking and discernment; qualitative and quantitative reasoning; written and oral communication; and formulation, analysis, and solution of complex problems.

Students who are not science majors may take modular or integrated courses on various topics. The physical science section, which is taken first, covers energy (kinetic and potential, electromagnetic, thermodynamics), matter (atomic and molecular structure, chemical bonding), and interactions (strong, weak, electromagnetic, gravitational). The life science sections (usually taken second) cover evolution: genetics and genetic engineering; human biology; including nervous and sensory systems; environment; and behavior and learning (classical, operant, and observational). All sections have labs. Alternatively, for those interested in a specific science – including non-science majors – this requirement may be met through a two-semester disciplinary introduction with associated labs.

In summary, students may fulfill this requirement through one of two ways:

1. One course with the PSCI attribute and one course with the LSCI attribute (for non-science majors).
2. A two-course disciplinary introduction sequence. (This option is preferred for science majors who must take such courses anyway.)

Physical Science courses for Non-science Majors

The following courses have the PSCI (Physical Science Core) attribute:

Course	Title	Credits
CHEM 1102	Drug Discovery: From the Laboratory to the Clinic	3
CHEM 1104	Chemistry and the Artistic Image	3
CHEM 1109	Chemistry of the Environment	3
CHEM 1110	Forensic Science	3
NSCI 1010	Physical Sciences: From Past to Present	3
NSCI 1020	Physical Science: Today's World	3
NSCI 2020	An Introduction to Geology	3
PHYS 1201	Introduction to Astronomy	3
PHYS 1203	Environmental Physics	3
PHYS 1207	Physics of Light and Color	3
PHYS 1242	Science Fiction Physics	3
PHYS 1350	The Physics of Climate Change	3

Life Science for Non-science Majors

The following courses have the LSCI (Life Science Core) attribute:

Course	Title	Credits
ANTH 1200	Introduction to Biological Anthropology	3
ANTH 1600	Introduction to Human Variation	3
BISC 1000	Life on the Planet Earth	3
BISC 1001	Human Biology	3
BISC 1002	Ecology: A Human Approach	3
BISC 1010	Foundations of Biology	3
NSCI 1030	Human Function and Dysfunction	3
NSCI 1040	People and the Living Environment	3
PSYC 1100	Biopsychology	3

Two-Course Disciplinary Introduction Sequences (mainly for science majors)

Course	Title	Credits
Rose Hill courses		
<i>Biology:</i>		
BISC 1403 & BISC 1413	Introductory Biology I and Introductory Biology Lab I	5
BISC 1404 & BISC 1414	Introductory Biology II and Introductory Biology Lab II	5
<i>Chemistry:</i>		
CHEM 1321 & CHEM 1331	General Chemistry I and General Chemistry Lab I	6
CHEM 1322 & CHEM 1332	General Chemistry II and General Chemistry Lab II	6
<i>General Physics:</i>		
PHYS 1501 & PHYS 1511	General Physics I and Physics I Lab	4
PHYS 1502 & PHYS 1512	General Physics II and Physics II Lab	4
<i>Introduction to Physics:</i>		
PHYS 1601 & PHYS 1511	Introduction to Physics I and Physics I Lab	5
PHYS 1602 & PHYS 1512	Introduction to Physics II and Physics II Lab	5
<i>Physics:</i>		
PHYS 1701 & PHYS 1511	Physics I and Physics I Lab	4
PHYS 1702 & PHYS 1512	Physics II and Physics II Lab	4
Lincoln Center		
<i>Introductory Biology:</i>		
NSCI 1403 & NSCI 1413	General Biology Lecture I and General Biology Lab I	5
NSCI 1404 & NSCI 1414	General Biology Lecture II and General Biology Lab II	5
<i>Concepts in Biology:</i>		
NSCI 1423 & NSCI 1433	Concepts in Biology Lecture I and Concepts in Biology Lab I	5
NSCI 1424 & NSCI 1434	Concepts in Biology Lecture II and Concepts in Biology Lab II	5
<i>General Chemistry:</i>		
NSCI 1321 & NSCI 1331	General Chemistry Lecture I and General Chemistry Lab I	6
NSCI 1322 & NSCI 1332	General Chemistry Lecture II and General Chemistry Lab II	6
<i>General Physics:</i>		
NSCI 1501 & NSCI 1511	General Physics Lecture I and General Physics Lab I	4
NSCI 1502 & NSCI 1512	General Physics Lecture II and General Physics Lab II	4
<i>Physics:</i>		
NSCI 1701 & NSCI 1511	Physics I and General Physics Lab I	4
NSCI 1702 & NSCI 1512	Physics II and General Physics Lab II	4

Philosophy of Human Nature**One Required Course**

A philosophical reflection on the central metaphysical and epistemological questions surrounding human nature, which includes discussion of some or all of the following problems: the body/soul distinction and the mind/body problem; the problem of knowledge (relativism, skepticism, the objectivity of knowledge; faith and reason); free will and determinism; and self and society (subjectivity, personhood, sociality, historicity, and tradition). At least 60 percent of each section of the course is devoted to readings from Plato, Aristotle, Augustine or Aquinas, and Descartes. Each section includes some writings by at least one contemporary figure.

Course	Title	Credits
PHIL 1000	Philosophy of Human Nature	3

Faith and Critical Reason**One Required Course**

An introduction to fundamental theological issues including the dialectic between religion and modernity that has shaped our cultural heritage, and some of the ways that various cultures and individuals have confronted the pressing questions of meaning in human life. When apposite, comparisons with religious traditions other than Christianity are made.

Course	Title	Credits
THEO 1000	Faith and Critical Reason	3

Fine and Performing Arts**One Required Course**

By seeing or hearing visual or musical works and understanding them, students learn to appreciate the non verbal and how such works both are influenced by and exercise influence on their cultural milieu. The courses take advantage of and encourage students to appreciate the extensive cultural offerings of New York City.

The following courses have the FACC (Fine and Performing Arts) attribute:

Course	Title	Credits
ARHI 1100	Art History Introduction: World Art	3
ARHI 1101	Introduction to Art History: Europe	3
ARHI 1102	Introduction to Art History: Asia	3
ARHI 1103	Introduction to Art History: Americas	3
ARHI 1104	Introduction to Art History: Africa and African Diaspora	3
ARHI 1105	Introduction to Art History: Architecture	3
ARHI 1298	Art History AP	3
ARHI 3480	Art and Architecture in London	4
MUSC 1051	Who Cares If You Listen?! Music, Culture, and the Critical Ear	3
MUSC 1100	Introduction to Music History	3
THEA 1100	Invitation to Theatre	3
THEA 3520	Producing through a Social Justice Lens	4
VART 1101	Urbanism	3
VART 1135	Visual Thinking	3

Texts and Contexts

One Required Course

The introductory core course in English literature, which may include literature in translation, will teach the arts of literary interpretation by developing techniques of close reading, an appreciation of the relations among literary works and the contexts in which they are written and read, and an ability to write critically about the interplay between text and context. The sections of this course will offer students choice among thematic and topical foci, which will be specified in each section title and spelled out in the section's description. All sections will be offered in the Eloquentia Perfecta format, which emphasizes writing and presentation and fulfill the EP2 requirement (p. 55).

The following courses have the TC (Texts and Contexts) attribute:

Course	Title	Credits
CLAS 2000	Texts and Contexts	3
COLI 2000	Texts and Contexts	3
ENGL 1004	Texts and Contexts: Upward Mobility and the Common Good	3
ENGL 2000	Texts and Contexts	3
HPLC 1201	Honors: English	3
MLAL 1010	Spanish Colonialism Through Film	3
MLAL 2000	Texts and Contexts	3

Prerequisite: ENGL 1102 Composition II

Understanding Historical Change

One Required Course

Through the introduction to the discipline of history, students will begin to achieve knowledge of the structure of societies, how they function, and how they change. Each section of the course will consider how to assess evidence, identify and evaluate differing and often contradictory explanations and arguments, and appraise the relative scale and importance of particular changes in the past. Students will be able to choose from different sections of the course, each with the title Understanding Historical Change and a descriptive subtitle, such as Ancient Greece, American History, etc.

The following courses have the HC (Understanding Historical Change) attribute:

Course	Title	Credits
AFAM 1600	Understanding Historical Change: Africa	3
CLAS 1210	Understanding Historical Change: Ancient Greece	3
CLAS 1220	Understanding Historical Change: Ancient Rome	3
HIST 1000	Understanding Historical Change: Modern Europe	3
HIST 1075	Understanding Historical Change: Renaissance to Revolution in Europe	3
HIST 1100	Understanding Historical Change: American History	3
HIST 1103	Understanding Historical Change: Fighting for Equal Rights in American History	3
HIST 1200	Understanding Historical Change: Ancient History	3

HIST 1210	Understanding Historical Change: Ancient Greece	3
HIST 1220	Understanding Historical Change: Ancient Rome	3
HIST 1240	Understanding Historical Change: The Ancient World	3
HIST 1300	Understanding Historical Change: Medieval	3
HIST 1400	Understanding Historical Change: Latin America	3
HIST 1450	Understanding Historical Change: South Asian History	3
HIST 1550	Understanding Historical Change: Modern East Asia	3
HIST 1551	Understanding Historical Change: Representations of China and The West	3
HIST 1600	Understanding Historical Change: Africa	3
HIST 1650	Understanding Historical Change: The Black Atlantic	3
HIST 1700	Understanding Historical Change: Mideast	3
HIST 1750	Understanding Historical Change: Islamic History and Culture	3
HIST 1850	Understanding Historical Change: Jews in the Ancient and Medieval World	3
HIST 1851	Understanding Historical Change: Jews in the Modern World	3
HIST 1925	Understanding Historical Change: Science and Technology	3
LALS 1400	Understanding Historical Change: Latin America	3

Social Sciences

One Required Course

Students will be introduced to the ways of knowing the characteristics of the social sciences through introductory courses in anthropology, communications, economics, political science, psychology, and sociology. The courses will usually focus on a substantive concern of the social sciences and include historical overviews, consideration of the variety of research methods typically used (especially empirical research), reviews of the major theoretical orientations and models, and real-world implications and applications to practical problems.

The following courses have the SSCI (Social Science Core Requirement) attribute:

Course	Title	Credits
AFAM 1650	Black Popular Culture	4
ANTH 1050	Anthropology Focus	3
ANTH 1100	Introduction to Cultural Anthropology	3
ANTH 1300	Introduction to Archaeology	3
ANTH 1413	Language and Culture	4
COMC 2175	Persuasion and Public Opinion	4
COMC 2329	Media Industries	4
COMC 2377	Mass Communication and Media Effects	4
COMM 1000	Fundamentals of Communication and Media Studies	3

COMM 1010	Introduction to Communication and Media Studies	3
DTEM 2459	Social History of Communication and Technology	4
ECON 1100	Principles of Macroeconomics	3
ECON 1200	Principles of Microeconomics	3
JOUR 1761	The Power of News	3
LING 1500	Introduction to Psycholinguistics	3
POSC 1100	Introduction to Politics	3
POSC 1298	Government and Politics Comparative	3
POSC 1299	Government & Politics: US	3
PSYC 1004	The Mind-Body Connection: Introduction to Behavioral Health	3
PSYC 2600	Social Psychology	4
PSYC 2601	Lab in Social Psychology	5
PSYC 2700	Infant and Child Development	4
PSYC 2710	Adolescent and Adult Development	4
PSYC 2800	Personality	4
PSYC 2900	Psychopathology	4
SOCI 1025	Sociology of American Culture	3
SOCI 1050	Sociology Focus	3
SOCI 1100	Introduction to Sociology	3
SOCI 1102	Introduction to Sociology: Health Focus	3

Distributive Requirements

Eloquentia Perfecta Seminars

Four Required Courses

Eloquentia Perfecta (EP) seminars will dedicate at least one-fifth of class time to student writing and oral expression. Students will be expected to take four EP seminars during the undergraduate years. EP1 and EP3 apply to designated sections of individual courses, but are not listed in this bulletin. The EP2 and EP4 requirements are automatically fulfilled by completing, respectively, the Texts and Contexts (p. 54) and Values Seminars (p. 50) core requirements.

- EP1: Special sections of courses, which are reserved for first year students. Upper class transfer students are exempted from EP1.
- EP2: All sections of Texts and Contexts (p. 54) will be designated Eloquentia Perfecta 2.
- EP3: Special sections of core, major, and elective courses will be designated Eloquentia Perfecta 3.
- EP4: All Values Seminars (p. 50) will be designated Eloquentia Perfecta 4.

Courses in this bulletin that fulfill the EP2 and EP4 requirements are designated as such with the respective attribute on the course description itself. Individual sections with the EP1 or EP3 attribute are not visible in this bulletin or Degree Works because courses often have versions where EP1 or EP3 status depends on the instructor and syllabus. EP1 and EP3 sections may be found by searching for them using Browse Classes in the Registration tools in the portal.

Global Studies

One Required Course

Global Studies courses are intended to ensure that students come to respect, understand, and appreciate the significant variations in customs, institutions, and world views that have shaped peoples and their lives. Courses with a global focus may be drawn from core, major, or elective offerings. They will be applicable both to the Global Studies requirement and to the core and major requirements that a student must complete in the course of his or her college career.

The following courses have the GLBL (Global Studies) attribute:

Course	Title	Credits
AFAM 1600	Understanding Historical Change: Africa	3
AFAM 3037	Being and Becoming Black in the Atlantic World	4
AFAM 3072	Civil Wars in Africa	4
AFAM 3075	Democracy in Africa	4
AFAM 3141	Women and Social Change in Africa	4
AFAM 3142	Women, Power, and Leadership in Africa	4
AFAM 3146	African Immigrants in the United States	3
AFAM 3148	History of South Africa	4
AFAM 3150	Caribbean Peoples and Culture	4
AFAM 3188	Exploring Africa: Encounter, Expedition, and Representation	4
AFAM 3210	On the Move: Migration, Labor, and Trans-Nationalism in the African Diaspora	4
AFAM 3510	In "America's Backyard": U.S.-Caribbean Social, Political, and Economic Relations 1850-1950	4
AFAM 3530	Race, Climate Change, and Environmental Justice in the African Diaspora	4
AFAM 3667	Caribbean Literature	4
AFAM 3688	African Literature I	4
AFAM 3689	African Literature II	4
AFAM 3693	Contemporary African Literatures	4
AFAM 3955	Slavery Freedom/Atlantic World	4
AMCS 3256	Comparative Economic Systems	4
ANTH 1100	Introduction to Cultural Anthropology	3
ANTH 1300	Introduction to Archaeology	3
ANTH 1413	Language and Culture	4
ANTH 2500	Taboo: Anthropology of the Forbidden	4
ANTH 2619	Magic, Science, and Religion	4
ANTH 2770	Anthropology of Childhood	4
ANTH 2886	Anthropology of Gender and Sexuality	4
ANTH 2895	Anthropology of Capitalism	4
ANTH 3013	Anthropology of Palestinian Communities	4
ANTH 3110	Ancient Cultures of the Bible	4
ANTH 3111	New World Archaeology	4
ANTH 3260	Politics of Reproduction	4
ANTH 3343	Ghettos and Gated Communities	4
ANTH 3351	Comparative Cultures	4
ANTH 3356	Uprisings: Protest and Resistance Across the Globe	4
ANTH 3470	People and Cultures of Latin America	4

American Pluralism

One Required Course

American Pluralism courses will afford students the opportunity to develop tolerance, sensitivities, and knowledge of the following forms of American diversity: race, ethnicity, class, religion, and gender. American Pluralism courses may be drawn from core, major, or elective offerings. They will be applicable both to the American Pluralism requirement and to other core or major requirements that a student must complete in the course of his or her college career.

The following courses have the PLUR (Pluralism) attribute.

Certain sections of ENGL 2000 Texts and Contexts, COLI 2000 Texts and Contexts, and HIST 1100 Understanding Historical Change: American History may also have the PLUR attribute.

Course	Title	Credits
AAST 2528	Asian American Art	4
AAST 3000	Introduction to Asian American Studies	4

Community Engaged Learning

The central goal of Community Engaged Learning is that students will test the skills and knowledge they acquire in their courses (e.g., in the humanities, language, and sciences) through service to the community outside the University. Students will understand in advance that service hours in the community are required. Each student will be encouraged to take at least one course as an Integrated Service Course, although they will not be required to do so.

Sections fulfilling this requirement have the SL attribute. These sections are not visible on this bulletin or Degree Works because courses often have versions where SL status depends on the instructor and syllabus. SL sections may be found by searching for them using Browse Classes in the Registration tools in the portal.

Initial Courses

Composition: One Required Course

This course will build competence and confidence in the use of language for analytic, dialogic, and expressive purposes, develop basic reasoning skills and skills of close and attentive reading, enrich an appreciation of the power and importance of language, and help students learn sound practices with respect to conventions of citation, quotation, paraphrase, and documentation.

ENGL 1102 Composition II

Prerequisite: Depending on placement, ENGL 1101 Composition I may be required. To move to ENGL 1102 Composition II from ENGL 1101 Composition I, a grade of C or better is required.

Foreign Language and Literature: Core Completion

A 2000-level course in a classical or modern language other than English fulfills the language requirement. In order to achieve a level of mastery of a foreign language that will allow students to comprehend a text of average sophistication in its oral and written form and to be able to comment on it orally and in writing in a coherent and correct manner, the courses provide either a critical analysis of selected cultural and literary texts, with composition, conversation, and review of pertinent grammatical structures, or advanced reading in classical authors.

Students starting a new language will take an intensive one-semester course (three class hours, two lab hours, two tutorial hours; 5 credits) in order to accelerate their progress (1001-Introduction I). This introductory course is followed by 1501 and 1502-Intermediate I and II, and concludes with a 2000-level course that completes the core requirement. Students continuing with a language will be placed in one of the following: 1002-Introduction II (offered only in the fall), Intermediate I or II, or a 2000-level course. The starting point will be determined by their placement test, and it will take zero to four courses (1001 or 1002, 1501, 1502, 2000 level course) for completion. The language preparation courses may not be taken Pass/Fail.

Students in classical languages (Greek and Latin) take 1001/1002-Introduction I/II, 1501-Intermediate I, and 2001. Students continuing with a language will be placed in Introduction II, in Intermediate I, or in 2001. The language preparation courses may not be taken Pass/Fail.

Students seeking a substitution for the foreign language core through the Office of Disability Services must complete the process by the end of their first year at Fordham. Similarly, students with proficiency in a foreign language must provide documentation to the Associate Chair of the Languages and Cultures Department regarding competence by the end of their first year at Fordham. This documentation may include the equivalent of a high school diploma from a foreign-language-speaking country where the foreign language is the language of instruction or official certification of having attained a C1-level score from the Common European Framework exam or passing the 16-point proficiency exam at NYU with a score of 15 or higher.

Courses in languages are offered by the Classical Languages and Civilization (p. 200) or Languages and Cultures departments.

Note: SPAN 2405 Healthcare Spanish does not fulfill the language requirement.

Exemptions: Psychology majors must complete the language requirement unless they are pre-health. B.A. students in PCS do not have a language requirement unless required for their major. All other B.S. and B.F.A. students, as well as students majoring in natural science, are exempt from the language requirement.

Fordham College at Rose Hill

The oldest of the University's 11 schools, Fordham College at Rose Hill (FCRH) was founded in 1841 by the Most Reverend John Hughes, the fourth bishop and first archbishop of New York. For 133 years, the College was a college for men. In 1974, however, as a result of a merger with

Thomas More College, the University's coordinate college for women, it became coeducational.

As a four-year Jesuit liberal arts college, FCRH invites and challenges its students to develop their intellectual, volitional, and aesthetic faculties by completing a carefully integrated yet flexible liberal arts curriculum that balances core requirements with a concentration in a particular field of study. This curriculum is designed to:

- develop the faculty of clear and critical thinking and of correct and forceful expression
- impart a knowledge of scientific principles and skills; an awareness of historical perspective; an understanding of the contemporary world; and an intelligent appreciation of religious, philosophical and moral values

Through concentration on a specific discipline, the College strives to produce students who have read, reasoned, and written sufficiently in one academic discipline to have been prepared for advanced work, to have been formed by the procedures and techniques of the discipline, and to have absorbed the ideals and ambitions that rise from serious, consistent work in one field under the direction of dedicated teacher-scholars.

In pursuit of these objectives, the curriculum of FCRH is based on the classical and modern languages, the natural sciences, the social sciences, history, and the religious concepts and philosophical systems of Western civilization from ancient times to the present day.

In addition, the College intends, through its various activities, curricular and extracurricular, to contribute to the social, spiritual, and psychological formation of its students so that they will be prepared to deal with others in various walks of life. It wants to inspire in them a desire to contribute to the culture and civilization in which they live and to form in them a trained capacity for the service of their country. It believes that these purposes, and indeed all the purposes of the College, are largely secured through adherence to a well-organized curriculum of study committed to the hands of mature scholars and administered according to high standards of performance.

The College recognizes the variety of individual needs and talents of its students and at the same time recognizes their common desire to contribute to the various spheres of life in which they participate. Therefore, it offers a wide selection of programs of study, including interdisciplinary and individual concentrations designed to meet a broad diversity of interests and the rapidly expanding needs of a changing world.

Visit our website at www.fordham.edu/fcrh.

Students should consult the university-wide sections of this bulletin for more information on academic programs, policies, and procedures (p. 14).

The College Council

The College Council meets six times during the academic year. The membership includes faculty representatives for each department and interdisciplinary program that offers a major on the Rose Hill campus, the director of the honor's program, the Dean of Students and three students named by the United Student Government.

The council serves as an advisory body to the dean in formulating policies for the College and in making recommendations for University policies that affect the College.

Fordham College at Rose Hill Alumni Opportunities

All graduates of Fordham College at Rose Hill (FCRH) are members of the alumni association by virtue of their graduation. A board of interested and active alumni represents the FCRH alumni constituency. The board partners with the Office of Alumni Relations to provide opportunities that support and advance FCRH through innovative programs and events. The goal of all alumni activities is to foster lifelong relationships between alumni and Fordham and to create ways for alumni to share their talents and interests with the University.

The Office of Alumni Relations also sponsors numerous opportunities for FCRH alumni to interact with alumni from all of the schools within the University. The young alumni program focuses on the specific needs of alumni who have graduated within the last 10 years. The regional club program maintains Fordham's national alumni network. The cultural program capitalizes on the unique benefits of New York City for metro area alumni. Rampass, the alumni I.D. card, affords alumni special discounts and allows alumni to easily return to both campuses.

For more information about opportunities to get involved with the alumni program, please contact the Office of Alumni Relations at 212-636-6520 or visit our website at www.fordham.edu/alumni_relations.

Majors

- African and African American Studies Major (p. 154)
- American Studies Major (p. 158)
- Anthropology Major (p. 178)
- Art History Major (p. 180)
- Art History and Visual Arts Double Major (p. 182)
- Biochemistry Major (p. 193)
- Biological Sciences Major (p. 187)
- Chemistry Major (p. 197)
- Chinese Studies Major (p. 288)
- Classical Civilization Major (p. 201)
- Classical Languages Major (p. 201)
- Communication and Culture Major (p. 204)
- Comparative Literature Major (p. 218)
- Computer Science Major (p. 221)
- Digital Technologies and Emerging Media Major (p. 208)
- Economics Major (p. 232)
- Engineering Physics Major (p. 335)
- English Major (p. 236)
- English Major with a Creative Writing Concentration (p. 238)
- Environmental Science Major (p. 242)
- Environmental Studies Major (p. 244)
- Film and Television Major (p. 211)
- French and Francophone Studies Major (p. 290)
- General Science Major (p. 254)
- German Language and Literature Major (p. 291)
- German Studies Major (p. 292)
- History Major (p. 258)
- Humanitarian Studies Major (p. 264)
- Individualized Major (p. 266)
- Integrative Neuroscience Major (p. 270)

- Interdisciplinary Math & Economics Major (p. 233)
- International Political Economy Major (p. 272)
- International Studies Major (p. 274)
- Italian Language and Literature Major (p. 292)
- Italian Studies Major (p. 294)
- Journalism Major (p. 213)
- Latin American and Latino Studies Major (p. 302)
- Math and Computer & Information Sciences Major (p. 224)
- Mathematics Major (p. 314)
- Medieval Studies Major (p. 316)
- Middle East Studies Major (p. 319)
- Music Major (p. 321)
- New Media and Digital Design Major (p. 326)
- Philosophy Major (p. 332)
- Physics Major (p. 336)
- Political Science Major (p. 337)
- Psychology Major (p. 341)
- Religious Studies Major (p. 344)
- Social Work Major (p. 347)
- Sociology Major (p. 363)
- Spanish Language and Literature Major (p. 295)
- Spanish Studies Major (p. 296)
- Theology Religious Studies Major (p. 376)
- Theology Religious Studies Second Major (p. 379)
- Urban Studies Major (p. 381)
- Visual Arts Major (p. 372)
- Visual Arts and Art History Double Major (p. 375)
- Women, Gender, and Sexuality Studies Major (p. 382)
- Disability Studies Minor (p. 230)
- Economics Minor (p. 233)
- Engineering Physics Minor (p. 335)
- English Minor (p. 240)
- Environmental Studies Minor (p. 247)
- Fashion Studies Minor (p. 249)
- Film and Television Minor (p. 212)
- Finance Minor (p. 253)
- French and Francophone Studies Minor (p. 297)
- German Minor (p. 298)
- History Minor (p. 263)
- Humanitarian Studies Minor (p. 266)
- Irish Studies Minor (p. 282)
- Islamic Studies Minor (p. 283)
- Italian Minor (p. 298)
- Jewish Studies Minor (p. 284)
- Journalism Minor (p. 215)
- Latin American and Latino Studies Minor (p. 306)
- Linguistics Minor (p. 299)
- Mandarin Chinese Minor (p. 300)
- Marketing Minor (p. 312)
- Mathematics Minor (p. 315)
- Medieval Studies Minor (p. 319)
- Middle East Studies Minor (p. 320)
- Music Minor (p. 322)
- New Media and Digital Design Minor (p. 328)
- Orthodox Christian Studies Minor (p. 329)
- Peace and Justice Studies Minor (p. 330)
- Philosophy Minor (p. 334)
- Physics Minor (p. 336)
- Political Science Minor (p. 340)
- Psychology Minor (p. 343)
- Public & Professional Writing Minor (p. 240)
- Real Estate Minor (p. 132)
- Religious Studies Minor (p. 345)
- Russian Minor (p. 300)
- Sociology Minor (p. 364)
- Spanish Minor (p. 301)
- Sports Journalism Minor (p. 216)
- Sustainable Business Minor (p. 368)
- Theatre Minor (p. 372)
- Theology Religious Studies Minor (p. 380)
- Urban Studies Minor (p. 381)
- Visual Arts Minor (p. 375)
- Women, Gender, and Sexuality Studies Minor (p. 383)

Minors

- Accounting Minor (p. 152)
- African Studies Minor (p. 155)
- African and African American Studies Minor (p. 155)
- American Studies Minor (p. 177)
- Anthropology Minor (p. 179)
- Arabic Minor (p. 297)
- Art History Minor (p. 182)
- Asian American Studies Minor (p. 183)
- Biochemistry Minor (p. 196)
- Bioethics Minor (p. 185)
- Bioinformatics Minor (p. 220)
- Biological Sciences Minor (p. 189)
- Business Administration Minor (p. 190)
- Chemistry Minor (p. 199)
- Classical Civilization Minor (p. 201)
- Classical Languages Minor (p. 202)
- Communication and Culture Minor (p. 208)
- Comparative Literature Minor (p. 219)
- Computer Science Minor (p. 223)
- Creative Writing Minor (p. 236)
- Cybersecurity Minor (p. 223)
- Digital Technologies and Emerging Media Minor (p. 210)

Special Programs Certificate Programs

- American Catholic Studies Certificate (p. 157)

Special Academic Programs

- Accelerated M.S. in Real Estate Program (p. 134)
- Accelerated Master's in Teaching Program (p. 132)
- Cooperative Program in Engineering (3-2 Engineering) (p. 135)
- GSAS Accelerated Master's Programs (p. 137)
- Honors Program at FCRH (p. 68)
- Pre-Law (p. 138)
- Pre-Medical and Pre-Health (p. 138)

Academic Curriculum

The college curriculum, leading to the degrees of Bachelor of Arts and Bachelor of Science, is organized into three parts: the core curriculum, the major, and elective courses.

Core Curriculum

The Core Curriculum (p. 34) consists of a set of required courses distributed across a number of disciplines. Advanced Placement credit and college courses taken elsewhere may be considered for core credit. The core is designed to open up new intellectual vistas; enhance understanding of ways of knowing within the disciplines and of connections among the disciplines; develop writing, research, and quantitative skills in order to prepare students for upper-level study; and situate students intellectually so they are prepared to make the right choice among major fields of study. Students are expected to complete most of the core by the end of sophomore year, with the exception of the advanced disciplinary and interdisciplinary, global studies, pluralism, and values requirements.

The Major

The major, or field of concentration (p. 61), is designed to give the student mastery of a single field and to introduce that student to a field of possible professional involvement. A student will normally select a major by February of their sophomore year. If, at the time of preregistration for the fourth year, the student qualifies for a second major, he or she may request acceptance by that department. If the department finds that the student can complete its requirements satisfactorily in addition to the requirements for the original major, he or she may register for a double major with the final approval of the class dean. If successfully completed, the two majors will be entered on the student's official record. It is the major that determines the type of degree that is awarded. The college reserves the right to limit the number of students in a particular major.

A student who has a particular interest best pursued by means of an interdisciplinary program of courses not covered by one of the college's established programs may petition to follow an individualized major. Students interested in an individualized major, open only to candidates for the B.A. degree, should discuss their plans with the class dean; final approval will be determined by a committee of faculty.

Incoming first-year students wishing to major in biological sciences, chemistry, computer and information sciences, mathematics, physics, or psychology will be advised to register for the courses specified by these departments.

Students interested in premedical or pre-health professions, architecture, the 3-2 cooperative engineering program, or the five-year teacher-education track should indicate this program interest when applying. Changes may be made during the summer prior to beginning of classes. Incoming first-year students will be guided through course selection

and registration over the summer by a dedicated adviser. Changes subsequent to the start of classes may be made in consultation with the student's adviser.

The Minor

A minor is offered (p. 62) in many departments and in certain interdisciplinary programs. Interested students should consult the listings of the respective departments and programs. Students may register for a minor in their first semester of junior year, using the appropriate forms available in the offices of the class deans.

Electives

The curriculum is rounded out by elective courses chosen by the student in consultation with their adviser. To ensure the breadth of learning that electives are intended to promote, at least half of a student's electives should be in disciplines other than his or her major.

Educational Philosophy

Fordham affirms the value of a core curriculum rooted in the liberal arts and sciences. The University seeks to foster in all its students life-long habits of careful observation, critical thinking, creativity, moral reflection and articulate expression. (From the Fordham University Mission Statement.)

Education for Intellectual Excellence

One purpose of the Fordham University liberal arts core is to enable students to go beyond mere proficiency and achieve a level of excellence in the essential skills of literacy. Excellence in the expressive skills of writing and speaking with logical clarity, that is, *eloquentia perfecta*, is founded on the arts of reading, listening, observing, thinking, and mastery and thorough understanding of the topic under consideration. The first task of the student of the liberal arts is listening and observation for the sake of understanding. Such observation and listening is not, in essence, passive but rather a supremely active engagement of the mind in a genuine conversation. Students of the liberal arts converse not only with those few who are present in the university halls and those who speak their own language but also with those in distant places, those who speak other languages, and those who are absent, perhaps even long dead.

Education for Freedom

Education in the liberal arts has traditionally been called "liberal" for several reasons, but among them is the fact that these arts engender the ability to form judgments based on sound reasoning, free of prejudice and free of insufficiently examined premises. Such critical and independent thinking demands knowledge of ourselves and the cultures that have shaped us. Learning to think, if pursued according to its most exacting standards and taken to its greatest depths, demands the actualization of our most distinctly human capacities, including the capacity for freedom. A liberal education prepares the student for a creative life, one capable of transforming its own conditions. In this regard, the liberal arts attempt to make learners aware of and aspirant to the greatness of the human.

Education for Others and Respect of Difference

A liberal arts education involves a community of learners. This community, committed to achieving excellence in the practice of the liberal arts, is composed of learners who depend on each other in a task that is too great for any one of them or even any one generation alone.

This community of learners forms a republic of learning that transcends any one generation or nationality. The unifying principle of this republic is the preservation and advancement of the arts, the sciences, and wisdom.

The conversation in which Fordham's core engages its students aims to engender civility, that is, an attitude of respect and openness to the other and to the world. This respect is a foundational virtue both for the University and for modern pluralist societies: for the university because the intelligent conversation at the heart of education is not possible without it; and for pluralist societies because their civic life requires tolerance of differences. Acknowledging and understanding human beings of different historical periods, genders, sexualities, ages, religions, races, ethnicities, and cultures is an intrinsic part of the perspective gained through learning in Fordham's humanistic Core Curriculum. It invites students to go beyond themselves and the familiar, to understand the world through the eyes of the other, and in so doing, helps prepare them for citizenship in pluralist societies and nourishes the quest for social justice.

Education for Leadership

The humanistically educated do not stand by as idle spectators of suffering and strife, but attempt to serve others and the communities to which they belong, that is, their families, their neighborhoods, their countries, and the world. Fordham is not an ivory tower suspended above the world, but a community forming leaders and citizens in the midst of one of the world's capitals—New York City. Fordham and New York City share a common fate and collaborate in a mission of justice and human welfare that spans from their immediate neighborhoods to the globe.

Education for Wisdom

A liberal arts education demands a spirit of inquiry that bars no question in itself and no aspect of life. Fordham's Core Curriculum requires, therefore, the mastery and questioning of the various ways of knowing demanded by the most diverse subject matters and disciplines. This key part of undergraduate education leads to questions concerning meaning and values, and the nature and purpose of human action in the world, and includes an openness to questions of faith and the transcendent. What begins as a quest for excellence in the practice of writing and speaking leads to a quest for higher things, to a search for the wisdom that transforms life for the better. Socrates insisted at the very beginning of higher education that the eloquent sophist is not the ultimate goal; that in order for higher education to be complete, it must seek wisdom: *"We were educated once, and it is indeed taking our whole life to get over it, to cease being astonished at what is"* (Phaedrus).

Degree Requirements

Fordham College at Rose Hill awards both the B.A. and the B.S. degrees. The bachelor of arts and bachelor of science degree programs at Fordham College at Rose Hill are four-year, eight-semester programs. Degrees are awarded on the successful completion of a minimum of 36 courses and 124 credits, with a minimum cumulative index of 2.000, and completion of the core curriculum and a major. It is expected that students will be in residence during the final semester in which they complete their degree.

Students ordinarily take 20 courses (usually three-credit) in their first and second years and 16 courses (usually four-credit) in their third and fourth years. Two-credit laboratory courses do not count toward the 36-course total. The only exception to the 36-course requirement is that students who take (and successfully complete) Introductory Biology (with

laboratory) and General Chemistry (with laboratory) in their first semester may take only four courses and thereby reduce the number of courses required for graduation to 35.

Academic Policies and Procedures

Academic Policies and Procedures pertaining to students at FCRH:

- Academic Advising (p. 64)
- Academic Progress (p. 65)
- Business Coursework (p. 66)
- Registration (p. 66)
- Summer Courses (p. 67)

Academic Policies and Procedures pertaining to all undergraduate students:

- Academic Progress, Probation, Suspension, and Dismissal (p. 14)
- Admissions Policy (p. 15)
- Attribute Code Index (p. 15)
- Dean's List (p. 19)
- Deferred Examinations (p. 20)
- Grading System (p. 20)
- Important and Useful Links (p. 22)
- Incomplete Coursework (p. 22)
- Integrity of Full-Time Study (p. 23)
- Limits on Number of Majors and Minors (p. 23)
- Payment of Tuition and Fees (p. 23)
- Procedure for Appealing a Course Grade (FCRH, FCLC, and Gabelli School) (p. 23)
- Refund (p. 24)
- Student Attendance (p. 26)
- Transcript of Record (p. 26)
- Undergraduate Policy on Academic Integrity (p. 27)
- Withdrawal from the University and Leaves of Absence (p. 33)

Academic Policies and Procedures, university-wide:

- Affirmative Action Policy (p. 30)
- Campus Safety (p. 30)
- Equity in Athletics Disclosure Act (p. 30)
- Nondiscrimination and Director of Gender Equity/Title IX Coordinator (p. 30)
- Numbering of Undergraduate Courses (p. 30)
- Recruitment of Jesuits to the Faculty (p. 31)
- Reserved Rights (p. 31)
- Student Records (p. 31)
- Support Services for Students with Disabilities (p. 32)
- University Code of Conduct (p. 33)

Academic Advising

For the Class of 2025

In their first year at Fordham, most undergraduates in the class of 2025 were supported by core or transfer advisors—faculty members and

administrators who have a general knowledge of the core curriculum and college degree requirements and policies.

Upon declaring a major, students receive their primary advising on all matters pertaining to their major from their department or program, while class deans—and the assistant dean for student support and success—advise students on fulfilling their core curriculum and graduation requirements. Students are encouraged to consult their major advisors regularly to discuss their academic and professional progress.

For the Classes of 2026 and Beyond

Students at FCLC and FCRH are advised and supported by professional advisors throughout their undergraduate careers, in close contact with departments, programs, the assistant dean for student support and success, and other areas across the university. Advising for all undergraduates in the colleges is designed to support student success in keeping with Fordham's values and mission, and it includes robust faculty mentoring.

Academic Advising for Student-Athletes

The primary mission of the Office of Academic Advising for Student-Athletes is to provide Fordham University's more than 550 NCAA student-athletes with the resources and direction needed to achieve their scholastic potential and to prepare them for postgraduate scholastic, athletic, and career opportunities. The office brings a breadth and depth of experience in athletics and higher education to their many responsibilities. These responsibilities include general academic counseling, eligibility monitoring, assistance in maintaining satisfactory progress toward degrees, and course scheduling. Mid- and post-semester grade reviews are conducted every semester.

The office has five full-time administrators, all of whom are dedicated to working with and for Fordham's student-athletes.

Academic Progress

Academic Standing Policy

Academic standing is determined by semester or cumulative Grade Point Average (GPA) and the credit hours earned by class year. To remain in good academic standing at Fordham College and retain any awarded financial aid, students must meet established year-by-year standards of "academic progress." Faculty and administrators are dedicated to supporting students in meeting these standards for each class year as outlined in the Academic Status section.

The following categories are used to define a student's academic standing at Fordham College:

Good Academic Standing

Students are in good academic standing when they have a cumulative 2.0 GPA and are on track toward graduation as defined by the Credit Completion Policy below.

Academic Notice

Academic Notice is meant to help the student stay on track toward graduation and improve their GPA in the next semester. Students on Academic Notice are expected to work with their Academic Advisor on a Success Plan. Students may be placed on Academic Notice if:

- They meet the 2.000 GPA requirement, but are below a 2.300; OR
- They withdrew from more than one 3+ credit course in a semester.

Academic Restoration

Academic Restoration is a serious warning that a student's academic record at the University is not satisfactory. Students on Academic Restoration may continue to study at Fordham and are expected to work with their Academic Advisor on a Success Plan, which will include a discussion about participation in non-academic activities, including student organizations. Students may be placed on Academic Restoration if:

- They earn lower than a semester or cumulative 2.000 GPA.

Suspension

Suspension is a University-sanctioned pause in academic studies at Fordham College for at least one semester, and can only be granted for a maximum of 2 semesters. A student can be placed on Suspension if:

- They earn a GPA as indicated in the Academic Status section of the Bulletin; OR
- They receive three or more failing grades in one semester; OR
- They have been on Academic Restoration for two consecutive semesters.

To return to Fordham College after a Suspension, a student must apply for readmission. Readmission is granted as long as the student has demonstrated academic readiness to be successful at Fordham.

Dismissal

Academic Dismissal is the ultimate sanction imposed for failure to meet the standards outlined below toward completion of a student's bachelor's degree. A student who has been dismissed is no longer permitted to take undergraduate courses at Fordham College. A student may be dismissed from the College for any of the following reasons:

- Falling below the GPA as outlined in the Academic Status section of the Bulletin; OR
- Attaining a GPA of 1.000 or lower in any semester; OR
- Returning from Suspension and not demonstrating academic readiness in the first semester; OR
- Being placed on Academic Restoration for three consecutive semesters.

Appeal Policy

All academic standing decisions may be appealed in writing to the Dean of the college. The appeal must be made within three business days of the notification of change in academic standing. An appeal should include the following items:

- Documentation of any extenuating circumstances that may have impacted the student, such as death in the immediate family or an illness; AND
- A statement from the student explaining the reason for the appeal.

Once the appeal is received, the Dean will make a decision in consultation with the Associate Deans, and that decision will be final.

Academic Status

The guidelines below are used to determine a student's Academic Standing as well as Satisfactory Academic Progress (SAP) which is

connected to their financial aid package. Students who do not meet the standards below may need to appeal their financial aid package. More information on the SAP Appeal can be found at Financial Aid.

For graduation, the student must successfully fulfill the following requirements:

- Complete a minimum of 36 courses of three credits or more; AND
- Complete a minimum of 124 credits; AND
- Complete a minimum of 64 credits at Fordham University, not to include any courses taken as Pass/Fail; AND
- Earn a cumulative grade point average (GPA) of 2.0 or higher; AND
- Complete the Core Curriculum; AND
- Complete the requirements for a major.

Full-time students should complete their coursework in four years. Students who require extra time to complete their degree due to special circumstances such as illness, a change in major, etc. should work with their Academic Advisor or Class Dean to complete their coursework in at least six years.

W (Withdrawal), ABS (Absent from exam), or INC (Incomplete) grades (p. 20) are to be used in special situations based on an individual's circumstance. Students are advised to minimize grades of W, ABS, and INC, as these may delay progress towards graduation.

Repeated courses will be calculated into a student's GPA and will not replace the original grade.

The outline below is a guide for students to keep on track toward graduation. Failure to meet these standards based on class year will result in a change in the student's Academic Standing and could affect financial aid.

Year or Classification	Good Academic Standing	Academic Restoration	Subject to Suspension	Subject to Dismissal
First Year (0-29 credits)	2.000	1.400-1.999	1.350-1.399	Less than 1.350
Sophomore (30-59 credits)	2.000	1.600-1.999	1.550-1.599	Less than 1.550
Junior (60-89 credits)	2.000	1.800-1.999	1.700-1.799	Less than 1.700
Senior (90+ credits)	2.000	Less than 2.000		

Credit Completion Policy

Independent of the student's GPA, the completion of fewer credits than outlined below may affect a student's academic standing for not maintaining satisfactory academic progress toward the bachelor's degree. Falling below these completion rates may cause a student to lose financial aid.

Please note: these standards differ slightly for students receiving funds from the New York State Tuition Assistance Program (TAP).

Year or Classification	Credits Attempted ¹	Percentage Completed ¹	Minimum Credits Completed ²
First/First Year	0-29	65%	18-20
Second/Sophomore	30-59	70%	42

Updated: 09-06-2024

Third/Junior	60-91	75%	69
Fourth/Senior	92+	80%	99-100

¹ Transfer credits accepted by Fordham are counted in both credits attempted and credits completed, although the grades are not counted in the GPA.

² For students pursuing a degree on a part-time basis, credits earned will be proportionate; for example, half-time students should complete half of these credits.

The registration portal only allows students who failed or withdrew from a non-repeatable course to retake that course. If a student passed a course, but needs to retake it for a better grade, consultation with the department offering the course and the student's adviser or class dean is needed.

Business Coursework

Undergraduate liberal arts students in all three liberal arts colleges (FCRH, FCLC, and PCS) may take up to six courses in the Gabelli School of Business. Students should be aware that business courses are three-credit courses, rather than four-credit courses, typically offered in PCS, FCRH and FCLC for juniors and seniors. Hence, when considering these minors, students should consult with their advisors to be sure they will have the minimum number of credits (124) required for graduation. Because a maximum of six courses from the Gabelli School of Business can be taken, FCRH, FCLC, and PCS students may consequently pursue only one business minor.

As an exception, students minoring in business administration as part of a Bachelor of Arts or Bachelor of Science degree must complete a minimum of 120 credits to earn their degrees (compared to 124 credits).

Please note that all of the business school courses must be taken at Fordham University to apply.

A number of minors in business are available to students at FCRH, FCLC, and PCS. While not all minors are available to all students, a list of their requirements is listed here.

Registration

Matriculation

Matriculated students are those who have been admitted as candidates for a degree. A nonmatriculated student is one who has not been admitted as a degree candidate but has received approval to register for credit courses.

Classification of Students

Class standing is determined by the number of credits the student has completed:

Year or Classification	Credits Completed
First Year	0-29
Sophomore	30-59
Junior	60-91
Senior	92 and above

Official Registration

Fordham University recognizes that the responsibility for each student's academic success is shared by the student, the faculty, and the

administration. Therefore, before a student registers for coursework at the University, preregistration advising is provided.

First- and second-year students normally register for five three-credit courses. Third- and fourth-year students normally register for four four-credit courses.

By way of exception, third- and fourth-year students who have achieved a 3.700 cumulative grade point average are eligible for a scholarship for a fifth course taken to enrich their academic program: one in the student's third year and one each in the semesters of the fourth year. Such scholarship courses and credits may not be used to make up for previous course withdrawals or incomplete registrations and may not accelerate graduation, that is, to reduce the number of full-time semesters a student spends in Fordham College at Rose Hill. To register for a fifth course, approval of the appropriate class dean is necessary.

For students approved to take an additional course, but who do not qualify for the scholarship, payment per credit above the student's allocated credit limit per semester is required.

Juniors and seniors with a grade point average lower than 3.000 may not take an additional course except for unusual reasons and with the approval of the class dean.

Late Registration

Registration at a date later than the day designated may be permitted for serious reasons by way of exception. Students registering late are held accountable for any class absences thus incurred.

Course Changes

By the last day of course changes, as specified in the academic calendar, students should recognize that they have made a serious commitment to complete the courses for which they have registered. Alterations in registration after the last day for course changes will be allowed only if the advisor/class dean determines that such a change is important to the academic program of the student. Students' non academic commitments should be arranged so as not to interfere with coursework to which the student is committed by registration.

Veteran students should be aware that if they are using any military education benefit, withdrawal from a class may create a debt with the VA, their Service Branch, or Fordham. Before withdrawing from a class, such students should consult with the VA Certifying Officials in the Office of Academic Records.

Registration in Other Fordham Schools

With a few exceptions, such as Honors Program and Manresa courses that are college-specific, Fordham College at Rose Hill students may register for courses in the Gabelli School of Business and Fordham College at Lincoln Center (FCLC). Courses for the major and minor should be taken at the home school or at FCLC; however, with departmental approval, a limited number of these courses may be taken at the School of Professional and Continuing Studies. Students may not take more than six courses at the Gabelli School.

Changes of Name or Address

Students are expected to notify the class dean and the Office of Academic Records immediately of any change of address or change of name.

Credit Limits

Full-time status is achieved by registering for 12 or more credits per term; part-time status involves a credit load of fewer than 12 credits. Full-time status is needed for financial aid.

Sophomores completing a B.A. degree have a credit ceiling of 20 credits. Sophomores completing a B.S. degree, requiring additional lab courses, have a credit limit of 21 credits. This is a result of the Core Curriculum, which encourages sophomores to begin taking upper-level and major courses at an earlier stage in their studies.

Juniors and seniors pursuing a B.A. degree have a credit ceiling of 18 credits. Juniors and seniors completing a B.S. degree have a credit ceiling of 20 credits, allowing them to register for up to 20 credits. If students exceed their credit ceiling, they are charged for each credit above their ceiling.

Academic Rank in Class

Starting in the 2019-2020 academic year, rank in class will no longer be computed or published for Fordham College at Rose Hill students. This section pertains to the 2018-2019 academic year and earlier.

In Fordham College at Rose Hill, a student's rank in class was computed on the basis of a minimum of 24 graded credits in a regular academic year. No rank in class was computed for a student who had fewer than 24 graded credits in an academic year.

Rank in class was computed only once at the conclusion of the academic year. If grade changes of any kind were made after this time, rank in class was not recomputed.

Summer Courses

Summer Courses at Fordham

Fordham offers summer courses in three distinct sessions: Session I (approximately the month of June), Session II (approximately the month of July), and Session III (spanning Session I and Session II with less frequent class meetings). Students can take Fordham summer courses according to these guidelines:

- A maximum of 2 courses (up to 8 credits) per summer are permitted.
 - It is strongly recommended to take at most 1 course per session.
- Exceptions can be allowed only for extenuating circumstances, with approval of the student's Academic Advisor or Assistant Dean for their class year. These decisions are based on the student's academic history

More information on Summer at Fordham can be found at this link.

Summer Courses Taken at Other Universities

Students may receive credit for courses taken outside of Fordham

- for which they earned a grade of C or above, AND
- which were taken during the summer at an accredited four-year college or university.

(Please note that the policy on this page does not refer to Study Abroad courses. All requests for summer courses taken abroad must follow the Study Abroad application process, which can be found here.)

All summer courses taken outside of Fordham must be approved in advance through the External Summer Course Approval Form found in the student portal. The guidelines for taking external courses are:

- The student must have a GPA of 2.000 or higher.
- Courses to be applied toward a major or minor must be approved through the academic department or program through the Director of Transfer Students. Note that the department or program may have a limit on how many external courses may be applied to the major or minor.
- In order to meet residency requirements, the student must not exceed 60 transfer credits in total.

During the fall and spring semesters, as well as winter break, students may not take courses at another college or university with the exception of an approved study abroad program.

Departments

The following is a list of academic departments and interdisciplinary units at Fordham College at Rose Hill:

- African Studies (p. 155)
- African and African American Studies (p. 153)
- American Catholic Studies (p. 156)
- American Studies (p. 158)
- Anthropology (p. 177)
- Art History (p. 180)
- Asian American Studies (p. 183)
- Bioethics (p. 184)
- Biological Sciences (p. 186)
- Chemistry and Biochemistry (p. 193)
- Classical Languages and Civilization (p. 200)
- Communication and Media Studies (p. 202)
- Comparative Literature (p. 217)
- Computer and Information Sciences (p. 219)
- Disability Studies (p. 230)
- Economics (p. 231)
- English (p. 234)
- Environmental Science (p. 241)
- Environmental Studies (p. 243)
- General Science (p. 254)
- History (p. 257)
- Humanitarian Studies (p. 263)
- Integrative Neuroscience (p. 269)
- International Political Economy (p. 272)
- International Studies (p. 273)
- Irish Studies (p. 282)
- Islamic Studies (p. 282)
- Jewish Studies (p. 284)
- Languages and Cultures (p. 285)
- Latin American and Latino Studies (p. 301)
- Mathematics (p. 312)
- Medieval Studies (p. 316)
- Middle East Studies (p. 319)
- Music (p. 320)

- New Media and Digital Design (p. 326)
- Orthodox Christian Studies (p. 328)
- Peace and Justice Studies (p. 330)
- Philosophy (p. 331)
- Physics and Engineering Physics (p. 334)
- Political Science (p. 337)
- Psychology (p. 340)
- Religious Studies (p. 344)
- Social Work (p. 347)
- Sociology (p. 362)
- Theatre and Visual Arts (p. 369)
- Theology (p. 376)
- Urban Studies (p. 380)
- Women, Gender, and Sexuality Studies (p. 382)

Honors Program at FCRH

Since its founding in 1950, the Fordham College at Rose Hill Honors Program has provided students of exceptional academic talent and intellectual curiosity with the opportunity to pursue their core studies in greater depth, breadth, and intensity. Drawn from every major, Honors students routinely go on to attend the most respected graduate and professional schools and to excel in their chosen fields. What unites the members of the program is their active approach to learning and their desire to go beyond compartmentalized knowledge to an understanding of the whole.

The mission of the Rose Hill Honors Program is to produce and promote a community of scholars for justice. We achieve our mission through a curriculum that in some substantive way focuses on the concerns of diversity and justice in each of its courses, regardless of discipline or subject matter. In small, seminar-style classes that are reading- and writing-intensive and discussion-driven, students learn to analyze and critically assess materials from the humanities, social sciences, and STEM fields. With a course specifically devoted to academic research methods, students also learn to engage in the scholarly life, and each course in the curriculum beyond the first year includes a research or scholarship component. Honors students' research abilities culminate in the senior thesis project, for which students complete an original project in their major field. The program also features two courses specifically devoted to the academic study of justice in both American and global contexts, a course designed to introduce students to the diverse history and culture of the Bronx, and a capstone seminar in which students engage in reflective analysis of a Jesuit, liberal arts education. In all, we seek to provide a Jesuit education for the 21st century.

The Honors curriculum takes the place of the regular Fordham College at Rose Hill core curriculum, with the exception of the language requirement. Most students enter the program at the beginning of their first year, though it is occasionally possible for a certain number of students with strong academic records to join in the middle of that year or at the beginning of their sophomore year.

Because Honors courses usually take the form of small seminars, enrollment in the program is necessarily limited to around 35 students each year. Members of the program are normally expected to maintain a grade point average of 3.5. Successful completion of the program entitles the student to the designation *in cursu honorum* on the diploma and the transcript.

For more information

Visit the Rose Hill Honors Program website.

Requirements

The Honors Program is an alternative core. Honors students are not required to take any of the other Fordham College core curriculum requirements, with the exception of the general Fordham College language requirement (p. 60). AP placement may exempt students from the language requirement. Honors students must also fulfill their major requirements as outlined by the respective academic department (p. 68).

Curriculum

For students beginning as of Fall 2019 (New curriculum)

Course	Title	Credits
First Year		
Fall		
HPRH 1101	Interdisciplinary STEM I	3
HPRH 1102	Foundational Texts: Theology/Classics	3
HPRH 1103	Foundational Texts: Philosophy	3
HPRH 1104	Bronx Exploration (Does not count as one of the courses students take each semester.)	1
Credits		10
Spring		
HPRH 1201	Interdisciplinary STEM II	3
HPRH 1202	Foundational Texts: Literature	3
HPRH 1203	Foundational Topics: History	3
HPRH 1205	Foundational Topics: Art	3
or HPRH 1206	or Foundational Topics: Music History	
Credits		12
Second Year		
Fall		
HPRH 2101	Justice I: The American Experience (Students must take at least one Justice course in the Social Sciences.) ¹	3
HPRH 2102	Focused Study: History	3
HPRH 2103	Research Methods/Oral Presentation (Does not count as one of the courses students take each semester.)	1
Credits		7
Spring		
HPRH 2201	Justice II: Global Contexts (Students must take at least one Justice course in the Social Sciences.) ¹	3
HPRH 2202	Focused Study: Philosophy	3
Credits		6
Third Year		
Fall		
HPRH 3101	Focused Study: Literature	4

HPRH 3075	Ignatian Education Seminar (Does not count as one of the courses students take each semester.)	1
Credits		5
Spring		
HPRH 3201	Focused Study: Theology	4
Credits		4
Fourth Year		
Fall or Spring		
HPRH 4001	Senior Thesis (Students register for the seminar for one semester, but attend it the whole year.)	4
Credits		4
Total Credits		48

¹ Specific sections of HPRH 2101 and HPRH 2201 that fulfill this requirement have the attribute HPJS.

For students beginning prior to Fall 2019 (Legacy curriculum)

Course	Title	Credits
First Year

Fourth Year**Fall or Spring**

HPRH 4001	Senior Thesis	4
Credits		4

Total Credits		39
----------------------	--	-----------

GPA Requirement

Honors students receive the special designation *in cursu honorum* ("in the course of honors") on their diplomas. This is in addition to any other honors earned, such as *cum laude*, *magna cum laude*, and *summa cum laude*. In order to graduate *in cursu honorum*, a student must have a GPA of 3.5 at the end of senior year.

Study Abroad

Honors students may study abroad for all or part of junior year. To fulfill the junior Honors course requirements, there are two possibilities: (a) the student takes a comparable course while abroad, as approved by the Honors director, or (b) the student takes the junior year Honors courses upon return in their senior year.

Advanced Placement Credit

AP credit is awarded by the College and, where appropriate, earns students credits toward graduation. AP credit does not exempt students from any Honors course.

Course/Requirement Waivers for STEM/Pre-Health Students

In the Honors core curriculum (beginning fall 2019), in consideration of the coursework taken towards their majors/pre-professional programs, STEM/pre-health students are waived from the following courses/requirements, as follows.

- HPRH 1101 Interdisciplinary STEM I and HPRH 1201 Interdisciplinary STEM II waiver: majors in biological sciences, chemistry, integrative neuroscience, and students on the pre-health track (with any major).
- HPRH 1101 Interdisciplinary STEM I waiver: majors in computer science, physics, engineering physics, or mathematics/computer science.
 - If the student is also a biological sciences, chemistry, or integrative neuroscience major, or is on the pre-health track, the student is waived from both STEM courses.

The foreign language core requirement is waived for the following populations:

- All students pursuing a Bachelor of Science (B.S.) degree as their primary major, *except* B.S. degree students in psychology.
- Bachelor of Science in Psychology who are *also* on the pre-health track.

Supporting Student Success

Academic Support

At its core, Fordham University is committed to the holistic development of students' academic and personal success. We offer proactive academic support for our students through student-centered activities and programs, intentional goal-setting, and opportunities for personal and professional discernment. Our student support and success team can assist you in these areas, as well as connect you with other available resources at the University. Students can contact their advisor or class dean to be referred to develop an individualized success plan.

College Writing Center

A service free to all Fordham students, the Writing Center encourages students and helps improve their writing across all levels and disciplines. Our aim is to provide personalized instruction that will enhance students' prose and help them become more confident writers. To ensure that students reach these goals, we offer up to 90 minutes of one-on-one instruction per week, during which we will assist in all stages of writing, from brainstorming to drafting to revising. Additionally, our tutors—a select group of masters and doctoral students—offer collaborative consultations and provide free workshops on academic writing.

Students can register and make appointments using the Writing Center's website. If students cannot attend their session, they should log on to the online sign-up site and cancel their appointment. If students are not present at the start of their appointment time, the session will be made available to other students. Walk-ins are also welcome whenever space is available.

Students should bring a hard copy of their assignment and be prepared to work with their tutor.

For more information about hours and locations on each campus, visit the Writing Center's website.

College and Departmental Tutoring Services

Gabelli School of Business: Father Boyle Society and Beta Alpha Psi members provide peer-to-peer tutoring for students seeking assistance in a business course. Interested students should visit Gabelli Access, stop by the Gabelli Study Center (Hughes Hall 4th floor), or email Brian Dunn at bdunn@fordham.edu to reserve a tutor.

Fordham College at Rose Hill and Fordham College Lincoln Center offer tutoring services for most academic departments, free of charge through Knack Tutoring. Please visit the FCRH tutoring website for details. For any subject area not listed below, please consult with the associate chair for undergraduates of the department.

Classical Languages (Greek and Latin): Graduate students in the department provide tutoring for undergraduates in Greek and Latin. Students can consult either their professor or the chair of the Department of Classics for further details.

Economics: The Economics Tutoring Center is available to assist students in preparing for classes, examinations, and homework, and in mastering the fundamentals of economics. At Rose Hill, the Economics Tutoring Center is located in Dealy Hall E-535. At Lincoln Center, we use several locations for the Economics Tutoring Center. Please see Kerri

Maguire in Lowenstein 924 to direct you to the tutoring center location (212-636-6381). Visit the tutoring center's website for more information.

English: Each of Fordham's three campuses has a writing center. At Rose Hill, the writing center is located in the Walsh Library Reference Area, room 121. At Lincoln Center, it is located in the Quinn Library at 140 W. 62nd Street, room 233. The Westchester Campus Writing Center is for Professional and Continuing Studies students and is located in room 202. Students can register and schedule appointments online.

Languages and Cultures: Free tutoring, practice, and conversation are available in all languages taught by the department. Skilled junior and senior language majors and students who are native speakers serve as tutors. No appointment is needed, but students should check individual tutors' hours before visiting.

The language learning centers in Keating B25 (RH) and LL 412 (LC) also provide instructional technology for language students, as well as access to international television stations and films.

Office of Information Technology

Web: <https://www.fordham.edu/IT>

Fordham University's Office of Information Technology provides resources and services in support of students' academic goals. Please visit the Student Technology Services webpage for detailed information about our help and support services, free software, remote learning and on-campus resources, and other essential links including portal and ID card set up information.

Fordham University Portal

Web: fordham.edu

Fordham.edu is the gateway to Fordham's online resources including core application access such as Gmail, Blackboard, and Zoom, and student services like registration, financial aid, bill payment, schedules, and academic course information.

To gain access to the portal, you will need to claim your username, create a password, and set up multi-factor authentication using the Duo Mobile application. To do this, go to fordham.edu. In the login box, click the 'New user: Claim account' link and follow the instructions provided. If you encounter any issues, please call the IT Service Desk at 718-817-3999 for assistance in walking you through the process.

IT Service Desk

Web: fordham.edu/helpIT

The IT Service Desk serves as a central point of contact for all technology-related questions and concerns. With a focus on prompt and effective solutions, this team offers expertise in troubleshooting, technical guidance, and problem resolution. They provide comprehensive support and assistance for a wide range of technology resources and services, contributing to a seamless and efficient technology experience for all members of the university community. Visit the webpage above for hours and locations or call 718-817-3999.

Computer Labs & LITE

Web: fordham.edu/computerlabs

Computers for public use are available on each of our campuses in teaching labs and in the on-campus libraries. Here students can utilize both Mac and Windows computers and access printing resources. Our

Learning and Innovation Technology Environment (LITE) offers access to a more unique range of hardware and software for use by the community such as 3D printing and pod casting rooms. Check out the complete list of offerings at the link above. Computer lab assistants are always available to help with the equipment and answer any questions.

Fordham College at Lincoln Center

Fordham College at Lincoln Center (FCLC) is a dynamic liberal arts college on Fordham's beautiful, self-contained campus at the cultural and communications crossroads of Manhattan.

FCLC is a close-knit intellectual and creative community of faculty and students that combines a traditionally strong Fordham liberal arts education with the innovative instructional and preprofessional opportunities readily available at our location amid the world's most remarkable concentration of artistic, cultural, media, commercial, and nonprofit institutions. The college offers majors in the humanities, social sciences, and interdisciplinary natural sciences, as well as outstanding programs in theatre, visual arts, music, education, and social work. Through our affiliation with the Ailey School, the official school of the Alvin Ailey American Dance Theater, our students can study at one of the country's premier schools of dance.

A vast array of internship opportunities, including in our new signature program for paid Cultural Engagement Internships, enable students to connect their academic learning to real-world experience and make the most of the unparalleled opportunities New York City offers. Opportunities for community service and community engaged learning are readily available, and the college's dynamic urban location also allows students to confront and examine the pressing social and ethical questions of modern life: issues of justice, equality, community, diversity, faith, and human dignity. The social work and education programs further immerse students in the work of the city.

The College at a Glance

- FCLC has a diverse student body of approximately 2,350, with more than 50% of the most recent entering class identifying as students of color.
- Classes are small and personalized, in keeping with the Jesuit tradition of caring for each student as an individual.
- The college welcomes transfer students. Each year, many students receive credit for coursework completed at other universities and go on to complete their bachelor's degrees at FCLC.
- Many graduates of the college continue their education at outstanding medical, dental, law, graduate, and other professional schools across the United States and abroad. In 2021, FCLC seniors had a 100% law school admission rate.
- Members of the faculty are well-known and established scholars, authors, and editors in a wide range of academic disciplines. Others are active practitioners, including painters, photographers, filmmakers, poets, composers, and award-winning actors and directors.
- Our future scientists and physicians work with our multidisciplinary natural sciences faculty and pre-health advisers in their labs, with research opportunities at Mount Sinai Hospital, Rockefeller University, Columbia, NYU, Einstein Medical College, and other institutions. The Department of Natural Sciences takes particular pride in its mission to not only educate undergraduates but also mentor them and help them produce research.

- Qualified students may gain entry to the 3-3 program with Fordham Law School and thereby save a year of study, earning a bachelor's degree and a law degree in six years.
- Qualified students may participate in the 3-2 Cooperative Program in Engineering to earn a B.A. or B.S. degree from Fordham and a B.S. degree in engineering from Columbia University or Case Western Reserve University after a total of five years of study.
- Students who meet the requirements for an accelerated master's program may apply to departments within the Graduate School of Arts and Sciences that offer such programs, earning an M.A. or M.S. in one year after graduation.
- Graduates of the B.A. in social work can complete their M.S.W. degree in one year through Fordham's Graduate School of Social Service.
- Our teacher-education track, offered in collaboration with Fordham's Graduate School of Education, leads to certification in a total of five years of study.
- FCLC students may take business courses or complete a business minor at Fordham's Gabelli School of Business on the Lincoln Center campus.
- Faculty from theatre, English, and communication and media studies collaborate to offer a minor in creative writing.
- A visual arts complex offers students facilities for painting, drawing, photography, video, and computer graphics.
- The B.F.A. in dance combines the artistic training of the school of the Alvin Ailey American Dance Theater with Fordham's liberal arts education.
- Our Global Outreach and community engaged learning programs reflect Fordham's Jesuit commitment to educate people who will put their education to work in the service of others.

Visit our website at fordham.edu/fclc.

Students should consult the university-wide sections of this bulletin for more information on academic programs, policies, and procedures (p. 14).

The College Council

Since its inception, Fordham College at Lincoln Center has fostered the development of an academic community among its faculty, students, and administrators, with the College Council being one manifestation of this community. The FCLC College Council is a representative body of students, faculty, and administrators that assists in formulating policies for the college and making recommendations to appropriate University officers and bodies concerning University policies that affect the college. The dean of the college serves as chairperson of the council.

Fordham College at Lincoln Center Alumni Opportunities

All graduates of Fordham College at Lincoln Center are members of the Fordham University Alumni Association by virtue of their graduation. Fordham alumni enjoy many opportunities to engage with current students and other alumni across the world. The goal of all alumni activities is to foster lifelong relationships between alumni and Fordham, and to create ways for alumni to share their talents and interests with the University.

The Office of Alumni Relations also sponsors numerous opportunities for FCLC alumni to interact with alumni from across the University, as well as opportunities for current students to be mentored and supported by

Fordham alumni. The Fordham University Alumni Association connects alumni from all of Fordham's schools. The young alumni program focuses on the specific needs of alumni who have graduated within the past 10 years. The regional club program maintains Fordham's national and international alumni network. The cultural program capitalizes on the unique benefits of New York City for metro-area alumni. RamPass, the alumni ID card, affords alumni special discounts, and allows them to easily return to both campuses.

For more information about opportunities to get involved with the alumni program, please contact the Office of Alumni Relations at 212-636-6520 or visit fordham.edu/alumni.

Majors

- African and African American Studies Major (p. 154)
- American Studies Major (p. 158)
- Anthropology Major (p. 178)
- Art History Major (p. 180)
- Art History and Visual Arts Double Major (p. 182)
- Biochemistry Major (p. 193)
- Chinese Studies Major (p. 288)
- Classical Civilization Major (p. 201)
- Classical Languages Major (p. 201)
- Communication and Culture Major (p. 204)
- Comparative Literature Major (p. 218)
- Computer Science Major (p. 221)
- Dance Major (p. 226)
- Digital Technologies and Emerging Media Major (p. 208)

- Irish Studies Minor (p. 282)
- Islamic Studies Minor (p. 283)
- Italian Minor (p. 298)
- Jewish Studies Minor (p. 284)

Special Programs

Certificate Programs

- American Catholic Studies Certificate (p. 157)

Special Academic Programs

- Accelerated M.S. in Real Estate Program (p. 134)
- Accelerated Master's in Teaching Program (p. 132)
- Cooperative Program in Engineering (3-2 Engineering) (p. 135)
- GSAS Accelerated Master's Programs (p. 137)
- Honors Program at FCLC (p. 79)
- Pre-Law (p. 138)
- Pre-Medical and Pre-Health (p. 138)

Academic Curriculum

The college curriculum, leading to the degrees of bachelor of arts, bachelor of science, or bachelor of fine arts, is organized into three parts: the Core Curriculum, the major, and elective courses.

Core Curriculum

The Core Curriculum (p. 34) consists of a set of required courses distributed across a number of disciplines. Advanced Placement credit and college courses taken elsewhere may be considered for core credit. The core is designed to open up new intellectual vistas;

enhance understanding of ways of knowing within the disciplines and of connections among the disciplines; develop writing, research, and quantitative skills in order to prepare students for upper-level study; and situate students intellectually so they are prepared to make the right choice among major fields of study. Students are expected to complete most of the core by the end of sophomore year, with the exception of the advanced disciplinary and interdisciplinary, global studies, pluralism, and values requirements.

The Major

Fordham University offers major fields of study (p. 72) in a wide variety of areas in each of its undergraduate colleges. Students normally select an academic major before completion of the second year of study. They are assisted in this process by their academic advisers and the academic deans. Requirements for the major are described in the departmental and program sections of the bulletin. The College reserves the right to limit the number of students in a particular major.

In cases where they have developed a special academic interest which is not covered by an established major, students may design an individualized major with permission of the dean of the college and in consultation with academic advisers in the appropriate fields.

The Minor

Students have the option of completing a minor (p. 73) in addition to a major. A minor requires fewer courses and provides opportunity to pursue a complementary field of study. Some areas of study are offered only as minors, often representing new academic disciplines.

Electives

Coursework that falls neither within the core (p. 34) nor the major is of equal importance to courses in these two categories. Electives enable students to explore intellectual interests and build their own academic concentrations and special competence. Electives should be chosen with care and with the advice of the academic adviser. To ensure the breadth of learning that electives are intended to promote, at least half of a student's elective choices should be used to take courses in disciplines other than his or her major.

Educational Philosophy

Fordham affirms the value of a core curriculum rooted in the liberal arts and sciences. The University seeks to foster in all its students life-long habits of careful observation, critical thinking, creativity, moral reflection and articulate expression. (From the Fordham University Mission Statement.)

Education for Intellectual Excellence

One purpose of the Fordham University liberal arts core is to enable students to go beyond mere proficiency and achieve a level of excellence in the essential skills of literacy. Excellence in the expressive skills of writing and speaking with logical clarity, that is, *eloquentia perfecta*, is founded on the arts of reading, listening, observing, thinking, and mastery and thorough understanding of the topic under consideration. The first task of the student of the liberal arts is listening and observation for the sake of understanding. Such observation and listening is not, in essence, passive but rather a supremely active engagement of the mind in a genuine conversation. Students of the liberal arts converse not only with those few who are present in the university halls and those who speak their own language but also with those in distant places, those

who speak other languages, and those who are absent, perhaps even long dead.

Education for Freedom

Education in the liberal arts has traditionally been called "liberal" for several reasons, but among them is the fact that these arts engender the ability to form judgments based on sound reasoning, free of prejudice and free of insufficiently examined premises. Such critical and independent thinking demands knowledge of ourselves and the cultures that have shaped us. Learning to think, if pursued according to its most exacting standards and taken to its greatest depths, demands the actualization of our most distinctly human capacities, including the capacity for freedom. A liberal education prepares the student for a creative life, one capable of transforming its own conditions. In this regard, the liberal arts attempt to make learners aware of and aspirant to the greatness of the human.

Education for Others and Respect of Difference

A liberal arts education involves a community of learners. This community, committed to achieving excellence in the practice of the liberal arts, is composed of learners who depend on each other in a task that is too great for any one of them or even any one generation alone. This community of learners forms a republic of learning that transcends any one generation or nationality. The unifying principle of this republic is the preservation and advancement of the arts, the sciences, and wisdom.

The conversation in which Fordham's core engages its students aims to engender civility, that is, an attitude of respect and openness to the other and to the world. This respect is a foundational virtue both for the University and for modern pluralist societies: for the university because the intelligent conversation at the heart of education is not possible without it; and for pluralist societies because their civic life requires tolerance of differences. Acknowledging and understanding human beings of different historical periods, genders, sexualities, ages, religions, races, ethnicities, and cultures is an intrinsic part of the perspective gained through learning in Fordham's humanistic Core Curriculum. It invites students to go beyond themselves and the familiar, to understand the world through the eyes of the other, and in so doing, helps prepare them for citizenship in pluralist societies and nourishes the quest for social justice.

Education for Leadership

The humanistically educated do not stand by as idle spectators of suffering and strife, but attempt to serve others and the communities to which they belong, that is, their families, their neighborhoods, their countries, and the world. Fordham is not an ivory tower suspended above the world, but a community forming leaders and citizens in the midst of one of the world's capitals—New York City. Fordham and New York City share a common fate and collaborate in a mission of justice and human welfare that spans from their immediate neighborhoods to the globe.

Education for Wisdom

A liberal arts education demands a spirit of inquiry that bars no question in itself and no aspect of life. Fordham's Core Curriculum requires, therefore, the mastery and questioning of the various ways of knowing demanded by the most diverse subject matters and disciplines. This key part of undergraduate education leads to questions concerning meaning and values, and the nature and purpose of human action in the world, and includes an openness to questions of faith and the transcendent. What begins as a quest for excellence in the practice of writing and

speaking leads to a quest for higher things, to a search for the wisdom that transforms life for the better. Socrates insisted at the very beginning of higher education that the eloquent sophist is not the ultimate goal; that in order for higher education to be complete, it must seek wisdom: *"We were educated once, and it is indeed taking our whole life to get over it, to cease being astonished at what is"* (Phaedrus).

Degree Requirements

Fordham College at Lincoln Center awards both the B.A. and the B.S. degrees, as well as the B.F.A. degree. The bachelor's degree programs at Fordham College at Lincoln Center Hill are four-year, eight-semester programs. Degrees are awarded on the successful completion of a minimum of 36 courses of three or more credits each, and 124 credits, with a minimum cumulative index of 2.000, and completion of the core curriculum and a major. It is expected that students will be in residence during the final semester in which they complete their degree.

Students ordinarily take 20 courses (usually three-credit) in their first and second years and 16 courses (usually four-credit) in their third and fourth years.

Academic Policies and Procedures

Academic Policies and Procedures pertaining to students at FCLC:

- Academic Advising (p. 75)
- Academic Progress (p. 75)
- Business Coursework (p. 77)
- Nonmatriculated Students (p. 77)
- Registration (p. 77)
- Summer Courses (p. 78)

Academic Policies and Procedures pertaining to all undergraduate students:

- Academic Progress, Probation, Suspension, and Dismissal (p. 14)
- Admissions Policy (p. 15)
- Attribute Code Index (p. 15)
- Dean's List (p. 19)
- Deferred Examinations (p. 20)
- Grading System (p. 20)
- Important and Useful Links (p. 22)
- Incomplete Coursework (p. 22)
- Integrity of Full-Time Study (p. 23)
- Limits on Number of Majors and Minors (p. 23)
- Payment of Tuition and Fees (p. 23)
- Procedure for Appealing a Course Grade (FCRH, FCLC, and Gabelli School) (p. 23)
- Refund (p. 24)
- Student Attendance (p. 26)
- Transcript of Record (p. 26)
- Undergraduate Policy on Academic Integrity (p. 27)
- Withdrawal from the University and Leaves of Absence (p. 33)

Academic Policies and Procedures, university-wide:

- Affirmative Action Policy (p. 30)
- Campus Safety (p. 30)

- Equity in Athletics Disclosure Act (p. 30)
- Nondiscrimination and Director of Gender Equity/Title IX Coordinator (p. 30)
- Numbering of Undergraduate Courses (p. 30)
- Recruitment of Jesuits to the Faculty (p. 31)
- Reserved Rights (p. 31)
- Student Records (p. 31)
- Support Services for Students with Disabilities (p. 32)
- University Code of Conduct (p. 33)

Academic Advising For the Class of 2025

In their first year at Fordham, most undergraduates in the class of 2025 were supported by core or transfer advisors—faculty members and administrators who have a general knowledge of the core curriculum and college degree requirements and policies.

Upon declaring a major, students receive their primary advising on all matters pertaining to their major from their department or program, while class deans—and the assistant dean for student support and success—advise students on fulfilling their core curriculum and graduation requirements. Students are encouraged to consult their major advisors regularly to discuss their academic and professional progress.

For the Class of 2026 and Beyond

Students at FCLC and FCRH are advised and supported by professional advisors throughout their undergraduate careers, in close contact with departments, programs, the assistant dean for student support and success, and other areas across the university. Advising for all undergraduates in the colleges is designed to support student success in keeping with Fordham's values and mission, and it includes robust faculty mentoring.

Academic Progress Academic Standing Policy

Academic standing is determined by semester or cumulative Grade Point Average (GPA) and the credit hours earned by class year. To remain in good academic standing at Fordham College and retain any awarded financial aid, students must meet established year-by-year standards of "academic progress." Faculty and administrators are dedicated to supporting students in meeting these standards for each class year as outlined in the Academic Status section.

The following categories are used to define a student's academic standing at Fordham College:

Good Academic Standing

Students are in good academic standing when they have a cumulative 2.0 GPA and are on track toward graduation as defined by the Credit Completion Policy below.

Academic Notice

Academic Notice is meant to help the student stay on track toward graduation and improve their GPA in the next semester. Students on Academic Notice are expected to work with their Academic Advisor on a Success Plan. Students may be placed on Academic Notice if:

- They meet the 2.000 GPA requirement, but are below a 2.300; OR
- They withdrew from more than one 3+ credit course in a semester.

Academic Restoration

Academic Restoration is a serious warning that a student's academic record at the University is not satisfactory. Students on Academic Restoration may continue to study at Fordham and are expected to work with their Academic Advisor on a Success Plan, which will include a discussion about participation in non-academic activities, including student organizations. Students may be placed on Academic Restoration if:

- They earn lower than a semester or cumulative 2.000 GPA.

Suspension

Suspension is a University-sanctioned pause in academic studies at Fordham College for at least one semester, and can only be granted for a maximum of 2 semesters. A student can be placed on Suspension if:

- They earn a GPA as indicated in the Academic Status section of the Bulletin; OR
- They receive three or more failing grades in one semester; OR
- They have been on Academic Restoration for two consecutive semesters.

To return to Fordham College after a Suspension, a student must apply for readmission. Readmission is granted as long as the student has demonstrated academic readiness to be successful at Fordham.

Dismissal

Academic Dismissal is the ultimate sanction imposed for failure to meet the standards outlined below toward completion of a student's bachelor's degree. A student who has been dismissed is no longer permitted to take undergraduate courses at Fordham College. A student may be dismissed from the College for any of the following reasons:

- Falling below the GPA as outlined in the Academic Status section of the Bulletin; OR
- Attaining a GPA of 1.000 or lower in any semester; OR
- Returning from Suspension and not demonstrating academic readiness in the first semester; OR
- Being placed on Academic Restoration for three consecutive semesters.

Appeal Policy

All academic standing decisions may be appealed in writing to the Dean of the college. The appeal must be made within three business days of the notification of change in academic standing. An appeal should include the following items:

- Documentation of any extenuating circumstances that may have impacted the student, such as death in the immediate family or an illness; AND
- A statement from the student explaining the reason for the appeal.

Once the appeal is received, the Dean will make a decision in consultation with the Associate Deans, and that decision will be final.

Academic Status

The guidelines below are used to determine a student's Academic Standing as well as Satisfactory Academic Progress (SAP) which is

connected to their financial aid package. Students who do not meet the standards below may need to appeal their financial aid package. More information on the SAP Appeal can be found at Financial Aid.

For graduation, the student must successfully fulfill the following requirements:

- Complete a minimum of 36 courses of three credits or more; AND
- Complete a minimum of 124 credits; AND
- Complete a minimum of 64 credits at Fordham University, not to include any courses taken as Pass/Fail; AND
- Earn a cumulative grade point average (GPA) of 2.0 or higher; AND
- Complete the Core Curriculum; AND
- Complete the requirements for a major.

Full-time students should complete their coursework in four years. Students who require extra time to complete their degree due to special circumstances such as illness, a change in major, etc. should work with their Academic Advisor or Class Dean to complete their coursework in at least six years.

W (Withdrawal), ABS (Absent from exam), or INC (Incomplete) grades (p. 20) are to be used in special situations based on an individual's circumstance. Students are advised to minimize grades of W, ABS, and INC, as these may delay progress towards graduation.

Repeated courses will be calculated into a student's GPA and will not replace the original grade.

The outline below is a guide for students to keep on track toward graduation. Failure to meet these standards based on class year will result in a change in the student's Academic Standing and could affect financial aid.

Year or Classification	Good Academic Standing	Academic Restoration	Subject to Suspension	Subject to Dismissal
First Year (0-29 credits)	2.000	1.400-1.999	1.350-1.399	Less than 1.350
Sophomore (30-59 credits)	2.000	1.600-1.999	1.550-1.599	Less than 1.550
Junior (60-89 credits)	2.000	1.800-1.999	1.700-1.799	Less than 1.700
Senior (90+ credits)	2.000	Less than 2.000		

Credit Completion Policy

Independent of the student's GPA, the completion of fewer credits than outlined below may affect a student's academic standing for not maintaining satisfactory academic progress toward the bachelor's degree. Falling below these completion rates may cause a student to lose financial aid.

Please note: these standards differ slightly for students receiving funds from the New York State Tuition Assistance Program (TAP).

Year or Classification	Credits Attempted ¹	Percentage Completed ¹	Minimum Credits Completed ²
First/First Year	0-29	65%	18-20
Second/Sophomore	30-59	70%	42

Third/Junior	60-91	75%	69
Fourth/Senior	92+	80%	99-100

¹ Transfer credits accepted by Fordham are counted in both credits attempted and credits completed, although the grades are not counted in the GPA.

² For students pursuing a degree on a part-time basis, credits earned will be proportionate; for example, half-time students should complete half of these credits.

The registration portal only allows students who failed or withdrew from a non-repeatable course to retake that course. If a student passed a course, but needs to retake it for a better grade, consultation with the department offering the course and the student's adviser or class dean is needed.

Business Coursework

Undergraduate liberal arts students in all three liberal arts colleges (FCRH, FCLC, and PCS) may take up to six courses in the Gabelli School of Business. Students should be aware that business courses are three-credit courses, rather than four-credit courses, typically offered in PCS, FCRH and FCLC for juniors and seniors. Hence, when considering these minors, students should consult with their advisors to be sure they will have the minimum number of credits (124) required for graduation. Because a maximum of six courses from the Gabelli School of Business can be taken, FCRH, FCLC, and PCS students may consequently pursue only one business minor.

As an exception, students minoring in business administration as part of a Bachelor of Arts or Bachelor of Science degree must complete a minimum of 120 credits to earn their degrees (compared to 124 credits).

Please note that all of the business school courses must be taken at Fordham University to apply.

A number of minors in business are available to students at FCRH, FCLC, and PCS. While not all minors are available to all students, a list of their requirements is listed here.

Nonmatriculated Students

Qualified students who are not enrolled in a degree program at Fordham are welcome to attend the college through the Visiting Student and Special Student Programs. However, they are not eligible for state, federal, or institutional aid through Fordham University.

Visiting Students

Those students who are matriculated at another college or university and who wish to attend the college as a full time student may apply through the Office of Undergraduate Admission in Room 203. A visiting student may maintain nonmatriculated status for one academic year. After such time, students must receive approval from the Office of Undergraduate Admission in order to continue their studies. Students should contact their degree-granting institution in regard to financial aid assistance and course approval. For a transcript of grades to be sent to their institution, students should apply to the Office of Academic Records.

Visiting students who wish to study on a part time basis should contact the School of Professional and Continuing Studies, Room 301, or 212-636-7333.

Juilliard-Fordham Exchange Students

On a space-available basis, up to six Juilliard students each semester may enroll in courses of intermediate and above instruction in French, German, or Italian, or business or economics courses that have no prerequisites. Tuition is not charged for these courses. Registration of Juilliard students will be arranged through the associate dean of Fordham College at Lincoln Center. Interested Juilliard students should contact their dean of academic affairs.

Special Students

Students with a degree from an accredited college or university may apply to further their studies through the School of Professional and Continuing Studies. This non matriculated status allows students to register for courses for a period of one academic year. Special students must notify the School of Professional and Continuing Studies of their intention to continue study at the College beyond this period of time.

Alumni Audit

A graduate of any undergraduate college of Fordham University may audit a course on an unofficial basis for a nominal fee; it will not appear on a transcript, and the student receives no credit. Alumni should contact the PCS dean's office (LL302) for details.

Registration

Matriculation

Matriculated students are those who have been admitted as candidates for a degree. A nonmatriculated student is one who has not been admitted as a degree candidate but has received approval to register for credit courses.

Classification of Students

Class standing is determined by the number of credits the student has completed, which in turn determines which class dean the student will work with. Exception: BFA students' class dean is based on their entry year.

Year or Classification	Credits Completed
First Year	0-29
Sophomore	30-59
Junior	60-91
Senior	92 and above

Official Registration

Fordham University recognizes that the responsibility for each student's academic success is shared by the student, the faculty, and the administration. Therefore, before a student registers for coursework at the University, preregistration advising is provided.

An advising hold is placed on each student. Once students have met with their adviser, this hold is removed and students may register for the next semester. Students must register according to the schedule provided in their registration materials before attending any course. Registration materials are emailed to each student's Fordham email address before official registration in the fall (for the next spring term) and spring (for the next fall term). Students must register before the first day of classes.

Students will not be awarded credit for courses they have not registered for by the end of the add/drop period.

Course Changes

Students may change their course schedules by adding/dropping until the deadline specified in the academic calendar. Note that the add/drop period is meant for replacing one course with another. Students who drop all their classes during the add/drop week will be responsible for tuition charges corresponding to withdrawal prior to the second week of classes.

Veteran students should be aware that if they are using any military education benefits, withdrawal from a class may create a debt with the VA, their service branch, or Fordham. Before withdrawing from a class, such students should consult with the VA Certifying Officials in the Office of Academic Records.

Registration in Other Fordham Schools

With a few exceptions, such as Honors Program and Manresa courses that are college-specific, FCLC students may register for courses in GSB, PCS-LC, PCS-RH, and FCRH. Students may not take more than six courses at the Gabelli School of Business (GSB).

Please note that FCLC students are not permitted to take online courses during the academic year.

Credit/Course Load

Full-time status is achieved by registering for 12 or more credits per term; part-time status involves a credit load of fewer than 12 credits. Full-time status is needed for financial aid and residential life. The normal credit load per term is five three-credit courses for first years and four four-credit courses for juniors and seniors.

Students who have demonstrated their ability to carry a 16-credit course load with at least a 3.000 cumulative GPA may request special permission of an assistant dean to enroll in an additional course. Students paying the flat tuition rate will be charged extra tuition for any credits over 18. (B.F.A. students may register for up to 21 credits without additional charges, and students majoring in natural science for up to 20.) Exceptions: Juniors and seniors who have achieved a 3.700 grade point average (cumulative or for the two preceding semesters) are eligible for a scholarship for a fifth course taken to enrich their academic program. Such scholarship courses and credits may not be used to accelerate graduation, that is, to reduce the number of full-time semesters a student spends at Fordham College at Lincoln Center. B.F.A. students may register for up to 21 credits without additional charges, and students majoring in natural science or registered as prehealth may register for up to 20 credits. The college reserves the right to cancel the registration of students who take more than the maximum credit load without permission.

Leave of Absence and Readmission

The leave of absence policy is described in the Academic Programs, Policies, and Procedures chapter of the bulletin.

All former students who wish to apply for readmission must complete the online Undergraduate Readmit Application Form, which will be submitted electronically to the Office of Academic Advising (LL804; 212-636-6350).

In addition to the application, a personal statement describing the applicant's activities while away from college must be submitted. An interview may be required as part of the readmission process.

Readmission decisions are based primarily on the applicant's previous academic record with the college, although other factors may be considered as well.

Summer Courses

Summer Courses at Fordham

Fordham offers summer courses in three distinct sessions: Session I (approximately the month of June), Session II (approximately the month of July), and Session III (spanning Session I and Session II with less frequent class meetings). Students can take Fordham summer courses according to these guidelines:

- A maximum of 2 courses (up to 8 credits) per summer are permitted.
 - It is strongly recommended to take at most 1 course per session.
- Exceptions can be allowed only for extenuating circumstances, with approval of the student's Academic Advisor or Assistant Dean for their class year. These decisions are based on the student's academic history

More information on Summer at Fordham can be found at this link.

Summer Courses Taken at Other Universities

Students may receive credit for courses taken outside of Fordham

- for which they earned a grade of C or above, AND
- which were taken during the summer at an accredited four-year college or university.

(Please note that the policy on this page does not refer to Study Abroad courses. All requests for summer courses taken abroad must follow the Study Abroad application process, which can be found here.)

All summer courses taken outside of Fordham must be approved in advance through the External Summer Course Approval Form found in the student portal. The guidelines for taking external courses are:

- The student must have a GPA of 2.000 or higher.
- Courses to be applied toward a major or minor must be approved through the academic department or program through the Director of Transfer Students. Note that the department or program may have a limit on how many external courses may be applied to the major or minor.
- In order to meet residency requirements, the student must not exceed 60 transfer credits in total.

During the fall and spring semesters, as well as winter break, students may not take courses at another college or university with the exception of an approved study abroad program.

Departments

The following is a list of academic departments and interdisciplinary units at Fordham College at Lincoln Center.

- African Studies (p. 155)
- African and African American Studies (p. 153)
- American Studies (p. 158)
- Anthropology (p. 177)
- Art History (p. 180)
- Asian American Studies (p. 183)

- Bioethics (p. 184)
- Chemistry and Biochemistry (p. 193)
- Classical Languages and Civilization (p. 200)
- Communication and Media Studies (p. 202)
- Comparative Literature (p. 217)
- Computer and Information Sciences (p. 219)
- Dance (p. 225)
- Disability Studies (p. 230)
- Economics (p. 231)
- English (p. 234)
- Environmental Science (p. 241)
- Environmental Studies (p. 243)
- Fashion Studies (p. 248)
- History (p. 257)
- Humanitarian Studies (p. 263)
- Integrative Neuroscience (p. 269)
- International Political Economy (p. 272)
- International Studies (p. 273)
- Irish Studies (p. 282)
- Islamic Studies (p. 282)
- Jewish Studies (p. 284)
- Languages and Cultures (p. 285)
- Latin American and Latino Studies (p. 301)
- Mathematics (p. 312)
- Medieval Studies (p. 316)
- Middle East Studies (p. 319)
- Music (p. 320)
- Natural Sciences (p. 322)
- New Media and Digital Design (p. 326)
- Orthodox Christian Studies (p. 328)
- Peace and Justice Studies (p. 330)
- Philosophy (p. 331)
- Political Science (p. 337)
- Psychology (p. 340)
- Religious Studies (p. 344)
- Social Work (p. 347)
- Sociology (p. 362)
- Theatre and Visual Arts (p. 369)
- Theology (p. 376)
- Urban Studies (p. 380)
- Women, Gender, and Sexuality Studies (p. 382)

Honors Program at FCLC

The honors program at Fordham College at Lincoln Center is an opportunity for talented and motivated students to explore many areas of learning in a small intellectual community of student scholars and faculty. The program is limited to approximately 18 students in each year and is directed by a faculty member, as well as a faculty adviser who stays with each class through their four years. The honors program gives students a solid grounding in the major academic disciplines, and then prepares the students for independent learning and research, culminating in a senior thesis or project.

Students are selected for invitations to the honors program in the spring before their first year. On rare occasions students are admitted to the program in the middle of their first year or at the beginning of their sophomore year. The honors curriculum replaces the regular Core Curriculum of the college with a series of intensive seminars. A dedicated honors seminar room on the ninth floor of the Lowenstein Center is available for honors classes and other activities. Students enrolled in the honors program gather outside of class for occasional dinners, visits to museums and libraries, and cultural events.

For more information

Visit the Lincoln Center Honors Program web page.

Requirements

During the first year the honors student takes four honors seminars (two each semester) in philosophy, English, theology, and history. In addition, students take a full year interdisciplinary natural science and math class and workshops in writing and public speaking. Honors students also take a year of a modern or classical language at the intermediate level or higher. (If a student starts a new language in the first year, four semesters will be required.)

In sophomore year honors students have more choice in their schedule. Each semester they take two interrelated honors courses that use the resources of New York City. The other six courses taken in sophomore year are chosen by the student in consultation with the class adviser.

In the junior year, the student's primary focus is on the major course of study, but students also complete an honors requirement from among the following options, writing a reflection at the conclusion of the experience:

- They may elect to study abroad in a program approved by the Honors Director.
- They may complete a tutorial or research project designed by the student and one or more faculty and approved by the Director
- They may arrange a special internship (e.g., work with an artist, writer, or scientist, with directed academic readings), approved by the Director.
- They may undertake a semester or yearlong community service project, approved by the Director.

In the senior year, honors students will participate with their peers in a senior thesis workshop and in the honors Senior Values seminar. Finally, to receive honors, students are required to publicly present their thesis or the equivalent (i.e., artistic project).

Course	Title	Credits
Year 1

Supporting Student Success

Assistant Dean for Student Support and Success

At its core, Fordham University is committed to the holistic development of students' academic and personal success. We offer proactive academic support for our students through student-centered activities and programs, intentional goal-setting, and opportunities for personal and professional discernment. The assistant dean for student support and success can assist you in these areas, as well as connect you with other available resources at the University. Students can contact the assistant dean directly (Tracyann Williams, twilliams126@fordham.edu) or be referred to develop an individualized success plan.

Knack Tutoring Services

Fordham has partnered with Knack Tutoring to provide free peer tutoring across all subjects. See the FCLC Tutoring Services page for information on signing up to receive or provide tutoring.

In addition to Knack, departmental tutoring programs are available as follows.

College Writing Center

Providing more than a proofreading service, our tutors will work with you on a variety of logical, rhetorical, and grammatical concerns in your writing. We can assist you with any type of writing from your curriculum, from conception, to composition, to completion. Our aim is not only to help you perfect an individual essay; we want to help you develop the tools you need to become a better writer. Our service is free and, if you come with the right expectations and the willingness to participate actively in the session, extremely effective. Visit the Writing Center website for more information.

Mathematics Help Room

The Department of Mathematics runs a Math Help Room staffed by faculty and upper class math majors. It is located in Lowenstein QuinnX Library (street level). Appointments are not necessary. The hours for the Math Help Room are subject to the opening hours for QuinnX. The staffing schedule will be announced at the beginning of each semester. Any student at Fordham is welcome to come and seek help. There is no charge for this service. Visit the FCLC tutoring website for more information.

Economics Tutoring Center

The Economics Department offers free tutoring services in ECON 1100 Principles of Macroeconomics, ECON 1200 Principles of Microeconomics, ECON 2140 Statistics I, and ECON 2142 Statistics II. Tutoring is primarily virtual, with some in-person hours to be announced. Visit the FCLC tutoring website for more information.

Computer Science Tutoring

The Department of Computer and Information Sciences provides tutoring for students in CISC 1100 Structures of Computer Science, CISC 1400 Discrete Structures, CISC 1600 Computer Science I, CISC 2100 Discrete Structures II and CISC 2000 Computer Science II. There is no charge for this service. Visit the FCLC tutoring website for more information.

Information Technology Services

Fordham University's information technology services are provided in support of your academic goals. Please visit the Student Technology Services website for detailed information on such services as My.Fordham, your Fordham email account, computer maintenance, and security tips, the IT Service Desk, recommended computer specifications, free software, computer labs, and the campus network.

Fordham University Portal

The portal is the gateway to Fordham's online resources, including Blackboard; campus and personal announcements; your Fordham Gmail and Google Apps; and registration, financial aid, bill payment, and academic course information through Banner—the student information system. Tutorials online help you navigate and find the apps you need.

To gain access to the portal, you students will need to have claimed their username. To do this, open your the browser and go to my.fordham.edu. Click the "New user: Claim account" link and follow the prompts. If you problems are encountered, please call the Service Desk at 718-817-3999 for assistance; only they can help you students validate your their personal information and escalate the issue if necessary.

Fordham IT Service Desk

The Fordham IT Service Desk provides support to all Fordham University faculty, staff, and students. Questions about your computer's operating system, initial setup, software applications, claiming your username via the Portal (my.fordham.edu), e-mail access, or network connection may be directed to ITCC by phone, email, or request form. Visit the website for more information.

Telephone: 718-817-3999

Email: helpit@fordham.edu

The Olga M. Ficarra/Francis J. Morison Language Laboratory

The Language Learning Centers in Lowenstein 412 (LC) and Keating B25 (RH) provide advanced instructional technology for language students in all the languages Fordham currently teaches (Arabic, French, German, Hebrew, Italian, Japanese, Mandarin, Spanish, and Russian), as well as access to international television stations and films. Whether you are enrolled in a language course or just want to study a language on your own, the Language Learning Centers are open for you to hone your language skills. Visit the website for more information.

Gerald M. Quinn Library

The Gerald M. Quinn Library is located in the 140 West building at the Lincoln Center campus, with the QuinnX annex located across the hall on the first floor of the Leon Lowenstein building. Quinn supports the curricula of Fordham College at Lincoln Center, the Graduate School of Social Service, the Gabelli School of Business, and the Graduate School of Education. The Learning Commons on the first floor of Quinn Library offers open stacks and self-checkout of over 90,000 of the most recently published titles covering subjects supporting a myriad of academic disciplines. Approximately 350,000 books are housed in QuinnX. All HOLD requested items are available for pick-up on shelf units adjacent to the self-check kiosks at the first floor entrance to Quinn. An extensive collection of DVDs and CDs can also be obtained from QuinnX in the same fashion. Reading areas are located on all three floors of Quinn Library, along with access to public computing throughout. Over 1,500 periodical subscriptions (full-text online and hard copy) are also available to the entire Fordham community. The Fordham online catalog (OPAC) reflects the entire holdings of the Lincoln Center, Westchester, and Rose Hill collections and print materials can be sent to patrons on all campuses upon request made through InterCampusLoan. More than 300 online databases may be accessed in the library or via remote access. Items at other universities are also available to Lincoln Center students through the InterLibraryLoan department. Reference consultations can be easily arranged from the library website or stopping at the library services desk on the second floor. In addition, the writing center is located on the second floor of Quinn Library. Please consult their website for further details.

For information regarding the hours, services, and policies of the University libraries, please refer to the Fordham University library website at fordham.edu/library.

Visual Arts Complex

LC: Lowenstein, Street Level, SL 24A-F

Visual Arts Office: Lowenstein 423, 212-636-6303

The 12,000-square-foot visual arts complex at Lincoln Center has studios designed to offer the best possible environment for each discipline: A

large airy painting and drawing studio, a dedicated graphics lab with all of the industry standard graphics programs, state-of-the-art film and video-editing and screening facilities, an architectural lab with computers, and large plotter printers and work tables. In addition, there is an outstanding photography area with computer and printing digital capabilities, a well-equipped darkroom, and separate finishing and critique rooms. We make every effort to keep all software and hardware up-to-date and equivalent to industry standards.

All studios are available to students whenever classes are not in session, including weekends, evenings, and school breaks.

The department has two galleries at Lincoln Center. The Ildiko Butler Gallery is located near the 60th Street entrance. Exhibits feature senior student projects and museum-quality exhibitions of interest to the entire University community. The Susan Lipani Gallery, located in the visual arts complex, features student work and the work of invited artists related to the curriculum.

Gabelli School of Business

The Gabelli School of Business provides an innovative, rigorous, experience-based undergraduate education designed to cultivate future leaders of the business world. Through a unique dual foundation in business and the liberal arts, Gabelli School students learn to write compellingly and persuasively, deliver captivating presentations, comprehend events on a global scale, and understand how the lessons of the past influence our present. These are among the many traits that set Fordham business graduates apart.

Each Gabelli School student may customize a degree program that matches his or her goals. Within the school's areas of study—accounting, alternative investments, business economics, communications and media management, entrepreneurship, finance, fintech, healthcare management, information systems, law and ethics, management, marketing, social innovation, sports business, sustainability, and value investing — students select majors, minors, and concentrations that give them the background they need to enter the career field of their choice.

The Gabelli School's focus is unwaveringly global. In recognition of the fact that all commerce today is world commerce, each course weaves in international themes and exposes students to the inner workings of economies across the globe. Students have the opportunity to crystallize this particular element of a Gabelli School education through the secondary concentration in global business, which requires three internationally themed courses, proficiency in a foreign language, and either study abroad experience or a globally oriented internship.

The heart of the Gabelli School program is its dual core curriculum. The integrated business core's 13 courses provide a solid grounding in business fundamentals while honing students' ability to clearly express themselves, collaborate in teams, think strategically and creatively, and evaluate their own work. The liberal arts core, also 13 courses, combines economics, English, the fine arts, history, mathematics, philosophy, and theology to give Fordham business students an uncommonly well-rounded education.

There are other hallmarks of the Gabelli School education as well. One is a commitment to personal and professional development. Through a carefully planned four-year sequence, students become aware of their personal and career goals and chart concrete plans for attaining them. Another is a hands-on, experiential education. Gabelli School course assignments are crafted to replicate the situations that students will

face as professionals and to develop the skills needed to handle them successfully. Students engage in business simulations, research actual firms, develop plans to launch their own companies, utilize industry-standard financial analysis software, and much more.

All of this happens in the business capital of New York City. With one campus on Fordham's Rose Hill campus in the Bronx and the other at Fordham's Lincoln Center campus, the Gabelli School puts its students in extraordinarily close proximity to the fast-paced corporate world of Manhattan. More than 90% of Gabelli School students hold at least one internship while they are in college. Course syllabi include visits to the headquarters of multinational corporations, institutions such as the New York Stock Exchange and the United Nations, and the workplaces of scores of Fordham alumni. The Gabelli School of Business alumni network is extraordinarily strong; alumni routinely return to campus as guest speakers, act as mentors, and help students to find internships and jobs.

This high degree of alumni engagement is unsurprising given Fordham's role as a Jesuit university, where helping others is a core value. The Gabelli School's Jesuit identity comes into play in other ways, too, foremost among them the belief that business must serve a higher purpose than mere profit. Students are encouraged to think about how they, as business leaders, can contribute to the advancement of society and move the world forward in profound and lasting ways. They practice this concept from their earliest days as students, enrolling in local and international service-learning courses; volunteering as mentors and student leaders; launching socially conscious student businesses; and designing their own community service projects for additional credit.

Accreditations and Affiliations

Since its introduction in 1926, the bachelor of science degree program of the Gabelli School of Business has been fully recognized and registered by the University of the State of New York. The school has been a member of the Middle Atlantic (formerly New York State) Association of Colleges of Business Administration since the organization's formation in 1951. The Gabelli School is accredited by the Middle States Association of Colleges and Secondary Schools and, since 1939, by the Association for the Advancement of Collegiate Schools of Business—International (AACSB), which is recognized as the preeminent accrediting agency for baccalaureate and master's degree programs in business administration.

As an institution accredited by the AACSB, the Gabelli School has an active chapter of Beta Gamma Sigma, the national honorary business fraternity. Membership is based on, among other things, the maintenance of an outstanding scholastic record. Other active chapters of honorary and professional fraternities with national affiliations include Alpha Sigma Nu, Phi Kappa Phi, and Beta Alpha Psi, the national honorary for financial services.

In addition to these affiliations, accreditations, and associations, the Gabelli School is a member of the American Council on Education's Internationalization Collaborative, which is an invitational forum for member institutions to advance international education on their campuses and nationally, and is one of only 24 schools worldwide to be selected as a "Champion" university within the United Nations' Principles of Responsible Management Education initiative.

Majors

Majors at Rose Hill

- Accounting - Public Accountancy Major (CPA-150 track) (p. 150)
- Accounting - Public Accounting Major (120 credits) (p. 151)
- Accounting Information Systems Major (p. 267)
- Applied Accounting and Finance Major (p. 250)
- Business Administration Major (p. 190)
- Finance Major (p. 252)
- Information Systems Major (p. 268)
- Marketing Major (p. 311)

Majors at Lincoln Center

- Global Business Major (p. 256)

Minors

The following business minors are available to Gabelli students:

- Business Law and Ethics Minor (p. 192)
- Economics Minor (p. 233)
- Sustainable Business Minor (p. 368)

Concentrations

Primary Concentrations

All primary concentrations at Rose Hill may also be pursued as secondary concentrations.

• Rose Hill:

- Accounting (p. 153)
- Business Economics (p. 191)
- Consulting (p. 365)
- Entrepreneurship (p. 367)
- Finance (p. 251)
- Information Systems (p. 268)
- Management (p. 308)
- Marketing (p. 310)
- Social Innovation (p. 346)

• Lincoln Center:

- Global Marketing with Consumer Insights (p. 310)
- Digital Media and Technology (Media Track) (p. 229)
- Digital Media and Technology (Technology Track) (p. 229)
- Global Finance and Business Economics (p. 252)

Secondary Concentrations

- Accounting (p. 153)
- Alternative Investments (p. 250)
- Business Economics (p. 191)
- Business Law and Ethics (p. 192)
- Business of Healthcare (p. 365)

- Communications and Media Management (p. 217)
- Consulting (p. 365)
- Credit (p. 251)
- Digital Marketing (p. 309)
- Entrepreneurship (p. 367)
- Finance (p. 251)
- Fintech (p. 251)
- Information Systems (p. 268)
- Integrated Marketing Communications (p. 310)
- Global Business (p. 256) (Rose Hill only)
- Management (p. 308)
- Marketing (p. 310)
- Marketing Analytics (p. 311)
- Personal Development and Leadership (p. 308)
- Process and Quality Analytics (p. 269)
- Social Innovation (p. 346)
- Sports Business (p. 364)
- Strategic Branding (p. 311)
- Value Investing (p. 252)

Academic Curriculum

The Gabelli School of Business offers coursework in a variety of areas. Each student's academic program has four distinct elements:

1. The liberal arts core (p. 85)
2. The business core (p. 88)
3. The major(s) (p. 82) and concentration(s) (p. 82)
4. Electives (p. 966)

All students take the same liberal arts core and business core. They customize their academic program by choosing their major(s), concentration(s), and electives.

Each part of the academic program plays a specific role in a student's overall education. The liberal arts core is designed to nurture curiosity and to give students the broad liberal arts foundation needed to engage in lifelong learning. The business core provides broad knowledge across all business disciplines while developing a student's written and oral presentation abilities, capacity for teamwork, critical thinking, and problem-solving skills. The major(s) and concentration(s) allow students to establish a focus in a specific area of business. Electives offer the chance to try new things and to cultivate additional areas of expertise.

Double Major Policy

Students may declare two majors (a double major) offered by the Gabelli School of Business, as long as their primary major is not business administration or public accountancy. And depending on a student's primary major, not all majors may be available as a second (double) major, as described below. In addition to declaring a primary major or a double major, students from all majors may declare a concentration or a primary and secondary concentration (p. 82).

Public Accountancy Majors (p. 150)

Cannot declare a double major, but may declare one or two concentrations (p. 82) in any area.

Public Accounting Majors (p. 151)

May declare a double major in Finance (p. 252), Information Systems (p. 268), Marketing (p. 311), or Global Business (p. 256) (and a concentration in any area).

Applied Accounting and Finance Majors (p. 250)

May declare a double major in Information Systems (p. 268), Marketing (p. 311), or Global Business (p. 256) (and a concentration in any area).

Accounting Information Systems Majors (p. 267)

May declare a double major in Finance (p. 252), Marketing (p. 311), or Global Business (p. 256) (and a concentration in any area).

Information Systems Majors (p. 268)

May declare a double major in Applied Accounting and Finance (p. 250), Finance (p. 252), Marketing (p. 311), Public Accounting (p. 151), or Global Business (p. 256) (and a concentration in any area except Digital Media and Technology, either track).

Finance Majors (p. 252)

May declare a double major in Accounting Information Systems (p. 267), Information Systems (p. 268), Marketing (p. 311), Public Accounting (p. 151), or Global Business (p. 256) (and a concentration in any area except Global Finance and Business Economics).

Marketing Majors (p. 311)

May declare a double major in Accounting Information Systems (p. 267), Applied Accounting and Finance (p. 250), Information Systems (p. 268), Finance (p. 252), Public Accounting (p. 151), or Global Business (p. 256) (and a concentration in any area except Global Marketing with Consumer Insights).

Business Administration Majors (p. 190)

Cannot declare a double major, but may declare one or two concentrations (p. 82) in any area.

Global Business Majors (p. 256)

Concentration in Global Finance and Business Economics

May declare a double major in Accounting Information Systems (p. 267), Applied Accounting and Finance (p. 250), Information Systems (p. 268), Marketing (p. 311), or Public Accounting (p. 151).

Concentration in Global Marketing with Consumer Insights

May declare a double major in Accounting Information Systems (p. 267), Applied Accounting and Finance (p. 250), Information Systems (p. 268), Finance (p. 252), or Public Accounting (p. 151).

Concentration in Digital Media and Technology (all tracks)

May declare a double major in Accounting Information Systems (p. 267), Applied Accounting and Finance (p. 250), Finance (p. 252), Marketing (p. 311), or Public Accounting (p. 151).

Degree Requirements

Four Year (Day) Program

The Gabelli School of Business program at Rose Hill consists of 40 courses and requires a minimum of 120 credits. (Please note that certain three-credit business core courses are split into two 1.5-credit courses; in such cases, those two courses do not count separately, but rather count together as one course.) Students must achieve a cumulative quality point index (GPA) of at least 2.0 to graduate.

Students who transfer into the Gabelli School of Business from another school must complete a minimum of 20 courses and 60 credits as matriculated Gabelli School students.

Gabelli School students typically take five courses per semester plus one Integrated Project per year. All students who come to Fordham without any prior credit for college coursework must take this number to be on target for graduation in four years. Any deviation from a five-course semester should be approved by the class dean.

See the Gabelli School of Business Core Curriculum (p. 83) and Academic Programs (p. 83) list for specific course requirements.

Below is a listing of business courses, liberal arts courses, and free electives for the different business majors, along with the number of courses of each type that must be completed for each major.

New York State guidelines require that at least 50% of students' curricula include courses in the liberal arts. Consistent with these guidelines, certain core coursework at the Gabelli School in the areas of communications, statistics, and ethics are considered to reflect liberal arts content. Such courses include Business Communications, Statistical Decision Making, and Ethics in Business.

Rose Hill

Business Administration Major (p. 190)

Course Type	Number of Courses
Business core	13

Free electives	0
Business elective(s)	2
Total number of courses	40

Evening Program

The Gabelli School of Business evening program allows students to take classes on a part-time or modified full-time basis, depending on the circumstances.

Admission to the Evening Program

There is no direct admission to the Gabelli School of Business evening program. Students first must be admitted to Fordham's School of Professional and Continuing Studies (PCS). For more information on this initial stage of the process, please visit the School of Professional and Continuing Studies Admissions web pages: <http://www.fordham.edu/pcs>.

Once accepted to the School of Professional and Continuing Studies, students must complete all of the Gabelli School's evening prerequisites. These are:

- ECON 1100 Principles of Macroeconomics
- ECON 1200 Principles of Microeconomics
- ECON 2140 Statistics I
- MATH 1108 Math for Business: Finite
- MATH 1109 Math for Business: Calculus

With those prerequisites complete and other evening-program requirements met, candidates must submit an internal transfer application. Candidates should contact the transfer dean to get more information about the requirements and to begin this phase. Decisions are typically made twice per semester.

Evening Program Schedule

Students take primarily evening-hours business courses and also may choose among a select number of evening and weekend liberal arts courses. All liberal arts core courses must be taken through Fordham's School of Professional and Continuing Studies (p. 97).

Evening students who wish to take business courses during the daytime may do so on a limited basis, with approval from the evening program director.

Evening Curriculum

The evening program is similar academically to the day program — including a liberal arts core, a business core, a major/concentration, and electives—but varies in its delivery, structure, and approach.

The evening program calls for at least 40 3- or 4-credit courses and 120 credits with a minimum cumulative index (GPA) of 2.0. Students who transfer from another school are required to complete a minimum of 20 courses and 60 credits as matriculated Gabelli School of Business students.

Evening students may generally choose from the same majors and concentrations available to four-year day students and listed in the Areas of Study (p. 93) section of this bulletin. They also may pursue a secondary concentration or a liberal arts minor, and, if interested, are encouraged to discuss this with the evening program adviser as soon as possible after their acceptance. Please note, however, that there are certain majors and concentrations that are more accessible to evening students and others that are more accessible to day students based upon scheduling concerns. Students should confer with the director of evening programs to determine the best program of study for their needs.

Below is a listing of business courses, liberal arts courses, and free electives required for the business administration major and the public accounting major. The number refers to the actual number of courses that must be completed for each major.

Business Administration Major (p. 190)

Course Type	Number of Courses
Business core	12
Liberal arts core	13
Primary Concentration	4
Liberal arts elective(s)	6
Free electives	4
Business elective(s)	1
Total number of courses	40

Accounting (Public Accounting 120-credit) Major (p. 151)

Course Type	Number of Courses
Business core	12
Liberal arts core	13
Major	11
Liberal arts elective(s)	4
Free electives	0
Business elective(s)	0
Total number of courses	40

Evening students are advised to save two or three liberal arts electives and the fine arts core requirement for their last year, because it is much easier to schedule these courses around the very specific senior-year business requirements.

In the event of questions, current evening students may consult the evening program director.

Liberal Arts Core

Students in the Gabelli School of Business are required to complete **13 courses** in the liberal arts core as part of their degree requirements.

Course	Title	Credits
ENGL 1102	Composition II ¹	3
	Texts and Contexts ²	3
PHIL 1000	Philosophy of Human Nature	3
PHIL 3000	Philosophical Ethics	3
THEO 1000	Faith and Critical Reason	3
	Sacred Texts and Traditions ²	3
	Understanding Historical Change ²	3
MATH 1108	Math for Business: Finite ^{1,3}	3
MATH 1109	Math for Business: Calculus ^{1,3,4,5}	3
ECON 1100	Principles of Macroeconomics ^{1,4}	3
ECON 1200	Principles of Microeconomics ^{1,4}	3
ECON 2140	Statistics I ¹	4
	Fine Arts ²	3

¹ Required course for the first year; must be completed prior to beginning the business core. Students in the Ignite Scholars Program complete an honors-level section of this course.

² See below for a list of courses that fulfill these requirements.

³ If the student is pursuing a language course or a fundamental course (i.e. MATH 1001 Math for Business: Precalculus or ENGL 1101 Composition I), then this course may be taken later as advised by the student's class dean.

⁴ Only these courses can be fulfilled by a score of 4 or 5 on an Advanced Placement exam. Other approved Advanced Placement exams with a score of 4 or 5 may fulfill a liberal arts or free elective requirement.

⁵ Gabelli School of Business students interested in pursuing a minor in Mathematics should take MATH 1206 Calculus I in lieu of MATH 1109 Math for Business: Calculus.

In all cases, the core curriculum also includes three distributive requirements: Global Studies, American Pluralism, and Senior Values Seminar. These requirements are satisfied by certain business courses for Gabelli School students.

- The Global Studies requirement is fulfilled by completing any course with the GLBB attribute. All Gabelli School majors already require at least one such course.
- The American Pluralism requirement is fulfilled by the completion of two business core courses: LPBU 3223 Principles of Management and MKBU 3225 Marketing Principles.
- The Senior Values Seminar requirement is fulfilled by another business core course, BLBU 3443 Ethics in Business.

Any Gabelli School student who wishes to complete a liberal arts major must also complete the full liberal arts core required of FCRH and FCLC.

Courses fulfilling Liberal Arts Core requirements

Understanding Historical Change

The following courses, which have the HC attribute, fulfill this requirement:

Course	Title	Credits
AFAM 1600	Understanding Historical Change: Africa	3
CLAS 1210	Understanding Historical Change: Ancient Greece	3
CLAS 1220	Understanding Historical Change: Ancient Rome	3
HIST 1000	Understanding Historical Change: Modern Europe	3
HIST 1075	Understanding Historical Change: Renaissance to Revolution in Europe	3
HIST 1100	Understanding Historical Change: American History	3
HIST 1103	Understanding Historical Change: Fighting for Equal Rights in American History	3
HIST 1200	Understanding Historical Change: Ancient History	3
HIST 1210	Understanding Historical Change: Ancient Greece	3
HIST 1220	Understanding Historical Change: Ancient Rome	3
HIST 1240	Understanding Historical Change: The Ancient World	3
HIST 1300	Understanding Historical Change: Medieval	3
HIST 1400	Understanding Historical Change: Latin America	3
HIST 1450	Understanding Historical Change: South Asian History	3
HIST 1550	Understanding Historical Change: Modern East Asia	3
HIST 1551	Understanding Historical Change: Representations of China and The West	3
HIST 1600	Understanding Historical Change: Africa	3
HIST 1650	Understanding Historical Change: The Black Atlantic	3
HIST 1700	Understanding Historical Change: Mideast	3
HIST 1750	Understanding Historical Change: Islamic History and Culture	3

HIST 1850	Understanding Historical Change: Jews in the Ancient and Medieval World	3
HIST 1851	Understanding Historical Change: Jews in the Modern World	3
HIST 1925	Understanding Historical Change: Science and Technology	3
LALS 1400	Understanding Historical Change: Latin America	3

Fine Arts

The following courses, which have the FACC attribute, fulfill this requirement:

Course	Title	Credits
ARHI 1100	Art History Introduction: World Art	3
ARHI 1101	Introduction to Art History: Europe	3
ARHI 1102	Introduction to Art History: Asia	3
ARHI 1103	Introduction to Art History: Americas	3
ARHI 1104	Introduction to Art History: Africa and African Diaspora	3
ARHI 1105	Introduction to Art History: Architecture	3
ARHI 1298	Art History AP	3
ARHI 3480	Art and Architecture in London	4
MUSC 1051	Who Cares If You Listen?! Music, Culture, and the Critical Ear	3
MUSC 1100	Introduction to Music History	3
THEA 1100	Invitation to Theatre	3
THEA 3520	Producing through a Social Justice Lens	4
VART 1101	Urbanism	3
VART 1135	Visual Thinking	3

Notes

- Gabelli School students in London may also apply MUSC 2031 Rock and Pop Music Since World War II to this requirement, even though it does not have the FACC attribute.
- Gabelli School students may also apply ARHI 2534 The Victorian City: Art and Architecture in the 19th Century London to this requirement, even though it does not have the FACC attribute.
- VART 1135 Visual Thinking has the FACC attribute effective Spring 2019.

Texts and Contexts

The following courses, which have the TC attribute, fulfill this requirement:

Course	Title	Credits
CLAS 2000	Texts and Contexts	3
COLI 2000	Texts and Contexts	3
ENGL 1004	Texts and Contexts: Upward Mobility and the Common Good	3

Fine and Performing Arts		
One course in Fine and Performing Arts ⁴		3

¹ Courses fulfilling this requirement have the TC (Texts and Contexts) attribute (p. 86).

² Courses fulfilling this requirement have the STXT (Sacred Texts and Traditions) attribute (p. 87).

³ Courses fulfilling this requirement have the HC (Understanding Historical Change) attribute (p. 86).

⁴ Courses fulfilling this requirement have the FACC (Fine and Performing Arts) attribute (p. 86). Several other course options (p. 86) are also available to Gabelli School students.

Ignite Scholars Program Business Core

Students in the Gabelli School of Business' Ignite Scholars Program are required to complete **13 business core courses** ³ plus **four integrated project (IP) courses** in their business core curriculum, as follows. They also complete additional program-specific coursework.

Course	Title	Credits
CBBU 1001	The Ground Floor: Starting and Succeeding at the Gabelli School of Business ¹	3
ACBU 2222	Principles of Financial Accounting	3
ACBU 2223	Principles of Managerial Accounting	3
BLBU 2234	Legal Framework of Business	3
SABU 2142	Statistics II	3
OPBU 3438	Operations and Supply Chain Management	3
BLBU 3443	Ethics in Business	3
FNBU 3221	Financial Management	3
MKBU 3225	Marketing Principles	3
LPBU 3223	Principles of Management	3
HPCB 4441	Honors Strategy	3
INSY 2299	Information Systems: GSB Integrated Core Only ²	1.5
INSY 2301	Information Systems: GSB Integrated Core Only ²	1.5
CMBU 2664	Business Communications: GSB Integrated Core Only ²	1.5

Ignite Program-Specific Courses

HPCB 4800	Ignite Scholars Readings ⁴	3
<i>Capstone Project</i> ⁵		
HPCB 4802	Ignite Capstone Project I	1.5
HPCB 4803	Ignite Capstone Project II ⁶	3
HPCB 4804	Ignite Capstone Project III	1.5

¹ Students take a special section of this course designated for Ignite Scholars.

² Certain 3-credit business core courses are split into two 1.5-credit courses; in such cases, those two courses do not count separately, but rather count together as one course.

³ Integrated Projects (IPs) are semester-long projects that use knowledge from the business core and apply it to real-world circumstances. Students complete one IP per year during their four-year program. All four projects must be completed in order to graduate.

⁴ This course may double-count as a liberal arts elective. Students who join the Ignite Scholars Program after their first year fulfill this requirement with HPCB 4800 Ignite Scholars Readings.

⁵ Credits earned as part of the capstone project may count towards liberal arts or free electives for Global Business majors (p. 256).

⁶ This course may double-count as an elective toward the student's major.

Business Core

Students in the Gabelli School of Business are required to complete **thirteen full-length courses** plus **four 1-credit value-added topical courses** (typically, one per year) in their business core curriculum, as follows:

Course	Title	Credits
CBBU 1001	The Ground Floor: Starting and Succeeding at the Gabelli School of Business	3
ACBU 2222	Principles of Financial Accounting	3
ACBU 2223	Principles of Managerial Accounting	3
BLBU 2234	Legal Framework of Business	3
SABU 2142	Statistics II	3
OPBU 3438	Operations and Supply Chain Management	3
BLBU 3443	Ethics in Business	3
FNBU 3221	Financial Management ¹	3
MKBU 3225	Marketing Principles	3
LPBU 3223	Principles of Management	3
SABU 4441	Strategy ²	3
INSY 2299	Information Systems: GSB Integrated Core Only ³	1.5
INSY 2301	Information Systems: GSB Integrated Core Only ³	1.5
CMBU 2664	Business Communications: GSB Integrated Core Only ³	1.5
CMBU 2666	Business Communications: GSB Integrated Core Only ³	1.5
One-Credit Topical Courses

- Nondiscrimination and Director of Gender Equity/Title IX Coordinator (p. 30)

- Numbering of Undergraduate Courses (p. 30)
- Recruitment of Jesuits to the Faculty (p. 31)
- Reserved Rights (p. 31)
- Student Records (p. 31)
- Support Services for Students with Disabilities (p. 32)
- University Code of Conduct (p. 33)

Academic Advising

Each student is different. Some know their major and career paths from the moment they arrive at Fordham. Others have no idea where to start. Still others think they know when they're first years, but arrive at completely different decisions after a few semesters. The Gabelli School's academic advising deans are adept at coaching students in each of these situations and more.

The entire specialized academic advising staff—first year, sophomore, junior, and senior class deans; the dean of international programs; the transfer dean; the evening program director; and the dean of honors opportunities—helps each student to plan an academic program and learn how to make wise decisions regarding academics, careers, and life in general.

Advising deans provide help in identifying goals, choosing courses, investigating majors and concentrations, experimenting with electives, securing internships, and building the portfolio of skills needed to succeed in any given area of business. For more details and contact information for each advising dean visit the Undergraduate Advising web pages.

Academic Advising for Student-Athletes

The primary mission of the Office of Academic Advising for Student-Athletes is to provide Fordham University's more than 550 NCAA student-athletes with the resources and direction needed to achieve their scholastic potential and to prepare them for postgraduate scholastic, athletic, and career opportunities. The office brings a breadth and depth of experience in athletics and higher education to their many responsibilities. These responsibilities include general academic counseling, eligibility monitoring, assistance in maintaining satisfactory progress toward degrees, and course scheduling. Mid- and post-semester grade reviews are conducted every semester.

The office has five full-time administrators, all of whom are dedicated to working with and for Fordham's student-athletes.

Academic Progress

Academic Standards Policy

To remain in good standing at the Gabelli School of Business and retain any awarded financial aid, students must meet established year-by-year standards of "academic progress." Faculty and administrators are dedicated to supporting students in meeting these standards. For details on standards for each class year, see the Academic Status section.

Full-time students are expected to complete their coursework in four years. Students who need additional time to complete their degrees due to special circumstances, such as an illness or a change in major, must receive approval from the senior class dean to continue their programs. Part-time students are not held to this four-year expectation and may take longer to complete their degrees.

It is extremely important that Gabelli School students develop adequate skills in written and oral English. Each teacher, no matter what the subject, may include an assessment of the student's ability to communicate as part of the grade. The teacher can adjust grades for the quality of the student's writing and has the right to require reports to be rewritten on the basis of poor writing alone.

If a student repeats a course, the original grade will remain and will be calculated into the student's GPA along with subsequent grades.

To preserve the quality of a Fordham education, the Gabelli School restricts the use of grades W (Withdrawal), ABS (Absent from exam), and INC (Incomplete). If a student does establish a pattern of these grades, it is considered evidence of failing to maintain reasonable academic progress.

Students must complete 120 credits and 40 courses to graduate. (Please note that certain 3-credit business core courses are split into two 1.5-credit courses; in such cases, those two courses do not count separately, but rather count together as one course.) If a student does not complete enough credits in the time allotted, he or she may warrant dismissal for failure to maintain satisfactory progress toward the bachelor's degree.

Failure to meet standards of academic progress may result in penalties, including probation, suspension, and dismissal. Students on probation may continue to study at Fordham and may be awarded financial aid, though this is not guaranteed; however, they will need to improve their academic status and return to good academic standing.

Minimum Credit Completion Policy

Year or Classification	Credits Attempted ¹	Percentage Completed ¹	Minimum Credits Completed ²
First/First Year	up to 30	65%	18-20
Second/Sophomore	30-60	70%	42
Third/Junior	60-92	75%	69
Fourth/Senior	92+	80%	99-100

¹ Transfer credits accepted by Fordham are counted in both credits attempted and credits completed, though the grades are not counted in the GPA.

² For Gabelli School evening students pursuing a degree on a part-time basis, credits earned will be proportionate. Half-time students should complete half of these credits; three-quarter-time students should complete three quarters of these credits.

Gabelli School Evening Students

First/First Year

Fall	15-29 credits attempted
Spring	30-44 credits attempted

Second/Sophomore

Fall	45-59 credits attempted
Spring	60-74 credits attempted

Third/Junior

Fall	75-89 credits attempted
Spring	90+ credits attempted

Academic Status

Though students must achieve a 2.000 cumulative GPA by the end of their academic program to graduate, minimum standards for the first three years of study are somewhat lower. Please note that for students receiving funds from the New York State Tuition Assistance Program (TAP) and other financial aid, academic standards differ somewhat from the chart below. For further details, consult Fordham's Office of Academic Records.

Gabelli School of Business Administration Day Program Students

First Year

Year of Attendance	Minimally Acceptable	Academic Probation	Subject to Suspension	Dismissal
Seven Semesters Until Graduate	2.000	1.400-1.999	1.350-1.399	less than 1.350
Six Semesters Until Graduate	2.000	1.500-1.999	1.450-1.499	less than 1.450

Second Year

Year of Attendance	Minimally Acceptable	Academic Probation	Subject to Suspension	Dismissal
Five Semesters Until Graduate	2.000	1.600-1.999	1.550-1.599	less than 1.550
Four Semesters Until Graduate	2.000	1.700-1.999	1.650-1.699	less than 1.650

Third Year

Year of Attendance	Minimally Acceptable	Academic Probation	Subject to Suspension	Dismissal
Three Semesters Until Graduate	2.000	1.800-1.999	1.700-1.799	less than 1.700
Two Semesters Until Graduate	2.000	1.900-1.999	-	less than 1.900
Two Semesters Until Graduate	2.000	-	-	-

These standards also apply to transfer students. Both full- and part-time students on probation for two semesters may be subject to dismissal if they do not make satisfactory progress toward good academic standing. In addition, students may be subject to suspension or dismissal if their GPA falls below those indicated.

Course Failures

If a student fails a course, but his or her academic record does not otherwise warrant direction to withdraw from the University, he or she

may continue his or her course of study with the understanding of the following:

- That failing any required course is a deficiency that must be made up by repeating the course, normally before the beginning of senior year.
- That a failure in any course becomes a permanent part of a student's record and influences the student's GPA even after he or she has repeated the course for a passing grade.
- That the responsibility for repeating and passing a failed course rests with the student, who should arrange to remedy this deficiency as soon as possible.

Make-Up by Equivalent Course

If a student fails a required course at Fordham, he or she must make up that course at Fordham, in all but exceptional cases. Four-year day students who fail a course must retake and pass the class through the Gabelli School of Business, Fordham College at Rose Hill, or the Fordham summer program. Evening students who fail a course must retake and pass the class through the Gabelli School of Business, Fordham's School of Professional and Continuing Studies, or the Fordham summer program. Only if scheduling or other circumstances prevent this may a student apply for permission from the class dean to take an equivalent course in another school within Fordham or at another institution.

Students wishing to pursue this option first must get approval from the class dean that the University will accept and give transfer credit for the course in question. If the course is a liberal arts course, the class dean also may require the student to get permission from the chair of the department that offers the course. Forms for this approval process are available from the deans' offices.

Though the class dean may approve an exception for a student to retake a course outside of Fordham, only courses taken at Fordham count toward a student's GPA. Students should consider the ramifications of this policy, especially knowing that the original failing grade remains even when a course is successfully retaken: A course retaken and passed at Fordham will yield a higher counterbalancing grade, whereas a course retaken and passed elsewhere will not. In addition, students should note that the University will not transfer in any external course in which the grade received is below a C (2.0 out of 4.0).

The above policies also apply to courses taken outside of Fordham that had not been failed at Fordham (including non-Fordham study abroad programs).

Probation, Suspension, and Dismissal

Probation

Students are given probationary status through the direct action of a dean. In all but rare cases, students may remain on probation for no longer than the equivalent of one academic year.

Suspension

Suspension is an enforced termination of formal studies, typically given for two semesters. A student may be put on suspension if any one or more of these criteria apply:

- He or she fails to maintain satisfactory academic standing as indicated in the Academic Status section of this bulletin.
- He or she receives three failing grades in any semester.
- He or she has more than one academic integrity violation.

If a student wishes to continue his or her studies at the Gabelli School after a suspension, he or she must formally apply for readmission to the school and should contact their Gabelli School class dean for an application. Students are generally required to demonstrate academic proficiency at another four-year college or university prior to returning to Fordham.

Dismissal

A student may be dismissed if either or both of the following criteria are met:

- He or she fails to maintain satisfactory academic standing as indicated in the Academic Status section of this bulletin.
- He or she receives three failing grades in any semester.
- He or she is placed on academic probation for three successive semesters.

If a student has been dismissed for academic reasons, he or she may not continue to take courses in the school. Dismissal is a formal termination of all further studies in the Gabelli School of Business and Fordham University.

Dismissal Appeal Policy

All academic progress decisions may be appealed, as a final form of review, in writing, to the dean of the school/college. The appeal must be made within three business days of the notification of change in academic status. It should include documentation of any extenuating circumstances that may have impacted the student, such as a death in the immediate family or an illness, as well as a statement from the student explaining the reasons for the appeal. The dean will make a decision in consultation with a convened committee, and that decision shall be final.

Grievance Procedure

Any enrolled student has the right to grieve alleged discriminatory treatment on the part of any Fordham administrative office, department, procedure, or student organization. The student alleging discriminatory treatment has the right to a prompt investigation of the charges, resulting in redress of grievances where cause is found. Internal grievance channels provide for the investigation and adjudication of charges by members of the Fordham community. Two internal procedures have been established: one for grievances in academic matters and a second for grievances in nonacademic matters. In either instance, to be valid, a grievance must be filed within thirty (30) days of the action against which it is directed. Further details concerning these procedures are available in the dean's office.

Academic Rank in Class

Starting in the 2019-2020 academic year, rank in class will no longer be computed or published for Gabelli School of Business students. This section pertains to the 2018-2019 academic year and earlier.

In the Gabelli School of Business, a student's rank in class was computed on the basis of a minimum of 24 graded credits in a regular academic year. No rank in class was computed for a student who had fewer than 24 graded credits in an academic year.

Rank in class was computed only once at the conclusion of the academic year. If grade changes of any kind were made after this time, rank in class was not recomputed.

Business Minors

Undergraduates in all four of Fordham's schools—the Gabelli School of Business, Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC), and the School of Professional and Continuing Studies (PCS)—are eligible to pursue business minors of various types. Students may choose one or more of these to complement their major; each provides a foundational understanding in a specific area. These minors especially may be helpful to liberal arts students who are considering entering the business world after graduation.

Undergraduate liberal arts students in all three liberal arts colleges may take up to six courses in the Gabelli School of Business. Students should be aware that business courses are 3-credit courses, rather than 4-credit courses typically offered in FCRH, FCLC, and PCS for juniors and seniors. Hence, in considering this minor, students should consult with the junior or senior class dean to be sure they will have the required number of credits (124) required by New York State for graduation.

Students in the Gabelli School of Business are required to complete the business core curriculum (p. 83) as part of their degree requirements. Traditional day students will pursue Track 1, while evening students will pursue Track 2.

The availability of the respective business minors to students in each school is listed in parentheses below:

- Accounting (p. 152) (FCRH)
- Business Administration (p. 190) (FCRH, FCLC, PCS)
- Business Law and Ethics (p. 192) (GSB)
- Finance (p. 253) (FCRH, FCLC)
- Marketing (p. 312) (FCRH, FCLC)
- Sustainable Business (p. 368) (FCRH, GSB)

Registration

General Registration Policy

Each semester, students are assigned a specific day or days for registration. Registration dates for each semester can be found on the enrollment services website. Students register based on the academic program they are pursuing and to which they have been admitted. They are responsible for consulting with their class dean to familiarize themselves with their program's requirements and to make sure that their program is correctly listed in Degree Works, accessible through the student tab on my.fordham.edu portal. The Gabelli School of Business offers multiple special academic programs; most are open to all students, while others are by admission only. Students with an interest in or questions about any academic programs are encouraged to see their class deans or the individual program directors.

By the last date for course changes, students should recognize that they have made a serious commitment to complete the courses for which they have registered. Alterations in registration after that date are at the discretion of the dean's office. Students should make sure they can complete any non-academic commitments they have—clubs, jobs, internships, and so on—without interfering with the coursework they committed to during registration. If students register late, they are held accountable for any absences they may incur as a result.

Veteran students should be aware that if they are using any military education benefit, withdrawal from a class may create a debt with the VA, their Service Branch, or Fordham. Before withdrawing from a class, such

students should consult with the VA Certifying Officials in the Office of Academic Records.

Please note that no Gabelli School student shall at the same time be matriculated in any other school or college, either at Fordham University or elsewhere, without the consent of the dean.

Full-Time Status

Students should maintain full-time status to participate in intercollegiate athletics, University housing, family medical-insurance plans, and, for international students, their student visa. Full-time status means that a student is enrolled in at least 12 credits each semester and completes at least 12 credits each semester. Students who fail to complete at least 12 credits per semester may find themselves ineligible for intercollegiate athletics, University housing, financial aid, scholarships, the outside medical insurance plans under which they are covered through their families, and/or their student visa. Students who anticipate one or more semesters in which they do not maintain full-time status should speak with their class dean and their families as soon as possible to better understand any potential consequences.

To meet the 120-credit and 40-course requirements for on-time graduation, Gabelli School students in the four-year program should register for five courses each semester (plus one Integrated Project per year), with 1.5-credit courses counted as half courses. Any deviation from this five-course format requires a class dean's approval and may require taking summer classes or delaying graduation.

Program Approval

During the second semester of sophomore year (or, in some circumstances, the first semester of junior year), Gabelli School students must declare their specific program of study: a major and, if needed or desired, one or more concentrations or minors. They declare this program through their class dean, whose offices are on the fourth floor of Hughes Hall. Once the program of study has been recorded, students are responsible to ensure that it is listed correctly in Degree Works and They must inform their class dean immediately if there are any errors.

Program Changes

Students who are contemplating a change in their program of study should seek advice from their class dean immediately. The class dean helps students to take next steps with the academic area chair, and ultimately gives approval for the change.

Students who are considering changing their academic program should do so as early as possible. Changes often involve considerable adjustments and become increasingly costly in time and credits if delayed beyond the first semester of junior year.

In considering program changes, please note that:

1. courses cannot be added to a program after the first week of class in any given semester without permission; and
2. if any course is dropped without written permission from the class dean, it will result in a failure.

Changes of Name or Address

In the case of a change of name or address, students are expected to immediately notify, in writing, the dean's office and the office of

enrollment services. Students also must follow any procedures required by enrollment services.

Areas of Study

General Academic Programs

- Business Administration (p. 189)
- Global Business (p. 256)

Academic Areas

- Accounting and Taxation (p. 147)
- Business Law and Ethics (p. 192)
- Communication and Media Management (p. 217)
- Finance and Business Economics (p. 249)
- Information, Technology, and Operations (p. 267)
- Leading People and Organizations (p. 307)
- Marketing (p. 309)
- Strategy (p. 365)

Interdisciplinary Areas of Study

- Business Economics (p. 191)
- Digital Media and Technology
- Entrepreneurship (p. 367)
- FinTech (p. 251)
- Global Business (p. 256)
- Marketing Analytics (p. 311)
- Social Innovation (p. 346)
- Sports Business (p. 364)
- Sustainable Business (p. 368)
- Strategic Branding (p. 311)

Personal and Professional Development

Personal and Professional Development Center

The Gabelli School of Business's Personal and Professional Development (PPD) Center offers a comprehensive slate of programs and activities to help students develop into global business leaders.

All students at Fordham have access to the University-wide Office of Career Services. On top of that, Gabelli School students have an additional advantage in our Personal and Professional Development Center, which offers business-specific career-development programs and direct industry connections. The PPD Center's offerings include:

- One-on-one advising, including résumé reviews and mock interviews, with industry-specific advisers
- Field-specific programming in accounting, finance, and marketing
- Workshops, networking events, corporate on-site visits, and speaker series
- Industry competitions
- Outreach to target employers and alumni who may choose to hire Gabelli School students

- Online career resources
- Collaboration with business student clubs and organizations

In addition, all major personal and professional development events are listed on the Gabelli School's online calendar. Students are strongly encouraged to take advantage of the center from their first year onward.

All PPD offerings are part of the Gabelli Progress Status (GPS) Checklist, a four-year sequence designed to help Gabelli School students discover their full potential and tap into it for the benefit of themselves and others. We recognize that the business world is a challenging place, and that a little extra support during a student's college years can make all the difference in succeeding in it. The checklist is designed to give our students that extra lift toward their personal and professional goals and wraps together elements of self-discovery and self-awareness, career development, and service to others. Students emerge prepared to handle anything that life after graduation might bring their way.

Current students can make an appointment with a PPD team member via GabelliAccess.

The Alumni Network

Finding an alumni community more loyal than Fordham's isn't easy. Gabelli School of Business graduates have an uncommonly strong belief in the power of a Fordham education—and in the potential of current students. Alumni and students connect through an extensive networking program, both online and in person.

Students can find out about alumni networking opportunities through the Gabelli School's online calendar. These events span a very wide range and vary by semester, but examples include

- **The Alumni/Student Supper Club:** An alumnus or alumna holds a networking dinner with current students who aspire to work in his or her business field. Supper Club dinners take place at restaurants in the Bronx or Manhattan; either the host or the school picks up the check, so that students are not responsible for the cost of the meal. This small-group format, of perhaps six people total, is the best way to get to know an alumnus or alumna one-on-one.
- **Boardroom Series:** Alumni visit Hughes Hall to meet in a conference-style format with a small group of students, typically no more than 25. This allows students the chance to approach the alumni afterward to make a personal connection.
- **Young alumni panel discussions:** Coordinated by the Personal and Professional Development Center, these panels bring together up to a dozen recent graduates to speak with students about what it was like to start their careers.
- **Fordham sporting events:** Student groups such as the Dean's Council may sponsor halftime celebrations for Gabelli alumni at basketball games and other contests.

In addition, because Fordham's alumni network is global—our graduates live from Manhattan to Melbourne to Munich—the Gabelli School of Business offers ways for alumni and students to connect online. Please note that you will need to type or copy-paste these URLs into your web browser; if you are looking at the online version of this course bulletin, the links will not work directly because they are external websites.

- Gabelli School of Business Facebook page
- Gabelli School of Business Alumni LinkedIn group

For more information about getting to know our alumni, please visit the Personal and Professional Development Center web page.

Special Academic Programs

Gabelli offers many co-curricular programs and activities to its students:

- CFA Program (p. 94)
- Community Engaged Learning (p. 95)
- Dual-Degree Programs (p. 95)
- Global Business Honors Program (p. 95)
- Honors Thesis Program (p. 96)
- Internships (p. 96)
- Research with Faculty (p. 97)
- Study Abroad (p. 97)

CFA Program

The Chartered Financial Analyst (CFA) charter is a professional designation awarded by the CFA Institute. The CFA charter, perhaps the most respected and recognized investment credential in the world, demonstrates a mastery of a comprehensive body of knowledge important in the investment decision-making process. Fordham University is an Affiliated University of the CFA Institute that provides currently enrolled students access to the Awareness Scholarship Program sponsored by the CFA Institute to affiliated universities. To earn a CFA designation, a candidate must pass three levels of exams (Levels I, II, III) and meet the experience requirement specified by the CFA Institute. The CFA Body of Knowledge has 10 topic areas: ethical and professional standards, quantitative methods, economics, accounting and corporate finance, global markets and instruments, valuation and investment theory, analysis of fixed-income securities, analysis of equity investments, analysis of alternative investments, and portfolio management. Candidates are tested on all topic areas at each level.

To enroll with the CFA Institute and register for the first exam, a candidate must have a bachelor's (or equivalent) degree, or be in the final year of his or her bachelor's degree program at the time of registration. If a student initially enrolls/registers as a final-year undergraduate student with a degree in progress, he or she may not register for the Level II exam until he or she has earned a bachelor's degree (or has obtained enough professional work experience to meet the program's entrance requirements).

Many investment firms require entry-level employees to pursue the CFA designation as a condition of employment. However, the CFA Institute's program is a graduate-level curriculum. Thus, it shows a particular level of commitment for an undergraduate student to be preparing for the exam. We are offering this program as one opportunity for our students to distinguish themselves in a competitive employment market.

At Fordham, the CFA program is a sequence of undergraduate courses offered by the Gabelli School of Business. The courses have been designed to prepare a student to take the CFA Level I exam shortly after graduation. When possible, courses use the same textbooks and reference materials as the CFA curriculum. Also, questions from previous CFA exams are used on some course exams.

A candidate completing the finance courses in the CFA program should have a basic framework for the fixed-income securities analysis, equity securities, analysis, and portfolio management topic areas. Other required courses in the business school curriculum should give the

student a preliminary background in the quantitative analysis and economics sections. The remaining sections (ethical and professional standards and financial accounting) are covered in the business core curriculum and supplemented with business electives in the curriculum.

Because Fordham is a CFA Program Partner University, a certain number of students may be selected each year to receive CFA student scholarships. These scholarships are provided by the CFA Institute, the global association of investment professionals that awards the Chartered Financial Analyst designation; they provide reduced costs for college or university students enrolling in the CFA program. Students may not apply directly for a scholarship, but rather must be selected and sponsored by the Gabelli School's CFA program director. Full details of the scholarship program are provided to students at the start of each fall semester.

Completion of the CFA program does not directly grant CFA professional licensure in any state or territory. To enroll with the CFA Institute and register for the first exam, a candidate must have a bachelor's (or equivalent) degree, or be in the final year of his or her bachelor's degree program at the time of registration, pass three levels of exams (Levels I, II, III), and meet the experience requirement specified by the CFA Institute.

For more information

To learn more about the CFA charter, please refer to the CFA Institute website. To learn more about the CFA program at the Gabelli School of Business, please visit the CFA program information page on the Gabelli School of Business website.

Community Engaged Learning

Two of the hallmarks of a Gabelli School education are learning by doing and business with purpose. These principles come together through community engaged learning.

Community engaged learning at the Gabelli School is available both internationally and in New York. To learn more about international community engaged learning, see the part of this section that deals with Fair Trade. To learn more about community engaged learning in New York City, see below.

In one recent year alone, Gabelli School students volunteered more than 1,300 total hours at nine Bronx nonprofits as part of the community engaged learning program—and gained hands-on experience in the process, along with one additional academic credit. Students have learned from and engaged with local residents in projects that had them assisting low-income residents in filing their income taxes, leading SAT-preparation workshops for high school students, and much more.

The greatest part about the Gabelli School's community engaged learning program is that students get to choose the organization they help by proposing a project that interests them to the community engaged learning adviser. Students build their resumes and enhance their experience while advancing the cause of a nonprofit, program, or part of the community that matters most to them.

For more information

Visit the Gabelli School web pages to learn more about New York City-based community engaged learning at the Gabelli School, or to propose a one-credit community learning experience paired with an academic course.

Dual-Degree Programs

In today's business world, advanced degrees carry an ever-greater advantage in helping graduates distinguish themselves in the eyes of potential employers. Certain self-directed, academically capable students can complete their Fordham education through the master's level in business in five years. There is also a dual-degree program that allows the completion of a law degree in six years. Information on both options is below.

Specific requirements and offerings of the dual-degree programs change often. For that reason, interested students are encouraged to visit the Gabelli School website for the most up-to-date information.

4+1 Programs

Fordham undergraduate students can apply to enroll in a business-related Master of Science (M.S.) program immediately after completing their undergraduate degree. For more information, please visit the 4+1 Programs section of the Gabelli School website.

B.S./J.D. Program

This six-year dual-degree program, known as the 3-3 Program, enables students to complete an undergraduate degree at the Gabelli School and a law degree at Fordham Law School within a total of six years. Participants study at the Gabelli School for three years and then move on to the law school. The B.S. is awarded in the fourth year, following the completion of the first year of law school. To participate, students must

- complete all core and major requirements and at least 92 credits before beginning law school;
- maintain a superior grade point average, including transfer credits;
- have a very strong LSAT score; it is preferable that the LSAT scores be available by December of the academic year in which the application is made.

Students who meet these criteria will be eligible to apply to Fordham Law School during their junior year. Interested students should meet with their academic advisers early on to make sure they complete all necessary undergraduate courses and credits. The program may be successfully pursued without advanced placement courses; however, advanced coursework will give students greater flexibility to take electives.

Students who intend to participate in the 3-3 Program must have an interview with the Gabelli School pre-law adviser (dcappello@fordham.edu), who will select candidates to forward to the admissions office at Fordham Law. Admission is not guaranteed and is very competitive. Students must meet Fordham Law's admissions criteria, which can vary from year to year.

Global Business Honors Program

The four-year Global Business Honors Program (GBHP) selects incoming first-year students with stellar high school academic records and prepares them for high-level roles in the world's most dynamic firms and organizations. The approximately 25 students in each GBHP class form a close-knit community of friends and scholars.

GBHP core curriculum courses are especially rigorous and in-depth. They include business mathematics, micro- and macroeconomics, and statistics. In addition to their coursework, participants travel together on intercontinental trips during their sophomore and junior years. The international experiences expose students to the global marketplace

and the variation of business environments across borders. Over the course of their junior and senior years, GBHP students select a business topic of interest and, working individually or in small groups, complete an original research project with the help of a faculty adviser. Some resulting papers have been selected for presentation at undergraduate research conferences.

Global Business Honors Program Highlights

- Students take honors-only sections of selected business and liberal core courses.
- By graduation, students have experienced business on three continents—Europe, Asia/South America, and North America—through a combination of their NYC semesters and most-expenses-paid GBHP trips.
- Career-development programs hone participants' "soft skills," such as interviewing, networking, international business etiquette, and verbal presentation.

For more information, contact the Dean of Honors Opportunities.

Honors Thesis Program

The Honors Thesis Program (HTP) is a three-course sequence that enables high-ability students to conduct original business research of publishable quality.

Junior Year: Spring Semester

The Honors Thesis Program begins in the spring semester of a student's junior year. During that first term, each participant defines a specific thesis topic based on their own interest, identifies Gabelli faculty expertise on the topic, and surveys the relevant scientific literature in the field. Students produce a proposal that includes a comprehensive literature review and a road map for a theory-driven study on their chosen topic. This proposal is in turn used to pair the student with a faculty expert in their field to advise the project one-on-one during the following year.

Senior Year: Fall Semester

The thesis program continues in the fall of a student's senior year. During the fall of senior year, each student refines their specific proposal and learns more about research design, data collection methods, and data analysis. Students deliver a revised and expanded proposal that includes the design, method, and analysis plans for their own research.

Senior Year: Spring Semester

The third and final term, the spring of a student's senior year, includes final data collection and analysis, as well as manuscript composition that follows an iterative drafting process under the adviser's and Honors Thesis Program director's supervision. Students present their finished projects during a daylong seminar and celebration near the end of the semester. All students who complete an honors thesis earn a medal at the GSB Awards Ceremony during the week before graduation. The thesis voted best each year by faculty and program administrators earns a special award.

For more information, visit the Honors Program web page.

Internships

An internship is a short-term, pre-professional work experience that provides hands-on practice and skill development in a professional

environment. Internships may take place during the fall, spring, or summer semesters; may be paid or unpaid; may help you to earn college credit or not; and can be full-time or part-time. On average, 91% of Gabelli School students hold at least one internship during their college careers. Internships can help students to:

- Explore a possible career interest
- Choose a major or career path
- See the real-world application of concepts learned in class
- Gain work experience and develop marketable skills
- Build a résumé
- Cultivate professional contacts and references
- Test out a possible future employer
- Get into a track toward a permanent job (successful interns may receive full-time offers)
- Earn income

Please note that Gabelli School students may not pursue internships during the school year as first years. They may begin holding internships in the summer following their first year.

Successful internships depend on the right match between a student and employer. For guidance on obtaining an internship that truly will provide advancement toward a desired career, students should seek out the Personal and Professional Development Center staff. Students can search industry information on the CareerInsights database and apply for internships via the CareerLink posting site.

Academic Credit for Internships

Students may pursue internships of two types: for-credit and not-for-credit. The following section provides an explanation of the for-credit type and outlines the steps students must take to receive academic credit.

Gabelli School students may earn one-credit per semester for an internship opportunity. Students should work with their class dean to obtain and complete the internship forms to request credit. An internship course does not replace a full course for graduation requirements.

To receive credit for an internship, students must complete these steps:

1. Seek an internship¹: through the Office of Career Services, using its CareerLink database; through the Gabelli School's Personal and Professional Development Center; by networking; by conducting your own independent search; or with the help of a Gabelli School faculty member. If you want, the Personal and Professional Development Center staff can help you to perfect your résumé and cover letter.
2. Once the internship has been secured, students should consult with their class dean about earning credit.
3. Fill out and sign the internship registration form and statement of responsibility and submit it as instructed within two weeks of starting the internship, if possible. Students should contact their class dean to obtain the registration form and statement of responsibility
4. Students should register before the semester begins, but they may register after the semester begins with permission from their class dean. Students may not retroactively enroll in the internship course for credit after the semester has ended or near the end of the semester. *Note: Many students will obtain their internship during the semester and will still be able to register for the one-credit internship course at that time*
5. Note: International students on the F-1 Visa MUST register for credit when they accept their internship, then have their academic

adviser fill in the required CPT form, then bring it along with their I-20 and their official offer letter from the employer to the Office of International Services BEFORE they start their first day of work. International students on F-1 Visas should make sure to follow all regulations and give themselves enough lead time to get the paperwork done.

6. Complete a minimum of 60 hours in the internship for the semester (or summer)
7. Students may receive credit for an internship whether the internship is paid or unpaid.
8. Complete the internship course by submitting the online reflection and internship evaluation and attending any required events or class meetings (if applicable). The online reflection and internship evaluation is due by the week of finals and must be submitted online. If a student's online reflection and internship evaluation are not received by the deadline, a failing ("F") grade will be awarded.
9. The one-credit internship course is taken on a pass/fail basis only.

¹ Note: Students typically begin their search for an internship about four to five months prior to the planned start date for the internship, but this can vary dramatically depending on the industry and the sector within the industry. Each company, industry, and sector may have different time frames for recruiting interns. Students are urged to see their class dean or a Personal and Professional Development Center staff member for more information.

Research with Faculty

Just as the Global Business Honors Program and Honors Thesis Program allow students to conduct their own original research, a separate Gabelli School program offers students the chance to collaborate with professors on faculty research.

Undergraduate research assistantships are open to Gabelli School sophomores, juniors, and seniors who have demonstrated exceptional academic performance and a strong interest in academic inquiry. Students assist a full-time faculty member on his or her research throughout the school year. Opportunities vary each semester in quantity of assistantships available and topics being researched, depending on faculty needs. In this program:

- A student works with one or more faculty members on a faculty-directed research project.
- The student is compensated for his or her work and, in some cases, is listed as a co-author of the resulting paper.
- Duration (project, semester, year) is dependent upon faculty needs.
- An application is required. For more details, please contact the Assistant Dean of Honors Opportunities.

Study Abroad

Traveling to another country offers an unparalleled advantage for business students. Abroad, Gabelli School students have the chance to immerse themselves in a distinct business culture, make connections at an all-new roster of corporations, learn another language, and expand their cultural fluency. Gabelli School students should integrate as much international experience as possible into their undergraduate careers.

There are three options available to business students, who may take advantage of one or all:

- Full semesters abroad
- Short-term summers abroad
- Seven- to 10-day global immersion courses

Full Semesters and Summers Abroad

The Gabelli School encourages qualified students to study for a semester or summer in another country. Fordham has partnerships with many colleges and universities that offer study abroad opportunities. Applications for these programs can be found on the Office of International and Study Abroad Programs (ISAP) website. Programs for business students are available in Africa, Asia, Europe, and South America and include opportunities for internships, direct enrollment at prestigious universities around the world, and programs focused specifically on the study of global business.

Of particular interest is the Gabelli School of Business in London program, which combines the advantages of an overseas experience with actual Fordham courses that can be used to fulfill core and major requirements. The Gabelli School in London gives students an advanced socioeconomic understanding of business in the U.K. and Europe through coursework, corporate visits, and cultural excursions. Accounting, marketing, finance, and other disciplines get a fresh context in Europe. This program is available in the fall, spring, and summer semesters.

Global Immersion Courses

No time in your schedule for a full semester abroad? Prefer to experience several countries rather than only one? Already studied abroad for a semester but want to hit one or two more destinations? Global immersion courses meet all of these needs—and more. These seven- to 10-day trips are connected directly with a business class; for example, the Entrepreneurship and Fair Trade course includes a tour to meet business people in India. Travel takes place over winter or spring break or at the end of a semester, to accommodate students' schedules. Students travel the entire time with Fordham professors and deans, are met on the ground by knowledgeable local guides, and stay in excellent hotels. Global immersion courses include visits to the offices of corporations, exchanges, and markets; meetings with business leaders; excursions to noteworthy historical sites; meals at traditional restaurants; and sometimes even sessions with Fordham alumni who live abroad. Destinations change each semester; past countries visited include Argentina, Brazil, Canada, France, India, Ireland, Italy, Japan, Peru, Singapore, Switzerland, and the United Kingdom.

For more information

Visit the Gabelli School Global Business Education web pages and the Fordham office of International and Study Abroad Programs.

Fordham School of Professional and Continuing Studies

The Fordham University diploma has stood for quality for more than 160 years. And for more than 50 of those years, Fordham's adult degree program has been among the most highly regarded in the tristate area in pursuing its mission—to provide an outstanding academic program for men and women who are also engaged with career or family responsibilities.

At the heart of Fordham's reputation, of course, is the quality of its educational program—a program born of the Jesuit tradition of education and built on the belief that a university must do more than equip a

graduate with a particular skill or specialized capability. Few students are more pragmatic than adult students. And few understand better than experienced adults that the best program is one that multiplies their options and prepares them not just for the next opportunity but also for the many others that will follow. This defines the liberal arts tradition and the experience that will engage you at Fordham School of Professional and Continuing Studies. It is the educational experience all Fordham students share.

Fordham School of Professional and Continuing Studies enables working adults and other part-time students to choose among three convenient campuses—or to study at all three as their schedules and interests require. Evening, weekend, and online classes are offered at the 90-acre Rose Hill campus, adjacent to the New York Botanical Garden in the Northern Bronx; at the Lincoln Center campus, in the cultural heart of Manhattan at 60th Street and Columbus Avenue; and at the Westchester campus in West Harrison, just off Route 287, near the Hutchinson River Parkway and Route 684.

At each campus, you will find a full-service school dedicated to adult learners in scheduling, advising, activities, policies, and procedures. Most important, you will have access to the faculty and programs of one of the nation's most highly regarded universities and the opportunity to become part of the Fordham University tradition.

Visit our website at fordham.edu/pcs.

Alumni Opportunities

All graduates of Fordham School of Professional and Continuing Studies (PCS) are members of the alumni association by virtue of their graduation. A board of interested and active alumni represents the PCS alumni constituency. The board partners with the Office of Alumni Relations to provide opportunities that support and advance PCS through innovative programs and events. The goal of all alumni activities is to foster lifelong relationships between alumni and Fordham and to create ways for alumni to share their talents and interests with the University.

The Office of Alumni Relations also sponsors numerous opportunities for PCS alumni to interact with alumni from all of the schools within the University. The young alumni program focuses on the specific needs of alumni who have graduated within the last 10 years. The regional club program maintains Fordham's national alumni network. The cultural program capitalizes on the unique benefits of New York City for metro area alumni. Rampass, the alumni I.D. card, affords alumni special discounts and allows alumni to easily return to all campuses.

For more information about opportunities to get involved with the alumni program, please contact the Office of Alumni Relations at 212-636-6520.

Majors

Fordham's School of Professional and Continuing Studies offers the bachelor of arts degree and the bachelor of science degree, each of which requires the successful completion of 124 credits. The curriculum for the undergraduate degree program is organized into three parts: the Core Curriculum, the major, and elective courses.

The Major

Students are expected to choose a major field of study by the time they have accumulated 60 credits (including any transfer credits) toward the

bachelor's degree. The courses required for the completion of each major are indicated in the description of each major are linked below.

Many major fields of study are currently available to students of Fordham's School of Professional and Continuing Studies and can be completed entirely through evening, weekend, or online classes at Rose Hill, Lincoln Center, or Westchester.

- African and African American Studies (p. 154)
- Art History (p. 180)
- Business (p. 124)
- Communications (p. 125)
- Comparative Literature (p. 218)
- Computer Science (p. 221)
- Economics (p. 232)
- English (p. 236)
- History (p. 258)
- Individualized Major (p. 266)
- Information Technology and Systems (p. 128)
- Latin American and Latino Studies (p. 302)
- Natural Science (p. 322)
- New Media and Digital Design (p. 326)
- Organizational Leadership (p. 129)
- Philosophy (p. 332)
- Political Science (p. 337)
- Psychology (p. 341)
- Real Estate (p. 131)
- Religious Studies (p. 344)
- Social Work (p. 347)
- Sociology (p. 363)
- Theology Religious Studies (p. 376)
- Visual Arts (p. 372)
- Women, Gender, and Sexuality Studies (p. 382)

The following fields of study can also be selected as majors, but many of the courses required are generally offered during the day at Rose Hill or Lincoln Center. PCS students considering these majors should do so only if their schedules are such that they are able to attend day classes to fulfill major requirements.

- Anthropology (p. 178)
- American Studies (p. 158)
- Biochemistry (p. 193)
- Biological Sciences (p. 187)
- Chemistry (p. 197)
- Chinese Studies (p. 288)
- Classical Civilization (p. 201)
- Classical Languages (p. 201)
- Communication and Culture (p. 204)
- Digital Technologies and Emerging Media (p. 208)
- Engineering Physics (p. 335)
- Environmental Science (p. 242)
- Environmental Studies (p. 244)
- Film and Television (p. 211)
- French and Francophone Studies (p. 290)
-

- General Science (p. 254)
- German Language and Literature (p. 291)
- German Studies (p. 292)
- Humanitarian Studies (p. 264)
- Integrative Neuroscience (p. 270)
- Interdisciplinary Math & Economics (p. 315)
- International Political Economy (p. 272)
- International Studies (p. 274)
- Italian Language and Literature (p. 292)
- Italian Studies (p. 294)
- Journalism (p. 213)
- Mathematics (p. 314)
- Mathematics and Computer & Information Sciences (p. 224)
- Medieval Studies (p. 316)
- Middle East Studies (p. 319)
- Music (p. 321)
- Physics (p. 336)
- Spanish Language and Literature (p. 295)
- Spanish Studies (p. 296)
- Theatre (p. 370)
- Urban Studies (p. 381)

- Communication and Culture Minor (p. 208)
- Communications Minor (p. 126)
- Comparative Literature Minor (p. 219)
- Computer Science Minor (p. 223)
- Creative Writing Minor (p. 236)
- Cybersecurity Minor (p. 223)
- Digital Technologies and Emerging Media Minor (p. 210)
- Disability Studies Minor (p. 230)
- Economics Minor (p. 233)
- Engineering Physics Minor (p. 335)
- English Minor (p. 240)
- Environmental Studies Minor (p. 247)
- Film and Television Minor (p. 212)
- French and Francophone Studies Minor (p. 297)
- German Minor (p. 298)
- History Minor (p. 263)
- Humanitarian Studies Minor (p. 266)
- Irish Studies Minor (p. 282)
- Islamic Studies Minor (p. 283)
- Italian Minor (p. 298)
- Jewish Studies Minor (p. 284)
- Journalism Minor (p. 215)
- Latin American and Latino Studies Minor (p. 306)
- Linguistics Minor (p. 299)
- Mandarin Chinese Minor (p. 300)
- Mathematics Minor (p. 315)
- Medieval Studies Minor (p. 319)
- Middle East Studies Minor (p. 320)
- Music Minor (p. 322)
- New Media and Digital Design Minor (p. 328)
- Organizational Leadership Minor (p. 129)
- Orthodox Christian Studies Minor (p. 329)
- Peace and Justice Studies Minor (p. 330)
- Philosophy Minor (p. 334)
- Physics Minor (p. 336)
- Political Science Minor (p. 340)
- Psychology Minor (p. 343)
- Public & Professional Writing Minor (p. 240)
- Real Estate Minor (p. 132)
- Religious Studies Minor (p. 345)
- Russian Minor (p. 300)
- Sociology Minor (p. 364)
- Spanish Minor (p. 301)
- Sports Journalism Minor (p. 216)
- Theatre Minor (p. 372)
- Theology Religious Studies Minor (p. 380)
- Urban Studies Minor (p. 381)
- Visual Arts Minor (p. 375)
- Women, Gender, and Sexuality Studies Minor (p. 383)

Minors

The Minor

Selection of a minor is optional. It constitutes completion of at least six courses in a field of study other than the major and is intended to provide some structure and guidance for a student's pursuit of knowledge in a second area of interest. The minor, as well as the major, is indicated on the student's transcript at graduation. With thoughtful selection of their elective courses, most students can complete a minor without exceeding the 124 credits required for the bachelor's degree.

Minors can be completed in almost every field in which the college offers a major; requirements are listed in each academic department's section of this bulletin.

For information on the minors in business, see the page on Business minors in the Gabelli School of Business (p. 92).

- African Studies Minor (p. 155)
- African and African American Studies Minor (p. 155)
- American Studies Minor (p. 177)
- Anthropology Minor (p. 179)
- Arabic Minor (p. 297)
- Art History Minor (p. 182)
- Asian American Studies Minor (p. 183)
- Biochemistry Minor (p. 196)
- Bioethics Minor (p. 185)
- Bioinformatics Minor (p. 220)
- Biological Sciences Minor (p. 189)
- Business Administration Minor (p. 190)
- Chemistry Minor (p. 199)
- Classical Civilization Minor (p. 201)
- Classical Languages Minor (p. 202)

Special Programs

- College at Sixty (p. 125)
- Credit for Experiential Learning (p. 127)
- Honors Program at PCS (p. 123)
- Post-Baccalaureate Pre-Medical/Pre-Health Program (p. 130)

Academic Curriculum

Core Curriculum

In keeping with the Jesuit educational philosophy, the PCS core curriculum is designed to provide the student with a broad humanistic background. As students' majors and electives allow specialization and individualization in their studies, the core curriculum assures that every student's undergraduate education is anchored, as a whole, in the liberal arts. The PCS core enables students to go beyond mere proficiency and achieve a level of excellence in the essential skills of literacy. Excellence in the expressive skills of writing and speaking with logical clarity is founded on the arts of reading, listening, observing, thinking, and mastery and thorough understanding of the topic under consideration. Education in the liberal arts has traditionally been called "liberal" for several reasons, but among them is the fact that these arts engender the ability to form judgments based on sound reasoning, free of prejudice and free of insufficiently examined premises. The PCS core enables the student to sample a range of academic disciplines and fields of study, and provides a solid foundation for achievement in any of them.

The core curriculum consists of 12 courses. Select advanced placement credit and college courses taken elsewhere may be considered for core transfer credit. Students will ordinarily be expected to complete, at Fordham, at least one course in literature, philosophy, history and theology, with the guidance of their academic adviser.

ENGL 1101 Composition I: One Required Course (dependent on advisement)

Instruction in sentence and paragraph construction, reading comprehension skills and analysis, the basic principles of grammar with an emphasis on diagnosing and solving persistent problems, and principles of argumentation and evidence. Weekly assignments and regular grammar exercises to build confidences and competence in college writing.

ENGL 1102 Composition II: One Required Course

This course will build competence and confidence in the use of language for analytic, dialogic, and expressive purposes, develop basic reasoning skills and skills of close and attentive reading, enrich an appreciation of the power and importance of language, and help students learn sound practices with respect to conventions of citation, quotation, paraphrase, and documentation. *Prerequisite: Depending on placement, ENGL 1101 Composition I may be required. To move to ENGL 1102 Composition II from ENGL 1101 Composition I, a grade of C or better is required.*

ENGL 2000 Texts and Contexts: One Required Course

The introductory core course in English literature, which may include literature in translation, will teach the arts of literary interpretation by developing techniques of close reading, an appreciation of the relations among literary works and the contexts in which they are written and read, and an ability to write critically about the interplay between text and context. The sections of this course will offer students choice among thematic and topical foci, which will be specified in each section title

and spelled out in the section's description. *Prerequisite: ENGL 1102 Composition II*

PHIL 1000 Philosophy of Human Nature: One Required Course

A philosophical reflection on the central metaphysical and epistemological questions surrounding human nature, which includes discussion of some or all of the following problems: the body/soul distinction and the mind/body problem; the problem of knowledge (relativism, skepticism, the objectivity of knowledge, faith, and reason); free will and determinism; and self and society (subjectivity, personhood, sociality, historicity, and tradition). At least 60 percent of each section of the course is devoted to readings from Plato, Aristotle, Augustine, Aquinas, and Descartes. Each section includes some writings by at least one contemporary figure.

THEO 1000 Faith and Critical Reason: One Required Course

An introduction to fundamental theological issues, including the dialectic between religion and modernity that has shaped our cultural heritage, and some of the ways that various cultures and individuals have confronted the pressing questions of meaning in human life. When apposite, comparisons with religious traditions other than Christianity are made.

HIST 1***: Understanding Historical Change: One Required Course

Through the introduction to the discipline of history, students will begin to achieve knowledge of the structure of societies, how they function, and how they change. Each section of the course will consider how to assess evidence, identify and evaluate differing and often contradictory explanations and arguments, and appraise the relative scale and importance of particular changes in the past. Students will be able to choose from different sections of the course each with the title Understanding Historical Change, and a descriptive subtitle such as Ancient Greece, American History, etc.

Courses in this group have the HC attribute.

Fine Arts OR Social Science: One Required Course from Either Area

Fine Arts Option

By seeing or hearing visual or musical works and understanding them students learn to appreciate the non-verbal and how such works both are influenced by and exercise influence on their cultural milieu. The courses take advantage of and encourage students to appreciate the extensive cultural offerings of New York City.

Courses in this group have the FACC attribute.

Course	Title	Credits
ARHI 1100	Art History Introduction: World Art	3
ARHI 1101	Introduction to Art History: Europe	3

VART 1101	Urbanism	3
VART 1135	Visual Thinking	3

Social Science Option

Students will be introduced to the ways of knowing characteristic of the social sciences through introductory courses in anthropology, communications, economics, political science, psychology, and sociology. The courses will usually focus on a substantive concern of the social science, and include historical overviews, consideration of the variety of research methods typically used (especially empirical research), reviews of the major theoretical orientations and models, and real-world implications and applications to practical problems.

Courses in this group have the SSCI attribute.

Mathematical/Computational Reasoning: One Required Course

The aim of this requirement is to develop the fundamental skills involved in mathematical and computational approaches to problem solving, reasoning, and an understanding of our world. These skills also form the basis for advanced reasoning in many areas and provide a basis for testing logic, solving problems, and evaluating mathematical and computational arguments and evidence in daily life. After completing this requirement, students will be prepared to explore quantitative and

computational issues in the natural sciences, the social sciences, and the humanities.

In addition to the below courses with the MCR attribute, ECON 2140 Statistics I also fulfills this requirement for PCS students.

Course	Title	Credits
CISC 1100	Structures of Computer Science	3
CISC 1400	Discrete Structures	4
CISC 1600	Computer Science I	3
CISC 1800	Introduction to Computer Programming	3
MATH 1003	Mathematics and Democracy	3
MATH 1100	Finite Mathematics	3
MATH 1203	Applied Calculus I	3
MATH 1206	Calculus I	4
MATH 1700	Mathematical Modelling	4

Natural Science: One Course in Physical Science or Life Science

By exploring the natural sciences, students will gain understanding of scientific methodology as a way of knowing and an appreciation of the social responsibility and ethics of science. By understanding how reasoning and experimental evidence lead to scientific conclusions, students will develop scientific literacy—the ability to understand the breakthroughs in science, medicine, and technology as educated, creative, responsible citizens. Students will also develop skills in critical thinking and discernment; qualitative and quantitative reasoning; written and oral communication; and formulation, analysis, and solution of complex problems. With knowledge of the basic principles of science, students will be able to evaluate the legal, moral, and ethical issues that will affect their lives after they graduate. Science courses for non-science majors include Health and Disease; Human Biology; Human Function and Dysfunction; Life on Planet Earth; Physics of Everyday Life; Alchemy to Astrophysics; People and the Living Environment; and Ecology: A Human Approach.

Science majors will fulfill this core requirement through their major courses.

Physical Science Courses

Courses in this group have the PSCI attribute.

Course	Title	Credits
CHEM 1102	Drug Discovery: From the Laboratory to the Clinic	3
CHEM 1104	Chemistry and the Artistic Image	3

NSCI 1040	People and the Living Environment	3
PSYC 1100	Biopsychology	3

Advanced Disciplinary Study

This portion of the core enables students to deepen and extend their disciplinary study and enrich their major courses, which they will be taking concurrently, through a diverse spectrum of advanced courses, thereby assuring the achievement of intellectual perspective with breadth. The following upper-level courses will build on the knowledge, skills and methodological foundations of the disciplinary introductions to develop and extend their awareness of questions and approaches outside their majors. Courses at this level will generally be numbered in the 3000 range and may be taken when students have completed the introductory disciplinary courses in the area..

PHIL 3000 Philosophical Ethics: One Required Course

This course involves philosophical reflection on the major normative ethical theories underlying moral decision making in our everyday lives. The principal focus of the course is a systematic introduction to the main normative ethical theories, i.e., eudaimonism, natural law ethics, deontological ethics, utilitarianism, virtue ethics, and feminism. The differences among these approaches are illuminated by studying various moral issues. In each section of the course, at least half the readings will be selected from Aristotle and Kant. Each section will include writings by at least one contemporary figure..

Sacred Texts and Traditions: One Required Course

The second theology course, selected from a group of offerings relating to sacred texts and traditions, builds on the foundation of critical reasoning about traditions in the first theology course through analytical study of one religious textual tradition. The sections of this course will offer students a variety of texts from which to choose. All sections will draw on the disciplines of history, literary analysis, and theology, interpreting religious traditions and texts as both historically embedded and always evolving responses to the experience of the transcendent in human life.

Courses in this group have the STXT attribute.

Course	Title	Credits

Advanced Disciplinary Course in Literature, History, or Social Science: One Required Course

Following the introductory literature, history and social science courses, this requirement will enable the student to achieve a sharper focus and more detailed knowledge of complex literary, historical, or social methods, materials, interactions and processes. To fulfill the requirement, one advanced disciplinary course will be taken in one of the following disciplines:

- an advanced literature course numbered 2000 or above, or
- an advanced history course numbered 2000 or above, or
- an advanced social science course numbered 2000 or above

Advanced Literature Courses

Courses in this group have the ALC attribute.

- Affirmative Action Policy (p. 30)
- Campus Safety (p. 30)
- Equity in Athletics Disclosure Act (p. 30)
- Nondiscrimination and Director of Gender Equity/Title IX Coordinator (p. 30)
- Numbering of Undergraduate Courses (p. 30)
- Recruitment of Jesuits to the Faculty (p. 31)
- Reserved Rights (p. 31)
- Student Records (p. 31)

Academic Advising

The advising process in Fordham School of Professional and Continuing Studies is intended to ensure that students are well informed concerning opportunities and requirements at the start of their Fordham careers and throughout their studies. It is also intended to foster the development of personal relationships with advising deans and faculty through frequent interaction, which is encouraged and facilitated at all times, and required at certain key points in the student's career.

Advisement is an ongoing activity beginning with informational materials and counseling during the admissions process, the starting of an academic plan review for each student, and the presentation of a thorough orientation program. The advising deans provide assistance and clearance for the student's first registration for classes. Advising deans and faculty conduct workshops on topics of interest to new students (study skills, time management, interest assessment, choosing a major, etc.) to extend and reinforce orientation during the term. Registration for the second semester of enrollment is also a "personal" one, in that students are cleared to register only after conferring with an advising dean. For the third and succeeding registrations, advising consultation is encouraged and facilitated, but, in the interest of convenience for working adults, will not be required for registration clearance as long as the student is in good academic standing. Students are always encouraged to speak with their advising dean regarding any matters that may impact their enrollment or academic achievement.

When students declare their choice of major, a faculty member of that academic department or the appointed advising dean meets with students to ensure that departmental requirements are understood and to assist with course planning.

Academic Progress

Academic Progress Policy

Academic progress toward a degree must be maintained for the continuation of study in Fordham School of Professional and Continuing Studies. Satisfactory academic progress, as defined by the school, must also be maintained to receive financial aid.

Fordham University recognizes that the responsibility for seeing that each student succeeds academically is shared by the student, the faculty, and the administration. Therefore, before a student begins coursework at the University, preregistration advising is provided.

For graduation, the student must successfully fulfill the following requirements:

1. Completion of at least 124 credits with a minimum grade point average of 2.0.
2. At least 49 of those credits must be earned through Fordham courses, excluding courses taken on a pass/fail basis (except courses governed by the COVID-19 policy); Life Experience credits; or credits awarded on the basis of CLEP exams, DANTES exams, or NPONSI. (See the Other Academic Programs section of this bulletin.)

- The completion of the University Core Curriculum that provides students with a broad-based exposure to the liberal arts and sciences.
- Completion of a major with a minimum grade point average of 2.0.

Restrictions on the use of grade W (course withdrawal) and the temporary grades of ABS (absent from final exam) or INC (coursework overdue) preserve the character of a Fordham education. Permission to have such grades is the recognition by the University of the exigencies of individual circumstances. However, a pattern of reliance on these grades contravenes the intentions of an academic program. In addition, a pattern of reliance on grades of W, ABS and INC will be taken as evidence of failing to maintain reasonable academic progress. Repeated courses will be calculated into a student's GPA and will not replace the original grade, but only the repeated course will be counted toward graduation requirements. In addition, the satisfactory completion of fewer credits than stipulated may warrant dismissal for failure to maintain satisfactory progress toward the Fordham School of Professional and Continuing Studies bachelor's degree.

Minimum Credit Completion Policy

Year or Classification	Credits Attempted ¹	Percentage Completed ¹	Minimum Credits Completed ²
First or First Year	up to 30	65%	18-20
Second or Sophomore	30-60	70%	42
Third or Junior	60-92	75%	69
Fourth or Senior	greater than 92	80%	99-100

¹ Transfer credits accepted by Fordham are counted in both credits attempted and credits completed, although the grades are not counted in the GPA.

² For Fordham School of Professional and Continuing Studies, pursuing a degree on a part-time basis credits earned will be proportionate. For example, half-time students should complete half of these credits.

Fordham School of Professional and Continuing Studies has established minimum standards of academic progress for each year of attendance. Failure to maintain these standards will result in being placed on academic probation, and the student may be subject to suspension and dismissal. Students on probation may continue to study at Fordham and may be awarded financial aid in keeping with their status, but they should recognize the seriousness of probation. Both full- and part-time students on probation for two terms may be subject to dismissal if they are judged not to be making satisfactory progress toward achieving good academic standing. In addition, students may be subject to dismissal if their GPA falls below those indicated.

Students who are demonstrating substantial progress toward meeting the minimum requirements may petition for an extension to their probation status, which may be granted by the dean of PCS subject to a review and recommendation by the PCS academic affairs committee.

Academic Status

Years or Classification	Academic Probation	Subject to Dismissal
First or First Year	1.99-1.61	1.60 or less
Second or Sophomore	1.99-1.81	1.80 or less

Third or Junior	1.99 or less	1.99 or less
Graduation	2.00	—

Please note: Academic status standards differ slightly for students receiving funds from the New York State Tuition Assistance Program (TAP). A schedule is available at the Office of Academic Records.

Appeals Process

All academic progress appeals should be initiated, in writing, with the student's advising dean. A decision will be made in collaboration with the dean of the school. The appeal must be made within two weeks of the notification of academic status. Extenuating circumstances, such as a death in the immediate family, illness, etc., should be included in the documentation provided. The decision of the dean shall be final.

Procedure for Appealing a Course Grade

NOTE: A disagreement about the subjective evaluation of the student's performance in the class is NOT grounds for appeal. It is assumed that the instructor, as the subject matter expert, is the one most qualified to evaluate any and all work submitted. Therefore, in order for an appeal to be considered, students must demonstrate an objective discrepancy between the way in which they were evaluated and the grading policies and procedures outlined in the syllabus.

Only final grades may be appealed. If students receive a final grade in a course that they wish to appeal, they must appeal the grade prior to the completion of the next semester in which the course was taken even if they are not in attendance; otherwise, the appeal will not be considered. Once students have graduated and have a degree awarded by the University, a grade appeal will not be considered.

Students who believe they have received a grade that does not fairly reflect their academic performance must consider the following before beginning the process of a grade appeal:

- Double-check the calculation of the final numerical grades for the class based on the percentages each exam/project was worth as stated in the instructor's syllabus.
- Objectively assess your attendance record. As partners in learning, students are expected to attend class and contribute.
- Objectively assess the *quality* of class participation. If a student's grade appeal is based solely on a difference of opinion about class participation, it will be virtually impossible to resolve this issue as only the instructor will be able to evaluate this.
- Compare all of the above with the original class syllabus to determine whether all requirements have been fulfilled as stated by the instructor.
- Check that the work submitted met the requirements enumerated by the instructor. For example, if a student submitted a well-written and well-researched paper on the life of Plato but the instructor specifically asked for a comparative study of the ideas of Plato, Aristotle, and Socrates, the grade will not be reviewed since the student did not follow instructions as to what was required.

If after all considerations students determine that a grade appeal is warranted, then the following process should be followed:

Level 1: Faculty

Students should contact the instructor to discuss any concerns about their grade PRIOR to beginning any grade appeal process. Students should contact the instructor by the e-mail provided on the syllabus to

detail the reason for the grade appeal. The student should initiate contact within 10 days of the posting of the final grade for the semester in which the course was taken.

Level 2: Written Appeal to the PCS Grade Appeals Committee

If all attempts have been made to contact the instructor and failed, or the student has successfully contacted the instructor in writing and subsequent communication did not resolve the dispute by clarifying the basis on which the grade was given, or the instructor clarified the basis on which the grade was given and the student still disagrees with the instructor's assessment, the student may begin the formal grade appeal process by submitting the appeal to the Associate Dean for Academic Programs. The appeal must be received within 10 days of the faculty's response or within 10 days of when the email was sent, if no response was received.

NOTE: A disagreement about the subjective evaluation of the student's performance in the class is NOT grounds for appeal. It is assumed that the instructor, as the subject matter expert, is the one most qualified to evaluate any and all work submitted. Therefore, in order for an appeal to be considered, the student must demonstrate an objective discrepancy between the way in which they were evaluated and the grading policies and procedures outlined in the syllabus.

By submitting a grade appeal the student acknowledges that upon review and investigation, the determination may result in a *final* grade:

- Which may be the *same* as that of the original grade.
- Which may be *higher* as that of the original grade.
- Which may be *lower* as that of the original grade.

The Associate Dean for Academic Programs will guide the student as to what materials will be required to submit to start the appeal process that will be reviewed by the PCS Grade Appeals Committee. The grade appeals committee convenes once a semester approximately 6 weeks after the first day of classes to review all outstanding grade appeals. Students will be notified in writing of the decision within 30 days of the meeting of the PCS Grade Appeals Committee.

Level 3: Written Appeal to the Dean

If after receiving the decision in writing from the PCS Grade Appeals Committee, the student remains in disagreement, the final step is to submit an appeal in writing to the Dean of the School of Professional and Continuing Studies **within 10 days**.

Grade appeals must include:

1. a letter to the dean indicating why the decision rendered by the PCS Grade Appeal Committee is being appealed.
2. a copy of the decision letter received from the PCS Grade Appeal Committee.
3. a copy of the supporting materials submitted to the PCS Grade Appeals Committee.

The dean will only consider appeals based on a lack of due process or evidence that relevant information was not taken into consideration. The final decision rendered by the dean will be the grade that appears on the student's official Fordham University transcript. The student must be prepared for a final decision that keeps the original grade, is a higher grade, or lowers the original

grade, since **no further grade appeals of the same course at the University will be considered.**

Dismissal Appeal Policy

All academic progress decisions may be appealed, as a final form of review, in writing, to the dean of the school/college. The appeal must be made within three business days of the notification of change in academic status. It should include documentation of any extenuating circumstances that may have impacted the student, such as a death in the immediate family or an illness, as well as a statement from the student explaining the reasons for the appeal. The dean will make a decision in consultation with a convened committee, and that decision shall be final.

Admissions

Consistent with its mission and traditions, Fordham School of Professional and Continuing Studies welcomes inquiries and applications from men and women who wish to begin or resume their undergraduate degree study primarily through evening, weekend, and online courses, and usually on a part-time basis in light of their career and/or family responsibilities. A candidate applying for admission to Fordham University directly from high school will generally be referred to the full-time day colleges of the University.

Admission requirements are as follows:

1. Submission of a completed application for admission.
2. Candidates meet with an admissions representative at the campus of their choice to discuss the program.
3. A brief College Skills Assessment examination is intended to ensure that all accepted students have the requisite skills for success in a challenging university program. The assessment often identifies areas in need of improvement, and some candidates are admitted on condition that they attend to them early in their Fordham careers. The assessment can be waived in cases where, in the judgment of the admission officer, sufficient skills have been demonstrated in other ways—for example, through recent performance at another accredited university.
4. All applicants must submit documentation of the highest educational level at which they have studied. Therefore:
 - Applicants who have prior college experience must request that an official transcript be sent to Fordham.
 - Applicants who have not attended college must submit or present evidence of having graduated from high school (official transcript or original diploma) or having earned a General Equivalency Diploma. Applicants can present the actual certificate or request that the NYS Education Department send an official GED score report to Fordham by calling 518-474-5906.
 - Applicants who are unable to provide documentation in a timely manner may, at the discretion of the admission officer, and based on their performance in the College Skills Assessment, be admitted conditionally for their first term of study. Further registration for courses will not be permitted, however, until the required documentation is submitted.
5. Applicants may, if they wish, submit other information relevant to their candidacy, such as educational achievements outside formal academic settings, community activities, employment history, and the like.

Rather than using rigid cutoff scores or other predetermined criteria, the admission committee evaluates each application individually. An effort is made to assess ability, previous achievement, motivation, and maturity of purpose, all of which are essential to success in university studies.

An admission decision and evaluation of transfer credits will be issued as soon as possible after the review of submitted materials and the interview.

Students may apply for admission for either the fall or spring terms. When admitted, they will be invited to an orientation program for new students and will be assisted in their selection of classes.

Individuals who do not intend to pursue a degree can be admitted to enable them to attend the specific courses of their choice, or to complete the courses required for one of several certificate programs that the College offers.

For further information or to schedule an admission consultation, candidates should call the Fordham School of Professional and Continuing Studies admissions office at the campus of their choice:

Lincoln Center: 212-636-7333

Rose Hill: 718-817-2600

Westchester: 914-367-3302

Information is also available at <https://www.fordham.edu/pcs>.

Applicants for Readmission

Students not in attendance for a semester or more, and not on an official leave of absence, must be readmitted before they can register for classes.

For more information, contact the PCS office at the campus you will be attending.

Business Coursework

Undergraduate liberal arts students in all three liberal arts colleges (FCRH, FCLC, and PCS) may take up to six courses in the Gabelli School of Business. Students should be aware that business courses are three-credit courses, rather than four-credit courses, typically offered in PCS, FCRH and FCLC for juniors and seniors. Hence, when considering these minors, students should consult with their advisors to be sure they will have the minimum number of credits (124) required for graduation. Because a maximum of six courses from the Gabelli School of Business can be taken, FCRH, FCLC, and PCS students may consequently pursue only one business minor.

As an exception, students minoring in business administration as part of a Bachelor of Arts or Bachelor of Science degree must complete a minimum of 120 credits to earn their degrees (compared to 124 credits).

Please note that all of the business school courses must be taken at Fordham University to apply.

A number of minors in business are available to students at FCRH, FCLC, and PCS. While not all minors are available to all students, a list of their requirements is listed here.

Financial Aid and Scholarships

Financial aid is available for both full- and part-time students. For purposes of financial aid, students who take 12 or more credits in both

the fall and spring semesters are considered full-time students. The Office of Student Financial Services on each campus assists students in identifying programs of grants, scholarships, and loans with which to fund part of their education. They also assist with the application process for Federal Pell Grants, New York State's Tuition Assistance Plan (TAP), Aid to Part-Time Students (APTS), Federal Subsidized/Unsubsidized Direct Loans, and the private education loans and can provide information on the Lifetime Learning Credit.

In addition to the availability of these aid and loan programs, Fordham is one of the few universities which offers grant and scholarship funds from its own resources to assist adult learners. In Fordham School of Professional and Continuing Studies, students can qualify for:

Dean's Scholarships of \$5,000 annually, for newly admitted students whose prior records and/or performance in the admissions skills assessment demonstrate outstanding promise. Scholarships are renewable for up to five years, assuming a B average and the completion of least 4 courses per year.

Achievement Awards of \$3,500 based on class rank for the preceding academic year during which the student completed a total of at least 12 credits with a minimum GPA of 3.6.

University Grants-in-Aid ranging from \$1,500 to \$7,300 annually, based primarily on financial need.

Public Service Grants provide a tuition reduction of 25 percent for all uniformed and civilian employees of the New York City Police Department; for all uniformed and civilian employees of the New York City Fire Department; and for all employees of Westchester County (including the Medical Center) or municipalities within the county. All candidates for the Public Service Grants will be required to submit documentation of employment.

Dancer Discount Program provides a 33 percent discount to full-time professional dancers.

Good Neighbor Initiative

Starting in fall 2021, the Good Neighbor Initiative provides an automatic 30% tuition reduction for undergraduate degree-seeking students enrolled in the School of Professional and Continuing Studies at Fordham's Rose Hill campus, as long as they live within one of the campus' "neighbor" zip codes.

Additional merit or need-based aid may be available in addition to the Good Neighbor award.

The Ully Hirsch Scholarship is awarded annually to a student until degree completion who maintains academic excellence by achieving a minimum 3.0 cumulative GPA after earning at least 24 credits. Information about applications is posted in early spring for the award in the next academic year.

The Tognino Family Scholarship, established by John N. Tognino, PCS '75, provides a scholarship award to a business, economics or organizational leadership major in the School of Professional and Continuing Studies who demonstrates good academic achievement and financial need. Eligible students must have at least 24 earned credits with a minimum 3.0 GPA. Applications are available each spring.

The Charlotte W. Newcombe Foundation Scholarships are awarded to women students who are age 25 or over, have earned at least 60 credits

with a 3.0 cumulative GPA, and who show financial need. Applications are available in late spring.

The Morton J. Levy Scholarship is awarded annually until degree completion to a student who has demonstrated academic excellence by achieving a 3.5 GPA after earning at least 24 credits and who has demonstrated financial need. Preference is given to adult, nontraditional male students. Information about applications is posted in early spring for the award in the next academic year.

Grade Appeal Process (PCS Students)

This policy applies to both undergraduate and graduate courses in the School of Professional and Continuing Studies.

Only final grades may be appealed. If students receive a final grade in a course that they wish to appeal, they must appeal the grade prior to the completion of the next semester in which the course was taken—even if they are not in attendance; otherwise, the appeal will not be considered. Once students have graduated and have a degree awarded by the University, a grade appeal will not be considered.

Complete the Grade Appeal Form

Students who believe they have received a grade that does not fairly reflect their academic performance must consider the following before beginning the process of a grade appeal:

1. Double-check the calculation of the final numerical grades for the class based on the percentages each exam/project was worth, as stated in the instructor's syllabus.
2. Objectively assess your attendance record. As partners in learning, students are expected to attend class and contribute.
3. Objectively assess the quality of class participation. If a student's grade appeal is based solely on a difference of opinion about class participation, it will be virtually impossible to resolve this issue, as only the instructor will be able to evaluate this.
4. Compare all of the above with the original class syllabus to determine whether all requirements have been fulfilled, as stated by the instructor.
5. Check that the work submitted met the requirements enumerated by the instructor. For example, if a student submitted a well-written and well-researched paper on the life of Plato, but the instructor specifically asked for a comparative study of the ideas of Plato, Aristotle, and Socrates, the grade will not be reviewed since the student did not follow instructions.

If, after all considerations, a student determines that a grade appeal is warranted, then the following process should be followed:

Level 1: Faculty

Students should contact the instructor to discuss any concerns about their grade **prior** to beginning any grade appeal process. Students should contact the instructor by the email provided on the syllabus to detail the reason for the grade appeal. The student should initiate contact within 10 days of the posting of the final grade for the semester in which the course was taken.

Level 2: Written Appeal to the PCS Grade Appeals Committee

If all attempts to contact the instructor have failed, the student has successfully contacted the instructor in writing and subsequent

communication did not resolve the dispute by clarifying the basis on which the grade was given, or the instructor clarified the basis on which the grade was given and the student still disagrees with the instructor's assessment, the student may begin the formal grade appeal process by submitting the appeal to the associate dean for academic programs. The appeal must be received within 10 days of the faculty's response or within 10 days of when the email was sent if no response was received.

Note: A disagreement about the subjective evaluation of the student's performance in the class is **not** grounds for appeal. It is assumed that the instructor, as the subject-matter expert, is the one most qualified to evaluate any and all work submitted. Therefore, in order for an appeal to be considered, students must demonstrate an objective discrepancy between the way in which they were evaluated and the grading policies and procedures outlined in the syllabus.

By submitting a grade appeal, the student acknowledges that, upon review and investigation, the determination may result in a final grade:

- That may be the same as that of the original grade.
- That may be higher than the original grade.
- That may be lower than the original grade.

The associate dean for academic programs will advise the student on what materials they must submit to start the appeal process with the PCS Grade Appeals Committee. The grade appeals committee convenes once a semester, approximately six weeks after the first day of classes, to review all outstanding grade appeals. Students will be notified in writing of the decision within 30 days of the meeting of the committee.

Level 3: Written Appeal to the Dean

If, after receiving the decision in writing from the PCS Grade Appeals Committee, the student remains in disagreement, the final step is to submit an appeal in writing to the dean of the School of Professional and Continuing Studies **within 10 days of the date on the letter**. Grade appeals must include:

1. A letter to the dean indicating why the decision rendered by the PCS Grade Appeal Committee is being appealed.
2. A copy of the decision letter received from the PCS Grade Appeal Committee.
3. A copy of the supporting materials submitted to the PCS Grade Appeals Committee.

The dean will only consider appeals based on a lack of due process or evidence that relevant information was not taken into consideration. The final decision rendered by the dean will be the grade that appears on the student's official Fordham University transcript. The student must be prepared for a final decision that keeps the original grade, is a higher grade, or lowers the original grade, since **no further grade appeals of the same course at the University will be considered**.

These instructions supersede any prior versions of the PCS grade appeal process.

International Students

Fordham University welcomes international students and currently registers students from about 40 different countries. The Office of International Students serves as a resource center for international students and facilitates their adjustment to life in the United States. A

special orientation is held each semester for new international students. Any student unable to participate in orientation must register with the office within two weeks of starting classes. The office assists students in matters concerning immigration, such as visas and I-20 or IAM/P-66 forms, employment, and travel authorizations. The office also provides personal counseling, information on health insurance requirements and banking, and programs to promote cross-cultural and international understanding. Students fluent in English are invited to apply to the degree programs. Those students who are not proficient in the English language will be referred to the Institute of American Language and Culture.

Students are encouraged to complete the High School Certificate, the General Certificate of Education at the Ordinary Level (five passes minimum), the Baccalaureate, Maturita, or the Abitur. All submitted documents must be accompanied by a notarized English translation. Proof of financial responsibility and of thorough competence in the use and comprehension of the English language should be included among these documents. This last requirement is determined by the results of the Test of English as a Foreign Language. This test is given by the Educational Testing Service, and complete information concerning the test can be obtained by writing to

TOEFL
Educational Testing Service
P.O. Box 6151
Princeton, NJ 08451

International students who are at least 21 years of age are asked to submit the above required material to the PCS Admissions Office at the campus of their choice by July 15 for the fall semester and by November 15 for the spring semester, and also to supply the following: admissions application and fee, personal statement, any official college or university records with certified English translation, and two letters of recommendation. Adult international students will be required to take a placement examination on arrival.

Nonmatriculated Students

Qualified students who are not enrolled in a degree program at Fordham are welcome to register for classes. However, they are not eligible for state, federal, or institutional aid through Fordham University. The number of classes a non-matriculated student is permitted to take is determined by each division.

Visiting Students

Those students who are matriculated at another school or university and who wish to attend Fordham may apply for admission as a visiting student at the campus of their choice. A visiting student may maintain nonmatriculated status for one academic year. After such time, students must receive approval in order to continue their studies. Students should contact their degree-granting institution in regard to financial aid and course approval. Students should request that the Office of Enrollment Services send a transcript of their Fordham grades to their degree-granting institution.

Alumni Audit

A graduate of any school within Fordham University may audit a course for a nominal fee on a space-available basis; it will not appear on a transcript, and the student receives no credit. Alumni should contact the Office of the campus where they intend to take the class for details.

Registration

Matriculation

Matriculated students are those who have been admitted as candidates for a degree. A nonmatriculated student is one who has not been admitted as a degree candidate but has received approval to register for credit courses.

Classification of Students

Class standing is determined by the number of credits the student has completed.

Year or Classification	Credits Completed
First Year	0-29
Sophomore	30-59
Junior	60-91
Senior	92-123
Graduation	124

Official Registration

Students must register according to the schedule provided in their registration materials before attending any course. Registration information is made available to each student well before official registration for an upcoming term.

Late Registration

A late registration period is held prior to the beginning of classes each semester.

Course Changes

Students may change their course schedules with their dean or through the internet registration system by adding/dropping until the deadline specified in the academic calendar.

Veteran students should be aware that if they are using any military education benefit, withdrawal from a class may create a debt with the VA, their Service Branch, or Fordham. Before withdrawing from a class, such students should consult with the VA Certifying Officials in the Office of Academic Records.

Registration in Other Fordham Schools

As part of their degree program, students may register for courses in the other undergraduate schools of Fordham University at any campus, with the permission of their advising dean.

Except in unusual circumstances, students are expected to take at least 60 percent of their courses in their home school, through evening, weekend, or online study.

Seniors may take an introductory course in one of the graduate schools of the University with the approval of the graduate chairperson.

Credit/Course Load

Full-time status is achieved by registering for 12 or more credits per semester.

The typical course load in Fordham School of Professional and Continuing Studies for undergraduate students is two or three courses per term. Many students vary their course loads from one term to the

next, based on changing personal, employment or family responsibilities—in such cases, students should consult with their advising dean.

Transfer Credit

Up to 75 credits may be accepted in transfer from other accredited institutions or institutions with which there is an affiliation agreement. The nature and level of each course will be considered, provided it was completed with a grade of at least C or the equivalent. The final determination on transfer credits is at the discretion of the advising dean.

Of the total transfer credits accepted, up to 26 may be applied to the requirements of the Core Curriculum. To preserve the character of the Fordham degree, transfer students will ordinarily be expected to complete at Fordham at least one course in literature, philosophy, and theology with the guidance of their academic advisor.

Up to half of the requirements of the student's intended major may be satisfied by transfer credits, subject to review by the academic department in which the student later officially declares his or her choice of major.

Other credits accepted in transfer will be counted as electives, as well as those which, in the judgment of the student's major department, should not be counted toward major requirements in that field.

While a preliminary estimate of transfer credits can be made during the admissions process based on unofficial transcripts and student records, the actual award of transfer credit can be made only on the basis of an official transcript provided directly to Fordham University from the institution at which the course was completed, or in a sealed envelope delivered by the student.

Courses and credits accepted in transfer are counted toward the 124 credits required for the bachelor's degree and, where appropriate, satisfy the prerequisites listed for advanced courses as if they were taken at Fordham. The grades received in the transferred courses are not, however, calculated as part of the student's cumulative quality point index at Fordham.

Once enrolled in Fordham School of Professional and Continuing Studies, permission to take courses elsewhere for transfer purposes will be granted only in exceptional circumstances and only for courses offered at other regionally accredited universities or four-year colleges.

Honors Program at PCS

Fordham School of Professional and Continuing Studies is unique among major universities in offering an honors program tailored specifically for adult students. The program enables students who have demonstrated their capability for independent work of high quality to form mentorship relationships with senior faculty of their choosing and to design projects related to their personal and professional goals.

For more information:

Please contact your advising dean to express your interest in the Honors Program or to determine your eligibility.

Requirements

Students become eligible for nomination to the Honors Program after completion of at least 30 credits toward the bachelor's degree (which may include transferred credits) and at least four Core Curriculum

courses at Fordham with a cumulative grade point average of 3.6. Nominations from among this eligible group are made annually by faculty members and reviewed by the Honors Program Committee.

Students who are invited to participate, and who accept this invitation, will register for a four-credit interdisciplinary honors course, in which they must earn a grade of at least B to continue in the program. Interdisciplinary honors courses are offered each term and rotated among the campuses.

In subsequent semesters prior to graduation, honors students will seek faculty mentorship for two advanced-level study projects. Each project will be done as an independent research course and need not be taken in consecutive semesters. Project grading will be done by the faculty mentor, in consultation with the honors program director or designee.

Projects must be in two different disciplines, only one per semester, and none in the semester of intended graduation. The interdisciplinary honors course or one of the projects may, if appropriate, be counted toward fulfillment of the student's major. None can substitute for a major or core curriculum requirement.

Upon satisfactory completion of the interdisciplinary honors course, two independent study projects, as well as the completion of all other degree requirements with a final cumulative grade point average of 3.6, students will graduate with the notation in *cursu honorum* inscribed on their diplomas and transcripts. Students who are unable to fulfill all of these requirements will, nevertheless, receive full academic credit for work which they have completed.

Supporting Student Success

College Writing Center

The writing center at each campus offers tutoring on all levels of writing, from students' first compositions to advanced research papers, and in all aspects of the writing process, from topic development to the teaching of editing techniques. Professional tutors act as advisers; the work remains the student's own. Students schedule half-hour appointments or walk in during the center's hours, which are posted. The services are free to students.

Mathematics Help Room

The Mathematics Help Center offers tutoring services designed to assist students who have weak math skills or "math anxiety." This service is free to students.

Periodic Workshops

The Office of the Dean at each campus offers periodic workshops which include topics on study skills, test taking, and time management.

Student Services

Students should consult the Student Services section of this bulletin for information on health services, campus ministry, counseling centers, disability services, and career services.

Academic Enhancement Courses

The following three-credit courses, open only to students in PCS or the Gabelli School of Business—Evening Program, are especially recommended for new students with no prior college experience or who are returning after an extended absence from the classroom:

ENGL 1101. Composition I. (3 Credits)

Instruction in sentence and paragraph construction, reading comprehension skills and analysis, the basic principles of grammar with an emphasis on diagnosing and solving persistent problems, and principles of argumentation and evidence. Weekly assignments and regular grammar exercises to build confidences and competence in college writing.

IDIS 1010. Critical Reading in the Disciplines. (3 Credits)

This course will provide students with the critical skills necessary to read successfully and use reference materials at the college level. Selections from disciplines such as literature, psychology, history, and natural sciences will be analyzed for information, main and subordinate ideas, logical structure, inference, tone, and irony. Written exercises and reports will measure students' comprehension.

IDIS 1100. The Adult Learner: Identity, Change, and Development. (3 Credits)

This seminar has been designed to encourage each student to study his or her own unique identity development in adulthood. Each adult learner will be assisted in examining their skills, values, goals, experience, educational background, learning style and personality. Students can use this information for both short and long term career, educational and life planning. This new self-discovery will be developed through assessment testing, occupational research, informational interviewing and consultations with career development and educational specialists. The course utilizes a combination of readings, lecture, class discussions, presentations, exercises, guest speakers and video material.

PHIL 1010. Introduction to Critical Thinking. (3 Credits)

The course is intended to sharpen a student's ability to think clearly, consistently, critically, and creatively. The course objective considers principles of sound judgment and helps students learn how to recognize and analyze arguments present in ordinary spoken and written language, how to distinguish correct reasoning from incorrect reasoning, and how to construct valid, sound arguments.

PCS Programs

Programs

Majors

- Business Major (p. 124)
- Communications Major (p. 125)
- Information Technology and Systems Major (p. 128)
- Organizational Leadership Major (p. 129)
- Real Estate Major (p. 131)

Minors

- Communications Minor (p. 126)
- Organizational Leadership Minor (p. 129)
- Real Estate Minor (p. 132)

Special Programs

- College at Sixty (p. 125)
- Credit for Experiential Learning (p. 127)
- Honors Program at PCS (p. 123)
- Post-Baccalaureate Pre-Medical/Pre-Health Program (p. 130)

Business Major

Fordham's School of Professional and Continuing Studies offers a bachelor of arts degree in business that provides adult undergraduates with the skills necessary to become effective leaders in the business world. The major provides a broad base of business knowledge in both a theoretical and an applied context, placing students in an optimal position to build a career focused on the future.

The curriculum emphasizes real-world financial and economic issues, accounting, ethics, management, marketing, and best organizational practices. By mastering this comprehensive business curriculum as well as a specialized liberal arts core, Fordham's adult students are not only able to comprehend the relationships among the functional areas of business but are also able to develop the knowledge base and professional skills required for career advancement in an evolving global business environment.

The program combines an excellent business curriculum with an outstanding liberal arts program so that students graduate with strong analytic, verbal, and writing skills.

CIP Code

52.0101 - Business/Commerce, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The major consists of five prerequisites and 12 business courses, several of which also satisfy requirements of the University core curriculum.

Course	Title	Credits
Prerequisites		
ECON 1100	Principles of Macroeconomics	3
ECON 1200	Principles of Microeconomics	3
MATH 1108	Math for Business: Finite	3
MATH 1109	Math for Business: Calculus	3
ECON 2140	Statistics I	4
Required Business Courses		
INSY 2300	Information Systems	3
ACBU 2222	Principles of Financial Accounting	3
ACBU 2223	Principles of Managerial Accounting	3
CMBU 2665	Business Communication	3
BLBU 2234	Legal Framework of Business	3
BLBU 3443	Ethics in Business	3
LPBU 3223	Principles of Management	3
ECON 2142	Statistics II	4
OPBU 3438	Operations and Supply Chain Management	3
FNBU 3221	Financial Management	3

MKBU 3225	Marketing Principles	3
SABU 4441	Strategy	3

Availability

The major in business is available to students in Fordham's School of Professional and Continuing Studies at Westchester.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

College at Sixty

Fordham's School of Professional and Continuing Studies offers a College at 60 program for individuals who want to be stimulated by new ideas and engage in a dynamic community. For more than 50 years, College at 60, a nationally recognized program, has served as a springboard into the classroom for students ages 60 and older who are interested in learning among a community of peers in a supportive, intellectual environment. The program welcomes adults from many walks of life and varied educational backgrounds. Some are recently retired or work part-time. Others may have either left college early to embark on life's journeys or completed college and earned advanced degrees. What they all have in common is a strong desire for lifelong learning.

College at 60 offers noncredit, liberal arts college courses taught by experienced faculty members, some of whom also teach in Fordham's undergraduate and graduate schools. These seminars cover a variety of topics, such as creative writing, art history, literature, classical music, science, theater, psychology, philosophy, religious studies, and history.

Program Activities

Periodically, College at 60 offers free lectures to enhance the learning experience of our students. Participation in the College at 60 program also entitles you to attend general campus events and use Fordham's facilities, including libraries, computer centers, bookstores, and cafeterias at the Manhattan, Bronx, and Westchester campuses.

College at 60 courses are offered at the Lincoln Center campus in Manhattan during the fall and spring semesters. The courses are noncredit, nondegree-based courses.

The fall semester runs from September to December, and the spring term runs from February to May. Daytime courses are offered once a week for a two-hour class session, either from 10:30 a.m. to 12:30 p.m. or from 1:30 to 3:30 p.m. to take advantage of off-peak commuting hours. Course schedules are listed in a separate brochure that is distributed in May and November and available online.

Eligibility for the program is available to adults ages 60 and older who have a desire to develop their intellectual interests and a capacity for college-level reading. You'll meet with the program director and complete a brief interest form to help ensure this is the right program for you.

Tuition is modest and indicated in the course schedule brochure and on the College at 60 website at fordham.edu/colleageat60.

For more information

Visit the College at 60 program page.

Communications Major Requirements

Majors take 11 required courses, including the two introductory courses (to be completed by the end of the first semester of the junior year); two media, culture, and society courses; one ethics, law, and policy course (to be taken during the senior year); three courses in a chosen concentration, one of which serves as the introduction to the concentration; and three free electives.

Course requirements for the major are as follows:

Course	Title	Credits
Introductory Courses ¹		
COMM 1000	Fundamentals of Communication and Media Studies	
COMC 2329	Media Industries	
Media, Culture, and Society		
Select two courses from the media, culture, and society concentration ²		
Concentration		
Select three courses in one of the following concentrations:		
Media, Culture, and Society		
Film		
Journalism		
New Media/ Participatory Media		
Television/Radio		
Ethics, Law, and Policy		
Select one ethics, law, and policy course ³		
Electives		
Select three electives in COMC, DTEM, FITV, JOUR, or in appropriate related programs ⁴		

¹ Majors are required to take both introductory courses by the end of the first semester of their junior year.

² This includes any COMC course except COMC 2329 Media Industries. Those majors who wish to concentrate in media, culture, and society must take three additional courses from the media, culture, and society concentration, for a total of five media, culture, and society courses, to fulfill this requirement.

³ See course options under Ethics, Law, and Policy Course Requirement (p. 202) in the Communication and Media Studies department.

⁴ Any course with the COMM subject code or the COMM attribute code may fulfill this requirement.

Learning Outcomes

Upon graduation from the communications major or minor in PCS, students will have achieved the following curricular goals:

- Develop a critically-informed understanding of media as a set of industries, institutions, objects, and infrastructures; sites of political, economic, and cultural contestation; and fields of creative production.
- Understand how media—as historically situated technologies, production practices, and consumption practices—define cultural notions of pastness and futurity.

- Recognize and evaluate the ethical, regulatory, and legal frameworks within which media and communication systems operate, as well as the asymmetrical power relations embedded within these frameworks.
- Assess the affordances of communication and media practices for addressing or perpetuating social inequities, and for promoting positive social change.
- Articulate the varied roles that media play in the shaping of global identities, cultures, and beliefs.

Availability

The major in communications is available to students in Fordham's School of Professional and Continuing Studies at Lincoln Center and Rose Hill, and to students in Fordham College at Rose Hill (FCRH) and Fordham College at Lincoln Center (FCLC) who matriculated at FCRH or FCLC prior to fall 2016. Although most courses with the COMM subject code have been reassigned to COMC, DTEM, FITV, or JOUR, the requirements for the major in communications have not changed substantially. Requirements for the major have been restated using the new subject codes.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

CIP Code

09.0101 - Speech Communication and Rhetoric.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Concentrations

Communications majors are required to specialize in one of the program's five concentrations by taking that concentration's introductory course plus two additional courses in the same concentration.

Media, Culture, and Society concentration requirements

Courses in this concentration also fulfill the Media, Culture, and Society requirement for all COMM majors.

Course	Title	Credits
COMC 1101	Communications and Culture: History, Theory, and Methods	

Select any two other COMC courses or courses otherwise fulfilling the requirements for the communication and culture major¹

¹ Any course with the COMC subject code or the COMC attribute code may fulfill this requirement.

Film concentration requirements

Course	Title	Credits
FITV 1501	Understanding Film	

Select any two other FITV courses numbered x5xx (i.e., whose second digit is a 5)¹

¹ Any course with the FITV subject code or the FITV attribute code may fulfill this requirement.

Journalism concentration requirements

Course	Title	Credits
JOUR 1702	Introduction to Journalism	4

Select any two other JOUR courses or courses otherwise fulfilling the requirements for the Journalism major

¹ Any course with the JOUR subject code or the JOUR attribute code may fulfill this requirement.

New Media concentration requirements

Course	Title	Credits
DTEM 1401	Introduction to Digital Technologies and Emerging Media	

Select any two other DTEM courses or courses otherwise fulfilling the requirements for the Digital Technologies and Emerging Media major

¹ Any course with the DTEM subject code or the DTEM attribute code may fulfill this requirement.

Television/Radio concentration requirements

Course	Title	Credits
FITV 1601	Understanding Television	

Select any two other FITV courses numbered x6xx (i.e., whose second digit is a 6) or where the title of the course contains Television or Radio¹

¹ Any course with the FITV subject code or the FITV attribute code may fulfill this requirement.

Communications Minor Requirements

Six courses are required for the minor:

Course	Title	Credits
<i>Select one of the following two courses:</i>		
COMM 1000	Fundamentals of Communication and Media Studies ¹	
COMC 2329	Media Industries	

Select one course from the media, culture, and society concentration of the major²

Select one ethics, law, and policy course³

Select three electives in COMC, DTEM, FITV, JOUR, or in appropriate related programs⁴

¹ Minors are required to complete this requirement by the end of the first semester of their junior year.

² This includes any COMC course except COMC 2329 Media Industries. Any course with the COMC subject code (p. 1067) or the COMC attribute code may fulfill this requirement.

³ See the below list of Ethics, Law, and Policy courses.

⁴ Any course with the any of the CMS subject codes or attribute codes (COMM, COMC, DTEM, FITV, or JOUR) may fulfill this requirement.

Ethics, Law, and Policy courses

Courses in this group have the CELP attribute.

Course	Title	Credits
AAST 3280	Representing Asians in Journalism and Media	4
COLI 4570	Films of Moral Struggle	4
COMC 2277	Media and Sexuality	4
COMC 3240	Photography, Identity, Power	4
COMC 3260	Media Regulation	4
COMC 3280	Representing Asians in Journalism and Media	4
COMC 3310	Ethics and Popular Culture	4
COMC 3330	Peace, Justice, and the Media	4
COMC 3350	Media Law	4
COMC 3370	Ethical Issues in Media	4
COMC 3375	Children and Media	4
COMC 3380	International Communication	4
COMC 4170	Dissent and Disinformation	4
COMC 4340	Freedom of Expression	4
COMC 4360	Communication Ethics and the Public Sphere	4
COMC 4370	Ethical Controversies in 21st Century Media	4
DTEM 2450	Digital Property: Rights, Policies, and Practice	4
DTEM 3500	Resistance and Global Activism	4
DTEM 4430	Digital Media Ethics	4
DTEM 4440	Privacy and Surveillance	4
DTEM 4470	Values in Design	4
DTEM 4480	Digital Media and Public Responsibility	4
FITV 2670	Television and Social Change	4
FITV 4570	Films of Moral Struggle	4
FITV 4660	Ethics of Reality Television	4
JOUR 3740	Ethics and Diversity in Journalism	4
JOUR 3760	The Journalist and the Law	4
JOUR 4750	Values in the News	4
JOUR 4770	Media Law and Journalism Ethics	4

Learning Outcomes

Upon graduation from the communications major or minor in PCS, students will have achieved the following curricular goals:

- Develop a critically-informed understanding of media as a set of industries, institutions, objects, and infrastructures; sites of

political, economic, and cultural contestation; and fields of creative production.

- Understand how media—as historically situated technologies, production practices, and consumption practices—define cultural notions of pastness and futurity.
- Recognize and evaluate the ethical, regulatory, and legal frameworks within which media and communication systems operate, as well as the asymmetrical power relations embedded within these frameworks.
- Assess the affordances of communication and media practices for addressing or perpetuating social inequities, and for promoting positive social change.
- Articulate the varied roles that media play in the shaping of global identities, cultures, and beliefs.

Availability

The minor in communications is available to students in Fordham's School of Professional and Continuing Studies at Lincoln Center and Rose Hill, and to students in Fordham College at Rose Hill (FCRH) and Fordham College at Lincoln Center (FCLC) who matriculated at FCRH or FCLC prior to fall 2016. Students may not major in any of the new Communication and Media Studies department majors (COMC, DTEM, FITV, or JOUR) with a minor in communications (COMM) or vice versa.

Credit for Experiential Learning

As part of its mission to educate working adults and part-time learners, Fordham School of Professional and Continuing Studies enables students to earn credit for learning that has taken place outside formal academic settings but through which students have mastered knowledge or skills equivalent to what would have been achieved in college-level courses.

There are several ways in which students can demonstrate this learning and be awarded credit toward the baccalaureate degree. These programs provide a substantial savings of time and tuition for students and recognize the experiences and accomplishments that they have already attained:

- CLEP and DANTES/DSST Exams
- ACE/NPONSI National Program on Noncollegiate Sponsored Instruction
- Life Experience Portfolio

For more information

Visit the webpage for receiving credit for experiential learning.

Requirements

Students are eligible for the experiential learning programs after successful completion of at least five courses in residence at Fordham, which must include the courses Composition II and Texts and Contexts.

Students who are in their last two semesters of the degree program are not eligible to participate in the Life Experience Portfolio Program.

A maximum award of 32 credits towards the undergraduate degree may be earned for work completed through any combination of the experiential learning options.

Credits earned through CLEP or DANTES exams, ACE/NPONSI, or the Life Experience Portfolio will be counted within the total number of 75

allowable transfer credits and will not, therefore, reduce the Fordham residency requirement of 49 credits.

CLEP AND DANTES/DSST Exam Programs

Students can earn up to 18 credits for successful completion of exams sponsored by the College-Level Examination Program (CLEP) and the Defense Activity for Non-Traditional Support Subject Standardized Tests (DANTES/DSST). The exams are offered at the Rose Hill and Westchester campuses throughout the year. Information and a full listing of the subject exams and acceptable passing scores are available in the campus deans' offices. There is a fee of approximately \$90 per exam, payable online at the time of the test along with an administrative fee of \$20.

Students who have taken CLEP or DANTES exams elsewhere can request that their scores be sent to PCS for transfer acceptance (school code #2259 for Rose Hill or #7280 for Lincoln Center or #2406 for Westchester).

ACE/NPONS National Program on Noncollegiate Sponsored Instruction

The American Council on Education and the New York State Board of Regents have reviewed many educational programs sponsored by corporations, governmental agencies, and the military and found some to be the equivalent of college-level coursework. Students who have completed such programs successfully should submit documentation of the courses and, generally, Regents or ACE recommendations will be honored.

Life Experience Portfolio Program

Students whose experiential learning is in an area of knowledge that cannot be verified by examination or ACE/NPONS may register for a two-credit Life Experience Portfolio Workshop intended to assist them in articulating one or more areas of skill or knowledge.

In the workshop course, students will assemble the documentation or validations of their experience, will prepare one or more outlines of the essays they will produce, and will complete at least one such essay. Working with a course syllabus, the workshop mentor will work with the student directly or refer the student to a faculty supervisor whose expertise is necessary. The faculty supervisor will meet with the student, review the documentation, offer suggestions on the outline, critique a first draft of the essay, and review the final essay—usually at least 25 to 30 pages and including reference to standard work in the field, where appropriate. At least one such essay must be completed by the end of the semester for the student to earn a grade of pass for the workshop course and there is no maximum limit on the number of essays which may be included in a portfolio.

The faculty supervisor will work with the dean's office in recommending either zero-credit, three-credits (lower level), or four-credits (upper level) per essay for the course-equivalent experiential learning which the student has demonstrated in the portfolio. Credits earned shall count as electives only and will not be charged the per-credit tuition rate; a posting fee per credited essay will be charged to the student's tuition account.

Within one year, a student may register for a second Life Experience Portfolio Workshop on an audit basis, for the purpose of continuing in the development of essays in other areas of learning.

Information Technology and Systems Major

The Computer and Information Sciences Department offers a Bachelor of Science degree in information technology and systems (ITS). The ITS major provides students with skills and hands-on experience in systems analysis, database management, web programming, cybersecurity, network administration, and software development. This major emphasizes the needs of capable new technology users across virtually every field of employment. The structure of the information technology systems major allows students to tailor their programs to current workplace demands and long-term career objectives.

For more information

Visit the information technology and systems program webpage.

CIP Code

11.0101 - Computer and Information Sciences, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Information technology and systems majors must complete 10 courses in computer science:

Course	Title	Credits
Required Courses		
CISC 1100 or CISC 1400	Structures of Computer Science Discrete Structures	3 to 4
CISC 1600 & CISC 1610	Computer Science I and Computer Science I Lab ¹	4
CISC 2000 & CISC 2010 or CISC 3400	Computer Science II and Computer Science II Lab Java Programming	4
CISC 2201	Systems Analysis	4
CISC 2350	Information and Web Programming	4
CISC 3500	Database Systems	4
CISC 3580 or CISC 3600	Cybersecurity and Applications Secure Cyber Networks	4
CISC 4615 or CISC 4700	Data Communications and Networks Network and Client Server	4
Electives		
Select two elective computer science courses ²		8

¹ Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.

² These electives are chosen with approval of the academic adviser and selected from CISC 2000 Computer Science II through CISC 4999 Tutorial.

Availability

The major in information technology and systems is available to students in Fordham's School of Professional and Continuing Studies at Lincoln Center and Rose Hill.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Organizational Leadership Major

Success in leadership positions, whether in management and/or a supervisory capacity in business, government, cultural institutions and nonprofit organizations is based largely upon the following competencies or skill sets: the ability to communicate effectively; familiarity with essential organizational functions (such as strategic planning, budgeting, information processing, legal issues, and public relations) broad-based learning and the critical thinking skills requisite for continual adaptability to changing responsibilities; and, increasingly, the ability to understand and participate with others in multiple task-groups.

The Organizational Leadership major is available to students in the School of Professional and Continuing Studies on the Lincoln Center, Rose Hill and Westchester campuses. The courses will be offered on-site, online and in hybrid formats.

The target population includes:

- Individuals who need a Bachelor's degree to advance professionally
- Professionals who want to establish themselves as change agents
- Working professionals and early to mid-career level managers, who may or may not be supervising others.

CIP Code

52.0213 - Organizational Leadership.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The organizational leadership major consists of nine courses.

Course	Title	Credits
Required Courses		18
ORGL 2000	Theories of Leadership, Context and Change	
ORGL 2100	Information Systems and Technology for Leadership	
ORGL 2200	Transforming Managers into Inspired Leaders	
ORGL 2210	Ethical Decision Making for Leadership	
ECON 2140	Statistics I	

Area Requirement **Varies**
Students will choose one course from each of the following areas.

Leading Change (Human Capital)

ORGL 2300	Issues in Human Resource Management
ORGL 2500	Change Management and Organizational Culture
ORGL 2600	Mediation, Negotiation, Alternative Dispute Resolution
ORGL 2610	Applied Organizational Behavior and Leadership
ORGL 3100	Leading with Emotional Intelligence

Organizational Communications

ORGL 2700	Organizational Communication
ORGL 2701	Business Communications in Leadership
ORGL 2702	Interpersonal Communication

Students must earn a grade of C or above in order for a required course to count toward their minor in organizational leadership.

Availability

The minor in organizational leadership is available to students in Fordham's School of Professional and Continuing Studies at Lincoln Center, Rose Hill, and Westchester.

Post-Baccalaureate Pre-Medical/Pre-Health Program

The Fordham Post-Baccalaureate Pre-Medical/Pre-Health Program is for students who have completed their undergraduate degrees and are preparing for entry into the health professions but need the prerequisite science courses. Individuals seeking admission to medical, dental, physician assistant, veterinary, select nursing, genetics counseling, and other health-related programs, may apply to the School of Professional and Continuing Studies (PCS) for the prerequisite science courses as nonmatriculated students. The official Fordham Post-Baccalaureate Pre-Medical/Pre-Health Program description and information on financial aid and course schedules may be found at on the PCS website.

In keeping with the PCS educational philosophy to serve adult students, the Fordham Post-Baccalaureate Pre-Medical/Pre-Health Program offers its pre-med curriculum primarily in the evening, on weekends, and in summer sessions, with classes at Rose Hill, Lincoln Center, and Westchester. A limited number of day classes are also available during the academic year.

Committee Evaluation Letter:

The Fordham Postbaccalaureate program Committee on Health Professions (CHP) process is a comprehensive one which provides candidates with several workshops and support to prepare them for the medical school application process. The CHP process includes a committee interview and committee letter for those students who qualify.

Students must submit a preliminary application to be considered as a candidate for the Committee on Health Professions process. The preliminary application will be reviewed by our Board of Evaluators and decisions will be made as to which applicants will be eligible to proceed with the committee process.

In order to apply for the CHP process, students must meet the following criteria:

- Minimum 3.2 GPA
- Minimum 150 hours of health-related work and/or volunteer experience
- Minimum 30 credits of coursework taken in the Fordham Postbaccalaureate program or the PCS Undergraduate program only. Additionally, students must have attended classes in the Fordham Postbac program for at least two semesters (not including summer sessions) prior to applying to the CHP process.
- Completion and submission of CHP process application

Candidates who indicate intent to participate in a spring CHP cohort after the CHP application deadline will not be able to participate in the spring CHP process. (Students may still apply to medical school but will not be able to get a committee letter from the Fordham Postbaccalaureate program.)

Please note:

- Students may apply for the CHP process up to one application cycle after leaving the Fordham Postbaccalaureate program.
- Students completing or who have completed a Fordham College undergraduate degree or postbaccalaureate work at another program are not eligible for the Fordham Postbac CHP process.
- All courses in the basic curriculum must be completed prior to or concurrent with the professional school admissions test and no later than the end of the first summer session of the application year in which the Committee evaluation is sought. The Committee evaluation letter is based on a student's academic portfolio, which includes the following: coursework, transcripts, personal statement, self-assessment, and biographical information on personal history, including volunteer and/or internship experience and research experience, faculty recommendations, and a personal interview with members of the Committee.

For more information

Visit the Post-Baccalaureate Pre-Medical/Pre-Health Program webpage.

Admissions

Candidates submit an application online for PCS admission as nonmatriculated students, provide official undergraduate transcripts and interview with the program director. The general requirement for consideration is a minimum 3.0 GPA. Once admitted to the Fordham Post-Baccalaureate Program, all remaining courses must be taken at Fordham.

Requirements

Program Requirements

Fordham Post-Baccalaureate Pre-Medical/Pre-Health Curriculum

The basic curriculum includes one year of biology, general chemistry, organic chemistry, physics, calculus and statistics, biochemistry and physiology, psychology and sociology, and English required by most medical and professional schools as prerequisites for admission. Additional upper-level science courses are also available and require prior completion of the basic sequence in biology, general chemistry, and

calculus. These courses prepare students for the professional school entrance exams, e.g., MCAT, DAT, VCAT, OAT.

Course	Title	Credits
One year of general biology with lab		
BISC 1403 & BISC 1413	Introductory Biology I and Introductory Biology Lab I	5
BISC 1404 & BISC 1414	Introductory Biology II and Introductory Biology Lab II	5
One year of general chemistry with lab		
CHEM 1321 & CHEM 1331	General Chemistry I and General Chemistry Lab I	6
CHEM 1322 & CHEM 1332	General Chemistry II and General Chemistry Lab II	6
CHEM 1311	General Chemistry I Recitation	0
CHEM 1312	General Chemistry II Recitation	0
One year of organic chemistry with lab¹		
CHEM 2521 & CHEM 2541	Organic Chemistry I and Organic Chemistry Lab I	6
CHEM 2522 & CHEM 2542	Organic Chemistry II and Organic Chemistry Lab II	6
One year of general physics with lab		
PHYS 1501 & PHYS 1511	General Physics I and Physics I Lab	3
or PHYS 1601	Introduction to Physics I	
or PHYS 1701	Physics I	
PHYS 1502 & PHYS 1512	General Physics II and Physics II Lab	3
or PHYS 1602	Introduction to Physics II	
or PHYS 1702	Physics II	
PHYS 1503	General Physics I Recitation	0
PHYS 1504	General Physics II Recitation	0
Additional courses		
BISC 3132 & BISC 3142	Human Physiology and Human Physiology Lab	5
BISC 3521	Biochemistry	3
ECON 2140	Statistics I	4
MATH 1203	Applied Calculus I	3
MATH 1205	Applied Statistics	3
PSYC 1200	Foundations of Psychology	4
PSYC 2000	Statistics	4
SOCI 1100	Introduction to Sociology	3
SOCI 2606	Social Science Statistics	4

¹ General chemistry, including labs, must be successfully completed before enrollment in organic chemistry.

Upper Level Electives

Course	Title	Credits
BISC 2539 & BISC 2549	General Genetics and General Genetics Lab	5
BISC 3221 & BISC 3231	Human Anatomy and Human Anatomy Lab	5
BISC 3643 & BISC 3653	Microbiology and Microbiology Lab ¹	5

BISC 3752	Molecular Biology	3
BISC 3754	Cell Biology	3

Note: Genetics and lab must be successfully completed before enrollment in all upper level electives.

Real Estate Major

In cooperation with the Fordham Real Estate Institute, the bachelor's degree in real estate for adult students focuses on real-world, professional practices with a foundation in real estate law, economics, accounting, finance, investment, valuation, development, construction, and management. Through this comprehensive real estate curriculum, Fordham's adult students develop the knowledge base and professional skills required for career advancement and achievement in a global real estate environment.

Our small class sizes, engaged faculty, and career and learning resources at the Lincoln Center and Westchester campus locations provide each student with the academic tools and flexibility necessary for success in today's real estate industry.

The real estate major consists of three prerequisite courses, six core real estate courses, and elective courses, several of which also satisfy requirements of the Fordham University Core Curriculum. Students complete their major with elective courses in real estate.

The Bachelor of Science in Real Estate in the School of Professional and Continuing Studies has the following learning objectives:

- Demonstrate competency in critical thinking skills.
- Demonstrate a capacity for ethical decision-making.
- Demonstrate an awareness of the local, national, and global perspectives of Real Estate.
- Demonstrate effective written and verbal communication skills.
- Demonstrate an understanding of professional practices and effective methodology.

CIP Code

52.1501 - Real Estate.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Students majoring in Real Estate must complete the following courses prior to beginning the Real Estate major:

Course	Title	Credits
ECON 1100	Principles of Macroeconomics	3
ECON 1200	Principles of Microeconomics	3
ECON 2140	Statistics I	4
Total Credits		10

Major Requirements

Course	Title	Credits
Real Estate Core Courses		
REAL 1002	Fundamentals of Real Estate Law	3
REAL 1004	Principles of Real Estate Economics	3
REAL 1006	Real Estate Accounting Essentials	3
REAL 1008	Principles of Real Estate Finance	3
REAL 1010	Principles of Real Estate Valuation and Feasibility	4
REAL 1020	Real Estate Development Principles and Practices	4
Real Estate Electives		15 to 16
Total Credits		35-36

Real Estate Electives

Courses in this group have the REE attribute.

Course	Title	Credits
REAL 2002	Real Estate Financial Modeling	4
REAL 2004	Real Estate Management	3
REAL 2006	Global Real Estate Markets	3
REAL 2008	Building Design and Construction	4
REAL 2010	Special Topics in Real Estate	4

Availability

The major in real estate is available to students in Fordham's School of Professional and Continuing Studies at Lincoln Center, Rose Hill, and Westchester, as well as online.

Real Estate Minor Overview

The undergraduate minor in real estate offers students a unique opportunity to learn how the ever-expanding, multifaceted real estate industry functions and how real estate assets—the built environment in which we all live—are analyzed, financed, and developed. The courses in the minor—real estate law, real estate economics, and real estate finance—especially complement majors in business, economics, communications, legal or political studies, and organizational leadership.

Requirements

Students minoring in Real Estate must complete six courses:

Course	Title	Credits
ECON 1200	Principles of Microeconomics	3
ECON 1100	Principles of Macroeconomics	3
ECON 2140	Statistics I	4
REAL 1002	Fundamentals of Real Estate Law	3
REAL 1004	Principles of Real Estate Economics	3
REAL 1008	Principles of Real Estate Finance	3
Total Credits		19

Students majoring in Business (PCS only) (p. 124), Economics (p. 232), Interdisciplinary Math & Economics (p. 233), or International Political Economy (p. 272), or minoring in Business Administration (p. 190) or Economics (p. 132), which require three of the same

courses as the Real Estate minor, must take an additional undergraduate course (of three or more credits) with the REAL subject code (p. 1604).

Availability

The minor in real estate is available to students in Fordham's School of Professional and Continuing Studies (at Lincoln Center, Rose Hill, and Westchester, and online), Fordham College at Rose Hill, and Fordham College at Lincoln Center.

Special Academic Programs

- Accelerated M.S. in Real Estate Program (p. 134)
- Accelerated Master's in Teaching Program (p. 132)
- Community Engaged Learning (p. 135)
- Cooperative Program in Engineering (3-2 Engineering) (p. 135)
- Graduate Study (p. 136)
- GSAS Accelerated Master's Programs (p. 137)
- Higher Education Opportunity Program (p. 137)
- Institute of American Language and Culture (p. 137)
- Internships (p. 137)
- Pre-Law (p. 138)
- Pre-Medical and Pre-Health (p. 138)
- ROTC: Reserve Officers' Training Corps (p. 142)
- Study Abroad (p. 145)
- Tutorials (p. 145)

Accelerated Master's in Teaching Program

Accelerated Master's Degree in Teaching Program (formerly 5-year track program)

The Fordham University Graduate School of Education (GSE) offers an Accelerated Master's Degree in Teaching program for students enrolled in one of the undergraduate colleges at Fordham University. This program provides an opportunity for students to complete a B.A./B.S. and any one of our M.S.T. degrees:

- 36-credit Master of Science in Teaching (M.S.T.) degree in Early Childhood Education (p. 730) or Childhood Education (p. 726), single certification;
- 30-credit Master of Science in Teaching (M.S.T.) degree in Adolescence Education (biology (p. 711), chemistry (p. 713), physics (p. 720), earth science (p. 715), mathematics (p. 719), English (p. 718), or social studies (p. 722)), single certification;
- 30-credit Master of Science in Teaching (M.S.T.) degree in Teaching English to Students of other Languages (p. 732);
- 42-credit Master of Science in Teaching (M.S.T.) in Teaching General and Exceptional Adolescents (p. 733), dual certification in Adolescents and Special Education programs;
- 30-credit Master of Science in Teaching (M.S.T.) in Adolescence Special Education (p. 723); or
- 45-credit Master of Science in Teaching (M.S.T.), dual certification in Early Childhood/Special Education (p. 731), Childhood/Special Education (p. 728), Early Childhood/Childhood (p. 729) programs.

Once obtaining certification in teaching, extensions (p. 704) may also be pursued in early childhood special education (p. 705), childhood special education (p. 704), bilingual childhood education (p. 704), middle school and adolescence special education (p. 705). Courses are also offered in TESOL, special education and bilingual education for additional credits.

The accelerated master's degree in teaching program consists of early admission to the GSE (application fee is waived), integration of 12 GSE credits in undergraduate senior year, the completion of a B.A./B.S. degree, acceleration as a full-time student to complete the required credits in coursework and two semesters of student teaching. Dual certifications require additional credits and will take longer to complete. After completion of all Graduate School of Education (GSE) program requirements in good standing, students obtain an M.S.T. degree and are eligible for GSE endorsement for New York State Initial Teacher Certification. Students who successfully complete all master's degree requirements will be endorsed for New York State Initial Teacher Certification. New York State Certification is reciprocal with many states.

Early advisement/seminar, fieldwork exploration and coordination between undergraduate and graduate programs are important features and benefits of this program, as well as the opportunity to save time and money.

Graduate School of Education graduates are highly qualified teachers who respect individuals in a multicultural society, excel in academic disciplines, acquire a broad knowledge base, learn in meaningful contexts, become reflective practitioners, and engage in life-long learning. Fordham is accredited by the National Council for Accreditation of Teacher Education (NCATE).

To find out more about the accelerated master's degree in teaching, complete the declaration of interest form.

For further information about all of our Graduate School of Education academic programs, please visit the Graduate School of Education Bulletin (p. 708).

Accelerated Master's Degree Program Activities & Responsibilities

Once the declaration of interest form is submitted, undergraduates can enroll in the program and register for the 1 credit Field Experience Seminar (CTGE 4200). Participants in this program will meet 5 times a semester for seminar and complete 60 hours minimum of a field experience during sophomore, junior and senior years. Seniors will register for two, three credit graduate level courses each semester (12 credits total) which are paid for by undergraduate tuition.

Field experience requires 30 hours per semester through senior year. The field hours are arranged according to the student's schedule, and helps students examine and explore their interest in the teaching profession, gain experience working with children on different grade levels, allows education faculty to learn about student's suitability for teaching, and prepare the student for a formal student teaching requirement while enrolled in the Graduate School of Education.

In junior year, students complete an early admissions application to GSE. Completion of an undergraduate degree with a GPA of 3.0 or higher and acceptance into GSE marks a student's transition into a master's degree program at Fordham University.

Transition to the Graduate School of Education

In preparation for enrollment into graduate school, undergraduate seniors will be introduced to their program specific GSE academic advisor for an overview of the requirements specific to the teacher education program chosen. In GSE, academic advisors are the point person pertaining to all aspects of their program requirements, registration, student teaching and administrative issues. Students can plan to begin graduate school in the summer following their graduation from an undergraduate program (adolescence programs begin in the fall of that same year).

Student Teaching

In addition to completion of coursework and workshop requirements, students are required to complete a full-time student teaching placement at two different schools in the grade levels of the certification age range. GSE students are placed in schools that have partnered with the GSE and with cooperating teachers that have more than three years of experience teaching. Observation of student's experience is required by NYS, which is completed by a Fordham University field specialist who serves as a mentor and coach and evaluates the student in each of their student teaching placements. Student teaching placements provide more than 600 hours of comprehensive experience in public schools for preparation to become certified and hired as a lead teacher.

Prior to beginning fall student teaching, an orientation is held for students in all programs who are beginning this experience. Students are provided with extensive information and requirements and meet with their field specialists.

New York State Teacher Certification Exams and Workshops

Students are notified and advised about New York State teaching certification requirements: certification exams, specialized workshops, fingerprinting, and application process. Support is provided to students throughout this process. NYS workshop required for certification are offered within GSE. Students are required to establish a NYSED TEACH account. Information on certification exam requirements can be found on the New York State Teacher Certification Examinations (NYSTCE) website.

Final Portfolio Project

A final cumulative portfolio project is required as part of GSE program completion. Students prepare a capstone project that includes a theoretical and reflective essay highlighting teaching practice and knowledge gained from coursework and student teaching. Adolescence education programs require the completion of a student work sample.

Admissions

There are two application stages to the Accelerated Master's in Teaching Program.

First Stage

- Complete a declaration of interest form.
- Plan to seek undergraduate program advisement about core courses to complete the B.A./B.S. Students should plan to be able to integrate 12 GSE credits in senior year schedule. Fordham undergraduate core courses must include content required by NYSED for teacher candidates; some core courses may fulfill more than one NYSED requirement.
- Inform undergraduate major advisor of decision to enroll in the accelerated master's in teaching program. Advisor will give permission to register for the one-credit Field Experience Seminar (CTGE 4200).

- Each semester of sophomore, junior, and senior years, enroll in the Seminar, and meet with GSE Five-Year Teacher Education Track coordinator (5yeartrack@fordham.edu).

Second Stage

- Complete a GSE admissions application and submit all required supplemental information in the spring of the junior year for early admission. The application includes a written personal statement, two letters of reference, a resume, and a copy of all transcripts.
- Provide a letter from the undergraduate advisor indicating that 12 GSE credits will be completed during senior year, including field experience and reflective seminar.
- Maintain a minimum grade point average of 3.0 (B or better).
- Meet the general admissions requirements to the Graduate School of Education and for the specific program to which the Fordham undergraduate student is applying. Specific admissions requirements are listed on each program's page in this Bulletin.

Note: GRE/MAT exam scores are not required, as of January 2022.

Requirements

New York State Certification Requirements

Students who meet all program requirements, complete the course of study, and meet established field experience competencies are eligible to receive Fordham University's endorsement for New York state initial certification in their program area, provided they also have:

- earned a passing score on the relevant New York state teacher examinations; and
- passed New York state mandated workshops: Dignity for All Students Act (DASA), Child Abuse Identification and Reporting (CAIR), and Schools Against Violence Education (SAVE), offered by our Hagin Center. These workshops are held twice each semester.
 - Drug and Alcohol Abuse, Autism and for childhood programs, health and physical education are offered in the GSE.

Undergraduate Core and Content Requirements

Teacher preparation for state certification includes requirements for general education and pedagogical core courses, as well as specific content courses related to the grade(s) and subjects the candidate will teach. The requirements differ across certification areas and are complex. They affect the choices that are made to meet the undergraduate core curriculum distribution, as well as selections and scheduling of courses within the major. For example, to meet state certification requirements in the general education core, teacher education candidates need the following liberal arts and science requirements: artistic expression, communication, or written analysis and expression; concepts in history and social sciences; a language other than English; scientific and mathematical processes; and literature. These core/content requirements do not replace Fordham's requirements.

Students must also meet the admissions prerequisites for their chosen master's program. For example, students pursuing adolescence education must have the required 30 credits in specific content areas. More information about the requirements for each certification and major can be obtained from Dr. Aida Nevárez-La Torre, Chair of Curriculum and

Teaching, at nevarezlator@fordham.edu. Information is also available on our admissions website. It is students' responsibility to meet with their undergraduate advisors and to ensure they are meeting Fordham undergraduate, GSE, and New York State admissions and completion requirements for their Graduate School of Education program of choice.

To meet all requirements for the baccalaureate degree and a master's degree, candidates work closely with their Fordham undergraduate advisors and the GSE accelerated master's in teaching program coordinator.

Accelerated M.S. in Real Estate Program Overview

The accelerated B.A./B.S.-M.S.R.E. program is available to juniors and seniors in Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC) and the School of Professional and Continuing Studies (PCS) who have a specific interest in a real estate career or who have a desire to explore a nontraditional academic area to enhance their undergraduate experience, with a goal of earning a master's degree in real estate.

To be eligible to enroll in the accelerated program, FCRH/FCLC/PCS students should have a cumulative 3.0 grade point average. Students with a lower GPA may request special consideration from their advisor and the director of the Real Estate Institute.

Students should plan to formally express their intent to pursue a master's degree in real estate no later than the second semester of their sophomore year (for those who plan to begin the accelerated program as juniors) and no later than the first semester of junior year (for those who plan to begin graduate studies as seniors).

Interested students should contact their FCRH/FCLC/PCS academic advisor to express their intent and discuss their eligibility. Students will need the following:

- An intent form;
- A statement of consent/approval from their advisor; and
- An interview with the Director of the M.S.R.E. program.

Recommended Courses

The initial graduate courses are those that will introduce students to real estate and expose them to industry practices, while helping them complete the requirements of their undergraduate studies. Eligible FCRH/FCLC students will be permitted to take the following courses, completing up to 6 graduate credits in their junior or senior year.

First Semester

- REAL 5006 Real Estate Legal Concepts and Contracts (3 credits)

Second Semester

- REAL 5014 Negotiation (1.5 credits)
- REAL 5016 Ethical Issues in Real Estate (1.5 credits)

Admissions

Students who successfully complete the stipulated 6 graduate credits will be supported in submitting their applications to the M.S.R.E. program. Students will need to submit the standard application for the

M.S.R.E. program, but the GMAT/GRE requirement and the application fee will be waived for FCRH/FCLC students in the accelerated program.

Community Engaged Learning

We learn by doing, and we grow as scholars and as citizens when we pursue curious and compassionate engagement with the world around us. Fordham's two campuses are not set apart from the city in which we reside and the neighborhoods we call home, but rather are integral parts of that city and those communities. Community engaged learning courses give students and faculty the opportunity to deploy the concepts and content introduced in the classroom in the complex and dynamic places and spaces we share.

Fordham's Center for Community Engaged Learning sponsors courses according to an asset-based approach to engagement. We bring the institutional and academic resources of the University together with the leadership, experience, and richness of our communities to enhance student learning, support faculty research, and build on community strengths. Students mobilize abstract concepts they learn in the classroom by engaging in real-world challenges. They enhance memory and retention by teaching new ideas to young people in local schools and centering in reflective practices together with their classes. They immerse themselves in the various cultures of New York's vibrant neighborhoods, and speak the myriad languages native to our city. And, they hone civic leadership and take on pressing matters of policy and equity by partnering with elected officials, community boards, activists, and organizations to work for change.

For more information, and for faculty, student, and community resources, please visit Fordham's Center for Community Engaged Learning.

Community Engaged Learning Courses

In community engaged learning courses, experiences are employed as a learning resource alongside readings, lectures, discussion, or labs. Community engagement is integrated into the syllabus and classroom approach, and is therefore required of all students enrolled in the course. These courses require up to 20 hours of engagement (the instructor may offer more), robust written assignments, and a reflective classroom activity.

Sections of courses that integrate service as a learning resource will be listed in Banner under the attribute code SL, "Community-Engaged Learning." Through this notation, students can identify prior to registration those classes in which engagement hours in the community are required.

Community engaged learning courses include the following:

Course	Title	Credits
AMCS 4990	El Salvador: Revolutionary Faith	4
ANTH 2800	The Anthropology of Food: Community Engaged Learning	4
ANTH 3006	Arab-Americans and the Diasporic Experience	4
BISC 3466	Urban Ecology & Evolution	3
BISC 4035	Ecology and Economics of Food Systems	4
ENGL 3610	Abolition	4
ENGL 3964	Homelessness	4
HIST 3824	U.S. Social Movements Since 1900: Struggles for Social Justice	4

HIST 4312	Antisemitism and Racism	4
JWST 4800	Internship in Jewish Studies	1-3
MLAL 1010	Spanish Colonialism Through Film	3
MLAL 3033	Prison Literature from Martin Luther to Martin Luther King	4
MLAL 3055	Critical Communities: Marx, Nietzsche, Freud	4
MLAL 3515	Food for Thought	4
NMDD 3880	Designing Smart Cities for Social Justice	4
PHIL 1003	Lost Interlocutor: Philosophy of Human Nature	3
PSYC 1004	The Mind-Body Connection: Introduction to Behavioral Health	3
PSYC 4820	Community Psychology	5
PSYC 4850	Community Mental Health	4
PSYC 4855	Participatory Action Research	4
SERV 0099	Community-Engaged Learning	1
SOCI 4970	Community Service/Social Action	4
SPAN 2201	Spanish Community Engaged Learning	3
THEA 3520	Producing through a Social Justice Lens	4
THEO 1008	Mystics Monks and Mindfulness: Contemplation-In-Action Today	3
THEO 4500	Religion in NYC: Theory & Practice	4
VART 1111	Intro to Art & Engagement: Protest, Participation, the Public and other Performance Practices	4
VART 2222	Art of the Interview	4
VART 2424	Art and Action on the Bronx River	4
VART 3333	Art Making in Hell's Kitchen	4

Cooperative Program in Engineering (3-2 Engineering)

Fordham College at Rose Hill and Fordham College at Lincoln Center offer a five-year program that combines a broad liberal arts education with professional training in engineering. The cooperative program in engineering is an educational affiliation between Fordham University and the School of Engineering and Applied Science of Columbia University, which enables students to prepare for careers in applied science or engineering. This plan leads to a B.A. or B.S. degree from Fordham as well as a B.S. degree from Columbia University. Fordham University also has an affiliation with Case Western Reserve University in Cleveland, Ohio.

Rose Hill students who enter this program may choose to major in chemistry, computer and information sciences, engineering physics, physics, mathematics, or the joint major in mathematics and computer and information sciences. Students at Lincoln Center typically major in either mathematics or the joint major in mathematics and computer and information sciences. The B.S. degree from Columbia University or Case Western Reserve is in one of the following fields: applied mathematics, applied physics, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, earth and environmental engineering, electrical engineering, engineering and management systems, engineering mechanics, industrial engineering, materials science, mechanical engineering, and operations research.

The program consists of three years at Fordham and two years at the engineering school. Students who wish to enter the program should have completed a minimum mathematics level of pre-calculus before entering Fordham, since Calculus I (MATH 1206) and Calculus II (MATH 1207) must be taken in the first year. By the end of the junior year at Fordham, the student must have completed all of the major requirements. The cooperative program is very intensive, and it may be necessary for the student to take certain core curriculum courses during the summer at additional expense. Some courses taken at the engineering school fulfill some of Fordham's degree requirements. At Rose Hill and at Lincoln Center, both the Fordham and Columbia degrees are awarded at the end of the fifth year.

To retain membership in the cooperative engineering program at Fordham and to permit admission to the engineering college, the student must maintain a 3.0 cumulative grade point average and a 3.0 grade point average in mathematics and science courses. Admission to either Columbia or Case Western is not guaranteed. Columbia has the additional requirements that the student must maintain a 3.3 cumulative grade point average and it is recommended to receive a minimum grade of B in each pre-engineering requirement.

At the beginning of the spring semester of the junior year, the student must submit an online application for admission to the engineering college. If the student has maintained the required GPA and successfully completed the required academic program, then the program coordinator will send a recommendation for admission. Official transcripts must also be forwarded at this time. While attending classes at the engineering college, the student must maintain matriculation at Fordham. Students who choose to exit the program may remain at Fordham in their chosen majors.

Occasionally, a student wishes to apply for admission to the engineering school after graduation from Fordham. Such students will be treated as graduate students and will most likely be excluded from any financial aid considerations at the engineering school.

During the FCRH and FCLC New Student Orientations, a special session is held regarding the 3-2 cooperative program in engineering. All students interested in the program are expected to attend the session at their college.

Fordham is committed to supporting all students who are interested in pursuing the 3-2 cooperative program in engineering. Given the high standards required by Columbia and Case Western Reserve, it is important that students make adequate progress toward the requirements to be able to transfer at the end of their junior year at Fordham. In order to ensure academic success, a student may be removed from the 3-2 program by the director in the following instances:

1. If the student is not making sufficiently adequate progress toward a transfer to Columbia or Case Western Reserve, for example: their cumulative GPA is below a 3.0, grades in more than four pre-engineering required classes are below a B-, or they have not taken enough pre-engineering requirements by the end of each academic year.
2. If the student has not declared one of the required majors before the end of their first year (physics, engineering physics, chemistry, mathematics, computer science, or the joint math-computer and information science major).
3. If the student does not apply for transfer by the deadline during their junior year.

Removal from the program merely means the student will be expected to finish their four years at Fordham, and then with the help of the director, find alternative paths to a career in engineering.

For more information

Visit the Cooperative Program in Engineering webpage.

The Columbia University website for this program is: www.seas.columbia.edu.

The Case Western Reserve website for this program is: engineering.case.edu/desp/dualdegree.

Requirements

1. At least 27 credits in the humanities (fulfilled by the Fordham Core Curriculum).
2. A completed major in chemistry (Rose Hill), engineering physics (Rose Hill), physics (Rose Hill), mathematics (Rose Hill or Lincoln Center), computer and information sciences (Rose Hill or Lincoln Center), or in the joint major in mathematics and computer & information sciences (Rose Hill or Lincoln Center).
3. The following pre-engineering requirements for all intended engineering degrees;
 - Two years of calculus (MATH 1206 Calculus I, MATH 1207 Calculus II, MATH 2004 Multivariable Calculus I, and MATH 2005 Multivariable Calculus II)—can place out of some of these with AP credit or a placement exam.
 - One year of calculus-based physics with lab, choosing one of the following sequences:
 - PHYS 1601 Introduction to Physics I & PHYS 1602 Introduction to Physics II + lab: PHYS 1511 Physics I Lab & PHYS 1512 Physics II Lab
 - PHYS 1701 Physics I & PHYS 1702 Physics II + lab: PHYS 1511 Physics I Lab & PHYS 1512 Physics II Lab
 - NSCI 1701 Physics I & NSCI 1702 Physics II + lab: NSCI 1511 General Physics Lab I & NSCI 1512 General Physics Lab II
 - One semester of chemistry with lab (CHEM 1321 General Chemistry I & CHEM 1331 General Chemistry Lab I or NSCI 1321 General Chemistry Lecture I & NSCI 1331 General Chemistry Lab I)
 - One class in computer science in C++ (CISC 1600 Computer Science I & CISC 1610 Computer Science I Lab)
 - One class in economics (ECON 1100 Principles of Macroeconomics or ECON 1200 Principles of Microeconomics, which satisfy the Fordham Core Curriculum)
 - One class in English composition (ENGL 1102 Composition II)
4. Additional courses are required for the intended field of engineering at either Columbia or Case Western Reserve, please see the 3-2 Program website for more information.

Graduate Study

Fordham College at Rose Hill and Fordham College at Lincoln Center make an effort to acquaint students with opportunities for study beyond the baccalaureate level. Students who show special promise in scholarship are encouraged to give serious consideration to graduate study after completion of their college program. At the beginning of junior year, qualified students should consult the appropriate adviser in their major department.

Most Arts and Sciences departments with a master's degree program offer accelerated master's programs, whereby accepted undergraduate students can begin taking graduate courses in their senior year. These graduate courses apply to both the bachelor's and master's degrees.

In addition, Fordham College seniors are allowed to register for courses in Fordham's Graduate School of Arts and Sciences. Seniors with an index of at least 3.000 may register for courses offered by their major department. Students wishing to take graduate courses must get permission from the department and the dean of the Graduate School of Arts and Sciences, then contact their class dean to be registered.

In order to make the 3-credit graduate course count as 4 credits toward the total credits for graduation as well as in the GPA, undergraduate students enrolled in a graduate course will be enrolled in a companion 1-credit administrative course that receives the same grade as the actual course.

GSAS Accelerated Master's Programs

Qualified Fordham juniors may apply for the accelerated master's in select GSAS programs. The accelerated master's program allows exceptional students to follow a plan to complete both their bachelor's and master's in a total of five years (4+1). Fordham undergraduate students apply during their junior (or equivalent) year, and if admitted to the accelerated program, they are eligible to take up to three GSAS graduate-level courses in their senior year which will count toward both the bachelor's and the master's degree. **No more than three (3) GSAS graduate courses, in total, may be taken during senior year.** Upon graduation with their bachelor's degree, students can then complete the M.A. or M.S. degree in one year.

Programs that offer the accelerated master's are listed on the accelerated master's programs web page. Please refer to this page or to a specific program for eligibility requirements (such as minimum GPA) and program participation.

Higher Education Opportunity Program

HEOP, funded by New York State, provides financial aid, counseling, and tutorial and other services to carefully selected economically and academically disadvantaged students. Applicants must be residents of New York State, possess a high school diploma or an equivalent, and show potential for success in college. All students accepted by HEOP are required to attend a special summer program prior to the beginning of their first year. For further information, contact the HEOP Rose Hill office at Freeman Hall, Room 102, 718-817-4205. HEOP Rose Hill can also be contacted at HEOPRH1@fordham.edu. HEOP Lincoln Center can be reached at Lowenstein 803, 212-636-6235.

Institute of American Language and Culture

Institute Overview

The Institute of American Language and Culture (IALC) offers English as a Second Language (ESL) courses to non-native English speakers in all skill areas: writing, grammar, reading, speaking, listening, and vocabulary. Content-based courses, seminars, and intercultural skills are offered to students at advanced levels of proficiency.

The Community ESL program provides free adult literacy classes to residents of New York. The Community ESL program does not meet the requirements for student visas.

The full-time ESL program fulfills the United States Immigration and Naturalization Service (INS) requirements for student visas. Acceptance to the Institute does not imply admission to any Fordham degree program.

The Via Fordham Program provides promising international students a different path into an undergraduate college at Fordham University. Admission to Via Fordham is selective. Students interested in Via Fordham must apply for undergraduate admission using the Common Application.

If an international student cannot supply a TOEFL or IELTS score at the time of application to a Fordham undergraduate program, he or she may take the Fordham English Language Test (FELT). Students who spend at least two semesters taking courses at the IALC and reach the highest level of proficiency may not be required to take the TOEFL or IELTS test, but if they are admitted to the University, they must take IALC writing courses until determined to be no longer necessary.

For more information

Visit the Institute of American Language and Culture's web page.

Institute of American Language and Culture
45 Columbus Ave, 3rd Floor
New York, New York 10023
Telephone: 212-636-6353
Fax: 212-636-7045

Internships

The professional achievements of Fordham graduates arise, in part, from the University's extensive internship program. This highly successful program offers students the opportunity to intern with one of more than 3,500 organizations in New York City and beyond. More than 600 students participate in internships each year. Popular internship sites have included ABC News, the American Museum of Natural History, Apple, Barclays, BBC Worldwide Americas, Comedy Central, Deloitte, ESPN, EY, Goldman Sachs, JPMorgan Chase, KPMG, Legal Aid Society, Madison Square Garden, the Manhattan District Attorney's Office, Memorial Sloan Kettering Cancer Center, Merrill Lynch, *Saturday Night Live*, the United Nations, and many more.

The internship program exemplifies Fordham's dedication and commitment to the education of the whole person. By participating in an internship, students have the opportunity to apply theories learned in class to the realities of a professional situation and explore connections between their major and their career goals.

An internship is a meaningful, well-supervised experiential education experience that benefits both students and organizations. An internship is an excellent way for students to explore career possibilities, gain solid professional experience in their chosen field of interest, and obtain valuable networking contacts. Since full-time employment offers are frequently a direct result of internships, students are strongly encouraged to complete an internship before they graduate.

Fieldwork experience is arranged where students can obtain academic credit and may also include a stipend from the sponsoring organization. Opportunities are available in the fall, spring, and summer semesters in all career fields/industries. Placements can be coordinated on a regional

and national basis over the summer. Juniors and seniors generally participate in an internship on a part-time basis while maintaining a full course-load during the fall and spring semesters and generally participate on a full-time basis during the summer. Corporations and not-for-profit organizations participating in the program represent a wide geographic location: metropolitan New York, the tri-state area, and national as well as international locations.

FCRH, FCLC, PCS College Policy

Each college offers juniors and seniors with a minimum grade point average of 3.00 the opportunity to engage in internships that relate to the student's major field of study or another field of interest. Students may register for a paid or unpaid internships in one of the following methods:

- Enroll in an internship tutorial and meet with the instructor on a regular basis
- Enroll in an internship seminar within a discipline, if one is available
- Enroll in a general internship seminar, e.g., SOCI 4900 Internship Seminar.

Internships are normally taken for between four and eight credits, with tutorial experiences receiving one to two credits. Normally, students may not repeat internships. Internships are graded on a pass/fail basis. Most internship credits applied toward the major will be in addition to the minimum credit requirement in the major. All internships must be approved by the student's major adviser prior to the placement of students. Students interested in the internship program should consult with their faculty adviser, the department in their field of interest, and the Office of Career Services, Experiential Education Program.

Gabelli Policy

On average, 91 percent of Gabelli students hold at least one internship during their college careers. An internship is a short-term, pre-professional work experience that provides hands-on practice and skill development in a professional environment that complements and advances the Gabelli education. Students at Gabelli who are interested in pursuing an internship should review Gabelli's internship policies (p. 93).

For more information

Visit the Career Services web page.

Pre-Law

American law schools look favorably on applicants who possess a strong liberal arts education, but they do not prescribe a specific, pre-law curriculum. Students can choose the major that interests them most, as law schools do not require any particular major as a prerequisite for admission. Students who are interested in pursuing a legal career, however, are advised to take courses that develop analytical skills and reading and writing abilities.

Most law schools employ three basic academic criteria in selecting applicants: the Law School Admission Test (LSAT) score, the cumulative grade point average, and the undergraduate university attended. Law schools are also looking for well-rounded students who are active and demonstrate leadership in their communities. To assure optimum performance on the LSAT, students should take the exam at a time that affords the best opportunity for preparation, usually in the spring or summer of junior year or in the early fall of senior year. To assure optimum performance in the classroom, students should choose courses

that stimulate their interest and encourage them to excel. In addition, the prudent applicant will consult with the pre-law adviser by the beginning of their junior year, or earlier, in order to maximize chances for success in the highly competitive law school admission process.

For detailed information on advising and programming, students are encouraged to contact their college's pre-law adviser. Additionally, students may wish to join their school's student-run Pre-Law Society, which sponsors lectures on admission to law school, the law school experience, and careers in the law.

3-3 Program

The 3-3 Program enables students to complete their bachelor's and law degrees in six years. Outstanding Fordham undergraduates may be admitted to and matriculate in Fordham Law School after three years of study at Fordham College at Rose Hill, Fordham College at Lincoln Center, Gabelli School of Business, or Fordham School of Professional and Continuing Studies. The B.A./B.S. degree is awarded following completion of the first year of law school. Eligibility requires that a student:

- Complete all core and major requirements and at least 92 credits (transfer students must have completed at least 47 credits at Fordham) before beginning law school.
- Maintain a recommended grade point average of at least A- (3.670) in all undergraduate courses including transferred credits.
- Have a very strong LSAT score, scoring at the 93 percentile or higher is recommended. It is recommended that the LSAT scores be available by December of the academic year in which the application is being made.

Students who meet these criteria become eligible during the fall of their junior year to apply to the School of Law of Fordham University. Before they apply, however, they must receive a favorable recommendation from their pre-law adviser. After receiving such clearance, the director of admissions of the School of Law will invite them for an interview. Students recommended for application are not guaranteed admittance to the law school. Final admission decisions rest with the School of Law. Study abroad is discouraged for 3-3 program applicants, due to the condensed nature of the undergraduate program.

For more information

Visit the Pre-Law program webpage.

Pre-Medical and Pre-Health Overview

Fordham has a long history of successfully preparing students for medical, dental, veterinary, and other allied health careers. Fordham graduates are regularly accepted to top-ranked medical schools such as Harvard, Yale, Cornell, Columbia, New York University, Albert Einstein, Mount Sinai, New York Medical College, Tufts, Creighton, Johns Hopkins, Georgetown, Tulane, Loyola University of Chicago, all of the SUNY medical schools, as well as many osteopathic schools of medicine. Students have also gained admission to many top-tier schools of dentistry, optometry, podiatry, and veterinary medicine.

Students in Fordham's pre-health professions programs, available at both the Lincoln Center and Rose Hill campuses, participate in individual and group meetings with pre-health program staff throughout their undergraduate years and as alumni. Group sessions tailored to each

stage of the program help students plan for significant upcoming events, such as taking the MCAT, applying for admission, etc. Students are also encouraged to meet individually with pre-health program staff to discuss their progress in attaining acceptance into a health professions program.

Health professions programs do not require a specific major, but instead value a breadth of education along with the completion of specific coursework. Students preparing for advanced health professions careers may, therefore, pursue majors in the natural and applied sciences, social sciences, humanities, or the arts.

Health Professions Resources

Health care professionals have a wide range of degree options and occupations. The health professions include the areas of medicine, physician assistant, nursing, dentistry, veterinary, physical therapy, occupational therapy, and other advanced degrees in science and public health.

Students are encouraged to research their desired profession on the websites listed below. Each site contains valuable information about preparation, academic requirements, and the requirements for the profession.

Medical Schools

Allopathic Medicine: American Association of Medical Colleges

Osteopathic Medicine: American Association of Colleges of Osteopathic Medicine

Dental Schools

American Dental Education Association

Veterinary Medical Schools

Association of American Veterinary Medical Colleges

Nursing Programs

Centralized Application Service for Nursing Programs

Physical Therapy Programs

Physical Therapy Centralized Application Service

Physician Assistant Programs

Central Application Service for Physician Assistants

Public Health Programs

Association of Schools of Public Health

Optometry

The Optometry Centralized Application Service

For more information, visit the following Fordham pre-health program web pages:

Fordham College at Lincoln Center

Fordham College at Rose Hill

School of Professional and Continuing Studies

Requirements

Program Requirements across the University

Students focused on entering a health profession program such as medicine, dentistry, veterinary medicine, nursing, or other health professional schools will need to complete majors-level science coursework and labs. The courses listed below constitute the minimum requirements for an application to most health profession programs, regardless of major:

- One year of general biology with lab (at LC: NSCI 1403 and NSCI 1404, and NSCI 1413 and NSCI 1414; at RH: BISC 1403 and BISC 1404, and BISC 1413 and BISC 1414)
- One year of general chemistry with lab (at LC: NSCI 1321 and NSCI 1322, and NSCI 1331 and NSCI 1332; at RH: CHEM 1311, CHEM 1321 and CHEM 1312, CHEM 1322, and CHEM 1331 and CHEM 1332)
- One year of organic chemistry with lab (at LC: NSCI 3121 and NSCI 3122, and NSCI 3821 and NSCI 3822; at RH: CHEM 2511, CHEM 2521 and CHEM 2512, CHEM 2522, and CHEM 2541 and CHEM 2542)
- One year of physics with labs:
 - at LC: NSCI 1501 and NSCI 1502, and NSCI 1511 and NSCI 1512
 - at RH, students are required to take PHYS 1511 and PHYS 1512 with one of the following three options:
 - PHYS 1501 and PHYS 1503, and PHYS 1502 and PHYS 1504
 - PHYS 1601 and PHYS 1603, and PHYS 1602 and PHYS 1604
 - PHYS 1701 and PHYS 1703, and PHYS 1702 and PHYS 1704
- One year of English (satisfied by core requirements)
- One course in mathematics (MATH 1203 or MATH 1206)

Students planning on completing additional coursework in the sciences should note that the biology and general chemistry foundation courses, plus all applicable labs (all listed above), must be successfully completed prior to enrollment in all upper-division biology courses.

In addition, students applying to medical school are required to take the following coursework to meet the required competencies:

- One semester of biochemistry (BISC 3521 or NSCI 4153)
- One semester of psychology (PSYC 1200)
- One semester of sociology (SOCI 1100)
- One semester of statistics (MATH 1205 or SOCI 2606 or ECON 2140 or PSYC 2000)

All pre-health students, no matter what their primary fields of study, should master the major concepts and skills of science and mathematics, and are generally advised to take additional upper-level science coursework to help prepare for standardized entrance exams. Subtle variations in this coursework may be necessary for application to programs specific to each discipline.

Students planning to apply to a health professional school are advised to take the appropriate standardized admissions test—MCAT, DAT, OAT, or GRE—in the spring or early summer of the application year at the latest.

 Professional and Continuing Studies

Pre-Health at Fordham College at Lincoln Center

Pre-Health Program for FCLC Students

With the assistance of the natural sciences faculty and the Pre-Health Professional Program, Fordham College at Lincoln Center students have an excellent record of gaining admission to medical and other health professional schools. The pre-health professions advisor oversees the development of each student and helps them prepare their applications. Additionally, the Pre-Health Program invites medical professionals, including Fordham alumni, to speak with students about their experiences and build connections in various careers in the health field. Pre-health students at FCLC have opportunities to participate in many undergraduate research studies throughout their academic journey.

The Natural Sciences Major (NSCI)

The natural sciences major at Fordham College at Lincoln Center (FCLC) offers a comprehensive and interdisciplinary education, emphasizing undergraduate training through rigorous coursework, lab experiences, and independent research. The department includes faculty members with expertise in chemistry, physics, data science, and biology, who teach courses supporting a variety of majors and programs. Students can choose concentrations in chemical sciences, organismal biology, and cell and molecular biology within the natural sciences major. The department's courses also fulfill requirements for integrative neuroscience, environmental science, pre-health, the FCLC Honors program, and the Core Curriculum. With small class sizes and hands-on lab work, students benefit from personalized attention and mentorship, preparing them for successful careers in fields such as medicine, academia, and education.

The natural sciences department (NSCI) plays a crucial role in the pre-health program at FCLC, offering required courses for students aspiring to enter health professions. Although students can major in any field, they can complete their Pre-Health requirements through NSCI (except for Calculus or Applied Calculus, which are provided by the mathematics department). The department's interdisciplinary approach and rigorous training ensure that pre-health students receive a solid foundation in the sciences. By following the recommended curriculum guidelines and engaging in independent research, students are well-prepared for medical school and other health-related graduate programs.

Pre-Health Advising

In addition to regular meetings with their primary advisors, students are encouraged to meet with the pre-health advisor at least once a year

Updated: 09-06-2024

to check in on their pre-health academic progress and planning. The pre-health advisor is able to provide advice on clinical and volunteer activities in preparation for aspirant health programs. Early preparation is extremely beneficial to a successful and robust application to health professional programs.

The Fordham College Lincoln Center Committee on Health Professions Process (CHP)

The FCLC Committee on Health Professions (CHP) provides students with comprehensive support as they prepare for the medical school application process. Students who need a committee letter for programs in related fields may also participate in the CHP process. The CHP process includes a committee interview and a committee letter.

Students can participate in CHP in their junior or senior year. It is recommended that students have completed clinical and health-related work or volunteer experiences prior to CHP.

Students must submit a statement of their intent to participate in a spring application cycle in September (the fall semester prior to the spring application cycle) to Ms. Eliane Victoria at fclcprehealth@fordham.edu. The pre-health advisor holds a CHP information session in the fall semester to review the process and deadlines.

The Committee letter is based on a student's portfolio, which includes the following: coursework, transcripts, personal statement, self-assessment, volunteer and/or internship experience and research experience, faculty recommendations, and a personal interview with members of the Committee.

NOTE: Candidates who submit their statement of intent after the September CHP application deadline will not be able to participate in the spring CHP process. (Students may still apply to medical school, but will not be able to get a committee letter from Fordham.)

Students may apply for the CHP process up to two application cycles after graduating from Fordham College Lincoln Center. Students are not eligible for CHP after this due to the timeliness of recommendation letters and courses.

For more information, visit the Pre-Health Program page for FCLC students and the natural sciences department or write to fclcprehealth@fordham.edu. (fclcprehealth@fordham.edu)

Pre-Health at Fordham College at Rose Hill

The Fordham College at Rose Hill (FCRH) pre-health program provides support for students and alumni applying to health programs. Students

can declare an interest in participating in the FCRH pre-health program upon accepting admission to FCRH or at any other time during their attendance or as alumni.

Course of Study and Curriculum

Pre-health students may choose to pursue a major in or outside of the sciences. There are several different academic curricular paths that students can take to completing pre-health requirements. All pre-health students, no matter what their primary fields of study, should learn the major concepts and skills of science and mathematics, and would be well served by taking additional upper-level science coursework to help prepare for standardized entrance exams. In addition, schools may require calculus as a prerequisite. Variations in this coursework may be necessary for application to programs specific to each discipline and from school to school. Each applicant, working with the pre-health program staff, should become informed what the specific requirements are for admission to M.D., D.O., D.D.S./D.M.D., PA, PT, and other programs in order to best prepare for them.

Preparing Students to Become Healthcare Professionals

The pre-health program helps prospective applicants gain formative experiences by creating healthcare-related programming; this includes a first-year pre-health symposium, workshops, guest healthcare professional seminars, and co-sponsored career fairs, MCAT preparation and other experiential opportunities such as hospital volunteer and shadowing positions with the campus career center. The program also provides opportunities for students to meet other health care professionals and pre-health students through a peer and alumni network, and encourages participation in the multiple health-care-related FCRH student groups and organizations that host activities and events. Students planning on pursuing an application to a health professional program should be in regular contact with their academic advisor and the pre-health professions staff for guidance on key factors that lead to successful admission to a health professional program: course selection, extracurricular activities, and clinical and research experiences.

Helping Students Apply to Health Professional Schools

The FCRH Committee on Health Professions (CHP) is composed of faculty and staff that manage and support students in a comprehensive yearlong process that leads to application to health professional schools. Students should elect to join the CHP the year before they intend to apply for a health professional school, typically in their junior or senior year. A mandatory information meeting is held in the fall term to explain the process and to gauge a student's interest in starting the application process. If a student expresses an intent to apply that year and be part of the CHP process, they submit a self-assessment and, if needed, attend a meeting with the CHP committee members to assess readiness for applying. In the spring term, students submit a portfolio that includes coursework, transcripts, a personal statement, volunteer and/or internship experiences, research experience, faculty recommendations, and other documents in advance of a committee interview. It is recommended that students complete substantive clinical and health-related work or volunteer experiences before the CHP interviews.

The CHP provides students with a committee letter of support that may be required by health professional schools, namely M.D., D.O., and dental schools. The committee letter is based on the interview and all

of the student's documentation. Students not requiring a committee letter for health-related programs may also participate in the CHP process. Students may participate in the CHP process for several years or application cycles after graduating, but after a period of time, the CHP may no longer recommend an FCRH Committee letter due to the lack of timeliness of recommendation letters and coursework.

For more information, visit the Pre-Health Program at Fordham College at Rose Hill web page.

Contact Information

FCRH Office of the Dean
Office Location: Keating Hall 201
Phone: 718-817-4700
Email: prehealthfcrh@fordham.edu

Pre-Health at the School of Professional and Continuing Studies

The Fordham Post-Baccalaureate Pre-Med/Pre-Health Program (PBPH) is for college graduates interested in a career in the health professions and who need prerequisite science courses. The program offers the pre-health curriculum in the evening during the academic year and summer sessions to prepare students for application to medical, dental, physician assistant, veterinary, nursing, physical therapy, occupational therapy, accelerated nursing, or anesthesiology assistant programs.

This program is flexible and intended to meet the demands of adult students and career changers. Entry terms are fall, spring, and summer. The minimum GPA requirement is a 3.0 from undergraduate programs.

Unique Features

- Flexibility: students are able to start in any semester and take the program at their own pace.
- Evening program: we target career changers and working professionals. Courses are offered in the evening and on weekends.
- Financial Aid: Fordham is one of the few programs that provides eligibility for subsidized or unsubsidized Stafford loans of up to \$12,500 for one year for post-baccalaureate students (subject to individual student approval).
- Personal advising: one-on-one advising is a key part of the program. We work with you on your program plan, academic progress, and the committee process if applicable.
- The Fordham brand and a rigorous curriculum.
- Small class sizes provide an opportunity to meet fellow students and get to know your professors.
- Availability of required courses (no wait lists).
- The Fordham and post-bac student community: you are a member of the Fordham University and post-bac student communities. You have access to all resources at Fordham. The post-bac community is supportive and progressive.

Post-Bac Committee on Health Professions (CHP)

The Fordham Post-Baccalaureate Program Committee on Health Professions (CHP) process is a comprehensive one which provides candidates with several workshops and support to prepare them for the medical school application process. The CHP process includes a committee interview and committee letter.

In order to apply for the CHP process, students must meet the following criteria:

- Minimum 3.2 GPA.
- Minimum 150 hours of health-related work and/or volunteer experience.
- Minimum 30 credits of coursework taken in the Fordham post-baccalaureate program or the PCS undergraduate program only. Additionally, students must have attended classes in the Fordham post-bac program for at least 2 semesters (not including summer sessions) prior to applying to the CHP process.
- Completion and submission of CHP process application.

Students may apply for the CHP process up to one application cycle after leaving the Fordham post-baccalaureate program.

Students completing or who have completed a Fordham College undergraduate degree or post-baccalaureate work at another program are not eligible for the Fordham post-bac CHP process.

All courses in the basic curriculum must be completed prior to, or concurrent with the professional school admissions test, and no later than the end of the first summer session of the application year in which the committee evaluation is sought. The committee evaluation letter is based on a student's academic portfolio which includes the following: coursework; transcripts; personal statement; self-assessment and biographical information on personal history, including volunteer and/or internship experience and research experience; faculty recommendations; and a personal interview with members of the committee.

ROTC: Reserve Officers' Training Corps

Army Reserve Officers' Training Corps (ROTC)

Fordham University hosts the Yankee Battalion of the Army's Reserve Officers' Training Corps (ROTC), which exists for:

- College and university students in New York City and the Hudson Valley, who
- Belong to a diverse service-oriented team, and who
- Grow as organizational leaders.

Fordham's military program began in the late 1840s, when New York State issued 12 muskets to students to defend the school against xenophobic nativist mobs. In 1885, Major General James R. O'Beirne, a Fordham graduate who led the capture of Abraham Lincoln's assassin, orchestrated a formal partnership between Fordham and the US Army. In 1926, this partnership expanded into today's ROTC unit, and by World War II, Fordham produced more officers for the Army than West Point.

After Vietnam and 9/11, Fordham and the Army expanded ROTC opportunities for schools across New York City and the Hudson Valley. Today, our distinguished military alumni include general officers like Jack Keane, who led the Army through 9/11, six Medal of Honor recipients from the Civil War to Vietnam, and tens of thousands who have served their country by leading Soldiers.

Fordham's Department of Military Science is an interdisciplinary academic department with oversight from the Fordham College at Rose Hill. We teach classes at several locations across New York City and the Hudson Valley, including students from 32 partnered universities and colleges.

Students learn through structured study in the field of military science, anchored by classroom instruction expanded through experiential learning and practical exercises, including physical fitness and outdoor adventure-type activities.

Students who successfully develop and demonstrate leadership talents can serve after graduation as leaders and officers in the active Army, Army Reserve, or Army National Guard.

Students enrolled in ROTC classes can compete for paid-contracts and scholarships, including generous institutional incentives. Military science course credit may fulfill specific college or elective requirements. Courses are taken by students at no cost.

To learn more about the Army ROTC program, including eligibility requirements and scholarship opportunities, please:

- Visit our website at <https://www.fordham.edu/rotc>,
- Visit our main office at Fordham University's Rose Hill campus, in Faculty Memorial Hall Room 130,
- Email our Recruiting Operations Officer at rotcroo@fordham.edu, or
- Call us at 718-817-4798.

For more Army ROTC information, please refer to the appropriate chapter of this bulletin. (p. 144)

Naval Science

Fordham University is linked by a formal written agreement with SUNY Maritime College and Maritime's NROTC unit. This permits Fordham students to enroll in the NROTC program at Maritime and be commissioned as officers in the Navy or Marine Corps on receiving their bachelors' degrees.

To receive a commission, a midshipman must complete all requirements for a bachelor's degree in accordance with Fordham University rules and regulations. He or she also must complete certain courses specified by the Navy. The Navy is interested in producing top-quality officers, so midshipmen are expected to maintain above-average grades. NROTC midshipmen lead basically the same campus life as other Fordham undergraduates.

Those interested in obtaining more information about the four-year and two-year Navy ROTC scholarship and college programs should visit the Navy ROTC website or write to:

Professor of Naval Science
NROTC Unit
SUNY Maritime College
Fort Schuyler
Bronx, NY 10465-4198

NROTC@sunymaritime.edu (nrotc@sunymaritime.edu)

For more Navy ROTC information, please refer to the appropriate chapter of this bulletin. (p. 145)

Aerospace Studies

Fordham University is linked by formal written agreement with Manhattan College's AFROTC unit. This permits Fordham students to enroll in the AFROTC program at Manhattan College and be commissioned as Second Lieutenants in the United States Air Force upon receiving their bachelor's degrees.

To receive a commission, a cadet must complete all requirements for a bachelor's degree in accordance with Fordham University rules and regulations. He or she must also complete certain courses specified by the Air Force. The Air Force is interested in producing top quality officers, so Cadets are expected to maintain above-average grades. Scholarship cadets must meet additional grade point requirements. Additionally, Cadets must earn at least a passing score on the Air Force Officer Qualifying Test; pass physical fitness tests each semester; pass a physical exam; and successfully compete for and complete field training.

Those interested in obtaining more information about the four-year and two-year Air Force ROTC Scholarship and College Programs should contact the Unit Admissions Officer. Please call 718-862-7201, visit the AFROTC detachment website, or write to

AFROTC Detachment 560
Manhattan College
Leo Engineering Building, Room 246
3825 Corlear Avenue
Riverdale, NY 10463

For more Air Force ROTC information, please refer to the appropriate chapter of this bulletin. (p. 143)

Air Force ROTC/Aerospace Science

Fordham University is linked by a formal written agreement with Manhattan College and its Air Force ROTC unit. This permits Fordham students to enroll in the Air Force ROTC program at Manhattan College and to be commissioned as second lieutenants in the U.S. Air Force upon meeting all program requirements and receiving their bachelor's degrees.

Fordham students may compete for scholarships as part of this program, covering as few as two years through as many as three and a half years.

Air Force ROTC cadets lead essentially the same campus life as other Fordham undergraduates. They make their own arrangements for college enrollment and room and board, pursue studies leading to the bachelor's degree, and may take part in any extracurricular activities that do not interfere with their Air Force ROTC requirements. Cadets must wear their uniforms one day per week during the academic year and during professional military training periods: academic classes, official summer programs, summer field training, and base visits. The government furnishes the uniforms. Cadets must conduct themselves professionally at all times when in uniform or when representing Air Force ROTC.

Air Force ROTC classes are held at Manhattan College in the Bronx. Cadets are responsible for arranging transportation.

Those interested in obtaining more information about the Air Force ROTC Program and scholarships should contact:

Unit Admissions Officer, AFROTC Detachment 560
Manhattan College
Leo Engineering Building, Room 246
3825 Corlear Avenue
Riverdale, NY 10463

Phone inquiries to 718-862-7201
E-mail inquiries to afrotc@manhattan.edu
Visit the AFROTC webpage at www.AFROTC.com.

Any student may take any academic courses without entering the AFROTC program. Leadership Laboratory is limited to cadets pursuing a commission in the U.S. Air Force. All courses are offered at Manhattan College.

Requirements can be found on the Fordham website.

Requirements

To receive a commission, a cadet must complete all requirements for a bachelor's degree in accordance with Fordham University rules and regulations. He or she must also complete certain courses specified by the Air Force. Scholarship cadets must meet additional grade-point requirements. Additionally, the cadet must earn a passing score on the Air Force Officer Qualifying Test; pass a physical-fitness test each semester and pass a medical exam; and successfully compete for and complete field training. Contact the detachment for full requirements.

The general academic requirements for a cadet include

- Major in any field of study leading to a bachelor's degree
- Complete the courses or the equivalent in the Aerospace curriculum.

Army ROTC/Military Science

Since 1848, Fordham's cadet program has prepared talented and diverse students in the New York metropolitan area to serve their country as leaders within the Armed Forces.

Today, Fordham hosts one of New York City's premier officer training programs, including crosstown enrollment of visiting students from more than 30 partner universities and colleges. The Yankee Battalion, formally known as Fordham University Army Reserve Officers' Training Corps (ROTC), exists for college and university students in New York City and the Hudson Valley who

- Belong to a diverse service-oriented team
- Grow as organizational leaders

Our program enhances a student's college education by integrating leadership and management theory with leadership practicum modules in the curriculum.

Through coursework and in-class practical experience, students develop decision-making, team-building, and time-management skills—leadership qualities essential to success in any field, including corporate and research careers.

Students completing the ROTC program may earn a commission as a second lieutenant in the U.S. Army, Army Reserve, or Army National Guard. Students may participate in the first two years of Army ROTC with no commitment to military service, unless they accept an ROTC contract or scholarship during that time.

We offer a four-year program composed of the Basic Course (typically during the first and sophomore years) and the Advanced Course (typically during the junior and senior years). Graduate students and upper-level students may enroll directly into the Advanced Course under certain conditions.

Four-Year Program

The four-year curriculum combines classroom and leadership laboratory work. Any student is eligible to participate in leadership development courses regardless of academic grade.

During the summer between junior and senior year, students participate in a four-week intensive leadership development exercise at Fort Knox, Kentucky (near Louisville). Upon graduation from college and successful completion of the Advanced Course, students receive commissions as officers in the U.S. Army, U.S. Army Reserve, or Army National Guard.

Two-Year Program

The two-year program is designed for students who did not complete the first two years of the Army ROTC program. If students have at least four semesters remaining in their academic program or are interested in pursuing a graduate degree, they may be eligible to participate in the Advanced Course. Students must validate Basic Course requirements through a variety of options, including attending a paid four-week summer course, taking additional coursework during their first year provided they meet eligibility requirements, demonstrating completion of any service's enlisted Basic Training Course, or graduating from a certified Junior Reserve Officers' Training Corps program.

Once students validate Basic Course requirements, they are eligible to receive the same benefits as members in the four-year program.

Scholarships

Army ROTC scholarships are available on a competitive basis to qualified applicants. Two-, three-, and four-year scholarships are available each year, and are awarded through a national selection board, or on-campus through the Professor of Military Science. High school seniors may apply for four-year scholarships through the national board. Scholarships pay full tuition and all mandatory fees, plus \$1,200 for books and supplies each year, and a tax-free stipend ranging from \$420 per month. The scholarship is flexible in that it can be used for either of the following: tuition and all mandatory fees, or room and board.

Non-Scholarship Contracts

Contracts are available to students who have not yet received a scholarship or who do not desire to apply for one. Some contracts provide students a tax-free stipend ranging from \$300 to \$500 per month, and others afford students the chance to simultaneously study in ROTC while belonging to an Army Reserve or National Guard unit. These simultaneous membership programs offer additional benefits and incentives.

Program of Instruction

The Army ROTC curriculum provides distinctive leadership and management training in conjunction with realistic experience. The program emphasizes leadership theory and practice, organizational management, public speaking, leadership techniques and tactics, professional military ethics, history, resiliency, and wellness.

In the first two years of the program, students attend class once per week. Students may also join weekly practical applications and group workouts three times a week. If students sign a contract or accept scholarships, these weekly practical applications and group workouts become mandatory. Collegiate athletes who meet Army fitness standards are excused from physical fitness training while their sport is in season.

In the program's final two years, all students attend a weekly class and practical exercise, plus three group workouts a week. Students also participate in a field training exercise each semester that explores small unit leadership training, military tactics, land navigation, rappelling, obstacle negotiation, and familiarization with military equipment like helicopters, tanks, and communications equipment.

Extracurricular Events

The Fordham ROTC program offers students challenging and rewarding extracurricular activities, from community service to high-adventure training. During the academic year, the student-led cadet battalion plans and executes activities ranging from workouts to orienteering to social events like the St. Patrick's Day Parade and the annual Military Ball. Students participate in ROTC color guards to represent the Army at events throughout New York City and the Hudson Valley, from professional sporting events to concerts in Carnegie Hall. Students can also attend a variety of professional and social events, galas, and ceremonies associated with the Army throughout New York. Fordham also offers a chapter of the Pershing Rifles ROTC Honor Society, recognizing exceptional ROTC students from all military services across the country.

During summers, ROTC students can attend military training such as courses in parachuting, helicopter operations, mountain operations,

and combat engineering. We offer academic internships in foreign languages, cyber activities, national research laboratories, foreign military exchanges, and at Army units to prepare students for the wide range of Army officer jobs.

Students who desire to serve in the Army Reserve or Army National Guard may enroll in simultaneous membership programs that allow them to participate in a Reserve or National Guard unit while also studying in ROTC. This program generally entails one weekend of reserve duty a month and two weeks each summer, during which students will also receive reserve pay and benefits.

After graduation, we offer opportunities—primarily for students going on to law, medical, seminary, dental, or veterinary school—to defer service obligations until completion of graduate studies. Many graduate study opportunities are funded by the Army.

Eligibility Criteria

Enrollment in first-year and sophomore ROTC courses is open to all Fordham students and students from our 32 partner universities and colleges.

To be eligible for Army ROTC scholarships and/or enrollment in junior- and senior-year ROTC courses, students must meet the following requirements:

- Be registered full-time students at Fordham or one of our partner colleges and universities
- Have good moral character
- Be medically able to participate
- Be a United States citizen (with some exceptions)

Application Procedure

Students may enroll in the course or apply for a campus-based scholarship each semester.

Contact Us

To learn more about the Army ROTC program, including eligibility requirements and scholarship opportunities, please:

- Visit our website at <https://www.fordham.edu/rotc>,
- Visit our main office at Fordham University's Rose Hill campus, in Faculty Memorial Hall, Room 130;
- Email our Recruiting Operations Officer at rotcroo@fordham.edu; or
- Call us at 718-817-4798.

Naval ROTC/Naval Science

Naval Science classes and drills are held at SUNY Maritime College, located in historic Fort Schuyler on the Throggs Neck peninsula, and on Fordham's Rose Hill Campus in the Bronx.

To receive a commission, a Midshipman must complete all requirements for a bachelor's degree in accordance with Fordham University's rules and regulations and complete additional courses required by either the Navy or Marine Corps, depending on which branch of service the Midshipman will commission into.

Additionally, Midshipmen must meet all medical/physical requirements prescribed by the Navy or Marine Corps prior to commissioning.

Those interested in obtaining more information about the Navy/Marine Corps ROTC Scholarship and College Programs should refer to the pertinent paragraphs in the Grants and Scholarships section under the Financial Services chapter of this Bulletin.

For more information

Visit the Naval ROTC program webpage

Requirements

For details on Naval ROTC program requirements, please visit the NROTC Program website.

Study Abroad

In the long-standing tradition of Jesuit education, Fordham University encourages study that enhances students' appreciation of the world's people and their interdependence. Our goal is to help you gain an understanding of other cultures and to encourage you to consider incorporating a global dimension into your chosen field of study by offering a broad range of study abroad programs.

Semester-long and summer programs in business, arts, and sciences, as well as internship placements, are offered at the Fordham London Centre. Fordham's study abroad programs in Granada, Spain, are based in one of the most beautiful and historic cities of Andalucia. Courses in English or Spanish enable students to fully immerse themselves in Spanish language and culture or begin their study of the Spanish language. A broad range of major, minor, and core courses are offered at both program sites.

Fordham University has partnerships with universities in more than 50 countries around the world and offers over 100 study abroad programs, including opportunities for direct enrollment at prestigious universities, exchange programs, internships, community engagement, and experiential learning. Program types and academic fields vary by location. You can see a list of all the study abroad programs on the study abroad website and use the advanced search feature, which allows you to search for a program by field of study, academic setting, term, language, housing options, and much more.

Applications to study abroad are completed in the Study Abroad Portal and typically open almost one year in advance of when you wish to go abroad, so start early. Staff in the International and Study Abroad Programs office are available to answer any questions you might have and look forward to working with you to help make the world your classroom!

For more information and deadlines, please visit the International and Study Abroad Programs website.

Tutorials

Juniors and seniors have the opportunity to develop opportunities for independent research or study. Students choose a faculty member in the area of study and together design the course, including objectives, course requirements, and bibliography. Approval must be received from the instructor, the department chair, and an advisor or assistant dean. Applications for a tutorial can be submitted for FCRH or FCLC by the instructor; they will be reviewed by the department chair and the

student's advisor or the assistant dean for their class year. For PCS, applications should be initiated with the student's advising dean.

Accounting and Taxation

Accounting is the language of business. All Gabelli School students need to understand the basics of accounting, both for their courses at Fordham and for their business careers. Students receive rigorous exposure to financial accounting in the integrated business core, and those who choose can continue with a program of study that prepares them to succeed on the CPA exam and obtain other highly regarded certifications.

The study of accounting does not end in the classroom. Fordham fields teams regularly for regional and national competitions in accounting and taxation. These competitions are run by major accounting firms, such as Deloitte, KPMG, PwC, and EY. Guest speakers from accounting firms, Fortune 500 corporations, and regulatory and standard-setting agencies, such as the Financial Accounting Standards Board and the Public Company Accounting Oversight Board, frequently appear on campus and provide networking opportunities for students.

Accounting students may join the on-campus student chapters of several prominent professional and academic groups. Active involvement in these groups often paves the way for internships and subsequent job offers. These organizations include:

- ALPFA, the Association of Latino Professionals in Finance and Accounting
- Ascend, the premier nonprofit professional association for Pan-Asians
- Beta Alpha Psi, the honor society for finance and accounting students and professionals

Program Requirements

Gabelli School students may integrate accounting into their academic program in several ways: As a major (through one of four options), as a minor, or as a concentration within the Business Administration major.

One of the four majors is the Public Accountancy program, which is a five-year program that leads students to complete the 150 credits that New York State requires for individuals who want to take the Certified Public Accountant (CPA) exam and earn licensure. With the other three majors, students may elect to pursue licensure, or not.

The Road To Licensure: Various Paths

By the time a student sits for the CPA exam, if licensure is his or her goal, he or she must have logged the 150 course hours mandated by New York State. Fordham has developed a variety of paths that students can pursue to reach that total.

As noted above, the five-year undergraduate Public Accountancy major is one of them. But there are other paths, too. Dual-degree programs merge a bachelor's with a master's degree at the Gabelli School. By the time a student completes both his or her undergraduate and graduate degree in five years, he or she will have reached the 150-hour level and be qualified to sit for the CPA exam.

The table below offers an overview of how the various licensure paths are structured. Students who wish to pursue one of these paths should apply during their senior year; please review the Dual-Degree Programs (p. 95) information on the Gabelli School website and contact the dual-degree programs adviser for more information.

Undergraduate Major	Certified Public Accountant (CPA) Licensure Determination	Supplemental Graduate Concentration Leading to Licensure
Single Degree		
150-credit B.S. in Public Accountancy (CPA-track)	Meets the educational requirements for licensure, either directly or through reciprocity, in all 50 States as a stand-alone degree, without supplemental graduate coursework as of March 24, 2021.	N/A

Dual Degree

B.S. in Public Accounting	Does not meet the educational requirements for licensure as a stand-alone degree in any State as all States required 150 credits minimum for CPA licensure among other requirements. However, the program does meet the educational requirements for licensure, either directly or through reciprocity, in all 50 States when combined with qualifying supplemental graduate coursework identified in this table as of March 24, 2021.	combined with:	<p>(a) M.B.A. Public Accounting</p> <p>(b) M.B.A. Finance • Note: With this option, completion of 6 Accounting credits within the M.B.A. degree program is required to meet CPA educational requirements.</p> <p>(c) M.B.A. Information Systems • Note: With this option, completion of 6 Accounting credits within the M.B.A. degree program is required to meet CPA educational requirements.</p> <p>(d) M.B.A. Communication and Media Management • Note: With this option, completion of 6 Accounting credits within the M.B.A. degree program is required to meet CPA educational requirements.</p> <p>(e) M.B.A. Management • Note: With this option, completion of 6 Accounting credits within the M.B.A. degree program is required to meet CPA educational requirements.</p> <p>(f) M.B.A. Marketing • Note: With this option, completion of 6 Accounting credits within the M.B.A. degree program is required to meet CPA educational requirements.</p> <p>(g) M.S. in Professional Accounting</p>
B.S. in Applied Accounting and Finance	Does not meet the educational requirements for licensure as a stand-alone degree in any State as all States required 150 credits minimum for CPA licensure among other requirements. However, the program does meet the educational requirements for licensure, either directly or through reciprocity, in all 50 States when combined with qualifying supplemental graduate coursework identified in this table as of March 24, 2021.	combined with:	<p>(h) M.S. in Professional Taxation</p> <p>(a) M.B.A. Public Accounting</p> <p>(b) M.S. in Professional Accounting</p>

B.S. in Accounting Information Systems	Does not meet the educational requirements for licensure as a stand-alone degree in any State as all States required 150 credits minimum for CPA licensure among other requirements. However, the program does meet the educational requirements for licensure, either directly or through reciprocity, in all 50 States when combined with qualifying supplemental graduate coursework identified in this table as of March 24, 2021.	combined with:	M.S. in Professional Accounting
--	---	----------------	---------------------------------

Undergraduate Minor or Concentration

Accounting Minor	Completing the Accounting Minor is not equivalent to an accounting degree, nor does it meet the educational requirements for licensure as a stand-alone credential, either directly or through reciprocity, in any State.	N/A
Concentration in Accounting	Completing the Concentration in Accounting is not equivalent to an accounting degree, nor does it meet the educational requirements for licensure as a stand-alone credential, either directly or through reciprocity, in any State.	N/A

Requirements for the Certified Public Accountant (CPA) license are subject to State-specific requirements and typically require more than successful completion of educational requirements. CPA licensure candidates must satisfy pertinent additional requirements, contingent on State specificities, including but not limited to completing the CPA application process, submitting payment for all relative fees, passing licensure examinations, and professional experience.

Students are encouraged to regularly visit the National Association of State Boards of Accountancy website and the American Institute of Certified Public Accountants website to stay apprised of any additional relevant licensure requirement updates. Please refer to the table above to review in which States your program meets the educational requirements for professional CPA licensure as of March 24, 2021.

For further information, please refer to the respective pages for each program. Students are encouraged to meet with their class dean and/or the accounting adviser for additional information regarding the programs.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

Visit the Accounting Area web page.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-

graduation visa extensions. Learn more about CIP codes and other information resources.

Concentrations

Concentration in Sustainable Reporting

A new, standardized language is needed to articulate material non-financial risks as well as opportunities facing companies today. Both financial and non-financial risks affect a corporation's ability to create long-term value. Thus, reporting should include the way companies compete, use resources, and impact society.

The concentration in sustainable reporting enables students to further develop analytic tools and effective communication capabilities pertaining to this expanding field of study. Earning this unique concentration can better position you for careers not only in accounting but also in financial service-related fields that focus on non-financial considerations.

This concentration is only available to Gabelli School of Business students at Rose Hill pursuing a major in public accounting (p. 151) or public accountancy (p. 150).

Students can complete this concentration as part of their major in public accounting (p. 151) or public accountancy (p. 150) without any additional courses.

Requirements for Public Accounting Majors

Course	Title	Credits
Two of the following courses:		
ACBU 4444	Sustainability and Environmental Reporting and Disclosure	
ACBU 4646	Ethics in Financial Reporting and Accounting	
ACGB 719N	Business Risks In A Global Digital Economy ¹

Accounting Minor

This minor, requiring seven courses, provides a systematic program of study in accounting. Completing it is not equivalent to an accounting degree, nor does it make students eligible to take the certified public accounting exam. Rather, it provides an integrated approach to issues that may benefit students who seek careers in business and in the financial services industry.

The accounting minor is available to any interested student in Fordham College at Rose Hill.

Learning Goals

- Students will demonstrate a substantive knowledge of key business concepts and theories.
- Students will demonstrate competency in analytical and technical skills in decision-making.
- Students will demonstrate competency in oral and written communication.
- Students will demonstrate capacity for ethical decision-making and an understanding of how business can positively impact society.
- Students will demonstrate an awareness and competency in effectively working in teams and dealing with globally diverse situations.

Requirements

Students of any major in Fordham College at Rose Hill may elect to complete an accounting minor.

A total of seven courses are required:

Course	Title	Credits
ECON 1200	Principles of Microeconomics	3
ACBU 2222	Principles of Financial Accounting	3
ACBU 2223	Principles of Managerial Accounting	3
ACBU 3434	Intermediate Financial Accounting I	3
ACBU 3435	Intermediate Financial Accounting II	3
Two upper-level accounting electives ¹		

¹ Any course with the ACBU subject code (p. 971) numbered 3000 or higher may fulfill this requirement.

Fordham College at Rose Hill students may use Basic Microeconomics to satisfy one of their core social science requirements. It is advisable that students interested in pursuing the accounting minor take ECON 1200 Principles of Microeconomics as early as possible, as it is a prerequisite for the accounting classes. In addition, as many of the accounting classes are sequential, it is recommended that students begin this minor no later than the fall of sophomore year.

Availability

The minor in accounting is available for Fordham College at Rose Hill students.

Accounting Information Systems Major Requirements

Course	Title	Credits
ACBU 3434	Intermediate Financial Accounting I	3
ACBU 3435	Intermediate Financial Accounting II	3
ACBU 3441	Advanced Concepts in Financial Accounting	3
ACBU 3421	ST: Accounting Information Systems	3

FNBU 3440	Corporate Financial Policy	3
FNBU 3441	Investments & Security Anlys	3
One elective course from list below ¹		3
One upper-level elective in finance ²		3
Two CPA-required courses OR two additional upper-level business electives ³		6
Total Credits		33

¹ CPA track students should take INSY 4506 Business Analytics to fulfill this requirement.

² Any course with subject code FNBU (p. 1264) numbered 3440 or higher may fulfill this requirement.

³ ACBU 3442 Individual and Business Taxation and ACBU 3443 Assurance and Auditing should both be taken if a student pursues the two CPA-required courses.

Electives

Courses in this group have the AAAF attribute.

Course	Title	Credits
ACBU 4436	Accounting for Derivative Securities	3
FNBU 4453	ST: Fixed-Income Analysis	3
FNBU 4454	ST: Financial Modeling	3
FNBU 4464	ST: Compliance and Risk Management	3
FNBU 4480	ST: Traded Credit Products	3
INSY 4506	Business Analytics	3

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

CIP Code

52.0304 - Accounting and Finance.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Concentration in Accounting Requirements

The Accounting concentration is available to Gabelli students at Rose Hill..

Primary concentration

To complete a primary concentration in accounting, students must take the following courses:

Course	Title	Credits
ACBU 3434	Intermediate Financial Accounting I	3
ACBU 3435	Intermediate Financial Accounting II	3

Two upper-level accounting courses ¹

Secondary concentration

Students who want to pursue accounting as a secondary concentration are required to complete three upper-level accounting courses ¹.

¹ Any course from subject code ACBU (p. 971) numbered 3000 or higher will fulfill this requirement.

African and African American Studies

The Department of African and African American Studies is both an academic unit and a community comprised of students and faculty interested in the interdisciplinary study of Africa and its diaspora. Our work is grounded in the cultural and historical experiences of people of African descent. This focus on experience informs our interpretations of the African Diasporic past and present and propels our directives for the future. The department sponsors a wide range of cultural programs, lectures, and community events. Strong emphasis is placed on preparing students for graduate and professional study and careers in public or community work.

Program Activities

In order to develop student research and writing skills and to promote scholarship at the undergraduate level, the department sponsors an annual student-led symposium based on course-related research. Involvement with faculty research projects is available and highly encouraged.

The Bronx African American History Project (BAAHP) is a major research initiative sponsored by the department in cooperation with the Bronx County Historical Society. The BAAHP is dedicated to uncovering the cultural, political, economic, and religious histories of more than 500,000 people of African descent in the Bronx. The BAAHP hires student researchers and transcribers and has presented its research in public schools, academic conferences, and libraries throughout the city.

For more information

Visit the African and African American Studies department web page.

Contribution to the Core

African and African American studies offers AFAM 1600 Understanding Historical Change: Africa, which fulfills the Understanding Historical Change core requirement. The department also offers a wide variety

of Eloquentia Perfecta (EP1, EP3), American Pluralism, and Global Studies courses each year. In addition, a Values Seminar/EP4 and an Interdisciplinary Capstone Course are offered annually.

Programs

- African and African American Studies Major (p. 154)
- African and African American Studies Minor (p. 155)

African and African American Studies Major

Overview

The Department of African and African American Studies (AAAS) offers a major and minor in AAAS, as well as a minor in African Studies. The major prepares students to become global citizens, scholars, and socially-minded thinkers and solvers sensitive to the demands of an increasingly diverse America and the world. It fulfills key components of Fordham University's vision, educating students as leaders for justice and cultivating an inclusive community. The major equips students with both knowledge and skills for graduate study and careers in various fields, including law, academia, education, policy, government and politics, international organizations, journalism, and public service.

Major Requirements

- Completion of a minimum of nine one-semester courses offered by the department at the Rose Hill and Lincoln Center campuses.
- Required courses include African History, Caribbean History, and African American History.
- Two additional required courses include "Being and Becoming Black in the Atlantic World" and a senior research seminar in the senior year.
- Four elective courses chosen from cross-listed courses in English and, literary studies, history, art and music history, women, gender, and sexuality studies, media and communications, and political science.

Learning Outcomes

Upon graduation, students will have achieved the following curricular goals:

- Develop a critically-informed understanding of major themes and debates in African and African American complex histories.
- Gain knowledge in interdisciplinary approaches necessary for understanding the diverse histories, cultures, and experiences of African and African American peoples.
- Acquire conversance in multiple research methods relevant to the study of African and African American studies, including historical, literary, anthropological, sociological, and linguistic approaches.
- Develop critical skills in articulating and interpreting past and contemporary knowledge about African and African American histories and cultures.
- Acquire a foundation in critical thinking and problem solving, research, writing, and analytical skills essential for liberal arts education and well-rounded outlook on the world.

CIP Code

05.0201 - African-American/Black Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Students who major in African and African American studies must complete a minimum of nine one-semester courses offered by the department at the Rose Hill and Lincoln Center campuses.

Course	Title	Credits
One African History course		
One The Caribbean course		
One African-American History course		
Additional Required courses		
AFAM 3037	Being and Becoming Black in the Atlantic World	4
AFAM 4890	Research Seminar	4
Electives		
Select four courses ¹		14 to 16

African History

Course	Title	Credits
AFAM/HIST 1600	Understanding Historical Change: Africa	3
AFAM 3140	Contemporary Africa	4
AFAM 3141	Women and Social Change in Africa	4
AFAM 3146	African Immigrants in the United States	3
AFAM 3148	History of South Africa	4
AFAM 3188	Exploring Africa: Encounter, Expedition, and Representation	4

The Caribbean

Course	Title	Credits
AFAM 3150	Caribbean Peoples and Culture	4
AFAM 3155	Children of Immigrants in America	4
AFAM 3036	Global Black Youth Cultures	4
AFAM 3510	In "America's Backyard": U.S.-Caribbean Social, Political, and Economic Relations 1850-1950	4
AFAM 3667	Caribbean Literature	4

African-American History

Course	Title	Credits
AFAM 3001	African American History I	4
AFAM 3002	African American History II	4
AFAM 3115	Martin Luther King Jr. and Malcolm X	4

AFAM 3632	Harlem Renaissance	4
HIST 3001	African American History I	4
HIST 3002	African American History II	4

¹ Any course with the AFAM subject code or the AFAM attribute code may fulfill this requirement.

Availability

The major in African and African American studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

African and African American Studies Minor

Overview

Minor Requirements

- Completion of a minimum of six one-semester courses offered by the department on the Lincoln Center or Rose Hill campuses.
- Required courses: one African History Course, one African American History Course, and four Elective Courses.
- Elective courses chosen from cross-listed courses in English and literary studies, history, art and music history, women, gender, and sexuality studies, media and communications, and political science.

Learning Outcomes

Upon graduation, students will have achieved the following curricular goals:

- Gain knowledge in interdisciplinary approaches necessary for understanding the diverse histories, cultures, and experiences of African and African American peoples.
- Develop critical skills in articulating and interpreting past and contemporary knowledge about African and African American cultures.

Requirements

Those students who minor in African and African American studies must complete a minimum of six one-semester courses:

Course	Title	Credits
	One African History course	
	One African-American History course	
	Four Elective courses ¹	

¹ Any course with the AFAM subject code or the AFAM attribute code may fulfill this requirement.

African History

Availability

The minor in African and African American studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

African Studies

The purpose of this interdisciplinary minor is to provide unique opportunities for Fordham students to develop a level of expertise in African political and social history, literature, sociology, economics, among others; learn African languages; meet with Africa permanent representatives at the U.N.; and interact with and network among the diverse African population present in the city.

This interdisciplinary minor provides a background for careers in government, business, law, foreign service, academia, and other areas. The minor also complements majors in many departments and professional schools throughout the university, such as Economics, Political Science, International Humanitarian Affairs, and Business. It is recommended to students wishing to gain an international perspective before entering the global marketplace.

Visit the African studies program page.

Programs

- African Studies Minor (p. 155)

African Studies Minor

Overview

The African studies minor provides unique opportunities for students to develop expertise in African political and social history, literatures, sociology, economics, women, gender, and sexuality studies, among

others. It also offers language learning opportunities and interaction and networking among New York City's diverse African population.

Requirements

- Completion of six courses, including one required course, Understanding Historical Change: Africa (AFAM 1600).
- Five elective courses are required, including at least one course in social sciences, one course in arts and humanities, and three general African studies courses.
- Additionally, students must demonstrate proficiency through the intermediate level in a language spoken on the African continent other than English.

Learning Outcomes

Upon graduation, students will have achieved the following curricular goals:

- Develop an understanding of major themes and debates in African studies.
- Gain knowledge in interdisciplinary approaches necessary for understanding the diverse histories, cultures, and experiences of African peoples.
- Acquire critical skills in multiple research methods relevant to the study of past and contemporary African societies and cultures.
- Develop a foundation in critical thinking and problem solving, research, writing, and analytical skills essential for the field.
- Develop proficiency in some indigenous and foreign languages spoken on the African continent.

Requirements

The minor consists of six courses, including one required course (AFAM 1600) which, in general, is offered by the African & African American studies department every year.

Course	Title	Credits
AFAM/HIST 1600	Understanding Historical Change: Africa	3
One Social Studies course ¹		3 to 4
One Arts and Humanities course ¹		3 to 4
Three general African Studies electives ^{1,2}		9 to 12

¹ Students may take no more than two electives from any one discipline.

² Any course with the AFAM subject code (p. 976) or the AFST attribute code may fulfill this requirement.

In addition to the requirements listed above, students must demonstrate proficiency through the intermediate level in a language spoken on the African continent other than English such as Swahili, Twi, Zulu, Arabic, Portuguese, Spanish or French; or another language approved by the director of African Studies.

It is not necessary to study abroad to earn the minor, but credit towards the minor can be earned by studying in Ghana, South Africa, Morocco, or Tanzania. Limited scholarship funds will be available to cover the cost of traveling.

Social Science electives

Courses in this group have the AFSS attribute.

Course	Title	Credits
AFAM 3070	African Politics	4
AFAM 3072	Civil Wars in Africa	4
AFAM 3075	Democracy in Africa	4
AFAM 3140	Contemporary Africa	4
AFAM 3141	Women and Social Change in Africa	4
AFAM 3146	African Immigrants in the United States	3
AFAM 3148	History of South Africa	4
AFAM 3188	Exploring Africa: Encounter, Expedition, and Representation	4
HIST 3073	African Intellectual History	4
HIST 3695	Major Debates in African Studies	4
MEST 2000	Introduction to the Modern Middle East	4
POSC 3418	Islamic Political Thought	4
POSC 3520	Mideast and the World	4
POSC 3522	United Nations	4

Arts and Humanities electives

Courses in this group have the AFAH attribute.

Course	Title	Credits
AFAM 3148	History of South Africa	4
AFAM 3688	African Literature I	4
AFAM 3689	African Literature II	4
AFAM 3693	Contemporary African Literatures	4
AFAM 4192	Race and Religion in the Transatlantic World	4
DANC 2430	West African Dance	2
POSC 3427	Islam, Art, and Resistance	4

Availability

The minor in African studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in African studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

American Catholic Studies

The Francis and Ann Curran Center for American Catholic Studies (CACS) offers an honors undergraduate certificate program in American Catholic studies. The six-course certificate offers an interdisciplinary approach to the study of American Catholic culture, history, and theology. This interdisciplinary study is achieved through a sequence of required and elective courses offered in the art history, English, history, Latin American and Latino studies, music, philosophy, political science, sociology and anthropology, and theology departments of the Faculty of Arts and Sciences and the Gabelli School of Business.

The CACS certificate program offers undergraduates an opportunity to study the complex reality of American Catholic culture from a rigorously interdisciplinary standpoint, in the process helping students to hone their critical and analytical skills in analyzing often diverse ideological, racial and ethnic, socioeconomic, and geographical loyalties all claiming to be genuinely "American" and "Catholic."

Program Activities

The Discernment Seminar

All concentrators are required to participate in the Discernment Seminar. These monthly seminars, inspired in structure by the Spiritual Exercises of St. Ignatius of Loyola, have two aims: to encourage students to reflect deeply and critically on the challenges that confront the contemporary world and to ask them to consider how they might deploy their intellectual abilities and other talents in the service of a more just and humane society. In this process, students learn how to communicate effectively, efficiently, and memorably their views on the multifaceted global issues of our time. The goal is that concentrators will emerge from these seminars not only more aware of the needs of the world but also more capable of contributing to their resolution. Recent topics have included the shortage and unequal distribution of economic resources, public apathy in an age of renewed nuclear proliferation, and strategies for communicating clearly about highly complex topics. In the second semester of their junior year, concentrators will have the opportunity to begin to prepare applications for such nationally and internationally prestigious fellowships as the Rhodes, Marshall, Gates, and Jack Kent Cooke scholarships. Those concentrators who elect to do so will work closely with the Curran Center's associate director of Prestigious Fellowships and Fordham's St. Edmund Campion Institute as they proceed through the application process.

Lectures and Symposia

The center hosts lectures, symposia, and readings each semester. These often feature speakers, scholars, and artists of national and international reputation.

Communitas Discussion Dinners

Each semester, the Curran Center convenes a discussion dinner hosted by an invited speaker who brings to the table expertise in a topic of interest to CACS students and faculty.

Receptions, Networking, and Conviviality

To aid its students in their educational and career goals, the center offers receptions to bring students into contact with scholarship donors as well as alumni currently working in the academic, legal, business, and not-for-profit fields.

For more information

Visit the American Catholic Studies Center web page.

Programs

- American Catholic Studies Certificate (p. 157)

American Catholic Studies Certificate

The certificate in American Catholic studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and the Gabelli School of Business.

Services and Community

Students participate in a program of community service and attend various communal and academic events designed to foster a community of scholars who seek to combine cultivation of their academic talents with a life of thoughtful and creative engagement within the University community and in broader church and civic arenas.

Admissions

Admission to the CACS program is selective, a 3.5 cumulative grade point average on a 4.0 scale and interviews with program directors being required for admission. All students are designated as *Scholars in Catholic Studies: An Honors Certificate at Fordham* on their official transcripts.

Requirements

The concentration begins with a one-credit seminar for new concentrators in the spring of the sophomore year. An intensive two-semester American Catholic Studies seminar in the junior year follows. Each student crafts an individualized course of study comprising four additional courses in consultation with the directors of the undergraduate program. These courses are selected from offerings in a range of disciplines, including history, theology, philosophy, social science, art, and literature.

Courses below have the AMCS attribute.

Course	Title	Credits
AFAM 3130	Racial and Ethnic Conflict	4
AFAM 3150	Caribbean Peoples and Culture	4

THEO 4600	Religion and Public Life	4
THEO 4853	Spirituality and Politics	4
THEO 4870	Economic Foundations of Catholic Social Teaching	4

Other courses may apply at the discretion of the director of the program.

American Studies

American studies is the interdisciplinary study of the United States. Majors and minors analyze American history and experience through a variety of disciplines in order to gain insight into the multiplicity of cultures, ideas, and institutions that make up the nation. They draw on departments and programs such as African and African American studies, American Catholic studies, art history and music, English, history, Latin American and Latino studies, philosophy, political science, urban studies, and sociology. Those majoring or minoring in American studies have in common, however, the desire to link these perspectives into a complex view of the nation and its culture.

American studies is a small program, and admission is competitive based on grades, a writing sample, and a faculty reference. Students seeking to enter the program meet with the director to obtain an application and entrance information. We have about 15 to 20 majors and minors per class.

Program Activities

The American studies program presents a variety of activities for its students. We take city excursions, such as faculty-led tours of New York City's waterfronts, the New-York Historical Society, Green-Wood Cemetery, and El Museo del Barrio. We sponsor guest lecturers and performers, such as Darren Dochuk, author of *Anointed with Oil*; Judith Sloan and Warren Lehrer, authors of *Crossing the BLVD: Strangers, Neighbors, and Aliens in a New America*; historian Mae Ngai, author of *Impossible Subjects: Illegal Aliens and the Making of Modern America*; journalist Philip Gourevitch, author of *The Ballad of Abu Ghraib*; and performance artist Patrick Johnson, who wrote *Sweet Tea: Black Gay Men of the South*. Many of these events give students an opportunity to make their voices and opinions heard, such as our open forums and salon discussions on topics such as the presidential election, "Wal-Mart: the Price of Doing Business in America," and "Democracy and the Media: The Effects of Journalism on Past and Present Elections." Perhaps the most highly anticipated day of the year is the Senior Thesis presentation every December. These events, along with social gatherings each semester, allow American

studies students opportunities to socialize with one another and with their faculty.

For more information

Visit the American Studies program webpage.

Programs

- American Studies Major (p. 158)
- American Studies Minor (p. 177)

American Studies Major

Requirements

The benefits of the American studies major include: 1) the sharp focus brought by the American studies sequence (AMST 2000, AMST 4010, and AMST 4500), at the end of which the student completes a Senior Thesis and 2) the flexibility offered by our faculty in several different disciplines. The courses listed for the multidisciplinary requirement below are representative of the potential of the major, and change each semester.

Accepted students are expected to successfully complete 10 courses in a well-integrated program to be worked out individually in consultation with the program director.

Course	Title	Credits
AMST 2000	Major Developments in American Culture (ideally in the sophomore year)	4
AMST 4010	Approaches to American Studies	4
AMST 4500	The Senior Seminar	4
Four required courses from one of the following concentrations:		12
	Cultural Products	
	Diversity and Difference	
	Power, Politics, and Institutions	
Multidisciplinary Diversity ¹		12
	American Literature	
	American Art, Music, Theatre, or Media	
	American Religion or Philosophy	
	American History or Social Science	
Three elective courses ²		9

¹ These courses are not additional requirements above the courses described above; rather, they govern the distribution of courses taken to complete concentration and open elective requirements.

² Any course with the AMST subject code (p. 987) or the AMST attribute code may fulfill this requirement.

Multidisciplinary Diversity

Students will also be required to demonstrate multidisciplinary diversity. Courses taken to fulfill concentration and open elective requirements must include one course in each of the following four areas:

These are not additional requirements above the 10 described above; they are rules governing the distribution of courses taken to complete

concentration and open elective requirements. These courses include the following:

American Literature courses

Courses in this group have the ASLT attribute.

Availability

The major in American studies is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in American studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

CIP Code

05.0102 - American/United States Studies/Civilization.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Concentrations

American studies majors can tailor their coursework to their interests by selecting from a wide range of courses that fall into three areas of concentration.

The three possible areas of concentration are:

1. **Cultural Products:** the arts, literature, thought and media. This concentration focuses on American literature, arts, media, and thought, examining their history and place in American culture and society. Students take courses in literature, film, media, music, the visual arts, the performing arts, popular culture, philosophy, and intellectual history.
2. **Diversity and Difference:** This concentration takes up the problem of American social and cultural pluralism. Students will consider the place of categories such as race, ethnicity, class, gender, and religion in American history. Students will most likely take courses in literature, philosophy, African American studies, Latino studies, history, political science, urban studies, women's studies, religion, American Catholic studies, and sociology.
3. **Power, Politics, and Institutions:** This concentration focuses on American society and institutions, such as politics and religion. Students will primarily take courses in political science, history, sociology, Latino studies, American Catholic studies, African American studies, and urban studies.

Four courses are required in a concentration.

Courses for the Cultural Products concentration

Courses in this group have the ACUP attribute.

American Studies Minor Requirements

A minor in American studies consists of six courses.

Course	Title	Credits
AMST 2000	Major Developments in American Culture	4
One course in American Literature ¹		
One course in American Philosophy or Religion ¹		
One course in American Art, Music, Theater, or Media ¹		

One course in American History or Social Science ¹

Two electives in American Studies ²

¹ Courses that fulfill these requirements respectively are listed on the page for the American Studies major (p. 158).

² Any course with the AMST subject code (p. 987) or the AMST attribute code may fulfill this requirement.

Availability

The minor in American studies is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in American studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Anthropology

Note: "Sociology and Anthropology" is a single academic department at Fordham, but the academic information for each subject is listed on a separate web page. Information about sociology programs is listed under sociology (p. 362).

The aim of anthropology is the comprehensive study of the human condition, the origins of our species in evolutionary biology, and the development of culture and society in its many variations among ancient and contemporary peoples. Its subject matter encompasses an immense time depth and a vast spatial range, including the simplest human societies and the most complex civilizations, including modern industrial nations. Anthropology brings together many areas of scientific and humanistic inquiry, unifying and integrating knowledge about people and their perceptions of the world, and it offers a balanced perspective on the momentous cultural changes wrought by globalization that are ongoing today.

A major in anthropology is important for those who seek to understand our multiethnic society and the varieties of culture on our planet. It is a valuable asset for any work entailing contact with the public and especially for careers involving international affairs or travel. The experience with cultural diversity that anthropology provides is excellent preparation for law, business, and other graduate studies, and its biological component makes it attractive to admissions officers of medical schools. The synthesizing nature of anthropology also makes it suitable for students pursuing a double major in which anthropology is combined with other areas of the humanities and the natural and social sciences.

Program Activities Honors and Awards

The Departmental Honors Thesis in Sociology and Anthropology is designed for FCRH and FLC students who are interested in conducting independent research during their final year. Working closely with a faculty advisor, students plan and execute their own research, and then report the results in a substantial thesis. Students who earn a minimum grade of B on the thesis will graduate with honors in the sociology or anthropology major. Students are invited to apply by email during the spring of their junior year. Applicants must have a 3.4 overall grade point average and a 3.5 average in their major to be eligible for the program.

At Rose Hill, the department honors its seniors at the end-of-year awards ceremony, Encaenia, by bestowing the Rev. J. Franklin Ewing, S.J., Memorial Award for the best submitted essay by a graduating anthropology major. At Lincoln Center, the department also recognizes excellence in its graduating seniors with departmental honors in anthropology at its own diploma ceremony.

Internships

Both sociology and anthropology majors and nonmajors are encouraged to take advantage of the Internship Seminar offered by the department. This course is designed to provide students with the opportunity to develop skills in social analysis, policy development, program evaluation, and interpersonal relations while being of service to others in a real-life setting outside the classroom. Employment opportunities include agencies and corporations in the New York metropolitan area, ranging from organizations in the public sector, including the New York State Department of Corrections, the Legal Aid Society, and the Puerto Rican Family Institute, to organizations in the private sector such as CBS, Merrill Lynch, and IBM. Participating students are required to take SOCI 4900 (Internship Seminar) and to spend a minimum of eight to 10 hours per week in an agency (public or private) or organization chosen to fit the individual student's interests and expertise.

Anthropology Resources

Departmental resources include Stone Age implements; ethnographic art and artifacts from Southeast Asia, the South Pacific, and Africa; a teaching collection of human skeletal material, an archive and database of colonial and early American bricks from New York City and a large collection of colonial and early American artifacts. In cooperation with the history department, the anthropology program at Rose Hill conducted the longest running archaeological excavation in New York City at the Rose Hill manor from 1985 to 2002, located on the Rose Hill campus. Artifacts from this campaign are undergoing laboratory analysis, for which students may volunteer to help.

For more information

Visit the Sociology and Anthropology department web page

Contribution to the Core

Sociology and anthropology offer the following which fulfill the first social science core requirement:

Course	Title	Credits
ANTH 1100	Introduction to Cultural Anthropology	3
ANTH 1300	Introduction to Archaeology	3
SOCI 1100	Introduction to Sociology	3

The advanced social science core requirement may be satisfied by an advanced-level course in sociology or anthropology. The course in Physical Anthropology, ANTH 1200 Introduction to Biological Anthropology, and ANTH 1600 Introduction to Human Variation, each fulfill the life science core requirement for nonmajors. In addition, the department regularly offers courses that fulfill the American Pluralism, Global Studies, Interdisciplinary Capstone, and *Eloquentia Perfecta* 1 and 3, and Values Seminar/EP4 core requirements.

Programs

- Anthropology Major (p. 178)
- Anthropology Minor (p. 179)

Anthropology Major Requirements

Students majoring in anthropology are required to complete nine courses.

Course	Title	Credits
Required Courses		
ANTH 1100	Introduction to Cultural Anthropology	3
ANTH 3725	Anthropological Theory	4
<i>One of the following introductory subfield courses:</i>		3
ANTH 1200	Introduction to Biological Anthropology	
ANTH 1300	Introduction to Archaeology	
ANTH 1413	Language and Culture	
ANTH 1600	Introduction to Human Variation	
<i>One of the following options:</i>		4
ANTH 3180	Ethnographic Methods	
One upper-level course in Archaeology, Biological Anthropology, or Linguistic Anthropology ¹		
Electives²		
Five elective courses (up to two may be Sociology courses) ³		15 to 20

¹ See below for the lists of courses that may fulfill this option.

² With prior approval, one or two courses in other departments, or special tutorials taken with anthropology faculty, may be credited toward the major as electives, if such courses complement departmental offerings and lie within a student's specific area of anthropological interest. Majors are strongly encouraged to enroll in anthropology courses taught by faculty on both campuses, since the disciplinary specializations and course offerings differ at Rose Hill and Lincoln Center.

³ Any course with the ANTH subject code or the ANTH attribute code, or the SOCI subject code or the SOCI attribute code, may fulfill this requirement.

Sociology courses are those with the SOCI subject code or the SOCI attribute code.

Archaeology courses

Courses in this group have the ANAR attribute.

Course	Title	Credits
ANTH 2343	Witches or Saints: Women in Archaeology	4
ANTH 3110	Ancient Cultures of the Bible	4
ANTH 3111	New World Archaeology	4
ANTH 3112	Archaeologies of the Present: Historical Archaeology and Advocacy	4
ANTH 3510	Museums: Representing / Engaging Culture(s)	4
ANTH 4373	Environment and Human Survival	4
ANTH 4802	Archaeology of New York	4

Biological Anthropology courses

Courses in this group have the ANBA attribute.

Course	Title	Credits
ANTH 2520	Introduction to Forensic Anthropology	4
ANTH 3520	Forensic Investigation of the Human Skeleton	4
ANTH 4373	Environment and Human Survival	4
ANTH 4722	Primate Ecology and Conservation	4

Linguistic Anthropology courses

Courses in this group have the ANLA attribute.

Course	Title	Credits
ANTH 3726	Language, Gender, and Sexuality	4
FREN 3055	Language and AI (Artificial Intelligence)	4
SPAN 3402	Language and Identity in the Spanish-Speaking World	4

Availability

The major in anthropology is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in anthropology only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Anthropology Minor Requirements

The minor in anthropology requires six courses, as follows.

Course	Title	Credits
Required Courses		
ANTH 1100	Introduction to Cultural Anthropology	3
<i>One of the following introductory subfield courses:</i>		
ANTH 1200	Introduction to Biological Anthropology	3
ANTH 1300	Introduction to Archaeology	

ANTH 1413	Language and Culture	
ANTH 1600	Introduction to Human Variation	
<i>One of the following options:</i>		4
ANTH 3180	Ethnographic Methods	
ANTH 3725	Anthropological Theory	
One upper-level course in Archaeology, Biological Anthropology, or Linguistic Anthropology ¹		
Electives		
Three elective courses (up to one may be a Sociology course) ²		9 to 12

¹ See below for the lists of courses that may fulfill this option.

² Any course with the ANTH subject code or the ANTH attribute code, or the SOCI subject code or the SOCI attribute code, may fulfill this requirement. Sociology courses are those with the SOCI subject code or the SOCI attribute code.

Archaeology courses

Courses in this group have the ANAR attribute.

Course	Title	Credits
ANTH 2343	Witches or Saints: Women in Archaeology	4
ANTH 3110	Ancient Cultures of the Bible	4
ANTH 3111	New World Archaeology	4
ANTH 3112	Archaeologies of the Present: Historical Archaeology and Advocacy	4
ANTH 3510	Museums: Representing / Engaging Culture(s)	4
ANTH 4373	Environment and Human Survival	4
ANTH 4802	Archaeology of New York	4

Biological Anthropology courses

Courses in this group have the ANBA attribute.

Course	Title	Credits
ANTH 2520	Introduction to Forensic Anthropology	4
ANTH 3520	Forensic Investigation of the Human Skeleton	4
ANTH 4373	Environment and Human Survival	4
ANTH 4722	Primate Ecology and Conservation	4

Linguistic Anthropology courses

Courses in this group have the ANLA attribute.

Course	Title	Credits
ANTH 3726	Language, Gender, and Sexuality	4
FREN 3055	Language and AI (Artificial Intelligence)	4
SPAN 3402	Language and Identity in the Spanish-Speaking World	4

and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Art History

Note: "Art History and Music" is a single academic department at Fordham, but the academic information for each subject is listed on a separate web page. Information about Music programs is listed under Music (p. 320).

The art history major and minor offer students the opportunity to study the great cultural accomplishments of human civilization within a broad historical context. Art history intersects with many different fields, including history, literature, philosophy, and theology. It is integral to a strong liberal arts curriculum that is at the heart of the Fordham education. The art history major and minor focus on the history of European, American, and Global art. Students are prepared for graduate school and for employment in galleries, auction houses, art publishing, and nonprofessional positions in museums. Many students pursue careers in other fields, including law and education.

No course in which the student earns a grade of D or F may be used toward a departmental major or minor.

Program Activities Internships

We encourage students to take advantage of the many internship opportunities in New York City. Art history majors have held internships at the Metropolitan Museum of Art, the Museum of Modern Art, the Guggenheim Museum, the Neue Gallery, the Studio Museum of Harlem, the New Museum of Contemporary Art, the International Center of Photography, El Museo del Barrio, the Drawing Center, the New York Historical Society, Christie's and Sotheby's, art magazines, art appraisers and many private galleries. With the approval and supervision of the department, majors may receive elective credit for one internship, graded on a pass/fail basis. Internships offer valuable experience and can lead to after-graduation employment but do not count toward requirements for the major or minor.

Awards

The department supplements its academic programs with several prizes to honor art history majors. The Stark Prize is money awarded to a junior art history major toward travel in Europe over the spring or summer break; the Marion Scholarship is awarded to a senior on the basis of documented need and academic record; the Art History prize is awarded to one senior at Rose Hill and one senior at Lincoln Center on the basis of an exceptional academic record. The department also sponsors the Vasari Symposium each spring for which one or more graduating seniors are invited to give a public lecture on the topic of their senior seminar research papers.

For more information

Visit the Art History department web page.

Contribution to the Core

The Art History program offers ARHI 1100 Art History Introduction: World Art, ARHI 1101 Introduction to Art History: Europe, ARHI 1102 Introduction to Art History: Asia, and ARHI 1103 Introduction to Art History: Americas. all of which fulfill the Core Fine Arts requirement, and three of which (ARHI 1100 Art History Introduction: World Art, ARHI 1102

Introduction to Art History: Asia, ARHI 1103 Introduction to Art History: Americas) fulfill the Core Global Studies requirement.

Programs

- Art History and Visual Arts Double Major (p. 182)
- Art History Major (p. 180)
- Art History Minor (p. 182)

Art History Major

Requirements

Majors in art history must complete a minimum of nine one-semester courses.

Course	Title	Credits
ARHI 1100	Art History Introduction: World Art ¹	3
or ARHI 1101	Introduction to Art History: Europe	
or ARHI 1102	Introduction to Art History: Asia	
or ARHI 1103	Introduction to Art History: Americas	
VART 1135	Visual Thinking	3
ARHI 4600	Senior Seminar	4
<i>One required course from each of the following areas of study:</i>		16
Ancient/Medieval		
Renaissance/Baroque		
Modern		
Global		
Two elective courses ²		8

¹ Students in the FCRH Honors Program may fulfill this requirement with HPRH 1205 Foundational Topics: Art. Students in the FCLC Honors Program may fulfill this requirement with HPLC 2501 Honors: Art History at the Museums.

² Any course with the subject code ARHI (p. 1004) numbered 1102-4999 (except for ARHI 4900 Internship) may fulfill this requirement. Both elective courses should preferably be taken in the same area of study (Ancient/Medieval, Renaissance/Baroque, Modern, or Global).

Students who have taken the art history AP exam and have scored 4 or 5 can count this AP credit (ARHI 1298) toward their fine arts core requirement.

Art history majors who have taken the art history AP and have scored 4 or 5 must still take nine art history courses to complete the major.

Art history majors may earn academic credit for internships (via ARHI 4900 Internship), but may not apply such credit towards the major.

Courses belonging to the art history areas of study are listed in the areas of study section (p.).

Current Fordham students may count toward the art history major or minor up to two courses taken on study abroad programs or in special cases at other U.S. institutions. Students must meet with their adviser in the art history program in advance to discuss plans. Credit of such non-Fordham courses toward the art history major or minor will be granted at the discretion of the department.

Incoming transfer students may count up to four courses taken at their previous institution toward the Fordham art history major or minor. Application of non-Fordham credits toward the major or minor is not automatic and will be decided at the discretion of the Chair or Associate Chair.

Availability

The major in art history is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

50.0703 - Art History, Criticism and Conservation.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Areas of Study

The major requires students to take one course from each of the areas of study below. Students are encouraged to complete the major's elective requirement with two additional courses from a single area of study.

Renaissance/Baroque area of study courses

Courses in this group have the AHRB attribute

Course	Title	Credits
ARHI 2410	Northern Renaissance Art	4
ARHI 2415	Italian Renaissance Art	4
ARHI 2418	Gender and Sexuality in Renaissance Art	4

Art History Minor

Requirements

The department offers a minor consisting of six one-semester departmental courses in art history.

Course	Title	Credits
Introductory Art History Course(s)		
Select at least one of the following: ¹		
ARHI 1100	Art History Introduction: World Art	
ARHI 1101	Introduction to Art History: Europe	
ARHI 1102	Introduction to Art History: Asia	
ARHI 1103	Introduction to Art History: Americas	

Electives

Select five additional art history courses ²

¹ Students in the FCRH Honors Program may count HPRH 1205 Foundational Topics: Art towards this requirement.

² Any course with the subject code ARHI (p. 1004) numbered 1100-4999 (except for ARHI 4900 Internship) may fulfill this requirement. Introductory courses (numbered 1100-1103), may be included as long as students do not repeat material covered in a course already taken. One visual arts course, VART 1135 Visual Thinking, may be substituted for one of the five elective art history courses. AP Art History exam credit (ARHI 1298) does not count towards the minor.

Art history minors may earn academic credit for internships (via ARHI 4900 Internship), but may not apply such credit towards the minor.

Current Fordham students may count toward the art history minor up to two courses taken on study abroad programs or in special cases at other U.S. institutions. Students must meet with their adviser in the art history program in advance to discuss plans. Credit of such non-Fordham courses toward the art history minor will be granted at the discretion of the department.

Incoming transfer students may count up to four courses taken at their previous institution toward the Fordham art history minor. Application of non-Fordham credits toward the minor is not automatic and will be decided at the discretion of the Chair or Associate Chair.

Availability

The minor in art history is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and at Fordham's School of Professional and Continuing Studies at Lincoln Center.

Art History and Visual Arts Double Major Overview

A double major in art history and visual arts is a desirable choice for students who want the solid background in the humanities that art history offers in tandem with a broad foundation in the visual arts. Students should be aware that some of the courses necessary for completing the double major may be offered only at the Lincoln Center or the Rose Hill campus.

CIP Code

Art History Major

50.0703 - Art History, Criticism and Conservation.

Visual Arts Major

50.0799 - Fine Arts and Art Studies, Other.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

For the double major, a total of 15 courses is necessary.

Course	Title	Credits
ARHI 1100	Art History Introduction: World Art ¹	3
or ARHI 1101	Introduction to Art History: Europe	
or ARHI 1102	Introduction to Art History: Asia	
or ARHI 1103	Introduction to Art History: Americas	
VART 1135	Visual Thinking	3
VART 1150	Drawing I	4
Five additional visual arts electives ²		
One course from each art history area of study: ³		
Ancient/Medieval		
Renaissance/Baroque		
Modern		
Global		
Two art history elective courses ⁴		
ARHI 4600	Senior Seminar (taken in senior year, only offered fall semester)	4

¹ Students in the FCRH Honors Program may fulfill this requirement with HPRH 1205 Foundational Topics: Art. Students in the FCLC Honors Program may fulfill this requirement with HPLC 2501 Honors: Art History at the Museums.

² Any course with the VART subject code (p. 1700) may fulfill this requirement. It is assumed that the student will choose courses in more than one visual arts area of study (p. 373) and will pursue advanced courses in at least one of the areas of study (p. 373).

³ See the art history major (p. 180) for courses fulfilling each requirement.

⁴ Any course with the subject code ARHI (p. 1004) numbered 1102-4999 (except for ARHI 4900 Internship) may fulfill this requirement. Both elective courses should preferably be taken in the same area of study (Ancient/Medieval, Renaissance/Baroque, Modern, or Global).

It is suggested that the art history introduction course (ARHI 1100, ARHI 1101, ARHI 1102, or ARHI 1103), VART 1135 Visual Thinking, and VART 1150 Drawing I be completed by the end of sophomore year.

Availability

The double major in art history and visual arts is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Asian American Studies

Overview

Through research, teaching, and community service, the Asian American Studies Program promotes greater understanding of the lives of Asian American and Asian diasporic peoples, particularly as they intersect with broader themes such as race, gender, sexuality, capital, and empire.

Through a range of disciplinary and interdisciplinary methods and perspectives, students in the program will graduate with practical and theoretical knowledge of the histories, cultures, lived experiences, structural conditions, and ethico-political concerns of Asian diasporic peoples in the United States and around the world. In so doing, they will gain an array of critical thinking skills that will help them grow as citizen scholars informed by a global perspective and guided by an ethical commitment to social justice.

Programs

- Asian American Studies Minor (p. 183)

Asian American Studies Minor

Overview

Upon completing the minor in Asian American studies, students will

- understand fundamental concepts and disciplinary methods employed in Asian American studies, and know how to apply them thoughtfully and critically;
- understand major historical events that have shaped Asian racialization in western modernity, and know how to analyze their relevance to the contemporary moment;
- understand how Asian racialization relates to other forms of racialization, as well as other forms of social difference, and know how to analyze its role in broader social formations;
- know how to communicate their knowledge effectively so as to help empower Asian American and Asian diasporic communities, build meaningful coalitions among oppressed and/or marginalized social groups, and promote the cause of social justice; and
- possess a global frame of reference, informed by an ethical commitment to social justice.

Requirements

The minor in Asian American studies requires six (6) courses, as follows:

Course	Title	Credits
Required Course		
AAST 3000	Introduction to Asian American Studies	4
Electives		
Three AAST electives ¹		12
One of the following:		4
One additional AAST subject code course		
One additional AAST attribute code course ²		
One AASR attribute code course ³		
One of the following:		4
One advanced AFAM subject code course or AFAM attribute code course ⁴		
One advanced LALS subject code course or LALS attribute code course (note: both LALS options require approval of the AAST Program Director on the student's home campus)		5

¹ Courses with the subject code AAST or the attribute code AAST (except for AAST 3000, which is a required course) fulfill this requirement. See list below for courses with the AAST attribute code.

² See list below for courses with the AAST attribute code.

³ See list below for courses with the AASR attribute code.

⁴ A list of AFAM subject code and AFAM attribute code courses can be found in the relevant Bulletin section. AFAM subject code courses must be numbered 3000 or above.

⁵ A list of LALS subject code and LALS attribute code courses can be found in the relevant Bulletin section. LALS subject code courses must be numbered 3000 or above. The Program Director's approval will depend simply on whether the course focuses on themes and methods relevant to Asian American Studies, broadly understood (e.g., race, immigration, diaspora, colonialism, etc.), as opposed to, for example, Spanish Linguistics (LALS 3007) or Business Spanish (SPAN 2450).

Asian American studies courses

Courses in this group have the AAST attribute.

Course	Title	Credits
ANTH 3618	Asian America in New York City: An Ethnographic Exploration	4
ANTH 4616	Contemporary Issues in Asian America	4
ARHI 2528	Asian American Art	4
COLI 3357	Writing Asian America	4
COLI 3359	Asian Diasporic Literatures	4
COLI 4150	Race and Contemporary Film	4
COLI 4600	Anger in Asian American Literature and Culture	4
COLI 4603	Asian American Critique	4
COMC 3280	Representing Asians in Journalism and Media	4
ENGL 3357	Writing Asian America	4
ENGL 3359	Asian Diasporic Literatures	4
ENGL 3647	Seeing Stories: Reading Race and Graphic Narratives	4
ENGL 3838	Postcolonial Literature and Film	4
ENGL 4026	Seminar: Race and Speculative Fiction	4
ENGL 4150	Race and Contemporary Film	4
ENGL 4600	Anger in Asian American Literature and Culture	4
ENGL 4603	Asian American Critique	4
HIST 3929	History of Chinese in the Americas	3
SOCI 3428	Asian American Immigration and Community Organizing	4
THEO 3725	Buddhism in America: A Multimedia Investigation	3

Asian American studies-related courses

Courses in this group have the AASR attribute.

Course	Title	Credits
ANTH 4341	Race, Sex, and Science	4
ANTH 4344	Reproductive Technologies: Global Perspective	4
COLI 3802	Literature and Imperialism	4
ENGL 3802	Literature and Imperialism	4
SOCI 4408	Diversity in American Society	4

THEO 3130	Bible as Migration Literature: Then and Now	4
-----------	---	---

Availability

The minor in Asian American studies is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in Asian American studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Bioethics

The interdisciplinary bioethics minor introduces students to critical moral questions and informed ethical decision-making on issues related to individual, public, and global health; professional healthcare decision-making; health equity and justice; and health policy. Bioethics minors will gain an interdisciplinary perspective on these topics through required and elective courses, including: an introductory bioethics course, thematic courses in the humanities and sciences, a values course and a research ethics capstone course. The minor in bioethics is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and the School of Professional and Continuing Studies.

Program Activities

Lectures and Symposia

Bioethics students have valuable opportunities to attend and participate in Center for Ethics Education–sponsored activities, including major symposia, lectures, and Ethics Colloquium Series events and conferences.

Ethics Competitions

The Center for Ethics Education sponsors Fordham's Intercollegiate Ethics Bowl team (through CEED 3600 Ethics in Action: Intercollegiate Ethics Bowl), two ethics essay competitions (the Chynn Undergraduate Prize in Ethics & Morality and the Ethics & Social Justice Essay Prize), and the NYC High School Ethics Bowl competition.

Professional Development, Career Advising, and Graduate Activities

Bioethics students have an opportunity to make a professional presentation on a bioethics topic of interest at the Fordham Undergraduate Research Symposium (through the required course PSYC 4245 /SOCI 4245 Ethics in Research). The minor also provides valuable career and graduate school resources and panels on careers in ethics and advising by program directors and affiliated faculty. Bioethics minors also have opportunities to interact with students enrolled in the M.A. Ethics and Society program through lectures, presentations, and career development events.

For more information

Visit the Bioethics program web page.

Programs

- Bioethics Minor (p. 185)

Bioethics Minor Requirements

The minor consists of six courses.

Course	Title	Credits
THEO/CEED 3856	Introduction to Bioethics	4
CEED/SOCI/PSYC 4245	Ethics in Research	4
or PHIL 4304	The Philosophy and Economics of Law	
One course in Humanities		3 to 4
One course in Social and Natural Science		3 to 4
One course in Values		4
One additional course in Humanities OR Social/Natural Science ¹		3 to 4

¹ Students who have not completed a Biological Sciences (BISC) or biologically based Life Science (LSCI) course as part of the core curriculum or otherwise will be required to take one of the following natural science or biological science course offerings to fulfill the Bioethics Natural Science requirement:

- NSCI 1030 Human Function and Dysfunction
- BISC 1000 Life on the Planet Earth
- BISC 1001 Human Biology
- BISC 1002 Ecology: A Human Approach
- BISC 1010 Foundations of Biology

Humanities courses

Courses in this group have the BEHR attribute.

Course	Title	Credits
AMCS 4950	Christianity and Gender/Sexual Diversity: Interdisciplinary Perspectives	4
CEED 3600	Ethics in Action: Intercollegiate Ethics Bowl	4
COLI 4570	Films of Moral Struggle	4
COMC 3370	Ethical Issues in Media	4
ENGL 4137	Hysteria, Sexuality, and the Unconscious	4
HIST 4137	Hysteria, Sexuality, and the Unconscious	4
HIST 4705	Seminar: Disease in the Middle Ages	4
HIST 4913	Social Darwinism: Theme and Variations in Global Context	4
MLAL 3000	Gender and Sexuality Studies	4
PHIL 3266	Philosophy of Science	4
PHIL 3710	Healthcare Justice	4
PHIL 3712	Global Environment and Justice	4
PHIL 3715	Kant on Morality and Religion	4
PHIL 3940	Neuroethics	4
PHIL 3980	Contemporary Issues in Metaethics	4
PHIL 4001	Politics and Biopower	4
PHIL 4044	Modern Ethical Theories	4
PHIL 4310	Human Rights in Context	4
PHIL 4484	Freedom and Responsibility	4
THEO 3827	Bible and Human Sexuality	4

THEO 4010	Death and Dying	4
THEO 4027	The Ethics of Life	4
THEO 4035	Professional Responsibilities and Organizational Ethics	4
THEO 4036	Human Nature After Darwin	4
THEO 4520	Animals, Angels, and Aliens: Beyond the Human in Christian Thought	3
THEO 4870	Economic Foundations of Catholic Social Teaching	4
THEO 4950	Christianity and Gender/Sexual Diversity: Interdisciplinary Perspectives	4

Social and Natural Science courses

Courses in this group have the BESN attribute.

Course	Title	Credits
ANTH 2619	Magic, Science, and Religion	4
ANTH 3260	Politics of Reproduction	4
ANTH 3570	Applied Human Rights	1
ANTH 4114	Anthropology of Health Healing and Social Justice	4
ANTH 4344	Reproductive Technologies: Global Perspective	4
BISC 1000	Life on the Planet Earth	3
BISC 1001	Human Biology	3
BISC 1002	Ecology: A Human Approach	3
BISC 1010	Foundations of Biology	3
BISC 1403	Introductory Biology I	3
BISC 4035	Ecology and Economics of Food Systems	4
ENST 4900	Environmental Internship and Media Advocacy	4
NSCI 1030	Human Function and Dysfunction	3
PJST 3200	Environmental Justice	4
POSC 3131	Politics, Urban Health, and Environment	4
POSC 3225	Human Trafficking and the Law	4
PSYC 3100	Health Psychology	4
PSYC 3110	Cognitive Neuroscience	4
PSYC 3600	Multicultural Psychology	4
PSYC 3610	Global Health and Psychology	4
PSYC 4310	Aging and Society	4
SOCI 1102	Introduction to Sociology: Health Focus	3
SOCI 3021	Sociology of Medicine	4
SOCI 3114	Sociology of Health and Illness	4
SOCI 3120	Controversies in Religion and International Relations	4
SOCI 3249	For the Death of Me! Socio-Cultural Perspectives on Death and Dying	4
SOCI 3260	Politics of Reproduction	4
SOCI 3457	Medicine, Science, and Social Movements	4
SOCI 4105	Religion, Gender, and Sexuality	4
SOCI 4962	Health/Inequality in the US	4

Values courses

Courses in this group have the BEVL attribute.

Course	Title	Credits
COLI 4570	Films of Moral Struggle	4
ENGL 4403	Extraordinary Bodies	4
FITV 4570	Films of Moral Struggle	4
PHIL 3970	Humanity's Value	4
PHIL 4418	Issues of Life and Death	4
PHIL 4473	War and Peace: Just War Theory	4
PSYC 4900	Psychology and Human Values	4
PSYC 4920	Youth, Values, and Society	4
PSYC 4930	Codes for Mental Health Services	4
THEO 4026	Theologies of Peace	4
THEO 4027	The Ethics of Life	4
THEO 4028	Religion & Bioethics	4
THEO 4030	Moral Aspects of Medicine	4
THEO 4847	Theologies of Liberation	4

It is presumed that bioethics minor students will have completed the core course Philosophical Ethics (PHIL 3000) by the end of their junior year.

Should faculty sabbaticals or other developments create a situation that limits the availability of courses, the directors of the program would have the authority to amend the guidelines regarding the distribution of electives.

Availability

The minor in bioethics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in bioethics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Biological Sciences

The curriculum in the biological sciences provides a comprehensive understanding of the principles underlying life's processes, from the molecular level through the biosphere. Many of the courses offered have lecture and laboratory components. This ensures that students become scientists capable of making significant contributions to the field. Majors have the opportunity to participate in cutting-edge research under the mentorship of a faculty member in the department. This affords students the opportunity to develop their organizational, technical, and analytical skills while using the most up-to-date techniques and instrumentation. Students conducting original research are expected to communicate their findings to the scientific community through, for example, their participation in Fordham College's annual Undergraduate Research Symposium. Students doing meritorious research are guided to publish their work in nationally recognized science journals.

The department offers two undergraduate degrees: the bachelor of science (B.S.) and the bachelor of arts (B.A.) in the biological sciences. Both degree tracks ensure the major's exposure to the broad scope of the discipline while providing the flexibility to choose upper-level courses that focus on one or more of the sub disciplines in greater depth. The curriculum gives students a strong foundation from which they can pursue studies leading to a career in medicine, dentistry, veterinary medicine, research and development, education, industry, forensics, or laboratory analysis.

Accelerated Master's Program

Please read the Graduate School of Arts and Sciences Accelerated Master's Programs (p. 137) section for more information. Interested students must apply by the time they register for the fall semester of their senior year but are encouraged to apply earlier. Students opting for early admission to the M.S. program must consult with their adviser and the associate chair for graduate studies before registering for graduate courses. Applications are made online through the Graduate School of Arts and Sciences website and do not need to include GRE scores unless the student is planning to apply for financial aid after completing the bachelor's degree.

The minimum GPA required for eligibility is 3.5. This policy applies to students registered in FCRH, FCLC, and PCS. Candidates will begin their graduate studies in their senior year and will carry elective credit in the summer between their fourth and fifth years. Courses taken as part of the early admissions option must be approved by the department's associate chair for graduate studies.

Program Activities

Biology Colloquium

Students are encouraged to attend the weekly Biology Colloquium which features presentations of outstanding research by visiting scientists as well as by the department's own faculty and graduate students.

Research Opportunities

There are many varied research opportunities available to biology majors. A student interested in a faculty member's research should meet with that faculty member and discuss a program of independent laboratory or field research under that faculty member's mentorship. The student may elect to register for two semesters of research (for four credits each semester), including writing and defending a thesis, during the senior year in lieu of two elective biology courses (see BISC 4792 Senior Thesis Research in the course listings). Another alternative is enrollment in a research tutorial for a maximum of four credits in lieu of one biology elective (see BISC 4999 Research Tutorial in the course listings). If neither of the above options is desirable, a student may volunteer on an extracurricular basis to participate in a faculty member's research. Details may be obtained in the department office. Fordham University has formal affiliations with the New York Botanical Garden, the Wildlife Conservation Society (Bronx Zoo), Albert Einstein College of Medicine, and Montefiore Hospital.

For more information

Visit the Biology department web page.

Contribution to the Core

The Department of Biological Sciences offers courses numbered BISC 1000 Life on the Planet Earth-BISC 1010 Foundations of Biology, which satisfy the core life-science component of the natural science requirement in the Fordham College Core Curriculum. The two course sequence, BISC 1403 Introductory Biology I-BISC 1404 Introductory Biology II, when taken in sequence, will fulfill both natural science requirements (physical science and life-science).

Programs

- Biological Sciences Major (p. 187)
- Biological Sciences Minor (p. 189)

Biological Sciences Major

Overview

The science of biology spans an extraordinary range of subjects, from molecular biology through ecosystem ecology. Biology also underpins some of the most important challenges and opportunities in human society, such as understanding human health and disease, managing agriculture and developing technologies to feed the global population, and predicting responses of organisms to climatic changes and figuring out ways to protect biological diversity. A student seeking a biology major at Fordham is offered a diverse and rigorous program that encompasses the breadth of this field and provides them the tools they need to address these challenges.

The broad learning goals of our biological sciences program are to:

- Cultivate a life-long curiosity about science and all aspects of biology,
- Provide an understanding of the use of the scientific method in biological investigations, and gain practical experience and technical skills using these methods, and
- Give students a deeper understanding of basic concepts, principles, ideas and theories in biology, so that students become knowledgeable and literate in their field.

We help our students develop an academic program that best fits their interests and career goals. Through this, our graduates pursue diverse careers in fields like healthcare, education, research, and work with government agencies, non-profit organizations, or private-sector research laboratories.

All majors in our undergraduate program begin with Introductory Biology courses BISC 1403 + BISC 1414; and BISC 1404 + BISC 1414 and General Chemistry courses CHEM 1321 + CHEM 1331; and CHEM 1322 + CHEM 1322. From this foundation, Biology majors take more advanced courses, including General Genetics (BISC 2539 + BISC 2549) and Organic Chemistry (CHEM 2521 + CHEM 2541; and CHEM 2522 + CHEM 2542). These courses all include laboratory training and experience. Students may also participate in hands-on research projects working under the mentorship of biology research faculty in a research tutorial (BISC 4999) or senior research thesis (BISC 4792).

A grade of C- is the minimum accepted grade for all courses to count toward fulfilling requirements of the biology major (note: medical schools often require at least a C).

For questions about the program, students can contact the associate chair at undergradbisc@fordham.edu.

Requirements

The Department of Biological Sciences offers two undergraduate degrees: the Bachelor of Science (B.S.) and the Bachelor of Arts (B.A.). Beyond the chemistry, physics, and math requirements, majors must complete a minimum of nine courses in biology for a B.S. degree and seven for a B.A. degree. Lecture and lab courses must be taken concurrently.

The program of biology courses is structured in the following way:

Course	Title	Credits
Biology Courses		
<i>Core Courses</i>		
BISC 1403 & BISC 1413	Introductory Biology I and Introductory Biology Lab I	5
BISC 1404 & BISC 1414	Introductory Biology II and Introductory Biology Lab II	5
BISC 2539 & BISC 2549	General Genetics and General Genetics Lab	5
BISC 2561 & BISC 2571	Ecology and Ecology Lab	5
<i>Distribution Courses</i>		
Select a minimum of two of the following:		
BISC 3221 & BISC 3231	Human Anatomy and Human Anatomy Lab	
BISC 3132 & BISC 3142	Human Physiology and Human Physiology Lab	
BISC 3405 & BISC 3415	Plant Biology and Plant Biology Lab	
BISC 3521	Biochemistry	
BISC 3643 & BISC 3653	Microbiology and Microbiology Lab	
BISC 3752	Molecular Biology	
BISC 3754	Cell Biology	
Chemistry Courses		
CHEM 1321 & CHEM 1331	General Chemistry I and General Chemistry Lab I	6
CHEM 1322 & CHEM 1332	General Chemistry II and General Chemistry Lab II	6
CHEM 2521 & CHEM 2541	Organic Chemistry I and Organic Chemistry Lab I	6
CHEM 2522 & CHEM 2542	Organic Chemistry II and Organic Chemistry Lab II	6
Physics Courses		
Select one of the following sequences:		
<i>Sequence 1:</i>		
PHYS 1701 & PHYS 1511	Physics I and Physics I Lab	
PHYS 1702 & PHYS 1512	Physics II and Physics II Lab	
<i>Sequence 2:</i>		
PHYS 1501 & PHYS 1511	General Physics I and Physics I Lab	
PHYS 1502 & PHYS 1512	General Physics II and Physics II Lab	
Calculus Course ²		
Select one of the following:		
MATH 1203	Applied Calculus I	
MATH 1204	Applied Calculus II	
MATH 1206	Calculus I	
MATH 1207	Calculus II	
Elective Courses		

Select three elective BISC courses for the B.S. degree and one for the B.A. degree³

¹ Either sequence of introductory courses is a prerequisite for all other biology courses in the major.

² A score of 4 or 5 in AP Calculus AB or BC will fulfill the Mathematics requirement.

³ Elective courses comprise all courses with the attribute BIEL (see list below). Such courses include additional Distribution courses **beyond** the two needed to meet Distribution courses requirement. Courses counted toward the Distribution course requirement **cannot** be double-counted toward the Elective course requirement. Only one tutorial (BISC 4999) can count toward the major.

Elective courses

Courses in this group have the BIEL attribute.

Course	Title	Credits
BISC 3000	Environmental Science	3
BISC 3132	Human Physiology	3
BISC 3221	Human Anatomy	3
BISC 3244	Evolutionary Biology	3
BISC 3405	Plant Biology	3
BISC 3466	Urban Ecology & Evolution	3
BISC 3521	Biochemistry	3
BISC 3643	Microbiology	3
BISC 3752	Molecular Biology	3
BISC 3754	Cell Biology	3
BISC 3893	Introduction to Virology	3
BISC 4530	Cancer Biology and Signaling	3
BISC 4532	Neuroscience	3
BISC 4575	Conservation Biology	4
BISC 4642	Animal Behavior	4
BISC 4693	Developmental Biology	3
BISC 4792	Senior Thesis Research	4
BISC 4999	Research Tutorial	0-4
CHEM 4221	Biochemistry I	3
ENVS 3000	Environmental Science	3

It is recommended that first year students take the following:

Course	Title	Credits
<i>Calculus (one of the following):</i>		
MATH 1206	Calculus I	
MATH 1207	Calculus II	
MATH 1203	Applied Calculus I	
MATH 1204	Applied Calculus II	
BISC 1403 & BISC 1413	Introductory Biology I and Introductory Biology Lab I	5
CHEM 1321 & CHEM 1331	General Chemistry I and General Chemistry Lab I	6
BISC 1404 & BISC 1414	Introductory Biology II and Introductory Biology Lab II	5

CHEM 1322 & CHEM 1332	General Chemistry II and General Chemistry Lab II	6
--------------------------	--	---

Note that BISC 1403, BISC 1404, CHEM 1321, and CHEM 1322 (with their respective labs) are prerequisites for all advanced biology courses.

The following requirement is best fulfilled in sophomore year:

Course	Title	Credits
CHEM 2521 & CHEM 2541	Organic Chemistry I and Organic Chemistry Lab I	
CHEM 2522 & CHEM 2542	Organic Chemistry II and Organic Chemistry Lab II	

The following requirement is best fulfilled in junior year:

Course	Title	Credits
Physics sequence options:		
<i>Sequence 1:</i>		
PHYS 1701 & PHYS 1511	Physics I and Physics I Lab	
PHYS 1702 & PHYS 1512	Physics II and Physics II Lab	
<i>Sequence 2:</i>		
PHYS 1501 & PHYS 1511	General Physics I and Physics I Lab	
PHYS 1502 & PHYS 1512	General Physics II and Physics II Lab	

C- is the minimum accepted grade for all courses in the biology major. All majors must meet with their adviser each semester prior to registration to have their course schedules approved.

The following courses are college Core Curriculum Life Science courses and are not applicable to the major:

Course	Title	Credits
BISC 1000	Life on the Planet Earth	
BISC 1001	Human Biology	
BISC 1002	Ecology: A Human Approach	
BISC 1005	Aids: A Conspiracy of Cells	
BISC 1008	The Finch, the Seed, and the Storm: Adventures in Contemporary Evolution	
BISC 1010	Foundations of Biology	

Biology majors are expected to take all of their required major courses at Fordham. Exceptions may be made on a case-by-case basis for certain rare and compelling reasons. Under no circumstances can more than two external courses be transferred toward the major.

Note that online courses from other universities are not acceptable substitutes for required courses.

Availability

The major in biological sciences is available at Fordham College at Rose Hill. Students in Fordham's School of Professional and Continuing Studies may major in biological sciences only if they receive the approval of their advising dean and/or department, and their schedules are

sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

26.0101 - Biology/Biological Sciences, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Biological Sciences Minor

Overview

The science of biology spans an extraordinary range of subjects, from molecular biology through ecosystem ecology. Biology also underpins some of the most important challenges and opportunities in human society, such as understanding human health and disease, managing agriculture and developing technologies to feed the global population, and predicting responses of organisms to climatic changes and figuring out ways to protect biological diversity. A student seeking a biology minor at Fordham is offered a diverse and rigorous program that encompasses the breadth of this field and provides them the tools they need to address these challenges.

The broad learning goals of our biological sciences program are to:

- Cultivate a life-long curiosity about science and all aspects of biology,
- Provide an understanding of the use of the scientific method in biological investigations, and gain practical experience and technical skills using these methods, and
- Give students a deeper understanding of basic concepts, principles, ideas and theories in biology, so that students become knowledgeable and literate in their field.

We help our students develop an academic program that best fits their interests and career goals. Through this, our graduates pursue diverse careers in fields like healthcare, education, research, and work with government agencies, non-profit organizations, or private-sector research laboratories.

A grade of C- is the minimum accepted grade for all courses to count toward fulfilling requirements of the biology minor (note: medical schools often require at least a C).

For questions about the program, students can contact the associate chair at undergradbisc@fordham.edu.

Requirements

The course requirements for the biological sciences minor depend on the student's major.

- Biochemistry and chemistry majors must select six biological sciences major core courses (p. 187) or courses with the BIEL (elective) attribute.
- Environmental science, general science, and integrative neuroscience majors must select eight biological sciences major core courses (p. 187) or courses with the BIEL (elective) attribute.
- All other majors must complete four biological sciences major core courses (p. 187) or courses with the BIEL (elective) attribute and two courses in chemistry (subject code CHEM) (p. 1035) at or above CHEM 1300.

C- is the minimum grade credited toward the minor. No more than two external classes can be transferred toward the minor.

Note that online courses from other universities are not acceptable substitutes for required courses.

Elective Courses

Courses in this group have the BIEL attribute.

Course	Title	Credits
BISC 3000	Environmental Science	3
BISC 3132	Human Physiology	3
BISC 3221	Human Anatomy	3
BISC 3244	Evolutionary Biology	3
BISC 3405	Plant Biology	3
BISC 3466	Urban Ecology & Evolution	3
BISC 3521	Biochemistry	3

Availability

The minor in biological sciences is available at Fordham College at Rose Hill. Students in Fordham's School of Professional and Continuing Studies may minor in biological sciences only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Business Administration

Entrepreneurs pursue innovative ideas through unbridled commitment. Accountants keep businesses honest. Marketing executives craft campaigns that excite consumers. What do these disparate careers have

in common? A rock-solid educational foundation: a degree in business administration.

Whether pursuing the major or a minor, studying business administration allows for a breadth of knowledge across multiple disciplines from finance and information systems to psychology and economics.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

Programs

- Business Administration Major (p. 190)
- Business Administration Minor (p. 190)

Business Administration Major

This major is only available to Gabelli School students on the Rose Hill campus.

The Business Administration major allows students to customize their business degrees by picking one primary concentration and combining that with other primary and secondary concentrations as well as business and/or liberal arts minors.

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

CIP Code

52.0201 - Business Administration and Management, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Students pursuing a major in Business Administration must select one primary concentration and may also complete one or more secondary concentrations or minors. Minors can be from the Gabelli School (p. 82), Fordham College at Lincoln Center (p. 73), or Fordham College at Rose Hill (p. 62).

Available primary concentrations include:

- Accounting (p. 153)
- Business Economics (p. 191)
- Consulting (p. 365)
- Entrepreneurship (p. 367)
- Finance (p. 251)
- Information Systems (p. 268)
- Management (p. 308)
- Marketing (p. 310)
- Social Innovation (p. 346)

Available secondary concentrations include:

- Accounting (p. 153)
- Alternative Investments (p. 250)
- Business Economics (p. 191)
- Communications and Media Management (p. 217)
- Consulting (p. 365)
- Credit (p. 251)
- Digital Marketing (p. 309)
- Entrepreneurship (p. 367)
- Finance (p. 251)
- Fintech (p. 251)
- Information Systems (p. 268)
- Integrated Marketing Communications (p. 310)
- Global Business (p. 256)
- Management (p. 308)
- Marketing (p. 310)
- Marketing Analytics (p. 311)
- Personal Development and Leadership (p. 308)
- Process and Quality Analytics (p. 269)
- Social Innovation (p. 346)
- Sports Business (p. 364)
- Strategic Branding (p. 311)
- Value Investing (p. 252)

Business Administration Minor

In conjunction with the Gabelli School of Business, students in Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC) or Fordham School of Professional and Continuing Studies (PCS) may complete a minor in business administration. Students minoring in business administration as part of a Bachelor of Arts or Bachelor of Science degree must complete a minimum of 120 credits to earn their degrees (compared to 124 credits), since many courses for the minor bear three credits.

The business administration minor complements the liberal arts core by providing a clear, concise way of analyzing issues in economics and business. It can be helpful to students who plan to look for a job after graduation or to pursue the study of law or business.

The required business courses for the minor are offered regularly on both the Rose Hill and Lincoln Center campuses. Students who plan to minor in business administration may take Basic Macroeconomics and Basic Microeconomics to fulfill both the social science requirement and the business minor. With the permission of the adviser to the business minor, students who complete a course equivalent to ECON 2140 Statistics I in their major may substitute it for the statistics requirement. Economics

majors may count Basic Macroeconomics, Basic Microeconomics, and Statistics I toward their major and the business minor.

Learning Goals

- Students will demonstrate a substantive knowledge of key business concepts and theories.
- Students will demonstrate competency in analytical and technical skills in decision-making.
- Students will demonstrate competency in oral and written communication.
- Students will demonstrate capacity for ethical decision-making and an understanding of how business can positively impact society.
- Students will demonstrate an awareness and competency in effectively working in teams and dealing with globally diverse situations.

Requirements

The business administration minor consists of eight courses.

Course	Title	Credits
ECON 1100	Principles of Macroeconomics	3
ECON 1200	Principles of Microeconomics	3
ECON 2140	Statistics I ¹	4
ACBU 2222	Principles of Financial Accounting	3
CBBU 1001	The Ground Floor: Starting and Succeeding at the Gabelli School of Business	3

Two of the following:

BLBU 2234	Legal Framework of Business
CMBU 2665	Business Communication
INSY 2300	Information Systems
LPBU 3223	Principles of Management
MKBU 3225	Marketing Principles
FNBU 3221	Financial Management

One upper level business elective ²

¹ Students may also take any of the following courses to fulfill this requirement:

- MATH 3007 Statistics
- PSYC 2000 Statistics
- SOCI 2606 Social Science Statistics
- SOCI 2607 Social Science Research and Statistics

² Upper level business electives are any 3000-4999 numbered courses within a Gabelli School area. The upper level business elective should be a continuation of study within an area already examined through a core course for the minor. Students may elect to take ACBU 2223 Principles of Managerial Accounting as their one upper level business elective.

Availability

Students in Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC), and Fordham's School of Professional and Continuing Studies (PCS) may minor in business administration.

Business Economics

Understanding economics is essential for everyone in business. Whether your career is in finance, accounting, marketing, information technology, or another discipline, a comprehension of how the world economy works is key. The Gabelli School's business economics program ensures that every student has a strong handle on the forces that push, pull, and shape the economies of the United States and other nations.

Business economics differs from standard economics in that it emphasizes practical applications in the world of commerce, but the courses are still drawn from Fordham's economics department. Gabelli School students who want to focus on business economics can choose a primary concentration, a secondary concentration, or a minor.

These concentrations and minor might be especially attractive to students who envision themselves attending graduate school in business, because microeconomic theory (or managerial economics) and macroeconomic analysis are required courses in many graduate programs. Business economics coursework also is valued by potential employers, for students choosing work rather than further study after graduation.

For course descriptions, please refer to the economics department listings in the Fordham College at Rose Hill section of this bulletin.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

Visit the Finance and Business Economics area web page.

Programs

- Concentration in Business Economics (p. 191)
- Minor in Economics (Economics Department) (p. 233)

Concentration in Business Economics Requirements

The concentration in Business Economics is available to Gabelli students at Rose Hill.

Primary concentration

Course	Title	Credits
ECON 3116	Intermediate Macroeconomics	4
ECON 3118	Intermediate Microeconomics	4

Two 3000-level or higher economics courses

For the latter two courses, the economics department offers a wide array of courses in monetary and financial economics, international economics and development, economics of law, industrial economics, and public sector economics.

Secondary concentration

Students who want to pursue business economics as a secondary concentration are required to complete three 3000-level or higher economics courses.

A student electing to pursue one of these routes should consult with his or her class dean and/or the associate chair of the economics department.

Available courses

Any course with the subject code ECON (p. 1162) numbered 3000 or higher in the economics department may fulfill these course requirements.

Business Law and Ethics

Business law and ethics courses highlight important concepts for students entering the business world.

The business law courses are designed to provide a strong foundation in the areas of contract law, agency, partnerships, and corporations. The area also offers courses in a variety of other legal topics, such as Law of Commercial Transactions (recommended for accounting students pursuing their CPA license), Securities Law, Employment Law, and Sports and the Law (required for the secondary concentration in sports business).

The business ethics classes address issues involving values and social norms in the business community. These classes focus on case discussions and role-play simulations to help put theory into practice.

The concepts discussed in all law and ethics classes expose students to salient issues that affect modern commerce. Asking our students to think about contemporary legal and ethical issues gives them a competitive edge. And they also consider a question that is central to business education at Fordham: Should a business exist purely for the purpose of profit, or should it contribute to society in a greater way?

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

View the Business Law and Ethics Area web page.

Programs Minor

- Business Law and Ethics Minor (p. 192)

Secondary Concentration

- Concentration in Business Law and Ethics (p. 192)

Related Concentration

- Concentration in Sports Business (p. 364)

Business Law and Ethics Minor Requirements

The minor in business law and ethics is available to Gabelli School students. It requires six courses, two of which are already part of the business core curriculum (p. 83).

Course	Title	Credits
BLBU 2234	Legal Framework of Business	3
BLBU 3443	Ethics in Business	3
Four upper-level business law courses ^{1,2}		

¹ Any course from subject code BLBU (p. 1026) 3444 or higher will fulfill this requirement. Also, Law and Economics (ECON 3453) may be applied to this minor, as may Commercial Transactions (BLBU 3436).

² Gabelli students majoring in Public Accountancy or Public Accounting may count Ethics in Financial Reporting and Accounting (ACBU 4646) towards the minor.

Concentration in Business Law and Ethics

Courses in business law and business ethics are key to success in the working world.

This is why every Gabelli School student takes a core-curriculum course in each: Legal Framework of Business and Business Ethics.

In the law class, students learn the fundamental rules that govern doing business in the United States—and find out how to apply them in a shifting business landscape. In the ethics course, students explore the issues that affect the stakeholders in a business relationship, debating what constitutes good or bad conduct.

They also consider a question that is central to business education at Fordham: Should a business exist purely for the purpose of profit, or should it contribute to society in a greater way?

Requirements

The following three courses are required to complete this secondary concentration:

Course	Title	Credits
Two courses with the BLEA attribute.		
One additional course with the BLEA attribute OR one course with the BLEB attribute.		

The following courses have the BLEA attribute:

Course	Title	Credits
BLBU 3436	Commercial Transactions	3
BLBU 4431	ST: White-Collar Crime	3
BLBU 4434	ST: Business Organizations Law	3
BLBU 4436	ST: Business & Ethics of Sports	3
BLBU 4437	ST: International Bus Ethics	3
BLBU 4438	ST: Law, Business and the Arts	3
BLBU 4449	ST: Sports and the Law	3
BLBU 4450	ST: Employment Law	3
BLBU 4452	ST: Securities Law	3

The following courses have the BLEB attribute:

Course	Title	Credits
ACBU 4646	Ethics in Financial Reporting and Accounting	3
CMGB 7525	Cross Cultural Negotiation and Communication	3
ECON 3453	Law and Economics	4
FNBU 3440	Corporate Financial Policy	3
FNBU 4464	ST: Compliance and Risk Management	3
LPBU 3226	Exploring Entrepreneurship	3
MKBU 3448	ST: Social Marketing	3

Chemistry and Biochemistry Overview

The Department of Chemistry and Biochemistry offers a B.S. in chemistry and has faculty with expertise in organic, physical, analytical, and inorganic chemistry and biochemistry. The department is committed to providing its majors with a strong foundation in modern chemical theory and practice that prepares them for further study in graduate or professional schools or for employment in chemical research and industry. To this end, beyond required coursework, we have all our majors participate in ongoing research projects with faculty mentors in which they learn to work independently, develop organizational and scientific writing skills, engage in responsible and safe work habits, and are trained in the use of state-of-the-art instrumentation. Their work frequently leads to publications in peer-reviewed journals and presentations at regional and national meetings of scientific organizations. The department is accredited by the American Chemical Society (ACS) and actively supports a chapter of Sigma Xi.

The Chemistry and Biochemistry Department at FCRH is certified by the American Chemical Society, and an ACS certificate of achievement is awarded to majors contingent upon certain elective choices. These include two additional laboratory courses (CHEM 4231 Biochemistry Lab I and CHEM 4432 Inorganic Chemistry Lab), at least one advanced chemistry elective lecture course, and at least two semesters of research under the supervision of a faculty member that requires a capstone research report. Chemistry majors who are enrolled in one of the pre-

professional programs meet the above degree requirements subject to certain course substitutions.

Opportunities for student chemistry research participation with a faculty member are available subject to departmental approval. For first years, CHEM 1990 Introduction to Research is a zero credit P/F course that provides an introduction to modern research practice. Upperclassmen may take CHEM 3990 Directed Research, which is a one credit P/F course, or CHEM 4990 Independent Research, which is a variable credit (1 credit per 5 hrs contact) graded course that requires a capstone paper subject to the ACS guidelines. Students must take at least one semester of CHEM 3990 as a prerequisite to CHEM 4990.

For more information

Visit the Chemistry and Biochemistry department web page.

Contribution to the Core

Chemistry and Biochemistry offers courses numbered CHEM 1100-1110, which count as a core physical science course to fulfill part of the natural science core requirement. The two course sequence CHEM 1321 General Chemistry I/CHEM 1331 General Chemistry Lab I-CHEM 1322 General Chemistry II/CHEM 1332 General Chemistry Lab II when taken in sequence will fulfill both natural science course requirements (physical and life science).

Programs

- Biochemistry Minor (p. 196)
- Chemistry Major (p. 197)
- Chemistry Minor (p. 199)

Biochemistry Major Overview

Biochemistry is a highly interdisciplinary science that focuses on the study of the chemistry of living systems and understanding their structure and function at the molecular level. In particular, biochemistry lays the foundation for deciphering the mechanisms involved in many diseases that plague the world. Students will learn how biomolecules such as proteins, nucleic acids, fats, lipids, and carbohydrates interact in biological processes, and how structures of these biomolecules relate to function and regulation of metabolic pathways in cells, tissues, and organisms as a whole.

The biochemistry major will prepare students to be the next generation of scientists with a broad range of career options in biotechnology, molecular and cellular biochemistry, medicine, bioengineering, and pharmacology, as well as in allied health fields, including clinical biochemistry, forensic science, the physician associate profession, cosmetics, food technology, and nursing.

The program will also lay a foundation for students to compete for positions in top graduate programs and professional schools in medicine, biomedical engineering, and biomedical sciences.

Learning Goals and Expected Outcomes

The biochemistry program provides students with a solid foundation to pursue a career in medicine/dentistry or other allied health related professions; pursue research at a top ranked graduate school; forensic science; cosmetic chemistry and beyond. For the major, students can pursue a track of their choice (American Chemical Society track or General track). The biochemistry minor also helps students develop an in-depth understanding of fundamental biochemical concepts and techniques.

1. Learn about the structure, and function of biological building blocks such as amino acids, lipids and fats; carbohydrates and their implications in metabolism and disease.
2. Students should be able to decipher how biomolecules interact chemically and biologically; and understand their key role in molecular interactions at the cellular level.
3. Understand basic concepts of drug design.
4. Apply thermodynamic and kinetic principles to elucidate molecular driving forces in biochemical reactions and mechanisms of enzymes.
5. Learn about biological pathways implicated in diseases including cancer, diabetes and obesity; and neurodegenerative diseases.
6. Be able to work on a research plan/ proposal, conduct investigations and perform analyses. Students will learn to analyze and interpret data, including critically analyze experimental design and data interpretation in the biochemical literature.
7. Develop effective biochemical laboratory skills and design experiments that entail the use of biochemical/biophysical and bioanalytical methods.
8. Become familiar with the use instrumentation in modern biochemistry.
9. Be able to demonstrate quantitative analysis and biocomputational skills.
10. Effectively communicate the language of biochemistry through written and oral communication skills.

CIP Code

26.0202 - Biochemistry.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The biochemistry major is offered in two tracks (p. 195): an American Chemical Society (ACS)-certified track (p. 196) and a general track (p. 195).

Students interested in pursuing courses with an emphasis on chemistry in relation to physical, analytical, and advanced structural and molecular aspects of biochemistry may choose to opt for the ACS track. On the other hand, students inclined more toward cell, molecular, and structural aspects of biochemistry in addition to biocomputational and physiological approaches may pursue the general track. Both tracks require students to participate in research.

Students interested in pursuing more in-depth organic chemistry laboratory coursework have the option of taking CHEM 2531 Organic Chemistry Lab I for Chem Majors and CHEM 2532 Organic Chemistry Lab II for Chem Majors in lieu of CHEM 2541 and CHEM 2542.

Research courses (CHEM 1990 Introduction to Research, CHEM 3990 Directed Research, and CHEM 4990 Independent Research) are available. Students should contact specific faculty for research opportunities based on their research interests.

Chemistry majors and biological sciences majors may not double major in biochemistry, but they may pursue a biochemistry minor (p. 196). Integrative neuroscience majors pursuing a concentration in systems/computational neuroscience or in cognitive neuroscience may double major in biochemistry. However, integrative neuroscience majors pursuing a concentration in cell and molecular neuroscience may not double major in biochemistry.

A minimum grade of C or higher is required in the following foundational course sequences (lecture and lab) listed below: general chemistry, biology, organic chemistry, and mathematics.

Course	Title	Credits
Foundational Courses		
<i>General Chemistry</i>		
Select one of the following (Rose Hill students take CHEM; Lincoln Center students take NSCI):		6
CHEM 1321 & CHEM 1331 & CHEM 1311	General Chemistry I and General Chemistry Lab I and General Chemistry I Recitation	
NSCI 1321 & NSCI 1331	General Chemistry Lecture I and General Chemistry Lab I	
Select one of the following (Rose Hill students take CHEM; Lincoln Center students take NSCI):		6
CHEM 1322 & CHEM 1332 & CHEM 1312	General Chemistry II and General Chemistry Lab II and General Chemistry II Recitation	
NSCI 1322 & NSCI 1332	General Chemistry Lecture II and General Chemistry Lab II	
<i>Biology</i>		
Select one of the following (Rose Hill students take BISC; Lincoln Center students take NSCI):		5
BISC 1403 & BISC 1413	Introductory Biology I and Introductory Biology Lab I	
NSCI 1403 & NSCI 1413	General Biology Lecture I and General Biology Lab I	
NSCI 1423 & NSCI 1433	Concepts in Biology Lecture I and Concepts in Biology Lab I	
Select one of the following (Rose Hill students take BISC; Lincoln Center students take NSCI):		5
BISC 1404 & BISC 1414	Introductory Biology II and Introductory Biology Lab II	
NSCI 1404 & NSCI 1414	General Biology Lecture II and General Biology Lab II	
NSCI 1424 & NSCI 1434	Concepts in Biology Lecture II and Concepts in Biology Lab II	
<i>Organic Chemistry</i>		
Select one of the following (Rose Hill students take CHEM; Lincoln Center students take NSCI):		6

CHEM 2521 & CHEM 2541 & CHEM 2511	Organic Chemistry I and Organic Chemistry Lab I and Organic Chemistry I Recitation	6
CHEM 2521 & CHEM 2531 & CHEM 2511	Organic Chemistry I and Organic Chemistry Lab I for Chem Majors and Organic Chemistry I Recitation	
NSCI 3121 & NSCI 3821	Organic Chemistry Lecture I and Organic Chemistry Lab I	

Select one of the following (Rose Hill students take CHEM;
Lincoln Center students take NSCI):

CHEM 2522 & CHEM 2542 & CHEM 2512	Organic Chemistry II and Organic Chemistry Lab II and Organic Chemistry II Recitation	6
CHEM 2522 & CHEM 2532 & CHEM 2512	Organic Chemistry II and Organic Chemistry Lab II for Chem Majors and Organic Chemistry II Recitation	
NSCI 3122 & NSCI 3822	Organic Chemistry Lecture II and Organic Chemistry Lab II	

Mathematics ¹

MATH 1206	Calculus I	4
MATH 1207	Calculus II	4

Physics

Select one of the following (Rose Hill students take PHYS;
Lincoln Center students take NSCI):

PHYS 1501 & PHYS 1511 & PHYS 1503	General Physics I and Physics I Lab and General Physics I Recitation	4
PHYS 1601 & PHYS 1511 & PHYS 1603	Introduction to Physics I and Physics I Lab and Introduction to Physics I Recitation	
PHYS 1701 & PHYS 1511 & PHYS 1703	Physics I and Physics I Lab and Physics I Recitation	
NSCI 1501 & NSCI 1511	General Physics Lecture I and General Physics Lab I	

Select one of the following (Rose Hill students take PHYS;
Lincoln Center students take NSCI):

PHYS 1502 & PHYS 1512 & PHYS 1504	General Physics II and Physics II Lab and General Physics II Recitation	4
PHYS 1602 & PHYS 1512 & PHYS 1604	Introduction to Physics II and Physics II Lab and Introduction to Physics II Recitation	
PHYS 1702 & PHYS 1512 & PHYS 1704	Physics II and Physics II Lab and Physics II Recitation	
NSCI 1502 & NSCI 1512	General Physics Lecture II and General Physics Lab II	

Track Courses ²

Select one of the following:

General Track

ACS Track

¹ Students interested in the ACS track should complete Calculus I (MATH 1206) and Calculus II (MATH 1207) as early as possible in

their studies. A score of 4 or 5 in AP Calculus AB or BC, or an IB HL Mathematics (Analysis and Approaches) score of 6 or 7, fulfills the Calculus I requirement.

² Consult the Tracks section (p. 195) for the required and elective courses that comprise each track.

Availability

The major in biochemistry is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in biochemistry only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses. Students should note that many of the courses that comprise the major are offered only at the Rose Hill campus.

Biochemistry Minor

Overview

The biochemistry minor has four required courses taken from biological sciences and chemistry. These are: Genetics (BISC 2539 and BISC 2549) and Molecular Biology (BISC 3752 or NSCI 4176 and NSCI 4876) and Biochemistry I and II (CHEM 4221, CHEM 4231, and CHEM 4222). Two elective courses outside of a student's major complete the six course total that corresponds to a minor. (Note that the required laboratory co-requisites are not counted).

Research opportunities are subject to respective departmental policies. Interested students should contact faculty members or the program director.

Learning Goals and Expected Outcomes

The biochemistry program provides students with a solid foundation to pursue a career in medicine/dentistry or other allied health related professions; pursue research at a top ranked graduate school; forensic science; cosmetic chemistry and beyond. For the major, students can pursue a track of their choice (American Chemical Society track or General track). The biochemistry minor also helps students develop an in-depth understanding of fundamental biochemical concepts and techniques.

1. Learn about the structure, and function of biological building blocks such as amino acids, lipids and fats; carbohydrates and their implications in metabolism and disease.
2. Students should be able to decipher how biomolecules interact chemically and biologically; and understand their key role in molecular interactions at the cellular level.
3. Understand basic concepts of drug design.
4. Apply thermodynamic and kinetic principles to elucidate molecular driving forces in biochemical reactions and mechanisms of enzymes.
5. Learn about biological pathways implicated in diseases including cancer, diabetes and obesity; and neurodegenerative diseases.
6. Be able to work on a research plan/ proposal, conduct investigations and perform analyses. Students will learn to analyze and interpret data, including critically analyze experimental design and data interpretation in the biochemical literature.
7. Develop effective biochemical laboratory skills and design experiments that entail the use of biochemical/biophysical and bioanalytical methods.
8. Become familiar with the use instrumentation in modern biochemistry.
9. Be able to demonstrate quantitative analysis and biocomputational skills.

10. Effectively communicate the language of biochemistry through written and oral communication skills.

Requirements

The biochemistry minor requires six (6) courses:

Course	Title	Credits
Required Courses		
CHEM 4221 & CHEM 4231	Biochemistry I and Biochemistry Lab I	4
CHEM 4222	Biochemistry II	3
<i>One of the following:</i>		5
BISC 2539 & BISC 2549	General Genetics and General Genetics Lab	
NSCI 3133 & NSCI 3833	Genetics Lecture and Genetics Lab	
<i>One of the following:</i>		3 to 5
BISC 3752	Molecular Biology	
NSCI 4176 & NSCI 4876	Molecular Biology Lecture and	
Electives		6 to 10
Select two courses that do not count towards a major:		
BISC 3643 & BISC 3653	Microbiology and Microbiology Lab	5
BISC 3754	Cell Biology	3
CHEM 3622	Physical Chemistry II	4
CHEM 3721	Quantitative Analysis	4
CHEM 4241	Biomimetic Chemistry	3
CHEM 4621	Bionanotechnology and Introduction to Nanomedicine	4
CHEM 4625	Computational Chemistry	3
NSCI 2122 & NSCI 2822	Immunology Lecture and Immunology Lab	5
NSCI 4080	Pharmacological Chemistry	3
NSCI 4081	Neurochemistry	3
NSCI 3154	Cell and Development Biology Lecture ¹	3
NSCI 4143 & NSCI 4843	Advanced Microbiology Lecture and Advanced Microbiology Lab	5

¹ NSCI 3854 Cell and Development Biology Lab may, optionally, be taken with this course.

The pre-requisites for the biochemistry minor core, namely General and Organic Chemistry, are required courses for biological sciences, chemistry, and natural science majors, as well as for students associated with the pre-health program. Of the allied interdisciplinary STEM programs whose students are most likely to pursue a biochemistry minor, nearly all require General Chemistry and some require a semester of Organic Chemistry. The four core courses represent a complete, full-year course in fundamental biochemistry complemented by courses providing a thorough foundation in molecular biology.

Availability

The minor in biochemistry is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in biochemistry only

if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Chemistry Major

Requirements

Requirements for the Chemistry major are as follows:

Course	Title	Credits
First Year		
CHEM 1321 & CHEM 1311	General Chemistry I and General Chemistry I Recitation	4
CHEM 1331	General Chemistry Lab I	2
CHEM 1322 & CHEM 1312	General Chemistry II and General Chemistry II Recitation	4
CHEM 1332	General Chemistry Lab II	2
MATH 1206	Calculus I ¹	4
MATH 1207	Calculus II	4
BISC 1403 & BISC 1413	Introductory Biology I and Introductory Biology Lab I ²	5
BISC 1404 & BISC 1414	Introductory Biology II and Introductory Biology Lab II ²	5
Sophomore Year		
CHEM 2521 & CHEM 2511	Organic Chemistry I and Organic Chemistry I Recitation	4
CHEM 2531 or CHEM 2541	Organic Chemistry Lab I for Chem Majors Organic Chemistry Lab I	2
CHEM 2522 & CHEM 2512	Organic Chemistry II and Organic Chemistry II Recitation	4
CHEM 2532 or CHEM 2542	Organic Chemistry Lab II for Chem Majors Organic Chemistry Lab II	2
PHYS 1701 & PHYS 1511	Physics I and Physics I Lab	4
PHYS 1702 & PHYS 1512	Physics II and Physics II Lab	4
Junior Year		
CHEM 3621 & CHEM 3631	Physical Chemistry I and Physical Chemistry Lab I	6
CHEM 3622 & CHEM 3632	Physical Chemistry II and Physical Chemistry Lab II	6
CHEM 3721	Quantitative Analysis	4
CHEM 3722	Instrumental Analysis	4
CHEM 4030	Chemistry Seminar ³	0
Senior Year		
CHEM 4221	Biochemistry I ⁴	3
CHEM 4422	Inorganic Chemistry ⁴	3
Chemistry Elective ⁵		3 to 4
CHEM 4030	Chemistry Seminar ³	0

¹ MATH 12AB Transfer Calculus AB or MATH 12BC Transfer Calculus BC (transfer credit from AP Calculus) also fulfills the Calculus I requirement. Students pursuing the ACS Certified Degree and/or interested in graduate study are also strongly encouraged, but not required, to take MATH 2004 Multivariable Calculus I.

- ² **OPTIONAL:** Students in Pre-Health or interested in the Biochemistry minor should take BISC 1403 Introductory Biology I and BISC 1404 Introductory Biology II, along with labs. Students not pursuing these tracks are not required to take these courses.
- ³ Four semesters of CHEM 4030 Chemistry Seminar are required, generally taken during each semester of the junior and senior years. Additional elective research courses may be taken throughout the four-year curriculum. Contact the Associate Chair for details.
- ⁴ **ACS-Certified degree** candidates should also take the corresponding laboratory courses CHEM 4231 Biochemistry Lab I and CHEM 4432 Inorganic Chemistry Lab
- ⁵ Courses with the subject code CHEM (p. 1035), numbered 4222-4989, may count as electives. A rotating selection of courses satisfying the chemistry elective requirement are offered, including CHEM 4222 Biochemistry II, CHEM 4241 Biomimetic Chemistry, CHEM 4340 Environmental Chemistry, CHEM 4621 Bionanotechnology and Introduction to Nanomedicine, and CHEM 4625 Computational Chemistry. Students may take additional electives if their schedule permits.

General Advice

Majors meet with their academic adviser within the department to have their course schedules approved each semester.

For all CHEM foundation courses (i.e. General Chemistry through Organic Chemistry, including labs), a minimum grade of C- (in both lecture and lab) is required, both in order to enroll in the next course in the sequence, and for the course to apply towards the major.

Students are encouraged to pursue research projects with faculty members in the department for academic credit. These courses do not count toward major or minor requirements. Enrollment in research courses requires approval by the faculty supervisor. First-year students can enroll in CHEM 1990 Introduction to Research. Sophomores, juniors, and seniors can enroll in CHEM 3990 Directed Research. Juniors and seniors pursuing independent research can enroll in CHEM 4990 Independent Research.

Students are required to consult with the department before registering for CHEM 4030 Chemistry Seminar. Detailed instructions can be found on the department's website.

It is recommended that all chemistry majors take CHEM 3141 Methods of Biochemical Research in the years that it is offered.

Students planning to pursue graduate study in physical chemistry or chemical engineering are encouraged to take additional coursework in computer programming and mathematics and should speak with their adviser.

American Chemical Society (ACS) Certification

As an ACS-approved program in chemistry, Fordham offers the option of an ACS-certified chemistry major. This is generally recommended for students interested in pursuing careers or further study in chemistry and requires additional laboratory experience. In addition to the coursework listed above, students must complete CHEM 4432 Inorganic Chemistry Lab and CHEM 4231 Biochemistry Lab I. Students in pursuing this option are also encouraged (but not required) to take additional mathematics coursework, such as MATH 2004 Multivariable Calculus I

Biochemistry Minor

Requirements for the biochemistry minor can be found in the academic bulletin (p. 196). In addition to the courses listed above, chemistry majors interested in the biochemistry minor typically take:

- **First year:** BISC 1403 Introductory Biology I, BISC 1413 Introductory Biology Lab I, BISC 1404 Introductory Biology II, and BISC 1414 Introductory Biology Lab II
- **Sophomore year:** General Genetics with Lab (BISC 2539 General Genetics/BISC 2549 General Genetics Lab or NSCI 3133 Genetics Lecture/NSCI 3833 Genetics Lab)
- **Junior year:** CHEM 4221 Biochemistry I, CHEM 4231 Biochemistry Lab I, CHEM 4222 Biochemistry II (Physical Chemistry can be postponed to senior year)
- **Senior year:** Two elective courses outside the chemistry major

Pre-Health Track

Students interested in pre-health should consult the recommended pre-health professions curriculum guidelines posted online.

In general, many chemistry majors who are pre-health take BISC 1403 Introductory Biology I, BISC 1413 Introductory Biology Lab I, BISC 1404 Introductory Biology II, and BISC 1414 Introductory Biology Lab II, in their first year. However, this coursework is not strictly required for the chemistry major. In addition, many students find taking the biochemistry sequence (CHEM 4221 Biochemistry I and CHEM 4222 Biochemistry II) to be useful preparation for taking such professional school examinations as the MCAT, DAT, and VCAT.

3-2 Engineering Track

Interested students should consult with the director of the 3-2 engineering program (p. 135) for information regarding major courses to be completed in their sophomore and junior years. In general, these programs often require taking coursework in the sophomore year, such as CISC 1600 Computer Science I, MATH 2004 Multivariable Calculus I, and MATH 2005 Multivariable Calculus II. Your 3-2 engineering program (p. 135) adviser will be able to provide additional guidance.

Learning Goals

Our American Chemical Society certified curriculum provides students with the necessary skill-sets, and prepares them for a range of STEM-related careers. The breadth and depth of courses, and research opportunities offered will prepare students for their applications to top-tier professional schools, including medical schools, graduate school programs, or to entry-level industrial positions. Students will learn how to apply their acquired knowledge in chemistry to a wide range of areas in a variety of chemistry related fields.

This preparation takes the form of the following learning goals:

1. **Students will gain knowledge and proficiency in the core concepts of Chemistry.** Students will understand the fundamental basis for the structure and reactivity of atoms, molecules and non-molecular solids. Our curriculum will introduce students to all the branches of chemistry: Organic, Inorganic, Physical, Analytical and Biochemistry.
2. **Students will acquire problem-solving and critical-thinking skills that will prepare them to work independently on research questions by drawing upon experimental, theoretical, and computational evidence.** Students will apply research methods, for design, data analysis, and interpretation. This is achieved through pedagogically engaging, discovery-based laboratory courses as well as research courses

(offered in all 4 years of study) in which the students work directly with individual faculty.

3. **Students will learn to utilize chemical knowledge learned in their course work to real world applications in pharmacology, medicine and the environment.**
4. **Students will receive hands-on training with operating and interpreting data from high-tech analytical instrumentation.** The opportunities for hands-on experience on the department's bevy of modern instrumentation, either via independent research or within the framework of laboratory courses, will prepare students for scientific future careers.
5. **Students will gain experience in the computational methods of chemistry, ranging from ab initio calculations of electronic structure to molecular dynamics simulations, and learn how these compliment experimental data.** Our curriculum will initiate students to "computational thinking," including chemical and materials informatics, applications of data science to chemistry, and first-principles simulation methods.
6. **Students will acquire scientific literacy skills, particularly reading, writing, and presenting scientific communications.** Through classwork and presentations at regional and national conferences, students will be prepared to communicate research findings to chemist and non-chemist audiences. Students will learn to utilize library resources and critically read scientific literature. Students will also have the opportunity to hone their writing skills through research grant applications and writing initial drafts of peer-reviewed publications.
7. **Students will be able to work safely in a laboratory setting and have hands-on experience with common laboratory equipment and glassware in organic, analytical, biochemistry, inorganic, and physical chemistry laboratories.** As a graduate of the chemistry department, students will be ready to safely work in industrial and academic research settings.

Availability

The chemistry major is available at Fordham College at Rose Hill. Students in Fordham's School of Professional and Continuing Studies may major in chemistry only if they receive the approval of their advising dean and/or department, and if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

40.0501 - Chemistry, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Chemistry Minor Requirements

The requirements for the Chemistry minor for students majoring in **Biological Sciences, Natural Science, or Environmental Science** are as follows:

Course	Title	Credits
CHEM 2521	Organic Chemistry I	4
CHEM 2541	Organic Chemistry Lab I	2
CHEM 2511	Organic Chemistry I Recitation	0
CHEM 2522	Organic Chemistry II	4
CHEM 2542	Organic Chemistry Lab II	2
CHEM 2512	Organic Chemistry II Recitation	0

Select four additional courses with the subject code CHEM at the 3000- or 4000-level

The requirements for the Chemistry minor for **all other students** are as follows:

Course	Title	Credits
CHEM 1321	General Chemistry I	4
CHEM 1331	General Chemistry Lab I	2
CHEM 1311	General Chemistry I Recitation	0
CHEM 1322	General Chemistry II	4
CHEM 1332	General Chemistry Lab II	2
CHEM 1312	General Chemistry II Recitation	0
CHEM 2521	Organic Chemistry I	4
CHEM 2541	Organic Chemistry Lab I	2
CHEM 2511	Organic Chemistry I Recitation	0
CHEM 2522	Organic Chemistry II	4
CHEM 2542	Organic Chemistry Lab II	2
CHEM 2512	Organic Chemistry II Recitation	0

Select two additional courses with the subject code CHEM at the 3000- or 4000-level

For all CHEM foundation courses (i.e. General Chemistry through Organic Chemistry, including labs), a minimum grade of C- (in both lecture and lab) is required, both in order to enroll in the next course in the sequence, and for the course to apply towards the major.

Learning Goals

Our American Chemical Society certified curriculum provides students with the necessary skill-sets, and prepares them for a range of STEM-related careers. The breadth and depth of courses, and research opportunities offered will prepare students for their applications to top-tier professional schools, including medical schools, graduate school programs, or to entry-level industrial positions. Students will learn how to apply their acquired knowledge in chemistry to a wide range of areas in a variety of chemistry related fields.

This preparation takes the form of the following learning goals:

1. **Students will gain knowledge and proficiency in the core concepts of Chemistry.** Students will understand the fundamental basis for the structure and reactivity of atoms, molecules and non-molecular

solids. Our curriculum will introduce students to all the branches of chemistry: Organic, Inorganic, Physical, Analytical and Biochemistry.

- Students will acquire problem-solving and critical-thinking skills that will prepare them to work independently on research questions by drawing upon experimental, theoretical, and computational evidence.** Students will apply research methods, for design, data analysis, and interpretation. This is achieved through pedagogically engaging, discovery-based laboratory courses as well as research courses (offered in all 4 years of study) in which the students work directly with individual faculty.
- Students will learn to utilize chemical knowledge learned in their course work to real world applications in pharmacology, medicine and the environment.**
- Students will receive hands-on training with operating and interpreting data from high-tech analytical instrumentation.** The opportunities for hands-on experience on the department's bevy of modern instrumentation, either via independent research or within the framework of laboratory courses, will prepare students for scientific future careers.
- Students will gain experience in the computational methods of chemistry, ranging from ab initio calculations of electronic structure to molecular dynamics simulations, and learn how these compliment experimental data.** Our curriculum will initiate students to "computational thinking," including chemical and materials informatics, applications of data science to chemistry, and first-principles simulation methods.

Availability

The minor in Chemistry is available at Fordham College at Rose Hill. Students in Fordham's School of Professional and Continuing Studies may minor in Chemistry only if they receive the approval of their advising dean and/or department, and if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Classical Languages and Civilization

The classics department at Fordham teaches courses in the Latin and Greek languages as well as courses pertaining to the culture of ancient Greece and Rome. Two areas of major or minor concentration are offered: classical languages and classical civilization. Classical languages involve the study of Latin, Greek, or both languages and literatures. A concentration in classical civilization requires no study of Latin or Greek, although it may be included; rather it consists of courses in Greek and Roman literature, history, mythology, art, philosophy, religion and other areas, all taught in English translation. Acquaintance with, and

appreciation of, classical languages and literatures and the classical tradition is essential to Fordham's identity as a university in the Catholic tradition.

Program Activities

Students who are academically qualified are invited to become members of Eta Sigma Phi, the National Honors Society for Classics. Chapters are operative on both campuses. The department encourages and supports the activities of an undergraduate classics club. All undergraduates are invited to the lectures sponsored by the department, including the annual Robert Carrubba Memorial Lecture.

Students are also encouraged to take advantage of the many opportunities for study abroad available through Fordham both during the summer months and the academic year.

Fellowship monies are available for qualified students majoring in classics during their junior and senior years.

For more information

Visit the Classical Languages and Civilizations department web page.

Contribution to the Core

The department participates actively in the core curriculum.

Classes in Latin or Greek fulfill the foreign language requirement. The B.A. requirement may be fulfilled by completing Greek Language and Literature (GREK 2001) or Latin Language and Literature (LATN 2001) or one advanced course.

The prerequisite for GREK 2001 or LATN 2001, the exit-level course, is Intermediate Greek I (GREK 1501) or Intermediate Latin I (LATN 1501).

Students with sufficient previous language training may be placed directly into the intermediate (GREK 1501 or LATN 1501), literature (exit) (GREK 2001 or LATN 2001), or advanced reading level in Greek or Latin (GREK or LATN 3000s).

HIST 1210 Understanding Historical Change: Ancient Greece and HIST 1220 Understanding Historical Change: Ancient Rome are core area history courses. Core area courses are taken by all students during the first year and sophomore year and must be completed by the end of sophomore year.

The department offers three Texts and Contexts courses (CLAS 2000 Texts and Contexts): Myth in Greco-Roman Literature, Gender in Greco-Roman Literature, Tragedy and Comedy. All sections fulfill Eloquencia Perfecta 2 (p. 55) requirements.

CLAS 3030 Athenian Democracy, CLAS 3050 Pagans and Christians, CLAS 3141 Love, Fate, and Death in the Ancient Novel, CLAS 4020 The Classical Tradition in Contemporary Fiction and Film are Eloquencia Perfecta 3 (p. 55) courses.

Courses taken in the ancient world to fulfill core requirements may also be used for a major or minor in classics.

Programs

- Classical Civilization Major (p. 201)
- Classical Civilization Minor (p. 201)

- Classical Languages Major (p. 201)
- Classical Languages Minor (p. 202)

Classical Civilization Major Requirements

To complete the classical civilization major, students should complete ten courses with the classics (CLAS (p. 1043)), Greek (GREK (p. 1298)), or Latin (LATN (p. 1433)) subject codes, or having the CLAS attribute. Of these:

- At least three classes must be departmentally based: courses with the subject codes for classics (CLAS (p. 1043)), Greek (GREK (p. 1298)), or Latin (LATN (p. 1433)). HIST 1210 and HIST 1220 count as departmental courses for this requirement.
- At least two classes must be at or above the 2000 level, with at least one of those two being an EP3 or EP4 course with the classics (CLAS (p. 1043)), Greek (GREK (p. 1298)), or Latin (LATN (p. 1433)) subject codes.
- A maximum of six classes in Greek (GREK (p. 1298)) or Latin (LATN (p. 1433)) may count toward the major. Two Latin/Greek courses at the 1000 level may count *only* if both 1000-level courses are in the same language (Latin or Greek).

While no courses in Latin or Greek are required for the classical civilization major, the department encourages classical civilization majors to fulfill their College language requirement in Latin or Greek.

Availability

The major in classical civilization is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in classical civilization only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

CIP Code

30.2201 - Ancient Studies/Civilization.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Classical Civilization Minor Requirements

To complete the classical civilization minor, students should complete six courses bearing CLAS (p. 1043), GREK (p. 1298), or LATN (p. 1433) subject codes or having the CLAS attribute.

- At least two classes must be departmentally based: They must have either the CLAS (p. 1043), GREK (p. 1298), or LATN (p. 1433) subject codes. HIST 1210 and HIST 1220 count as departmental courses for this requirement.
- At least one classes must be at or above the 2000 level.
- A maximum of four classes in LATN or GREK may count toward the major. Two Latin/Greek courses at the 1000 level may count *only* if both 1000-level courses are in the same language (Latin or Greek).

Availability

The minor in classical civilization is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in classical civilization only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Classical Languages Major Requirements

The major in classical languages consists of 10 courses in classics, Greek or Latin, including four 3000-level courses in a primary classical language (Greek or Latin).

The remaining coursework can be fulfilled by any course in classics (subject code CLAS (p. 1043)), Greek (subject code GREK (p. 1298)), or Latin (subject code LATN (p. 1433)), or having the CLAS attribute code. Courses taken en-route to the 3000-level courses in Greek or Latin, including pre-requisites, may count toward this requirement.

The department does not require, but strongly recommends, that all majors take courses in both languages. Students who have not had Greek should take the beginning course as soon as possible. The department also recommends that majors have a broad training in ancient history and master the fundamentals of at least one modern language.

Availability

The major in classical languages is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in classic languages only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

CIP Code

16.1200 - Classics and Classical Languages, Literatures, and Linguistics, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Classical Languages Minor Requirements

A minor in classical languages consists of six courses:

- Two Greek (p. 1298) or Latin (p. 1433) courses at any level.
- Two more Greek (p. 1298) or Latin (p. 1433) courses at the 3000-level or higher.
- Any two additional courses in classics (subject code CLAS (p. 1043)), Greek (subject code GREK (p. 1298)), or Latin (subject code LATN (p. 1433)), or having the CLAS attribute.

Availability

The minor in classical languages is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in classical languages only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Communication and Media Studies

The Department of Communication and Media Studies at Fordham University (CMS) is dedicated to the interdisciplinary examination of human communication in an increasingly networked society. Just as digitalization and other forms of technological innovation yield a media environment that is constantly changing and evolving, sometimes in revolutionary ways, our diverse program keeps current with the most recent developments in theory and practice while staying true to its mission of emphasizing ethics and social engagement.

The department provides its students in all its programs with an interdisciplinary approach to the study of communication, including an emphasis on the media technologies, industries, and institutions that support the processes of mediated communication and their relationship to culture and society. The program blends theory and practice to prepare students for advanced study or careers in communications, all within the context of a rigorous liberal arts education supplemented by New York City's resources as the media capital of the world. We pride ourselves on offering opportunities for undergraduate students to work directly with faculty members in scholarship and training for future careers in multiple communication and media-focused careers.

In fall 2016, the department began to offer four new programs of study at Fordham College Rose Hill and Fordham College Lincoln Center, replacing

a single undergraduate major and minor in communications for those two colleges.

- Communication and Culture (major (p. 204), minor (p. 208))
- Digital Technologies and Emerging Media (major (p. 208), minor (p. 210))
- Film and Television (major (p. 211), minor (p. 212))
- Journalism (major (p. 213), minor (p. 215), plus a minor in sports journalism (p. 216))

The new areas of study allow students the opportunity to explore their interests in much greater depth than was possible within a single major or minor; both elective and required courses will now be better aligned with the specific interests of students and faculty in each area. (Students in PCS may still pursue a major (p. 125) or minor (p. 126) in communications.)

The original communications major and minor is no longer offered to incoming students at FCRH and FCLC. Students who began at Fordham after spring 2016 will be permitted to pursue only one of the new majors or minors, and may not major or minor in communications.

Note: Information about the Communication and Media Management (p. 217) area at Gabelli is listed separately.

Course Prerequisites

- COMM 1000 Fundamentals of Communication and Media Studies must be taken before any of the following courses (students prior to fall 2017 may have taken COMM 1010 instead):
 - COMC 1101 Communications and Culture: History, Theory, and Methods
 - DTEM 1401 Introduction to Digital Technologies and Emerging Media
 - FITV 1501 Understanding Film
 - FITV 1601 Understanding Television
- DTEM 1401 Introduction to Digital Technologies and Emerging Media is recommended to be taken before DTEM 1402 Digital Cultures, especially for DTEM majors.
- JOUR 1702 Introduction to Journalism must be taken before any intermediate or advanced writing/reporting course (i.e., any JOUR course where the second two digits are 71 or 72).
- FITV 1501 Understanding Film must be taken before FITV 2501 History of Film, 1895-1950 or FITV 3501 Film Theory and Criticism
- FITV 1601 Understanding Television must be taken before FITV 2601 History of Television or FITV 3601 Television Theory and Criticism.

Ethics, Law, and Policy Course Requirement

A course in ethics, law, and policy (ELP) is required for students majoring in communication and culture, as well as for students minoring in communication and culture. An ELP course is also required for students majoring or minoring in communication (FCRH/FCLC students enrolling prior to fall 2016 or PCS students).

The ELP requirement may be fulfilled by taking any course in COMC, DTEM, FITV, or JOUR with the CELP attribute, which includes the following courses:

Courses in this group have the CELP attribute.

Course	Title	Credits
AAST 3280	Representing Asians in Journalism and Media	4
COLI 4570	Films of Moral Struggle	4
COMC 2277	Media and Sexuality	4
COMC 3240	Photography, Identity, Power	4
COMC 3260	Media Regulation	4
COMC 3280	Representing Asians in Journalism and Media	4
COMC 3310	Ethics and Popular Culture	4
COMC 3330	Peace, Justice, and the Media	4
COMC 3350	Media Law	4
COMC 3370	Ethical Issues in Media	4
COMC 3375	Children and Media	4
COMC 3380	International Communication	4
COMC 4170	Dissent and Disinformation	4
COMC 4340	Freedom of Expression	4
COMC 4360	Communication Ethics and the Public Sphere	4
COMC 4370	Ethical Controversies in 21st Century Media	4
DTEM 2450	Digital Property: Rights, Policies, and Practice	4
DTEM 3500	Resistance and Global Activism	4
DTEM 4430	Digital Media Ethics	4
DTEM 4440	Privacy and Surveillance	4
DTEM 4470	Values in Design	4
DTEM 4480	Digital Media and Public Responsibility	4
FITV 2670	Television and Social Change	4
FITV 4570	Films of Moral Struggle	4
FITV 4660	Ethics of Reality Television	4
JOUR 3740	Ethics and Diversity in Journalism	4
JOUR 3760	The Journalist and the Law	4
JOUR 4750	Values in the News	4
JOUR 4770	Media Law and Journalism Ethics	4

Program Requirements

There are two pathways to declaring a major in the Department of Communication and Media Studies:

- 2.500 cumulative GPA and 30 earned credits; or
- 2.000 cumulative GPA and 3.000 GPA in 2 Communication and Media Studies courses and 30 earned credits.

Qualifying Communication and Media Studies courses for the second pathway can include: COMM 1000 Fundamentals of Communication and Media Studies and a major-specific course (e.g. FITV 1501 Understanding Film), or 2 major-specific courses (e.g. JOUR 1702 Introduction to Journalism and JOUR 2711 Intermediate Multimedia Reporting).

In addition, no D-grade work will be credited toward the major or minor.

Internships

A significant feature of all the communication and media studies majors is the opportunity to participate in internships working under the direct supervision of professionals in media organizations, ranging from daily

newspapers and television networks to public relations and advertising agencies and corporate communication programs.

Internship Requirements

- For their first internship, ALL CMS students wishing to receive credit for that internship MUST enroll in COMM 4701 Internship Seminar and successfully complete that course. This course is worth four credits and counts toward an elective in all four undergraduate majors.
- For all subsequent internships, students may take a tutorial –COMM 4999. Typically, these internships are worth one (1) course credit and *do not* count as an elective.
- All internships for academic credit must be approved by the department prior to registration. In general, students requesting academic credit for internships are expected to have a 3.0 cumulative GPA.
- The department recommends about 15 hours per week of internship duty over a semester (e.g., two days per week, seven hours per day; or three days per week, five hours per day).

Independent Research

Independent studies enable both majors and minors to pursue special projects as part of their requirements. Students may register to study with a professor for an Independent Tutorial for one to four credits, based upon an agreement with the professor.

Extracurricular Activities

Majors who belong to affiliated professional organizations may be eligible to apply for membership in Lambda Pi Eta, the Communication Honors Society. They are also active at WFUV (wfuv.org, 90.7 FM), Fordham University's highly regarded public media station; on a number of campus publications, including *The Ram* and *The Observer*; on *Fordham Nightly News*; and in many other student organizations.

Departmental Awards

Awards presented by the department include the Society of Professional Journalists/Sigma Delta Chi Award, the Herbert Robinson Award in Creative Writing, the Ralph W. Dengler, S.J., Award, the William F. DiPietra Awards in film and in screenwriting, the Ann M. Sperber Biography Award, the Kavanagh Award, and the Edward A. Walsh Scholarship for studies in communications.

For more information

Visit the Communication and Media Studies department web page.

Contribution to the Core

Communication and Media Studies offers the following courses that count toward Core Curriculum requirements:

The following courses satisfy the social science core requirement (p. 54):

Course	Title	Credits
COMM 1000	Fundamentals of Communication and Media Studies	3
COMC 2175	Persuasion and Public Opinion	4
COMC 2329	Media Industries	4
COMC 2377	Mass Communication and Media Effects	4
JOUR 1761	The Power of News	3

DTEM 2459	Social History of Communication and Technology	4
-----------	--	---

The following courses satisfy the advanced social science core requirement (p. 45):

Course	Title	Credits
COMC 3171	Orality and Literacy	4
COMC 3172	Principles of Advertising	4
COMC 3247	Race and Gender in Media	4
COMC 3268	Media and National Identity	4
COMC 3350	Media Law	4
COMC 3375	Children and Media	4
COMC 3380	International Communication	4
COMC 3330	Peace, Justice, and the Media	4
DTEM 3476	Social Media	4
FITV 3678	Television Comedy and American Values	4
FITV 3571	Science Fiction in Film and Television	4
JOUR 3760	The Journalist and the Law	4

First-year students taking any section of JOUR 1702 Introduction to Journalism may request that the first-year class dean apply this course to fulfill the EP1 requirement.

Specified sections of the following courses satisfy the Eloquencia Perfecta 3 (EP3) requirement (p. 55):

Course	Title	Credits
COMC 3114	Effective Speaking	4
COMC 3375	Children and Media	4
FITV 3565	The Documentary Idea	4
FITV 3588	Global Cinema	4
JOUR 3727	Writing for Magazines	4

The following courses satisfy the Values Seminar/Eloquencia Perfecta 4 (EP4) requirement (p. 50):

Course	Title	Credits
COMC 4360	Communication Ethics and the Public Sphere	4
DTEM 4480	Digital Media and Public Responsibility	4
FITV 4570	Films of Moral Struggle	4
JOUR 4750	Values in the News	4

The following course satisfies the Interdisciplinary Capstone Core (ICC) requirement (p. 48):

Course	Title	Credits
COMC 4222	Media and the Environment	4
COMC 4241	Communication, Popular Culture, and Philosophy	4
COMC 4340	Freedom of Expression	4
COMC 4348	Religion, Theology, and New Media	4
JOUR 4766	Television News Innovators	4
JOUR 4767	History of Women's Magazines	4

Programs

- Communication and Culture Major (p. 204)
- Communication and Culture Minor (p. 208)
- Digital Technologies and Emerging Media Major (p. 208)
- Digital Technologies and Emerging Media Minor (p. 210)
- Film and Television Major (p. 211)
- Film and Television Minor (p. 212)
- Journalism Major (p. 213)
- Journalism Minor (p. 215)
- Sports Journalism Minor (p. 216)

The Communications (COMM) Major (p. 125) and Minor (p. 126) are available only to students at Fordham's School of Professional and Continuing Studies. Students in Fordham College at Rose Hill and Fordham College at Lincoln Center from the class of 2019 or earlier may also pursue the COMM major or minor.

Communication and Culture Major

The communication and culture major combines humanistic and social science approaches to the study of all aspects of human and mediated communication, including: the strategic application and implications of communication theories, tools, and techniques; the institutions and industries engaged in the production and distribution of mediated content; the receivers of this content and their reciprocal relationship with such messages; and the media texts in their social, political, local, and global cultural contexts.

In our increasingly interconnected world, it is clear that, when strategically chosen, the right words and images can be powerful instruments to help us move towards a more ethical and socially just world. The communication and culture major prepares the media professionals of tomorrow to use the power of mediated communication with responsibility by training them to be critical consumers and ethical producers of mediated communication in all areas of their lives: personal, professional, and civic.

Learning Outcomes

Upon graduation from the communication and culture major or minor, students will have achieved the following curricular goals:

1. Develop a critically-informed understanding of media as a set of industries, institutions, objects, and infrastructures; sites of political, economic, and cultural contestation; and fields of creative production.
2. Understand how media—as historically situated technologies, production practices, and consumption practices—define cultural notions of pastness and futurity.
3. Recognize and evaluate the ethical, regulatory, and legal frameworks within which media and communication systems operate, as well as the asymmetrical power relations embedded within these frameworks.
4. Assess the affordances of communication and media practices for addressing or perpetuating social inequities, and for promoting positive social change.
5. Articulate the varied roles that media and communication practices play in the shaping of global identities, cultures, and beliefs.

6. Engage in communication analysis and research, including humanistic and social scientific inquiry.

CIP Code

09.0100 - Communication, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The communication and culture (COMC) major requires eleven (11) courses.

Course	Title	Credits
COMM 1000	Fundamentals of Communication and Media Studies ¹	3
	or COMM 1010 Introduction to Communication and Media Studies	
COMC 1101	Communications and Culture: History, Theory, and Methods ²	4
Two courses in Communication Studies: Applications and Interactions		
Two courses in Cultural Studies: Critique and Analysis		
Two courses in Media Studies: Institutions and Audiences		
Two additional courses in one of the three areas (above) as a concentration		
One ethics, law, and policy course, ordinarily taken senior year ³		

¹ COMM 1010 Introduction to Communication and Media Studies has been discontinued and replaced by COMM 1000 as of Fall 2017.

² Either COMM 1000 or COMM 1010 is a prerequisite for COMC 1101 Communications and Culture: History, Theory, and Methods.

³ See below list of Ethics, Law, and Policy courses.

Students majoring in communication and culture must pursue one of three concentrations (p. 205): Communication Studies, Cultural Studies, and Media Studies.

Ethics, Law, and Policy courses

Courses in this group have the CELP attribute.

Courses that have this attribute typically explore the legal and regulatory frameworks within which media industries operate, and examine the ethical and moral questions that shape media production.

Course	Title	Credits
AAST 3280	Representing Asians in Journalism and Media	4
COLI 4570	Films of Moral Struggle	4
COMC 2277	Media and Sexuality	4
COMC 3240	Photography, Identity, Power	4

JOUR 3760	The Journalist and the Law	4
JOUR 4750	Values in the News	4
JOUR 4770	Media Law and Journalism Ethics	4

Availability

The major in communication and culture is available at Fordham College at Rose Hill (FCRH) and Fordham College at Lincoln Center (FCLC). Students in Fordham's School of Professional and Continuing Studies may major in communication and culture only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses. Such students must provide the Communication and Media Studies Associate Chair at their home campus a statement confirming they are able to take day classes in order to fulfill their major requirements.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Concentrations

Concentration in Communication Studies: Applications and Interactions

Courses in this concentration focus on the strategic application of theory related to mediated and human communication, as well as on the development of tools for studying human interaction through language, rhetoric, and socio-cultural practices. Courses may be taken in any sequence.

Courses fulfilling the communication studies concentration are generally numbered COMC x1xx—that is, any COMC course where the second

digit is a 1 fulfills this concentration requirement, plus some additional courses.

Courses in this group have the CCMS attribute.

Course	Title	Credits

Learning Outcomes

Upon graduation from the communication and culture major or minor, students will have achieved the following curricular goals:

1. Develop a critically-informed understanding of media as a set of industries, institutions, objects, and infrastructures; sites of political, economic, and cultural contestation; and fields of creative production.
2. Understand how media—as historically situated technologies, production practices, and consumption practices—define cultural notions of pastness and futurity.
3. Recognize and evaluate the ethical, regulatory, and legal frameworks within which media and communication systems operate, as well as the asymmetrical power relations embedded within these frameworks.
4. Assess the affordances of communication and media practices for addressing or perpetuating social inequities, and for promoting positive social change.
5. Articulate the varied roles that media and communication practices play in the shaping of global identities, cultures, and beliefs.
6. Engage in communication analysis and research, including humanistic and social scientific inquiry.

Availability

[The minor in communication and culture is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.](#) Students in Fordham's School of Professional and Continuing Studies may minor in communication and culture only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses. Such students must provide the Communication and Media Studies Associate Chair at their home campus a statement confirming they are able to take day classes in order to fulfill their minor requirements.

Digital Technologies and Emerging Media Major

The digital technologies and emerging media (DTEM) major takes a critical approach to internet and participatory technologies. It draws from a broad tradition of communication and media studies research; social science disciplines including anthropology, psychology, sociology, and political science; and the humanities and fine arts.

The major is designed to encourage greater understanding, critical thinking, and analysis of emerging technologies such as the web, social

media, mobile apps, video games, wearables, and the like, while also offering a number of production and writing classes. Students wishing to pursue engineering or digital production should augment the major with classes in computer science, visual arts, journalism, and new media and digital design.

Note: Information about the Gabelli concentration in Digital Media and Technology is listed separately.

Learning Outcomes

Upon graduation from the digital technology and emerging media major or minor, students will have achieved the following curricular goals:

1. Develop a critically-informed understanding of the key characteristics of digital technologies and emerging media, their affordances, constraints, histories, and infrastructures.
2. Learn to analyze digital media as not only tools, but a set of industries and institutions, and a site of political and cultural contestation, creative practice, and professional production.
3. Gain the skills to plan, develop and execute appropriate methodologies for researching digital media from a variety of perspectives.
4. Be conversant with the ethical, regulatory, political, and economic issues raised by the emergence and evolution of digital media and communication systems - especially as they relate to matters of social equity and equality, right, privacy and surveillance.
5. Demonstrate an understanding of the practice of digital technology design, and develop a critical understanding of their processes of invention, creation, deployment and use.

CIP Code

09.0702 - Digital Communication and Media/Multimedia.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The digital technologies and emerging media (DTEM) major requires ten courses.

Course	Title	Credits
Required Courses		
COMM 1000	Fundamentals of Communication and Media Studies ¹	3
DTEM 1401	Introduction to Digital Technologies and Emerging Media ²	4
DTEM 1402	Digital Cultures ²	4
One DTEM methods course		4
Distribution Requirement		
<i>Select two courses drawn from either or both of these categories:</i>		<i>8</i>
³		
Digital, Equity, Ethics, and Power/Values (DTEV attribute)		
Digital Governance, Policy, and Law (DTPL attribute)		

Electives

Four DTEM electives ⁴ 16

¹ COMM 1010 Introduction to Communication and Media Studies may be used if taken before spring 2017.

² DTEM 1401 is a prerequisite for DTEM 1402.

³ See below for the lists of courses included in each category.

⁴ Any course with the DTEM subject code or the DTEM attribute code may fulfill this requirement. Up to two courses may be taken outside the Communication and Media Studies department to fulfill major requirements.

DTEM Methods courses

Generally, DTEM methods courses are numbered between DTEM 2410 to 2419, in addition to other courses as listed below.

Courses in this group have the DTMM attribute.

A course covering social-science and/or humanities-based research methods is required for all DTEM majors. These courses can cover either qualitative or quantitative approaches. They teach students about the process of research design (developing questions and designing the appropriate process to answer them rigorously), and methods to collect and analyze data, digital texts, and or platforms and their role in society.

Course	Title	Credits
COMC 1101	Communications and Culture: History, Theory, and Methods	4
DTEM 2411	Digital Research Methods	4
DTEM 2412	Digital Ethnography	4
DTEM 2413	Participatory Methods	4
DTEM 2414	Media Ecology	4
DTEM 2417	Data Visualization	4
NMDD 3880	Designing Smart Cities for Social Justice	4

Digital, Equity, Ethics, and Power/Values courses

Courses in this group have the DTEV attribute.

These courses focus on issues of ethics, justice, and values as they are built into digital technologies and the industries that develop and maintain them. Some courses focus on the intersection of social justice and technology.

Course	Title	Credits
CISC 4650	Cyberspace: Issues and Ethics	4
COMC 3240	Photography, Identity, Power	4
COMC 4360	Communication Ethics and the Public Sphere	4
COMC 4370	Ethical Controversies in 21st Century Media	4
DTEM 3444	Nerds, Geeks, and Bros.	4
DTEM 3447	Race, Gender, and Digital Media	4
DTEM 3463	Civic Media	4
DTEM 3500	Resistance and Global Activism	4
DTEM 4430	Digital Media Ethics	4
DTEM 4470	Values in Design	4
DTEM 4480	Digital Media and Public Responsibility	4

NMDD 3450	User Experience Design: Design for Empowerment	4
NMDD 3880	Designing Smart Cities for Social Justice	4

Digital Governance, Policy, and Law courses

Courses in this group have the DTPL attribute.

These courses focus on the laws and policy-making that have governed technology across history, as well as the internal policies that govern how technology is deployed, developed, and used.

Course	Title	Credits
COMC 3350	Media Law	4
COMC 4340	Freedom of Expression	4
DTEM 2450	Digital Property: Rights, Policies, and Practice	4
DTEM 4440	Privacy and Surveillance	4
DTEM 4451	The Technology Industries	4

Availability

The major in digital technologies and emerging media is available at Fordham College at Rose Hill (FCRH) and Fordham College at Lincoln Center (FCLC). Students in Fordham's School of Professional and Continuing Studies may major in digital technologies and emerging media only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses. Such students must provide the Communication and Media Studies Associate Chair at their home campus a statement confirming they are able to take day classes in order to fulfill their major requirements.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Digital Technologies and Emerging Media Minor Requirements

The digital technologies and emerging media (DTEM) minor requires six courses.

Course	Title	Credits
Required Courses		
DTEM 1401	Introduction to Digital Technologies and Emerging Media	4
DTEM 1402	Digital Cultures	4
Select one DTEM methods course ¹		
Distributive Requirement		
Select one course from one of the following categories: ²		
Digital, Equity, Ethics, and Power/Values (DTEV attribute)		
Digital Governance, Policy, and Law (DTPL attribute)		
Electives		
Select two electives ³		

¹ Any DTEM course numbered 2410-2419, or COMC 1101 Communications and Culture: History, Theory, and Methods. Students in the class of 2021 and earlier are exempt from this requirement, and may take an additional DTEM elective instead.

² See below for the lists of courses included in each category.

³ Any course with the DTEM subject code or the DTEM attribute code may fulfill this requirement.

Digital, Equity, Ethics, and Power/Values courses

Courses in this group have the DTEV attribute.

These courses focus on issues of ethics, justice, and values as they are built into digital technologies and the industries that develop and maintain them. Some courses focus on the intersection of social justice and technology.

Course	Title	Credits
CISC 4650	Cyberspace: Issues and Ethics	4
COMC 3240	Photography, Identity, Power	4
COMC 4360	Communication Ethics and the Public Sphere	4
COMC 4370	Ethical Controversies in 21st Century Media	4
DTEM 3444	Nerds, Geeks, and Bros.	4
DTEM 3447	Race, Gender, and Digital Media	4
DTEM 3463	Civic Media	4
DTEM 3500	Resistance and Global Activism	4
DTEM 4430	Digital Media Ethics	4
DTEM 4470	Values in Design	4
DTEM 4480	Digital Media and Public Responsibility	4
NMDD 3450	User Experience Design: Design for Empowerment	4
NMDD 3880	Designing Smart Cities for Social Justice	4

Digital Governance, Policy, and Law courses

Courses in this group have the DTPL attribute.

These courses focus on the laws and policy-making that have governed technology across history, as well as the internal policies that govern how technology is deployed, developed, and used.

Course	Title	Credits
COMC 3350	Media Law	4
COMC 4340	Freedom of Expression	4
DTEM 2450	Digital Property: Rights, Policies, and Practice	4
DTEM 4440	Privacy and Surveillance	4
DTEM 4451	The Technology Industries	4

Learning Outcomes

Upon graduation from the digital technology and emerging media major or minor, students will have achieved the following curricular goals:

1. Develop a critically-informed understanding of the key characteristics of digital technologies and emerging media, their affordances, constraints, histories, and infrastructures.

- Learn to analyze digital media as not only tools, but a set of industries and institutions, and a site of political and cultural contestation, creative practice, and professional production.
- Gain the skills to plan, develop and execute appropriate methodologies for researching digital media from a variety of perspectives.
- Be conversant with the ethical, regulatory, political, and economic issues raised by the emergence and evolution of digital media and communication systems - especially as they relate to matters of social equity and equality, right, privacy and surveillance.
- Demonstrate an understanding of the practice of digital technology design, and develop a critical understanding of their processes of invention, creation, deployment and use.

Availability

The minor in digital technologies and emerging media [is available at Fordham College at Rose Hill and Fordham College at Lincoln Center](#). Students in Fordham's School of Professional and Continuing Studies may minor in digital technologies and emerging media only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses. Such students must provide the Communication and Media Studies Associate Chair at their home campus a statement confirming they are able to take day classes in order to fulfill their minor requirements.

Film and Television Major

The film and television major takes a critical and practical approach to the study of media in their shared and distinctive artistic and industrial elements. It draws from a broad tradition of historical, theoretical, and creative practices to best prepare students with the skills they need in the rapidly evolving media landscape.

Fordham's location in New York City and Jesuit mission makes the University uniquely positioned to offer students cultural and career opportunities in film and television as well as a curriculum that trains them in ethical approaches to media studies and practice.

The major offers a concentration in either film or television, with courses designed uniquely for each concentration and with courses that bridge both tracks. It also offers flexibility for those students wishing to focus on film and/or television writing and production, and those wishing to concentrate on critical, historical, and theoretical concerns.

Learning Outcomes

Upon graduation from the film and television major or minor, students will have achieved the following curricular goals:

- Develop a critically-informed understanding of film and television as a set of industries and institutions, forms of aesthetic expression, sites of cultural contestation, modes of representation, spaces of creative production, and evolving political-economic ecosystems.
- Be conversant in the multiple histories and theories of cinema and/or television, and be able to connect those histories and theories to current and emerging screen-based media forms.
- Be able to frame cinematic and televisual production, distribution and consumption within the context of regulatory, economic and policy

parameters, as well as social norms and systemic and institutional exclusions.

- Be able to articulate the role that film and television play in the development of identities, cultures, and beliefs on local, national, and global scales.
- Cultivate skills necessary to ethically create and engage in varying forms of film and television writing, production, and reception, and thus develop a holistic appreciation of film and television cultures.

CIP Code

50.0601 - Film/Cinema/Media Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The film and television (FITV) major requires eleven (11) courses.

Students must declare a concentration in film or television. The required courses for the major are:

Course	Title	Credits
COMM 1000	Fundamentals of Communication and Media Studies ¹	3
Select one of the following tracks:		12
<i>Film</i>		
FITV 1501	Understanding Film	
FITV 2501	History of Film, 1895-1950	
FITV 3501	Film Theory and Criticism	
<i>Television</i>		
FITV 1601	Understanding Television	
FITV 2601	History of Television	
FITV 3601	Television Theory and Criticism	
One Production course		4
Two FITV courses at the 3000/4000 level (excluding production courses) ²		8
Three additional electives ²		12
One Film, Television, Identity and Difference course (normally taken during the senior year) ³		4

¹ COMM 1010 Introduction to Communication and Media Studies may be substituted if taken prior to Spring 2017.

² Any course with the FITV subject code or the FITV attribute code may fulfill this requirement.

³ Any course with the FIID attribute code may fulfill this requirement (see list below).

Production Courses

Any FITV course numbered xx1x or xx2x—i.e., courses whose third digit is 1 or 2) may fulfill this requirement.

Courses in this group have the FIPR attribute.

A course in film and TV production is required for students majoring in film and television. These courses focus on the development of technical and creative skills that include screenwriting and digital video production.

Course	Title	Credits
DTEM 2425	Digital Video Production I for DTEM	4
DTEM 3423	Projects in Digital Video	4
DTEM 3425	Digital Video Production II	4
FITV 2425	Digital Video Production I for FITV	4
FITV 2511	Screenwriting I	4
FITV 2611	Television Production I	4
FITV 2612	Writing Producing Web Series	4
FITV 3425	Digital Video Production II	4
FITV 3511	Screenwriting II	4
FITV 3512	Film/Television: Narrative Basics	4
FITV 3525	Writing the Genre Screenplay: Horror, Sci-Fi, and Fantasy	4
FITV 3624	Writing Television Dramas	4
FITV 3626	Writing the Original Television Pilot	4
FITV 4625	Writing Television Sitcoms	4
FITV 4626	Writing For Animation	4
JOUR 4789	Sports Television Production: Theory and Practice	4
VART 1265	Film/Video I	4
VART 2265	Film/Video II	4
VART 3251	Film Video Postproduction	4
VART 3261	Documentary Film/Video Production	4
VART 3262	Narrative Film/Video Production	4

Film, Television, Identity, and Difference courses

Courses in this group have the FIID attribute.

These courses explore film and television from minority, ethnic, diasporic, postcolonial, colonial, indigenous, global, feminist, and queer traditions. They center on how race, gender, ethnicity, sexuality, nationality, and disability shape the aesthetics, politics, and ethics of film and television. Fundamentally, they are attentive to the importance of intersectionality as well as social justice in theory and practice.

Course	Title	Credits
COMC 2277	Media and Sexuality	4
COMC 3240	Photography, Identity, Power	4
FITV 2670	Television and Social Change	4
FITV 3548	Film and Gender	4
FITV 3554	African American Cinema	4
FITV 3585	Transnational Asian Media	4
FITV 3588	Global Cinema	4
FITV 3604	Critical Production Studies in Film and Television	4
FITV 3637	Queer Studies in Film and Television	4
FITV 3647	TV, Identity, and Representation	4
FITV 3648	Television, Race, and Civil Rights	4
FITV 3658	Italian Americans on Screen	4
FITV 3688	Global Television	4
FITV 4554	Black Experimental and Art Cinema	4

FITV 4570	Films of Moral Struggle	4
FITV 4660	Ethics of Reality Television	4

Availability

The major in film and television is available at Fordham College at Rose Hill (FCRH) and Fordham College at Lincoln Center (FCLC). Students in Fordham's School of Professional and Continuing Studies may major in film and television only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses. Such students must provide the Communication and Media Studies Associate Chair at their home campus a statement confirming they are able to take day classes in order to fulfill their major requirements.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Film and Television Minor Requirements

Students must pursue either film or television as a sequence of study. The film and television (FITV) minor requires six courses. Required courses are:

Course	Title	Credits
Departmental Introductory Course		
COMM 1010	Introduction to Communication and Media Studies (if taken before spring 2017) or COMM 10 Fundamentals of Communication and Media Studies	

Film, Television, Identity and Difference Course

Select one Film, Television, Identity and Difference course, ordinarily taken senior year ¹

FITV Sequences

Select one of the following sequences:

For students interested in pursuing the film sequence:

FITV 1501	Understanding Film
FITV 2501	History of Film, 1895-1950 or FITV 3501 Film Theory and Criticism

For students interested in pursuing the television sequence:

FITV 1601	Understanding Television
FITV 2601	History of Television or FITV 3601 Television Theory and Criticism

FITV Electives

Select any two courses with the FITV subject code ²

¹ Any course with the FIID attribute code may fulfill this requirement (see list below).

² Any course with the FITV subject code may fulfill this requirement.

Film, Television, Identity, and Difference courses

Courses in this group have the FIID attribute.

These courses explore film and television from minority, ethnic, diasporic, postcolonial, colonial, indigenous, global, feminist, and queer traditions. They center on how race, gender, ethnicity, sexuality, nationality, and disability shape the aesthetics, politics, and ethics of film and television. their home campus a statement confirming they are able to take day classes in order to fulfill their minor requirements.

Journalism Major

The journalism major prepares reporters to serve the public interest in the digital age armed with strong practical skills, a deep grounding in journalism history and ethics, and sharp critical thinking. By synthesizing theory and practice, our graduates will be ready to serve in our rapidly evolving media landscape. Classes are taught by a mix of full-time Fordham professors and media professionals from the New York area. Our faculty, who come from such organizations as *The New York Times*, CBS News, MTV, and *Sports Illustrated*, help our students by bringing real-world experience to the classroom, making sure our graduates are ready to compete in the job market.

The major moves students through introductory, intermediate, and advanced multimedia reporting classes to hone their skills and bring them to a professional level in reporting, writing, and creating digital content. Majors in journalism become grounded in the profession through one required course in ethics, and one course in the "social construction of journalism"—Media Law, Journalism History, or Sociology of News. Journalism majors are also required to take a course in social media to learn how to use such sites as Facebook, Twitter, and Instagram for gathering and disseminating news.

Learning Outcomes

Upon graduation with a journalism major or minor, students will have achieved the following curricular goals:

1. In terms of knowledge, students will develop a critically-informed understanding of journalism as a set of industries and institutions, a site of political and cultural contestation, a space of creative and critical production, and an evolving political and economic ecosystem.
2. Be conversant in journalism history, and be able to connect those histories to current and emerging media forms and issues of pluralism.
3. Be cognizant of the regulatory, economic, occupational, and legal parameters that frame journalistic practice.
4. In terms of skills, students will serve the public good by reporting, writing and creating compelling journalism across media platforms.
5. In terms of values, students will be aware of the ethical and moral challenges that journalists face, and the ways in which such challenges are addressed.
6. Be sensitive to issues of diversity, equity and inclusion as reflected in the theory, practice, and history of journalism.

JOUR 2711	Intermediate Multimedia Reporting ¹	4
	One course in Journalism Ethics, Law, Policy, or History ²	
	Two courses in Intermediate/Advanced Journalism Reporting/Writing ²	
	One journalism-related elective ³	

¹ Students in the class of 2021 and earlier are exempt from this requirement, and may take an additional intermediate/advanced journalism course.

² See Journalism Major (p. 214) for approved courses.

³ Any course with the JOUR subject code or the JOUR attribute code may fulfill this requirement.

Learning Outcomes

Upon graduation with a journalism major or minor, students will have achieved the following curricular goals:

1. In terms of knowledge, students will develop a critically-informed understanding of journalism as a set of industries and institutions, a site of political and cultural contestation, a space of creative and critical production, and an evolving political and economic ecosystem.
2. Be conversant in journalism history, and be able to connect those histories to current and emerging media forms and issues of pluralism.
3. Be cognizant of the regulatory, economic, occupational, and legal parameters that frame journalistic practice.
4. In terms of skills, students will serve the public good by reporting, writing and creating compelling journalism across media platforms.
5. In terms of values, students will be aware of the ethical and moral challenges that journalists face, and the ways in which such challenges are addressed.
6. Be sensitive to issues of diversity, equity and inclusion as reflected in the theory, practice, and history of journalism.

Availability

The minor in journalism is available at Fordham College at Rose Hill (FCRH) and Fordham College at Lincoln Center (FCLC). Students in Fordham's School of Professional and Continuing Studies may minor in journalism only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses. Such students must provide the Communication and Media Studies Associate Chair at their home campus a statement confirming they are able to take day classes in order to fulfill their minor requirements.

Sports Journalism Minor

Sports journalism is offered as a minor only. The minor in sports journalism focuses on developing broad journalistic skills and specific sports journalism training. Students examine issues of ethics, race, and gender in the world of athletics within the interdisciplinary context of business, law, and sociology.

Learning Outcomes

Upon graduation with a sports journalism minor, students will have achieved the following curricular goals:

1. In terms of knowledge, students will develop a critically-informed understanding of journalism as a set of industries and institutions, a site of political and cultural contestation, a space of creative and critical production, and an evolving political and economic ecosystem.

2. Through specific sports journalism training, students will learn fundamental journalistic skills as well as multimedia production skills to prepare for a career in sports journalism.
3. Students will gain knowledge of the sports industry with critical thinking of the structure, key actors, and trends within the industry as well as challenges facing the industry and the impact of sports on society.
4. Students will be able to examine issues of ethics, race, and gender in the world of athletics within the interdisciplinary context of business, law, and sociology.
5. Students will also consider the economic, legal and sociological framings of sport, all of which feed into shaping the production and reception of sports media.
6. In terms of values, minors will be aware of the ethical and moral challenges that journalists face, and the ways in which such challenges are addressed.

Requirements

The sports journalism minor requires six courses.

Availability

The minor in sports journalism is available at Fordham College at Rose Hill (FCRH) and Fordham College at Lincoln Center (FCLC). The sports journalism minor is not available to journalism majors due to overlap between the requirements. The majority of sports-focused journalism classes are taught at the Rose Hill campus.

Students in Fordham's School of Professional and Continuing Studies may minor in sports journalism only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses. Such students must provide the Communication and Media Studies Associate Chair at their home campus a statement confirming they are able to take day classes in order to fulfill their minor requirements.

Communications and Media Management

Foundation coursework in communication and media management is common to all Gabelli School students via the business core. Students who want to investigate this area further may take elective courses or pursue a secondary concentration.

The secondary concentration allows students to strengthen their personal portfolios through advanced study. Depending on the coursework chosen, students will:

- Enhance their communicative skills with specific application to their chosen major, and/or
- Increase their understanding of the communication, information media, and entertainment industries, including television and cable, digital and social media, and new media. Studies will emphasize administrative, financial, and marketing issues in these industries.

No matter what their major or primary concentration, students will find valuable points of connection in their communication and media management coursework. Each course ties communication and media management to real-world issues in accounting, business economics, entrepreneurship, finance, management, human resource management, management of information and communications systems, or marketing.

Note: Information about programs in the Communication and Media Studies department (p. 202) at Fordham's liberal arts schools (FCRH, FCLC, PCS) is listed separately.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

Visit the Communications and Media Management Area web page.

Programs

Concentration

- Concentration in Communications and Media Management (p. 217)

Related Concentration

- Concentration in Digital Media and Technology

Concentration in Communications and Media Management

Requirements

Communications and Media Management is available to Gabelli students as a secondary concentration only.

Students pursuing this concentration must complete three courses from the subject code CMBU (p. 1079) numbered 3000 and higher.

Note: Information about programs in the Communication and Media Studies department (p. 202) at Fordham's liberal arts schools (FCRH, FCLC, PCS) is listed separately.

Comparative Literature

Comparative literature (formerly literary studies) is a bi-campus, interdepartmental, interdisciplinary program housing the comparative literature major. The program is co-directed, with the assistance of an executive committee. The program periodically consults a board of advisers made up of prominent scholars from various academic institutions.

The comparative literature major is concerned with the study of literature from a broad range of cross-cultural and interdisciplinary perspectives. Students may concentrate on the study of literature in at least two modern or classical languages, or in a different comparative context, such as literature and a textual discipline in the humanities or social sciences (e.g., anthropology, philosophy, political science, and others), literature and film, or literature and the creative arts, among others. The comparative literature major requires advanced proficiency in at least one classical or modern foreign language, and advanced coursework in at least one Western or non-Western literary tradition other than English.

Program Activities

The Program offers a broad range of activities for undergraduates: *Bricolage*, Fordham's journal of literary studies, is edited by comparative literature majors and minors, under the guidance of a faculty adviser, and showcases critical essays by students on literature, culture, film, the arts, and theory; the Comparative Literature Club organizes social activities (e.g., theater outings); invited speakers offer lectures, talks, and seminars, either designed for or open to undergraduates; the program regularly sponsors film screenings in conjunction with courses and lectures.

Awards

Theses written by comparative literature majors and minors are eligible for the Katie Fraser Prize for Excellence in comparative literature (for majors) and the Literary Studies Prize for Work in Comparative Literature (for minors).

Internships

Students who wish to pursue an internship and receive college credit for it should contact the Comparative Literature major adviser and Career Service to identify internship opportunities relevant to their field of study and professional interests. To receive college credit, students sign up for a two-credit tutorial with the major adviser, and provide weekly reports on their experience, in addition to meeting with the adviser on a regular basis during the semester. Requirements may vary depending on the type of internship. In some cases, students may be eligible for more credits depending on the relevance of the experience to their course of study, and contingent on the completion of a substantial final project.

Honors in Comparative Literature

Honors in Comparative Literature is awarded on the basis of grade point average in the major (3.5), and the quality of the senior thesis and its presentation at the Senior Project Roundtable.

For more information

Visit the Comparative Literature program web page.

Contribution to the Core

Comparative literature offers COLI 2000 Texts and Contexts, which fulfills the core requirement in literature in English and counts toward the distributive requirement in *Eloquentia Perfecta* 2. Unless otherwise specified, nonmajors may take the program's elective (major) offerings toward the core requirement in Advanced Disciplinary Courses in Literature. In addition, comparative literature offers courses that fulfill the distributive requirements in American pluralism, global studies, *Eloquentia Perfecta* 3 and 4 (Values) seminars as well as courses that fulfill the interdisciplinary capstone requirement.

Programs

- Comparative Literature Major (p. 218)
- Comparative Literature Minor (p. 219)

Comparative Literature Major

Requirements

Early in their program of study and in consultation with the comparative literature major adviser, students choose to take courses and write their thesis in one of the following areas of study:

- Literature across the languages
- Literature and diaspora studies
- Literature and the humanities, sciences or social sciences (e.g., anthropology, philosophy, political science or the natural sciences among others)
- Literature and film or media
- Literature and the creative arts
- Comparative theories

Course	Title	Credits
Major Requirements		
<i>One of the following classes</i>		
COLI 3000	Literary Theories	
ENGL 3000	Literary Theories	
ENGL 3045	Theory for English Majors	
Electives		
Select at least two comparative literature courses numbered COLI 3001 or above		
Select at least two foreign language and literature electives ¹		
Select up to three elective courses (3000 and above) chosen from among cross-listed courses from other departments ²		
Capstone		
A senior capstone seminar (4000 and above), open to juniors with permission. This capstone course varies in topic, and has a seminar format and a strong theoretical component		
Thesis		
COLI 4998	Senior Thesis Tutorial in Comparative Literature (All majors are required to write a thesis under the direction of an adviser and a second reader.) ³	4

¹ Any two courses (normally in the same language) offered by the departments of Languages and Cultures (listed here) or Classical Languages and Civilization (listed here) numbered 2500 and above.

These courses will allow the students to demonstrate an ability to read and analyze literary texts written in a language other than English.

² (e.g., African and African American studies, communication and media studies, English, history, languages and cultures, philosophy, political science, visual arts) or interdisciplinary programs (e.g., Latin American and Latino studies, Medieval studies, urban studies, women's studies) appropriate to the student's program of study or concentration.

³ Proposals must be approved at the end of the student's junior year.

In addition, in their senior year students participate in the Senior Project Roundtable, which offers them the opportunity to present and discuss their final projects in a public forum with faculty and students from comparative literature and other disciplines.

Majors are encouraged to pursue a study abroad program, usually in their junior year. It is strongly recommended that students who plan to pursue graduate work in comparative literature develop a reading knowledge in a second foreign language.

Comparative literature majors may take courses at Fordham School of Professional and Continuing Studies at Lincoln Center only if these courses are offered under the COLI subject (p. 1083), or are officially cross-listed.

Learning Goals

Students who major in comparative literature will be able to:

- **Goal A**
 - 1. Understand and interpret a wide variety of cultural artifacts from across the globe—from poems and films to memes—in their wider historical, political, linguistic, and aesthetic contexts using the methods learned from multiple academic disciplines.
 - 2. Cultivate curiosity, creativity, and critical thinking about the diversity of human cultural production and to understand and practice the arts of interpretation and criticism for the ends of social justice.
- **Goal B**
 - 1. Interpret a literary text or other cultural artifact in a non-native target language and to develop advanced skills in order to compare texts from a variety of different traditions, genres, periods, and geographic areas; and concurrently to consider the role of translation in the production of textual and cultural meaning when reading or engaging cultural artifacts.
 - 2. Develop original research displaying engagement with critical theories, clear knowledge of research protocols, and interdisciplinary analysis of demonstrable significance within the field of Comparative Literature.

Availability

The major in comparative literature is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

16.0104 - Comparative Literature.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Comparative Literature Minor Requirements

The minor in comparative literature consists of six courses to be distributed as follows:

Course	Title	Credits
COLI 3000 or ENGL 3045	Literary Theories Theory for English Majors	4

Select five elective courses (3000 and above) selected in consultation with an adviser

Comparative literature minors are not required to write a senior thesis, but may choose to do so in consultation with their comparative literature adviser.

Availability

The minor in comparative literature is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Computer and Information Sciences Computer Science

The curriculum in computer science is oriented toward computing methods and systems. It emphasizes systems analysis, software design and programming, analytic reasoning, computer architecture, and the theory of computation. Students will learn the process and algorithms to analyze and solve complex problems and also use the computer and the Internet as a problem-solving tool. Students graduating from the program will be prepared for careers in computer science, information technology, system design, telecommunications, and network applications, both in the public and private sectors. Students will also be prepared for further graduate study in computer science or other related area.

Students wishing to major in computer science should take CISC 1600 Computer Science I and CISC 1400 Discrete Structures in the first semester of their first year year (or as soon as possible) and CISC 2000 Computer Science II in the second semester of their first year.

Accelerated Master's Program

Please read the Graduate School of Arts and Sciences Accelerated Master's Programs (p. 137) section of this bulletin for more information. Interested majors should speak with the associate chair of graduate studies in the fall of junior year. Students do not need to include GRE scores unless they are planning to apply for financial aid after finishing the bachelor's degree.

The minimum GPA to be eligible to apply is 3.2 or higher. This policy applies to FCRH, FLC, and PCS. Students opting for early admission must take two graduate courses in their senior year, which count toward both their B.A. (or B.S.) and M.S. degree. Graduate courses taken while still at the college must be approved by the associate chair for graduate studies of the department. Applications are made online through the Graduate School of Arts and Sciences website.

Program Activities Courses For Nonmajors

1. Students wishing a general familiarity with computers, or computer and information sciences and technology, but who do not wish to major in computer science, are advised to take any of the following courses, which do not require any CIS prerequisites, as soon as possible:

Course	Title	Credits
CISC 1100 or CISC 1400	Structures of Computer Science Discrete Structures	3 to 4
CISC 1600 & CISC 1610	Computer Science I and Computer Science I Lab	4

CISC 1800	Introduction to Computer Programming	3
CISC 2350	Information and Web Programming	4
CISC 2500	Information and Data Management	4
CISC 2530	Digital Video and Multimedia	4
CISC 2540	Introduction to Video Game Design	4
CISC 2850	Computer and Data Analysis	4
CISC 4001	Computers and Robots in Film	4
CISC 4006	Brains and Behavior in Beasts and Bots	4

- Students who wish to gain a basic foundation in computer programming without pursuing a major or minor in Computer Science should take CISC 1800 Introduction to Computer Programming.
- Students who specifically wish to gain familiarity with web page construction and digital media and graphics should take CISC 2350 Information and Web Programming, CISC 2530 Digital Video and Multimedia, or CISC 2540 Introduction to Video Game Design.
- Students wishing to have some knowledge on the applications of computer and information sciences and their interface with biomedicine and health can take CISC 4020 Bioinformatics.
- Students majoring in science, mathematics, and social science, who wish to pursue their further graduate studies in a field or subject closely related to (or utilizing) quantitative, qualitative, and algorithmic reasoning should take CISC 4631 Data Mining in addition to those courses listed in (1) above.
- Students can take a combination of courses (listed in (1), (2), (3) and (4) above) to fulfill a minor in computer science or information technology and systems (see the required minor courses in Minor section) or to prepare intellectual skills necessary in their major study.

3-2 Cooperative Program in Engineering

This joint five-year program with Columbia University leads to a B.A. degree from Fordham University and a B.S. degree in engineering from Columbia University. A description of the program is given under the Cooperative Program in Engineering (p. 135) section of this bulletin. The department provides a specialized set of CS major requirements for 3-2 engineering students (p. 222). Interested students should consult the computer and information sciences department as early as possible.

For more information

Visit the Computer and Information Sciences department web page.

Contribution to the Core

The Department of Computer and Information Sciences offers CISC 1100 Structures of Computer Science, CISC 1400 Discrete Structures, CISC 1600 Computer Science I (CS1), and CISC 1800 Introduction to Computer Programming, each fulfilling the mathematical and computational reasoning core requirement. We encourage science and social science majors, and those interested in receiving a more in depth understanding of algorithmic and quantitative reasoning, to take CISC 1400 Discrete Structures instead of CISC 1100 Structures of Computer Science. Students majoring or minoring in Computer Science will need to take CISC 1600 Computer Science instead of CISC 1800 Introduction to Computer Programming.

The department also offers CISC 2540 Introduction to Video Game Design, which satisfies the EP3 core requirement, and CISC 4001

Computers and Robots in Film and CISC 4006 Brains and Behavior in Beasts and Bots, which satisfy the ICC core requirement.

The department also offers CISC 4650 Cyberspace: Issues and Ethics and CISC 4660 Minds, Machines, and Society, which fulfill the Values Seminar/ EP4 core requirement.

Programs

Majors

- Computer Science Major (p. 221)
- Math and Computer & Information Sciences Major (p. 224)

Minors

- Bioinformatics Minor (p. 220)
- Computer Science Minor (p. 223)
- Cybersecurity Minor (p. 223)

Bioinformatics Minor

Bioinformatics studies the sequence, structure, and function of genes and proteins in all living organisms, including the human species. The advent of high throughput next-generation sequencing (NGS) has accelerated the pace of genome-wide profiling of biological sequences from various assays (Chip-Seq, RNA-seq, DNA-seq, Hi-C, etc.), thereby enabling multiomics analysis to bring deeper insights into the genetics of millions of species on the planet. Therefore, we now have access to thousands of organisms' genome sequences, including their annotations on the respective protein-coding sequences. Scientists all over the world are constantly working to understand gene expression and chromatin patterns across many cell types covering the full human genome. Due to this, bioinformatics has seen exponential growth in academic research and linear growth in the biomedical and bioinformatics industry, adding more than 10% additional jobs each year.

A minor in bioinformatics is available on both the Rose Hill and Lincoln Center campuses. Bioinformatics is an interdisciplinary field comprising mainly computer sciences and biological sciences. At Fordham, bioinformatics students focus on learning the key biological concepts as well as relevant algorithms and software tools for analyzing large-scale biological datasets. Some examples of the topics are genomics, proteomics, phylogenetics, systems biology, DNA microarray gene expression, next-generation sequencing (NGS) data analysis, genomic medicine, biomarkers for cancer and disease, drug discovery and design for disease and disorders, database and data mining, network form and function, and ESL (ethical, societal, and legal) issues.

For more information

Visit the Bioinformatics minor program webpage.

Requirements

The following courses are required for the Bioinformatics minor.

Course	Title	Credits
CHEM/NSCI 1321	General Chemistry I (no lab)	4
CHEM/NSCI 1322	General Chemistry II (no lab)	4
MATH 1205	Applied Statistics (or equivalent)	3
BISC 2539/ NSCI 3133	General Genetics	3

BISC 2549/ NSCI 3833	General Genetics Lab	
BISC 3754/ NSCI 3154	Cell Biology	3
CISC 4020	Bioinformatics	4

Intro Biology I and II with Lab must be taken to fulfill the Natural Science Core Requirement (p. 52).

Course	Title	Credits
BISC/NSCI 1403	Introductory Biology I	3
BISC/NSCI 1413	Introductory Biology Lab I	2
BISC/NSCI 1404	Introductory Biology II	3
BISC/NSCI 1414	Introductory Biology Lab II	2

Certain majors are required to complete certain additional courses (often taken as electives in their major) to earn the Bioinformatics minor.

Computer Science majors (p. 221) must also take:

- CISC 2500 Information and Data Management
- CISC 4631 Data Mining.

Biological Sciences (RH) (p. 187) majors (p. 187) must also take:

- CISC 3500 Database Systems
- CISC 1400 Discrete Structures
- CISC 1600 Computer Science I /CISC 1610 Computer Science I Lab or CISC 1800 Introduction to Computer Programming (Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.)
- CISC 4631 Data Mining
- Either BISC 3754 Cell Biology or BISC 3752 Molecular Biology as an elective toward the major.

Natural Science (LC) majors (p. 322) must also take:

- CISC 3500 Database Systems
- CISC 1400 Discrete Structures
- CISC 1600 Computer Science I /CISC 1610 Computer Science I Lab or CISC 1800 Introduction to Computer Programming (Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.)
- CISC 4631 Data Mining
- NSCI 3133 Genetics Lecture taken toward the major.
- NSCI 4176 Molecular Biology Lecture or NSCI 3154 Cell and Development Biology Lecture taken toward the major.

General Science (RH) majors must also take:

- CISC 3500 Database Systems
- CISC 4597 Artificial Intelligence
- CISC 4631 Data Mining
- BISC 2539 General Genetics/BISC 2549 General Genetics Lab taken toward the major.

- Either BISC 3754 Cell Biology or BISC 3752 Molecular Biology as an elective toward the major.

Integrative Neuroscience majors (p. 270) must also take:

- CISC 3500 Database Systems
- CISC 1400 Discrete Structures
- CISC 1600 Computer Science I /CISC 1610 Computer Science I Lab or CISC 1800 Introduction to Computer Programming (Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.)
- CISC 4631 Data Mining
- NSCI 3133 Genetics Lecture or BISC 2539 General Genetics taken toward the major.
- NSCI 4176 Molecular Biology Lecture or NSCI 3154 Cell and Development Biology Lecture or BISC 3754 Cell Biology or BISC 3752 Molecular Biology as an elective toward the major. (p. 254)

Availability

The minor in bioinformatics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in bioinformatics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Computer Science Major Requirements

The computer science major may be taken toward either the Bachelor of Arts (B.A.) or the Bachelor of Science (B.S.) degree. The B.A. degree in computer science requires a total of 14 courses, and the B.S. degree in computer science requires a total of 16 courses.

Course	Title	Credits
Required courses		
CISC 1400	Discrete Structures	4
CISC 2100 & CISC 2110	Discrete Structures II and Discrete Structures II Lab ¹	4
CISC 1600 & CISC 1610	Computer Science I and Computer Science I Lab ²	4
CISC 2000 & CISC 2010	Computer Science II and Computer Science II Lab	4
CISC 2200	Data Structures	4
CISC 3500	Database Systems	4
CISC 3593	Computer Organization	4
CISC 3595	Operating Systems	4
CISC 4080	Computer Algorithms	4
CISC 4090	Theory of Computation	4
CISC 4615	Data Communications and Networks	4

For the Bachelor of Arts degreeSelect two electives³**For the Bachelor of Science degree**

CISC 4631 Data Mining

MATH 1206 Calculus I^{4,5}Select three electives³

¹ For students entering prior to Fall 2015 (class of 2020 or earlier), CISC 4700 Network and Client Server is required instead of CISC 2100 Discrete Structures II.

² Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.

³ Elective courses are selected from department courses (which may include some graduate courses) or in cognate areas in consultation with a department adviser. One elective CISC course (p. 1102) must be numbered 2000 or above, while the remaining elective must be numbered 3000 or above. The following courses may not count toward this requirement: CISC 4001 Computers and Robots in Film, CISC 4650 Cyberspace: Issues and Ethics, and CISC 4660 Minds, Machines, and Society.

⁴ Required for students entering in Fall 2017 (class of 2022) and later.

⁵ MATH 12AB Transfer Calculus AB and MATH 12BC Transfer Calculus BC (transfer credit from AP Calculus AB or AP Calculus BC) also fulfill this requirement.

3-2 Engineering Program

Computer science majors pursuing the Cooperative Program in Engineering have a slightly different set of requirements to fulfill to complete their major in computer science. All courses are required.

Course	Title	Credits
Computer Science Courses		
CISC 1600 & CISC 1610	Computer Science I and Computer Science I Lab ¹	4
CISC 2000 & CISC 2010	Computer Science II and Computer Science II Lab	4
CISC 2200	Data Structures	4
CISC 3500	Database Systems	4
CISC 3593	Computer Organization	4
CISC 3595	Operating Systems	4
CISC 4080	Computer Algorithms	4
CISC 4090	Theory of Computation	4
CISC 4615	Data Communications and Networks	4
CISC 4631	Data Mining	4
Mathematics Courses		
MATH 1206	Calculus I ²	4
MATH 1207	Calculus II	4
MATH 2001	Discrete Mathematics	4
MATH 2004	Multivariable Calculus I	4
MATH 2005	Multivariable Calculus II	4
MATH 2006	Linear Algebra I	4
MATH 3002	Differential Equations	4
Physics Courses³		
PHYS 1701 or NSCI 1701	Physics I	3

PHYS 1511 or NSCI 1511	Physics I Lab General Physics Lab I	1
PHYS 1702 or NSCI 1702	Physics II Physics II	3
PHYS 1512 or NSCI 1512	Physics II Lab General Physics Lab II	1
Chemistry Courses³		
CHEM 1321 or NSCI 1321	General Chemistry I General Chemistry Lecture I	4
CHEM 1331 or NSCI 1331	General Chemistry Lab I General Chemistry Lab I	2

¹ Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.

² MATH 12AB Transfer Calculus AB and MATH 12BC Transfer Calculus BC (transfer credit from AP Calculus AB or AP Calculus BC) also fulfill this requirement.

³ Students at the Lincoln Center campus typically fulfill these requirements via courses with Natural Sciences courses (subject code NSCI). Students at the Rose Hill Campus typically fulfill these requirements with Physics (subject code PHYS) and Chemistry (subject code CHEM) courses.

These courses fulfill only Fordham University's requirements to earn the B.S. in computer science for 3-2 students. Additional Columbia requirements need to be fulfilled for acceptance into one of Columbia's engineering tracks. Consult the 3-2 program director for additional guidance.

Availability

The major in computer science is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

11.0101 - Computer and Information Sciences, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Computer Science Minor Requirements

Students wishing to minor in computer science take the following six courses:

Course	Title	Credits
Required Courses		
CISC 1100 or CISC 1400	Structures of Computer Science (or equivalent) Discrete Structures	3 to 4
CISC 1600 & CISC 1610	Computer Science I and Computer Science I Lab ¹	4
CISC 2000 & CISC 2010	Computer Science II and Computer Science II Lab	4

Electives

Select three elective courses in consultation with a department adviser ²

¹ Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.

² Courses with the subject code CISC (p. 1102) fulfill this requirement. One CISC elective course may be numbered 2000 or above, while the remaining electives must be numbered 3000 or above. The following courses may not count toward this requirement: CISC 4001 Computers and Robots in Film, CISC 4650 Cyberspace: Issues and Ethics, and CISC 4660 Minds, Machines, and Society.

Students majoring in mathematics and computer & information sciences who minor in computer science may not apply any of the courses used for the major towards the minor. Such students complete the following, alternative requirements for the minor.

Course	Title	Credits
Six CISC elective courses		
Three electives numbered 2000 or above ^{1,2}		9 to 12
Three electives numbered 3000 or above ²		12

¹ CISC 2000 Computer Science II/CISC 2010 Computer Science II Lab may not count towards this requirement.

² The following courses may not count towards this requirement: CISC 4001 Computers and Robots in Film, CISC 4650 Cyberspace: Issues and Ethics, and CISC 4660 Minds, Machines, and Society.

Learning Goals

The learning goals of the computer science minor for students are to:

- Acquire proficiency in programming languages to instruct computers in performing specific tasks.
- Develop logical and computational thinking skills to analyze problems and identify appropriate computing and mathematical needs for problem-solving.
- Learn how to apply computer languages and mathematical principles in developing algorithms, tools, and software systems.

- Finally, learn how to apply fundamental computing concepts and topics that can complement students' primary studies and career paths.

Availability

The minor in computer science is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Cybersecurity Minor

Cybersecurity is an emerging and fast-growing field in computer and information sciences, and it plays an essential role in modern society. There is a huge demand for cybersecurity professionals in the market due to the exponential increase of cyber intrusions and attacks on governmental agencies and commercial organizations.

A primary aim of the cybersecurity minor is to engage non-CIS students with this exciting field so as to augment their major field of study with the pragmatics of cybersecurity techniques and knowledge. It could be attractive for traditional computer science, mathematics, physics, business, or even biology majors to have a minor in cybersecurity.

A unique feature of Fordham's cybersecurity minor is its comprehensive integration of problem-solving skills with a rigorously theoretical background in cybersecurity. It is anticipated that this minor will opportunely serve the needs of undergraduate students enrolled in different majors interested in obtaining cybersecurity positions in governmental agencies and commercial organizations.

Students majoring in information science (INSC) or information technology and systems (INTS) may not minor in cybersecurity because these majors already include most of the courses as requirements. Students majoring in computer science (COSC) may minor in cybersecurity provided that four of the courses used for the minor are not applied to the major. Students majoring in mathematics and computer and information sciences (MTCS) may minor in cybersecurity provided that none of the courses used for the minor are applied to the major. A substitute computer science course will need to be taken in place of CISC 1600 Computer Science I/CISC 1610 Computer Science I Lab for the minor, with approval of the minor adviser.

Learning Outcomes

- Mastery of fundamental cybersecurity concepts
- Practical problem-solving in real-world scenarios
- Ethical considerations and professional responsibility
- Development of core cybersecurity competencies

For more information

Visit the Cyber Security program web page.

Requirements

The cybersecurity minor requires the following six courses:

Course	Title	Credits
CISC 1600 & CISC 1610	Computer Science I and Computer Science I Lab ¹	4
CISC 2500	Information and Data Management	4
CISC 3580	Cybersecurity and Applications	4

CISC 3600	Secure Cyber Networks	4
CISC 4615	Data Communications and Networks	4
CISC 3650	Forensic Computing	4

¹ Students majoring in math & computer science (MTCS) must replace CISC 1600/1610 with an alternative computer science course approved by the minor advisor.

Please contact the computer and information sciences department chair for additional information on this program.

Availability

The minor in cybersecurity is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in cybersecurity only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Math and Computer & Information Sciences Major

The major, offered jointly by the Department of Computer and Information Sciences (p. 219) and the Department of Mathematics (p. 312), is designed to give students an excellent background in computer science and a solid foundation in those mathematical disciplines necessary for a full understanding of computer and information sciences. The program fosters both careful reasoning and a deep understanding of technology, enhancing graduates' marketability. The high degree of difficulty makes this joint major attractive to recruiters from the technology industry; it also prepares students who wish to pursue graduate study in computer science and other applied quantitative fields. Please note: There is no minor in this area; students are instead encouraged to minor in either mathematics or computer and information sciences.

Internships

Some majors in this program have completed internships, but such internships are not required and do not count toward the two electives in the major.

For more information

Visit the Math and Computer & Information Sciences program page.

CIP Code

27.9999 - Mathematics and Statistics, Other.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

A minimum grade of C- is required for each course counting toward this joint major. An overall average of 2.0 must be separately maintained in mathematics and computer and information sciences courses.

Required courses and sufficient electives to fulfill the major are available on both campuses. Course descriptions are available from each department.

Majors in this program are eligible for honors at graduation in mathematics and computer & information sciences.

The major requires 14 total courses: 10 common required courses, two courses in one concentration, and two electives. *Students must declare a concentration in mathematics or computer and information sciences.* The 10 common required courses are identified below.

Course	Title	Credits
Required Courses		
CISC 1600 & CISC 1610	Computer Science I and Computer Science I Lab ¹	4
CISC 2000 & CISC 2010	Computer Science II and Computer Science II Lab	4
CISC 2200	Data Structures	4
CISC 4080	Computer Algorithms	4
CISC 4090	Theory of Computation	4
MATH 1207	Calculus II	4
MATH 2004	Multivariable Calculus I	4
MATH 2001	Discrete Mathematics	4
MATH 2006	Linear Algebra I	4
MATH 4006	Numerical Analysis	4

Electives

Select two electives in mathematics (four credit courses numbered above 2000) or computer and information sciences (numbered above 2000, possibly including 5000-level graduate courses) ²

Concentration

Select one of the following:

Mathematics Concentration

Computer and Information Sciences Concentration

¹ Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.

² At least one elective must be from mathematics if the computer and information sciences concentration is chosen and at least one elective must be in computer and information sciences if the mathematics concentration is chosen. The following courses may not count toward this requirement: CISC 4001 Computers and Robots in Film, CISC 4650 Cyberspace: Issues and Ethics, and CISC 4660 Minds, Machines, and Society.

Concentrations

Each student must also take two courses from one of the following two concentrations. Courses from the concentration not chosen may be used as electives.

Mathematics Concentration

Course	Title	Credits
Select two of the following:		
MATH 3006	Probability	8
MATH 3007	Statistics	

MATH 3002	Differential Equations
MATH 4022	Partial Differential Equations

Computer and Information Sciences Concentration

Course	Title	Credits
Select two of the following:		8
CISC 3500	Database Systems	
CISC 3593	Computer Organization	
CISC 3595	Operating Systems	
CISC 4597	Artificial Intelligence	
CISC 4615	Data Communications and Networks	
CISC 4631	Data Mining	

Availability

The major in math and computer & information sciences is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in math and computer & information sciences only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

Dance

The dance program leads to the Bachelor of Fine Arts Degree and is offered jointly by the Ailey School and Fordham University. Dance studio courses are given by the faculty of the Ailey School at their state-of-the-art studios adjacent to the Fordham campus. Academic coursework is based at the Fordham campus where it is taught by the University's arts and sciences faculty.

Students complete a broad curriculum of a minimum of 146 credits comprised of dance technique, creative, and dance academic classes, and liberal arts courses. The program's goals are to develop graduates who are highly versatile dance technicians, adept creators of dance movement, well-educated in the liberal arts, and knowledgeable about the history and interpretation of the arts.

The program offers a specialization in dance performance. First-year students take placement examinations in three major techniques—Horton, Graham-based modern, and classical ballet—so that each student can be placed appropriately by the Ailey School's faculty advisers.

The focus for first years and sophomores is on the development of discrete skills in the three major techniques, classes that are taken daily by each student. These skills are supported by somatic classes (body conditioning, barre à terre, and yoga) that both strengthen the body and render it more supple. Additional classes in West African dance, jazz, and other techniques further broaden students' technical range and complement their training in the three basic techniques. All dance technique classes are sequenced carefully with appropriate prerequisites.

At the same time, students learn to analyze the body both experientially and theoretically in their anatomy and kinesiology course. Courses in improvisation and dance composition develop students' creativity while also teaching the craft of choreography. These creative courses complement the rigorous precision required of students in their technique classes.

In the junior year, students' dance technique skills are expected to be strong and their creative expertise well honed. At this point in their training, they are ready to learn the basics of modern and ballet partnering and repertory, both classical and contemporary. Repertory works are chosen annually to meet the needs of each class of students and to prepare them to meet the demands of the profession. They spend six to eight weeks working with each guest choreographer/artist-in-residence (AIR), or selected members of the Ailey School faculty, and perform the works in formal studio concerts scheduled throughout the year.

In their senior year, students further refine their dance technique and focus on showcasing their performance or choreographic skills through performance and the senior project. Under the guidance and supervision of the Ailey School faculty, students perform at locations in the metropolitan area during the winter. In the spring preceding the senior year, each junior meets with the B.F.A. director and B.F.A. codirector to determine the focus of that senior project. The focus will be on performance or choreography, depending upon the strengths and interests of each student, as approved by the Ailey School director, B.F.A. codirector and selected Ailey School faculty, and will culminate in B.F.A. concerts.

The progress of each student is formally evaluated at the end of each term with written evaluations and individual conferences held with the B.F.A. director, codirectors, and program staff. In addition, at the end of the first year and sophomore year, jury exams are held and all students are reassessed for their continuation in the B.F.A. program. This assessment will consist of a review of:

1. each student's written dance evaluation
2. their academic record
3. a dance jury composed of:
 - B.F.A. director
 - B.F.A. codirector
 - department chairpersons of the Alvin Ailey School
 - selected faculty members

All B.F.A. students are expected to maintain satisfactory progress in their dance classes at the Ailey School and academic classes at Fordham University.

Program Activities

Apprentice/Membership Opportunities

Full memberships in professional dance companies are available to B.F.A. students in their senior year. Apprentice memberships in professional dance companies are available to B.F.A. students in their junior or senior years. These opportunities are only available by invitation or audition and are subject to the approval of the director and codirector of the program. Apprentice membership courses include:

Course	Title	Credits
DANC 3910	Rehearsal Seminar	3
DANC 3911	Rehearsal Seminar	3

DANC 3920	Lecture: Demonstration Lab	3
DANC 3921	Lecture: Demonstration Lab	3

In addition, students in these courses must register for advanced level Ballet, Horton, and Modern technique courses. Full membership courses include:

Course	Title	Credits
DANC 4910	Rehearsal Seminar	3
DANC 4911	Rehearsal Seminar	3
DANC 4920	Lecture: Demonstration Lab	3
DANC 4921	Lecture: Demonstration Lab	3
DANC 4930	Performance Seminar	3
DANC 4931	Performance Seminar	3
DANC 4940	Teaching Lab	3
DANC 4941	Teaching Assistant	3

Dance Courses for Nonmajors

Fordham undergraduates not pursuing the B.F.A. may enroll for up to four two-credit courses at the Ailey School and apply their courses toward their credit requirement for graduation. Students wishing to take intermediate and advanced level courses must first audition at the Ailey School before registering. In addition to their Fordham tuition, each student will be billed an additional fee per course through Fordham. For further information, please contact the assistant dean. Courses for nonmajors are numbered from DANC 1300 to 1399 and include "Nonmajors" in their title.

For more information

Visit the Dance program web page.

Programs

- Dance Major (p. 226)

Dance Major

Admissions

Admission Requirements and Procedures

Students interested in the Ailey/Fordham B.F.A. program are expected to meet the following general criteria:

- Superior talent and potential for a performing career as a dance artist, and good technique training in modern dance and classical ballet
- Evidence of academic ability as described in the Admission chapter of this bulletin

Candidates should complete the following admission procedures:

- Submit the dance application to the Ailey School by November 1 and the academic application to the Fordham University Office of Admission also by November 1. Applicants should apply for need- and merit-based financial assistance by February 1. Those applicants with questions may contact the Office of Undergraduate Admission at enroll@fordham.edu or 718-817-4000.
- Take the dance audition by invitation in New York or another city in January, February, or March.

While this program does not have a definitive age limit, B.F.A. students are expected to be of an appropriate age to be able to participate fully in all aspects of the program and accomplish the rigorous dance requirements for graduation within the established time frame. Students who wish to transfer into the B.F.A. program must satisfy the dance and academic criteria for advanced standing at both the Ailey School and Fordham University. The program's four-year length of study may be shortened to three years in the case of very advanced dance students with strong previous undergraduate records. Ailey and Fordham are committed to excellence through diversity. Male-identifying students and students of color are especially encouraged to apply.

Students in good academic standing may pursue a second major or add a minor to their course of study. Many students have pursued African and African American Studies, economics, English, math, new media & digital design, psychology, etc. However, students must continue to prioritize the requirements of the Ailey/Fordham B.F.A. in Dance program.

Students with dance potential who do not meet the B.F.A. admission criteria are encouraged to audition for the Ailey School's other professional training programs and to reapply to the B.F.A. program.

CIP Code

50.0301 - Dance, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Please note that each course number describes a course that runs for one semester, either fall or spring.

Academic Courses

Course	Title	Credits
Core Curriculum ¹		
ENGL 1102	Composition II	3
ENGL 2000	Texts and Contexts	3
THEO 1000	Faith and Critical Reason	3
PHIL 1000	Philosophy of Human Nature	3
Understanding Historical Change (HC attribute)		3
Social Science (SSCI attribute)		
Foreign Language ²		6 to 8
2 courses in any modern or classical language or one advanced course for advanced language students		
Advanced Disciplinary Study (one of the following):		3
PHIL 3000	Philosophical Ethics	
Sacred Texts and Traditions (STXT attribute)		
Values Seminar (VAL attribute)		
Dance Academics		
DANC 1720 & DANC 1721	Anatomy and Kinesiology I and Anatomy and Kinesiology II	6
MUSC 1210 & MUSC 1211	Music for Dancers I and Music for Dancers II	6

DANC 2001 & DANC 2010	World Dance History and Black Tradition in American Dance	6
THEA 4301	Performance and Art	3

Electives

Any two liberal arts courses ³		6 to 8
---	--	--------

¹ Specific information about core requirements can be found on the following pages: Composition II (p. 60); Texts & Contexts (p. 54); Faith & Critical Reason (p. 53); Philosophy of Human Nature (p. 53); Understanding Historical Change (p. 54); Social Science (p. 54); Philosophical Ethics (p. 35); Sacred Texts and Traditions (p. 35); Values Seminar (p. 50)

² More information about the foreign language requirement can be found on the Fordham website. When referencing this page, please note that B.F.A. students must only complete two courses of a foreign language; a single five-credit, 1001-level course of a foreign language also fulfills the requirement.

³ To view possible liberal arts courses, visit department pages (p. 78).

Dance Technique and Creative Courses

In their first year, all students are required to take ballet and either Horton or modern daily. Thereafter, students are required to take ballet, Horton, and modern each semester, reaching the most advanced level in a minimum of two of these three major techniques during the senior year.

Course	Title	Credits
Major Dance Techniques		
<i>Ballet</i>		
DANC 1501 & DANC 1502	Ballet I and Ballet II	6
DANC 2510 & DANC 2511	Ballet III and Ballet IV	6
DANC 3501 & DANC 3502	Ballet V and Ballet VI	6
DANC 4510 & DANC 4511	Ballet VII and Ballet VIII	6
<i>Horton</i>		
DANC 1601 & DANC 1602	Horton I and Horton II	6
DANC 2610 & DANC 2611	Horton III and Horton IV	4

DANC 4610 & DANC 4611	Horton VII and Horton VIII	4
<i>Modern</i>		
DANC 1701 & DANC 1702	Modern I and Modern II	5
DANC 2710 & DANC 2711	Modern III and Modern IV	4
DANC 3701 & DANC 3702	Modern V and Modern VI	4
<i>Pointe or Jumps and Turns</i>		
DANC 2530 or DANC 1520	Pointe I Jumps and Turns I	0
DANC 2531	Pointe II	0

or DANC 1521	Jumps and Turns II	
DANC 2535 or DANC 2520	Pointe III Jumps and Turns III	0
DANC 2536 or DANC 2521	Pointe IV Jumps and Turns IV	0

Partnering

One of the following courses:		1
DANC 3740	Modern Partnering I	
DANC 1911	Improvisation II (effective Spring 2021)	
DANC 4950	New Directions Choreography Lab (effective Spring 2021)	

Other Dance Techniques

DANC 2420 & DANC 2425	Jazz I and Jazz II	4
DANC 2430	West African Dance	2

Somatic Courses

Select one of the following:		2
DANC 1620 or DANC 1621	Body Conditioning I Body Conditioning II	
DANC 1630 or DANC 1631	Barre a Terre I Barre a Terre II	
DANC 1640 or DANC 1641	Yoga I Yoga II	
DANC 1650 or DANC 1651	Gyrokinesis I Gyrokinesis II	

Creative Courses

DANC 1910	Improvisation	1
DANC 1920 & DANC 1921	Dance Composition I and Dance Composition II	4
DANC 2021 & DANC 2022	Dance Composition III and Dance Composition IV	4

Performance

DANC 3410 & DANC 3411	Repertory Workshops I and Repertory Workshops II	4
DANC 4810 & DANC 4811	Senior Project in Performance and Senior Project in Performance	6

Capstone

DANC 4001	Senior Seminar	3
DANC 4040	Dance Methodology	2

Learning Goals

The Ailey/Fordham B.F.A. in Dance program trains students to hone their professional skills, prepare for life as a professional dancer, and be among the vanguard of the finest and most versatile dancers. Students follow a diverse curriculum that includes a carefully designed sequence of dance and liberal arts courses, encouraging students to achieve their artistic and academic potential.

Students will be exposed to a variety of academic disciplines that will help them cultivate the critical intelligence and creative imagination necessary for them to flourish as artists and humans. They will be immersed in diverse academic learning experiences that encourage curiosity, animate broad and deep engagement, develop writing, research, and analytical skills, and foster a commitment to social justice.

Students will develop a deep scientific understanding of the body and its movements in their study of anatomy and kinesiology. Students will also garner a broad understanding of the world history of dance and music, and in particular the important history and legacy of African and African American dance, music, and other cultural forms that inform the teachings and ethos of the Alvin Ailey American Dance Theater and its Ailey School.

Availability

The major in dance is available at Fordham College at Lincoln Center (FCLC).

Credits		21

Term 2

DANC 4511	Ballet VIII	3
DANC 4611	Horton VIII	2
DANC 3702	Modern VI	2
DANC 4030	Limon Technique	2
DANC 3499	Independent Study Choreography	2
DANC 4811	Senior Project in Performance	3
VART 1135	Visual Thinking (Liberal Arts Elective)	3
Credits		17

Total Credits **153**

Digital Media and Technology

A technology revolution is taking shape in New York City. Powerful tech giants such as Google and Facebook are joining thousands of tech startups in establishing a base in Manhattan, and existing industries such as media and communications are becoming more digital on a daily basis. These concentrations draw together relevant course offerings from business and liberal arts departments to give students an academic and practical grounding in this field.

Upon completing one of these concentrations, students will be well-positioned for careers in digital analytics, new media management and marketing, development of new digital services and mobile apps, project management, finance and operations, among others.

Technology drives our modern culture.

Many of the world's largest tech companies make their home in New York City. You can, too.

The Gabelli School offers you the chance to study, live, and work within striking distance of Silicon Alley. Our program positions you for internships at companies from Google to *The New York Times* Digital to the Food Network.

We will teach you to:

- Develop mobile apps
- Manage social media
- Advance e-commerce
- Identify people's online shopping patterns

In addition to your business coursework, you can take Fordham College classes in computer science (p. 1102), visual arts (p. 1700), communication and media studies (p. 1082), and other departments to develop a portfolio of knowledge and skills unlike anyone else's.

Programs

- Concentration in Digital Media and Technology (Media Track) (p. 229)
- Concentration in Digital Media and Technology (Technology Track) (p. 229)

Concentration in Digital Media and Technology (Media Track)

The digital media and technology concentration (media track) can be pursued as a primary concentration by Gabelli students completing the global business major at Lincoln Center.

Note: Information about the major (p. 208) and minor (p. 210) in digital technologies and emerging media (p. 208) available to students at Fordham College (FCRH, FCLC, and PCS) is listed separately.

Primary Concentration

To complete a primary concentration in digital media and technology (media track), Lincoln Center students must take the following courses:

Course	Title	Credits
Required Courses		
CMBU 4412	ST: Understanding Audiences/Users	3
CMBU 4413	Digital Media & Promo Comm	3
CMBU 4453	Social Media	3
CMBU 4471	ST: Business of New Media	3
INSY 4505	E-Commerce	3

Choose one of the following elective options:

- Two communication and media management electives¹
- One communication and media management elective and one information systems elective^{1,2}

¹ Courses from the subject code CMBU numbered 2667-4999 (of at least 3 credits) may fulfill this requirement. A maximum of one of the following courses may also fulfill this requirement:

- DTEM 2417 Data Visualization
- NMDD 3020 Explorations in Digital Storytelling
- NMDD 3150 Creative Coding

² Courses from the subject code INSY (p. 1375) numbered 2302-4999 (of at least 3 credits) may fulfill this requirement.

Concentration in Digital Media and Technology (Technology Track)

The digital media and technology concentration (technology track) can be pursued as a primary concentration by Gabelli students completing the global business major at Lincoln Center.

Note: Information about the major (p. 208) and minor (p. 210) in digital technologies and emerging media (p. 208) available to students at Fordham College (FCRH, FCLC, and PCS) is listed separately.

Primary Concentration

To complete a primary concentration in digital media and technology (technology track), Lincoln Center students must take the following courses:

Course	Title	Credits
Required Courses		
CMBU 4453	Social Media	3
INSY 3432	Database Systems	3
INSY 4431	Web Analytics	3
INSY 4505	E-Commerce	3

One programming course from the following options:

- INSY 3433 Programming with Java
- INSY 3436 ST: Programming with Python
- INSY 3442 Web Apps Design and Development
- INSY 4432 Mobile Commerce & Apps

Choose one of the following elective options:¹

- Two information systems electives²
- One communication and media management elective and one information systems elective^{2,3}

- ¹ INSY 4434 ST: Data Mining for Business or INSY 4508 Business Modeling With Spreadsheets are highly encouraged.
- ² Courses from the subject code INSY (p. 1375) numbered 2302-4999 (of at least 3 credits) may fulfill this requirement.
- ³ Courses from the subject code CMBU numbered 2667-4999 (of at least 3 credits) may fulfill this requirement. A maximum of one of the following courses may also fulfill this requirement:
- DTEM 2417 Data Visualization
 - NMDD 3450 User Experience Design: Design for Empowerment
 - NMDD 3880 Designing Smart Cities for Social Justice

Disability Studies

Students in the Disability Studies minor will develop or enhance their understanding of the meanings and effects of disability in a range of historical, cultural, and geographic contexts by exploring the experiences and expertise of disabled people across a range of disciplines. Coursework will focus on both conceptual and concrete skills that will enable students to work toward producing more accessible built and social environments. Additionally, disability studies minors will have the opportunity to participate in and contribute to Fordham's Research Consortium on Disability and its associated events, engage in research projects with faculty, and participate in the broader community of Disability Studies scholarship in New York City.

This minor may be of particular interest to those with professional goals in human rights, medicine, and allied health, psychology, public policy, education, social work, law, design, and the humanities.

Programs

- Disability Studies Minor (p. 230)

Disability Studies Minor

Students in the disability studies minor will develop or enhance their understanding of the meanings and effects of disability in a range of historical, cultural, and geographic contexts by exploring the experiences and expertise of disabled people across a range of disciplines. Coursework will focus on both conceptual and concrete skills that will enable students to work toward producing more accessible built and social environments. Additionally, disability studies minors will have the opportunity to participate in and contribute to Fordham's Research Consortium on Disability and its associated events, engage in research projects with faculty, and participate in the broader community of disability studies scholarship in New York City.

This minor may be of particular interest to those with professional goals in human rights, medicine, and allied health, psychology, public policy, education, social work, law, design, and the humanities.

Requirements

Six courses in disability studies are required for the minor.

Course	Title	Credits
DISA 2500	Introduction to Disabilities Studies	4
One Upper-Level Disability Studies elective ¹		4
Four Disability Studies electives ²		15 to 16

¹ Courses with the DIUL attribute, listed below, may fulfill this requirement, as may DISA 4999 Independent Study, when taken for 3 or more credits.

² Any course with the DISA attribute or the DIUL attribute (see lists below) may fulfill this requirement.

Upper-Level Disability Studies electives

Courses in this group have the DIUL attribute.

Course	Title	Credits
COMC 4146	Health Communication and Social Justice	4

Availability

The minor in disabilities studies is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in disabilities studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Economics

Economics draws upon history, political science, philosophy, and mathematics to analyze topics ranging from how firms, consumers, and governments make sound decisions to societal issues such as unemployment, discrimination, inflation, crime, and environmental decay. It is a challenging discipline that offers students a clear and concise way of thinking about the ordinary business of life and a preparation for a wide array of professional careers. Alumni surveys indicate that more than 50% of the majors from Fordham College at Rose Hill continue their education at some point in their lives. Of these, 34% receive degrees in law, and 30% complete an M.B.A. Others pursue an M.A. or a Ph.D. in economics, education, or public affairs.

Students majoring in economics can design a program that will prepare them for graduate studies in economics, international affairs, public affairs, business, or law or for directly entering the labor force. Students who plan to work after graduation from Fordham College will find that many job recruiters are favorably impressed by students who have selected this challenging liberal arts discipline. Majors find careers in academics, corporate business, investment and retail banking, consulting, environmental policy, health policy, other aspects of finance, insurance, and the public sector, among many outlets.

The primary goal of our economics program is for students to learn the foundations of economics—how firms, households, and institutions interact in the market—and how to connect economic principles and theories with real-world scenarios.

Our undergraduate economics program emphasizes analytical thinking and skills for working with data. The detailed goals for our students—whether they are majors or minors—are to:

1. Understand the intellectual foundations of economic theory: threshold concepts, main theories, and its historical context.
2. Understand the methodology of economics as a social science in empirical testing of predictions and subsequent rejection of, or failure to reject theory.
3. Learn how to apply mathematical modeling to make inferences and predictions about economic activities.
4. Understand how microeconomic and macroeconomic data is generated and accurately interpreted.
5. Learn and apply statistical methods for analyzing economic data.
6. Build expressive eloquence on economic topics through refinement of presentation, oral, and written communication skills.
7. Engage in critical thinking about economic problems, incorporating ethical and social dimensions in understanding and evaluating individual and collective decisions.
8. Understand economic policy practices and options at the local, state, federal, and international levels.

To achieve these goals, we have developed a comprehensive curriculum that exposes students sequentially to basic and then more advanced theory, to data resources and the statistical techniques to analyze data, and to understanding the scope of economic problems and policies to provide solutions.

Our rigorous program provides students with the skills to analyze the current economic environment, understand local and national economic problems, and analyze solutions using data and theory. Our program also allows students to discuss and research various economic issues and present their findings in both oral and written modalities.

Accelerated Master's Program

Please read the Graduate School of Arts and Sciences Accelerated Master's Programs (p. 137) section of this bulletin for more information. Admission to the accelerated M.A. economics program is open to undergraduates who are majoring in economics, the interdisciplinary math & economics program, or international political economy (IPE), and who have a cumulative GPA of 3.2 or better. Applicants must apply during their junior year of undergraduate study for the economics M.A. program through the Graduate Admissions Office. The requirement of GRE scores is waived. The accelerated M.A. program is available to students at any of the following colleges: FCRH, FCLC, and PCS. All of our graduate courses are held at the Rose Hill campus.

The Accelerated M.A. in Economics is a 30-credit, 10-course degree program plus a comprehensive exam. During senior year, admitted undergraduate students can take up to three graduate courses that double-count toward their undergraduate major and the M.A. degree in economics. Graduate courses taken by students who are current undergraduates need to be approved by the director of graduate studies for the economics department. Most students admitted to the accelerated M.A. program will take ECON 5710 Mathematical Analysis in Economics in the fall semester and ECON 6910 Applied Econometrics in the spring semester of senior year. Please note that

ECON 5710 Mathematical Analysis in Economics (a graduate class) does not substitute for ECON 3154 Math for Economists (an undergraduate class) which is required for the undergraduate economics major. Economics majors interested in the accelerated M.A. should complete ECON 3154 Math for Economists by the second semester of junior year. Students should also plan to complete ECON 2142 Statistics II, ECON 3116 Intermediate Macroeconomics, and ECON 3118 Intermediate Microeconomics before their senior year so as to be prepared for graduate work.

After completing the bachelor's degree program, students continuing in the M.A. program full time typically take ECON 6010 Microeconomic Theory I and ECON 6020 Macroeconomic Theory I plus two graduate economics elective courses in the fall semester, and their remaining electives in spring. Students take a capstone project class using advanced econometric methods once they have completed ECON 6010 Microeconomic Theory I and ECON 6020 Macroeconomic Theory I. Applications are made online through the Graduate School of Arts and Sciences website.

Program Activities

Honors in Economics

An economics major who maintains a cumulative grade point average of 3.25 and 3.5 or better in their economics courses (these GPA requirements must be maintained through completion of the student's final two semesters) may be invited to participate in the Honors Program in Economics. To receive Honors in Economics, an economics major must complete both ECON 3885 Introductory Econometrics and ECON 3154 Math for Economists or approved substitutions by the end of the fall semester of their senior year and write a research paper in economics. The research paper will normally be the outgrowth of a topic selected while taking a 3000-level elective in economics. The paper will usually be started during the second semester of junior year, but no later than the fall semester of senior year. It will be due as a draft during the twelfth week of the student's final undergraduate semester, with a final draft no later than the last day of classes. It must be approved by a committee of three members of the economics faculty (one mentor and two readers). The student will receive a grade of pass when the paper is accepted; this will be noted on the student's transcript as a one-credit course titled Honors Seminar in Economics. Graduation "with honors in economics" will appear on the student's transcript. Students interested in (and eligible for) honors in the major need to apply by contacting their Economics Department Associate Chair during the beginning of their penultimate semester (usually, the fall semester of senior year).

Economics majors enrolled in an Honors Program who write a thesis in economics as part of that program can apply to also be awarded honors in economics if (1) they meet the GPA and coursework requirements, and (2) the student's thesis mentor is a member of the economics faculty.

Honors program students do not have to enroll in ECON 4998 Honors Seminar in Economics.

Economics majors with more than one major may earn honors in economics and in their other major, but not for the same thesis. Students in related majors (for example, interdisciplinary mathematics & economics and international political economy) may apply for honors in their major, whereas honors in economics is reserved for **economics majors**.

College Fed Challenge

Students from the Economics Department participate in the annual College Fed Challenge, sponsored by the Federal Reserve Bank of New

York and the Eastern Economic Association. During the competition, each team gives a 15 minute presentation, consisting of an analysis of current economic and financial conditions, a forecast of economic and financial conditions for the near-term, a discussion of risks to the economy of special concern to the Fed, and a monetary policy prescription, followed by a 15 minute question- and-answer session from the judges. We are proud to be one of the 25 participating teams.

Omicron Delta Epsilon

The Economics Department houses the Gamma Chapter of Omicron Delta Epsilon, the International Honor Society in Economics. Each spring, the Department honors its outstanding seniors (majors and minors) by induction into this prestigious society.

American Academy of Political and Social Science

The American Academy of Political and Social Science recognizes undergraduates who have an outstanding grasp of theories and methods, an enthusiasm for understanding social issues, and the promise of making contributions to the social sciences in the future. Our nominees for 2005 and 2006 were among 150 undergraduates from leading social science departments across the United States elected as Junior Fellows of the Academy.

Economics Society

The Department is the home of the active Economics Society, a student-organized-and run club for anyone interested in economics. In the past, the society's activities have included trips to the New York Stock Exchange and the Federal Reserve Bank; presentations by companies and individuals about internships and career paths; publication of a biweekly newsletter; and résumé-building workshops. Each year, the Society hosts a Career Evening featuring a discussion by an alumni panel and socializing afterwards.

For more information

Visit the Economics department web page.

Contribution to the Core

Economics offers ECON 1100 Principles of Macroeconomics and ECON 1200 Principles of Microeconomics which fulfill the introduction to the social science core requirement. Either one of the two introductory courses will satisfy the social science core requirement. Many of the department's upper-level courses will satisfy one of the advanced disciplinary course requirement in social science. In addition, the department regularly offers courses that fulfill the American Pluralism, Global Studies and Value Seminar/EP4 core requirements.

Programs

- Economics Major (p. 232)
- Economics Minor (p. 233)
- Interdisciplinary Math & Economics Major (p. 233)

Economics Major

Students majoring in economics take a program of studies that will prepare them work in a variety of private industries and public institutions as well as for graduate studies in economics, international affairs, public affairs, business, or law.

Students who plan to work after graduation from Fordham University will find that many job recruiters are favorably impressed by students who have selected this challenging, liberal arts discipline.

Majors find careers in investment analysis, data science, environmental policy, financial institutions, management consulting, and the public sector, among many other career possibilities.

CIP Code

45.0603 - Econometrics and Quantitative Economics.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Students majoring in economics must complete the following 11 courses in economics.

Course	Title	Credits
ECON 1100	Principles of Macroeconomics ¹	3
ECON 1200	Principles of Microeconomics	3
ECON 2140	Statistics I	4
ECON 2142	Statistics II	4
ECON 3154	Math for Economists	4
ECON 3116	Intermediate Macroeconomics ²	4
ECON 3118	Intermediate Microeconomics ²	4

Four additional courses from the department's upper-level elective courses ³

¹ ECON 1150 CB Honors Macroeconomics may be taken instead of this course.

² ECON 3116 Intermediate Macroeconomics and ECON 3118 Intermediate Microeconomics must be taken at Fordham.

³ Any course with the ECON subject code (p. 1162) numbered 3000 or higher may fulfill this requirement.

Economics majors in Fordham College at Rose Hill and Fordham College at Lincoln Center must request permission to take a course in the major outside the College. Economics majors may count only one internship seminar course toward the 11-course requirement for the major in their senior year.

Availability

The major in economics is available at Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC), and Fordham's School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester (PCS).

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Economics Minor Requirements

The minor in economics consists of the following six courses:

Course	Title	Credits
ECON 1100	Principles of Macroeconomics	3
ECON 1200	Principles of Microeconomics	3
Select one of the following:		4
ECON 2140	Statistics I ¹	
ECON 3116	Intermediate Macroeconomics	
ECON 3118	Intermediate Microeconomics	

Select three additional courses ²

¹ Gabelli students minoring in Economics take ECON 2140 Statistics I as part of their core curriculum.

² Any course with the ECON subject code (p. 1162) numbered 3000 or higher may fulfill this requirement.

Availability

The minor in economics is available at Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC), and Fordham's School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester (PCS). Gabelli School of Business students may also minor in Economics.

Interdisciplinary Math & Economics Major

This major, offered jointly by the departments of economics and mathematics, is designed to give the student an excellent background in modern economic analysis and a solid grounding in those mathematical disciplines necessary for a full understanding of economic analysis. Because it both demands and fosters careful reasoning as well as a facility with abstract formulations of problem situations, it is an apt pre-law program. Its high degree of difficulty makes it attractive to business recruiters, and it is particularly appropriate for graduate studies in economics, business, and other applied quantitative fields.

Program Activities

Majors in this program are eligible for honors at graduation in interdisciplinary math & economics. Some majors in this program have done internships at banks or investment firms. Such internships are not required and do not count among the four electives in the major.

For more information

Visit the interdisciplinary math & economics program page.

CIP Code

27.9999 - Mathematics and Statistics, Other.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Students enrolled in this program are required to take the following courses:

Course	Title	Credits
Required Courses		
ECON 1100	Principles of Macroeconomics	3
ECON 1200	Principles of Microeconomics	3
ECON 3116	Intermediate Macroeconomics	4
ECON 3118	Intermediate Microeconomics	4
MATH 1207	Calculus II	4
MATH 2004	Multivariable Calculus I	4
MATH 2001	Discrete Mathematics	4
MATH 2006	Linear Algebra I	4
Select one of the following:		
MATH 3006 & MATH 3007	Probability and Statistics	
ECON 2140 & ECON 2142	Statistics I and Statistics II	

Electives

Select four electives in mathematics or economics. Any course with the MATH subject code (must be 4 credits and numbered 2000 or higher) or the ECON subject code may fulfill this requirement. Of these four courses, at least one course must be in mathematics and one must be in economics.

Required courses and sufficient electives to fulfill the major are available on both campuses.

Availability

The major in interdisciplinary math & economics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in interdisciplinary math & economics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

English

The study of English is for anyone who wants to understand literature and all forms of texts and media. No discipline better prepares its students to understand diverse cultural forms, to craft persuasive

arguments, and to write lucidly and beautifully. The range of electives and seminars that make up the bulk of the curriculum allows for flexibility in designing individual majors, while also giving students a comprehensive grasp of the varieties of literature and literary study.

In addition to the regular major, the English department offers a major with a creative writing concentration that emphasizes the interrelations among creative writing, digital media, criticism, and scholarship. As an integrated concentration in the English department with a dual focus on literature and creative work, the creative writing concentration combines literature courses, small writing workshops, and practical industry training to prepare students for advanced study or careers in writing, media, and publishing.

The department also offers three minors open to students in any major. The English minor (p. 240) allows students to explore literature and other forms of media. The creative writing minor (p. 236) gives students the opportunity to explore their creative abilities. And the public and professional writing minor (p. 240) equips students with critical and rhetorical skills for analyzing and producing written, digital, and visual texts for real-world purposes and audiences.

Those majoring or minoring in any program offered by the English department benefit from the resources provided by New York City, a worldwide center for literary activity and publishing.

Program Activities

Events

The Department of English organizes a variety of events, which include lectures and readings given by the Reid Family Writer of Color, the Writer-at-Risk in Residence, the Mary Higgins Clark Chair in Creative Writing, and participants in the Poets Out Loud Reading Series. They also include LitFest, the Golden Gloves Literary Competition, field trips, tea parties, and an informal professor/student book club.

Internships

We encourage students to take advantage of the many internship opportunities that New York City offers. English majors have held internships at magazines and newspapers, television companies, publishing houses, marketing firms, theaters, museums, law offices, advertising companies, fashion studios, technology startups, and political organizations. Credits received for internships count toward the total number of credits required for graduation but not toward requirements for any program offered by the English department.

Prizes and Scholarships

The department awards several creative and critical writing prizes to students. It also awards scholarships to majors who have demonstrated academic merit and financial need or plan to pursue graduate study in English or a related field.

Sigma Tau Delta, the International English Honor Society

Sigma Tau Delta is an International Honor Society for students of English. Founded in 1924, with approximately 9,000 members inducted annually, the society strives to confer distinction for high achievement in English language and literature in undergraduate, graduate, and professional studies; provide cultural stimulation on college campuses; promote interest in literature and the English language in surrounding

communities; and serve society by fostering literacy. The Alpha Chi Omicron chapter of Sigma Tau Delta at Fordham was founded in 2017.

Honors Options

Departmental Honors

The department offers an honors thesis option in English for senior English majors with a 3.6 GPA or higher in English who wish to complete an ambitious project under the direction of a faculty member and graduate with departmental honors.

If you are interested, you should discuss this option with the associate chair or the director of creative writing, as well as with a potential faculty adviser, and then submit an application to write a thesis prior to the semester in which the thesis will be completed. To write a thesis in the spring semester, you must submit the application by October 15 of the previous semester; to write a thesis in the fall semester, you must submit the application by March 1 of the previous semester. If your application is approved, the associate chair or the director of creative writing will authorize you to register for ENGL 4998 English Honors Thesis Tutorial, which counts as an elective toward the major. You will write your thesis over the course of one semester, at the end of which there will be a defense of the thesis with the adviser and one departmental reader. That committee then evaluates whether the thesis defense qualifies you to graduate with departmental honors. For more information, see Degrees and Details/Departmental Honors in English.

The English Major and the Fordham College at Lincoln Center Honors Program

Students in the Fordham College at Lincoln Center Honors Program (p. 79) fulfill the first-level core English requirements (ENGL 1102 Composition II and ENGL 2000 Texts and Contexts) by taking HPLC 1811 Honors: Writing Intensive and HPLC 1201 Honors: English. ENGL 2000 counts toward the English major, and HPLC 1201 Honors: English counts toward the major for those Lincoln Center Honors Program students who major in English. Additionally, those students who are writing a senior thesis under the supervision of an English faculty member register for ENGL 4998 English Honors Thesis Tutorial, which will count toward the major. Please see the associate chair to register for ENGL 4998. HPLC 4050 Honors: Senior Values Seminar can also count toward the major when it is taught by English or comparative literature faculty.

The English Major and the Fordham College at Rose Hill Honors Program

Students in the Fordham College at Rose Hill Honors Program (p. 68) fulfill the first-level core English requirements (ENGL 1102 Composition II and ENGL 2000 Texts and Contexts) by taking HPRH 1102 Foundational Texts: Theology/Classics. ENGL 2000 Texts and Contexts counts for the English major, and HPRH 1102 Foundational Texts: Theology/Classics counts for the major for those Fordham College at Rose Hill Honors Program students who major in English. Moreover, Fordham College at Rose Hill Honors Program students who major in English may count two additional Honors Program courses toward the major: HPRH 1202 Foundational Texts: Literature counts as one of the required Historical Distribution courses, and HPRH 3101 counts either as a regular elective for the major or as one of the required Historical Distribution courses, depending on the focus of the course. Those students who write a senior thesis under the supervision of an English faculty member can also count HPRH 4001 Senior Thesis as a regular

elective for the major. Please inform the associate chair if you would like to count HPRH 4001 Senior Thesis towards the major.

The English Minor and the Fordham College at Rose Hill Honors Program

Students in the Fordham College at Rose Hill Honors Program (p. 68) may count HPRH 1102 Foundational Texts: Theology/Classics toward the minor as fulfilling the Texts & Contexts requirement.

The Public and Professional Writing Minor and the Fordham College at Rose Hill Honors Program

Students in the Fordham College at Rose Hill Honors Program (p. 68) may count HPRH 1102 Foundational Texts: Theology/Classics toward the minor as fulfilling the Texts & Contexts requirement.

The English Minor and the Fordham College at Lincoln Center Honors Program

Students in the Fordham College at Lincoln Center Honors Program (p. 79) may count HPLC 1201 Honors: English towards the minor.

The Public and Professional Writing Minor and the Fordham College at Lincoln Center Honors Program

Students in the Fordham College at Lincoln Center Honors Program (p. 79) may count HPLC 1201 Honors: English toward the minor.

Early Admission to the Master's Program in English

Please read the Early Admission to Graduate School of Arts and Sciences Master's Programs (p. 137) section, which is located in the Special Academic Programs section of this bulletin. The English director of graduate studies, in consultation with the associate chairs, invites select second-semester juniors to apply for early admission to the M.A. program. Students must formally indicate their desire to opt for early admission into the M.A. program and submit a two-page statement of purpose by March 15. Applications do not need to include GRE scores unless the student is planning to apply for financial aid after completing their bachelor's degree. In order to qualify for invitation, students must have a minimum 3.2 overall GPA, at least a 3.5 average GPA in their English courses, and the recommendation of two English faculty members.

This policy applies to FCRH, FCLC, and PCS. Three graduate courses can double count toward the student's undergraduate and graduate degrees, fulfilling both undergraduate English major and master's-level requirements. Graduate courses taken while the student is still an undergraduate must be approved by the director of graduate studies. Seniors take a total of three 5000-level graduate courses during their final two undergraduate semesters. After completing the B.A. in senior year, students then take three 5000- or 6000-level graduate courses in the fall and three in the spring. Students also must complete a capstone project and demonstrate reading knowledge of one foreign language to graduate. Applications are made online through the Graduate School of Arts and Sciences website.

For more information

Visit the English department web page.

Contribution to the Core

The English department offers ENGL 1102 Composition II, which fulfills the core curriculum requirement in composition and rhetoric. Students who do not place into ENGL 1102 upon admission are required to take ENGL 1101 Composition I, in which they must receive a grade of C or better before they are allowed to advance to ENGL 1102.

The department also offers ENGL 2000 Texts and Contexts, which fulfills the core requirement in English literature and counts toward the distributive requirement in Eloquentia Perfecta 2. All students are required to take Composition II and Texts and Contexts/Eloquentia Perfecta 2.

Unless otherwise specified, non-majors may take the department's elective (major) offerings toward the core requirement in Advanced Disciplinary Courses in Literature. In addition, the Department of English offers various courses that fulfill core requirements in American Pluralism, Global Studies, Eloquentia Perfecta (EP) 3 and 4, Interdisciplinary Capstone (ICC), and Values.

Programs

Majors

- English Major (p. 236)
- English Major with a Creative Writing Concentration (p. 238)

Minors

- Creative Writing Minor (p. 236)
- English Minor (p. 240)
- Public & Professional Writing Minor (p. 240)

Creative Writing Minor

Requirements

Course	Title	Credits
Four Creative Writing Courses	¹	16
Two Literature Electives	²	8

¹ Creative writing courses are those with the attribute code CVW (p.).

² Literature electives are any course of three or more credits with the ENGL subject code or ENGL attribute code, with the following exceptions: ENGL 1102 Composition II, ENGL 2000 Texts and Contexts, ENGL 3003 Introduction to Professional Writing, and courses with the CVW (p.), PPWF or PPWD (p.) attributes.

Requirements for English Majors

In order to minor in creative writing, students majoring in English must take four creative writing courses total (courses with the CVW attribute (p.)). They must also take two literature courses beyond those already required for the major (literature courses are any course of three or more credits with the ENGL subject code or ENGL attribute code, with the following exceptions: ENGL 1102 Composition II, ENGL 2000 Texts and Contexts, ENGL 3003 Introduction to Professional Writing, and courses with the CVW (p.), PPWF or PPWD (p.) attributes). Because two of the four creative writing courses can double count as electives for the major, however, majors only need to complete four

additional courses beyond those already required for the major. In other words, students completing the English major plus creative writing minor will end up taking fourteen courses total, including four creative writing courses:

Course	Title	Credits
Ten required courses for the English major		
Includes two creative writing courses taken as electives		
Two additional creative writing courses		
Two additional literature courses		

Additional Information

1. Courses in which a student receives a grade of D or F will not count toward the minor.
2. Up to one cognate course taken in other departments or programs deemed relevant to the minor may be counted with permission of the associate chair.
3. Up to one course taken while studying abroad deemed relevant to the minor may be counted.
4. For students who transfer from another school to Fordham, the department will consider counting up to one course taken prior to arrival at Fordham toward the minor.
5. Credits earned for internships do not count for credit toward the minor. Internship credits do count for general credits toward graduation. In order to receive academic credit for an internship, you must have completed 60 academic credits, have a minimum 3.0 GPA, and register for a tutorial with a faculty member who agrees to serve as your academic adviser. Depending on the amount of academic work involved in the tutorial, your faculty mentor will suggest that you register for a one- or two-credit tutorial. Internships are graded on a Pass/Fail basis.
6. Advanced Placement credits in English Literature and in English Language count toward a student's total number of credits in the college but not within the minor. A score of 4 or 5 in AP English Literature will count toward college elective credits.
7. Students may count no more than one course from the following to their Creative Writing Minor: FITV 2511 Screenwriting I, JOUR 3723 Interviews and Profiles, JOUR 3727 Writing for Magazines, THEA 3700 Playwriting.
8. Courses taken on a Pass/Fail basis cannot be counted towards Creative Writing minor requirements.
9. Only one course can double count between the Creative Writing minor and another minor.

Availability

The minor in creative writing is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

English Major

The goals of the English major are to develop:

- an ability to write clear, coherent, organized, and persuasive prose
- an ability to read closely and interpret literary and other cultural texts (including poetry, fiction, and drama)
- an ability to connect the analysis of texts to appropriate historical and other contexts
- a knowledge of literary genres and appropriate use of critical terminology
- a knowledge of literary theory and its relevance to literary analysis
- an awareness of different periods of literary history, from the medieval period to the contemporary
- an awareness that there are a variety of critical approaches to literary and cultural texts
- an awareness of the range of perspectives and aesthetic traditions within English literature, including ones previously considered marginal to the canon

CIP Code

23.0101 - English Language and Literature, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The English major consists of a total of ten required courses:

Course	Title	Credits
One Texts and Contexts course ¹		
One Literary Theories course		
ENGL 3000	Literary Theories	4
or COLI 3000	Literary Theories	
Eight electives, including ²		
Three Historical Distribution courses		
One Race and Social Justice course		
One Departmental Seminar course		
Three additional electives ³		
Up to two electives may be Creative Writing or Public & Professional Writing courses		

¹ A list of courses fulfilling the Texts and Contexts requirement can be seen on the core curriculum page (p. 54). Texts and Contexts courses have the TC attribute.

² Any course with the ENGL subject code or the ENGL attribute code counts as an elective, with the exceptions of ENGL 1102 Composition II and ENGL 2000 Texts and Contexts. Students may count no more than one course from the following towards the major: FITV 2511 Screenwriting I, JOUR 3723 Interviews and Profiles, JOUR 3727 Writing for Magazines, JOUR 3783 Theater Journalism

³ Because some electives will double or triple count as Historical Distribution courses, Race and Social Justice courses, and/or Departmental Seminar courses, majors may end up being able to take more than three additional electives.

Requirements in Detail/Supplementary Information

Grades

Courses in which a student receives a grade of D or F will not count toward the major.

The English Major and the Core Curriculum

English majors are required to fulfill the first-level core English requirement (ENGL 1102 before beginning the major; ENGL 1102 does not count toward the major. Additionally, majors may count English electives taken to meet the following core requirements toward the major: Advanced Literature Core, ICC, EP3, Values/EP4, American Pluralism, and Global Studies.

Literary Theories Requirement

All majors are required to take Literary Theories (ENGL 3000 or COLI 3000). This course is usually taken during a student's junior year, but sophomores may also enroll. Literary Theories introduces students to debates in literary and critical theory. The goal of these courses is to reflect on reading strategies, textual practices, and language itself. Students will engage with a range of critical, theoretical, and social issues shaping the field of literary studies today.

Historical Distribution Requirement

At least three of the courses that students take for the major must cover literature from a historical period before 1850. The goal of the Historical Distribution requirement is to encourage students to learn about a diverse range of historical periods and literary forms. The department suggests that students consult regularly with their advisers to ensure that their Historical Distribution course choices are covering a wide variety of literatures written before 1850. Historical Distribution courses have the ENHD attribute code and are included in departmental course listings.

Race and Social Justice Requirement

English majors in the Class of 2023 and beyond are required to take one course with the Race and Social Justice designation. These courses will introduce students to literatures from minority, ethnic, diasporic, postcolonial, colonial, and/or global traditions. They also aim to examine issues of race through the lenses of ethics, social justice, respect for human dignity, and the sustainability of the world in which we live. These courses have the ENRJ attribute code and are included in departmental course listings.

Departmental Seminar Requirement

English majors in the Class of 2023 and beyond are required to take one 4000-level departmental seminar. These seminars can be taken in a student's junior or senior year. Departmental seminars are capped at 15 students each and will provide students with a chance to delve deeply into the study of a particular subject. As part of the seminar, students will also work closely with their instructor to complete a final research project or comparable assignment that allows them to develop their skills as thinkers and writers. These courses have the ENSM attribute code and are included in departmental course listings.

Creative Writing and Public and Professional Writing Courses

English majors may apply up to two creative writing or public and professional writing courses toward their elective requirements. Majors who wish to take additional creative writing and/or public and

professional writing courses should consider the creative writing minor (p. 236), the English major with a creative writing concentration (p. 238), and/or the public and professional writing minor. These courses have the CVW attribute code (p.) (for creative writing courses) or the PPWF or PPWD attribute codes (p.) (for public and professional writing courses) and are included in departmental course listings (p.). ENGL 3003 Introduction to Professional Writing also counts toward this two-course maximum.

Additional Information

1. English majors will receive credit toward the major for certain courses offered by other departments and programs if they carry an ENGL attribute or an ENGL course number. Up to two additional cognate courses in other departments or programs that are deemed relevant to the major may be counted with permission of the associate chair. A list of courses offered in other areas can be found in the Bulletin (p.).
2. Up to two courses may be double counted between major and minor. That is, each of the two courses may be counted for both an English major and another, related major. Only one course may be double counted between major and minor.
3. Up to two courses taken abroad with content clearly related to literary study may be considered for credit toward the major.
4. For students who transfer from another school to Fordham, the department will consider counting up to two courses taken prior to arrival at Fordham toward the major.
5. Credits earned for internships do not count for credit toward the English major. Internship credits do count for general credits toward graduation. In order to receive academic credit for an internship, you must have completed 60 academic credits, have a minimum 3.0 GPA, and register for a tutorial with a faculty member who agrees to serve as your academic adviser. Depending on the amount of academic work involved in the tutorial, your faculty mentor will suggest that you register for a one- or two-credit tutorial. Internships are graded on a Pass/Fail basis.
6. Advanced Placement credits in English Literature and in English Language count toward a student's total number of credits in the college but not within the major. A score of 4 or 5 in AP English Literature will count toward college elective credits.
7. Courses taken on a Pass/Fail basis cannot be counted towards English major requirements.

Availability

The major in English is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

English Major with a Creative Writing Concentration

Premised on the belief that the study of literature and the practice of writing are mutually reinforcing, the English major with a creative writing concentration emphasizes the interrelations among creative writing, digital media, criticism, and scholarship. As an integrated concentration in the English department with a dual focus on literature and creative work, the creative writing concentration combines literature courses, small writing workshops, and practical industry training to prepare students for advanced study or careers in writing, media, and publishing. In addition, our concentrators benefit from the resources provided by New York City, a worldwide center for literary publishing.

Admissions

Students can apply for admission to the English major with a creative writing concentration in the fall semester of their sophomore or junior year. Applicants will submit a cover letter (1,000 words maximum) and a writing sample (prose, poetry, or any mixture of genres - 1,500 words maximum), to be reviewed by a panel of creative writing faculty. To access the online application, visit our website.

Requirements

The English major with a Creative Writing concentration consists of a total of eleven required courses:

Requirements for the Class of 2026 and Beyond

Course	Title	Credits
One Texts and Contexts course ¹		3
One Literary Theories course		4
ENGL 3000	Literary Theories	4
or COLI 3000	Literary Theories	
One Introduction to Creative Writing course		4
ENGL 2500	Introduction to Creative Writing	
Three Creative Writing electives ²		12
Four Literature electives ³		16
Two Historical Distribution courses		
One Race and Social Justice course		
One additional Literature elective course ⁴		
One Creative Writing Capstone course		4
ENGL 4705	Creative Writing Capstone	

¹ A list of courses fulfilling the Texts and Contexts requirement can be seen on the core curriculum page (p. 54). Texts and Contexts courses have the TC attribute.

² Creative Writing electives are courses with the CVW attribute (p.).

³ Literature electives are any course of three or more credits with the ENGL subject code or ENGL attribute code, with the following exceptions: ENGL 1102 Composition II, ENGL 2000 Texts and Contexts, ENGL 3003 Introduction to Professional Writing, and courses with the CVW (p.), PPWF or PPWD (p.) attributes.

⁴ Because some Literature electives will double count as both Historical Distribution and Race and Social Justice courses, concentrators may

end up being able to take more than one additional Literature elective course.

Requirements for the Class of 2025 and Earlier

Course	Title	Credits
One Texts and Contexts course ¹		3
One Literary Theories course		4
ENGL 3000	Literary Theories	4
or COLI 3000	Literary Theories	
Four Creative Writing electives ²		16
Four Literature electives ³		16
Two Historical Distribution courses		
One Race and Social Justice course		
One additional Literature elective course ⁴		
One Creative Writing Capstone course		4
ENGL 4705	Creative Writing Capstone	

¹ A list of courses fulfilling the Texts and Contexts requirement can be seen on the core curriculum page (p. 54). Texts and Contexts courses have the TC attribute.

² Creative Writing electives are courses with the CVW attribute (p.).

³ Literature electives are any course of three or more credits with the ENGL subject code or ENGL attribute code, with the following exceptions: ENGL 1102 Composition II, ENGL 2000 Texts and Contexts, ENGL 3003 Introduction to Professional Writing, and courses with the CVW (p.), PPWF or PPWD (p.) attributes.

⁴ Because some Literature electives will double count as both Historical Distribution and Race and Social Justice courses, concentrators may end up being able to take more than one additional Literature elective course.

Requirements in Detail/Supplementary Information

Grades

Courses in which a student receives a grade of D or F will not count toward the concentration. Courses taken on a Pass/Fail basis cannot be counted towards the English Major with Creative Writing Concentration requirements.

The English Major with a Creative Writing Concentration and the Core Curriculum

Concentrators may count English electives taken to meet the following core requirements toward the concentration: Advanced Literature Core, ICC, EP3, Values/EP4, American Pluralism, and Global Studies.

Literary Theories Requirement

All concentrators are required to take Literary Theories (ENGL 3000 or COLI 3000). This course is usually taken during a student's junior year, but sophomores may also enroll. Literary Theories introduces students to debates in literary and critical theory. The goal of these courses is to reflect on reading strategies, textual practices, and language itself. Students will engage with a range of critical, theoretical, and social issues shaping the field of literary studies today.

Creative Writing Requirement

Three courses that have been designated by the English department as Creative Writing courses are required for the concentration (four for the class of 2025 and earlier). These courses have the CVW attribute code (p.) and are included in departmental course listings. Advanced students may, with permission, also take graduate-level creative writing courses. These courses have the CVWG attribute code (p.) and are included in departmental course listings.

Historical Distribution Requirement

At least two of the courses that students take for the concentration must cover literature from a historical period before 1850. The goal of the Historical Distribution requirement is to encourage students to learn about a diverse range of historical periods and literary forms. Historical Distribution courses have the ENHD attribute code and are included in departmental course listings.

Race and Social Justice Requirement

Concentrators are required to take one course with the Race and Social Justice designation. These courses will introduce students to literatures from minority, ethnic, diasporic, postcolonial, colonial, and/or global traditions. They also aim to examine issues of race through the lenses of ethics, social justice, respect for human dignity, and the sustainability of the world in which we live. These courses have the ENRJ attribute code and are included in departmental course listings.

Creative Writing Capstone Requirement

ENGL 4705 Creative Writing Capstone will introduce graduating students to the realities of the writer's life, which necessarily involves not just individual work but also affiliation, cooperation, and community. In the capstone course, students will create and revise portfolios that comprise their creative, scholarly, and extracurricular work during their four years at Fordham. Additionally, students will work collaboratively to put together a public exhibition of a creative writing project.

Additional Information

1. Concentrators will receive credit toward the concentration for certain courses offered by other departments and programs if they carry an ENGL attribute or an ENGL course number. Up to two additional cognate courses in other departments or programs that are deemed relevant to the major may be counted with permission of the associate chair. Relevant courses offered in other areas are listed in the Bulletin.
2. Up to two courses may be double counted between concentration and major. That is, each of the two courses may be counted for both the concentration and another, related major. Only one course may be double counted between concentration and minor.
3. Up to two courses taken abroad with content deemed relevant to the concentration may be considered for credit toward the concentration.
4. For students who transfer from another school to Fordham, the department will consider counting up to two courses taken prior to arrival at Fordham toward the concentration.
5. Credits earned for internships do not count for credit toward the concentration. Internship credits do count for general credits toward graduation. In order to receive academic credit for an internship, you must have completed 60 academic credits, have a minimum 3.0 GPA, and register for a tutorial with a faculty member who agrees to serve as your academic adviser. Depending on the amount of academic work involved in the tutorial, your faculty mentor will suggest that you

register for a one- or two-credit tutorial. Internships are graded on a Pass/Fail basis.

- Advanced Placement credits in English Literature and in English Language count toward a student's total number of credits in the college but not within the concentration. A score of 4 or 5 in AP English Literature will count toward college elective credits.

Availability

The major in English with a creative writing concentration is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

English Minor Requirements

The minor in English consists of the core requirement ENGL 2000 and any five additional English courses (excluding ENGL 1102).

At least three courses must be literature courses (rather than creative writing or public and professional writing courses) that carry an ENGL course number or an ENGL attribute. A maximum of two creative writing or public and professional writing courses (courses with the attribute codes CVW (p.), PPWF, and PPWD (p.)) may be applied toward the minor. ENGL 3003 Introduction to Professional Writing also counts toward this two-course maximum.

Additional Information

- Courses in which a student receives a grade of D or F will not count toward the minor.
- Up to one cognate course taken in other departments or programs deemed relevant to the minor may be counted with the permission of the associate chair.
- Up to one course taken while studying abroad deemed relevant to the minor may be counted.
- For students who transfer from another school to Fordham, the department will consider counting up to one course taken prior to arrival at Fordham toward the minor.
- Credits earned for internships do not count for credit toward the minor. Internship credits do count for general credits toward graduation. In order to receive academic credit for an internship, you must have completed 60 academic credits, have a minimum 3.0 GPA, and register for a tutorial with a faculty member who agrees to serve as your academic adviser. Depending on the amount of academic work involved in the tutorial, your faculty mentor will suggest that you register for a one- or two-credit tutorial. Internships are graded on a Pass/Fail basis.
- Advanced Placement credits in English Literature and in English Language count toward a student's total number of credits in the

college but not within the minor. A score of 4 or 5 in AP English Literature will count toward college elective credits.

- Students may count no more than one course from the following towards the minor: FITV 2511 Screenwriting I, JOUR 3723 Interviews and Profiles, JOUR 3727 Writing for Magazines, JOUR 3783 Theater Journalism.
- Courses taken on a Pass/Fail basis cannot be counted toward English minor requirements.
- Only one course can double count between the English minor and another minor.

Availability

The minor in English is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional Studies at Rose Hill, Lincoln Center, and Westchester.

Public & Professional Writing Minor Overview

The Public & Professional Writing (PPW) minor is designed for students who write extensively in their public, civic, and professional lives, equipping them with critical and rhetorical skills for analyzing and producing written, digital, and visual texts for real-world purposes and audiences. Housed in the English Department, it is designed for English majors who wish to hone their prose-writing, augment their knowledge of literary genres and theories with knowledge of professional and public writing genres and theories, and gain familiarity with a range of critical approaches to reading and producing texts. At the same time, it attracts students from across majors who foresee futures in communication-centric fields, including media, public policy, international relations, business, social work, law, medicine, and more. Attentive to questions of justice in the diverse local, national, and global contexts in which professional communicators work, it also appeals to students with interests in nonprofit, advocacy, and activist work.

Requirements

Six (6) courses are required for the minor:

Course	Title	Credits
	Texts and Contexts course ¹	3
ENGL 3003	Introduction to Professional Writing	4
	PPW-Focused course ²	4
	Three PPW-Designated courses ²	Varies

¹ A list of courses fulfilling the Texts and Contexts requirement can be seen on the core curriculum page (p. 54). Texts and Contexts courses have the TC attribute.

² See below for a list of courses fulfilling this requirement.

PPW-Focused courses

Courses in this group have the PPWF attribute.

Course	Title	Credits
ENGL 3006	Nonprofit and Advocacy Writing	4
ENGL 3046	Writing for Digital Spaces	4
ENGL 3047	Rhetorics of Resistance and Social Movements	4

ENGL 3076	Public Argumentation	4
ENGL 3077	Writing for Public Policy	4
ENGL 5650	Special Topics in Writing Studies	3

PPW-Designated courses

Courses in this group have the PPWD attribute.

Course	Title	Credits
CISC 3010	Scientific Communication	4
COMC 3240	Photography, Identity, Power	4
STEM 3475	Digital Media and Advocacy	4
ENGL 3006	Nonprofit and Advocacy Writing	4
ENGL 3032	Publishing: Theory and Practice	4
ENGL 3046	Writing for Digital Spaces	4
ENGL 3047	Rhetorics of Resistance and Social Movements	4
ENGL 3057	Performance Criticism	4
ENGL 3076	Public Argumentation	4
ENGL 3077	Writing for Public Policy	4
ENGL 3637	The Rhetoric of Social Movements	4
ENGL 5650	Special Topics in Writing Studies	3
HIST 3220	Medieval Hollywood	4
HIST 4011	Why America Fights	4
JOUR 2723	Introduction to Climate Storytelling	4
JOUR 3723	Interviews and Profiles	4
JOUR 3727	Writing for Magazines	4
JOUR 3783	Theater Journalism	4
MATH 3010	Scientific Communication	4
MVST 4010	Medieval Franciscans and the Dream of a Just Economy	4
MVST 4040	Exploring Medieval New York	4
NMDD 3350	Advocacy Design Lab	4
POSC 3622	Politics of the European Union	4
POSC 4040	Seminar: Sustainable Development	4

Additionally, select sections of ENGL 3019 Writer's Workshop may be offered with the PPWF and/or PPWD attributes.

Program Policies

Policy on Double Counting

Students may double count up to two (2) courses towards the PPW minor and their major, or another minor. For PPW minors majoring in English or in English with a Creative Writing Concentration, one of those courses will be Texts and Contexts. Students may count no more than two PPW-Designated courses from outside of English toward the minor.

Study Abroad Policy

Students are not required to study abroad. However, students who choose to study abroad may apply up to two (2) pre-approved courses to the PPW minor.

Foreign Language Policy

There is no foreign language requirement for the PPW minor. However, students may fulfill elective requirements for the minor with appropriate courses in a language other than English.

Grades

Courses in which a student receives a grade of D or F will not count toward the minor.

Additional Information

1. For students who transfer from another school to Fordham, the department will consider counting up to two courses taken prior to arrival at Fordham toward the minor.
2. Credits earned for internships do not count for credit toward the Public & Professional Writing minor. Internship credits do count for general credits toward graduation. In order to receive academic credit for an internship, you must have completed 60 academic credits, have a minimum 3.0 GPA, and register for a tutorial with a faculty member who agrees to serve as your academic adviser. Depending on the amount of academic work involved in the tutorial, your faculty mentor will suggest that you register for a one- or two-credit tutorial. Internships are graded on a Pass/Fail basis.
3. Advanced Placement credits in English Literature and in English Language count toward a student's total number of credits in the college but not within the minor. A score of 4 or 5 in AP English Literature will count toward college elective credits.
4. Courses taken on a Pass/Fail basis cannot be counted towards Public & Professional Writing minor requirements.

Availability

The minor in public & professional writing is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in public & professional writing only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Environmental Science

Environmental science is an interdisciplinary major offered on the Rose Hill and Lincoln Center campuses. Students who complete the requirements of this program will graduate with a B.S. degree in environmental science. A minimum grade of C- is required in all courses taken to fulfill the major.

The environmental science program provides students with a solid foundation in scientific principles and analysis, focusing on the environment. The program emphasizes a rigorous curriculum using an integrated approach that combines concepts and methods across the fields of biology, chemistry, biochemistry, physics, and mathematics. Research and training opportunities exist within each of the contributing departments, the Louis Calder Center, and at major collaborative scientific institutions in the New York City area. Following a solid scientific grounding in the first two years, upper-level students choose science elective courses that allow them to tailor their interests toward an emphasis on a biological or chemical sciences approach and complete an independent science research project on an environmental topic or an internship at an environmental firm or government agency.

Students majoring in environmental science may not double major in biology, chemistry, general science, or natural science. Students majoring in environmental science may choose any available minor at Fordham provided that they fulfill the requirements stipulated by the department or program offering the minor and have approval from the dean's office.

For more information

Visit the Environmental Science program web page.

Programs

- Environmental Science Major (p. 242)

Environmental Science Major

Requirements

Course	Title	Credits
ENVS 3000	Environmental Science	3
One the following options (plus all accompanying labs):		
<i>Rose Hill:</i>		
BISC 1403	Introductory Biology I	
BISC 1404	Introductory Biology II	
BISC 2561	Ecology	
CHEM 1321	General Chemistry I	
CHEM 1322	General Chemistry II	
CHEM 2521	Organic Chemistry I	
PHYS 1501	General Physics I	
<i>Lincoln Center:</i>		
NSCI 1403	General Biology Lecture I	
NSCI 1404	General Biology Lecture II	
NSCI 2010	Global Ecology Lecture	
NSCI 1321	General Chemistry Lecture I	
NSCI 1322	General Chemistry Lecture II	
NSCI 3121	Organic Chemistry Lecture I	
NSCI 1501	General Physics Lecture I	
One of the following: ¹		3 to 4
MATH 1203	Applied Calculus I	
MATH 1206	Calculus I	
MATH 1207	Calculus II	
One of the following:		3 to 4
MATH 1205	Applied Statistics	
MATH 1700	Mathematical Modelling	
Four advanced Environmental Science Elective courses, below		
Two Environmental Policy/Law/Economics courses, below		7 to 8
Two semesters of Research or Internship		8
ENVS 4401	Environmental Science Internship	
ENVS 4501	Environmental Science Research	

¹ MATH 12AB or MATH 12BC (transfer credit from AP Calculus AB or BC) also fulfills this requirement.

Students should take two semesters of research or two semesters of internship; they may take one of each with the permission of the program director.

Advanced Environmental Science Elective courses

The four advanced environmental science elective courses to complete the major are listed below. The list includes only the lecture course code for each of the required courses. Students should must also complete the lab co-requisite for courses that have one (e.g., BISC 2539 General Genetics, BISC 3643 Microbiology, CHEM 2522 Organic Chemistry II, CHEM 3622 Physical Chemistry II, NSCI 2142 Paleocology Lecture, NSCI 3122 Organic Chemistry Lecture II, NSCI 4143 Advanced Microbiology Lecture).

Students who plan to enroll in a graduate science program are strongly encouraged to complete Organic Chemistry II (CHEM 2522 / NSCI 3122) with the appropriate lab as one of their science electives.

Courses with the code BISC or CHEM are offered at the Rose Hill campus, while courses with the code NSCI are offered at the Lincoln Center campus. Students may not receive credit for taking equivalent/mutually exclusive courses on each campus.

Courses in this group have the ENSE attribute.

Course	Title	Credits
BISC 2539	General Genetics	3
BISC 3244	Evolutionary Biology	3
BISC 3466	Urban Ecology & Evolution	3
BISC 3643	Microbiology	3
BISC 4575	Conservation Biology	4
BISC 4642	Animal Behavior	4
CHEM 2522	Organic Chemistry II	4
CHEM 3622	Physical Chemistry II	4
CHEM 3721	Quantitative Analysis	4
CHEM 3722	Instrumental Analysis	4
CHEM 4340	Environmental Chemistry	3
NSCI 2020	An Introduction to Geology	3
NSCI 2142	Paleocology Lecture	3
NSCI 3101	Biological Modeling	4
NSCI 3121	Organic Chemistry Lecture I	4
NSCI 3122	Organic Chemistry Lecture II	4
NSCI 3133	Genetics Lecture	3
NSCI 4112	Human and Comparative Physiology Lecture	3
NSCI 4143	Advanced Microbiology Lecture	3
NSCI 4153	Biological Chemistry Lecture	3

Environmental Policy/Law/Economics courses

Two courses are required from the list below.

Courses in this group have the EPLE attribute.

Course	Title	Credits
ANTH 4373	Environment and Human Survival	4
ECON 3850	Environmental Economics	4
HIST 3990	North American Environmental History	4
NSCI 4222	Science, Technology, and Society Values	4
PHIL 3109	Environmental Ethics	4
PJST 3200	Environmental Justice	4
POSC 4040	Seminar: Sustainable Development	4
THEO 4008	Religion and Ecology	4
VART 2050	Designing the City	4
VART 2055	Environmental Design	4
VART 3070	Urban Architectural Design	4

Availability

The major in environmental science is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in environmental science only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

CIP Code

03.0104 - Environmental Science.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Environmental Studies

Who speaks for Earth and addresses the world's big environmental challenges? With a degree in environmental studies at Fordham, you can.

You'll tackle the most pressing issues of our times: Climate change. Habitat loss. Mass species extinction. Natural capital degradation. Environmental health. Environmental justice. Building sustainable societies.

Study both science and the humanities with a focus on policy solutions

You'll complete interdisciplinary coursework in the natural sciences, social sciences, and humanities to gain insight into the physical and societal causes and effects of environmental problems, integrating these disciplines in economic, political, and societal policy solutions.

Choose your own career track

Career tracks, such as conservation biology, pre-health, environmental law, sustainable business, sustainable architecture and urban planning, environmental journalism, and sustainable agriculture, are developed through course electives, internships, study abroad, senior thesis research, and our Alumni Career Advisory Board, allowing you to graduate with a clear academic profile and strong professional resume.

Access world-class Fordham and NYC resources facilities

Resources and facilities include the following:

- Fordham's Louis Calder Center Biological Field Station
- St. Rose's Garden (campus urban agriculture garden)
- The Campus Sustainability Program
- University partnerships with the New York Botanical Garden, the Wildlife Conservation Society/Bronx Zoo, and the Bronx River Alliance (Department of Parks)
- Read more about resources and facilities here.

Study around the globe

Study abroad courses and fieldwork can take you to Denmark, South Vietnam, Australia, Africa, and elsewhere, giving you invaluable international experience. They can also count toward the environmental studies major or minor (up to four courses).

Practice in professional internships what you're studying in courses

You'll start practicing what you're studying now by taking advantage of internship opportunities in New York City, abroad, and in our special Bronx River Stewardship and Internship Program, incorporating professional experience into your coursework, employment resume, and graduate-school application.

Pursue your own original research

Your research in courses, study abroad, and internships culminates in the senior research thesis. You'll spend a semester or entire year on an original research project under the guidance of faculty members, and publish your research in an online journal.

Participate in a close-knit community of learners

Environmental clubs at Rose Hill and Lincoln Center sponsored by our program allow you to participate in a close-knit community of learners beyond the classroom and pursue activities such as campus ecology projects, invited speakers, career fairs, and field trips.

Environmental citizenship and mission

You'll serve the mission of Fordham and our program: to respect the environment, serve the greater good, and be an exemplary environmental citizen and leader.

For more information

Visit the Environmental Studies program webpage.

Programs

- Environmental Studies Major (p. 244)
- Environmental Studies Minor (p. 247)

Environmental Studies Major Requirements

The major requires 12 courses, up to eight of which may also count toward the core curriculum through appropriate course selection.

Summary of Requirements

Course	Title	Credits
ENST 1000	Introduction to Environmental Studies	3
<i>Three natural science courses:</i>		9
One physical science course		
One life science course		
One physical or life science course		
ECON 1200	Principles of Microeconomics	3
One course in Environmental History and Culture		3
One course in Environmental Economics		3
One course in Environmental Politics and Law		3
One course in Environmental Ethics and Justice		3
One course in Sustainable Design		3
ENST 3000	Environmental Research Methods	4
ENST 4000	Senior Thesis	4

Up to two courses may be double-counted from another major, as well as from a minor.

First Year Introductory Course

This course provides an overview of environmental problems and their societal causes and effects from natural science, social science, and humanities perspectives, and introduces students to interdisciplinary methods of integrating these disciplines in policy solutions to environmental problems.

1. One course in introductory environmental studies.

Course	Title	Credits
ENST 1000	Introduction to Environmental Studies	3

First Year/Sophomore Natural Science Courses

The following natural science courses provide foundational knowledge of physics, chemistry, and biology. Additional natural science courses (and/or a minor in biological sciences (p. 189)) can be taken in order to pursue a career track in conservation biology (see Career Tracks on the program website). If you have relevant AP or IB exams with a score of 4 or 5 (HL score of 6 or 7 for IBs), such exam credit might count toward the following requirements.

Note that some courses have prerequisites that must be completed. Among science courses, courses with the NSCI (p. 1503) (Natural Science) and HPLC (p. 1358) (Honors Program Lincoln Center) subject codes are offered at the Lincoln Center campus, while courses with the PHYS (p. 1549) (Physics), CHEM (p. 1035) (Chemistry and Biochemistry), BISC (p. 1019) (Biological Sciences), and HPRH (p. 1359) (Honors Program Rose Hill) subject codes are offered at Rose Hill campus.

Environmental Studies Natural Science courses (Physical and Life) all have the ESNS attribute.

2. One Environmental Studies Physical Science course.

CHEM 1109 Chemistry of the Environment, PHYS 1203 Environmental Physics, or NSCI 1020 Physical Science: Today's World is recommended, but any course listed below may apply to this requirement.

Courses in this group have the ESPS attribute.

Course	Title	Credits
BISC 3000	Environmental Science	3
CHEM 1109	Chemistry of the Environment	3
CHEM 1321	General Chemistry I	4
ENVS 3000	Environmental Science	3
HPLC 1603	Honors: Natural Science I	4
HPRH 1101	Interdisciplinary STEM I	3
NSCI 1020	Physical Science: Today's World	3
NSCI 1321	General Chemistry Lecture I	4
NSCI 1501	General Physics Lecture I	3
NSCI 2020	An Introduction to Geology	3
PHYS 1203	Environmental Physics	3
PHYS 1350	The Physics of Climate Change	3
PHYS 1501	General Physics I	3
PHYS 1601	Introduction to Physics I	4
PHYS 1701	Physics I	3

3. One Environmental Studies Life Science course.

BISC 1002 Ecology: A Human Approach or NSCI 1040 People and the Living Environment is recommended, but any course listed below may apply to this requirement.

Courses in this group have the ESLS attribute.

Course	Title	Credits
ANTH 1200	Introduction to Biological Anthropology	3
ANTH 4722	Primate Ecology and Conservation	4
BISC 1000	Life on the Planet Earth	3
BISC 1002	Ecology: A Human Approach	3
BISC 1403	Introductory Biology I	3
BISC 1404	Introductory Biology II	3
BISC 2561	Ecology	3
HPLC 1604	Honors: Natural Science II	4
HPRH 1201	Interdisciplinary STEM II	3
NSCI 1040	People and the Living Environment	3
NSCI 1403	General Biology Lecture I	3
NSCI 1404	General Biology Lecture II	3
NSCI 1423	Concepts in Biology Lecture I	3
NSCI 1424	Concepts in Biology Lecture II	3
NSCI 2010	Global Ecology Lecture	3
NSCI 2142	Paleoecology Lecture	3

4. One Environmental Studies Physical Science or Life Science course.

Students should select one additional physical science (ESPS attribute) or life science (ESLS attribute) course.

First Year/Sophomore Social Science Courses

The following course provides foundational skills in economics. If you have relevant AP or IB exams with a score of 4 or 5 (HL score of 6 or 7 for IBs), such exam credit might count toward the following requirements.

5. One course in introductory economics.

Course	Title	Credits
ECON 1200	Principles of Microeconomics	3

Upper-Level Courses

The following courses provide advanced knowledge and methods in the policy areas of environmental economics, design, politics and law, history, anthropology, media and communications, and ethics and justice. Students can make course selections in these areas in order to pursue a particular career track (see Career Tracks on the program website).

6. One course in environmental history and culture.

HIST 3990 North American Environmental History or ANTH 4373 Environment and Human Survival is recommended, but any course listed below may apply to this requirement. ENST 3000 Environmental Research Methods may also be used to fulfill this requirement or (with the permission of the program director) a different upper requirement.

Courses in this group have the ESHC attribute.

Course	Title	Credits
ANTH 2700	You Are What You Eat: The Anthropology of Food	4
ANTH 3380	Hazards, Disasters, and Human Experience	4
ANTH 4200	Climate Change and Culture	4
ANTH 4373	Environment and Human Survival	4
ANTH 4722	Primate Ecology and Conservation	4
BISC 4035	Ecology and Economics of Food Systems	4
COMC 4115	Communication and the Food System	4
COMC 4222	Media and the Environment	4
ECON 4035	Ecology and Economics of Food Systems	4
ENGL 3122	Extinction	4
ENGL 3209	Ecoliterature from Milton to Today	4
ENGL 3424	Romantics and Their World	4
ENGL 3633	The Enlightened Earth: American Environment Cultures After 1960	4
ENGL 3634	The Literature of Climate Crisis	4
ENGL 3635	Future Environments: Human Life After the End	4
ENGL 3909	Interspecies Friendship	4
ENGL 3910	Nature and Horror	4
ENGL 3916	Animals in Literature	4
ENGL 4107	Seminar: Ecology on the Edge: Climate Change and Literature	4
ENGL 4216	Animal Welfare in Literature and Culture	4
ENST 3000	Environmental Research Methods	4
ENST 4900	Environmental Internship and Media Advocacy	4
FREN 3270	Écocritique: Francophone environments and cultures	4

FREN 3492	Climate Change and Sustainable Development in the Francophone World	4

LPBU 3432	ST: Modern Economics for a Sustainable World	3
LPBU 3461	ST: Sustainable Fashion	3
MKBU 3461	ST: Sustainable Fashion	3

8. One course in environmental politics and law.

POSC 3307 Environmental Politics or POSC 3131 Politics, Urban Health, and Environment is recommended, but any course listed below may apply to this requirement.

Courses in this group have the ESPL attribute.

Course	Title	Credits
ENST 3307	Environmental Politics	4
ENST 3308	Catastrophe and Human Survival	4
PJST 3200	Environmental Justice	4
POSC 3131	Politics, Urban Health, and Environment	4

POSC 3307	Environmental Politics	4
POSC 3312	Introduction to Environmental Politics	4

9. One course in environmental ethics and justice.

PHIL 3109 Environmental Ethics, PHIL 3712 Global Environment and Justice, PHIL 3990 Environmental Worldviews and Ethics, PHIL 4302 Environmental Policy and Ethics, PHIL 4409 Environmental Ethics, PJST 3200 Environmental Justice, or THEO 4008 Religion and Ecology is recommended, but any course listed below may apply to this requirement.

Courses in this group have the ESEJ attribute.

Course	Title	Credits
AFAM 3530	Race, Climate Change, and Environmental Justice in the African Diaspora	4
ENGL 3122	Extinction	4
ENGL 3209	Ecoliterature from Milton to Today	4
ENGL 3633	The Enlightened Earth: American Environment Cultures After 1960	4
ENGL 3634	The Literature of Climate Crisis	4
ENGL 3635	Future Environments: Human Life After the End	4
ENGL 3909	Interspecies Friendship	4
ENGL 3916	Animals in Literature	4
ENGL 4107	Seminar: Ecology on the Edge: Climate Change and Literature	4
ENGL 4216	Animal Welfare in Literature and Culture	4

PHIL 3712	Global Environment and Justice	4
PHIL 3722	Native American Philosophy	4
PHIL 3990	Environmental Worldviews and Ethics	4
PHIL 4302	Environmental Policy and Ethics	4
PHIL 4409	Environmental Ethics	4
PJST 3200	Environmental Justice	4
THEO 3371	The American Transcendentalists: Spirituality Without Religion	3
THEO 4008	Religion and Ecology	4
THEO 4444	Anthropocene: Sciences, Fictions, and Ethical Futures	4
THEO 4520	Animals, Angels, and Aliens: Beyond the Human in Christian Thought	3

10. One course in sustainable design.

VART 2050 Designing the City or VART 2055 Environmental Design is recommended, but any course listed below may apply to this requirement.

Courses in this group have the ESSD attribute.

Course	Title	Credits
ARHI 4555	Art & Ecology in the 19th, 20th & 21st century	4
VART 2040	Elements of Architecture	4

Updated: 09-06-2024

VART 2050	Designing the City	4
VART 2055	Environmental Design	4
VART 2070	Architectural Design	4
VART 2424	Art and Action on the Bronx River	4
VART 3055	Ecology for Designers	4
VART 3056	Urban Environmental Design	4
VART 3541	The Streets of New York	4

11. One course in research and statistical methods.

ENST 3000 Environmental Research Methods, offered only each fall and taken in the senior year, provides an overview of environmental studies methods and allows students to begin work on their senior thesis, which is completed in ENST 4000 Senior Thesis in the following semester. When taken prior to the senior year to fulfill a different upper requirement, the course must be taken a second time in the senior year to begin work on the senior thesis.

Course	Title	Credits
ENST 3000	Environmental Research Methods	4

Senior Thesis Capstone

12. Senior Thesis

Course	Title	Credits
ENST 4000	Senior Thesis	4

This course, normally offered only each spring and taken only in the senior year, involves completing a research thesis on an environmental issue of the student's choice which is approved by the instructor.

Availability

The major in environmental studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in environmental studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

CIP Code

03.0103 - Environmental Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Environmental Studies Minor Requirements

The minor requires six courses, many of which may also count toward the core curriculum through appropriate course selection.

Summary of Requirements

Course	Title	Credits
ENST 1000	Introduction to Environmental Studies (See other options below)	3

One Environmental Studies Physical Science course

One Environmental Studies Life Science course

Three elective courses

Up to two courses may be double-counted from a major, as well as from another minor.

1. One course in introductory Environmental Studies.

ENST 1000 Introduction to Environmental Studies is preferred, but any course listed below may apply to this requirement.

Courses below have the ENMI attribute.

Course	Title	Credits
ANTH 4373	Environment and Human Survival	4
ENST 1000	Introduction to Environmental Studies	3
ENST 3307	Environmental Politics	4
HIST 3990	North American Environmental History	4
PHIL 3109	Environmental Ethics	4
PHIL 3712	Global Environment and Justice	4
PHIL 4302	Environmental Policy and Ethics	4
PHIL 4409	Environmental Ethics	4
PJST 3200	Environmental Justice	4
POSC 3307	Environmental Politics	4
POSC 3312	Introduction to Environmental Politics	4
SOCI 3145	Environment Technology Society	4
THEO 4008	Religion and Ecology	4

2. One Environmental Studies Physical Science course.

CHEM 1109 Chemistry of the Environment, PHYS 1203 Environmental Physics, or NSCI 1020 Physical Science: Today's World is recommended, but any course listed below may apply to this requirement.

Courses below have the ESPS attribute.

Course	Title	Credits
BISC 3000	Environmental Science	3
CHEM 1109	Chemistry of the Environment	3
CHEM 1321	General Chemistry I	4
ENVS 3000	Environmental Science	3
HPLC 1603	Honors: Natural Science I	4
HPRH 1101	Interdisciplinary STEM I	3
NSCI 1020	Physical Science: Today's World	3
NSCI 1321	General Chemistry Lecture I	4
NSCI 1501	General Physics Lecture I	3
NSCI 2020	An Introduction to Geology	3

PHYS 1203	Environmental Physics	3
PHYS 1350	The Physics of Climate Change	3
PHYS 1501	General Physics I	3
PHYS 1601	Introduction to Physics I	4
PHYS 1701	Physics I	3

3. One Environmental Studies Life Science course.

BISC 1002 Ecology: A Human Approach or NSCI 1040 People and the Living Environment is recommended, but any course listed below may apply to this requirement.

Courses below have the ESLS attribute.

Course	Title	Credits
ANTH 1200	Introduction to Biological Anthropology	3
ANTH 4722	Primate Ecology and Conservation	4
BISC 1000	Life on the Planet Earth	3
BISC 1002	Ecology: A Human Approach	3
BISC 1403	Introductory Biology I	3
BISC 1404	Introductory Biology II	3
BISC 2561	Ecology	3
HPLC 1604	Honors: Natural Science II	4
HPRH 1201	Interdisciplinary STEM II	3
NSCI 1040	People and the Living Environment	3
NSCI 1403	General Biology Lecture I	3
NSCI 1404	General Biology Lecture II	3
NSCI 1423	Concepts in Biology Lecture I	3
NSCI 1424	Concepts in Biology Lecture II	3
NSCI 2010	Global Ecology Lecture	3
NSCI 2142	Paleoecology Lecture	3

4. Three elective courses

Any with the ESEL attribute, or the ENMI attribute code if not previously counted, may apply toward this requirement.

Courses below have the ESEL attribute.

Course	Title	Credits
AFAM 4147	Food and Globalization	4
ANTH 1200	Introduction to Biological Anthropology	3
ANTH 2700	You Are What You Eat: The Anthropology of Food	4
ANTH 3380	Hazards, Disasters, and Human Experience	4

Availability

The minor in environmental studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in environmental studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fashion Studies

Fordham offers a unique, interdisciplinary approach to fashion education. We recognize that fashion is so much more than just clothing. It's an art form, a complex cultural phenomenon, and a trillion dollar industry. Accordingly, our fashion studies courses are offered by departments across the University. In addition to the required classes in business, culture, and design, students have the opportunity to learn about topics such as the psychology of consumer behavior, the sociological function of fashion trends, the historical significance of style, the environmental impact of garment production, and how to utilize clothing as a means of communication.

Like so many other fields, the fashion industry is in a time of transformation. Growth in emerging markets, the rise of new media and social networks, and increasing pressure to develop merchandise that is produced and marketed ethically and sustainably are among the various challenges impacting the world of fashion today. Understanding fashion from a variety of perspectives and thinking critically about how the industry functions in the world today empowers our students to meet these challenges with the intelligence, innovation, and humanity necessary to bring about positive change in the industry.

For more information

Visit the Fashion Studies program web page.

Programs

- Fashion Studies Minor (p. 249)

Fashion Studies Minor

Requirements

The Fashion Studies minor is an interdisciplinary minor, weaving together the cultural, creative, and commercial components of the industry.

Students must take six courses: three required introductory courses and three electives, depending upon their specific area of interest.

Course	Title	Credits
ANTH 2400	Introduction to Fashion and Culture	4
THEA 1210	Introduction to Fashion Design	3
MKBU 3436	ST: The Business of Fashion	3
Three fashion studies electives ¹		

¹ Any course of three or more credits with the subject code FASH or with the attribute FASH may fulfill this requirement (see lists below).

Fashion Studies electives

Courses in this group have the FASH subject code.

Course	Title	Credits
FASH 3100	History of Cosmetics and Grooming	3
FASH 3200	Dressing the Gendered Body	3
FASH 3800	Fashion Studies Internship	3
FASH 3999	Tutorial	3
FASH 4000	Fashion in Museums	4

Courses in this group have the FASH attribute.

Course	Title	Credits
ANTH 2400	Introduction to Fashion and Culture	4
ARHI 2620	Introduction to Fashion History	4
ARHI 2621	Art and Fashion in the Modern Age	4
ARHI 3621	Museum Collaboration	4
COMC 3174	Public Relations	4

THEA 1220	Fashion Techniques	3
THEA 2230	Costume Design I	3
THEA 2235	Costume Design II	3

Finance and Business Economics

Located in New York City, the world's financial capital, the Gabelli School of Business prepares students for a wide range of careers within the financial services industry. Students may choose from three broad career orientations in the field of finance to focus their academic pursuits: corporate finance, investment management, and financial institutions.

- Corporate finance courses are appropriate for students interested in the investment and financing decisions of business firms and nonprofit organizations. They emphasize the development of analytical techniques and an understanding of how the economic environment influences day-to-day and long-term financial decisions.
- Investment management is intended for students primarily interested in the evaluation of securities and the management of portfolios. Here, the focus is on the relationship between the economic environment and the valuation of securities.
- The financial institutions program is offered in cooperation with the economics department and is intended to serve commercial banks, insurance companies, and other financial institutions not generally covered under corporate finance and investment management.

Students who want to include finance as a component of their degree have multiple options, each of which offers a specific level of depth and structure. Finance may be studied as a major, a primary concentration, or a secondary concentration. The finance area also houses additional areas of concentration that represent growing niche areas within the financial field.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

Visit the Finance Area web page.

Programs Majors

- Applied Accounting and Finance Major (p. 250)
- Finance Major (p. 252)

Minor

- Finance Minor (p. 253)

Primary and/or Secondary Concentrations

- Concentration in Alternative Investments (p. 250)
- Concentration in Credit (p. 251)
- Concentration in Finance (p. 251)
- Concentration in Fintech (p. 251)
- Concentration in Global Finance and Business Economics (p. 252)
- Concentration in Value Investing (p. 252)

Applied Accounting and Finance Major

Requirements

The requirements for the **applied accounting and finance major** are as follows:

Course	Title	Credits
ACBU 3434	Intermediate Financial Accounting I	3
ACBU 3435	Intermediate Financial Accounting II	3
ACBU 3441	Advanced Concepts in Financial Accounting	3
ACBU 4646	Ethics in Financial Reporting and Accounting	3
ACBU 3421	ST: Accounting Information Systems	3
FNBU 3440	Corporate Financial Policy	3
FNBU 3441	Investments & Security Anlys	3
One elective course from list below ¹		3
One upper-level elective in finance ²		3
Two CPA-required courses OR two additional upper-level business electives ³		6
Total Credits		33

¹ CPA track students should take INSY 4506 Business Analytics to fulfill this requirement.

² Any course with subject code FNBU (p. 1264) numbered 3440 or higher may fulfill this requirement.

³ ACBU 3442 Individual and Business Taxation and ACBU 3443 Assurance and Auditing should both be taken if a student pursues the two CPA-required courses.

Electives

Courses in this group have the AAAF attribute.

Course	Title	Credits
ACBU 4436	Accounting for Derivative Securities	3
FNBU 4453	ST: Fixed-Income Analysis	3

FNBU 4454	ST: Financial Modeling	3
FNBU 4464	ST: Compliance and Risk Management	3
FNBU 4480	ST: Traded Credit Products	3
INSY 4506	Business Analytics	3

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

CIP Code

52.0304 - Accounting and Finance.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Concentration in Alternative Investments

The alternative investments sub-area of finance covers topics such as private equity, venture capital, hard assets, commodities, real estate investment management, and hedge fund investing. These are growth fields with significant hiring potential.

For more information

Visit the Alternative Investment program web page.

Requirements

Alternative investments can be pursued by Gabelli students as a secondary concentration only.

The secondary concentration in alternative investments can be completed by taking any three courses related to alternative investing. All secondary concentration students are eligible to apply for inclusion in the alternatives investment program resume book and are encouraged to participate in club programs, skill set training and networking events during the semester.

Course	Title	Credits
FNBU 3447	Real Estate Finance	3
FNBU 4448	ST: Private Equity	3
FNBU 4455	ST: Hedge Funds ¹	3
FNBU 4456	Special Topic: Venture Capital	3
FNBU 4466	ST: Alternative Investing ¹	3

¹ FNBU 3441 Investments & Security Anlys is a prerequisite for FNBU 4455 ST: Hedge Funds and FNBU 4466 ST: Alternative Investing.

All credits earned towards this secondary concentration may double-count towards a major in Public Accountancy (p. 150), Finance (p. 252), or Applied Accounting and Finance (p. 250).

Concentration in Credit Overview

Over the past 10 years, the global leveraged credit markets have more than tripled in size. In addition, these markets have become significantly more complex due to regulatory changes after the 2008 financial crisis. As banks have curtailed traditional risk-taking behaviors, we have seen massive growth in non-regulated financial firms to fill the gap (BDCs, Credit Hedge Funds, CLOs, etc.).

Furthermore, over the past five years, private equity firms have developed in-house credit capital markets groups to focus on funding their deals. With the explosion of these markets, the need for well-trained credit professionals is unprecedented.

This secondary concentration focuses on credit, but it will also prepare students for other employment opportunities in the financial field, such as buy-side investing, sell-side research, general investment banking, and private equity.

Requirements

The Secondary Concentration in Credit requires completion of three courses (nine credits).

Course	Title	Credits
Required Courses		
FNBU 4447	ST: Credit and Special Situation Investing ¹	3
FNBU 4486	Advanced Credit Analysis and Distressed Value Investing	3
Elective		3
<i>One course from the below options:</i>		
FNBU 4453	ST: Fixed-Income Analysis	
FNBU 4443	ST: Commercial Credit and Banking	
FNBU 4454	ST: Financial Modeling	
Total Credits		9

¹ FNBU 3221 Financial Management and ACBU 2222 Principles of Financial Accounting are the prerequisites to this course.

All credits earned towards this secondary concentration may double-count towards a major in Public Accountancy (p. 150), Finance (p. 252), or Applied Accounting and Finance (p. 250).

Concentration in Finance Requirements

All Gabelli students except Lincoln Center students concentrating in Global Finance and Business Economics may concentrate in Finance as either a primary concentration or a secondary concentration.

Primary Concentration

Course	Title	Credits
FNBU 3440	Corporate Financial Policy	3
FNBU 3441	Investments & Security Anlys	3
Two upper-level finance courses ¹		

¹ Any course from the subject code FNBU (p. 1264) numbered 3440 or higher may fulfill this requirement.

Note: Students pursuing a primary finance concentration may obtain their class dean's approval to take one of the following courses offered by the economics department to fulfill one of the requirements for the concentration in finance.

Course	Title	Credits
ECON 3125	Managerial Economics	4
ECON 3347	International Finance	4
ECON 3636	Money and Banking	4
ECON 3637	Monetary Policy ¹	4
ECON 3739	Financial Markets	4

¹ Prerequisite: ECON 3636 Money and Banking

Secondary Concentration

Students who want to pursue finance as a secondary concentration are required to complete three upper-level finance courses. ¹

¹ Any course from the subject code FNBU (p. 1264) numbered 3440 or higher may fulfill this requirement.

Students pursuing a major, primary concentration, or secondary concentration in finance may not receive credit for taking ECON 3743 Stocks, Bonds, Options, and Futures or ECON 3778 Corporate Finance.

Concentration in Fintech

The Gabelli School of Business offers a three-course secondary concentration in fintech, co-designed by the finance and information, technology, and operations faculty.

The role of technology in the business world in general, and the finance profession in particular, is exploding. The term "fintech" refers to a range of disruptive applications ranging from Bitcoin to high-speed trading to mobile banking. This secondary concentration is ideal for students who have an interest in these areas and who sense the inherent value in the point where finance and information systems meet.

Requirements

Fintech can be pursued by Gabelli Students as a secondary concentration only. FNBU 4454 ST: Financial Modeling and INSY 3436 ST: Programming with Python are prerequisites for pursuing the concentration.

Course	Title	Credits
FNBU 3450	ST: Fintech - An Introduction ¹	3
or INSY 3450	ST: Fintech - An Introduction	
One course from Finance		
FNBU 4479	ST: Algorithmic Trading	
FNBU 4430	Computational Finance	
One course from Information Systems		3 to 4

¹ This is a cross-listed course. Students studying Information Systems should select INSY 3450 and students studying Finance should select FNBU 3450.

Students pursuing this concentration with a Finance major may double-count all credits earned towards this concentration (including INSY 3436 ST: Programming with Python) towards the major.

Information Systems courses

Courses in this group have the FTIS attribute.

Course	Title	Credits
INSY 3421	Accounting Information Systems	3
INSY 3432	Database Systems	3
INSY 3433	Programming with Java	3
INSY 3441	Systems Analysis	3
INSY 4433	Advanced Python for Business	3
INSY 4434	ST: Data Mining for Business	3
INSY 4506	Business Analytics	3
INSY 4508	Business Modeling With Spreadsheets	3

Concentration in Global Finance and Business Economics

Virtually every large company is now multinational, through exports, imports, foreign offices, employee composition, partnerships, owners, subsidiaries, funding sources, and/or investments. The global finance and business economics concentration is designed to prepare students for a productive and influential role in an increasingly integrated financial community. The first four of its five required courses specifically target the accounting, economics, and finance topics that define the study of global finance and economics. The fifth, a capstone course, emphasizes a wide range of cases and Excel skills to ensure that graduates can succeed in the marketplace.

Graduates of this concentration will be well-trained for positions in the global workforce such as financial analyst, account executive, sales and trading support, investment manager, and risk manager. They will benefit from Fordham's presence in New York City and close connections with Manhattan-based corporations, many of which supply working executives as adjunct instructors and provide internships for Fordham students.

For more information visit the Global Finance and Business Economics website.

Requirements

The global finance and business economics program may be completed by Gabelli School of Business Lincoln Center students as a primary concentration.

Course	Title	Credits
FNBU 3441	Investments & Security Anlys	3
FNBU 3443	Global Business Econ & Trade	3
FNBU 3444	Global Financial Management	3
FNBU 4450	Global Investments	3
FNBU 4476	Financial App & Institutions	3
ACBU 3436	Global Financial Statement Analysis	3

Finance Elective ¹	3
Quantitative Analysis Requirement ²	3

¹ Courses from the subject code FNBU numbered 3222-4999 (of at least 1.5 credits) may fulfill this requirement.

² This requirement can be fulfilled by any of the following courses:

- FNBU 4454 ST: Financial Modeling (which may also count as a finance elective)
- ECON 3116 Intermediate Macroeconomics (which may also count as a Liberal Arts elective)
- ECON 3154 Math for Economists (which may also count as a Liberal Arts elective)
- ECON 3885 Introductory Econometrics (which may also count as a Liberal Arts elective)

Concentration in Value Investing

Value investing is the investment methodology developed by Benjamin Graham and David Dodd, and pursued by investors such as Warren Buffett and the Gabelli School's namesake, Mario Gabelli, GABELLI '65. The secondary concentration in value investing was developed by James R. Kelly, lecturer in finance, and launched in 2013. It is well-suited to qualified students who wish to add specificity to their degree.

For more information

Visit the Value Investing program web page.

Requirements

Value Investing can be pursued by Gabelli students as a secondary concentration only.

Course	Title	Credits
FNBU 4457	Introduction to Value Investing ¹	3
FNBU 4458	Behavioral Finance	3
FNBU 4459	Applied Value Investing ²	3

¹ Students who want to pursue this concentration should take Introduction to Value Investing (FNBU 4457), no later than the second semester of junior year. The prerequisite for the introductory course is FNBU 3221 Financial Management, with a corequisite of ACBU 3436 Global Financial Statement Analysis.

² FNBU 3441 Investments & Security Anlys is a prerequisite for FNBU 4459 Applied Value Investing and must be taken to complete the secondary concentration in value investing.

Finance Major Requirements

Course	Title	Credits
FNBU 3441	Investments & Security Anlys ¹	3
ACBU 3436	Global Financial Statement Analysis	3
FNBU 4454	ST: Financial Modeling	3
Select three of the following:		
FNBU 3440	Corporate Financial Policy	
FNBU 3442	Portfolio Management	

FNBU 3446 Futures and Options Market

FNBU 4450 Global Investments ²

FNBU 4453 ST: Fixed-Income Analysis

Select four electives from the following (at least two must be upper-level finance courses): ³

From those listed above

From other upper-level Gabelli School of Business finance or accounting courses ⁴

From the economics department ⁵

¹ FNBU 3441 Investments & Security Anlysis is a prerequisite for other courses within the major.

² The Global Investments requirement may also be fulfilled by the second course in the Student Managed Investment Fund's two-semester sequence. Students who have been accepted into the SMIF program should see their class dean for details.

³ For Finance majors pursuing a secondary concentration in Fintech (p. 251), the three courses that comprise the secondary concentration may double-count as electives towards the Finance major.

⁴ Any course with the subject code FNBU (p. 1264) or subject code ACBU, (p. 971) except for ACBU 3434 Intermediate Financial Accounting I or ACBU 3435 Intermediate Financial Accounting II, may fulfill this requirement. INSY 3436 ST: Programming with Python, if taken as part of a secondary concentration in Fintech (p. 251), may also fulfill this requirement.

⁵ Courses in the ECON department (p. 1162) numbered 3000 or higher count toward this requirement, except for ECON 3743 Stocks, Bonds, Options, and Futures and ECON 3778 Corporate Finance, which do not count.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

CIP Code

27.0305 - Financial Mathematics.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Finance Minor Overview

In conjunction with the Gabelli School of Business, students in Fordham College at Rose Hill (FCRH) or Fordham College at Lincoln Center (FCLC) may complete a minor in finance.

The finance minor complements the liberal arts core by enlarging the diversity of graduate degrees open to students with a liberal arts background and provides additional preparation for their post-graduation job search. The minor in finance provides arts & sciences students with an option to engage in business school coursework while remaining in FCRH or FCLC. It increases students' basic skills in accounting, provides theoretical and empirical knowledge of financial markets and corporate financial policies, exposes them to case studies, and helps them to write and present effectively for a corporate environment.

The required business courses for the minor are offered regularly on the Rose Hill and Lincoln Center campuses. Students who plan to minor in finance may take ECON 1200 Principles of Microeconomics to fulfill the Core social science requirement and the finance minor. Economics majors may count ECON 1200 as well as ECON 2140 Statistics I and ECON 2142 Statistics II toward their major.

Learning Goals

- Students will demonstrate a substantive knowledge of key business concepts and theories.
- Students will demonstrate competency in analytical and technical skills in decision-making.
- Students will demonstrate competency in oral and written communication.
- Students will demonstrate capacity for ethical decision-making and an understanding of how business can positively impact society.
- Students will demonstrate an awareness and competency in effectively working in teams and dealing with globally diverse situations.

Requirements

To earn the minor in finance, students must complete six (6) courses, as follows:

Course	Title	Credits
ACBU 2222	Principles of Financial Accounting	3
FNBU 3221	Financial Management	3
FNBU 3440	Corporate Financial Policy ¹	3
FNBU 3441	Investments & Security Anlysis ¹	3
Two upper-level finance electives ^{2,3}		6
Total Credits		18

¹ The prerequisites for this course are ACBU 2222 Principles of Financial Accounting and FNBU 3221 Financial Management.

² Any course of three or more credits with the subject code FNBU (p. 1264), numbered 3000 or higher, may fulfill this requirement. Some economics courses of three or more credits with the subject code ECON (p. 1162), numbered 3000 or higher, may also fulfill this requirement, with the approval of the Finance and Business Economics

Area, except for ECON 3743 Stocks, Bonds, Options, and Futures, ECON 3778 Corporate Finance, and ECON 3739 Financial Markets, which do not count.

Examples of economics courses that may be considered include ECON 3636 Money and Banking and ECON 3886 Machine Learning for Economists: An Introduction Using R.

- ³ Courses taken to fulfill the finance minor electives must be separate from electives taken toward a major in economics, international political economy, or interdisciplinary math & economics. One finance minor elective may count as an economics elective towards a minor in economics, international political economy, or interdisciplinary math & economics.

Additionally, the following courses are prerequisites for the finance minor, and must be completed:

Course	Title	Credits
ECON 1200	Principles of Microeconomics	3
ECON 2140	Statistics I	4
ECON 2142	Statistics II	4
Total Credits		11

Fordham College at Rose Hill and Fordham College at Lincoln Center students may use ECON 1200 Principles of Microeconomics to satisfy one of their Core social science requirements. It is advisable that students interested in pursuing a finance minor take these prerequisites as early as possible. In addition, as many of the finance classes are sequential, it is recommended that students begin this minor no later than the fall of sophomore year.

Availability

The minor in finance is available for Fordham College at Rose Hill and Fordham College at Lincoln Center students.

General Science

The general science major provides a broad scientific background for students who wish to pursue a career in science-related fields, including health professions, education, law, science technology, scientific writing and editing, sales, and marketing. The major is designed to provide a basic knowledge of the contributing disciplines while allowing students to gain more in-depth knowledge in chemistry and biochemistry, biology, or physics through upper-level elective courses. All courses in the major are selected from existing courses in the contributing departments (biological sciences, chemistry and biochemistry, computer and information sciences, mathematics, and physics). These courses are taught by faculty members from the contributing departments and conform to the rigorous standards of those disciplines. Upon successful completion of all major and core requirements students graduate with a B.S. in general science.

Each semester, students enrolled in this major must have their choice of courses approved by the program director or assigned adviser. Students must maintain a minimum GPA of 2.0 in the required courses for this major. Students may register for a double major in general science and all other majors except biological sciences, chemistry, environmental science, integrative neuroscience (cell and molecular neuroscience track), and physics; however, any minors in these disciplines are allowed and encouraged. There is no minor in general science.

Note: The general science major is not intended for students planning to attend graduate school in a specific science discipline since they may need to complete the undergraduate major in that particular discipline to meet the prerequisites for graduate studies. If there is a real chance that a student may wish to pursue a graduate degree in a specific science discipline, or that a student might wish to pursue a career for which a degree in a specific science discipline is either required or strongly recommended, then that student should choose a discipline-based undergraduate science major (either biological sciences, chemistry, or physics).

Learning Goals for the General Science Degree

By completing the degree in General Science:

- A student will demonstrate the ability to apply the scientific process across multiple fields.
 - Understand the defining characteristics of the scientific method.
 - Develop testable hypotheses, design experiments, interpret results, and present analyses of data.
- A student will have a quantitative background.
 - Understand quantitative approaches in the field of STEM.
 - Learn the basics of computer programming and analysis.
 - Evaluate information by discriminating between non-science and science.
- A student will demonstrate the ability to effectively communicate and collaborate within multiple fields of the sciences as well as other disciplines outside the sciences.
 - Communicate science through formal written and oral methods.
 - Recognize the interdisciplinary nature of science.

For more information

Visit the General Science program web page.

Programs

- General Science Major (p. 254)

General Science Major Requirements

The general science major consists of a total of 13 courses, plus associated labs and recitations.

Course	Title	Credits
Chemistry		
CHEM 1321 & CHEM 1331	General Chemistry I and General Chemistry Lab I	6
CHEM 1322 & CHEM 1332	General Chemistry II and General Chemistry Lab II	6
CHEM 1311	General Chemistry I Recitation	0
CHEM 1312	General Chemistry II Recitation	0
Biology		
BISC 1403 & BISC 1413	Introductory Biology I and Introductory Biology Lab I	5
BISC 1404 & BISC 1414	Introductory Biology II and Introductory Biology Lab II	5

Physics

Select one of the following options (provided prerequisites are met): 8 to 10

Option 1:

PHYS 1701 & PHYS 1511 Physics I and Physics I Lab

PHYS 1702 & PHYS 1512 Physics II and Physics II Lab

Option 2:

PHYS 1601 & PHYS 1511 Introduction to Physics I and Physics I Lab

PHYS 1602 & PHYS 1512 Introduction to Physics II and Physics II Lab

Option 3:

PHYS 1501 & PHYS 1511 General Physics I and Physics I Lab

PHYS 1502 & PHYS 1512 General Physics II and Physics II Lab

Mathematics¹

Select both courses in one of the following options: 6 to 10

Option 1:

MATH 1206 Calculus I

MATH 1207 Calculus II

Option 2:

MATH 1203 Applied Calculus I

MATH 1204 Applied Calculus II

Option 3:

MATH 1203 Applied Calculus I

MATH 1205 Applied Statistics²

Option 4:

MATH 1206 Calculus I

MATH 1205 Applied Statistics²

Computer Science

CISC 1400 Discrete Structures³ 4

CISC 1600 & CISC 1610 Computer Science I and Computer Science I Lab⁴ 4

Electives⁵

Select two advanced courses in one subject (biology, chemistry and biochemistry, or physics), plus required lab corequisites, as applicable; see below lists

One additional advanced course in any of three subjects, plus required lab corequisites, as applicable; see below lists

¹ Students with a demonstrated proficiency in either computer science or statistics can inquire with the program director for alternative choices. MATH 1203 Applied Calculus I or MATH 1206 Calculus I may be fulfilled with transfer credit from AP Calculus (MATH 12AB or MATH 12BC).

² In consultation with the General Science program director, the following statistics courses may also fulfill this requirement. Other options, with program director approval, may be considered.

- ECON 2140 Statistics I
- PSYC 2000 Statistics
- SOCI 2606 Social Science Statistics

³ In consultation with the General Science program director, CISC 1100 Structures of Computer Science may fulfill this requirement.

⁴ Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.

⁵ Each student must take three elective non-core science courses (biology, chemistry and biochemistry, or physics), including any associated labs. At least two of the elective courses must be in the same discipline; the third can be in any of the three disciplines (biology, chemistry and biochemistry, or physics). These courses must be offered by the biological sciences (p. 1019), chemistry and biochemistry (p. 1035), or physics (p. 1549) departments and be advanced enough that one of the following courses, respectively, is a prerequisite:

- CHEM 1322 General Chemistry II
- BISC 1404 Introductory Biology II
- PHYS 1502 General Physics II/PHYS 1602 Introduction to Physics II/PHYS 1702 Physics II

Additionally, a maximum of one independent study in biological sciences (BISC 4999 or BISC 4792), chemistry and biochemistry (CHEM 4999) or physics (PHYS 4999), of at least three credits, may count towards the three course elective requirement.

Advanced Biology Electives

Courses in this group have the GEAB attribute.

Course	Title	Credits
BISC 2539	General Genetics	3
BISC 2561	Ecology	3
BISC 2571	Ecology Lab	2
BISC 3132	Human Physiology	3
BISC 3221	Human Anatomy	3
BISC 3244	Evolutionary Biology	3
BISC 3405	Plant Biology	3
BISC 3521	Biochemistry	3
BISC 3643	Microbiology	3
BISC 3752	Molecular Biology	3
BISC 3754	Cell Biology	3
BISC 3893	Introduction to Virology	3
BISC 4530	Cancer Biology and Signaling	3
BISC 4532	Neuroscience	3
BISC 4642	Animal Behavior	4
BISC 4693	Developmental Biology	3
BISC 4792	Senior Thesis Research	4

Advanced Chemistry Electives

Courses in this group have the GEAC attribute.

Course	Title	Credits
CHEM 2521	Organic Chemistry I	4
CHEM 2522	Organic Chemistry II	4
CHEM 3621	Physical Chemistry I	4
CHEM 3622	Physical Chemistry II	4
CHEM 3721	Quantitative Analysis	4
CHEM 3722	Instrumental Analysis	4
CHEM 4221	Biochemistry I	3
CHEM 4222	Biochemistry II	3

CHEM 4241	Biomimetic Chemistry	3
CHEM 4251	Physical and Computational Models of Biochemical Systems	3
CHEM 4340	Environmental Chemistry	3

Advanced Physics Electives

Courses in this group have the GEAP attribute.

Course	Title	Credits
PHYS 2005	Introduction to Modern Physics	4
PHYS 2101	Engineering Statics and Dynamics	4
PHYS 2102	Mechanics of Materials	4
PHYS 2201	Classical Mechanics I	4
PHYS 3001	Electricity and Magnetism I	4
PHYS 3100	Math Methods in Physics	4
PHYS 3102	Math Methods in Physics II	4
PHYS 3103	Math Methods in Physics III	4
PHYS 3201	Fluid Mechanics	4
PHYS 3401	Thermo and Stat Physics	4
PHYS 3601	Optics	4
PHYS 4003	Classical Mechanics II	4
PHYS 4004	Electricity and Magnetism II	4
PHYS 4005	Quantum Mechanics I	4
PHYS 4006	Quantum Mechanics II	4
PHYS 4010	Introduction to Electric Circuits	4
PHYS 4012	Solid State Physics	4

Availability

The major in general science is available at Fordham College at Rose Hill. Students in Fordham's School of Professional and Continuing Studies may major in general science only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

CIP Code

30.0101 - Biological and Physical Sciences.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Global Business

Every year, business school graduates emerge into an economy that is more interconnected and more global than the year before. The secondary concentration in global business prepares students to succeed in that world. To complete it, students must demonstrate language proficiency, take global courses, have an international

experience, and participate in the International Business Association (IBA).

For more information

Visit the global business program web page.

Programs

- Global Business Major (p. 256)
- Concentration in Global Business (p. 256)

Concentration in Global Business

Requirements

The Global Business concentration can be pursued by Gabelli students as a secondary concentration for Rose Hill students only.

Students who want to pursue this secondary concentration must complete four requirements¹:

1. Learn a foreign language

Complete language courses at least through the Intermediate II level.

2. Take three globally focused courses

Two global business courses, plus one cultural studies course.

3. Experience the world beyond the United States

Spend some time abroad: a full semester; two summer session programs; or two global immersion courses.

4. Join the International Business Association

Demonstrate three years of participation and devotion to increasing knowledge and awareness of global commerce on the Fordham campus and beyond.

For information about the secondary concentration in global business, contact the Gabelli School Dean of International Programs.

¹ This concentration uses some existing coursework. For instance, students complete the language requirement as part of their liberal arts electives. Also, one course from a primary area of business study (major or concentration) and one course from the liberal arts core or a liberal arts minor may also count toward the global business secondary concentration. All double-counting courses must be approved in advance by the Dean of International Programs at the Gabelli School of Business.

Global Business Major

You have a passion for business and a desire to make a positive difference in our world. You have big ambitions and a willingness to work hard. In the global business major at Fordham, these qualities are the very bedrock of success. Studying global business administration you'll become part of the next generation of business leaders through a rigorous and innovative program immersed in the world financial capital of New York City.

The Global Business major allows students to customize their business degrees by picking one primary concentration and combining that with other secondary concentrations or minors. This degree plan also ensures

that students have enough room to study abroad at any of our 150+ partner programs worldwide.

This major is available only to Gabelli School students on the Lincoln Center campus.

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

CIP Code

52.1101 - International Business/Trade/Commerce.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Students pursuing a major in Global Business must select a primary concentration. This may be paired with a secondary concentration or a liberal arts minor from Fordham College at Lincoln Center (p. 73) or Fordham College at Rose Hill (p. 62).

Available primary concentrations include:

- Digital Media and Technology (Media Track) (p. 229)
- Digital Media and Technology (Technology Track) (p. 229)
- Global Finance and Business Economics (p. 252)
- Global Marketing with Consumer Insights (p. 310)

Available secondary concentrations appear below. Courses for these concentrations are primarily offered on the Rose Hill campus.

- Accounting (p. 153)
- Alternative Investments (p. 250)
- Business Economics (p. 191)
- Business Law and Ethics (p. 192)
- Business of Healthcare (p. 365)
- Communications and Media Management (p. 217)
- Consulting (p. 365)
- Credit (p. 251)
- Digital Marketing (p. 309)
- Entrepreneurship (p. 367)
- Finance (p. 251) (Students with Global Finance and Business Economics as a primary concentration may not select Finance as a secondary concentration.)
- Fintech (p. 251)
- Information Systems (p. 268)
- Integrated Marketing Communications (p. 310)
- Management (p. 308)
- Marketing (p. 310) (Students with Global Marketing and Consumer Insights as a primary concentration may not select Marketing as a secondary concentration.)
- Marketing Analytics (p. 311)
- Personal Development and Leadership (p. 308)

- Process and Quality Analytics (p. 269)
- Social Innovation (p. 346)
- Sports Business (p. 364)
- Strategic Branding (p. 311)
- Value Investing (p. 252)

History

The study of history is an important component of a well-rounded liberal arts education. By understanding the origin and development of peoples and nations, their interrelations and interactions, as well as specific areas and movements that have shaped the modern world, the student is better able to comprehend and evaluate contemporary events. A thorough comprehension of history further enables the student to place the study of other disciplines in their historical context. It is, thereby, a valuable asset in the student's course of study as well as an excellent preparation for many professional careers that require a broad social vision and global awareness.

Program Activities

Honors in History

To graduate with the distinction of Departmental Honors, majors need to maintain a 3.500 G.P.A. Among the 10 courses required for the major, students seeking to graduate with honors will successfully complete a four-credit honors tutorial and thesis (HIST 4999 Tutorial), and a 5000-level graduate course which will be treated as the Department Seminar.

Phi Alpha Theta, the National History Honor Society

The mission of Phi Alpha Theta is to promote the study of history and to create a space for intellectual exchange among students and faculty members. It is one of the few honor and professional historical societies that encourages student participation at all its functions. The Chi Phi Chapter of Phi Alpha Theta at Fordham University sponsors many activities throughout the year, including field trips to museums in the New York area and lectures by notable speakers each semester. Phi Alpha Theta members at Fordham are active in regional and national competitions for scholarly prizes. For information about membership, contact Nicholas Paul, Ph.D., at 718-817-3928.

Accelerated Master's Program

Please read the Graduate School of Arts and Sciences Accelerated Master's Programs section (p. 137), which is located under the heading of Special Academic Programs in the chapter on Academic Programs, Policies, and Procedures of this bulletin. Outstanding history students, with grade point averages of 3.2 or better, may apply for early admission to the M.A. program. Students submit their applications in the spring of their junior year and enter the program in the senior year, when they take two graduate courses. These courses count toward the B.A. and are accepted for the M.A. at Fordham.

With credit for the two courses, students are able to complete a history M.A. in two terms of full-time study after completing their bachelor's. M.A. students may either complete a thesis, normally as part of a research seminar, or take a comprehensive exam after completion of coursework. Students from the FCRH, FCLC, and PCS campuses are eligible to opt for early admission into the M.A. program, although all graduate courses are given at Rose Hill. The Department of History offers the M.A. in medieval, modern European, American, Latin-American and Latino, gender, and global history. There is also the option of an

M.A. without a concentration. Applications are made online through the Graduate School of Arts and Sciences website.

For more information

Visit the History department web page.

Contribution to the Core Understanding Historical Change

Through the introduction to the discipline of history, students will begin to achieve knowledge of the structure of societies, how they function, and how they change. Each section of the course will consider how to assess evidence, identify and evaluate differing and often contradictory explanations and arguments, and appraise the relative scale and importance of particular changes in the past. Students will be able to choose from different sections of the course each with the title Understanding Historical Change, and a descriptive subtitle such as Ancient Greece, American History, etc. Courses currently offered include:

Course	Title	Credits
HIST 1000	Understanding Historical Change: Modern Europe	3
HIST 1075	Understanding Historical Change: Renaissance to Revolution in Europe	3
HIST 1100	Understanding Historical Change: American History	3
HIST 1103	Understanding Historical Change: Fighting for Equal Rights in American History	3
HIST 1210	Understanding Historical Change: Ancient Greece	3
HIST 1220	Understanding Historical Change: Ancient Rome	3
HIST 1240	Understanding Historical Change: The Ancient World	3
HIST 1300	Understanding Historical Change: Medieval	3
HIST 1400	Understanding Historical Change: Latin America	3
HIST 1450	Understanding Historical Change: South Asian History	3
HIST 1550	Understanding Historical Change: Modern East Asia	3
HIST 1551	Understanding Historical Change: Representations of China and The West	3
HIST 1600	Understanding Historical Change: Africa	3
HIST 1650	Understanding Historical Change: The Black Atlantic	3
HIST 1700	Understanding Historical Change: Mideast	3
HIST 1750	Understanding Historical Change: Islamic History and Culture	3
HIST 1850	Understanding Historical Change: Jews in the Ancient and Medieval World	3
HIST 1851	Understanding Historical Change: Jews in the Modern World	3
HIST 1925	Understanding Historical Change: Science and Technology	3

Core Requirements

In addition, the department regularly offers courses that fulfill the EP1, EP3, Advanced History Core, American Pluralism, and Global Studies core requirements.

Programs

- History Major (p. 258)
- History Minor (p. 263)

History Major Requirements

Students who major in history must complete ten courses:

Course	Title	Credits
One Understanding Historical Change course ¹		3
One Medieval History course		4
One European History course		4
One American History course		4
One Global History course (African, Asian, Latin American, Middle East, or other approved course)		4
Three upper-level history courses ²		12
One additional history elective ²		3 to 4
One Seminar course ³		4

¹ A list of courses fulfilling the Understanding Historical Change requirement can be seen on the Core Curriculum page (p. 54) and have the HC attribute. Students in the FCRH Honors Program (p. 68) may fulfill this requirement with HPRH 1203 Foundational Topics: History.

² Students in the FCRH Honors Program (p. 68) may count HPRH 2102 Focused Study: History towards either, but not both, of these requirements.

³ Seminar courses include any course numbered HIST 4600-4998, any 5000 level course, or (for Honors Program students), HPRH 4001 Senior Thesis.

Students may substitute a second Understanding Historical Change for one of required upper-level courses. Any HIST course numbered HIST 3000-4599 may fulfill the upper-level course requirement, in addition to the courses listed below with the HIUL attribute.

An AP History score of 4 or 5 can replace two of the student's upper-level electives in history.

In addition, up to two History courses from study abroad can count for upper-level electives.

Medieval History courses

Courses in this group have the HIMH attribute.

Course	Title	Credits
HIST 1850	Understanding Historical Change: Jews in the Ancient and Medieval World	3
HIST 3012	Medieval France	4

Availability

The major in history is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

54.0101 - History, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

History Minor Requirements

Students who minor in history are required to complete six courses:

Course	Title	Credits
	One Understanding Historical Change course ¹	3
	One course in Medieval, Early Modern/Modern European or U.S. History ²	4
	One Global History course (African, Asian, Latin American, Middle East) ³	4
	Three upper level history courses ⁴	12

¹ A list of courses fulfilling the Understanding Historical Change requirement can be seen on the Core Curriculum page (p. 54) and have the HC attribute. Students in the FCRH Honors Program (p. 68) may fulfill this requirement with HPRH 1203 Foundational Topics: History.

² These courses are listed on the history major page (p. 258), and have the attribute codes HIMH, HIEH, or HIAH.

³ These courses are listed on the history major page (p. 258), and have the attribute code HIGH.

⁴ Any course numbered HIST 3000-4599, or a course with the HIUL attribute. A list of such courses may be found on the history major page (p. 258). Students in the FCRH Honors Program (p. 68) may count HPRH 2102 Focused Study: History towards this requirement.

Availability

The minor in history is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

Humanitarian Studies

Humanitarian action, those international endeavors that attempt to relieve the suffering of populations in crisis, and its ideological counterpart, humanitarianism, are powerful notions that cut across many aspects of contemporary life. Even as humanitarianism makes compelling moral claims, its actions are often shaped by political interests, expediency, and a technocratic approach to addressing suffering, all of which have potential to harm the world's most vulnerable populations. The academy has a vital role to play in both understanding humanitarianism and improving contemporary humanitarian practice. The major in international humanitarian studies allows students to examine technical innovation and undertake theoretical critique of humanitarian activities across a range of crises and actors.

In considering international responses to suffering, undergraduates in this major will draw upon a wide array of intellectual tools and academic frameworks. Ethical, moral, cultural, and spiritual considerations confront logistic, economic, scientific, and geo-political modes of thought in circumstances of vast complexity: violent conflict (including gender-based violence), famine, and natural disaster. The major will also contribute to central aims of Fordham's mission: research and education that assist in the alleviation of poverty, the promotion of justice, and the protection of human rights as part of a cosmopolitan education that prepares students for leadership in a global society.

An interdisciplinary undergraduate minor that offers students a comprehensive understanding of issues central to contemporary

humanitarian affairs, especially as seen through the academic lenses of history, sociology, philosophy, theology, political science, and international studies. Students will examine the global impact of natural and man-made disasters, disease, poverty, conflict, human rights violations, and government and intergovernmental policies on international human communities. The international humanitarian affairs minor offers an in-depth analysis of the humanitarian field that will enable students to acquire theoretical and practical knowledge.

For more information

Visit the Humanitarian Studies institute web page.

Programs

- Humanitarian Studies Major (p. 264)
- Humanitarian Studies Minor (p. 266)

Humanitarian Studies Major

Overview

The humanitarian studies program provides students with the technical knowledge and analytical tools necessary to examine and critique the humanitarian action ecosystem at the international, regional, and national levels. This includes learning the governance mechanisms and policies, International Humanitarian Law and principles, humanitarian access and protection of civilians, and internal and external displacement, and a wide range of humanitarian activities at the sectoral level such as food assistance, water and sanitation programming, medical assistance, and refugee and IDP settlements. The combination of rigorous interdisciplinary coursework and experiential learning opportunities prepare students for a host of graduate studies and careers, such as disaster relief, global public health, human rights, and international law. Additionally, the IIHA's New York City location provides students with exposure to various United Nations Agencies, the US Mission to the UN, international NGOs, and prominent research institutions.

Learning Goals

Upon completion of the undergraduate humanitarian studies programs, students will be able to:

1. Demonstrate knowledge and understanding of the actors and actions in international responses to humanitarian crises;
2. Employ a wide range of disciplines and case studies to examine complex humanitarian emergencies, including natural disaster, famine, war, and pandemic disease;
3. Recognize the value of different kinds of knowledge (including both academic and experiential) in formulating appropriate responses to humanitarian crises;
4. Critically evaluate the way in which humanitarian interventions are understood and assessed, specifically contrasting the differences between effectiveness, efficiency, outcome, and impact.

Our mission for students in the humanitarian studies program at Fordham extends beyond simply satisfying the course requirements for the major or minor, and the IIHA and their advisor will support them in a number of ways. Students are encouraged to:

- Participate in the life of the humanitarian community at Fordham. Examining contemporary humanitarian issues with their peers through debates, clubs and other activities is an important part of their humanitarian education;
- Cultivate an in-depth knowledge of a specific area of humanitarian assistance through their elective choices, their internship, and—if in the major—their thesis;
- Consider their professional development and their range of career options while making use of the IIHA's relationships with practitioners as well as Fordham's location in New York City.

Requirements

The following ten courses are required for the major in humanitarian studies:

Course	Title	Credits
HUST 4001	The Humanitarian System: Past, Present, and Future	4
HUST 4500	Evolution of Development and Humanitarian Aid Systems ¹	4
HUST 4800	International Humanitarian Internship ¹	4
HUST 4888	Senior Thesis Seminar ¹	4
<i>Two required electives from each of the following subject areas:</i>		<i>20 to 24</i>
History, Philosophy, and Anthropology Area Studies (see below)		
Humanitarian Affairs, Political Science, Sociology, and Economics (see below)		
Communications, Women's Studies and Literary Studies (see below)		

¹ Please note:

- Students are required to complete HUST 4001 before HUST 4500.
- Students are required to complete both HUST 4001 and HUST 4500 before both HUST 4800 and HUST 4888.

Elective Courses

Students must complete a total of six electives, two from each of the following subject areas.

Note: Because of the diverse range of relevant disciplines and knowledge, the list of electives may not be inclusive of all possible courses. If you are interested in courses that seem relevant but are not listed below, please contact the executive director, Brendan Cahill (brcahill@fordham.edu), to seek approval for your course.

History, Philosophy, and Anthropology Area Studies

Courses in this group have the HHPA attribute

Availability

The major in humanitarian studies is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in humanitarian studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

24.0103 - Humanities/Humanistic Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Humanitarian Studies Minor

Overview

The humanitarian studies program provides students with the technical knowledge and analytical tools necessary to examine and critique the humanitarian action ecosystem at the international, regional, and national levels. This includes learning the governance mechanisms and policies, International Humanitarian Law and principles, humanitarian access and protection of civilians, and internal and external displacement, and a wide range of humanitarian activities at the sectoral level such as food assistance, water and sanitation programming, medical assistance, and refugee and IDP settlements. The combination of rigorous interdisciplinary coursework and experiential learning opportunities prepare students for a host of graduate studies and careers, such as disaster relief, global public health, human rights, and international law. Additionally, the IIHA's New York City location provides students with exposure to various United Nations Agencies, the US Mission to the UN, international NGOs, and prominent research institutions.

Learning Goals

Upon completion of the undergraduate humanitarian studies programs, students will be able to:

1. Demonstrate knowledge and understanding of the actors and actions in international responses to humanitarian crises;
2. Employ a wide range of disciplines and case studies to examine complex humanitarian emergencies, including natural disaster, famine, war, and pandemic disease;
3. Recognize the value of different kinds of knowledge (including both academic and experiential) in formulating appropriate responses to humanitarian crises;
4. Critically evaluate the way in which humanitarian interventions are understood and assessed, specifically contrasting the differences between effectiveness, efficiency, outcome, and impact.

Our mission for students in the humanitarian studies program at Fordham extends beyond simply satisfying the course requirements for

the major or minor, and the IIHA and their advisor will support them in a number of ways. Students are encouraged to:

- Participate in the life of the humanitarian community at Fordham. Examining contemporary humanitarian issues with their peers through debates, clubs and other activities is an important part of their humanitarian education;
- Cultivate an in-depth knowledge of a specific area of humanitarian assistance through their elective choices, their internship, and—if in the major—their thesis;
- Consider their professional development and their range of career options while making use of the IIHA's relationships with practitioners as well as Fordham's location in New York City.

Requirements

The following six courses are required for the minor in humanitarian studies.

Course	Title	Credits
HUST 4001	The Humanitarian System: Past, Present, and Future ¹	4
HUST 4500	Evolution of Development and Humanitarian Aid Systems ¹	4
HUST 4800	International Humanitarian Internship ¹	4
One course in History, Philosophy, and Anthropology Area Studies ²		3 to 4
One course in Humanitarian Affairs, Political Science, Sociology, and Economics ²		3 to 4
One course in Communications, Women's Studies and Literary Studies ²		3 to 4

¹ Please note:

- Students are required to complete HUST 4001 before HUST 4500.
- Students are required to complete both HUST 4001 and HUST 4500 before HUST 4800.

² Courses that fulfill these requirements are listed under the humanitarian studies major (p. 264).

Availability

The minor in humanitarian studies is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in humanitarian studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Individualized Major

Students are permitted to submit a plan of studies in a concentration that involves courses in two or more departments. The plan of study should be developed upon consultation with the student's academic advisor (FCRH/FCLC) and/or an associate dean, who will review the proposal with members from those departments to consider whether it is both academically sound and practically workable. Upon approval by the departments and an associate dean, the student may undertake the intended major.

Availability

To permit students to design programs of study that fit their own needs and interests, Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies provide the option of a personalized interdisciplinary major.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Information, Technology, and Operations

Overview

The information, technology, and operations (ITO) curriculum equips students with a solid understanding of core technology and operations concepts, rigorous analytical thinking and technical skills, and a creative mindset for problem-solving and decision making. Infused with the partnership with other Gabelli School academic units and incorporating new elements such as sustainability, risk management, and innovation, ITO courses are particularly relevant in today's increasingly interdependent and competitive global economy.

The ITO faculty also has expertise in integrating all aspects of the product and service lifecycle. Their research examines the execution process that ranges from planning, design, and procurement, to production, distribution, and returns.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

View the information, technology, and operations area web page.

Programs

Majors

- Accounting Information Systems Major (p. 267)
- Information Systems Major (p. 268)

Primary and/or Secondary Concentrations

- Concentration in Information Systems (p. 268)
- Concentration in Process and Quality Analytics (p. 269)

Related Concentration

- Concentration in Fintech (p. 251)

Accounting Information Systems Major

Course	Title	Credits
ACBU 3434	Intermediate Financial Accounting I	3
ACBU 3435	Intermediate Financial Accounting II	3
ACBU 3441	Advanced Concepts in Financial Accounting	3
ACBU 3421	ST: Accounting Information Systems	3
INSY 4506	Business Analytics	3
INSY 3432	Database Systems	3
INSY 3441	Systems Analysis	3
One elective course from list below		3
One upper-level Information Systems course ¹		3
Two CPA-required courses OR two additional upper-level business electives ²		6
Total Credits		33

¹ Any course with the INSY subject code (p. 1375) numbered 3421 or higher counts toward this requirement. Some Computer Science electives may apply with department approval.

² ACBU 3442 Individual and Business Taxation and ACBU 3443 Assurance and Auditing should both be taken if a student pursues the two CPA-required courses.

Electives

Courses in this group have the ACIS attribute.

Course	Title	Credits
INSY 3436	ST: Programming with Python	3
INSY 4435	ST: AIS Consulting Project	3
INSY 4508	Business Modeling With Spreadsheets	3
INSY 4800	Global Information Technology Strategy and Management	3

Students may take INSY 4435 ST: AIS Consulting Project or ACBU 4435 ST: AIS Consulting Project, but not both.

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

CIP Code

11.0103 - Information Technology.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-

graduation visa extensions. Learn more about CIP codes and other information resources.

Information Systems Major

Requirements

Major and Track Requirements

The information systems major includes six required courses and four information systems electives. All required courses are drawn from the information, technology, and operations area.

Course	Title	Credits
INSY 3432	Database Systems	3
INSY 3436	ST: Programming with Python	3
INSY 3441	Systems Analysis	3
INSY 3442	Web Apps Design and Development	3
INSY 4507	Project Management	3
INSY 4800	Global Information Technology Strategy and Management (capstone course)	3
<i>Four electives:</i> ¹		12 to 14
Business Analytics Track		
Digital Business Innovation Track		
Enterprise Architecture Track		

¹ Please note:

- Students are encouraged to complete their elective courses in one or more of the career-oriented tracks listed above, but any course with the INSY subject code (p. 1375) numbered 3400-4999 (as well as CISC 3400 and CISC 4515) may count as an elective.
- For Information Systems majors pursuing a secondary concentration in Fintech (p. 251), the three courses that comprise the secondary concentration may double-count as electives towards the Information Systems major. Moreover, for such students, FNBU 4454 ST: Financial Modeling may count as an elective towards the major.

While most students choose all four electives from the information systems, technology, and operations area, up to two electives can be taken in other business areas, with the approval of the faculty adviser.

Information Systems Major Electives/Tracks

Students must take four advanced information systems electives. They are encouraged to use at least three advanced elective courses to specialize in their chosen track. Students can also create an optimal mix of electives across tracks to fit their prior expertise and career goals.

While most students choose all four electives from the information, technology, and operations area, up to two electives can be taken in the Department of Computer and Information Science, from the below options:

Course	Title	Credits
CISC 3400	Java Programming	4
CISC 4515	Advanced Database Systems	4

Business Analytics Track Electives

Course	Title	Credits
INSY 3437	ST: Sports Analytics	3
INSY 4431	Web Analytics	3
INSY 4433	Advanced Python for Business	3
INSY 4434	ST: Data Mining for Business	3
INSY 4506	Business Analytics	3
INSY 4508	Business Modeling With Spreadsheets	3

Digital Business Innovation Track Electives

Course	Title	Credits
INSY 3421	Accounting Information Systems	3
INSY 3437	ST: Sports Analytics	3
INSY 3438	ST: Cybersecurity in Bus	3
INSY 3450	ST: Fintech - An Introduction	3
INSY 4411	ST: Healthcare Info Tech	3
INSY 4412	ST: IT and Sustainability	3
INSY 4431	Web Analytics	3
INSY 4432	Mobile Commerce & Apps	3
INSY 4435	ST: AIS Consulting Project	3
INSY 4505	E-Commerce	3
OPBU 3453	ST: Business Dynamics	3

Enterprise Architecture Track Electives

Course	Title	Credits
INSY 3421	Accounting Information Systems	3
INSY 3433	Programming with Java	3
INSY 3438	ST: Cybersecurity in Bus	3
INSY 4432	Mobile Commerce & Apps	3
INSY 4433	Advanced Python for Business	3
INSY 4435	ST: AIS Consulting Project	3
OPBU 3453	ST: Business Dynamics	3

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

CIP Code

11.0401 - Information Science/Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Concentration in Information Systems

Gabelli Students may pursue Information systems as either a primary or a secondary concentration.

Primary Concentration

Course	Title	Credits
INSY 3432	Database Systems	3
INSY 3441	Systems Analysis	3

Two upper-level information systems courses ¹

¹ Any course from subject code INSY (p. 1375) numbered 3421 or higher will satisfy this requirement. If students want to specialize their concentrations, they may pick electives from the three tracks for the information systems major (p. 268).

Secondary Concentration

The secondary concentration in Information Systems requires any three upper-level courses in subject code INSY (p. 1375) numbered 3421 or higher.

Concentration in Process and Quality Analytics

Overview

The secondary concentration in process and quality analytics prepares students to manage process-quality projects that improve cost, quality, and overall performance. Students will learn to solve problems using a systems-thinking approach, use data and analytics to experiment and create best practices, and identify ways to help organizations save money and increase efficiency.

For more information

View the information, technology, and operations area web page.

Requirements

Process and Quality Analytics is available to Gabelli School students as a secondary concentration only.

To complete the secondary concentration in process and quality analytics, students must take the following three courses:

Course	Title	Credits
OPBU/ACBU 3449	ST: Process Mgt & Six Sigma	3
Select one from the following:		3
OPBU 3453	ST: Business Dynamics	
OPBU/INSY 4507	Project Management	
Select one elective from the list below.		3

Process and Quality Analytics Electives

The courses below may apply toward the elective requirement of this concentration. Courses which are double listed with two subject codes (e.g., INSY 3421 and ACBU 3421) may not be taken twice.

Courses in this group have the PRQU attribute.

Course	Title	Credits
ACBU 3421	ST: Accounting Information Systems	3
ACBU 3443	Assurance and Auditing	3
ACBU 4435	ST: AIS Consulting Project	3
ACBU 4444	Sustainability and Environmental Reporting and Disclosure	3
FNBU 4464	ST: Compliance and Risk Management	3
INSY 3421	Accounting Information Systems	3
INSY 4508	Business Modeling With Spreadsheets	3
INSY 4800	Global Information Technology Strategy and Management	3
LPBU 3233	ST:Start-Up Venture Experience	3
LPBU 3430	ST: Sustainable Business	3
LPBU 3446	ST:Social Entrepreneurship	3
MKBU 3441	Marketing Research	3
MKBU 3445	ST: Marketing Analytics	3
MKBU 4451	ST: Data Driven Marketing Decisions	3
OPBU 3442	ST: Health Care Operations Mgt	3
OPBU 3454	ST: Sustainable Supply Chain	3

Integrative Neuroscience

Neuroscience is one of the most exciting, interesting, and integrative fields in science today. Technological advances of the last 20 years have led to a dramatic rise in neuroscience research across multiple domains, including biology, chemistry and biochemistry, psychology, computer science, and physics, as well as seemingly unrelated fields, such as economics.

A primary aim of the integrative neuroscience major is to engage Fordham students in this exciting and rapidly advancing field so that they become competitive candidates for postgraduate education in the neuroscience field. A unique aspect of the integrative neuroscience program is the presence of three tracks (cell and molecular, cognitive, and systems and computational), each focusing on a specific aspect of neuroscience. The design of the program also ensures that students have exposure to each of the disciplines so that their work can be informed by multiple perspectives.

Students majoring in integrative neuroscience may not double major in biology, biochemistry, natural science, computer science, environmental science, or psychology. Students majoring in integrative neuroscience may choose a minor provided that they fulfill the requirements stipulated by the department or program offering the minor and have the approval of the dean's office.

Students may not choose a minor in a department or program that is aligned with their area of specialization in the integrative neuroscience program. For example, a student in the cell and molecular specialization may not choose a biology or biochemistry minor, or a student in the cognitive specialization may not choose a psychology minor. However, a student in the cell and molecular specialization may choose a psychology minor. A limited number of course credits of the major may be used to fulfill requirements for the minor.

Applications will only be accepted in the fall through December 31 of any given year. Four-year, full-time Fordham undergraduate students may apply for admission to the integrative neuroscience major only in their third semester at Fordham (by the end of the fall of their sophomore year). Transfer students will be considered on a case-by-case basis by

program directors. To be admitted to the major, students are required to (1) have taken at least three foundation courses (or external equivalent), (2) have a science GPA of 3.2 or higher, and (3) not have more than 4 credits of less than a B- in their science courses, including labs (biology, chemistry, natural sciences, math, physics, computer science, and psychology).

For more information

Visit the Integrative Neuroscience program web page.

Programs

- Integrative Neuroscience Major (p. 270)

Integrative Neuroscience Major Requirements

The course requirements for the integrative neuroscience major consist of four components: nine foundation courses required of all integrative neuroscience majors; three required, concentration-connected neuroscience courses that emphasize the different concentrations within the major; three concentration courses that allow the student to enhance their study within their chosen concentration; and a research experience lasting a minimum of two semesters, beginning as early as is reasonable for the student and project, but no later than the summer/fall after the junior year.

All majors must also enroll in a capstone research seminar course for students in all concentrations to share and discuss the results of their research with other integrative neuroscience majors.

A minimum grade of C- is required for courses to count towards the major.

Course	Title	Credits
Required Courses ¹		
<i>Select one of the following biology options:</i>		<i>8 to 10</i>
<i>Option 1:</i>		
BISC 1403 & BISC 1413	Introductory Biology I and Introductory Biology Lab I	
BISC 1404 & BISC 1414	Introductory Biology II and Introductory Biology Lab II	
<i>Option 2:</i>		
NSCI 1403 & NSCI 1413	General Biology Lecture I and General Biology Lab I	
NSCI 1404 & NSCI 1414	General Biology Lecture II and General Biology Lab II	
<i>Option 3:</i>		
NSCI 1423 & NSCI 1433	Concepts in Biology Lecture I and Concepts in Biology Lab I	
NSCI 1424 & NSCI 1434	Concepts in Biology Lecture II and Concepts in Biology Lab II	
<i>Option 4:</i>		
HPLC 1603 & HPLC 1604	Honors: Natural Science I and Honors: Natural Science II	
<i>Select one of the following chemistry options:</i>		<i>12</i>
<i>Option 1:</i>		

CHEM 1321 & CHEM 1331	General Chemistry I and General Chemistry Lab I	
CHEM 1322 & CHEM 1332	General Chemistry II and General Chemistry Lab II	
<i>Option 2:</i>		
NSCI 1321 & NSCI 1331	General Chemistry Lecture I and General Chemistry Lab I	
NSCI 1322 & NSCI 1332	General Chemistry Lecture II and General Chemistry Lab II	
<i>Select one of the following Mathematics courses:</i> ¹		<i>3 to 4</i>
MATH 1203	Applied Calculus I	
MATH 1206	Calculus I	
MATH 1700	Mathematical Modelling	
<i>Select one of the following CISC programming courses:</i>		<i>4</i>
CISC 1600 & CISC 1610	Computer Science I and Computer Science I Lab ²	
CISC 1800 & CISC 1810	Introduction to Computer Programming and Introduction to Computer Programming Lab	
CISC 2500	Information and Data Management	
<i>Select one of the following CISC courses:</i>		<i>4</i>
CISC 4020	Bioinformatics	
CISC 4631	Data Mining	
PSYC 1200	Foundations of Psychology ³	4
BISC 4532	Neuroscience	3
or NSCI 4630	Neuroscience	
PSYC 3110	Cognitive Neuroscience	4
CISC 3250	Systems Neuroscience	4
<i>Three electives in one of these concentrations:</i>		<i>9 to 12</i>
Cell and Molecular Neuroscience		
Cognitive Neuroscience		
Systems/Computational Neuroscience		
NEUR 4999	Neuroscience Research	3
NEUR 4900	Neuroscience Capstone Seminar	1

¹ AP Calculus AB (MATH 12AB) or AP Calculus BC (MATH 12BC) credit may fulfill this requirement.

² Serves as Foundation Course for students pursuing the Systems/Computational Concentration only. Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.

³ PSYC 1200 Foundations of Psychology credit from AP Psychology (score of 4 or 5) may fulfill this requirement.

Learning Goals

Upon graduation from the integrative neuroscience major, students will have achieved the following goals:

1. Students will develop an interdisciplinary comprehensive understanding of fundamental principles in neuroscience;
2. Students will learn to apply knowledge in cognitive neuroscience, cell and molecular neuroscience, and computational neuroscience to gain deep insight into neural mechanisms of brain function and behavior;

3. Students will learn how to become scientifically literate and critically analyze and interpret published literature grounded in cognitive, cell and molecular and computational neuroscience research;
4. Through interdisciplinary coursework, students will develop critical thinking skills necessary for success in an array of fields in and outside of science, including healthcare, research, clinical psychology, data science, law, and business;
5. Through coursework and research experience, students will develop transferrable skills that can be applied to academic and non-academic environments. These include problem solving, data analysis, interpersonal and leadership skills, organizational skills, time management, and proficiency in written and oral communication.

Availability

The integrative neuroscience major is available to students at Fordham College at Rose Hill and Fordham College at Lincoln Center, subject to fulfillment of major admissions requirements. Students in Fordham's School of Professional and Continuing Studies may major in integrative neuroscience only if they fulfill the major's admissions requirements and receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

International Political Economy

International political economy concerns understanding of the complex interactions of economics, politics, and cultures driving the global economy.

Fordham offers undergraduate and graduate programs that offer a unique and innovative interdisciplinary approach to analyzing contemporary global economic relations as well as international development issues.

Program Activities

Study Abroad

Majors are encouraged to study abroad during junior year in order to complement their learning experience at Fordham.

Internships

Students may receive credit for internships having an international focus.

Awards

Seniors may apply for membership into Sigma Iota Rho, the National Honor Society for International Studies. Applicants are required to have a minimum GPA of 3.2 and to have applied for prestigious fellowships, such as the Fulbright, or selected internships with international agencies, such as the State Department.

For more information

Visit the international political economy program web page.

Programs

- International Political Economy Major (p. 272)

International Political Economy Major

The major in international political economy (IPE) explores the nature and complexities of our increasingly interdependent and politicized global economy from an interdisciplinary perspective. Students who complete the major will receive training in political, economic, and quantitative analysis as well as an introduction to other cultures and the opportunity to use their electives to further specialize their studies according to their interests. After completing the major, IPE students will be able to:

1. Conduct independent analysis utilizing tools from economics, political science, and quantitative methods;
2. Analyze extensive information, formulate well-supported conclusions, and communicate findings clearly and persuasively; and
3. Demonstrate a comprehensive understanding of the global economy, integrating economic, political, and practical perspectives.

Students who wish to continue their education in law, economics, political science, and international affairs will find the major beneficial. Other students will be able to use the major to prepare for employment with banks, businesses, and government agencies concerned with the global economy. Available specializations include foreign language study and international business.

The major is open only to students who have a cumulative GPA of 3.0 or better when they declare their major. Students wishing to major in IPE are also required to submit a 500-word essay explaining how the IPE major will prepare them for their future to the major advisor, Giacomo Santangelo. Please contact Professor Santangelo for application deadlines.

The major in international political economy (IPE) is administered by the Graduate Program in International Political Economy and Development (IPED). IPED is an affiliate member of the Association of Professional Schools of International Affairs (APSIA).

CIP Code

45.0901 - International Relations and Affairs.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The major consists of eight required core courses and four electives distributed as follows:

Course	Title	Credits
POSC 2501	Introduction to International Politics	4
POSC 3915	International Political Economy	4
ECON 1100	Principles of Macroeconomics	3
ECON 1200	Principles of Microeconomics	3
ECON 3244	International Economic Policy	4
ANTH 3351	Comparative Cultures	4
ECON 2140	Statistics I	4
ECON 2142	Statistics II	4

Select one of the following tracks:

12 to 16

Foreign Language Elective Track

Global Business Elective Track

General Elective Track

POSC 2501 Introduction to International Politics, POSC 3915 International Political Economy, ANTH 3351 Comparative Cultures, and ECON 3244 International Economic Policy must be taken at Fordham.

Elective Tracks

Four courses chosen from one of three tracks:

Foreign Language Elective Track

Four courses in the same subject with either the ARAB (p. 1002), FREN (p. 1281), GERM (p. 1293), ITAL (p. 1413), JPAN (p. 1419), MAND (p. 1456), RUSS (p. 1614), or SPAN (p. 1639) subject codes, numbered 1500 to 4999, count toward this requirement.

Global Business Elective Track

Course	Title	Credits
ACBU 2222	Principles of Financial Accounting	3
ACBU 2223	Principles of Managerial Accounting	3
Select two of the following:		8
ECON 3235	Economy of Latin America	
ECON 3240	World Poverty	
ECON 3346	International Trade	
ECON 3347	International Finance	

General Elective Track

Any course with the IPE attribute code may fulfill this requirement.

Note that ACBU 2222 Principles of Financial Accounting and ACBU 2223 Principles of Managerial Accounting do not have the IPE attribute and may not count toward the General Elective track. In addition, all courses with the ARAB (p. 1002), FREN (p. 1281), GERM (p. 1293), ITAL (p. 1413), JPAN (p. 1419), MAND (p. 1456), RUSS (p. 1614), and SPAN (p. 1639) subject codes numbered 1500 to 4999 also count for the major.

Availability

The major in international political economy is available at Fordham College at Rose Hill and Fordham College Lincoln Center. Fordham College at Lincoln Center students should note that certain courses may only be available at the Rose Hill campus. Students in Fordham's School of Professional and Continuing Studies may major in international political economy only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

International Studies

International studies is carefully designed to prepare students to live, work, prosper—and become good global citizens—in today's rapidly

changing world. It features an interdisciplinary and intercultural curriculum with both classroom learning and real-world experience in the form of internships and study abroad.

International studies offers both rigor and choice. Students complete a specific core of foundational international courses in politics, law, economics, history, and culture. They also choose one of three tracks of specialized study.

The International Expertise Track trains students to analyze international affairs from a global perspective. The Regional Expertise Track develops competency in a region of the world of the student's own choosing. Students may also apply to enter a Specialist Expertise Track, designed to address important issues, or specific cross-national, cross-cultural, or cross-regional comparisons. This track is selective and requires approval by the director. Each track has a specific language component. Each track has the same goal: to enable students to master the political, economic, environmental, historic, cultural, and sociological dynamics that drive modern life.

International studies prepares students for graduate study and for careers. It is well-crafted for students to move on into international business, law, diplomacy, academia, education, government, international organizations, nongovernmental organizations, public interest advocacy groups, journalism, mass media, and public service.

It also prepares students for a life well-lived. The program follows the Jesuit tradition of cosmopolitan education, respect for other cultures, the dignity of each unique person, and the development of the student as a whole person. Its guiding spirit is Fordham's own mission: to use education and research to "assist in the alleviation of poverty, the promotion of justice, the protection of human rights, and respect for the environment" and to "foster in all its students life-long habits of careful observation, critical thinking, creativity, moral reflection, and articulate expression." The international studies program encourages students to use these gifts in the service of the world.

Program Activities

International studies encourages and features experience-based learning. Therefore it strongly supports and helps students participate in both study abroad and internships. The program also organizes lectures, conferences, study tours abroad, and other educational events and experiential learning.

For more information

Visit the International Studies program web page.

Contribution to the Core

International studies offers INST 2500 Introduction to International Studies and INST 3859 Post-1945: A Global History which fulfill the Global Studies core requirement, and INST 4620 The World of Democracy, which fulfills the EP4/Senior Values requirement.

Programs

- International Studies Major (p. 274)

International Studies Major Requirements

The major in international studies consists of 13 courses, including a senior thesis (or approved substitute) and a two-course language requirement in addition to the Fordham core language requirement:

Course	Title	Credits
INST 2500	Introduction to International Studies	4
One course in International Politics and Law		
One course in International Economics and Political Economy		
One course in Contemporary World History and Culture		
INST 4000	International Studies Senior Thesis Seminar ¹	4
Select six courses from one of the following tracks: ²		
International Track		
Regional Track		
Specialist Expertise Track		
Select two courses in addition to the Fordham core language requirement ³		

¹ Students on the international or regional tracks may choose to substitute a 4000-level class from another department in lieu of the thesis class (specialist expertise track students must complete INST 4000). All substitute classes must be approved by the program director. To qualify, the class must have an INST attribute and require a substantial research paper. Once approved, courses will only be applied to the thesis requirement after students complete and submit their final research papers to the program director. The research paper must be related to the student's selected track within the major.

² For students in all tracks except the specialist expertise track, this requirement comprises five courses approved for the chosen track and a sixth course from either: a) the chosen track; b) any other track; c) from—and in addition to—the language used to complete the International Studies language requirement.

³ The two courses may be advanced courses in the same language used to fulfill the Fordham core or introductory or advanced courses in another language. For the international track they must be two courses in one of the following languages: Arabic, French, Mandarin, Russian, or Spanish. For the regional track they must be in a major language spoken in the chosen region. For the specialist expertise track, the selected foreign language must be included in the student's proposal and approved by the program director.

Grades

There is no minimum grade policy for coursework applied to the major beyond the University requirement of a passing grade (D or higher).

Double-Counting

A total of two courses can double-count with other majors or minors. Foreign language classes taken to fulfill the International Studies language requirement do not count towards this limit.

International Politics and Law

Courses in this group have the ISIP attribute.

Course	Title	Credits
POSC 2501	Introduction to International Politics	4
POSC 2610	Introduction to Comparative Politics	4
POSC 3532	The Development of Human Rights Law	4

International Economics and Political Economy

Courses in this group have the ISIE attribute.

Course	Title	Credits
ECON 3210	Development Economics	4

Specialist Expertise Track

Select six courses designed as a cohesive program of study with the faculty adviser and approved by the adviser and the director.

Students declaring a specialist expertise track must submit a written proposal and receive permission from the program director. All specialist expertise track students must complete a senior thesis appropriate for their selected focus.

Irish Studies

The Institute of Irish Studies provides an interdisciplinary and intercampus minor that seeks to promote a serious and thoughtful appreciation of Irish history, culture, and society. Courses from such varied disciplines as history, literature, language, theatre, religious studies, art, music, and the social sciences will contribute to a mature understanding of Ireland and the Irish diaspora, particularly in America. The Institute also sponsors public programs, including conferences, lectures, and performances and noncredit courses for the benefit of all Fordham students, alumni, and the general public who might have serious interest in Irish studies.

Program Activities

The Institute of Irish Studies facilitates internships in such places as the Irish Consulate, Irish theatre groups, and Irish publications in New York City. We also facilitate study-abroad opportunities in Ireland. It is possible to do a major in Irish studies by consulting with the class dean and the program director of Irish studies and designing an individualized major.

For more information

Visit the Irish Studies institute web page.

Programs

- Irish Studies Minor (p. 282)

Irish Studies Minor

Requirements

The minor in Irish studies requires six courses:

Course	Title	Credits
Select six elective courses ¹		18 to 24

¹ Any course with the IRST subject code or the IRST attribute code may fulfill this requirement.

Availability

The minor in Irish studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in Irish studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Islamic Studies

Overview

Islam is the world's second largest religion after Christianity. Western civilization has been intertwined with the Islamic since Islam's inception in the 7th century. Islam is the fastest growing religion in the world and one of the fastest growing in the United States. Despite these striking trends, Islam remains one of the least understood religious faiths and civilizations for American students.

Islamic studies is a multi- and interdisciplinary academic field that focuses on the study of Islam as a religious tradition with a diverse

historical, philosophical and cultural heritage. This area of study seeks to introduce students to the multifaceted aspects of Islam through a wide variety of expressions, such as literature, religion, philosophy, social norms and practices, and politics, as well as various research methods. These research methods include literary criticism, hermeneutics, phenomenology, historical analysis, political theory, theology, sociology, and anthropology.

Programs

- Islamic Studies Minor (p. 283)

Islamic Studies Minor

Overview

The Islamic studies minor furthers Fordham's mission by challenging students to view the world through non-Western European constructs of nature, epistemology, aesthetics, ethics, cosmic realities, and corporeal experience. The minor helps students develop a crucial intervention with which to disrupt and go beyond the longstanding parochialism of academic disciplines in the U.S. that focus primarily on the Western canon and its related epistemologies. Simply put, a minor in Islamic studies promotes other ways of knowing and being in the world.

Students gain much from exposure to a wide array of ideas drawn from various Islamic discourses, which attunes them to greater epistemic pluralism and broader horizons for understanding the complexities and challenges of our world. Islamic studies is especially germane to this wider task because it helps bring to light a wealth of knowledge and experience from Islamic societies left too long in the periphery of western scholarship.

Learning Goals

With the completion of the minor in Islamic Studies:

- Students will develop a solid understanding of the diverse historical, philosophical and cultural heritages of Islam, including its origins, development, and influence on world civilizations and contemporary events.
- Students will become familiar with the core beliefs, schools of thought, and practices of Islam, including its theologies, ethics, rituals, laws, artistic expressions, and social norms, and be able to analyze and interpret them in light of contemporary issues and debates.
- Students will be able to consider Islam through a wide array of theoretical and methodological approaches, which may include literary criticism, hermeneutics, linguistics, phenomenology, history, political science, philosophy, comparative studies, theology, postcolonial theory, sociology, and anthropology.
- Students will broaden their horizons to understand the complexities and challenges of our world through explorations of nonwestern expressions, experiences, and epistemologies.
- Students will learn to counter intolerance by developing an appreciation for diversity, pluralism, and dialogue, and develop a sense of empathy for other ways of being, thinking, and engaging in the world.

Requirements

The Islamic studies minor requires six (6) courses, as follows:

Course	Title	Credits
Required Courses		
One course on Islamic sacred texts or Islam's foundational history ¹		3 to 4
One course on Islamic theology/history/philosophy ¹		3 to 4
One course on Islamic arts/culture/politics ¹		3 to 4
Electives		
Choose three courses drawn from any of the three categories above (one Arabic course may be included) ²		9 to 12

¹ See below for lists of courses fulfilling each requirement.

² Any course with the ISFH (sacred texts/foundational history), ISTP (theology/philosophy/history), or ISAC (arts/culture/politics) attributes may fulfill this requirement. Additionally, a maximum of one course with the ISAR (Arabic courses) attribute may fulfill this requirement.

It is strongly recommended, but not required, that two of the courses taken towards the minor be in History or Theology.

Sacred Texts/Foundational History courses

Courses in this group have the ISFH attribute.

Course	Title	Credits

Availability

The minor in Islamic studies is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in Islamic studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Jewish Studies

With courses in ancient, medieval, early modern, and modern Jewish history, religion, culture, law, literature, and contemporary society, the

Updated: 09-06-2024

Jewish studies minor provides students with a nuanced understanding of the living and historical traditions of Judaism, the Jewish people, and the modern State of Israel. Jewish studies at Fordham seeks to introduce students to Jewish history and culture within the larger framework of Jews' interaction with other people, with a focus on Jewish-Christian relations, thereby furthering Fordham's mission to foster in its students an understanding of different cultures and ways of life so they may be prepared "for an increasingly multicultural and multinational society."

Courses in Jewish studies are integrated across Fordham's curriculum, and across its campuses and departments, among them History; Theology; Sociology and Anthropology; Art History; English; Women, Gender, and Sexuality Studies; and Fordham Law. Many of the courses are part of Fordham's Core Curriculum. With a minor in Jewish studies students will be able to follow a coherent course of study outside their majors and acquire cross-cultural literacy, while fulfilling their Core requirements.

By enrolling in a Jewish studies minor students will acquire:

- knowledge and understanding of Jewish culture and history across a broad chronological and geographic scope;
- the ability to question dominant social assumptions by gaining cross-cultural literacy;
- an awareness of interaction and mutual influence among Jews and their Christian, Muslim, and other neighbors over the course of history;
- an awareness of the complexity of social identities, as well as of social divisions and prejudice;
- the ability to understand how minority cultures live, adapt, and retain their identities among majority cultures;
- the skills necessary to find and interpret complex sources and apply them to a larger project;
- the ability to apply methods and theories from several disciplines to their studies.

Visit the Jewish studies program web page.

Programs

- Jewish Studies Minor (p. 284)

Jewish Studies Minor

Requirements

Six courses in Jewish studies are required for the minor:

Course	Title	Credits
One history course		3
One theology course		3
One premodern period course		3 to 4
Three general Jewish studies electives ¹		12

¹ Any course with the JWST attribute may count toward this requirement.

At least one of the six courses taken for the minor should be from outside the history and theology departments. Students should select courses

from at least three different departments. In addition, at least one course must be an upper-level seminar, such as an Interdisciplinary Capstone Course (p. 48) or a Values Seminar (p. 50). No more than one course in Hebrew language (p. 1304) may count toward this requirement.

History courses

Courses in this group have the JSHI attribute.

Course	Title	Credits
GERM 3030	Kafka und Amerika	4
HIST 1850	Understanding Historical Change: Jews in the Ancient and Medieval World	3
HIST 1851	Understanding Historical Change: Jews in the Modern World	3

Availability

The minor in Jewish studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in Jewish studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Languages and Cultures Overview

About the Department

The Department of Languages and Cultures offers a variety of programs in languages, literatures, linguistics, and cultures. Its broad aim is to explore the linguistic, cultural, and textual forms by which human beings have constructed and interpreted reality and fictional forms.

The department prepares students to develop expertise in the following areas: literatures of the world, literary studies, cultural studies, visual culture, intercultural theory and communication/translation, *eloquentia perfecta* (theater, performance, writing, and public speaking), linguistics and bilingualism/multilingualism, and humanitarianism (anthropology/political science/international studies). Our students demonstrate a commitment to collaborative leadership in community-engaged learning, contact zones, and language cultures (business, health, social justice, translation).

The department offers language courses in Arabic, French, German, Hebrew (LC), Italian, Japanese (LC), Mandarin Chinese, Russian (LC), and Spanish; majors in the following languages and literatures and area studies: Chinese studies, French and Francophone studies, German, Italian, Spanish Language and Literature, and Spanish studies, and minors in Arabic, French and Francophone studies, German, Italian, Linguistics, Mandarin Chinese, Russian, and Spanish.

Courses at the 2000 level normally concentrate on advanced language, communication, linguistics, and cultural studies. Courses at the 3000 level normally concentrate on in-depth analysis of literature and artistic productions, intercultural theory, cultural and humanitarian studies, and linguistics. Courses at the 4000 level include Interdisciplinary Capstone Core courses, Senior Values Seminars, and courses that provide students with the opportunity to pursue faculty-mentored research either in the form of an individualized thesis, in our neurolinguistic or sociolinguistic laboratories, or in the social innovation project on water and migration in Sub-Saharan Africa.

Languages and Cultures also offers a variety of hands-on Community Engaged Learning Courses that enable students to use their linguistic and cultural skills as they work with local New York City communities on a variety of social justice minded issues in addition to LACU courses taught in English on a myriad of subject matters. The majority of our majors are double majors in a wide variety of fields of specialization including among others: communication and media studies, comparative literature, English, humanitarian studies, integrative neuroscience, international political development, international studies, philosophy, psychology, political science, and visual arts.

Program Activities

The department offers a broad range of activities for undergraduates and the broader Fordham community including weekly conversation cafés in the various languages, cultural nights and concerts, literary journals such as *Le Bélier*, sponsored film screenings, master classes with some of the most preeminent creators in the industry, Fordham Reads Dante, the Bronx Italian American History Initiative (BIAHI), and numerous other interventions. Invited speakers offer formal lectures, informal talks, seminars, and workshops either designed for or open to undergraduates. The French section's *Concours d'éloquence* in partnership with the French Office of Cultural Services offers Fordham students the opportunity to

compete both internally and against students from Columbia, CUNY, and NYU.

Since summer 2020, the department has embarked on the LACU Vocab Diversity Initiative, a collaborative initiative between faculty and students which seeks to understand how language, and the way we and our textbooks present and represent language/vocabulary in the classroom, create, reinforce, and normalize certain forms of bias, stereotype, and prejudice. As a result of the ongoing roundtables and workshops devoted to the subject and various other related initiatives, LACU remains committed to the ongoing revision of our curriculum and our pedagogy to be more actively anti-racist and inclusive.

The students studying abroad at Fordham's center in Granada, Spain, publish the journal *Por Granada*, which collects the term papers completed in the course *Spain in Context*. Students taking the LACU course "Berlin Tales," which includes a study tour to Berlin over spring break, publish their research papers in the journal *Kiez Kieken*.

Awards and Scholarships

Each year the department bestows a number of awards and scholarships on Fordham students for excellence in the study of foreign languages, literatures, and cultures, and for outstanding commitment to promoting foreign language learning and foreign culture awareness at Fordham and in the larger community. Awards and scholarships include:

- Francis R. Favorini Italian Achievement Award (FCRH)
- French Achievement Award (FCRH)
- German Achievement Award (FCRH/FCLC)
- Anthony and Cecilia Guardiani Award (FCRH)
- Heydt French Award (FCRH)
- Heydt Spanish Award (FCRH)
- Spanish Achievement Award (FCRH/FCLC)
- Istituto Italiano di Cultura Award (FCRH)
- Arabic Achievement Award (FCRH/FCLC)
- Mandarin Achievement Award (FCRH/FCLC)
- Russian Achievement Award (FCRH/FCLC)
- Fernand and Santina Vial Scholarship (FCRH, FCLC, GSB)

In addition, honors are awarded to the student with the highest GPA in each of the minors and majors our department offers at FCLC. Students who excel in their German classes will receive a Certificate of Achievement from the German government.

Internships

Students who wish to pursue an internship and receive college credit for it should contact their major adviser and Career Services to identify internship opportunities relevant to their field of study and professional interests. Credits for internship tutorials will be granted depending upon the type of internship, the extent to which the relevant language is used in the work environment, and the significance of the experience for a student's course of study. The number of credits is contingent on the fulfillment of various requirements, such as regular meetings with the adviser, weekly written reports, and completion of a substantial final project, among others.

Below is a sample of organizations at which some of our students have done internships in past years:

- Alliance Française of New York (FIAF)
- Bayern München (the soccer club's NYC office)
- Cultural Services of the French Embassy (CALEC)
- German-American Chamber of Commerce
- Goethe Institute
- Hermès
- Kino Lorber
- *Le Figaro* (sports division)
- Met Cloisters
- Morgan Library and Museum
- National Organization of Italian American Women (NOIAW)
- New Sanctuary Coalition
- New York African Film Festival
- One Week/Un Acte
- Pergamena parchment makers
- Rare Books Collection at Columbia University Library
- Sorteer
- Theatrical production of *Fragments of a Star*
- Theatrical production of *Les Bonnes* at La Mama Theater
- *Vogue*

Student Clubs and Honor Societies

Languages and Cultures students are encouraged to share and develop their literary and cultural interests by becoming involved in student clubs and Honor Societies at Rose Hill and Lincoln Center. Such clubs as the following sponsor academic and social events including lectures, film series, outings and dinners to foster an understanding and appreciation of foreign languages and cultures beyond the traditional classroom setting:

- Academia Hispana (RH)
- El Grito de Lares (RH)
- Le Cercle Français (RH)
- CIAO Amici (LC)
- Deutscher Studenten Klub (RH)
- Insieme Italian Cultural Society (RH)
- La Société Française (LC)
- Honor Societies:
 - Alpha Mu Gamma (foreign languages, RH)
 - Gamma Kappa Alpha (Italian, RH and LC)
 - Pi Delta Phi (French, RH)
 - Sigma Delta Pi (Spanish, RH and LC)

Study Abroad

The faculty of the Department of Languages and Cultures believe immersive study is one of the best ways to gain linguistic and cultural fluency and encourage our students to study abroad for a semester or an entire academic year. As such, the faculty works carefully with each individual student to discover and prepare for a study abroad experience whether for a semester, year, summer, or as part of a Fordham study tour. We send students each year to Africa, China, Europe, Latin America, and the Middle East, and have relationships with some of the best and most academically rigorous programs in the world. In addition, Fordham maintains fall, spring, and summer study abroad programs in Granada (Spain) and at our London campus (United Kingdom). It also has exchange agreements with universities in Argentina, Austria, Brazil,

Colombia, France, Italy, Germany, Japan, Mexico, Perú, Spain, and South Korea.

Students who study abroad can rather easily become a double major in our department and usually at least two of the courses taken abroad can apply to both of the student's majors or to a major and minor. Students who opt to apply study abroad credits toward their major or minor must seek approval from their major or minor adviser in their language area prior to their going abroad. See program requirements above for accepted maximum number of courses. Additional study abroad credits accepted by Fordham University may be applied as elective credits toward graduation, but not toward the major or the minor. For further information about study abroad, interested students should contact the department and the Office of International and Study Abroad Programs (www.fordham.edu/isap).

For more information

Visit the Languages and Cultures department web page.

Contribution to the Core

A 2000-level course or above in a modern language other than English fulfills the language requirement. In order to achieve this level of mastery of a foreign language, a mastery that will allow students to comprehend a text of average sophistication in its oral and written form and to comment on it orally and in writing in a coherent and grammatically correct manner, the 2000-level course provides a critical analysis of selected cultural and literary texts, with composition, conversation, and review of pertinent grammatical structures.

Language skills preparation: One to three courses. Students who need preparation before taking the required 2000-level course have:

- Four entry points in French and Spanish, depending upon their prior knowledge of the language:
 - 1001-Introduction I
 - 1002-Introduction II
 - 1501-Intermediate I
 - 1502-Intermediate II
- Three entry points in Arabic, German, modern Hebrew, Italian, Japanese, Mandarin Chinese, and Russian:
 - 1001-Introduction I
 - 1501-Intermediate I
 - 1502-Intermediate II

All those beginning a language at the most basic level take an intensive one-semester course worth five credits in order to accelerate their progress. Other students begin with the course in which they are placed by the department and progress to the 2000-level course. Spanish-heritage speakers, who place out of levels 1001 through 1502 of the language, will take SPAN 2301 Spanish for Heritage Speakers instead of 2001 or 2201 to fulfill the language requirement. Students with advanced skills will take SPAN 2500 Approaches to Literature Incoming students seeking a substitution/waiver for the foreign language core through the Office of Disability Services must complete this process by the end of the fall semester of their sophomore year.

Exemptions: B.S. and B.F.A. students, B.A. students in PCS, and those majoring in natural science will not have a language requirement unless required for their major.

In addition, the department offers courses that fulfill the American Pluralism, Global Studies, *Eloquentia Perfecta* 2, 3, and 4, Advanced Literature, Interdisciplinary Capstone, and Senior Values core requirements. It also offers Community Engaged Learning Courses that integrate coursework with service in the diverse and multilingual context of New York City.

Study abroad is an integral part of the study of foreign language, literature, and culture. Students are highly encouraged to study abroad in a foreign-language-speaking country for a semester or a year.

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Programs

Majors

- Chinese Studies Major (p. 288)
- French and Francophone Studies Major (p. 290)
- German Language and Literature Major (p. 291)
- German Studies Major (p. 292)
- Italian Language and Literature Major (p. 292)
- Italian Studies Major (p. 294)
- Spanish Language and Literature Major (p. 295)
- Spanish Studies Major (p. 296)

Minors

- Arabic Minor (p. 297)
- French and Francophone Studies Minor (p. 297)
- German Minor (p. 298)
- Italian Minor (p. 298)
- Linguistics Minor (p. 299)
- Mandarin Chinese Minor (p. 300)
- Russian Minor (p. 300)
- Spanish Minor (p. 301)

Learning Outcomes

Language Programs' Learning Outcomes

GOAL 1 - STUDENTS WILL DEVELOP A CRITICAL UNDERSTANDING OF THE LANGUAGES AND DIVERSE CULTURES ASSOCIATED WITH THE LANGUAGES

At the completion of 2001/2301:

- Students will be able to use the language of study at Intermediate Mid ACTFL level and Intermediate High level/CEFRFL B1 as part of their ability to move between and among languages and cultures.
- Students will be able to illustrate examples of the diversity within the cultures associated with the language of study

At the completion of the minor:

- Students will be able to conduct critical analyses of written/ audiovisual/cultural texts, by examining language uses as historically

and contextually situated in a system informed by colonialism, ideologies, and faith traditions.

In addition, at the completion of the major:

- Students will be able to illustrate how differences are discursively constructed, recognizing some of the subtleties of how language can be used to exercise and resist power.

GOAL 2 - STUDENTS WILL REFLECT ON THEMSELVES AND ON THEIR BELONGING TO SPACES AND COMMUNITIES, THROUGH THE LENS OF MULTILINGUALISM

At the completion of 2001/2301:

- Students will be able to explore in writing and in speech how their own linguistic and cultural backgrounds enter into dialogue with the cultures and languages they study.

At the completion of the minor:

- Students will be able to examine and interpret materials in the languages they study to deconstruct nation-based notions of culture and contextualize (multi) language use.

In addition, at the completion of the major:

- Students will be able to describe how the cultural narratives, stereotypes, and perception of the language of study and of their own expanding multilingualism are shaped along the lines of power within the communities and contexts in which they live.

GOAL 3 - STUDENTS WILL REFLECT ON THE WORLD THROUGH LANGUAGE USE AND CULTURAL UNDERSTANDING

At the completion of 2001/2301:

- Students will be able to articulate questions and participate in pressing social, environmental, and political conversations locally and globally, drawing from texts in the languages studied.

At the completion of the minor:

- Students will be able to articulate questions and participate in pressing social, environmental, or political conversations locally and globally, drawing from a variety of texts in the languages studied.

In addition, at the completion of the major:

- Students analyze texts and topics assuming a variety of disciplinary lenses and frameworks and critically examine the implications of this multidisciplinary approach.

At the completion of a CEL course:

- Students will be able to actively engage with the multilingual and multicultural community in and outside Fordham, building on their linguistic and cultural knowledge to be "people for others."

Linguistics' Learning Outcomes

At the end of their linguistics studies, students will be able to:

- Apply the tools of linguistic analysis to language data;
- Participate actively in discussions of language and linguistics issues;

- Demonstrate a clear understanding and professional command of what language is and how language works and is used;
- Observe and analyze how linguistic phenomena manifest in the larger world;
- Connect language and linguistics insights with social justice issues;
- Critically evaluate linguistic work, including empirical research, theoretical perspectives, and future directions; and
- Enrich their interdisciplinary expertise by engaging with diverse fields of linguistic inquiry including psycholinguistics, linguistic anthropology, sociolinguistics, communications, and language learning.

Chinese Studies Major Overview

Chinese studies is dedicated to the study of China both as a vital part of the world today and one of the longest continuing civilizations of human history. To study China is to be exposed to a world of difference evidenced in language, literature, art, philosophy, religion, and history, as well as social, political, and economic structures. In intellectual terms, these differences challenge students' assumptions about themselves and the world they are living in and fruitfully lead to greater self-awareness and appreciation of the richness of human traditions and conditions. In practical terms, China's unprecedented economic development and the critical role that it has come to play in the world today suggests the timely importance of Chinese studies.

The Chinese studies major has a dual focus on language and cultural studies. It provides students solid training in reading and speaking knowledge of Mandarin Chinese. An interdisciplinary major, it also introduces students to a broad range of Chinese cultural issues and critical phenomena through multiple disciplines. Students will take courses in both Chinese and English. Students will complete the major with not only a firm competence in Mandarin Chinese but also a deep familiarity of China's literary, philosophical, religious, political, and social traditions and their transformations in modernity. The major will help to prepare students to begin a professional career with a China component or start their graduate studies.

CIP Code

05.0123 - Chinese Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The major in Chinese studies requires 10 courses.

Coursework falls into two categories: (1) cultural study from offerings within the Department of Languages and Cultures, and other departments at Fordham, as well as (2) Mandarin Chinese language study (courses with the subject code MAND (p. 1456)).

Course	Title	Credits
Required Courses		
MAND 2500	Approaches to Literature	4
MLAL 3047	Confucianism, Taoism, and Buddhism: Chinese Thought and Literature	4
or MAND/ MLAL 3031	Chinese Cultural Concepts	
MLAL 4998	Chinese Studies Senior Research Paper ¹	4
Electives		
Choose seven electives from the below list.		Varies

¹ MLAL 4998 Chinese Studies Senior Research Paper is a supervised independent study (not a traditional course), culminating in an original research paper, written in English, in an area of Chinese studies. All majors are required to write a thesis under the direction of an adviser.

Chinese Studies Electives

Courses in this group have the CNST attribute (courses with the subject code MAND (p. 1456) are taught in Mandarin Chinese).

Course	Title	Credits
AAST 3929	History of Chinese in the Americas	3
ARHI 2211	The Arts and Visual Culture of China and Beyond	4
COLI 3006	Trauma Theory	4
HIST 1450	Understanding Historical Change: South Asian History	3
HIST 1550	Understanding Historical Change: Modern East Asia	3
HIST 3538	The Good Earth?	4
HIST 3915	Contemporary China	4
HIST 3919	Christianity in China	4
HIST 3922	East Asian Cities	4
HIST 3929	History of Chinese in the Americas	3
LING 2075	Politics of Language in China	4

Policies

Study Abroad

All majors are strongly encouraged to study abroad. A maximum of four courses taken abroad for one semester and a maximum of five courses taken abroad for one year may apply toward the major.

Students who opt to apply study abroad credits toward their major must have these courses approved by their faculty adviser prior to going abroad.

Double-Counting

Upon approval from their major advisers, students may double count two courses towards the major in Chinese studies and another major or minor.

AP/IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Availability

The major in Chinese studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in Chinese studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

French and Francophone Studies Major

Overview

The program in French and Francophone studies at Fordham is multidisciplinary in its focus and examines political, social, historical, and cultural (art, literature, film, media) practices in the French language from the medieval period to the present. With specialists in anthropology, critical theory, cognitive studies, film studies, journalism, humanitarian studies, literary studies, race studies, translation, and visual culture, and affiliated faculty in Art History, English, History, Medieval studies, Philosophy, and Women, Gender, and Sexuality studies, the program in French and Francophone studies is committed to preparing students to engage critically in French with the most significant ideas, issues, and questions in France and the francophone world, whether in the past or today. The study of class, climate, colonialism, identity, gender, immigration, race, sexual preference, and their intersectionality are integral and critical parts of the curriculum in the French and Francophone studies program.

CIP Code

05.0124 - French Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Course	Title	Credits
FREN 1502	Intermediate French II ¹	3
FREN 2001	French Language and Literature ¹	3
FREN 2600	France: Literature, History, and Civilization ²	4
FREN 4111	French and Francophone Studies Capstone Seminar ³	4
One pre-modern course ⁴		4
Five upper-level elective courses ⁵		20

¹ Students who place out of either FREN 1502 Intermediate French II and/or FREN 2001 French Language and Literature will replace them with an upper-level elective course(s).

² A prerequisite for all 3000-level courses.

³ This course is open only to French and Francophone Studies majors, and must be taken in the 4th year of study.

⁴ See below list of courses that fulfill this requirement.

⁵ Any course with the subject code FREN (p. 1281), numbered above 2001, may fulfill this requirement.

Pre-Modern Courses

Courses in this group have the FFPM attribute.

Course	Title	Credits
COLI 3462	Sympathy and Sensibilite	4
COLI 3463	Diderot	4
COLI 3464	Medicine and Literature in Ancient Regime	4
COLI 3519	Writing and Rewriting Seduction	4

FREN 3175	French Renaissances	4
FREN 3225	Hollywood's Holy Grail: Medieval French Literature on the Screen	4
FREN 3290	Early Authors Modern Theory	4
FREN 3301	France and Global Enlightenment	4
FREN 3333	Tableaux: Art and Theater: 1700s	4
FREN 3340	Amazones, Salonnieres, and Revolutionnaires: Women writers in Ancien Regime France	4
FREN 3453	The Flaneur in Paris	4
MVST 3225	Hollywood's Holy Grail: Medieval French Literature on the Screen	4

Courses numbered lower than 1502 will not count toward the major. The French and Francophone studies major prepares students with a thorough knowledge of French/Francophone culture with a concentration on a particular target area or track. A list of courses in French can be found here.

About the Major

In addition to gaining a thorough understanding of French/Francophone cultures, majors will also be expected to have achieved fluency and correct use of the language in their spoken as well as written presentations and work. The majority of courses will be taught in French. Students wishing to take courses outside of the department should provide their adviser with a copy of the course's syllabus for pre-approval before registering for the course.

AP and IB Credit

When AP or IB credits are awarded as equivalent to FREN 1502 Intermediate French II, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

A maximum of four courses taken abroad for one semester and a maximum of five courses taken abroad for one year may apply toward the French and Francophone studies major. These courses must be approved by the French and Francophone studies major adviser prior to studying abroad.

Students cannot apply to study abroad programs without consulting French faculty first and discussing their program options. It must be noted that some study abroad courses require an advanced proficiency level before applying.

French and Francophone Studies Senior Year Presentation

French and Francophone studies majors will be required to complete a questionnaire and participate in a senior roundtable during the spring of their senior year. The presentation will give closure and provide an assessment of the student's progress, his/her/their critical and linguistic aptitude in French, as well as their intercultural competence.

French Senior Thesis

Students who have maintained a 3.67 GPA average in French are eligible to write a Senior Thesis under the supervision of a French faculty advisor. Students must secure the approval of a French faculty advisor before the end of their junior year.

Upon completion, students will receive one of the below transcript notations:

- avec mention: satisfying work
- avec mention bien: above average work
- avec mention très bien: excellent work
- avec mention haute distinction: work of superior intellectual quality

Availability

The major in French and Francophone studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in French and Francophone studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

German Language and Literature Major

Majors in German will take a minimum of 10 courses numbered GERM 1501 Intermediate German I and higher, to be selected in consultation with the assigned departmental German major adviser. (Courses numbered lower than 1501 will not count toward the major or minor.) These 10 courses, to be completed all in German, will normally include:

Course	Title	Credits
GERM 1501	Intermediate German I	3
GERM 1502	Intermediate German II	3
GERM 2001	German Language and Literature	3
Select seven additional courses ¹		28

¹ Chosen in consultation with the German major adviser. Any course with the GERM subject or the GERM attribute code may fulfill this requirement.

Students who place out of GERM 1501, GERM 1502, or GERM 2001 will replace them with upper-level elective courses.

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

Each year, majors are able to enroll in a spring semester MLAL German course with an integrated study abroad component.

The department encourages students to study abroad for one or two semesters. Students who opt to apply study abroad credits toward their major must have these courses approved by the departmental German major adviser prior to their going abroad. Students studying abroad for one year may apply up to four study abroad courses toward their major. Students studying abroad for one semester may apply up to three study abroad courses toward their major. Additional study abroad credits accepted by Fordham University may be applied as elective credits toward graduation, but not toward the German major.

Availability

This major in German language and literature is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in German language and literature only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

German Studies Major

The German studies major is an individualized interdisciplinary major consisting of 10 courses numbered GERM 1501 Intermediate German I and higher, to be selected in consultation with the assigned departmental German studies major adviser.

Students who place out of GERM 1501, GERM 1502, or GERM 2001 must replace them with upper-level elective courses to count toward their course requirements. A list of GERM courses can be found here.

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

Majors are able to enroll in the MLAL German courses with an integrated study abroad component offered every spring semester. Up to three related courses may be taken from a department other than Languages and Cultures, but must be approved by the German studies major adviser in advance.

A maximum of two courses taken abroad for one semester and a maximum of three courses taken abroad for one year may apply toward the German studies major. These courses must be approved by the German studies major adviser prior to studying abroad.

Availability

The major in German studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in German studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Italian Language and Literature Major Overview

The Italian language and literature major prepares students to achieve an advanced proficiency in the language in all four fundamental skills—listening, speaking, reading, and writing—while they develop their analytical and critical abilities. Students acquire an in-depth knowledge of the historical development of Italian literature and culture over the centuries, from the Middle Ages to the present, and in all their diverse but often intersecting expressions and manifestations—from literature to cinema, from the fine arts to theatre, from political and economic theory to philosophical and religious thinking.

CIP Code

16.0902 - Italian Language and Literature.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Majors in Italian language and literature will take a minimum of ten courses numbered ITAL 1501 Intermediate Italian I and higher, to be selected in consultation with the assigned departmental Italian major advisor. (Courses numbered lower than 1501 will not count toward the major.)

The 10 courses required for the major, to be completed all in Italian, will normally include:

Course	Title	Credits
ITAL 1501	Intermediate Italian I	3
ITAL 1502	Intermediate Italian II	3
ITAL 2001	Italian Language and Literature ¹	3
	or ITAL 2201 Italian Community Engaged Learning: Art and Society	
At least one course in The Middle Ages		4
At least one course in The Renaissance and Baroque		4

At least one course in Modern and/or Contemporary Literature and Culture	4
Select any four electives ²	16

¹ Either course serves as the prerequisite for all 3000-level and above courses.

² Any course with the ITAL subject code numbered above 2201 may fulfill this requirement. One 2000-level course (above ITAL 2001/ITAL 2201) is suggested. Courses with the ITAL attribute may also apply with the Italian advisor's permission.

Students who place out of ITAL 1501, ITAL 1502, or ITAL 2001/ITAL 2201 will replace them with upper-level elective courses (see footnote 2 above).

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Courses in the Middle Ages

Courses in this group have the ITMA attribute.

Course	Title	Credits
ITAL 2800	Italy and the Arts: Politics, Religion, and Imagination in Medieval and Renaissance Italy	4
ITAL 3012	Medieval Storytelling	4
ITAL 3021	Vice and Virtue in Medieval Italian Literature	4
ITAL 3050	Arts and Politics in Italian Humanism	4
ITAL 3062	Ethics and Economic Value in Medieval Literature	4
MLAL 2755	Performing Dante	4
MLAL 3012	Medieval Storytelling	4
MLAL 3535	Building the Ideal City: Ethics and Economics Foundations of Realizable Utopias	4
MVST 4006	Dante's Cosmos: Science, Theology, and Literature	4
MVST 4007	The Medieval Foundations of Modernity: Petrarch and the Origins of Modern Consciousness	4
THEA 2755	Performing Dante	4

Courses in the Renaissance and Baroque

Courses in this group have the ITRE attribute.

Course	Title	Credits
COLI 3200	Machiavelli's Utopia	4
ITAL 2802	Lorenzo de' Medici (The Magnificent) and the Invention of Modernity	4
ITAL 3020	Renaissance and Baroque Novella	4
ITAL 3050	Arts and Politics in Italian Humanism	4

ITAL 3065	Lies and Liars in Medieval and Renaissance Italian Literature	4
ITAL 3120	Renaissance Literature	4
ITAL 3123	Fantastic Beasts, Fantastic Renaissance: Matteo Maria Boiardo's "Orlando in Love"	4
ITAL 3125	Magnificence and Power: The Medici and Renaissance Florence	4
ITAL 3215	Love and Honor in the Renaissance Courts	4
ITAL 3280	The Italian Short Story	4
MLAL 3535	Building the Ideal City: Ethics and Economics Foundations of Realizable Utopias	4

Courses in Modern and/or Contemporary Literature and Culture

Courses in this group have the ITMO attribute.

Course	Title	Credits
COLI 3112	Italian Neorealist Cinema	4
COLI 4016	Rewriting the Mediterranean (20th and 21st Centuries)	4
ITAL 2700	Filming the City Inside and Out: A Cinematic Journey Through Italy	4

ITAL 3901	Narrative and Film	4
ITAL 3910	Italy Today	4
ITAL 3920	Words on Fire: Contemporary Italian Poetry and Society	4
MLAL 3116	Social Issues in Italian Literature and Film	4
MLAL 3250	Culture and Society in Italian Cinema	4
MLAL 4011	Anni Di Piombo/Years of Lead: Culture, Politics, and Violence	4

Study Abroad

The department encourages students to study abroad for one or two semesters. Students who opt to apply study abroad credits toward their major must have these courses approved by the Italian major advisor prior to their going abroad. Students studying abroad for one year may apply up to four study abroad courses toward their major. Students studying abroad for one semester may apply up to three study abroad courses toward their major. Additional study abroad credits accepted by Fordham University may be applied as elective credits toward graduation, but not toward the Italian major.

Honors

Honors in Italian will be awarded to students who have a GPA in the major of 3.67 or higher, and who complete an outstanding senior thesis under the direction of an Italian faculty member. Students should consult their Italian major advisor for advice and guidelines on this option early in their junior year.

Availability

The Italian language and literature major is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in Italian language and literature only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

Italian Studies Major

Overview

The Italian studies major is an individualized, interdisciplinary major. Students achieve an advanced proficiency in the language in all four fundamental skills—listening, speaking, reading, and writing—while developing their analytical and critical abilities. Students explore Italian literature, culture, and history in the Mediterranean, European, or global contexts, from a broad range of disciplinary and critical perspectives in the humanities and the social sciences. In close consultation with an Italian mentor, they design their course of study, which may include courses taught in English or offered by other departments and programs, on topics relevant to the understanding of Italian culture and its relation to world cultures, histories, economics, and politics.

CIP Code

05.0114 - Western European Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The Italian studies major is an individualized interdisciplinary major consisting of ten courses numbered ITAL 1501 Intermediate Italian I and higher. All Italian studies majors will develop an individual course of study with concentration on a particular target area or track in close consultation with the assigned departmental Italian studies major advisor.

The Italian studies major will normally include:

Course	Title	Credits
ITAL 1501	Intermediate Italian I	3
ITAL 1502	Intermediate Italian II	3
ITAL 2001	Italian Language and Literature ¹	3
or ITAL 2201	Italian Community Engaged Learning: Art and Society	
Select seven courses ²		28

¹ Either course serves as the prerequisite for all 3000-level and above courses.

² Any course with the ITAL subject code (p. 1413) numbered above 2201 may fulfill this requirement. One 2000-level course (above ITAL 2001/ITAL 2201) is suggested. Up to three courses with the ITAL attribute may also apply with the Italian advisor's permission.

Students who place out of ITAL 1501, ITAL 1502, or ITAL 2001/ITAL 2201 will replace them with upper-level elective courses (see footnote 2 above). Courses numbered lower than ITAL 1501 will not count toward the major.

In close consultation with an Italian studies major advisor, students design an individualized course of study, which may include up to three courses taught in English or offered by other departments and programs on topics relevant to Italian culture and history. Other coursework should be within the Italian program. Sample areas of study may include:

- Italy and the Arts
- Italy, Film, and Media Studies
- Italy, Europe, and the Mediterranean
- Italy and the Italian American Experience/Italy and the Italian Diaspora
- Gendered Italy
- Postcolonial Italy

Students who wish to take courses outside of the department must provide their Italian studies major advisor with a copy of the course syllabus for approval before registering for the course. They will also be required to keep a portfolio of all of their work, and make a final oral or written presentation during the spring of their senior year, in which they demonstrate their independent work in the target field.

AP and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

A maximum of three courses taken abroad for one semester and a maximum of four courses taken abroad for one year may apply to the Italian studies major. These courses must be approved by the Italian studies major advisor prior to studying abroad.

Honors

Honors in Italian studies will be awarded to students who have a GPA in the major of 3.67 or higher, and who complete an outstanding senior thesis under the direction of an Italian faculty member. Students should

consult their Italian studies major advisor for advice and guidelines on this option early in their junior year.

Availability

The major in Italian studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in Italian studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

Spanish Language and Literature Major

Overview

The Spanish language and literature major provides students a high linguistic proficiency, cross-cultural literacy, and critical and analytical skills that lead to careers in the humanities, law, medicine, government, international relations, international business, education, and community-based initiatives today.

All courses, to be completed in Spanish, aim to offer a comprehensive knowledge of Hispanic literature and culture from the Middle Ages to the contemporary era. Classes focus on close textual analysis, historical contextualization, and the use of current critical perspectives. Majors will become familiar with the major authors and issues defining the diverse cultural traditions of the Hispanic world. In addition to their written work, students are required to participate actively in class discussions and/or make oral presentations.

CIP Code

16.0905 - Spanish Language and Literature.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Students majoring in Spanish language and literature will take a minimum of ten courses numbered SPAN 2001 Spanish Language and Literature and higher, to be selected in consultation with the assigned departmental Spanish language and literature major adviser.

All 10 courses for the major must be taken in Spanish and within the department.

These courses normally include:

Course	Title	Credits
SPAN 2001	Spanish Language and Literature ¹	3
or SPAN 2201	Spanish Community Engaged Learning	
or SPAN 2301	Spanish for Heritage Speakers	
SPAN 2500	Approaches to Literature ²	4
SPAN 3001	Spain: Literature and Culture Survey ³	4
SPAN 3002	Latin America: Literature and Culture Survey ³	4
Select six additional upper-level courses ⁴		24

¹ Students normally begin the major with one of these courses, and may only count one of them towards the major. Courses numbered lower than 2001 will not count toward the major.

² This course is the prerequisite for all courses numbered 3000 and above.

³ [These courses are not prerequisites for courses numbered 3000 and above.](#)

⁴ Please note:

- A minimum of four of these courses must be at the 3000-level or above. A list of courses with the SPAN subject code can be found here. 3000- and 4000-level courses do not need to be taken in numerical order.
- Advanced language courses at the 2000-level are also available, such as SPAN 2305 Spanish Conversation and Composition, SPAN 2450 Business Spanish, and SPAN 2620 Spanish Phonetics, among others. These courses help interested students to hone their language skills before proceeding to 3000- and 4000-level literature courses.

In addition to SPAN 2001 (or SPAN 2201/SPAN 2301, when applicable) and SPAN 2500 Approaches to Literature, only two more courses can be taken at the 2000-level, and a minimum of six courses, including SPAN 3001 and SPAN 3002, must be numbered 3000 and above.

Heritage speakers of Spanish, who are initially placed in SPAN 2301 Spanish for Heritage Speakers, will fulfill the language core requirement with this course and will begin the Spanish language and literature major at this level.

Students who place out of either SPAN 2001 or SPAN 2301 will replace them with an upper-level elective course.

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Double Counting

Spanish language and literature majors may double count up to two courses toward their Spanish language and literature major and another major or minor.

Study Abroad

The department encourages students to study abroad for one or two semesters. Students who opt to apply for study abroad credits toward their major must have these courses approved by the Spanish language and literature major adviser prior to their going abroad. Students studying abroad for one year may apply up to five study abroad courses toward their major. Students studying abroad for one semester may apply up to four study abroad courses toward their major. Additional study abroad credits accepted by Fordham University may be applied as elective credits toward graduation, but not toward the Spanish major.

Honors

Students who exhibit exceptional potential and intellectual curiosity and have a minimum GPA of 3.67 in the major may choose to write a senior thesis for Honors in Spanish language and literature. Students should consult their Spanish major adviser for advice and guidelines on this option early in their junior year.

Availability

The major in Spanish language and literature is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in Spanish language and literature only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Spanish Studies Major

Overview

The Spanish studies major is an individualized and interdisciplinary major that allows students to combine their Spanish-language interests with their interests in other fields covered by Fordham's extensive curriculum. Upon declaring the major, all Spanish studies majors are required to meet with their assigned departmental Spanish studies major advisor to consider three non-Spanish courses from Fordham's curriculum which will complement their seven Spanish courses.

This combination of coursework enables students to further enhance their fluency and correct grammar usage while providing the cross-cultural literacy and critical and analytical skills needed to pursue careers in the humanities, law, medicine, government, international relations, international business, education, and community-based initiatives today.

CIP Code

05.0114 - Western European Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The major consists of 10 courses numbered SPAN 2001 Spanish Language and Literature and above. At least seven of the 10 courses for the major must be completed in Spanish.

The Spanish studies major will normally include:

Course	Title	Credits
SPAN 2001	Spanish Language and Literature ¹	3
or SPAN 2201	Spanish Community Engaged Learning	
or SPAN 2301	Spanish for Heritage Speakers	
SPAN 2500	Approaches to Literature ²	4
SPAN 3001	Spain: Literature and Culture Survey ³	4
or SPAN 3002	Latin America: Literature and Culture Survey	
Four upper-level Spanish electives ^{4,5}		12
Three Spanish Studies electives ⁶		16

¹ Students normally begin the major with one of these courses, and may only count one of them towards the major. Courses numbered lower than 2001 do not count toward the major. Heritage speakers of Spanish, who are initially placed in SPAN 2301 Spanish for Heritage Speakers, will fulfill the language core requirement with this course and will begin the Spanish studies major at this level.

² This course is the prerequisite for all courses numbered 3000 and above.

³ Neither course is a prerequisite for taking other 3000- or 4000-level Spanish electives.

⁴ Any course with the subject code SPAN (p. 1639) numbered 3000-4999 (not otherwise counted in the major) may fulfill this requirement.

⁵ Students who place out of either SPAN 2001 or SPAN 2301 will replace them with an upper-level Spanish elective and will complete five upper-level Spanish electives (not four).

⁶ Any course with the subject code SPAN (p. 1639) numbered 2302-4999 may fulfill this requirement, as may any course with the SPAN attribute code (see list below). Mindful of contextualization and the importance of interdisciplinarity, students are encouraged to take these courses outside of the SPAN subject code (p. 1639). Consultation with the major adviser regarding these three courses, and the possibility of making them part of a thematic or discipline-based track, is highly desirable.

Spanish Studies Electives

Courses in this group have the SPAN attribute.

Course	Title	Credits
AFAM 4105	Queer Caribbean and Its Diasporas	4
ARHI 2257	Modern Latin American Art	4
COLI 3407	Foreignness & Translation: Multilingual Autobiography Writing in Contemp Latin-Am & Latino Lit	4

LALS 3407	Foreignness & Translation: Multilingual Autobiography Writing in Contemporary Latin-American & Latino Lit	4
LALS 3840	Latin America Through Film	4
LALS 4100	Speaking For/As the Other	4
LALS 4105	Queer Caribbean and Its Diasporas	4
MLAL 3000	Gender and Sexuality Studies	4
MLAL 3003	Intercultural Theory	4
MLAL 3005	Themes in Latina/o and Latin American Studies	4
MLAL 3110	Anti-Racist Pedagogy	4
MLAL 3525	Cultures of Sexual Dissidence in Latin America	4
MLAL 4100	Speaking For/As the Other	4

AP and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Double Counting

Spanish studies majors may double count up to two courses toward their Spanish studies major and another major or minor.

Study Abroad

A maximum of three courses taken abroad for one semester and a maximum of four courses taken abroad for one year may apply toward the Spanish studies major. These courses must be approved by the Spanish studies major adviser prior to studying abroad.

Honors

Students who exhibit exceptional potential and intellectual curiosity and have a minimum GPA of 3.67 in the major may choose to write a senior thesis for Honors in Spanish Studies. Students should consult their Spanish major adviser for advice and guidelines on this option early in their junior year.

Availability

The major in Spanish studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in Spanish studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Arabic Minor

The Arabic minor consists of six courses, four of which must be taken at Fordham. A minimum grade of C is required in all courses in order to fulfill minor requirements. Students must take six courses numbered ARAB 1501 and above:

Course	Title	Credits
ARAB 1501	Intermediate Arabic I	3
ARAB 1502	Intermediate Arabic II	3
ARAB 2001	Arabic Language and Literature	3
ARAB 2400	Approaches to Arabic Culture	4
Two ARAB electives ^{1,2}		6 to 8

¹ Electives include any course with the ARAB subject code, and a list can be found here. Up to one translation course may also be applied toward the minor. These classes will have the ARAB attribute.

² At least one 3000 level course is required. A 2000-level ARAB course is a prerequisite for all 3000-level ARAB courses.

Students who place out of ARAB 1501, ARAB 1502, ARAB 2001, will replace them with either 2000 or 3000 upper-level elective courses. Students may also apply up to two courses from study abroad toward the minor.

AP and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

Studying abroad is not required. However, students interested in the Arabic minor are strongly encouraged to study in an Arabic-speaking country, such as Egypt, Jordan, Morocco, or Syria, for at least one semester. The study abroad programs provide the student with classes of Modern Standard Arabic and an immersion experience in a spoken Arabic dialect. Up to two courses for the Arabic minor may be taken abroad.

Availability

The minor in Arabic is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in Arabic only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

French and Francophone Studies Minor

Overview

The program in French and Francophone studies at Fordham is multidisciplinary in its focus and examines political, social, historical, and cultural (art, literature, film, media) practices in the French language

from the medieval period to the present. With specialists in anthropology, critical theory, cognitive studies, film studies, journalism, humanitarian studies, literary studies, race studies, translation, and visual culture, and affiliated faculty in art history, English, history, medieval studies, philosophy, and women, gender, and sexuality studies, the program in French and Francophone studies is committed to preparing students to engage critically in French with the most significant ideas, issues, and questions in France and the Francophone world, whether in the past or today. The study of class, climate, colonialism, identity, gender, immigration, race, sexual preference, and their intersectionality are integral and critical parts of the curriculum in the French and Francophone studies program.

Requirements

The French and Francophone studies minor consists of six core and elective courses, numbered FREN 1502 Intermediate French II and higher, to be chosen in consultation with the assigned departmental French and Francophone studies minor adviser.

Courses for the minor, to be completed all in French, will normally include the following:

Course	Title	Credits
FREN 1502	Intermediate French II	3
FREN 2001	French Language and Literature	3
FREN 2600	France: Literature, History, and Civilization ¹	4
Select three electives numbered above FREN 1502. ²		12

¹ This course is a prerequisite for all 3000-level FREN courses.

² Two of these courses must be 3000-level FREN courses.

Courses numbered lower than 1502 will not count toward the minor. A list of courses in French can be found here.

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

A maximum of two courses taken abroad for one semester and a maximum of three courses taken abroad for one year may apply toward the French and Francophone studies minor. These courses must be approved by the assigned departmental minor advisor prior to studying abroad.

Want to learn more about the French and Francophone studies program?

Please visit our always-updated French and Francophone studies program website.

Availability

The minor in French and Francophone studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in

Fordham's School of Professional and Continuing Studies may minor in French and Francophone studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

German Minor

Students who minor in German must take a minimum of six courses numbered GERM 1501 Intermediate German I and higher, to be selected in consultation with the assigned departmental German minor adviser.

Students who place out of GERM 1501, GERM 1502, or GERM 2001 must replace them with upper-level elective courses to receive credit toward the minor. A full list of courses in German can be found here.

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

Each year, minors are able to enroll in a spring semester MLAL German course with an integrated study abroad component.

Students minoring in German may apply a total of two study abroad courses toward the minor. These courses must be approved by the German minor adviser prior to studying abroad.

Availability

The minor in German is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in German only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Italian Minor

Overview

The Italian minor prepares students to achieve an advanced proficiency in the language in all four fundamental skills—listening, speaking, reading, and writing. While developing their analytical and critical abilities, students explore texts and topics in Italian literature and culture from the Middle Ages to the present.

Requirements

Minors in Italian will take a minimum of six courses numbered ITAL 1501 Intermediate Italian I and higher, to be chosen in consultation with the assigned departmental Italian minor advisor.

Courses for the minor, to be completed all in Italian, normally include the following:

Course	Title	Credits
ITAL 1501	Intermediate Italian I	3
ITAL 1502	Intermediate Italian II	3
ITAL 2001	Italian Language and Literature ¹	3
or ITAL 2201	Italian Community Engaged Learning: Art and Society	
Three additional electives in Italian ²		12

¹ Either course serves as the prerequisite for all 3000-level and above courses.

² Any course with the ITAL subject code (p. 1413) numbered above 2201 may fulfill this requirement. One 2000-level course (above ITAL 2001/ITAL 2201) is suggested. Courses with the ITAL attribute may also apply with the Italian adviser's permission.

Students who place out of ITAL 1501, ITAL 1502, or ITAL 2001/ITAL 2201 will replace them with upper-level elective courses (see footnote 2 above).

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

Up to two courses for the Italian minor may be taken abroad. These courses must be approved by the Italian minor advisor prior to studying abroad.

Availability

The minor in Italian is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in Italian only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Linguistics Minor

The Linguistics minor requires six (6) courses:

Course	Title	Credits
Required Courses		
LING 1100	Introduction to Linguistics	3
LING 1400	Introduction to Sociolinguistics	3
LING 1500	Introduction to Psycholinguistics	3
Three Electives ¹		

¹ Any course with the LING subject code (p. 1451) numbered 1501-4999 may fulfill this requirement, as may courses with the LING attribute code (see list below).

Electives

Courses in this group have the LING attribute.

Course	Title	Credits
ANTH 1413	Language and Culture	4
ANTH 3726	Language, Gender, and Sexuality	4
CISC 1600	Computer Science I	3
CISC 1800	Introduction to Computer Programming	3
COMC 2111	Theories of Human Communication	4
COMC 2117	Language, Consciousness, and Culture	4
DTEM 2412	Digital Ethnography	4
DTEM 2459	Social History of Communication and Technology	4
FREN 3055	Language and AI (Artificial Intelligence)	4
MAND 3045	Chinese Linguistics	4
MLAL 1400	Introduction to Sociolinguistics	3
MLAL 3100	History of Language	4
PHIL 3200	Introduction to Logic	4
PHIL 3204	Symbolic Logic	4
PSYC 2500	Cognition	4
PSYC 2710	Adolescent and Adult Development	4
PSYC 3010	Bilingual Minds	4
PSYC 3110	Cognitive Neuroscience	4
PSYC 4015	Language and Thought	4
SPAN 3007	Spanish Linguistics	4
SPAN 3402	Language and Identity in the Spanish-Speaking World	4

Policies

Course Selection

- Students must take at least one (1) 3000-level or above elective course from the elective offerings.
- Students who have completed their required linguistics courses may pursue a linguistics faculty-mentored research project and enroll in LING 4999 Linguistics Research for course credit.
- Either PHIL 3200 Introduction to Logic or PHIL 3204 Symbolic Logic, but not both, may apply towards the minor.

Academic Performance

- A minimum grade of C in all courses is required in order to fulfill minor requirements.

Study Abroad

- Students are not required to study abroad. However, students who choose to study abroad may apply up to two (2) pre-approved courses to the linguistics minor.

Foreign Languages

- There is no foreign language requirement for the linguistics minor.
- However, with minor advisor permission, students may apply one (1) 2500/2600 or 3000 (or above) level language literature/culture course to the linguistics minor.

Double Counting

- Upon approval from their major/minor advisors, students may double count up to two (2) courses towards the linguistics minor and their major, or another minor.

Availability

The minor in linguistics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in linguistics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Mandarin Chinese Minor

Overview

The past three decades have witnessed the unprecedented development of China as the second largest economy in the world and a leading force in global politics, economy, and culture. Economic and cultural ties between the United States and China have also increased exponentially. Fordham has been a participant in these exchanges through the International Political Economy and Development program (p. 590), and most recently through an agreement with the Gabelli School of Business (p. 81). In this context, the study of Mandarin language has become increasingly relevant and popular among students at Fordham who want to complement their major and enhance their academic and research opportunities in multiple other fields.

Students who intend to minor in Mandarin Chinese should prepare their schedules in consultation with a Mandarin Chinese faculty adviser. To declare the minor and be assigned an adviser, please contact the department associate chair in your college.

Requirements

Students minoring in Mandarin Chinese will take a minimum of six courses numbered MAND 1501 and higher, to be selected in consultation with the assigned departmental Mandarin Chinese minor adviser. These courses normally include:

Course	Title	Credits
MAND 1501	Intermediate Mandarin I	3
MAND 1502	Intermediate Mandarin II	3
MAND 2001	Mandarin Language and Literature	3
MAND 2500	Approaches to Literature	4
Two MAND electives ^{1,2}		8

¹ Any course with the MAND subject code or MAND attribute code may apply. A list of these courses can be found here.

² At least one 3000 level course is required. MAND 2500 is the prerequisite for all 3000-level MAND courses.

It is required that students take at least six Mandarin courses. Students who place out of MAND 1501, MAND 1502, or MAND 2001 will replace them with 2000- or 3000-level elective courses. For minors taking 3000-level MAND courses, MAND 2500 is a prerequisite.

Courses in the below group have the MAND attribute.

Course	Title	Credits
COLI 3006	Trauma Theory	4
MLAL 3003	Intercultural Theory	4
MLAL 3030	Masterpieces of Chinese Film: Theory and Texts	4

MLAL 3031	Chinese Cultural Concepts	4
MLAL 3043	Aesthetics and Politics: Modern Chinese Literature	4
MLAL 3047	Confucianism, Taoism, and Buddhism: Chinese Thought and Literature	4
MLAL 3048	Political Thought in Modern Asia	4
MLAL 3049	Modern Chinese Political Thought	4
MLAL 3075	Gender and China	4

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

Students interested in the Mandarin Chinese minor are highly recommended to study in China or another Chinese-speaking country. Students are encouraged to study abroad during the summer, for a semester, or a year to either fulfill some of the required core courses or take upper-level electives. A maximum of two courses for the Mandarin Chinese minor may be taken abroad. Students who opt to apply study abroad credits toward their minor must have these courses approved by the Mandarin Chinese minor adviser prior to their going abroad.

Availability

The minor in Mandarin Chinese is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in Mandarin Chinese only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Russian Minor

Students minoring in Russian will take a minimum of six courses numbered RUSS 1501 Intermediate Russian I and higher, to be selected in consultation with the assigned departmental Russian minor adviser.

A course of study in Russian normally includes:

Course	Title	Credits
RUSS 1501	Intermediate Russian I	3
RUSS 1502	Intermediate Russian II	3
RUSS 2001	Russian Language and Literature	3
Select two additional 2000-level courses		8
Select at least one 3000-level elective course		4

Students who place out of RUSS 1501, RUSS 1502, or RUSS 2001 will replace them with 2000- or 3000-level elective courses, a list of which can be found here.

Up to one course in translation may be applied toward the minor if the readings and assignments are done in Russian.

AP and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

Students interested in the Russian minor are strongly encouraged to study in Russia for at least one semester. A maximum of two courses for the Russian minor may be taken abroad. Students who opt to apply study abroad credits toward their minor must have these courses approved by the Russian minor adviser prior to their going abroad.

Availability

The minor in Russian is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may minor in Russian only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Lincoln Center campuses.

All Russian courses are offered only at Lincoln Center.

Spanish Minor

Students minoring in Spanish must take a minimum of six courses numbered SPAN 2001 Spanish Language and Literature and higher, to be chosen in consultation with the assigned departmental Spanish minor adviser.

The six courses for the minor normally include:

Course	Title	Credits
SPAN 2001	Spanish Language and Literature ¹	3
or SPAN 2201	Spanish Community Engaged Learning	
or SPAN 2301	Spanish for Heritage Speakers	
SPAN 2500	Approaches to Literature ²	4
SPAN 3001	Spain: Literature and Culture Survey ³	4
or SPAN 3002	Latin America: Literature and Culture Survey	
Select three electives numbered SPAN 2302 or above. ⁴		12

¹ Students normally begin the minor with one of these courses, and may only count one of them towards the minor. Courses numbered lower than 2001 do not count toward the minor.

² This course is the prerequisite for all courses numbered 3000 and above.

³ Neither course is a prerequisite for taking other 3000- or 4000-level Spanish electives.

⁴ Any SPAN course numbered 2302 and above may apply, as well as certain other courses such as MLAL 3007 Spanish Linguistics. Two of these elective courses must be above the 3000-level.

Heritage speakers of Spanish, who are initially placed in SPAN 2301 Spanish for Heritage Speakers, may fulfill the language core requirement with this course and begin the Spanish minor at this level.

Students who place out of either SPAN 2001 Spanish Language and Literature or SPAN 2301 Spanish for Heritage Speakers must replace them with an upper-level elective course.

All six courses must be taken in Spanish and in the department except when studying abroad. At least three courses, including SPAN 3001 Spain: Literature and Culture Survey and/or SPAN 3002 Latin America: Literature and Culture Survey, must be numbered 3000 or above.

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Double Counting

Spanish minors may double count up to two courses toward their Spanish minor and another minor, or another major.

Study Abroad

A maximum of two courses taken abroad for one semester, and a maximum of three courses taken abroad for a year may be applied toward the Spanish minor. These courses must be approved by the Spanish minor adviser prior to studying abroad.

Availability

The minor in Spanish is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in Spanish only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Latin American and Latino Studies Learning Goals

The Latin American and Latino Studies (LALS) program provides a foundational background in the experiences of Latin Americans and Latinos. It fosters:

- An understanding of similarities and differences in the experiences of people in the various Latin American nations and/or the various Latino groups in the United States.
- An awareness of the role of migration in shaping Latin American and/or Latino communities.
- An understanding of the role of race, ethnicity, class, gender, or sexuality in the experiences of Latin Americans and/or Latinos.
- An increased understanding of the Spanish and/or Portuguese language(s).
- An appreciation for the capacity of various academic disciplines to convey knowledge about the Latin American and/or Latino experiences.

Program Activities

Study Abroad

Studying abroad is a rewarding experience and is especially recommended for LALS majors and minors. Study abroad complements LALS courses while helping students fulfill some of the program's goals. For instance, it helps students achieve competency in Spanish or Portuguese and gain a better understanding of Latin America and Spain through cultural immersion and service-oriented courses. To this effect, the program has established a series of study abroad opportunities for students, ranging from a fall, spring, or summer term in Granada, Spain, to other LALS-approved study abroad programs throughout Latin America, the Caribbean, and Spain. Occasionally, LALS also sponsors spring and summer study tours.

For Fordham study abroad programs, such as the program in Granada, LALS majors and minors will be able to count all relevant courses taken abroad. If the student has already declared a LALS major or minor, ideally these courses should be approved by the LALS director or associate director before going abroad. For study abroad in a non-Fordham program, consult with the LALS director or associate director regarding the applicability of courses, ideally before going abroad. Typically, most or all courses with appropriate content will count toward the major or minor.

For more information on studying abroad, please visit the International and Study Abroad Programs page or email isap@fordham.edu.

LALS-Sponsored Programs

Fall, spring, and summer semester programs in Granada, Spain

Continuously populated for more than seven millennia, Granada, a world heritage site, is one of the most beautiful and historically rich cities in the world. It was the hometown of the poet Federico García Lorca, a center of flamenco culture, and a place of intersection for European, North African, and Latin American cultures and scholarship. Study-abroad students will have the opportunity to live in this wondrous city, study the works of famous Spanish writers and artists and Spanish and Latin American cultures, and partake in cultural visits and tours of Andalucía (Andalusia), the region in which Granada is located. Interested students should contact Rafael Lamas at lamas@fordham.edu.

Other LALS-Sponsored Programs

LALS often sponsors study-tour courses in Latin America, which offer in-depth, on-site study of the history, arts, and culture of a Latin American city or country. Past courses have included:

- A spring study tour on the colonial artistic traditions of Mexico in Mexico City with Barbara Mundy (art history); on peace, reconciliation initiatives, and service to communities of displaced families in Bogotá, Colombia, with Arnaldo Cruz-Malavé (languages and cultures); and on migration in Puebla, Mexico, with Lindo-Fuentes (history).
- A summer course on the development of Cuban culture since the 1959 Revolution in Havana, Cuba, with Cruz-Malavé (languages and cultures), hosted by Casa de las Américas, Cuba's premier cultural institute.
- LALS will be offering spring study tours on the politics of memory in Santiago, Chile, with Carl Fischer (languages and cultures), on contemporary culture in Havana, Cuba, with Cruz-Malavé (languages

and cultures), and on public health in Cali, Colombia, with Lenis (dean) and Renaldo Alba (associate director, CSTEP).

Institute Resources

In addition to offering a major and minor, the Latin American and Latino studies program sponsors an institute that provides an intellectual home for students and faculty who are interested in Latin America and the Latino communities in the United States. LALS acts as a clearinghouse for information for faculty and students, invites speakers, organizes conferences and film series, and maintains video and journal collections for the use of its faculty and students. In addition, it sponsors visiting scholars; networks of scholarly exchange between Latin America and the United States, especially on issues pertaining to the relationship between Latin America and its diasporas; and fosters understanding of and service in Latin America. Its newsletter, *Boletín*, documents the program's multiple academic events, as well as the research, educational, and service activities of its faculty and students. All *Boletín* issues are available online at www.fordham.edu/lalsi.

Prestigious Fellowship Opportunities

LALS students have won many prestigious fellowships, including Fulbright Awards, which allow students to pursue their own research abroad. Students need to plan early (preferably in their sophomore year) if they wish to compete for a prestigious fellowship. See the director or associate director for more information.

Latin American and Latino Studies Major

Overview

The Latin American and Latino studies major integrates a series of courses in the humanities, social sciences, and the arts designed to familiarize students with the experiences and cultural expressions of Latin America and the Latino communities in the United States. As an interdisciplinary program, the major prepares students to enter the fields of law, social work, international relations, business and finance, humanitarian affairs, teaching, Hispanic media and communications, publishing, and graduate or professional study.

CIP Code

05.0107 - Latin American Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The major consists of 10 courses:

Course	Title	Credits
One Intro course		3 to 4
Two Social Sciences courses		6 to 8
Two Humanities/Arts courses		6 to 8
One Upper-level History course		4
One Capstone Seminar (normally taken in the senior year)		4
Three additional electives ¹		9 to 12

¹ Any course with the LALS subject code or the LALS attribute code may fulfill this requirement.

Intro courses

Courses in this group have the LAIN attribute.

Course	Title	Credits
ANTH 3470	People and Cultures of Latin America	4
HIST 1400	Understanding Historical Change: Latin America	3

Seniors may wish to write a senior essay under the guidance of one of the program's faculty members.

Availability

The major in Latin American and Latino studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Latin American and Latino Studies Minor

Overview

The Latin American and Latino studies minor serves as an introduction to the study of the experiences of Latin America and the Latino communities in the United States. As an interdisciplinary program, the minor complements majors in relevant fields, such as English, History and Spanish, but can also serve as an enrichment to a student's personal growth and to other majors, such as in the physical or biological sciences. Popular Core courses, such as Spanish Language and Literature (SPAN 2001), Understanding Historical Change: Latin America (HIST 1400), and Latin American Liberation Theologies (THEO 3383), can all count toward the minor (and the major).

Requirements

The minor consists of six courses:

Course	Title	Credits
One introductory course		3 to 4
Two courses from the social sciences		6 to 8
Two courses from the humanities/arts		6 to 8
One elective		3 to 4

See the Latin American and Latino studies major (p. 302) for a list of courses that fulfill these requirements.

Language competency in Spanish is highly recommended but not required. Majors and minors are encouraged to take at least one Latin American/Latino literature course above the 2001 level. Students are highly encouraged to consider study abroad programs in Latin America or Spain.

Courses that fulfill college requirements may, where appropriate, be credited toward the major or minor. Students whose particular interests do not conform to the pattern of electives described above are encouraged to consult with the LALS director or the associate director to work out a program more appropriate to their needs.

Availability

The minor in Latin American and Latino studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Leading People and Organizations

The leading people and organizations area at the Gabelli School of Business focuses on the following areas:

- Ethical leadership
- Career management, focused on personal and professional calling
- Innovation, including social innovation
- Entrepreneurship, including social entrepreneurship
- Global sustainability management

The area's faculty research has global visibility and is frequently cited in professional journals and the popular press. Some faculty focus mainly on individual-level factors such as character, trustworthiness, or mindfulness. Others look at the group level of what makes highly functional teams work. Many examine how organizations of all kinds can better contribute to solving social problems. Overall, the area's research aims to create insights on how people can manage better.

Faculty contribute to this goal by participating on editorial boards, editing globally prominent journals, and serving in leadership roles in the Academy of Management and other professional associations.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

Programs Concentrations

- Concentration in Entrepreneurship (p. 307)
- Concentration in Management (p. 308)
- Concentration in Personal Development and Leadership (p. 308)

Related Programs

- Sustainable Business Minor (p. 368)
- Concentration in Social Innovation (p. 346)

Concentration in Entrepreneurship

Entrepreneurship: Not just a field, but a mindset.

The Gabelli School of Business prepares its students to tackle real business problems with an arsenal of knowledge, skills, and experiences. The Entrepreneurship program within the Gabelli School of Business turns students into change agents and disruptors to seize countless opportunities in front of them. We do this by re-calibrating how students think about money, failure, what a career is, what kind of lifestyle they want, and what kind of impact they want to have in the world.

Entrepreneurship is not easy. It is not for the faint of heart. But it IS a door to opportunity for students who are intrigued by the path less traveled. For students who value freedom and independence and creativity. For students who don't like being pigeon-holed in the typical career path. For students looking for an exciting, non-traditional lifestyle.

The Entrepreneurship concentration was developed to deliver a forward-thinking, skills-based curriculum driven by experiential learning to change the way students think. Regardless of one's career trajectory (the startup world, corporate America, nonprofits, etc.), students learn how to embrace failure, how to vet opportunities, how to pitch ideas, how to be innovators, and how to confidently change the world for the better.

Students at the Rose Hill and Lincoln Center campuses can earn a concentration in Entrepreneurship as either a primary concentration (four courses) or a secondary concentration (three courses).

For more information

Visit the Entrepreneurship Program web page.

Requirements

Entrepreneurship is available to Gabelli School students as either a primary or secondary concentration.

Primary Concentration

Course	Title	Credits

Concentration in Management Requirements

Gabelli students may pursue management as a primary or secondary concentration.

Primary Concentration

Students who want to pursue management as a primary concentration are required to complete four upper-level courses in Leading People and Organizations, Strategy, and/or Operations.¹

Secondary Concentration

Students who want to pursue management as a secondary concentration are required to complete three upper-level courses in Leading People and Organizations, Strategy, and/or Operations.¹

¹ Course with subject the code LPBU, SABU, or OPBU numbered 3224 or higher fulfill the requirements for the primary and secondary concentration in management except for SABU 4441 Strategy and OPBU 3438 Operations and Supply Chain Management.

Concentration in Personal Development and Leadership Overview

Research shows that those who are able to be effective change makers, are the happiest and most successful.

Are you inspired to become a compassionate leader for change, who wants to revolutionize the world for the better? Then this secondary concentration may be for you!

Personal Development and Leadership will allow you to explore with more intention and guidance what your gifts are and how you can develop and deploy them, no matter the industry you desire to work in some day, or what you wish to achieve in life.

Available at Rose Hill and Lincoln Center, this secondary concentration will teach you to:

- Understand your strengths and gifts
- Help you develop these gifts into skills
- Support you in applying these skills to effectuate change
- Develop and support you in your leadership role after college

Requirements

Secondary Concentration in Personal Development and Leadership

The Secondary Concentration in Personal Development and Leadership requires completion of three courses (nine credits).

Course	Title	Credits
Required Course		
LPBU 4440	ST: Advanced Management	3

Marketing

The marketing curriculum is designed to prepare students for careers in various marketing career paths (visit the Careers in Marketing website). The marketing area helps students learn the foundational knowledge and the latest marketing advances, with special attention given to consumer and societal well-being. This program is ranked 10th in the United States by *U.S. News & World Report*.

The field of marketing calls for creative thinkers with diverse interests and backgrounds. It allows applying economics, psychology, sociology, anthropology, statistics, and mathematics to contribute to the growth of the U.S. and global economy. Marketing concepts and activities today spread far beyond packaged- and durable-goods companies to encompass the business strategies of diverse industries such as service providers, nonprofit institutions, and even political entities. Marketing acumen and skills are critical to succeed in any area of business,

regardless of specific positions or job titles, because it involves finding innovative solutions to ever-changing challenges and leveraging evolving opportunities.

Given the innovations taking place in the industry and the interdisciplinary approach expected from marketing professionals, the marketing area constantly updates its curriculum and offers creative and cutting-edge courses to prepare students for marketing careers. The marketing area offers various courses that reflect the challenges in the U.S. and global marketplace, emphasizing the creation of value for consumers, businesses, and society at large.

Students have the option of following a track in their marketing major by directing some of their coursework in their major electives in a planned manner. Possible focus areas include strategic branding, marketing analytics, digital marketing, or integrated marketing communications. Students pursuing a concentration (in marketing or other business areas) may also complete these courses by adding a secondary concentration. Please see your class dean for advice and direction if you would like to consider one of these focus areas.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

Visit the marketing area web page.

Programs

Major and Minor

- Marketing Major (p. 311)
- Marketing Minor (p. 312)

Concentrations

- Concentration in Digital Marketing (p. 309)
- Concentration in Global Marketing with Consumer Insights (p. 310)
- Concentration in Integrated Marketing Communications (p. 310)
- Concentration in Marketing (p. 310)
- Concentration in Marketing Analytics (p. 311)
- Concentration in Strategic Branding (p. 311)

Concentration in Digital Marketing Overview

The digital marketing secondary concentration prepares students to understand the digital marketing landscape, design and execute marketing activities on digital platforms, and optimize customer

experiences throughout the customer journey. Students build foundational knowledge and skills toward a systematic understanding of the digital marketing world.

Requirements

The secondary concentration in Digital Marketing requires three courses (9 credits).

Course	Title	Credits
MKBU 4113	Digital Marketing	3
MKBU 3449	ST: Customer Experience Mgt	3
MKBU 4114	Marketing Technology and Innovation	3
	or MKBU 3445 ST: Marketing Analytics	
Total Credits		9

All credits earned towards this secondary concentration may double-count towards a major in Marketing (p. 311).

Concentration in Global Marketing with Consumer Insights

Companies need marketers who can explain people. Unravel the mysteries behind why people buy what they buy, and you will be immeasurably valuable.

The Gabelli School at Lincoln Center's program in global marketing with consumer insights gives you the skills you need to explain the complexities and contradictions of consumer behavior. By drawing together knowledge from marketing, psychology, sociology, and anthropology, you will be able to develop creative new approaches.

The global marketing with consumer insights concentration will teach you to explain people's shopping habits, discover what makes someone choose a certain brand, and find out what makes online shoppers click.

Marketing has long relied on traditional psychology-based approaches to consumer behavior. As today's shoppers become harder to predict, however, companies are turning to anthropology to give them a deeper, more nuanced view of how consumers interact with their environment. This concentration prepares students to reveal, understand, and leverage consumer insights that can advance the state of marketing. Students take a mix of business and liberal arts courses—often marketing, anthropology, and psychology coursework—and then apply their knowledge through a required experiential component, such as an internship or global travel experience.

Graduates of this concentration are ready for careers in the burgeoning field of business anthropology and careers in consumer insights for which business anthropologists are hired.

Requirements

The global marketing with consumer insights concentration can be pursued by students who are majoring in Global Business Administration at Lincoln Center.

Course	Title	Credits
MKBU 3441	Marketing Research	3
MKBU 3435	Consumer Behavior	3
MKBU 3457	Bus Anthropol in Global Context	3

MKBU 3459	Cross Cultr Consumer Insight	3
MKBU 4113	Digital Marketing	3
Social Science Elective ¹		3 to 4
Marketing Elective ²		3

¹ Any course with the subject code ANTH (p. 987) numbered 1100-4999 (of three or more credits) or the subject code SOCI (p. 1625) numbered 1100-4999 (of three or more credits) may fulfill this requirement, as may the following Psychology courses: PSYC 1200 Foundations of Psychology, PSYC 2600 Social Psychology, PSYC 2700 Infant and Child Development, PSYC 2710 Adolescent and Adult Development, and PSYC 2800 Personality.

² Courses with the subject code MKBU (p. 1463) numbered 3226-4999 (of at least 1.5 credits) may fulfill this requirement.

Concentration in Integrated Marketing Communications Overview

Students in this secondary concentration gain in-depth knowledge of traditional and cutting-edge advertising and marketing communications that prepare them to take leading roles in those industries. They learn advanced approaches to developing advertising strategies and brand messaging, and then activating those messages in key media outlets and platforms.

Requirements

The secondary concentration in Integrated Marketing Communications requires three courses (9 credits).

Course	Title	Credits
MKBU 3434	Fundamentals of Integrated Marketing Communication	3
MKBU 4115	Marketing Messaging & Activation	3
MKBU 4113	Digital Marketing	3
	or MKBU 4105 ST: Services Marketing	
Total Credits		9

All credits earned towards this secondary concentration may double-count towards a major in Marketing (p. 311).

Concentration in Marketing Requirements

The Marketing concentration is available to all Gabelli students.

Primary Concentration

Course	Title	Credits
MKBU 3441	Marketing Research	3
Three marketing courses ¹		

Secondary Concentration

Students who want to pursue marketing as a secondary concentration are required to complete any three upper-level marketing courses.¹

¹ Any course from subject code MKBU (p. 1463) 3226 or higher may fulfill this requirement.

Students pursuing a primary or secondary concentration in marketing may not earn credit for COMC 3172 Principles of Advertising or PSYC 3320 Consumer Behavior.

Concentration in Marketing Analytics

The marketing analytics secondary concentration builds skills in critical analytical methods that unlock vast marketing opportunities. Students engage in hands-on training, applying analytical approaches to assist marketing decisions. Topics from data analytics, traditional marketing, and digital marketing combine to bridge the gap between managerial needs and technical expertise. In addition to students with a specific interest in marketing analytics, this secondary concentration would also be useful for those who will use analytics insights in other marketing and managerial roles.

Requirements

Marketing analytics can be pursued by Gabelli students as a secondary concentration only. Three courses (9 credits) are required.

Course	Title	Credits
MKBU 3445	ST: Marketing Analytics	3
MKBU 4451	ST: Data Driven Marketing Decisions	3
MKBU 4113	Digital Marketing	3
or INSY 4431	Web Analytics	
Total Credits		9

Concentration in Strategic Branding

Students in this secondary concentration build foundational knowledge of brands and their importance to the modern business world. Students learn key concepts and theories and develop the skills necessary to strategically manage brands toward organizational goals. Special attention is directed to measuring and evaluating brands as a means to enhance the customer experience and optimize the value brands deliver to all of a firm's stakeholders.

Requirements

Strategic branding can be pursued by Gabelli students as a secondary concentration only.

The concentration requires completion of the following courses:

Course	Title	Credits
Required Courses		
MKBU 3439	ST: Branding	3
MKBU 4109	ST: Revealing Consumer Insights	3
Elective		
<i>One of the following courses:</i>		
MKBU 3434	Fundamentals of Integrated Marketing Communication	3
MKBU 3440	Global Marketing	

MKBU 3449	ST: Customer Experience Mgt	
Total Credits		9

Note: MKBU 3225 Marketing Principles is a prerequisite for all of the above courses, and therefore must be taken before beginning any of the concentration coursework.

Marketing Major Requirements

Course	Title	Credits
Required Courses		
MKBU 3441	Marketing Research	3
MKBU 3435	Consumer Behavior	3
MKBU 4441	Marketing Strategy (Senior Capstone course)	3
Electives		
Four upper-level marketing courses ¹		12
One business elective		3
One liberal arts elective (marketing-related) from the following options: ²		3 to 4
ECON 3210	Development Economics	
ECON 3235	Economy of Latin America	
ECON 3346	International Trade	
COMM 1000	Fundamentals of Communication and Media Studies	
COMM 1010	Introduction to Communication and Media Studies	
ANTH 1100	Introduction to Cultural Anthropology	
PSYC 1200	Foundations of Psychology	
PSYC 2600	Social Psychology	
PSYC 2800	Personality	
SOCI 1100	Introduction to Sociology	
VART 1135	Visual Thinking	
VART 2003	Graphic Design and Digital Tools	
Total Credits		27-28

¹ Any course from subject code MKBU (p. 1463) numbered 3226 or higher fulfills this requirement.

² This list is a sample of commonly-completed classes; however, there are many courses from Fordham College at Rose Hill/Fordham College at Lincoln Center that may fulfill this requirement. Please consult your class dean to seek approval for a different course to fulfill this requirement.

Students pursuing a major in marketing may not earn credit for COMC 3172 Principles of Advertising or PSYC 3320 Consumer Behavior.

Marketing Majors must take CBBU 1005 Marketing Analytics Requirement in their junior year instead of CBBU 1004 ST: Analytics Requirement.

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

CIP Code

30.7102 - Business Analytics.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Marketing Minor

This minor is for FCRH and FCLC students who are interested in applying marketing principles and practices to business needs. It combines classes in marketing, psychology, sociology, and statistics. Because marketing includes persuasion, students must possess effective communication skills. This minor is often of particular interest to students who are pursuing a major in communications.

Learning Goals

- Students will demonstrate a substantive knowledge of key business concepts and theories.
- Students will demonstrate competency in analytical and technical skills in decision-making.
- Students will demonstrate competency in oral and written communication.
- Students will demonstrate capacity for ethical decision-making and an understanding of how business can positively impact society.
- Students will demonstrate an awareness and competency in effectively working in teams and dealing with globally diverse situations.

Requirements

The minor in marketing consists of six courses.

Course	Title	Credits
Required Courses		
MKBU 3225	Marketing Principles	3
MKBU 3435	Consumer Behavior	3
Electives		
<i>Two upper-level marketing courses</i> ¹		6
<i>One liberal arts elective from the list below:</i>		3 to 4
PSYC 2600	Social Psychology	
PSYC 3410	Creativity ²	
PSYC 4310	Aging and Society ²	
PSYC 4920	Youth, Values, and Society	
SOCI 1100	Introduction to Sociology	
SOCI 2800	Sociological Theory	
SOCI 3102	Contemporary Social Issues and Policies	
SOCI 4408	Diversity in American Society	
ANTH 1100	Introduction to Cultural Anthropology	
ANTH 3351	Comparative Cultures	
ANTH 3470	People and Cultures of Latin America	
<i>One of the following two options:</i>		3 to 4

PSYC 2000 Statistics³

One additional upper-level marketing course¹

- ¹ Any course with subject code MKBU (p. 1463) numbered 3226 or higher may fulfill this requirement.
- ² Requires PSYC 1200 Foundations of Psychology as a pre-requisite.
- ³ Students whose major requires a statistics course may substitute the statistics course from their major. All others choosing this option must take PSYC 2000 Statistics.

Mathematics

The Mathematics Department offers both a major and a minor in Mathematics. The major prepares students for graduate studies or employment in a variety of fields dependent on quantitative and analytical skills. In addition, a student may prepare for teaching mathematics at the middle/high school level by selecting the Accelerated Master's in Teaching Program (p. 709), offered jointly with the Graduate School of Education. (Students interested in this option should seek advising as soon as possible).

The Departments of Mathematics and Economics offer a joint major (p. 315). The Departments of Mathematics and Computer and Information Sciences also offer a joint major (p. 313).

Program Activities

The department sponsors student chapters of Pi Mu Epsilon (the national mathematics honors society) and MAA (Mathematical Association of America). In addition, the Math Club sponsors meetings on interesting topics in mathematics and career possibilities. There are opportunities for summer research projects.

For more information

Visit the Mathematics department web page.

Contribution to the Core

The Core Curriculum requirement in mathematical reasoning may be satisfied by one of the following:

Course	Title	Credits
MATH 1100	Finite Mathematics ¹	3
MATH 1203	Applied Calculus I ¹	3
MATH 1206	Calculus I	4
MATH 1207	Calculus II	4
MATH 1700	Mathematical Modelling	4

- ¹ MATH 1100 Finite Mathematics and MATH 1203 Applied Calculus I have no college-level prerequisites

Majors in biology, chemistry, computer science, economics, general science, natural science, physics, and psychology should consult with their department advisers, as these majors have specific mathematics requirements. Students in the Gabelli School of Business take MATH 1108 Math for Business: Finite and MATH 1109 Math for Business: Calculus. Gabelli students interested in a math minor should take MATH 1206 Calculus I or MATH 1207 Calculus II in place of MATH 1109 Math for Business: Calculus.

Incoming first years are placed in mathematics courses based on their standardized test scores and their high school transcript record.

Programs

- Mathematics Major (p. 314)
- Mathematics and Computer & Information Sciences Major (p. 313)
- Interdisciplinary Math & Economics Major (p. 315)
- Mathematics Minor (p. 315)

Math and Computer & Information Sciences Major

The major, offered jointly by the Department of Computer and Information Sciences (p. 219) and the Department of Mathematics (p. 312), is designed to give students an excellent background in computer science and a solid foundation in those mathematical disciplines necessary for a full understanding of computer and information sciences. The program fosters both careful reasoning and a deep understanding of technology, enhancing graduates' marketability. The high degree of difficulty makes this joint major attractive to recruiters from the technology industry; it also prepares students who wish to pursue graduate study in computer science and other applied quantitative fields. Please note: There is no minor in this area; students are instead encouraged to minor in either mathematics or computer and information sciences.

Internships

Some majors in this program have completed internships, but such internships are not required and do not count toward the two electives in the major.

For more information

Visit the Math and Computer & Information Sciences program page.

CIP Code

27.9999 - Mathematics and Statistics, Other.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

A minimum grade of C- is required for each course counting toward this joint major. An overall average of 2.0 must be separately maintained in mathematics and computer and information sciences courses.

Required courses and sufficient electives to fulfill the major are available on both campuses. Course descriptions are available from each department.

Majors in this program are eligible for honors at graduation in mathematics and computer & information sciences.

The major requires 14 total courses: 10 common required courses, two courses in one concentration, and two electives. *Students must declare a*

concentration in mathematics or computer and information sciences. The 10 common required courses are identified below.

Course	Title	Credits
Required Courses		
CISC 1600 & CISC 1610	Computer Science I and Computer Science I Lab ¹	4
CISC 2000 & CISC 2010	Computer Science II and Computer Science II Lab	4
CISC 2200	Data Structures	4
CISC 4080	Computer Algorithms	4
CISC 4090	Theory of Computation	4
MATH 1207	Calculus II	4
MATH 2004	Multivariable Calculus I	4
MATH 2001	Discrete Mathematics	4
MATH 2006	Linear Algebra I	4
MATH 4006	Numerical Analysis	4

Electives

Select two electives in mathematics (four credit courses numbered above 2000) or computer and information sciences (numbered above 2000, possibly including 5000-level graduate courses) ²

Concentration

Select one of the following:

- Mathematics Concentration
- Computer and Information Sciences Concentration

¹ Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.

² At least one elective must be from mathematics if the computer and information sciences concentration is chosen and at least one elective must be in computer and information sciences if the mathematics concentration is chosen. The following courses may not count toward this requirement: CISC 4001 Computers and Robots in Film, CISC 4650 Cyberspace: Issues and Ethics, and CISC 4660 Minds, Machines, and Society.

Concentrations

Each student must also take two courses from one of the following two concentrations. Courses from the concentration not chosen may be used as electives.

Mathematics Concentration

Course	Title	Credits
Select two of the following: 8		
MATH 3006	Probability	
MATH 3007	Statistics	
MATH 3002	Differential Equations	
MATH 4022	Partial Differential Equations	

Computer and Information Sciences Concentration

Course	Title	Credits
Select two of the following: 8		
CISC 3500	Database Systems	
CISC 3593	Computer Organization	

CISC 3595	Operating Systems
CISC 4597	Artificial Intelligence
CISC 4615	Data Communications and Networks
CISC 4631	Data Mining

Availability

The major in math and computer & information sciences is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in math and computer & information sciences only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Mathematics Major Requirements

Eleven courses beyond Calculus 1 and Calculus 2 are required to receive the Bachelor of Arts in mathematics.

Course	Title	Credits
Required Courses		
MATH 2001	Discrete Mathematics	4
MATH 2004	Multivariable Calculus I	4
MATH 2006	Linear Algebra I	4
MATH 3005	Abstract Algebra I	4
Computer Programming (choose one of the following options):		
<i>Option 1</i>		
MATH 2011	Programming for Math and Science	
<i>Option 2 (if chosen, both sequences are required)</i>		
CISC 1600 & CISC 1610	Computer Science I and Computer Science I Lab	
CISC 2000 & CISC 2010	Computer Science II and Computer Science II Lab	
Concentration		
Select one of the following concentrations:		16
<i>Pure Mathematics Concentration</i>		
MATH 3001	Linear Algebra II	
MATH 3003	Real Analysis	
MATH 3004	Complex Analysis	
MATH 4009	Topics in Geometry	
<i>Applied Mathematics Concentration</i>		
MATH 3002	Differential Equations	
MATH 3006	Probability	
MATH 3007	Statistics	

MATH 4006 Numerical Analysis

Electives

Select two electives. Must be four credit MATH courses numbered 2000 or higher ¹

¹ Any course with the MATH subject code may fulfill this requirement.

Additional Information

To graduate with a mathematics major, a student must have a cumulative grade point average of at least 2.0 in all courses in the major.

Prospective mathematics majors should consult with the chair before constructing a plan of study.

Bachelor of Science Degree

The above courses are required to receive the degree of Bachelor of Arts in mathematics. To receive the Bachelor of Science degree, students must also complete **one of the following nine sequences** of courses; all courses listed under the chosen option (1-9) must be completed:

Course	Title	Credits
For Rose Hill students:		
<i>(1) Introductory Biology</i>		
BISC 1403 & BISC 1413	Introductory Biology I and Introductory Biology Lab I	5
BISC 1404 & BISC 1414	Introductory Biology II and Introductory Biology Lab II	5
<i>(2) General Chemistry</i>		
CHEM 1321 & CHEM 1311 & CHEM 1331	General Chemistry I and General Chemistry I Recitation and General Chemistry Lab I	6
CHEM 1322 & CHEM 1312 & CHEM 1332	General Chemistry II and General Chemistry II Recitation and General Chemistry Lab II	6
<i>(3) Introduction to Physics</i>		
PHYS 1601 & PHYS 1603 & PHYS 1511	Introduction to Physics I and Introduction to Physics I Recitation and Physics I Lab	5
PHYS 1602 & PHYS 1604 & PHYS 1512	Introduction to Physics II and Introduction to Physics II Recitation and Physics II Lab	5
<i>(4) Physics</i>		
PHYS 1701 & PHYS 1703 & PHYS 1511	Physics I and Physics I Recitation and Physics I Lab	4
PHYS 1702 & PHYS 1704 & PHYS 1512	Physics II and Physics II Recitation and Physics II Lab	4
For Lincoln Center students:		
<i>(5) General Biology</i>		
NSCI 1403 & NSCI 1413	General Biology Lecture I and General Biology Lab I	5
NSCI 1404 & NSCI 1414	General Biology Lecture II and General Biology Lab II	5
<i>(6) Concepts in Biology</i>		
NSCI 1423 & NSCI 1433	Concepts in Biology Lecture I and Concepts in Biology Lab I	5

NSCI 1424 & NSCI 1434	Concepts in Biology Lecture II and Concepts in Biology Lab II	5
--------------------------	--	---

(7) General Chemistry

NSCI 1321 & NSCI 1331	General Chemistry Lecture I and General Chemistry Lab I	6
--------------------------	--	---

NSCI 1322 & NSCI 1332	General Chemistry Lecture II and General Chemistry Lab II	6
--------------------------	--	---

(8) Physics I and II

NSCI 1701 & NSCI 1703 & NSCI 1511	Physics I and Physics I Recitation and General Physics Lab I	4
---	--	---

NSCI 1702 & NSCI 1704 & NSCI 1512	Physics II and Physics II Recitation and General Physics Lab II	4
---	---	---

(9) Honors Natural Science

Both of the below courses include a lab component.

HPLC 1603	Honors: Natural Science I	4
-----------	---------------------------	---

HPLC 1604	Honors: Natural Science II	4
-----------	----------------------------	---

Availability

The major in mathematics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in mathematics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

27.0101 - Mathematics, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Mathematics Minor

Requirements

Requirements for Gabelli School of Business students

Course	Title	Credits
MATH 1108	Math for Business: Finite	3
MATH 1206	Calculus I ¹	4

MATH 1207	Calculus II	4
-----------	-------------	---

Select three four-credit MATH courses numbered above 2000

¹ Either MATH 12AB Transfer Calculus AB or MATH 12BC Transfer Calculus BC (transfer credit from AP Calculus AB or AP Calculus BC), but not both, may fulfill this requirement.

Gabelli students with advanced placement or who have already completed MATH 1109 Math for Business: Calculus should consult with the department chair.

Requirements for all other students

Course	Title	Credits
--------	-------	---------

Select six MATH courses, three of which must be numbered above 2000^{1,2}

¹ MATH 1108 Math for Business: Finite, MATH 1109 Math for Business: Calculus, MATH 1203 Applied Calculus I, and MATH 1204 Applied Calculus II cannot be used.

² Either MATH 12AB Transfer Calculus AB or MATH 12BC Transfer Calculus BC (transfer credit from AP Calculus AB or AP Calculus BC), but not both, may fulfill this requirement as a course below the 2000 level.

Students majoring in mathematics and computer & information science who minor in mathematics may not apply any of the courses used for the major toward the minor.

Availability

The minor in mathematics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in mathematics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Interdisciplinary Math & Economics Major

This major, offered jointly by the departments of economics and mathematics, is designed to give the student an excellent background in modern economic analysis and a solid grounding in those mathematical disciplines necessary for a full understanding of economic analysis. Because it both demands and fosters careful reasoning as well as a facility with abstract formulations of problem situations, it is an apt pre-law program. Its high degree of difficulty makes it attractive to business recruiters, and it is particularly appropriate for graduate studies in economics, business, and other applied quantitative fields.

Program Activities

Majors in this program are eligible for honors at graduation in interdisciplinary math & economics. Some majors in this program have done internships at banks or investment firms. Such internships are not required and do not count among the four electives in the major.

For more information

Visit the interdisciplinary math & economics program page.

CIP Code

27.9999 - Mathematics and Statistics, Other.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Students enrolled in this program are required to take the following courses:

Course	Title	Credits
Required Courses		
ECON 1100	Principles of Macroeconomics	3
ECON 1200	Principles of Microeconomics	3
ECON 3116	Intermediate Macroeconomics	4
ECON 3118	Intermediate Microeconomics	4
MATH 1207	Calculus II	4
MATH 2004	Multivariable Calculus I	4
MATH 2001	Discrete Mathematics	4
MATH 2006	Linear Algebra I	4
Select one of the following:		
MATH 3006 & MATH 3007	Probability and Statistics	
ECON 2140 & ECON 2142	Statistics I and Statistics II	

Electives

Select four electives in mathematics or economics. Any course with the MATH subject code (must be 4 credits and numbered 2000 or higher) or the ECON subject code may fulfill this requirement. Of these four courses, at least one course must be in mathematics and one must be in economics.

Required courses and sufficient electives to fulfill the major are available on both campuses.

Availability

The major in interdisciplinary math & economics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in interdisciplinary math & economics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Medieval Studies

The medieval studies major is interdisciplinary in nature and enables the student to develop an integrated understanding of medieval civilization through the study of its history, art, music, literature, ways of thought, and religion. Beyond its intrinsic interest, such an understanding of a premodern society provides comparisons and contrasts that shed light on modern values and assumptions, and on the origins of many modern institutions. As is the case with liberal arts majors in general, medieval studies majors finish their course of study well prepared for professional careers that require cultural awareness and critical thinking.

Program Activities

The Center for Medieval Studies sponsors an annual lecture series and conference, and hosts receptions and class visits to medieval exhibits and collections in the area.

For more information

Visit the Medieval Studies program web page.

Programs

- Medieval Studies Major (p. 316)
- Medieval Studies Minor (p. 319)

Medieval Studies Major

The major consists of 10 courses drawn from seven departments: art history and music, classics, English, history, languages and cultures, philosophy, and theology. Six courses are required, as follows, with examples of departmental and program offerings that fill the requirement. The final selection of four elective courses should be determined in consultation with program advisers. A thesis option (p. 316) is also available for students interested in pursuing an ambitious research project as part of the major.

CIP Code

30.1301 - Medieval and Renaissance Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The major requires ten courses.

Course	Title	Credits
HIST 1300	Understanding Historical Change: Medieval	3
One course required from each of the following sections:		15 to 20
	Medieval Literature	
	Medieval Philosophy	
	Medieval Theology	
	Medieval Art or Music	
	Medieval Language	
Four additional elective courses ¹		12 to 16

¹ Any course with the MVST subject code or the MVST attribute code may fulfill this requirement.

In consultation with the director or the associate director, students may be encouraged to take 5000-level courses (graduate courses open to undergraduates) in related departments.

Senior Thesis Option

The program offers a senior thesis option in Medieval Studies for senior Medieval Studies majors with a 3.0 GPA or higher in Medieval Studies who wish to complete an ambitious project under the direction of a faculty member.

Interested students should discuss this option with the undergraduate chair of Medieval Studies, as well as with a potential faculty adviser, and then submit an application to be evaluated by the undergraduate chair and potential adviser prior to the semester in which the thesis will be completed.

To write a thesis in the spring semester, students must submit the application by October 15 of the previous semester; to write a thesis in the fall semester, students must submit the application by March 1 of the previous semester.

If the application is approved, the undergraduate chair will authorize the student to register for MVST 4997 Medieval Studies Honors Thesis Tutorial, which counts as an elective toward the major (but will not replace any major requirements). Students will write the thesis over the course of one semester, at the end of which there will be a defense of the thesis with the adviser and one program reader. For more information, visit the Medieval Studies website.

Double Majors

Double majors are given greater flexibility in fulfilling the major requirements. Up to two courses may also count toward both the Medieval studies major and the second major. Students who choose medieval studies as a double major also complete 10 courses, including the following:

Course	Title	Credits
HIST 1300	Understanding Historical Change: Medieval	3

One course in each of the following areas:

Medieval Literature or Medieval Language

Medieval Philosophy or Medieval Theology

Medieval Art/Music

Six electives

Medieval Literature

Courses in this group have the MVL I attribute.

Course	Title	Credits
COLI 3010	Politics and Poetry in the Middle Ages: The Rise of Vernacular Culture in the Mediterranean	4
COLI 3031	Medieval Monsters	4
COLI 3123	Surviving the Barbarians in Early Medieval Britain	4
COLI 3135	Irish and British High Medieval Literature: Connections and Comparisons	4

COLI 3145	Medieval Love in Comparison: Christian, Jewish, and Muslim Perspectives	4
COLI 3146	Science and Magic in Medieval Literature	4
COLI 3440	Arabic Literature in English Translation	4
ENGL 3031	Medieval Monsters	4
ENGL 3100	Medieval Literature	4
ENGL 3102	Medieval Drama	4
ENGL 3103	Early English Drama	4
ENGL 3104	Medieval English Blackness?	4
ENGL 3105	"Game of Thrones" and the Modern Medieval	4
ENGL 3107	Chaucer	4
ENGL 3109	Arthurian Literature	4
ENGL 3111	Medieval Romance and Adventure	4
ENGL 3113	Introduction to Old English	4
ENGL 3114	The (Medieval) Walking Dead	4
ENGL 3115	Medieval Women Writers	4
ENGL 3121	The Pearl Poet and His Book	4
ENGL 3123	Surviving the Barbarians in Early Medieval Britain	4
ENGL 3125	Beowulf in Old English	4
ENGL 3127	Dreams in Middle Ages	4
ENGL 3131	Medieval Tolerance and Intolerance	4
ENGL 3134	Love in the Middle Ages	4
ENGL 3135	Irish and British High Medieval Literature: Connections and Comparisons	4
ENGL 3136	Medieval Mystics	4
ENGL 3140	Myth of the Hero: Medieval Memory	4
ENGL 3144	Other Worlds	4
ENGL 3145	Medieval Love in Comparison: Christian, Jewish, and Muslim Perspectives	4
ENGL 3146	Science and Magic in Medieval Literature	4
ENGL 4005	The Medieval Traveler	4
ENGL 4019	Seminar: Love Letters from Ovid's <i>Heroides</i> to Heloise's Letters to Abelard	4
ENGL 4027	Seminar: Race, Ethnicity, and Contact in Early Medieval Ireland and Britain	4
ENGL 4096	Hobbits/Heroes/Hubris	4
ENGL 4141	Death in the Middle Ages	4
ENGL 4142	Contemplating the Cloisters	4
ENGL 4148	Medieval Drama in Performance	4
ENGL 4151	Performing Medieval Drama	4
FREN 3100	Medieval French Literature	4
FREN 3103	Medieval Other, Modern Ethics: Christians, Muslims, and Jews in Medieval France	4
GERM 3057	Medieval German Literature: Potions, Passions, Players, and Prayers	4
ITAL 3011	Dante and His Age	4
ITAL 3012	Medieval Storytelling	4
LATN 3041	Ovid	4
LATN 3060	Readings in Vergil	4
MLAL 3010	Politics and Poetry in the Middle Ages: The Rise of Vernacular Culture in the Mediterranean	4

MLAL 3012	Medieval Storytelling	4
MLAL 3057	Medieval German Literature: Potions, Passions, Players, and Prayers	4
MLAL 3203	Dante and His Translators	4
MLAL 3440	Arabic Literature in English Translation	4
MLAL 4006	Dante's Cosmos: Medieval Science, Theology, and Poetry in the Divina Commedia	4
MVST 1210	Literature and Society	3
MVST 3057	Medieval German Literature: Potions, Passions, Players, and Prayers	4
MVST 3102	Medieval Women Writers	4
MVST 3500	The Knights of the Round Table	4
MVST 3501	Between Conquest and Convivencia: The Spanish Kingdoms of the Middle Ages	4
MVST 4005	The Medieval Traveler	4
MVST 4008	Medieval Autobiographies	4
SPAN 3540	Spain and Islam	4
THEA 4148	Medieval Drama	4
THEA 4151	Performing Medieval Drama	4

Medieval Philosophy

Courses in this group have the MVPH attribute.

Course	Title	Credits
MLAL 3535	Building the Ideal City: Ethics and Economics Foundations of Realizable Utopias	4
MVST 3552	Medieval Philosophy	4
MVST 3590	Medieval Political Philosophy	4
MVST 4003	War and Peace: Just War Theory	4
PHIL 3520	Philosophy of Aristotle	4
PHIL 3525	Philosophy of Plato	4
PHIL 3530	Philosophy After Constantine	4
PHIL 3552	Medieval Philosophy	4
PHIL 3557	Confessions of Augustine	4
PHIL 3559	Dante and Philosophy	4
PHIL 3560	Philosophy of Aquinas	4
PHIL 3565	Four Medieval Thinkers	4
PHIL 3570	Beauty in the Middle Ages	4
PHIL 3591	Medieval Political Philosophy	4
PHIL 3753	Philosophy of the Islamic World	4
PHIL 3910	Shakespeare and Aquinas	4
PHIL 4442	Fantasy and Philosophy	4
PHIL 4473	War and Peace: Just War Theory	4

Medieval Theology

Courses in this group have the MVTH attribute.

Course	Title	Credits
HIST 3204	Sex & Celibacy in the Middle Ages	4
MVST 3501	Between Conquest and Convivencia: The Spanish Kingdoms of the Middle Ages	4
MVST 4006	Dante's Cosmos: Science, Theology, and Literature	4

THEO 1006	Sin and Salvation in Medieval Theology	3
THEO 3100	Introduction to Old Testament / Tanakh	3
THEO 3102	Book of Genesis	3
THEO 3105	The Torah	3
THEO 3120	The Prophets	3
THEO 3200	Introduction to New Testament	3
THEO 3207	The First Three Gospels	3
THEO 3212	Gospel of John	3
THEO 3310	Early Christian Writings	3
THEO 3314	St. Augustine of Hippo	3
THEO 3316	Byzantine Christianity	3
THEO 3320	Augustine, Aquinas, and Luther	3
THEO 3330	Medieval Theology Texts	3
THEO 3332	Christians, Muslims, Jews in the Medieval Period	3
THEO 3340	Christian Mystical Texts	3
THEO 3345	The Book of Revelation	3
THEO 3620	Great Christian Hymns	3
THEO 3711	Sacred Texts of the Middle East	3
THEO 3713	Classic Jewish Texts	3
THEO 3715	Classic Islamic Texts	3
THEO 3833	Christian Thought and Practice II	4
THEO 3849	Eschatology	4
THEO 4430	Sex, Gender, and Sexuality in Early Christianity	4

Medieval Art or Music

Courses in this group have the MVAM attribute.

Course	Title	Credits
ARHI 2230	Islamic Art	4
ARHI 2250	Ancient American Art	4
ARHI 2320	The Fall of Ancient Rome: A Material Culture Investigation	4
ARHI 2341	Medieval Desire and Devotion	4
ARHI 2360	Illuminated Manuscripts	4
ARHI 2365	Medieval Art and the Museum	4
ARHI 2370	Art and Science in the Middle Ages	4
ARHI 2410	Northern Renaissance Art	4
ARHI 3350	Age of Cathedrals	4
ENGL 4142	Contemplating the Cloisters	4
MUSC 3110	Music Before 1600	4
MUSC 3111		4
MVST 2360	Illuminated Manuscripts	4
MVST 3215	Medieval Fashion and Its Meanings	3
MVST 4100	Modern Sounds, Early Music	4
THEO 4420	Early Christian Art in Context	4

Medieval Language

Typically classical or medieval Latin, Old English, Old French, or, in consultation with the director, another medieval language.

Courses in this group have the MVLA attribute.

Course	Title	Credits
ARAB 1001	Introduction to Arabic	5
ARAB 1501	Intermediate Arabic I	3
ARAB 1502	Intermediate Arabic II	3
ARAB 2001	Arabic Language and Literature	3
ENGL 3834	History of the English Language	4
GREK 1001	Introduction to Greek I	3
GREK 1002	Introduction to Greek II	3
GREK 1004	Intensive Ancient Greek	4
GREK 1501	Intermediate Greek I	3
GREK 2001	Greek Language and Literature	3
HEBW 1001	Introduction to Hebrew I	5
HEBW 1501	Intermediate Hebrew I	3
HEBW 1502	Intermediate Hebrew II	3
HEBW 2001	Hebrew Language and Literature I	3
LATN 1001	Introduction to Latin I	3
LATN 1002	Introduction to Latin II	3
LATN 1004	Intensive Latin	4
LATN 1501	Intermediate Latin I	3
LATN 2001	Latin Language and Literature	3
LATN 3021	Roman Love Poetry	4
LATN 3041	Ovid	4
LATN 3060	Readings in Vergil	4
LATN 3061	Christian Latin	4
LATN 3300	Advanced Latin	4
LATN 5542	Medieval Latin Literature	4
THEO 1050	Syriac Language and Literature I	3

Availability

The major in medieval studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies students may major in medieval studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Medieval Studies Minor Requirements

A minor in medieval studies requires the following six courses:

Course	Title	Credits
HIST 1300	Understanding Historical Change: Medieval	3
Select one course in each of the following areas: ¹		
	Medieval Literature	

Medieval Philosophy or Theology
Medieval Art, Music, or Language
Elective
Select two elective courses ²

¹ Courses that count toward these requirements are listed under the requirements of the Medieval Studies major (p. 316).

² Any course with the MVST subject code or the MVST attribute code may fulfill this requirement.

Availability

The minor in medieval studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies students may minor in medieval studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Middle East Studies

The Middle East studies program is an intercampus, interdisciplinary major that is designed to provide a broad background in the language, literature, history, religion, anthropology, politics, economics, and art of the Middle East and North Africa (defined to include all the countries of the Arabic-speaking world plus Israel, Turkey, and Iran) from ancient times to the present. Through exposure to several disciplines, this University-wide liberal arts curriculum both provides a rich background for work in business, diplomacy, government, philanthropy, and education and prepares students for advanced work in one of the disciplines.

For more information

Visit the Middle East Studies program web page.

Contribution to the Core

Middle East studies offers Arabic courses, which, when taken in sequence through to the exit level (ARAB 2001 Arabic Language and Literature), will fulfill the foreign language core requirement. The descriptions for all Arabic language courses can be located in the Languages and Cultures section (p. 285) of this bulletin. In addition, the program offers courses that will fulfill the Global Studies core requirement.

Programs

- Middle East Studies Major (p. 319)
- Middle East Studies Minor (p. 320)

Middle East Studies Major

Few parts of our world are more in the news or more vital to the international interests of the United States than the Middle East. Business, mass media, law firms, governmental and non-governmental bodies, philanthropic organizations, relief and aid agencies, human rights groups, and graduate and professional schools are all eager to recruit individuals well-versed in the complexities and intricacies of Middle Eastern/North African culture, history, religion, civilization, economics, and politics.

Fordham University is one of the few institutions of higher learning in the United States that offers an interdisciplinary, intercampus, undergraduate

major in Middle Eastern studies. This program trains and equips students to step into challenging positions related to Middle East affairs.

CIP Code

05.0108 - Near and Middle Eastern Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

All majors must complete a minimum of eight one-semester courses composed of the following:

Course	Title	Credits
Required Courses		
THEO 3711 or THEO 3715	Sacred Texts of the Middle East Classic Islamic Texts	3
MEST 2000	Introduction to the Modern Middle East	4
MEST 4001	Seminar: Middle East	4
Electives		
Select five electives ¹		

¹ Any course with the MEST subject code or the MEST attribute code may fulfill this requirement.

Majors and minors are strongly advised to study a Middle Eastern language. Modern standard Arabic is regularly offered in the college and will satisfy the college's language proficiency requirement. If a student has satisfied the language proficiency requirement through a non-Middle Eastern language, as many as two courses in a Middle Eastern language may be counted toward the eight-course requirement for the major and six-course requirement for the minor.

Availability

The major in Middle East studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in Middle East studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Middle East Studies Minor Overview

Few parts of our world are more in the news or more vital to the international interests of the United States than the Middle East. Business, mass media, law firms, governmental and non-governmental bodies, philanthropic organizations, relief and aid agencies, human rights groups, graduate and professional schools are all eager to recruit individuals well-versed in the complexities and intricacies of Middle Eastern/North African culture, history, religion, civilization, economics, and politics.

Fordham University is one of the few institutions of higher learning in the United States that offers an interdisciplinary, intercampus, undergraduate major in Middle Eastern studies. This program trains and equips students to step into challenging positions related to Middle East affairs.

Requirements

All students who minor in Middle East studies must complete a minimum of six courses composed of the following:

Course	Title	Credits
Required Courses		
THEO 3711 or THEO 3715	Sacred Texts of the Middle East Classic Islamic Texts	3
MEST 2000	Introduction to the Modern Middle East	4
MEST 4001	Seminar: Middle East	4
Electives		
Select three electives ¹		

¹ Any course with the MEST subject code or the MEST attribute code may fulfill this requirement.

Majors and minors are strongly advised to study a Middle Eastern language. Modern standard Arabic is regularly offered in the college and will satisfy the college's language proficiency requirement. If a student has satisfied the language proficiency requirement through a non-Middle Eastern language, as many as two courses in a Middle Eastern language may be counted toward the eight-course requirement for the major and six-course requirement for the minor.

Availability

The minor in Middle East studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in Middle East studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Music

Note: "Art History and Music" is a single academic department at Fordham, but the academic information for each subject is listed on a separate web page. Information about art history programs is listed under art history (p. 180).

The music major offers students the opportunity to study music historically as a force in the shaping of culture and technically as a

practical skill, craft, and art. Emphasizing music as a humanistic pursuit integrated into the liberal arts curriculum, it covers a range of courses that include music history, theory, composition, and performance. While the program offers ample opportunities to take private lessons and to participate in campus performance ensembles, it leads to an academic B.A. degree rather than a performance-oriented one. Students are prepared to go on to graduate school, seek careers in music education, and pursue professions that combine music with other fields of study.

No course in which the student earns a grade of D or F may be used toward a departmental major or minor.

Double Majors

The music major can be combined with other courses of study, including a double major. A music major interested in a career in the music industry or in arts management, for example, might consider taking economics or business courses related to the arts. Fordham's Gabelli School of Business offers a minor in business that can be combined with the music major.

Program Activities

Internships

Music majors can receive credit for a music internship with a recording company or concert agency in New York City during their junior or senior years. With the approval and supervision of the department, majors may receive elective credit for one internship graded on a pass/fail basis.

For more information

Visit the music department web page.

Contribution to the Core

The music program offers MUSC 1100 Introduction to Music History, which fulfills the fine arts core requirement. This course has sections that focus on different geographical areas and traditions. It is also available as an Eloquentia Perfecta 1 Seminar. In addition, the department offers American pluralism and global studies courses each year as well as a variety of EP3, EP4, and ICC courses.

Programs

- Music Major (p. 321)
- Music Minor (p. 322)

Music Major

Requirements

The music major program consists of 10 one-semester departmental courses and four semesters of campus-based vocal or instrumental ensembles:

Course	Title	Credits
MUSC 1100	Introduction to Music History ¹	3
MUSC 2140 & MUSC 2141	Fundamentals of Keyboard Musicianship and Keyboard Lab	4
MUSC 2145	Music Theory I	4
MUSC 2146	Music Theory II	4
MUSC 2147	Music Theory III (or designated equivalent)	4

Select three of the following:	12
MUSC 3031	Rock and Pop Music Since World War II
MUSC 3110	Music Before 1600
MUSC 3121	Baroque Music: Music Between Ancients and Moderns
MUSC 3122	Music, Enlightenment, and Revolution
MUSC 3123	Music & the Age of Romanticism
MUSC 3124	Music of the Modernist Age
MUSC 3130	Race and Gender in Latin American Popular Music
MUSC 3200	Ethnomusicology: Methods and Practices
One of the following two options: ²	8
Two electives at the 2000-level or higher	
One 2000-level elective plus four semesters of individual instruction	
Select four semesters of performance in a campus-based vocal or instrumental ensemble	4

¹ Students in the FCRH Honors Program (p. 68) may fulfill this requirement with HPRH 1204 Foundational Topics: Art/Music History.

² Credits earned in MUSC 1231 Chamber Music Instruction may count towards this requirement. In addition, credits from any course with the subject code JUIL (p. 1431) may count towards this requirement as a Music elective.

³ MUSC 1231 Chamber Music Instruction does not count as an ensemble towards this requirement.

Individual Instruction

Music majors may apply four semesters/sections of private vocal/instrumental instruction toward the elective requirement. Majors must enroll in one-credit sections of lessons in order to qualify for course credit toward the major. Majors who wish to continue beyond four semesters/sections should enroll, beginning with their fifth semester/section of lessons, in zero-credit sections. Majors who do not intend to complete the four one-credit courses should only enroll in zero-credit sections.

Students will be charged the cost of lessons; applicable fees or rates are published on the music department website.

Course	Title	Credits
MUSC 1260	Vocal Instruction: Classical	1
MUSC 1261	Vocal Instruction: Jazz	1
MUSC 1262	Instrumental Instruction: Piano Classical	1
MUSC 1263	Instrumental Instruction: Piano Jazz	1
MUSC 1264	Instrumental Instruction: Guitar Classical	1
MUSC 1265	Instrumental Instruction: Guitar Jazz	1
MUSC 1266	Instrumental Instruction: Flute	1
MUSC 1267	Instrumental Instruction: Clarinet	1
MUSC 1268	Instrumental Instruction: Brass Horns/Saxophone	1
MUSC 1269	Instrumental Instruction: Violin/Viola	1
MUSC 1270	Instrumental Instruction: Cello	1
MUSC 1273	Instrumental Instruction: Miscellaneous	1
MUSC 1274	Organ Instruction	1
MUSC 1280	Instrumental Instruction: Drums	1

Theory Courses

The theory courses, which must be taken in sequence, are offered on a two-year cycle. Students unprepared for MUSC 2145 Music Theory I are required to take MUSC 2120 Introduction to Music Theory, which will not apply toward the major.

Students with keyboard proficiency may, upon approval from the department, substitute Keyboard Musicianship (MUSC 2140/2141) with a music elective.

Performance

Music majors must participate in a minimum of four semesters/sections of performance; they may choose from among the faculty-led vocal and instrumental ensembles listed below. Majors must enroll in one-credit sections of ensembles in order to fulfill the requirement. Majors who wish to continue beyond four semesters/sections should enroll, beginning with their fifth semester/section, in zero-credit sections.

Some ensembles carry a lab fee: applicable fees or rates are published on the music department website.

Course	Title	Credits
MUSC 1241	Concert Choir-Rose Hill	1
or MUSC 1242	Concert Choir-Lincoln Center	
MUSC 1245	Women's Choir	1
MUSC 1281	Orchestra	1
MUSC 1291	Jazz Ensemble	1
or MUSC 1301	Jazz Orchestra	
MUSC 1300	Chamber Orchestra	1
MUSC 1302	Afro-Latin Music Ensemble	1
MUSC 1303	Collegium Musicum	1

Coached Chamber Music

Students can enjoy playing chamber music together in a coached group (MUSC 1231). The groups are coached by Fordham's network of private music teachers and count as a kind of music lessons. Students are placed in appropriate small groups, with up to four players, by instrument and experience. Students will be charged the cost of lessons (lower than individual lessons); applicable fees/rates are published on the music department website.

Availability

The major in music is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in music only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

50.0901 - Music, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Music Minor

Requirements

The department offers a minor consisting of six one-semester departmental courses in music.

Course	Title	Credits
MUSC 1100	Introduction to Music History ¹	3
MUSC 2145	Music Theory I ²	4
Select four additional courses ³		16

¹ Students in the FCRH Honors Program (p. 68) may fulfill this requirement with HPRH 1206 Foundational Topics: Music History.

² Students with advanced proficiency may, with advisor permission, fulfill this requirement with MUSC 2146 Music Theory II.

³ Any course with the MUSC subject code may fulfill this requirement. In addition, credits from any course with the subject code JUUL (p. 1431) may count towards this requirement as a Music elective.

Music minors are also eligible to participate in the Private Vocal/Instrumental Instruction or Music Ensemble programs (see the music major (p. 321) page for options), but may only take up to four semesters/sections for credit (one credit each, on a pass/fail basis). The four one-credit semesters/sections of lessons or ensemble may replace a single four-credit music elective.

Minors must enroll in one-credit sections of lessons and ensembles in order to qualify for course credit toward the minor.

Minors who wish to continue beyond four semesters/sections should enroll, beginning with their fifth semester/section, in zero-credit sections of lessons. Minors who do not intend to complete the four one-credit courses should only enroll in zero-credit sections.

Students will be charged the cost of lessons; some ensembles carry lab fees. Applicable fees/rates are published on the music department website.

Availability

The minor in music is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in music only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Natural Sciences

The department offers a major in natural science, which is designed for students who wish to complete their academic training at the bachelor's level in STEM and/or who plan to continue to graduate or

professional schools. The major is designed to provide the students with a flexible program, enabling the graduate to pursue a variety of careers, including medicine, dentistry, veterinary medicine, or graduate training in STEM-related fields. Students may also major in other disciplines while completing the pre-health program. Beyond this, the major also serves the integrative neuroscience, environmental science, and the 3-2 engineering programs, as well as the biochemistry major/minor.

Other Programs and Majors Served by the Natural Sciences Department

1. Integrative Neuroscience (p. 270), Environmental Science (p. 242), and Biochemistry (p. 193) majors: The department serves the students from these majors by offering basic and upper-level courses to fulfill their major requirements, and by mentoring students in these majors in research. Students should consult with their program director for advice on course selection.
2. Pre-Health Program: Students interested in pre-health should consult the recommended Fordham College at Lincoln Center Pre-Health professions curriculum guidelines. All of the pre-health courses can be taken as NSCI subject code courses within the natural sciences department, except for Calculus I (MATH 1206) or Applied Calculus I (MATH 1203), which are offered by the mathematics department at Fordham College at Lincoln Center. Students may major in any field and still satisfy their pre-health requirements through the natural sciences department.
3. 3-2 Engineering Program: Interested students should consult with the 3-2 engineering program director for information regarding major courses to be completed in their sophomore and junior years. In general, the program requires one year of calculus-based physics with lab, such as NSCI 1701 Physics I & NSCI 1702 Physics II, and NSCI 1511 General Physics Lab I & NSCI 1512 General Physics Lab II.

Research

Most natural science, environmental science, and integrative neuroscience majors conduct scientific research projects at the Lincoln Center campus or at medical research centers in the vicinity. Students are encouraged to pursue research projects with natural sciences faculty members for academic credit. Students have the opportunity to do research in the following fields:

- Neuroscience
- Genetics
- Ecology
- Chemistry
- Molecular Biology
- Data Sciences

For more information

Visit the natural sciences department web page.

Contribution to the Core

The Department offers the following Core Curriculum courses to non-science majors:

Course	Title	Credits
NSCI 1010	Physical Sciences: From Past to Present	3
NSCI 1020	Physical Science: Today's World	3
NSCI 1030	Human Function and Dysfunction	3
NSCI 1040	People and the Living Environment	3
NSCI 2020	An Introduction to Geology	3

Students are required to take their physical science requirement (NSCI 1010 Physical Sciences: From Past to Present or NSCI 1020 Physical Science: Today's World) before taking their life science requirement (NSCI 1030 Human Function and Dysfunction or NSCI 1040 People and the Living Environment).

NSCI 2020 An Introduction to Geology also counts towards the physical science core requirement. The course is offered every other semester.

Programs

- Natural Science Major (p. 323)

Natural Science Major Overview

The natural science major at Fordham College at Lincoln Center (FCLC) offers a comprehensive and interdisciplinary education, emphasizing undergraduate training through rigorous coursework, lab experiences, and independent research. The department includes faculty members with expertise in chemistry, physics, data science, and biology who teach courses supporting a variety of majors and programs. Students can choose concentrations in chemical sciences, organismal biology, and cell and molecular biology within the natural science major. Beyond the needs of students in the pre-health professions program, the department's courses also fulfill requirements for integrative neuroscience, environmental science, the FCLC Honors Program, the biochemistry major/minor, and the core curriculum. With small class sizes and hands-on lab work, students benefit from personalized attention and mentorship, preparing them for successful careers in medicine, academia, and education.

The Department of Natural Sciences plays a crucial role in the pre-health program at FCLC, offering required courses for students aspiring to enter health professions. Although students can major in any field, they can complete all their pre-health requirements through the Department of Natural Sciences (NSCI), with the exception of Calculus or Applied Calculus, which the mathematics department at FCLC provides. The department's interdisciplinary approach and rigorous training ensure that pre-health students receive a solid foundation in the sciences. By following the recommended curriculum guidelines and engaging in independent research, students are well-prepared for medical school and other health-related graduate programs.

CIP Code

30.0101 - Biological and Physical Sciences.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The following courses are required for the natural science major.

Course	Title	Credits
Required Courses		
NSCI 1403 & NSCI 1413	General Biology Lecture I and General Biology Lab I ¹	5
NSCI 1404 & NSCI 1414	General Biology Lecture II and General Biology Lab II	5
NSCI 1321 & NSCI 1331	General Chemistry Lecture I and General Chemistry Lab I	6
NSCI 1322 & NSCI 1332	General Chemistry Lecture II and General Chemistry Lab II	6
NSCI 1501 & NSCI 1511	General Physics Lecture I and General Physics Lab I	4
NSCI 1502 & NSCI 1512	General Physics Lecture II and General Physics Lab II	4
NSCI 2040	Research Design and Analysis	3
NSCI 3121 & NSCI 3821	Organic Chemistry Lecture I and Organic Chemistry Lab I	6
NSCI 3122 & NSCI 3822	Organic Chemistry Lecture II and Organic Chemistry Lab II	6
NSCI 4222	Science, Technology, and Society Values	4
MATH 1203 or MATH 1206	Applied Calculus I Calculus I	3 to 4

Electives

Select at least six electives. Of these, four must include a lab and two electives do not need to include a lab. Refer to the Electives tab for the complete list of courses offered. ²

¹ NSCI 1423 Concepts in Biology Lecture I and NSCI 1424 Concepts in Biology Lecture II may be substituted, respectively, for NSCI 1403 General Biology Lecture I and NSCI 1404 General Biology Lecture II.

² One Independent Study course, NSCI 4999 Tutorial, substitutes for one upper-level elective lecture plus lab.

Other courses may be counted at the department chair's discretion. It is possible to select electives in order to follow special interests and career goals. This must be done in consultation with the student's departmental adviser. A grade of C- or better is required in all courses taken to fulfill the major. A student may not take the second half of a one-year course if the grade for the first half is below a C-.

Students are advised that the lecture and laboratory components of general biology, general chemistry, general physics, and organic chemistry should always be taken concurrently.

Additionally, natural science majors should take these courses within the natural sciences department (i.e. students should register for NSCI classes). FCLC students should take these courses during the regular day (i.e. before 6 p.m.).

Advanced placement course credit may be substituted in partial fulfillment of these requisites. Students without two semesters' advanced placement in chemistry should note that NSCI 1321 General Chemistry Lecture I and NSCI 1322 General Chemistry Lecture II are prerequisites for NSCI 3121 Organic Chemistry Lecture I and NSCI 3122 Organic Chemistry Lecture II.

Availability

The major in natural science is available at Fordham College at Lincoln Center and Fordham's School of Professional and Continuing Studies at Lincoln Center.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

NSCI 4081	Neurochemistry (Spring, even years)	3
NSCI 3280	Machine Learning Methods for Neural and Biological Data	4

¹ Lecture can be taken without lab, provided the latter is not needed to fulfill the lab elective requirement for the major.

² NSCI 3844 Genetics/Developmental Biology Lab complements either NSCI 3133 Genetics Lecture or NSCI 3154 Cell and Development Biology Lecture, but not both (may be taken concurrently).

³ NSCI 4864 Biological Chemistry/Molecular Biology Lab complements either NSCI 4153 Biological Chemistry Lecture or NSCI 4176 Molecular Biology Lecture, but not both (may be taken concurrently).

Concentrations

Students may pursue one of three concentrations within the major: **chemical sciences (CHS)**, **organismal biology (ORB)**, or **cell and molecular biology (C+M)**. Students may major in natural sciences without declaring a concentration. Students opting for one of the concentrations must fulfill the following additional requirements:

1. One of the four lab electives must be NSCI 4999 Tutorial, in the field of the student's chosen concentration.
2. At least two of the three remaining lab electives must be in classes in the chosen concentration, designated in the table below.
3. At least four of the six electives overall (lab or non-lab) must be in classes in the chosen concentration, designated in the table below.

Courses with the subject code CHEM (p. 1035) are taught by the Chemistry Department and are offered exclusively at the Rose Hill campus.

Elective and Concentration Courses

The following table indicates (a) which courses count toward the required lab elective courses and (b) which courses count toward the respective concentrations in CHS, C+M, and ORB.

Course	Electives including lab (minimum 4)	Electives: No lab	Counts toward CHS	Counts toward C+M	Counts toward ORB
Tutorial	NSCI 4999		X	X	X
Advanced Microbiology	NSCI 4143 / NSCI 4843			X	X
Biology of Aging		NSCI 2018			X
Biological Chemistry	NSCI 4153 / NSCI 4153 / NSCI 4864		X	X	
Cell and Developmental Biology	NSCI 3154 / NSCI 3154 / NSCI 3844			X	X

New Media and Digital Design

Fordham's undergraduate program in new media and digital design combines the forces of communication and media studies, computer and information science, visual arts, creative writing, and the Gabelli School of Business. This interdisciplinary major aims to develop innovators whose career success will be propelled by a fluent understanding of the cultural, aesthetic, and economical applications and implications of design theory and practice in a digital age.

Our faculty are leaders in the fields of digital communication, graphic design, video and multimedia storytelling, computer and information science, and digital business strategy and development. Throughout the program, students will engage a mix of disciplinary areas and learning modes. Through critical analysis, digital research, collaborative discussion, a required internship experience, and hands-on work including an exhibited Capstone Project, they will learn to use contemporary technologies for digital design and production, data management and analysis, expression, persuasion and storytelling, digital marketing, digital entrepreneurship and e-commerce. With our ethical orientation and coursework, all students will explore the ethics and values embedded in contemporary paradigms for designing digital media that operate at intimate, local, and global scales.

For more information

Visit the New Media and Digital Design program web page.

Programs

- New Media and Digital Design Major (p. 326)
- New Media and Digital Design Minor (p. 328)

New Media and Digital Design Major

The major consists of a total of 11 courses with five required courses and six electives. Students declare one of three concentrations: new media and information; art, text and design; new media and commerce, and choose their six electives from their concentration with some flexibility.

As part of the core requirements, all students are required to do at least one internship during the course of their undergraduate careers in order to gain valuable practical experience for future employment. Our unique location in the heart of New York City will allow us to build bridges with the local media industry. In addition, all NMDD students are required to produce a capstone project. These projects are showcased on a curated exhibition website.

CIP Code

09.0702 - Digital Communication and Media/Multimedia.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The total number of courses required for the major is 11.¹

Course	Title	Credits
NMDD 1001	Explorations in Digital Design	3
NMDD 3900	Internship Seminar	4
NMDD 4600	Senior Capstone Seminar	4
One of the following classes: ²		4
NMDD 3150	Creative Coding	
CISC 2350	Information and Web Programming	
CISC 2500	Information and Data Management	
CISC 2530	Digital Video and Multimedia	
CISC 2850	Computer and Data Analysis	
CISC 3300	Internet and Web Programming	
One NMDD Ethics course		3
Four courses from one of the following concentrations:		12
New Media and Information		
Art, Text, and Design		
New Media and Commerce		
Two elective courses ³		6
Total Credits		36

¹ Students may double count a maximum of 2 courses from another major toward their NMDD major.

² Students who take more than one of these courses may apply it to the appropriate concentrations as listed below, with the approval of the Program Director.

³ Any course with the NMDD subject code or the NMDD attribute code may fulfill the elective requirement.

NMDD Ethics courses

Courses in this group have the NMDE attribute.

Course	Title	Credits

Availability

The major in new media and digital design is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Concentrations

A concentration is required. Four courses must be taken for the concentration.

Courses for New Media and Information concentration

Courses in this group have the NMMI attribute.

New Media and Digital Design Minor Requirements

The total number of courses required for the minor is 6.¹

Course	Title	Credits
Required Courses		
NMDD 1001	Explorations in Digital Design	3
Select one of the following courses:		
NMDD 3150	Creative Coding	
CISC 2350	Information and Web Programming	
CISC 2500	Information and Data Management	
CISC 2530	Digital Video and Multimedia	
CISC 2850	Computer and Data Analysis	
CISC 3300	Internet and Web Programming	
Select four additional courses from one of the following groups: ²		
New Media and Information		
Art, Text, and Design		
New Media and Commerce		

¹ Students may double-count a maximum of 1 course from another major or minor toward their NMDD minor.

² The list of courses that apply toward each of these options are the same as those required for the concentrations under the New Media and Digital Design major (p. 326). One course normally counting for the Ethics requirement of the NMDD major may apply toward this requirement, with the approval of the Program Director.

Availability

The minor in new media and digital design is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Lincoln Center.

Orthodox Christian Studies

As an interdisciplinary program, the minor in Orthodox Christian studies explores the artistic, historical, literary, and philosophical and theological aspects of the 2000-year history of Orthodox Christianity.

Program Activities

The minor in Orthodox Christian studies is part of the Orthodox Christian studies program, which also includes the annual Orthodoxy in America Lecture and the Orthodox Christian Fellowship (OCF) student club.

For more information

Visit the Orthodox Christian Studies Center web page.

Programs

- Orthodox Christian Studies Minor (p. 329)

Orthodox Christian Studies Minor

The Orthodox Christian Studies minor is an interdisciplinary minor focusing on the faith, history, and cultural significance of the Orthodox Christian tradition.

No matter your major, critical study of the Orthodox Christian tradition offers insights and context for understanding some of the world's most significant issues:

- You'll find a rich trove of artistic, cultural, historical, literary, philosophical, and religious resources for exploring the human condition past and present.
- Orthodox Christian studies acts as a cultural bridge, connecting religious traditions from throughout Asia Minor, the Balkans, Eastern Europe, the Middle East, and Russia.
- You'll gain a greater familiarity with the range of modern Orthodox cultures—from Moscow to Baghdad—that is essential for success in today's global environment.

Students are required to take Byzantine Christianity and can choose from elective courses* across several disciplines, including art and music history, classics, history, languages and cultures, philosophy, and theology. Courses could include:

- Byzantine and Western Art
- Understanding Historical Change: Medieval
- Russian Short Fiction
- Byzantium and the West
- Hospitality and Cosmopolitanism
- The Crusades

*Courses that meet general college requirements or other major/minor requirements may be applied toward the completion of the Orthodox Studies minor. For example, THEO 3316 Byzantine Christianity, currently fulfills the sophomore theology core requirement.

Fordham University is the only university in the United States that offers a minor in Orthodox Christian Studies, supported by the Orthodox Christian Studies Center. The center's mission is to foster intellectual inquiry by supporting scholarship and teaching in a way that is relevant to the ecclesial community, public discourse, and the promotion of Christian unity. The center serves as the locus of all curricular, research, and outreach activities related to the interdisciplinary study of Orthodox Christian traditions.

Requirements

The minor consists of the following six courses:

Course	Title	Credits
THEO 3316	Byzantine Christianity ¹	3
One course with the attribute OCAH: Art History		4
One course with the attribute OCHS: History/Social Science		3 to 4
Select three additional electives ²		9 to 12

¹ The required course, in general, is offered by the theology department every year.

² No more than two electives can be from any one discipline. A list of elective courses, courses with the OCST attribute, can be found on our course listing page.

Art History courses

Courses in this group have the OCAH attribute.

Course	Title	Credits
ARHI 2305	Gods, Monsters, Heroes, and Mortals: Narrative in Greek Art	4
ARHI 2315	Roman Art	4
ARHI 2341	Medieval Desire and Devotion	4
ARHI 2360	Illuminated Manuscripts	4
ARHI 3316	Art and Architecture of Rome	4
MLAL 3076	Great Russian Minds: Mikhail Bakhtin	4
MLAL 3085	The Russian Icon in Literature, Theology, Avant Garde Art, Film, Music, Museums and Politics	4
MVST 2360	Illuminated Manuscripts	4
THEO 4420	Early Christian Art in Context	4

History/Social Science courses

Courses in this group have the OCHS attribute.

Course	Title	Credits
HIST 1300	Understanding Historical Change: Medieval	3
HIST 1700	Understanding Historical Change: Mideast	3
HIST 1750	Understanding Historical Change: Islamic History and Culture	3
HIST 3270	The Crusades	4
HIST 3614	Revolutionary and Soviet Russia	4
HIST 3637	Stalinism: Making the Soviet State	4
HIST 3982	The Islamic World and the Crusades, 1099-Ca.1700	4
HIST 3985	Ottoman Empire/ 1300-1800	4
HIST 3986	Religion and Politics in Islamic History	4
MVST 3552	Medieval Philosophy	4
MVST 3590	Medieval Political Philosophy	4
MVST 4009	Medieval Jerusalem	4
PHIL 3501	Ancient Philosophy	4
PHIL 3552	Medieval Philosophy	4
PHIL 3557	Confessions of Augustine	4
PHIL 3591	Medieval Political Philosophy	4
PHIL 4408	Hospitality and Cosmopolitanism	4
POSC 3651	Comparative Politics of the Middle East	4
THEO 3332	Christians, Muslims, Jews in the Medieval Period	3

Students are encouraged to apply courses that meet general college requirements or other major/minor requirements towards the completion of this minor. For example, the core course Byzantine Christianity (THEO 3316) currently fulfills the sophomore theology core requirement.

Should faculty sabbaticals or other developments create a situation that limits the availability of courses, the directors of the program would

have the authority to amend the guidelines regarding the distribution of electives.

Availability

The minor in Orthodox Christian studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in Orthodox Christian studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Peace and Justice Studies

Who works for peace, justice, and conflict resolution in our contemporary world of national, cultural, religious, racial, gender, and environmental differences?

You can with Fordham's minor in peace and justice studies, addressing issues of war, terrorism, colonialism, poverty, religious conflict, human rights, multiculturalism, economic and environmental justice, race and gender equality, criminal justice reform, and conflict resolution and peacemaking.

Men and Women For Others

Peace and justice studies embodies Fordham's mission of "men and women for others," and is one of the university's oldest interdisciplinary programs, having been founded in 1986. The program was first inspired by the 20th century movements of liberation theology, social justice and civil rights, and peace activism. Central figures were the peace activist Father Daniel Berrigan, S.J., who taught at Fordham for many years, and Dorothy Day, founder of the Catholic workers movement, after whom Fordham's Dorothy Day Center For Service and Justice was named (recently renamed as Center For Community Engaged Learning). Other major influences on the program's formation include Mahatma Gandhi, the Buddhist peace movement, Mother Teresa, and Martin Luther King. Today the program also encompasses the diversity movement and the environmental justice movement, as well as global justice issues inspired by the international human rights movement, the UN's Sustainable Development Goals, and other international venues of conflict resolution and peacemaking.

Experiential Service and Conflict Resolution Learning

Peace and justice studies is unique among Fordham's programs in that its students are required to perform service work for local charities, government agencies, or international NGO's. Students complete at least two credits of experiential service and conflict resolution learning through volunteer work, internships, and co-curricular projects in programs such as the Center for Community Engaged Learning, Multicultural Affairs, Campus Ministry, Global Outreach, United Nations Academic Impact, Study Abroad, or the Social Innovation Collaboratory.

A Distinctive Educational and Professional Profile

The peace and justice minor makes your profile distinctive, and sets you apart, whether your career goals are in government, NGOs, law, business, education, healthcare, community development, environmental organizations, or religious organizations. In the words of student Robin

Happel, "you don't necessarily have to handcuff yourself to anything to be an activist. If you want to work on Wall Street, consider a corporate social responsibility division that works for reform, and invest in start-ups like Spes Nova. If you want to be a lawyer, make your pro bono service something meaningful to you, more than just another box to check for the bar. Whatever path you take in life, I promise there is something in Peace and Justice Studies for you."

Complementary Majors

The Peace and Justice minor makes an excellent complement to majors in Political Science, Sociology, Social Work, Economics, Business, Theology, Philosophy, Humanitarian Studies, International Studies, International Political Economy, Urban Studies, Environmental Studies, African and African American Studies, Latin American and Latino Studies, Middle East Studies, and Women, Gender and Sexuality Studies. Two course can be double counted between major and minor.

For more information

Visit the Peace and Justice Studies program web page.

Programs

- Peace and Justice Studies Minor (p. 330)

Peace and Justice Studies Minor

Requirements

The minor requires six courses and two further credits linked to experiential learning. Up to two courses may be double-counted from a major, as well as from another minor.

Course	Title	Credits
One introductory course (PJIN attribute)		4
Four electives ¹		16
Two credits in experiential learning		2
One capstone course (PJCP attribute)		4

¹ Any course with the PJST attribute code (or PJST 4999) may qualify for this requirement.

Introductory courses

Students are encouraged to take PJST 3110, but may substitute any of the courses listed below as well.

Courses in this group have the PJIN attribute.

Course	Title	Credits
COMC 3330	Peace, Justice, and the Media	4
PHIL 4310	Human Rights in Context	4
PHIL 4473	War and Peace: Just War Theory	4
PJST 3110	Introduction to Peace and Justice	4
POSC 3228	Civil Rights	4
POSC 3511	War and Peace	4
POSC 3522	United Nations	4
POSC 4515	Seminar: International Politics of Peace	4
SOCI 2420	Social Problems of Race and Ethnicity	4
SOCI 3001	Ethical Issues in Criminal Justice	4

SOCI 3110	Global Conflict: Wars/Religion	4
SOCI 3405	Gender, Race, and Class	4
THEO 4847	Theologies of Liberation	4

Experiential Learning

The required two credits of experiential learning regarding peace and justice issues may be earned by completing two of the following short- or long-term service opportunities, or one of them twice. Most students use (6.) below (volunteer or internship work). Service learning work should be reported to the program director after it is completed, so that the credits can be recorded on the student's Degree Works page.

1. an approved course with a Community Engaged Learning attribute (SL) (p. 60)
2. an approved Global Outreach trip
3. an approved program at the Center For Community Engaged Learning or other Fordham office (e.g., Multicultural Affairs, Campus Ministry)
4. an approved practicum at the Social Innovation Collaboratory
5. an approved study abroad program that includes service learning, e.g., Casa de la Solidaridad (El Salvador), Ubuntu (South Africa), or CIEE Capetown
6. other approved volunteer work or internship

To apply for approval of credits, email the program director 1) a description of the experiential learning service work and 2) the number of work hours/days.

Capstone courses

Students are encouraged to take SOCI 4970 Community Service/Social Action, SOCI 4990 Conflict Resolution and Justice Creation, PJST 4200 Conflict Resolution and Peacemaking or POSC 3516 Conflict Analysis/Resolution, but may substitute any of the courses listed below as well.

Courses in this group have the PJCP attribute.

Course	Title	Credits
HIST 4922	"Freedom Now": Black Political Thought	4
ORGL 2600	Mediation, Negotiation, Alternative Dispute Resolution	4
PHIL 3712	Global Environment and Justice	4
PJST 4200	Conflict Resolution and Peacemaking	4
POSC 3516	Conflict Analysis/Resolution	4
POSC 3522	United Nations	4
POSC 3527	United Nations Peace Operations	4
POSC 4010	Taming "Wicked Problems": Social Science Research and Solutions Lab	4
POSC 4400	Seminar: Global Justice	4
POSC 4515	Seminar: International Politics of Peace	4
SOCI 4970	Community Service/Social Action	4
SOCI 4990	Conflict Resolution and Justice Creation	4
THEO 4026	Theologies of Peace	4
THEO 4630	G.O. Deeper. Interdisciplinary Inquiries	4

Availability

The peace and justice studies minor is available to students in Fordham College at Rose Hill, Fordham College at Lincoln Center, Fordham's School

of Professional and Continuing Studies, and to undergraduate students at the Gabelli School of Business.

Philosophy

In Fordham's liberal arts tradition, philosophy has a special role in the development of the mature individual. Philosophy provides students the opportunity to reflect on the most fundamental questions that concern human beings and the ultimate dimensions of their world. The courses in philosophy acquaint students with the intellectual and moral traditions of their civilization and aim to develop in the student the skills necessary to think clearly and carefully for themselves—to question their assumptions and to judge their principles critically with the depth required for them to act as mature, integrated, free persons in their society and to provide it with enlightened, responsible leadership and service.

The major in philosophy is an excellent preparation for graduate school, for professional schools of law, medicine, education, and the ministry, as well as for positions in industry, government, and business in which a liberal arts degree is welcomed.

Accelerated Master's Program

Please read the Graduate School of Arts and Sciences Accelerated Master's Programs (p. 137) section of this bulletin for more information. The policy on early admissions to the M.A. program in philosophy allows academically strong philosophy majors presently enrolled in FCRH, FCLC, and PCS to attain a master's degree in philosophy in one year after graduating with a B.A. degree. Philosophy majors who have a cumulative 3.2 overall grade point average or above and at least a 3.5 in philosophy after five semesters of work in their college are eligible to apply for early admission to the M.A. program. After grades for the fall semester (junior year) have been posted and before registration for fall semester (senior year) begins, students who qualify will receive a description of the program and an invitation to apply from the chair or associate chair of the department.

There are several advantages from the undergraduate perspective in the early admissions policy. The GRE is waived, but becomes necessary if the student applies for the doctoral program. Courses on the graduate level begin before completing the B.A., enriching the undergraduate experience and serving to distinguish graduation transcripts. Students admitted early receive financial aid to a certain extent, since by double-counting three graduate courses, the M.A. total tuition bill is less than it would have been otherwise.

In the spring semester of junior year, students will be required to formally indicate the desire to matriculate in the accelerated M.A. program by filling out an online application (application fee waived) and submitting it to the Graduate Office of Admission along with two letters of recommendation. Applicants will be interviewed by the chair or associate chair for graduate studies. The application will be reviewed by the department's admissions committee, which will make a recommendation regarding admission to the chair, and the department's recommendation will be forwarded to the graduate school for final action.

Students admitted into the program will take three 5000-level graduate courses in their senior year. The graduate courses count toward both the completion of the B.A. degree and M.A. degree. Students will participate in the normal B.A. graduation ceremonies in May following their senior year. If seven graduate courses at the 5000-level or above are taken in the fifth year, the student will have a total of 10 graduate courses enabling completion of coursework for the M.A. in May of the fifth year. Students

consult with the director of graduate studies to design a program of study for their senior year and for the fifth year. Students must fulfill the normal requirements for the M.A. degree.

Program Activities

The department sponsors an annual lecture series that brings distinguished philosophers from around the world to campus. The University has a chapter of Phi Sigma Tau, the national honor society in philosophy.

For more information

Visit the Philosophy department web page.

Contribution to the Core

All first-year students take the core course PHIL 1000 Philosophy of Human Nature. The core course PHIL 3000 Philosophical Ethics is taken by all students in sophomore or junior year. Selected sections of these two courses are designated EP1 and EP3, respectively. The department also offers Values Seminar/EP4 core courses as well as American Pluralism and Global Studies courses, and interdisciplinary capstone courses.

Programs

- Philosophy Major (p. 332)
- Philosophy Minor (p. 334)

Philosophy Major

Requirements

Philosophy majors must complete a minimum of ten philosophy courses. Courses fulfilling the period and area requirements are listed below.

Course	Title	Credits
Common Core Curriculum		
PHIL 1000	Philosophy of Human Nature ¹	
PHIL 3000	Philosophical Ethics ²	
Historical and Topical Courses ³		
<i>Option A:</i>		
One course in each of three of the four historical periods		
One course in each of two of the four topical areas		
<i>Option B:</i>		
One course in each of two of the four historical periods		
One course in each of three of the four topical areas		
Elective courses		
Three additional courses		

¹ For Fordham College at Rose Hill Honors Program (p. 68) students, HPRH 1103 Foundational Texts: Philosophy fulfills the Philosophy of Human Nature requirement.

² For Fordham College at Rose Hill Honors Program (p. 68) students, HPRH 2202 Focused Study: Philosophy fulfills the Philosophical Ethics requirement.

³ Any course with the PHIL subject code or PHIL attribute (including EP4, Interdisciplinary capstone courses, American Pluralism, and Global Studies) may fulfill the elective requirement. Graduate-level courses

(p. 603) with the PHIL subject code may also count as electives, though special approval to register for such courses may be required.

All majors are strongly encouraged to acquire a broad background in the history of philosophy and to take at least one course in logic. Majors planning to do graduate work are advised to take Symbolic Logic.

Historical period courses

Courses are offered across four historical periods: (1) ancient; (2) medieval; (3) classical modern and 19th-century; and (4) contemporary, which is 20th- and 21st-century.

Ancient Philosophy courses

Courses in this group have the PHAN attribute.

Course	Title	Credits
GREK 3012	Plato: Socratic Dialogues	4
PHIL 3501	Ancient Philosophy	4
PHIL 3502	Pre-Socratic Philosophy	4
PHIL 3504	Stoics and Skeptics	4
PHIL 3520	Philosophy of Aristotle	4
PHIL 3522	Aristotle's Ethics	4
PHIL 3525	Philosophy of Plato	4
PHIL 3526	Plato: The Unread Dialogues	4
PHIL 3530	Philosophy After Constantine	4

Medieval Philosophy courses

Courses in this group have the PHMD attribute.

Course	Title	Credits
MVST 3552	Medieval Philosophy	4
MVST 3590	Medieval Political Philosophy	4
PHIL 3552	Medieval Philosophy	4
PHIL 3557	Confessions of Augustine	4
PHIL 3560	Philosophy of Aquinas	4
PHIL 3565	Four Medieval Thinkers	4
PHIL 3570	Beauty in the Middle Ages	4
PHIL 3591	Medieval Political Philosophy	4
PHIL 3910	Shakespeare and Aquinas	4

Classical Modern and 19th Century Philosophy courses

Courses in this group have the PHCM attribute.

Course	Title	Credits
PHIL 3600	Descartes and the Rationalists	4
PHIL 3601	Modern Philosophy	4
PHIL 3604	Rationalists and Empiricists Epistemologies	4
PHIL 3606	Early Modern Philosophy: Self and World	4
PHIL 3609	Modernity and Its Critics	4
PHIL 3610	Ethics in the Enlightenment	4
PHIL 3620	Immanuel Kant	4
PHIL 3622	Kierkegaard	4
PHIL 3623	Marx as a Philosopher	4
PHIL 3630	Nietzsche	4
PHIL 3631	19th Century Philosophy	4

PHIL 3714	Kant and Hegel	4
PHIL 3715	Kant on Morality and Religion	4
PHIL 3716	Hegel and His Successors	4

Contemporary Philosophy courses

Courses in this group have the PHCO attribute.

Course	Title	Credits
COLI 3652	Contemporary French Philosophy	4
PHIL 3643	Heidegger: Being and Time	4
PHIL 3652	Contemporary French Philosophy	4
PHIL 3653	Latin American Philosophy	4
PHIL 3661	Husserl and Heidegger	4
PHIL 3662	Merleau-Ponty: Philosopher of the Body	4
PHIL 3664	Contemporary Thomism	4
PHIL 3670	Existentialism	4
PHIL 3671	Phenomenology and Existentialism	4
PHIL 3672	Continental Philosophy of Religion	4
PHIL 3673	Existentialism and Literature	4
PHIL 3865	Critical Theory of the Frankfurt School	4
PHIL 3907	Existentialist Feminism	4

Topical Area courses

Courses are offered across four topical areas: metaphysics; knowledge and method; human nature; moral political, and social philosophy.

Metaphysics courses

Courses in this group have the PHME attribute.

Course	Title	Credits
PHIL 3238	Idealism and Realism	4
PHIL 3245	Mind, Language, and World	4
PHIL 3301	Problem of God	4
PHIL 3330	Philosophy of Religion	4
PHIL 3348	Concepts and Reality	4
PHIL 3350	Problems in Metaphysics	4
PHIL 3354	Problem of Evil	4
PHIL 3355	Metaphysics	4
PHIL 3360	Contemporary Metaphysics	4
PHIL 3667	Philosophy of Space and Time	4
PHIL 3753	Philosophy of the Islamic World	4

Knowledge and Method courses

Courses in this group have the PHKM attribute.

Course	Title	Credits
PHIL 3200	Introduction to Logic	4
PHIL 3204	Symbolic Logic	4
PHIL 3230	How to Keep an Open Mind: Philosophical and Scientific Perspectives	4
PHIL 3235	Theories of Knowledge	4
PHIL 3243	Philosophy of Cognitive Science	4
PHIL 3250	Problems in Epistemology	4
PHIL 3253	Relativism and Philosophy	4
PHIL 3254	Philosophy of Perception	4

PHIL 3257	Skepticism	4
PHIL 3258	Relativism and Skepticism	4
PHIL 3266	Philosophy of Science	4
PHIL 3267	Feyerabend's Philosophy of Science	4
PHIL 3306	Faith After the Death of God	4
PHIL 3307	Faith and Rationality	4
PHIL 3655	Philosophy and Language	4
PHIL 3663	Philosophies of Translation	4
PHIL 3702	Rights, Justice, and Global Governance	4
PHIL 3850	Hermeneutics	4
PHIL 3947	Philosophy of Imagination	4

Meaning and Human Experience courses

Courses in this group have the PHHN attribute.

Course	Title	Credits
PHIL 3181	Philosophy of Technology	4
PHIL 3412	Philosophy of Emotions	4
PHIL 3422	Harry Potter and Philosophy	4
PHIL 3425	Philosophy and the Jesuit Tradition	4
PHIL 3559	Dante and Philosophy	4
PHIL 3672	Continental Philosophy of Religion	4
PHIL 3674	Philosophy of the Novel	4
PHIL 3725	Philosophies of Race	4

PHIL 4044	Modern Ethical Theories	4

Availability

The major in philosophy is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

38.0101 - Philosophy.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Philosophy Minor Requirements

Minors in philosophy must complete the following six courses:

Course	Title	Credits
Required courses (common core)		
PHIL 1000	Philosophy of Human Nature ¹	
PHIL 3000	Philosophical Ethics ²	
Elective courses		
Select four additional courses ³		

¹ For Fordham College at Rose Hill Honors Program (p. 68) students, HPRH 1103 Foundational Texts: Philosophy fulfills the Philosophy of Human Nature requirement.

² For Fordham College at Rose Hill Honors Program (p. 68) students, HPRH 2202 Focused Study: Philosophy fulfills the Philosophical Ethics requirement.

³ Any course with the PHIL subject code or PHIL attribute (including EP4, Interdisciplinary capstone courses, American Pluralism, and Global Studies) may fulfill the elective requirement. Graduate-level courses (p. 603) with the PHIL subject code may also count as electives, though special approval to register for such courses may be required.

Availability

The minor in philosophy is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Physics and Engineering Physics

The physics department prepares students for a wide variety of technical careers. We offer three distinct programs of study and two minors.

The physics major provides students with a solid physics foundation with advanced courses in physics. It primarily prepares students for graduate study in physics, however, students could pursue other graduate degrees in, for example, architecture, business, finance, law, medicine, or secondary education. Additionally, physics majors are in high demand in many careers straight out of college. The engineering physics major builds on the same physics foundation and gives students a direct focus in one of various concentrations in a related applied field. Such students can pursue many of the same post-college goals that the physics majors do, but have a more applied background to pursue a career in industry or to attend graduate school in engineering. The 3-2 Cooperative Program in Engineering includes three years at Fordham followed by two years at an engineering school (either Columbia University or Case Western Reserve University) resulting in a double major.

All majors in physics should have four years of secondary school mathematics, including trigonometry and courses in secondary school physics and chemistry. Because of the sequential nature of physics courses, it is important to arrange a program at the earliest possible date. Incoming first year students are advised to indicate an interest in physics on their admission forms and to contact the physics department before the beginning of their first semester.

Program Activities

The department carries on active research programs in nuclear and particle physics (theory) and in theoretical condensed matter (mesoscopic and nanoscale) physics. The focus of the experimental research is on materials science, polymer physics, low-temperature physics, liquid crystals, medical physics, and laser optics. Student participation in these programs is strongly encouraged. Through external and internal grants and alumni generosity, the department has funded summer research experiences for approximately six students per year. Many of our students have also obtained summer research experiences at major universities and research labs through programs such as the National Science Foundation's Research Experiences for Undergraduates program. Students have presented their results from these summer research programs at national meetings (such as the American Physical Society).

For more information

Visit the physics and engineering physics department web page.

Contribution to the Core

Physics offers PHYS 1201 Introduction to Astronomy, PHYS 1203 Environmental Physics, PHYS 1206 Physics of Everyday Life, PHYS 1207 Physics of Light and Color, and PHYS 1242 Science Fiction Physics, which count as the core physical science course for non-majors.

PHYS 4192 Rediscovering the New World satisfies the Interdisciplinary Capstone Course core requirement but may not be applied to a major elective.

Programs

- Engineering Physics Major (p. 335)
- Engineering Physics Minor (p. 335)
- Physics Major (p. 336)
- Physics Minor (p. 336)

Engineering Physics Major Requirements

Students majoring in engineering physics are required to take the following courses:

First Year		Credits
PHYS 1601	Introduction to Physics I	4
PHYS 1602	Introduction to Physics II	4
MATH 1206	Calculus I	4
MATH 1207	Calculus II	4
Credits		16
Second Year		
PHYS 2005	Introduction to Modern Physics	4
MATH 2004	Multivariable Calculus I	4
MATH 2005	Multivariable Calculus II	4
PHYS 2201	Classical Mechanics I	4
A two-semester introductory sequence in either biology or chemistry		10 to 12
Credits		26-28
Third Year		
PHYS 3001	Electricity and Magnetism I	4
PHYS 3013	Experimental Techniques in Engineering and Physics	3
PHYS 3101	Math Methods in Physics I	4
PHYS 3401	Thermo and Stat Physics	4
Two related engineering electives		8
Credits		23
Fourth Year		
Two related engineering electives		8
Credits		8
Total Credits		73-75

The minimum acceptable grade in all courses required for a degree in physics or engineering physics is a C-. All majors must meet with their

faculty adviser each semester prior to registration to have their course schedules approved.

Physics and engineering physics majors are expected to take all required major courses at Fordham. Exceptions may be made on a case-by-case basis for certain rare and compelling reasons. Under no circumstances can more than two external courses be transferred toward the major.

3-2 Cooperative Program in Engineering

Students enrolled in the 3-2 Cooperative Program in Engineering complete the requirements for the physics degree through the junior year. They then transfer to an engineering program and complete an additional two years. They earn a double bachelor's degree in physics and engineering.

Availability

The major in engineering physics is available at Fordham College at Rose Hill. Students in Fordham's School of Professional and Continuing Studies may major in engineering physics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

14.1201 - Engineering Physics/Applied Physics.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Engineering Physics Minor Requirements

Course	Title	Credits
Required Courses		
PHYS 1601 & PHYS 1511	Introduction to Physics I and Physics I Lab	5
PHYS 1602 & PHYS 1512	Introduction to Physics II and Physics II Lab	5
MATH 1203	Applied Calculus I	3
MATH 1204	Applied Calculus II	3
Electives		
Select three of the following:		11 to 12
PHYS 2101	Engineering Statics and Dynamics	
PHYS 2102	Mechanics of Materials	
PHYS 3013	Experimental Techniques in Engineering and Physics	

PHYS 3201 Fluid Mechanics

PHYS 4010 Introduction to Electric Circuits

The minimum acceptable grade in all courses required for a minor in physics or engineering physics is a C-. Under no circumstances can more than two external courses be transferred toward the minor.

Availability

The minor in engineering physics is available at Fordham College at Rose Hill. Students in Fordham's School of Professional and Continuing Studies may minor in physics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Physics Major

Requirements

All students planning to major in physics are required to take the following courses. Because of the sequential nature of the curriculum, students should pursue the following plan of study.

Students enrolled in the 3-2 Cooperative Program in Engineering (p. 135) complete the requirements for the physics degree through the junior year. They then transfer to an engineering program and complete an additional two years. They earn a double bachelor's degree in physics and engineering.

Freshman		Credits
PHYS 1601 & PHYS 1511	Introduction to Physics I and Physics I Lab	5
PHYS 1602 & PHYS 1512	Introduction to Physics II and Physics II Lab	5
MATH 1206	Calculus I	4
MATH 1207	Calculus II	4
Credits		18
Sophomore		Credits
PHYS 2005	Introduction to Modern Physics	4
PHYS 2201	Classical Mechanics I	4
CHEM 1321 & CHEM 1331	General Chemistry I and General Chemistry Lab I	6
CHEM 1322 & CHEM 1332	General Chemistry II and General Chemistry Lab II	6
MATH 2004	Multivariable Calculus I	4
MATH 2005	Multivariable Calculus II	4
Credits		28
Junior		Credits
PHYS 2011	Intermediate Laboratory	2
PHYS 3001	Electricity and Magnetism I	4
PHYS 3013	Experimental Techniques in Engineering and Physics	3
PHYS 3101	Math Methods in Physics I	4
PHYS 3102	Math Methods in Physics II	4
PHYS 3211	Computational Physics and Programming I	2
PHYS 3401	Thermo and Stat Physics	4
PHYS 4005	Quantum Mechanics I	4
Credits		27

Senior

Select two of the following electives (except those in the 3-2 Cooperative Program in Engineering): 8

PHYS 3601	Optics	
PHYS 4003	Classical Mechanics II	
PHYS 4004	Electricity and Magnetism II	
PHYS 4006	Quantum Mechanics II	
PHYS 4011	Nuclear and Particle Physics	
PHYS 4012	Solid State Physics	
PHYS 4401	Undergraduate Research I	
PHYS 4402	Undergraduate Research II	
Credits		8

Total Credits 81

The minimum acceptable grade in all courses required for a degree in physics or engineering physics is a C-. All majors must meet with their faculty adviser each semester prior to registration to have their course schedules approved.

Physics and engineering physics majors are expected to take all required major courses at Fordham. Exceptions may be made on a case-by-case basis for certain rare and compelling reasons. Under no circumstances can more than two external courses be transferred toward the major.

Physics Minor Requirements

Course	Title	Credits
Required Courses		
PHYS 1601 & PHYS 1511	Introduction to Physics I and Physics I Lab	5
PHYS 1602 & PHYS 1512	Introduction to Physics II and Physics II Lab	5
PHYS 2005	Introduction to Modern Physics	4

PHYS 2201	Classical Mechanics I	4
PHYS 3001	Electricity and Magnetism I	4

Electives

Select two physics electives.¹

¹ Any course with the PHYS subject code numbered 2000 or higher may fulfill this requirement.

The minimum acceptable grade in all courses required for a minor in physics or engineering physics is a C-. Under no circumstances can more than two external courses be transferred toward the minor.

Availability

The minor in physics is available at Fordham College at Rose Hill. Students in Fordham's School of Professional and Continuing Studies may minor in physics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Political Science

The goal of the undergraduate curriculum of the Department of Political Science is to expose students to the study of politics and the diversity of approaches and analytical techniques used by political scientists. The faculty of the political science department of Fordham University reflects this diversity, as does the undergraduate political science curriculum. The study of political phenomena and the nature of public life is an integral component of a liberal arts education. Through the curriculum, students also acquire skills in writing, communication, and analytical thought that are critical to a liberal arts education.

Given Fordham's role as an urban, Jesuit liberal arts university, the Department of Political Science endeavors to advance the University's mission by preparing students to:

1. think critically and analytically, with an awareness of alternative viewpoints and understanding of current domestic and international issues;
2. develop written and verbal communication skills;
3. reflect upon the relationship between democratic values and public life;
4. receive education that is marked by *cura personalis*, with the goal of educating people for others.

Although many political science courses have more than one attribute, a single political science course cannot be counted more than once toward the major or minor. In other words, one course cannot simultaneously fulfill more than one major requirement for a student.

A grade of C- or better is required in all courses taken to fulfill the political science major or minor.

The department will accept a maximum of four transfer courses (whether from study abroad, another college/university, or AP/IB/similar exams) toward the completion of the political science major, or two such courses toward the political science minor.

Program Activities

Internships

The political science department does not typically grant academic credit for internships. However, when an internship is integrated with an academic component, such as a tutorial, academic credit is possible. Students should see individual faculty members to discuss internship opportunities and the possibility of receiving academic credit.

The political science department also has formal arrangements for semester-long internship experiences off campus:

Internship in New York City Government

POSC 3120 New York City Internship. Contact Thomas DeLuca. Ph.D. (tdeluca1@fordham.edu) for information about POSC 3120 at Lincoln Center, which is offered during summers only.

Internship in New York State Legislature

The department offers an internship and courses through the New York State Assembly and New York State Senate Internship programs. For information on these programs, contact Bruce Berg, Ph.D. (berg@fordham.edu)

Political Science Honor Society

Political science majors in Fordham's undergraduate colleges are eligible to become members of Pi Sigma Alpha, the national honor society in political science. Pi Sigma Alpha was founded in 1920, and Fordham's chapter, the Delta Zeta chapter, was chartered in 1961. Selection is made by department faculty from among seniors who have earned a minimum of 10 credits in political science courses, including at least one advanced-level course, and have achieved a qualifying grade point average both in the major and in their Fordham coursework as a whole. New members are honored at an induction ceremony held in the spring of each academic year.

For more information

Visit the political science department web page.

Contribution to the Core

Political science offers POSC 1100 Introduction to Politics, which fulfills the first social science core requirement. The advanced disciplinary requirement can be fulfilled by taking a second advanced-level course in political science. In addition, the department regularly offers courses that fulfill the American Pluralism, Global Studies, *Eloquentia Perfecta* (EP1 and EP3), Interdisciplinary Capstone (ICC), and Values Seminar (EP4) core requirements.

Programs

- Political Science Major (p. 337)
- Political Science Minor (p. 340)

Political Science Major Requirements

All majors must complete a minimum of 10 semester courses in political science including:

Course	Title	Credits
POSC 1100	Introduction to Politics	3
One methods intensive course (listed below) ¹		4
One course at the 2000 or 3000 level from three of the following four subfields (listed below):		11 to 12
American Politics		
Political Theory		
International Politics		
Comparative Politics		
One seminar course (listed below)		4
Select four electives from any course in political science above the 1000 level ^{2,3}		Varies

¹ The Methods Intensive course requirement was added in Fall 2017. Students who declared their major prior to Fall 2017 are not required to take this course, and may take an additional elective instead.

² Courses outside of political science with the POSC attribute (p.) may also fulfill this requirement, as may any course with the attributes POCP (Comparative Politics), POPT (Political Theory), POAP (American Politics), and POIP (International Politics).

³ POSC 1298 (transfer credit from AP Comparative Government and Politics) and POSC 1299 (transfer credit from AP US Government and Politics) may also fulfill this requirement.

Methods Courses

Courses in this group have the POMI attribute.

Course	Title	Credits
POSC 3211	The U.S. Congress - Methods Intensive	4
POSC 3215	American Political Parties	4
POSC 3231	Judicial Politics	4

Availability

The major in political science is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

45.1001 - Political Science and Government, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Political Science Minor Requirements

All minors must complete a minimum of six one-semester courses in political science, including

Course	Title	Credits
POSC 1100	Introduction to Politics	3
One course from two of the four major subfields ¹		7 to 8
Select three electives from any course in political science above the 1000 level ^{2,3}		10 to 12

¹ See available courses Subfields (p. 337) on the Political Science Major page.

² Courses outside of political science with the POSC attribute (p.) may also fulfill this requirement, as may any course with the attributes POCP (Comparative Politics), POPT (Political Theory), POAP (American Politics), and POIP (International Politics) (p. 337).
³ POSC 1298 (transfer credit from AP Comparative Government and Politics) and POSC 1299 (transfer credit from AP US Government and Politics) may also fulfill this requirement.

Availability

The minor in political science is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Psychology

The Department of Psychology offers the Bachelor of Science degree for its majors. The department has five primary goals:

1. Gain knowledge in key concepts, principles, and themes in psychology
2. Engage in scientific inquiry and critical thinking using integrative thinking and problem solving
3. Promote ethical and social responsibility that enhances the greater community
4. Demonstrate effective oral and written communication skills
5. Develop meaningful professional direction for life after graduation

In the Jesuit educational tradition of academic excellence and care of the whole person, students are challenged to develop a capacity for critical thinking, a willingness to submit their efforts to clear and high standards, and an understanding of the ethical dimensions of personal and professional life. A rigorous program of study that provides knowledge of the field of psychology with breadth and depth is complemented by opportunities to engage in psychology in action through research projects, field experiences, and collaborations with professionals in the field. Full-time faculty are highly accessible to students, are committed to teaching and mentoring undergraduates, and engage in one-to-one relationships with psychology majors. Students learn about the multiple applications of psychological science to the service of others, and especially those whose human dignity is most threatened in our society. Students are encouraged to integrate their knowledge of psychology with their own developing values and beliefs. Sensitivity to and consideration of cultural, religious, and gender differences are fostered in the study of psychology.

Program Activities Honors in Psychology

Psychology majors with a minimum cumulative GPA of 3.7 may graduate with honors in psychology by participating in the Psychology Undergraduate Honors Program. Interested students should contact the associate chair for information about the requirements for the program, which involves writing a senior thesis that is mentored by a department faculty member. Students are notified of invitation in the spring of their junior year. See the psychology department web page for additional information.

Advising

In addition to advising in the advising center, psychology majors are encouraged to engage with our full-time faculty to discuss their interests in psychology, graduate school options, career planning, and professional development. First- and second-year students should reach out to the associate chair at their home campus. Juniors and seniors will be paired with a specific faculty connection who is meant to serve as an important resource and point of contact as they progress through the major.

Research Opportunities and Clubs

To encourage undergraduate research, the psychology program offers opportunities for research involvement and club activities, including psychology club, and chapter of Psi Chi. Founded on September 4, 1929, at Yale University, Psi Chi is the international honor society in psychology. Its purpose is "to encourage, stimulate, and maintain excellence in scholarship and to advance the science of psychology." Psi Chi is the world's largest honor society, with 500,000 life members and chapters at 940 U.S. colleges. Membership is for life, with no annual dues. Fordham's two chapters of Psi Chi at Lincoln Center and Rose Hill accept undergraduate or graduate students who have completed at least 12 credits of psychology and maintained a cumulative GPA of at least 3.32. Induction ceremonies are held in April and December of each year. Several courses involve community-engagement opportunities.

For more information

Visit the psychology department web page.

Contribution to the Core

- The following psychology department Complex-Process Courses satisfy the Social Science (p. 54) core requirement. There are no prerequisites for these courses:

Course	Title	Credits
PSYC 1004	The Mind-Body Connection: Introduction to Behavioral Health	3
PSYC 2600	Social Psychology	4
PSYC 2700	Infant and Child Development	4
PSYC 2710	Adolescent and Adult Development	4
PSYC 2800	Personality	4
PSYC 2900	Psychopathology	4

- PSYC 1100 Biopsychology satisfies the natural sciences (p. 52) core requirement for majors and non-majors.
- Designated sections of the following are Eloquentia Perfecta (p. 55) III Seminars:

Course	Title	Credits
PSYC 2010	Research Methods Lab	5
PSYC 2401	Memory Laboratory	5
PSYC 2501	Cognition Laboratory	5
PSYC 3010	Bilingual Minds	4
PSYC 3100	Health Psychology	4
PSYC 3330	Family Psychology	4
PSYC 3730	Men and Masculinities	4
PSYC 3810	Trauma and Family Violence	4
PSYC 3950	Behavior Modification	4
PSYC 4245	Ethics in Research	4

- PSYC 3600 Multicultural Psychology and PSYC 3730 Men and Masculinities meet the American Pluralism (p. 58) requirement.
- PSYC 4910 Global Mental Health & Psychosocial Humanitarian Aid meets the Global Studies (p. 55) requirement.
- The following meet the Interdisciplinary Capstone Core (p. 48) requirement:

Course	Title	Credits
PSYC 4000	History and Systems of Psychology	4
PSYC 4245	Ethics in Research	4
PSYC 4310	Aging and Society	4
PSYC 4330	Music and Psychology	4
PSYC 4370	Disgust in Literature and Psychology	4

- The following courses meet the Advanced Social Science (p. 45) requirement:

Course	Title	Credits
PSYC 3100	Health Psychology	4
PSYC 3110	Cognitive Neuroscience	4
PSYC 3300	Industrial Organizational Psychology	4
PSYC 3320	Consumer Behavior	4
PSYC 3330	Family Psychology	4
PSYC 3600	Multicultural Psychology	4
PSYC 3640	Cross-Cultural Psychology	4
PSYC 3700	Human Sexuality	4
PSYC 3730	Men and Masculinities	4
PSYC 3820	Forensic Psychology	4
PSYC 3850	Psychology of Well-Being	4
PSYC 3930	Introduction to Clinical Psychology	4

- The following Values Seminars (p. 50) and Eloquentia Perfecta (p. 55) IV seminars are offered by the department:

Course	Title	Credits
PSYC 4340	Law and Psychology	4
PSYC 4900	Psychology and Human Values	4
PSYC 4920	Youth, Values, and Society	4
PSYC 4930	Codes for Mental Health Services	4

Programs

- Psychology Major (p. 341)
- Psychology Minor (p. 343)

Psychology Major

The psychology major provides a broad and rigorous base of knowledge and skills in the discipline while offering students freedom in shaping a program to suit their individual needs.

Our undergraduate program prioritizes critical, scientific thinking, teaching you to analyze psychological behavior and processes. We emphasize three primary goals in your undergraduate education:

- To prepare you for graduate study in psychology;
- To enable you to apply psychological skills and knowledge in psychology-related careers, and;

- To foster your understanding of complex human behavior as it is encountered in our personal and vocational lives.

Students officially begin the major with PSYC 1200 Foundations of Psychology, which offers an overview of the field and is a prerequisite for the majority of upper-level psychology courses. Psychology majors gain expertise in research methods by studying PSYC 2000 Statistics and then PSYC 2010 Research Methods Lab. Three content courses at the intermediate level provide majors with breadth through surveys of the knowledge about at least one basic process (e.g., learning, sensation and perception, cognition) and one complex process (e.g., abnormal, development, personality, social). Two courses at the advanced level offer students detailed and in-depth explorations of a variety of subject matters. The capstone course gives students an opportunity to integrate diverse areas of psychology or to interrelate psychology with other disciplines.

All students are required to take at least one content laboratory course beyond Research Methods Lab, which provides hands-on learning and skills in data analysis and research report writing. In addition to the variety of alternatives offered in the requirements mentioned above, the psychology major allows students to pursue individual interests and goals by including one course at any level that the student chooses as an elective. Finally, one advanced, capstone, or elective course must be a designated diversity course.

A grade of C- or better is required for each course counted toward the major requirement. In addition, a student must earn an overall psychology GPA of 2.0 or higher to fulfill the requirements of the major.

CIP Code

42.0101 - Psychology, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Majors must complete 10 psychology courses, which include two distributive requirements. The requirements for the major are as follows. Lists of courses fulfilling each requirement follow the requirements.

Course	Title	Credits
PSYC 1200	Foundations of Psychology	4
PSYC 2000	Statistics	4
PSYC 2010	Research Methods Lab	5
Select one Basic Process course		4 to 5
Select one Complex Process course		4 to 5
Select one Basic Process or Complex Process course		4 to 5
Select two Advanced courses		8 to 10
Select one additional elective course ¹		3 to 4
Select one Capstone course		4 to 5

¹ Any course with the subject code PSYC (p. 1581) numbered 1004, 1100, or 2100-4995 may fulfill this requirement, as may any course with the PSYC attribute (see list below).

Basic Process courses

Courses in this group have the PYBP attribute.

Course	Title	Credits
PSYC 2200	Learning	4
PSYC 2201	Learning Laboratory	5
PSYC 2300	Sensation and Perception	4
PSYC 2301	Sensation and Perception Lab	5
PSYC 2401	Memory Laboratory	5
PSYC 2500	Cognition	4
PSYC 2501	Cognition Laboratory	5

Complex Process courses

Courses in this group have the PYCP attribute.

Course	Title	Credits
PSYC 2600	Social Psychology	4
PSYC 2601	Lab in Social Psychology	5
PSYC 2700	Infant and Child Development	4
PSYC 2710	Adolescent and Adult Development	4
PSYC 2800	Personality	4
PSYC 2900	Psychopathology	4

Advanced courses

Courses in this group have the PYAC attribute.

Course	Title	Credits
PSYC 3100	Health Psychology	4
PSYC 3110	Cognitive Neuroscience	4
PSYC 3270	Clinical Child Psychology	4
PSYC 3300	Industrial Organizational Psychology	4
PSYC 3320	Consumer Behavior	4
PSYC 3330	Family Psychology	4
PSYC 3340	Urban Psychology	4
PSYC 3360	Sports Psychology	4
PSYC 3400	Psychology of Education	4
PSYC 3410	Creativity	4
PSYC 3530	Gender Roles	4
PSYC 3550	Consciousness	4
PSYC 3600	Multicultural Psychology	4
PSYC 3610	Global Health and Psychology	4
PSYC 3640	Cross-Cultural-Psychology	4
PSYC 3700	Human Sexuality	4
PSYC 3730	Men and Masculinities	4
PSYC 3810	Trauma and Family Violence	4
PSYC 3820	Forensic Psychology	4
PSYC 3850	Psychology of Well-Being	4
PSYC 3930	Introduction to Clinical Psychology	4
PSYC 3950	Behavior Modification	4
PSYC 4015	Language and Thought	4

Capstone courses

Courses in this group have the PYCA attribute.

Course	Title	Credits
CEED 4245	Ethics in Research	4
PSYC 4000	History and Systems of Psychology	4
PSYC 4200	Advanced Statistics w/Lab	4
PSYC 4245	Ethics in Research	4
PSYC 4310	Aging and Society	4
PSYC 4330	Music and Psychology	4
PSYC 4340	Law and Psychology	4
PSYC 4350	The Psychology of Race, Place, and Power	4
PSYC 4370	Disgust in Literature and Psychology	4
PSYC 4820	Community Psychology	5
PSYC 4850	Community Mental Health	4
PSYC 4855	Participatory Action Research	4
PSYC 4900	Psychology and Human Values	4
PSYC 4910	Global Mental Health & Psychosocial Humanitarian Aid	4
PSYC 4920	Youth, Values, and Society	4
PSYC 4930	Codes for Mental Health Services	4
PSYC 4997	Honors Thesis in Psychology I	4
SOCI 4245	Ethics in Research	4

Non-Psychology Additional Elective courses

Courses in this group have the PSYC attribute.

Course	Title	Credits
CEED 6015	HIV/Drug Abuse Prevention Research Ethics	3
ENGL 4370	Disgust in Literature and Psychology	4
LING 3010	Bilingual Minds	4
LING 4015	Language and Thought	4

Distributive Requirements

Content Laboratory requirement

This is not an additional course. One of the courses taken for the major must be a content laboratory course.

Courses in this group have the PYCL attribute.

Course	Title	Credits
PSYC 2201	Learning Laboratory	5
PSYC 2301	Sensation and Perception Lab	5
PSYC 2401	Memory Laboratory	5
PSYC 2501	Cognition Laboratory	5
PSYC 2601	Lab in Social Psychology	5

* PSYC 2201 Learning Laboratory and PSYC 2200 Learning cannot both apply to the major.

* PSYC 2501 Cognition Laboratory and PSYC 2500 Cognition cannot both apply to the major.

* PSYC 2601 Lab in Social Psychology and PSYC 2600 Social Psychology cannot both apply to the major.

Diversity requirement

This is not an additional course.

All students majoring in psychology must take at least one course designated as a diversity course. Diversity courses are designated advanced, capstone, or elective courses that highlight aspects of individual and cultural diversity and the interpersonal challenges that often result from diversity and context; assist students in recognizing potential for prejudice and discrimination in oneself and others; and explore how psychology can promote civic, social, and global outcomes that benefit others.

The diversity course requirement may be fulfilled by an advanced, capstone, or elective course.

Any of the following courses may count toward the diversity requirement.

Courses in this group have the PSDV attribute.

Course	Title	Credits
PSYC 3530	Gender Roles	4
PSYC 3600	Multicultural Psychology	4
PSYC 3610	Global Health and Psychology	4
PSYC 3640	Cross-Cultural-Psychology	4
PSYC 3700	Human Sexuality	4
PSYC 3730	Men and Masculinities	4
PSYC 4310	Aging and Society	4
PSYC 4350	The Psychology of Race, Place, and Power	4
PSYC 4820	Community Psychology	5
PSYC 4850	Community Mental Health	4
PSYC 4855	Participatory Action Research	4
PSYC 4910	Global Mental Health & Psychosocial Humanitarian Aid	4
PSYC 4920	Youth, Values, and Society	4

Availability

The major in psychology is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

Psychology Minor Requirements

Minors in psychology are required to take:

Course	Title	Credits
Required Course		
PSYC 1200	Foundations of Psychology	4

Electives

Select five additional electives in psychology ¹

¹ Any course with the PSYC subject code numbered 1004, 1100, or 2000-4995, or with the PSYC attribute (see list below), may fulfill this requirement.

Speak to the associate chair or other psychology faculty for advice about selecting courses to meet your goals. Students must earn a grade of at least a C- for a psychology course to fulfill the requirements of the minor. In addition, a student must earn an overall GPA of 2.0 or higher in psychology courses to fulfill the requirements of the minor.

Non-Psychology Elective Courses

Courses in this group have the PSYC attribute.

Course	Title	Credits
CEED 6015	HIV/Drug Abuse Prevention Research Ethics	3
ENGL 4370	Disgust in Literature and Psychology	4
LING 3010	Bilingual Minds	4
LING 4015	Language and Thought	4
NSCI 2050	Foundations in Animal Behavior	3

Availability

The minor in psychology is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

Religious Studies

The interdisciplinary program in religious studies explores the roles, meanings, and phenomenology of religion. Some courses (for the most part those offered by the theology department) focus on the religious traditions themselves, their classical texts, historical figures and movements, conceptual and affectual concerns, ethical and social teachings, and cultural and political impacts. Other courses (for the most part those offered by other departments) identify the significance of religion and of religious ideas and symbolism within the wider world of history, society, literature, and the arts.

All students interested in majoring, second majoring, or minoring in religious studies should discuss their interests with the director. In consultation with the director, each student will develop a program of study. It is important to note that the courses listed in this bulletin are only representative of the choices available. Consultation with the director is necessary for students to have full access to other courses that fulfill major, second major and minor requirements.

Program Activities

The religious studies program offers biyearly roundtables for majors and minors, and cultural outings for all majors.

For more information

Visit the Religious Studies program web page.

Programs

- Religious Studies Major (p. 344)
- Religious Studies Minor (p. 345)

Religious Studies Major

The religious studies program provides students with the opportunity to examine religious texts and practices through an interdisciplinary lens. While some of our courses—particularly those which are cross-listed with the theology department—examine the religious traditions themselves, Religious studies students have a chance to look at how religious traditions have affected the arts, literature, and politics. While religious studies majors and minors may choose to focus on the Christian tradition, they may also decide to delve more deeply into the religious texts and traditions of Judaism, Islam, and other faiths.

Students who have been part of our program have also majored or minored in fields such as dance, theater, classics, philosophy, English, languages and cultures, history, and anthropology. Since many of our courses are cross-listed with other departments, it is possible to double major or minor in religious studies while majoring in another department. Our graduates have gone on to have careers in numerous exciting fields.

Because of the program's diversity and flexibility, students have the chance to work closely with our faculty and create a program that is both highly individualized and demanding. Students are required to check in with a faculty advisor regularly to make sure that they are both fulfilling the university's and the department's requirements and getting the most out of the unique opportunities which Fordham and New York City provide for young scholars. Ultimately, a religious studies major or minor at Fordham University will prepare you well to meet the challenges posed by the current and future complexities of our world where religion often takes center stage.

CIP Code

38.0201 - Religion/Religious Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The major consists of 10 courses:

Course	Title	Credits
THEO 1000	Faith and Critical Reason	3
One course in religious text ¹		
One course in Theology, Ethics, or Social Teachings		
One course in The History of a Religion		
One course in Religion in Culture, Society, or The Political Order		
One core values seminar related to religious studies		
Select any four electives from the religious studies program offerings ²		

¹ Any course with the THEO subject code (p. 1670) (numbered 3000 to 3999) fulfills this requirement.

² Any course with the THEO subject code (p. 1670) (numbered 2000 or higher) or the REST attribute code may fulfill this requirement.

Theology, Ethics, or Social Teachings

Courses in this group have the RSTE attribute.

Course	Title	Credits
AFAM 3115	Martin Luther King Jr. and Malcolm X	4
MLAL 3077	The Great Russian Minds: Russian Personalism	4
MVST 4010	Medieval Franciscans and the Dream of a Just Economy	4
PHIL 3330	Philosophy of Religion	4
THEO 3670	Theology and Contemporary Science	4
THEO 3720	Hindu Literature and Ethics	3
THEO 3725	Buddhism in America: A Multimedia Investigation	3

The History of a Religion

Courses in this group have the RSHR attribute.

Course	Title	Credits
ANTH 2619	Magic, Science, and Religion	4
HIST 3270	The Crusades	4
HIST 3322	The Reformation Era	4
HIST 3982	The Islamic World and the Crusades, 1099-Ca.1700	4

THEO 3725	Buddhism in America: A Multimedia Investigation	3
-----------	---	---

Note: Among the additional courses and electives, at least one must have as a major focus a religion or religions other than Christianity. Students may double-count two approved religious studies courses toward the religious studies major and toward a second major, as long as at least 18 different courses are taken to complete both majors.

Availability

The major in religious studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Professional and Continuing Studies students: *The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.*

Religious Studies Minor

The religious studies program provides students with the opportunity to examine religious texts and practices through an interdisciplinary lens. While some of our courses—particularly those which are cross-listed with the theology department—examine the religious traditions themselves, Religious studies students have a chance to look at how religious traditions have affected the arts, literature, and politics. While religious studies majors and minors may choose to focus on the Christian tradition, they may also decide to delve more deeply into the religious texts and traditions of Judaism, Islam, and other faiths.

Students who have been part of our program have also majored or minored in fields such as dance, theater, classics, philosophy, English, languages and cultures, history, and anthropology. Since many of our courses are cross-listed with other departments, it is possible to double major or minor in religious studies while majoring in another department. Our graduates have gone on to have careers in numerous exciting fields.

Because of the program's diversity and flexibility, students have the chance to work closely with our faculty and create a program that is both highly individualized and demanding. Students are required to check in with a faculty advisor regularly to make sure that they are both fulfilling the University's and the department's requirements and getting the most out of the unique opportunities which Fordham and New York City provide for young scholars. Ultimately, a religious studies major or minor at Fordham University will prepare you well to meet the challenges posed by the current and future complexities of our world where religion often takes center stage.

Requirements

The minor consists of six courses:

Course	Title	Credits
THEO 1000	Faith and Critical Reason	3
Select a second-year theology core course on a religious scripture(s) ¹		

Select any four electives from the religious studies program offerings²

¹ Any course with the THEO subject code (p. 1670) numbered 3000 to 3999 may fulfill this requirement.

² Any course with the THEO subject code (p. 1670) (numbered 2000 or higher) or the REST attribute code may fulfill this requirement.

Among the additional course and electives, at least one must have as a major focus a religion or religions other than Christianity. Students may double-count approved religious studies courses toward the religious studies minor and toward another major, as long as at least 14 different courses are taken to complete the major and minor.

Availability

The minor in religious studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional Studies at Rose Hill and Lincoln Center.

Social Innovation

In response to the growing demands for global sustainability from customers, employees, and society in general, more and more companies are discovering the competitive advantages of pursuing social innovation. Students will learn about how this concept is impacting all areas of business activity.

For more information

Visit the social innovation program web page.

Programs

- Concentration in Social Innovation (p. 346)

Concentration in Social Innovation

Requirements

The Social Innovation concentration is available to Gabelli students. Both primary and secondary concentrations must be taken in conjunction with another primary concentration or major.

Primary Concentration

Course	Title	Credits
Select two of the following:		
FNBU 4441	ST: Sustainability and Finance	
LPBU 3234	ST: Leading for Impact	
LPBU 3430	ST: Sustainable Business	
LPBU 3446	ST: Social Entrepreneurship	
LPBU 4005	ST: Fair Trade Entrepreneurship	
MKBU 3448	ST: Social Marketing	
SABU 3453	ST: Sustainability and Strategy	
Two electives with the SOIN attribute		
One co-curricular requirement (see below)		

Secondary Concentration

Course	Title	Credits

Co-Curricular Requirement

Students must select one of the following co-curricular offerings, which should be chosen based on time and commitment level:

- Social innovation practicum
- Service learning with social innovation component
- Social innovation internship
- Global Outreach (GO!) trip
- AshokaU/Clinton Global Initiative conferences
- Social innovation-related academic competitions
- Other (with permission of program director)

Social Work

The mission of the Bachelor of Arts in Social Work (B.A.S.W.) program at Fordham University is to educate students to promote human rights and social justice and improve the well-being of individuals, families, groups, organizations, and communities through culturally competent, evidence-informed, generalist social work practice embedded within an agency context. The school's commitment to excellence in education and scholarship is built on professional social work values and the Jesuit educational tradition with its focus on social justice. The B.A.S.W. program builds upon a strong liberal arts core to establish the social work competencies necessary to effectively serve diverse populations.

The program builds on students' strong liberal arts experience and combines classroom and field education with a strong student advising and support system. Following admission into the major, students participate in classes and activities of the Graduate School of Social

Service, a social work program of national stature. This design provides a challenging and stimulating educational environment.

The baccalaureate program was granted full national accreditation in November 2001 by the Commission on Accreditation of the Council on Social Work Education. The program received reaffirmation of its accreditation most recently in 2022. Students completing the social work program are eligible to apply for advanced standing at Fordham University's Graduate School of Social Service, and/or other graduate schools of social work. If accepted, advanced standing will substantially shorten the time needed to complete a Master of Social Work degree.

Early Admission to Master's Program

Within five years of completion, students graduating with a B.A. in social work from the program are eligible to apply for advanced standing at Fordham's Graduate School of Social Service or to other graduate programs in social work that consider advanced standing applications.

The evaluation of applications for advanced standing in the Fordham University Graduate School of Social Service leads to one of the following decisions:

1. Acceptance to the Graduate School of Social Service with advanced standing: The school grants advanced standing. Students enter the advanced level of study and choose from one of the advanced concentrations of study.
2. Rejection: The school rejects the application for admission and does not offer matriculation to the applicant.

Program Activities

Once admitted to the social work major, students will be assigned an adviser during their first and second years of the program. This will provide support over the course of the program.

Students will have access to all student activities open to graduate social work students.

Social Work Major

The Bachelor of Arts in Social Work (B.A.S.W.) major at Fordham University will prepare you to make a meaningful difference in people's lives as a generalist social work practitioner. Mirroring the strength of our nationally ranked M.S.W. program, our B.A.S.W. degree features a variety of learning experiences: dynamic classes, hands-on fieldwork education, and guidance and support from a faculty adviser. Our diverse community of compassionate students and faculty round out the stimulating educational environment of the Graduate School of Social Service. With our B.A.S.W. degree, you'll graduate with the skills and knowledge you'll need to promote human rights, social justice, and individual and community well-being.

Offered at our campuses in Manhattan and Westchester, the B.A.S.W. degree is equivalent to the Bachelor's in Social Work (B.S.W.) and is accredited by the Council on Social Work Education (CSWE).

CIP Code

44.0701 - Social Work.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Students are expected to complete the 31 credits of the major within a two-year period, either on a full- or part-time basis. The major consists of eight required courses of three credits each, and a 450-hour, yearlong field practicum and integrative seminar of seven credits beginning in September.

Following admission, students complete the social work program in two years. Depending on their full-time or part-time status, students may take courses in addition to social work courses.

Courses Required

Course	Title	Credits
SOWK 2600	Introduction to Social Work and Social Welfare	4
SOWK 6005	Contemporary Social Welfare Policy	3
SOWK 6040	Integrating Human Rights and Justice in Practice	3
SOWK 6323	Social Work Practice With Individuals Across the Lifespan	3
SOWK 6324	Social Work Practice With Families and Groups Across the Lifespan	3
SOWK 6305	Social Work Skills Lab	3
SOWK 6320	Social Work Practice With Organizations and Communities	3
SOWK 6440	Advanced Clinical Assessment and Diagnosis	3
SOWK 6803	Applied Social Work Research and Evaluation	3
SOWK 6901	BASW Generalist Field Education	7

Availability

The major in social work is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

FCRH and PCS students should keep in mind that all courses for the major in social work are offered at the Lincoln Center and Westchester campuses in the Graduate School of Social Services.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Sample Curriculum

The coursework is spread across four semesters. You can start your B.A.S.W. program starting in the fall or spring semester.

The first year consists of four classroom courses and faculty advising, and the second year consists of four classroom courses, the Field Practicum and Integrative Seminar, and faculty and field advising.

SOWK 2600 Introduction to Social Work and Social Welfare must be taken before beginning the remaining courses in the curriculum.

Regardless of when you enter the program, you must complete the first year's four classroom courses before entering the Fieldwork Practicum.

First Year		Credits

Preface

This handbook has been designed to serve students admitted to the Bachelor of Arts in Social Work Program. This handbook provides centralized information about the program. Within this document, students will find an overview of the program's operating framework, including goals and curriculum design. The handbook contains the policies and procedures that govern students' participation in the program. The handbook is also provided to field instructors who work with our students in their field education year.

Mission and Overview

Program Mission

The mission of the B.A.S.W. program at Fordham University is to educate students to promote human rights and social justice and improve the well-being of individuals, families, groups, organizations, and

communities through culturally competent evidence-informed generalist social work practice embedded within an agency context. The B.A.S.W. program builds upon a strong liberal arts core to establish the social work competencies necessary to effectively serve diverse populations.

Program Overview

Fordham's social work program builds on students' broad liberal arts experience at Fordham University and combines high quality classroom and field education with an extensive student advising and support system. The social work program is administered and staffed by the Fordham University Graduate School of Social Service. All social work courses and activities take place at the Lincoln Center and Westchester campuses.

The program actively consults and collaborates with other programs and majors within the undergraduate colleges of Fordham University.

The program and its faculty maintain ongoing relationships with the social work practice community to keep current and continually evaluate its curriculum in light of new knowledge, technology, social policies, and employment and market trends.

Students in the social work program must be matriculated at Fordham College at Lincoln Center, Fordham College at Rose Hill, or the Fordham School of Professional and Continuing Studies and are allowed to take courses outside the program at the Lincoln Center (Manhattan), Rose Hill (Bronx), or Westchester campus. They continue to participate in the overall activities of the University and can access all services available to undergraduate students. In matters outside the jurisdiction of the social work program, students are subject to the policies and expectations of their college of matriculation.

Following admission into the social work program, students participate in classes and activities of the Graduate School of Social Service and become members of the school community. The design of the program—including eight commingled classroom courses of undergraduate and graduate social work students; a 450-hour, yearlong field practicum and integrative seminar; and a faculty advisement system for students at each stage of the program—provides a challenging and stimulating educational environment.

Students are expected to complete the 31 credits of the major within a two-year period either on a full- or part-time basis. The major consists of eight required and sequenced courses of three credits each, and a 450-hour, year-long field practicum and integrative seminar of seven credits. Following admission, students are assigned a social work faculty adviser who meets with them individually and in group meetings. All students are enrolled in the program for two years. Students may enter the first year of the program in the fall or spring semester and all begin the second year in the fall.

The baccalaureate program is accredited by the Commission on Accreditation of the Council on Social Work Education. Students who are admitted to the B.A.S.W. program within Fordham University are eligible for expedited admission into the advanced standing M.S.W. program of Fordham University. Advanced standing substantially decreases the number of credit hours required to complete a Master of Social Work degree. The New York State Education Department has granted Fordham University the authority to confer the B.A.S.W. Degree.

Fordham University offers a financial aid program to help students attend the undergraduate colleges. Some aid is available to both full-time students, taking 12 or more credits, and part-time students, taking

six to 11 credits. Some aid is available to full-time students only, and scholarships and awards are also available. The University's financial aid offices will answer questions and provide further information to prospective students.

Goals and Objectives

Goals

GSS seeks to prepare B.A.S.W. graduates who will:

1. Function as competent generalist practitioners with a commitment to human rights and social justice.
2. Practice with, and on behalf of, diverse populations, within agency settings to promote individual and community well-being.
3. Critically and systematically examine, evaluate, and utilize research and other sources of evidence to guide their practice within organizational and community contexts.
4. Practice with competency guided by a professional identity, values and ethical standards of behavior, as well as recognizing the need for ongoing professional development.
5. Prepare students for graduate studies in social work.
6. Develop self-awareness and critical thinking through liberal arts and social work classes.

Objectives

Upon completion of the B.A.S.W. program, graduates will be able to:

1. Function competently within agency settings.
2. Advocate for human rights and social justice for individuals, families, groups, and communities.
3. Utilize evidence-based practice within field instructor settings
4. Function competently as a generalist practitioner.
5. Promote individual and community well-being.
6. Value diversity within one's role as a social worker.
7. Engage in career-long learning.
8. Apply social work values and ethics within agency settings.
9. Demonstrate critical thinking in one's practice with individuals, families, groups, and organizations and communities.
10. Develop a B.A.S.W. professional identity.
11. Demonstrate undergraduate knowledge of government and social work policy within one's agency placement.

Curriculum Sequence Objectives

Program objectives are further elaborated into curriculum sequence objectives. These objectives as stated in their respective syllabi are listed by course below.

SOWK 6005. Contemporary Social Welfare Policy. (3 Credits)

Students will learn that human rights and justice drive social welfare policies and their implementation at the international, federal, state, and local levels. The course introduces students to the underlying values, assumptions and philosophical perspectives that have influenced the development of the US social welfare system, its goals, policies and programs. Students will learn about policy formulation, analysis, and the role of social work in policy development and implementation within their practice settings at the micro, mezzo, and macro levels. The course introduces students to the historical, social, cultural, political, economic, organizational, environmental, and global influences that affect social policy.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6040. Integrating Human Rights and Justice in Practice. (3 Credits)

Every person regardless of position in society or geographic location has fundamental human rights such as freedom, safety and security, privacy, an adequate standard of living, health care, and education. This course introduces students to how social workers may conceptualize the global intersections and interconnections of justice, equality and human rights. Students are introduced to an integrated practice framework that promotes human rights and justice and identifies the root causes of global social issues. They will explore theories that address human need, social, economic, and environmental justice, intersectionality, diversity, and oppression and discrimination. In this course, students learn how to recognize the extent to which a culture's structure and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Students learn to engage in advocacy to advance human rights social, economic, and environmental justice domestically and internationally.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6305. Social Work Skills Lab. (3 Credits)

This skill-based course is anchored in the knowledge of generalist social work practice. Students will develop competency in performing essential social work skills via simulations, role-plays and peer activities. These skills will be applied to working with client systems including individuals, families, groups, communities and organizations. Case scenarios developed for this course will reflect the realities of contemporary social work practice. The emphasis will be on student performance in using the engagement and intervention skills with various client systems.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6320. Social Work Practice With Organizations and Communities. (3 Credits)

This course uses a generalist framework to prepare students for direct social work practice with organizations and communities. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with organizations and communities. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with organizations and communities.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6323. Social Work Practice With Individuals Across the Lifespan. (3 Credits)

This course uses a generalist framework to prepare students for direct social work practice with individuals. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with individual clients. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with individuals.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6324. Social Work Practice With Families and Groups Across the Lifespan. (3 Credits)

This course uses a generalist framework to prepare students for direct social work practice with families and groups. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with families and groups. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with families and groups.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6440. Advanced Clinical Assessment and Diagnosis. (3 Credits)

The course builds on the skills, values, knowledge and processes of the generalist curriculum, serving as a bridge between generalist and advanced assessment theory and practice. Specifically, the course extends the person-in-environment assessment perspective of Generalist Practice with the addition of more intensive assessment of the individual's inner world, including psychodynamic conflicts processes and ego defenses. The course is entitled "Advanced Clinical Assessment and Diagnosis" rather than "Psychopathology" to remind students that clinical assessment need not lead to a diagnosis of mental illness. The course covers practitioner self-awareness; the relationship between mental health and mental illness; risk and resilience; bio-psycho-social-spiritual assessment; a strength-informed cooperative assessment process; a critical use of the DSM-5, and major types of mental illness and their evidence-supported treatments.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6803. Applied Social Work Research and Evaluation. (3 Credits)

This course introduces students to social work research. It focuses on the scientific method from the process of developing knowledge to critically evaluating research. Students will learn about formulating a research question; research methodology, including study design, sampling, measurement, and data collection methods; ethical issues in research; and understanding how to read and understand research reports and publications.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6901. BASW Generalist Field Education. (3.5 Credits)

Field education is an essential component of professional social work education. Students engage in focused practice and service work within an agency or organization that is approved by the Graduate School of Social Service and under the close supervision of a qualified professional. The intent of field education is to provide a synergy of learning by helping students integrate knowledge, values, and theoretical concepts from coursework in a real-world applied practice setting with client systems – individuals, families, groups, organizations, and communities. The Generalist Field curriculum is designed to facilitate students' mastery of the fundamentals of social work practice and the acquisition of the nine professional practice competencies required by the Council of Social Work Education (CSWE). Students are provided a minimum of 450 hours structured across two academic semesters to successfully demonstrate generalist-level social work practice competence. This includes 15 two-hour sessions for their BASW capstone seminar.

Admission

Preparing for Program Admission

Core Curriculum of Fordham University

The core curriculum provides students with a strong liberal arts platform from which to pursue upper-level study in social work. Students are expected to complete a substantial portion of the core curriculum before seeking admission to the social work program. Students are exposed to a wide body of knowledge, and are engaged in the cultivation of a spirit of inquiry, values and ethics, and critical thinking skills. The core consists of 18 courses drawn from nine disciplines and/or families of disciplines and seeks to provide all Fordham students with the liberal arts background that will prepare them for life. Courses may meet more than one core requirement, and detailed information is available in the Undergraduate Bulletin.

Social Work Prerequisites

In order to further strengthen the liberal arts base and bio-psycho-social knowledge of students entering the social work program, the following prerequisite courses are expected to be completed before program admission:

- One sociology course
- One psychology course
- One biology course (with emphasis on human biology)
- One American pluralism course
- One course related to contemporary government or social policy in the United States
- SOWK 2600 Introduction to Social Work and Social Welfare – This course provides an introduction to the values, knowledge, and skills of the social work profession. Focus is on the historical and contemporary roles and relationships of the social work profession to community problems, fields of practice, vulnerable populations, and social welfare history and policy.

Some of these prerequisite courses may also be applied to requirements of Fordham's core curriculum and/or to requirements of other majors and programs in the University. Therefore, it is helpful to discuss students' interest in the social work program as early as possible in their academic careers. With early mentoring by program faculty, students are able to choose courses within the core curriculum that also serve as social work prerequisites (such as biology and American pluralism). As in the case

of the core curriculum, the substitutions of courses taken at institutions other than Fordham University are evaluated on a case-by-case basis.

Admissions Policies and Procedures

Applicants to the baccalaureate program in social work must be accepted for matriculation by Fordham College at Lincoln Center, Fordham College at Rose Hill or Fordham School of Professional and Continuing Studies. Following their admission to the University, students may apply to the baccalaureate program in social work once they have completed a substantial number of core courses in the liberal arts (approximately 50 credit hours). Students entering the social work program will be expected to complete the 31 credits of the major within a two-year period (either on a full- or part-time basis) and should consider this in timing their applications. Transfer students will be formally considered for admission in the social work program once they have been admitted to Fordham University and have had a review and determination of credits to be accepted by the University.

The baccalaureate program in social work is interested in applicants who demonstrate both academic competency and personal characteristics that will serve as a sound base for professional development. Therefore, a combination of admissions criteria is used for evaluating applicants.

It is usually expected that an undergraduate GPA of at least 3.0 on a 4.0 scale will have been achieved in courses taken before applying to the social work program. An applicant may have had a successful experience in areas related to social work practice, and/or may have demonstrated a capacity for professional work by virtue of study in other areas related to social work. The GPA is reviewed within the context of the total application. If a student's GPA is below 3.0, they may be offered a conditional acceptance. With a conditional acceptance, the student must receive a grade of B or above in their first two social work courses to continue in the program.

A basic facility in English communication is required for admission to the program and for continued enrollment. The autobiographical statement that is part of the application provides the social work program with the opportunity to judge whether the applicant has the writing ability necessary to be admitted and to remain in the program. Candidates will want to be certain that their autobiographical statements are fair samples of their abilities to use the written word and are at the same level of proficiency that the faculty might expect in response to writing assignments given in class. Applicants should also note that an interview is required as part of the admissions process.

Also as part of the admission process, the course instructor of SOWK 2600 Introduction to Social Work and Social Welfare is asked to evaluate the performance of students in their class when students apply to the program. This evaluation is based on a variety of factors, including academic achievement, openness to new ideas, and readiness to become seriously involved in the learning process.

There are a number of characteristics deemed to be desirable in people who wish to become a social worker. Among these are maturity of judgment, openness to new ideas, capacity for the development of self-awareness and readiness to change, and acceptance of differences in people. There are other qualities considered essential, which include commitment to social and institutional change and possession of values consistent with those traditionally associated with the social work perspective. Work in social or civic organizations—either paid or volunteer—is viewed favorably as evidence of the kind of motivation sought in

applicants. Persons completing letters of reference will be asked to evaluate the applicant on these qualities.

The following is required as part of the application process:

1. Application form completed in full
2. Autobiographical statement
3. Evaluation of performance and professional readiness by student's instructor of SOWK 2600 Introduction to Social Work and Social Welfare
4. Two letters of reference, at minimum one of which is from an instructor of a course taken by the applicant within the last two years
5. Completion and signature on "Release of Student Records"
6. Admission interview

All application materials are held confidential and shared only with those persons directly involved in the admission process. All records and documents become the property of the baccalaureate program in social work of Fordham University.

Plans of Study

The coursework is spread across four semesters. You can start your B.A.S.W. program starting in the fall or spring semester.

The first year consists of four classroom courses and faculty advising, and the second year consists of four classroom courses, the Field Practicum and Integrative Seminar, and faculty and field advising.

SOWK 2600 Introduction to Social Work and Social Welfare must be taken before beginning the remaining courses in the curriculum.

Regardless of when you enter the program, you must complete the first year's four classroom courses before entering the Fieldwork Practicum.

First Year		Credits
Fall (A) or Spring (B)		
SOWK 6005	Contemporary Social Welfare Policy	3
SOWK 6040	Integrating Human Rights and Justice in Practice	3
Spring (A) or Summer (B)		
SOWK 6320	Social Work Practice With Organizations and Communities	3
SOWK 6803	Applied Social Work Research and Evaluation	3

Credits		9.5
Total Credits		31

Availability

The major in social work is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester. Social work major courses are offered at the Lincoln Center campus (for all students) and at the Westchester campus (for School of Professional and Continuing Studies students only).

CIP Code

44.0701 - Social Work.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Curriculum and Courses

Curriculum

The Fordham University baccalaureate program in social work is designed to prepare students for positions as generalist social work practitioners in human service agencies. The program builds on students' strong liberal arts experience required through Fordham University's core curriculum and selected prerequisites for study in social work. Once students are admitted to the program, they participate in a variety of learning experiences, including eight classroom courses and 450 hours in field placement and integrative seminar, enhanced by individual and group advising activities.

The B.A.S.W. curriculum, built upon on a liberal arts perspective, prepares students for generalist social work practice. The curriculum is based on an emphasis on a human rights and social justice perspective within an ecosystemic perspective. In addition, the B.A.S.W. program is committed to the promotion of individual and community well-being.

Generalist Social Work Practice Framework

The program's definition of generalist social work practice was prepared in consultation with faculty and is consistent with the generalist practice model of the Graduate School of Social Service. The curriculum prepares graduates for direct, generalist social work practice with individuals, families, groups, communities, and organizations, provided under the auspices of human service agencies and related institutions. Because emphasis is given to the common factors in social work, graduates have a strong base of knowledge and skills that can be adapted to particular settings, environments, and populations.

The program's generalist practice model is an integrative approach to practice, which attends to the profession's focus on person in environment. Students in the program learn to see beyond the narrow boundaries of separate cases and to appreciate client troubles (e.g., inadequate income, substance abuse, domestic violence) in the context of public issues (e.g., policy debates on welfare reform and health

insurance) and agency regulations (e.g., eligibility criteria, screening procedures). They learn to move across system levels and among practice methods based on their assessment to improve the adaptive fit between person and environment in which person is a metaphor for the various size client systems.

The program's vision of generalist social work is distinguished by a common base of knowledge (i.e. ecosystems approach and person-in-environment framework) and common practice principles (i.e. centrality of the client and worker relationship and professional use of self). Fordham believes that a solid understanding and use of phases of assessment, planning, contracting, intervention, and evaluation permeate all social work practice, and continue to do so in light of changes in fields of practice, demographic trends, or in the reconfiguration of service delivery systems.

The knowledge and principles of generalist social work are put into practice through the use of common skills (i.e. engagement and contracting) and roles (i.e. advocate and facilitator). Generalist practice skills and roles are those that are easily adapted to use in diverse settings, across client populations, and levels of intervention that include individual, family, group, organization, and community.

Generalist practitioners have the capacity to move flexibly among roles, with a repertoire of skills applicable to work with client systems of varied sizes. This orientation serves graduates of the program throughout their professional careers. Graduates have the capacity to use their knowledge and skills in serving the needs of clients in a variety of social work venues. Generalist practice also serves as an excellent platform for education and training, including advanced social work practice and specialization in fields of practice, populations, or modalities. Generalist social workers are prepared for life-long learning with the tools to face professional challenges.

The Fordham B.A.S.W. program prepares graduates for direct, generalist social work practice with individuals, families, groups, communities, and organizations, provided under the auspices of human service agencies and related institutions. The education of students in the B.A.S.W. program emphasizes the common factors in social work with a broad range of client populations, in a variety of settings and on multiple levels of practice. Thus, graduates bring a strong base of generalist social work knowledge and skills to be adapted to particular settings, practice, environment, and population. This base is then broadened by specific knowledge about the employing agency, modes of practice, clients, community, constituencies, and other salient factors.

Combination of Curriculum Elements

The program's curriculum design incorporates two features: a commingled model of classroom education, and separate and distinct field instruction and advisement for students.

The commingled model of classroom courses is the component of the curriculum that includes both undergraduate and graduate social work students. The model takes advantage of the rich resources of the Graduate School of Social Service by having undergraduate social work students learn in the same classes along with graduate social work students in the foundation year of study. Students are therefore able to interact with a wider range of teaching faculty and fellow students than would be available to such a relatively small cohort.

The diversity of students in terms of age, race and ethnicity, employment history and status, and social work related experiences is remarkably similar to the diversity of graduate students, thus contributing to a "fit."

B.A.S.W. and M.S.W. students report positively on the learning model; that they are prepared for meeting graduate course expectations and that they find they are welcomed and encouraged to be active class members. With the use of master syllabi, common reading assignments and regular meetings of teaching faculty in foundation curriculum sequences further insures consistency across sections. Thus, the program can insure consistency in course content across the sections in which students are enrolled.

The field education component of the program is operated independently, thus enabling the program to maintain its distinct identity and achieve its objectives. A rigorous screening for undergraduate field placements to provide generalist practice opportunities and quality supervision is conducted. Students in field instruction participate in a bi-weekly integrative seminar solely for students in the B.A.S.W. program.

The advisement system of the program is operated independently and includes both individual and group components. The program's advisement system supports the development of a sense of community and support among undergraduate social work students and program faculty. It complements the commingled classroom model, and provides forums to address the special needs of students launching social work careers and/or new educational pursuits following graduation.

Field Education Overview

Field education is an integral part of the academic preparation of the baccalaureate program in social work. The field practicum and bi-weekly integrative seminar provide a vital learning experience in professional practice.

The field education component of the B.A.S.W. program is operated independently of, but in close collaboration with, the Graduate School of Social Service's field work department. This decision is based on the social work program's intention to maintain the program's distinct identity and objectives and to address the specific needs of undergraduate students.

The program expects its field agencies to adhere to policies on nondiscrimination, affirmative action, disability, and sexual harassment. Agencies that do not adhere to such policies will not be used as field placements.

The responsibility for field placement location and coordination is that of the B.A.S.W. field coordinator. However, there is a great deal of cooperation and consultation between the program and the field work department of the Graduate School of Social Service. For example, undergraduate and graduate faculty and administrators communicate often during the process of developing new field placements to avoid confusing agencies and duplicating efforts. If one program cannot accommodate a request for students, they share the placement opportunity which is then investigated for appropriateness for the other program.

Field instructors have an M.S.W. degree and at least two years of post-master's experience. First time field instructors who supervise program students are expected to attend the Seminar in Field Instruction (SIFI) that is offered each year by the Graduate School of Social Service. This seminar, focusing on how social workers can effectively take on the new role of field instructor, is taught by social work program faculty and staff.

The primary purpose of the program's field experience is to provide students with the opportunity to engage actively in generalist practice that complements and reinforces classroom learning. Students are engaged in every stage of the process, from preparing for entry into the field to their evaluation of the practicum experience. The field component enables the student to demonstrate their investment and competence in social work practice.

The setting for field education is a social service agency. The B.A.S.W. field coordinator and field supervisor work closely to plan learning opportunities that meets the educational needs of the individual student and the objectives of the program. Field education settings represent a cross section of social work practice in the greater New York metropolitan region (New York, New Jersey, and Connecticut) and reflect a wide range of social service programs.

Field Options

The field education model consists of approximately 16 hours of field education, usually scheduled two-three days per week, for a total of 420 hours in the agency and 30 hours in the accompanying integrative seminar for the academic year. Field placement begins in September and typically ends in early May. Students are expected to be available for their field placement **during the agency's regular working hours**. This requirement provides the student the opportunity to participate in such learning experiences as staff meetings and professional consultations. Students who are employed are encouraged to discuss their educational goals with their employers and request accommodations in their work schedules to be available for their field placement.

Employment-based Field Placements

Some students are able to meet their field education requirement through the social service agency where they are employed in a social work capacity. Students interested in this option should indicate this preference to the B.A.S.W. field coordinator. They are asked to speak first to the director of their agency or agency department to gain approval for this request. The program will then evaluate the agency's appropriateness as a field learning setting for the social work student.

In order to be considered for a employment-based field placement, the following criteria must be met:

1. Students must have been employed by the agency for at least six months prior to work study application.
2. Students must have a new learning experience different from their work responsibilities, as their field work component.
3. The supervisor must be a qualified M.S.W., with two years post-M.S.W. experience. This supervisor must be different from the student's work supervisor.
4. The agency must provide time for the field instructor to meet with the employee/student for a minimum of one hour per week, and to attend the SIFI course if it has not been taken already.
5. The agency must sign a work study agreement insuring that program's requirements can be met.

Relationship with Field Agency

The program and field work agency are partners in the education of baccalaureate students in social work. The B.A.S.W. field coordinator serves as the field adviser. Because ongoing relationships with agencies are fundamental to ensure sound educational field experiences for students, it is essential that the field adviser maintains a pattern of

regular contacts with agencies. Field instructors complete a six-week evaluation of the student that alerts the faculty adviser to any issues early in the internship. Students keep journals which they submit to the B.A.S.W. field coordinator in the Integrative Seminar that enhances communication, and helps to identify any issues in field work. Students are encouraged to share their experience both in and outside of the seminar with the B.A.S.W. field coordinator. Agency visits are the main way of ensuring the maintenance of a relationship and communication necessary for effective educational field experiences for students. Therefore, at least one visit is made to the agency each year. The visit(s) are intended to maximize the potential for student learning by addressing three principal objectives of field teaching:

1. Assist the agency in establishing and maintaining an effective learning environment.
2. Assist and support the agency supervisor in the role of field instructor.
3. Monitor the learning experience, assist the integration of the individual student and relevant agent personnel and productively intervene when learning impediments or difficulties are identified.

During the visit the field coordinator meets with the field instructor, the student, and other relevant personnel to discuss the student's progress. The visit also may be coupled with an individual conference with the student. The faculty adviser reviews:

1. How field education is affecting the agency
2. Student's relationship with agency personnel
3. Quality of student contact with clients
4. Nature and number of assignments carried by the student
5. Time allotted for supervisory conferences
6. Nature of the supervisory contract
7. Student's process recordings
8. Learning opportunities other than specific student assignments
9. Space for students
10. Viability of agency as a field setting

As consultant to the field work agency, the faculty adviser is responsible for knowing the structure, function, staff and other pertinent information about the agency. It is especially important that the faculty adviser be aware of changes in agency structure, services, and staff that may influence the quality of the student's educational experience. Consultation may be planned with the field instructor's supervisor or agency educational coordinator as indicated.

At least two process recordings per semester are submitted by the student so that the individual student's perception and concerns can be reviewed and addressed. The session provides the student, on a consultation basis, with alternate ways of thinking about problems, increased self-awareness, and the opportunity to individualize academic and field career planning. Individual conferences provide the faculty adviser with time to help the student to clearly identify his/her own learning needs and deficiencies, and place these in the context of student strengths, current functioning and future goals. The adviser can assess whether the field placement is providing the student the opportunity to practice with diverse populations and populations at risk, to engage in practice assessment, and to have assignments in accordance with the program's curriculum. The B.A.S.W. Field Coordinator will meet with the student during the first two months of their internship to systematically review their performance and progress in their internship and classes.

Integrative Seminar

All students in field placement participate in the integrative seminar, which meets for a total of 15 sessions during the academic year. The overall purpose of the integrative seminar is to assist students to combine what they learn in the classroom with what they learn in the field. The seminar is structured to provide students with a forum where they can share their experiences from the field and classroom, work towards the development of increased self-awareness, and receive additional knowledge to supplement their academic and practical experience.

The integrative seminar is led by the students' faculty adviser. Attendance is required as part the student's obligation to fulfill 450 field practicum hours. The seminar is considered part of the student's field education and does not earn a separate grade or additional credits for the student.

Upon completion of the integrative seminar, students are expected to:

1. Develop basic skills for building and using peer support
2. Develop an understanding of their professional identity and their role as a generalist practitioner
3. Develop basic skills to manage the affective content inherent in social work practice
4. Develop an understanding of the common base of social work practice across a wide range of settings
5. Develop basic skills necessary for working with diverse populations
6. Develop an awareness of the role of supervision in social work practice and basic skills in regard to how to get the most out of their supervision
7. Develop an understanding of the importance of continuing to work towards an increased sense of self awareness
8. Develop an understanding of how to apply classroom knowledge to their work in their field placements
9. Develop basic skills in critical thinking to enable them to identify, evaluate, and make decisions regarding ethical dilemmas and value conflicts in agency practice in the context of their personal and professional values
10. Develop tentative plans for future employment, education, and/or interests in the profession

The integrative seminar incorporates a variety of learning strategies, including discussion, brief lecture, student presentations, invited guests, etc. It provides a forum for sharing student concerns and problem solving through mutual aid and support. The seminar pays particular attention to helping students apply content on diversity, social justice, social policy, and advocacy in the field experience. The energies of the faculty adviser and students are directed towards integration and application of knowledge and skills. Content is timed to the stage of student development over the course of the year and moves to deeper levels of inquiry.

While the seminar's primary focus is students' work in class and field, attention is placed on planning for the future. This may include exploration of practice fields and preparation for employment as well as discussion and planning for future education.

Placement Process

In the spring semester prior to entering the field placement, all students complete field forms which reflect their particular interests and experiences. While efforts are made to correspond to the students'

interests, the emphasis is placed on arranging a field placement that provides a generalist practice experience. Students are encouraged to suggest possible placements to their faculty adviser for exploration. Follow-up on their suggestions is done by the B.A.S.W. field coordinator. The placement is made by the program based upon program requirements, agency capacities, and student needs. Students are informed of their placements by the B.A.S.W. field coordinator. Once a potential internship is identified, the B.A.S.W. field coordinator sends a copy of the student's resume to the potential field supervisor. The B.A.S.W. field coordinator discusses the opportunity with the student. If it seems like a good match, an interview is arranged between the potential field supervisor and the student.

Before placements begins, the program shares information about the student and the program with the agency. This review of the student's educational and experience background, interests, and learning needs becomes a source for the formulation of an early educational plan for the student. This initial information is useful in planning educational goals and in the field instructor's selection and assignment of cases.

Field Agency Requirements Overview

Agencies having student placements are expected to be committed to the fact that students are learners and understand that performance of students is not that of staff members. Agencies are expected to provide a diversity of assignments according to student educational needs and to provide the concrete needs, such as sufficient workspace, which are necessary for professional practice. At the same time, agency needs are respected. Learning assignments of students should not impede or hamper the agency's everyday functioning.

Agencies are to commit time for their field instructors to supervise students one to one-and-one-half hours per week and time to complete written evaluations. The agency should provide students the opportunity to attend staff meetings, in-service training, or other such meetings as may occur for the general staff.

The field placement provides students with a generalist practice experience. The program views the generalist practice model as an integrative approach to practice which attends to the profession's person-in-environment focus. Through the integration of classroom, field, and advising, students learn to move readily across system levels and among practice methods.

Field agencies are expected to provide students with the opportunity to work with a range of client systems and should provide experiences with multi-level practice in which students work with individuals, families, groups, communities, and organizations to the extent possible. At minimum, the field agency should provide opportunities for the student to work with clients at three client system levels with at least one of the three at the macro level of organization or community (in addition to their work with individuals, families, and/or groups). If an agency is not able to provide this minimum range, the B.A.S.W. field coordinator assists the field instructor in exploring possible alternatives.

The student should have approximately 8 of their field placement hours in direct service to clients, including collaborative and collateral visits. Building up a caseload occurs over time. B.A.S.W. students frequently shadow a social worker or other qualified staff member prior to working independently with clients. All students should have one to one-and-one-half hours of supervision per week. The remaining hours are used for administrative responsibilities, including agency recording,

telephone calls, preparing for conferences, writing reports, etc. Time may also be used for consultation with field instructor, staff meetings, and other learning experiences in the setting and within the community. **It is not expected that the student be able to complete process recordings during agency time.**

Agencies need to inform the B.A.S.W. program of changes in any of the following:

1. Agency address or telephone number
2. Agency director or coordinator
3. Field instructor
4. Pending strike or labor dispute
5. Absence of field instructor from the agency for more than one week
6. Student absence for more than three days
7. Significant program or agency changes that affect day-to-day work

Hours, Holidays, Absence, and Make-up Time

Students observe agency hours and holidays except for Thanksgiving, Christmas, and spring recess, when students will not be in field education. Absence from field education up to three days, due to illness or other emergencies, will be managed in the agency. When there are only three days of justifiable absence, the time need not be made up. Arrangements for religious observance are made between the student and the agency. The supervisor should consult with the faculty adviser about any absence in excess of three days. All field placements total a minimum of 420 hours in the field for the academic year. Sometimes students may wish to change the number of hours a week they attend placement with a consequent change in the ending date for the year. Such changes are sometimes possible provided they have the advanced approval of the field instructor and the faculty adviser.

Travel

The agency is expected to reimburse students for travel expenses when travel is part of the required field work assignment.

Home Visits and Safety in the Agency

Home visits are an important part of social work and should be included when appropriate. The agency and student need to make provisions for safety. The social work program recommends the following safety guidelines for students while in field work. Students need to take appropriate precautions regarding:

1. Time of day for home visits
2. Use of main streets for walking
3. Appropriate dress
4. Traveling with official agency identification
5. Use of escorts when necessary for home visits
6. Making sure agency knows date, time, location, and purpose of visit
7. Not being in the agency by oneself
8. Having access to an emergency phone

The agency should provide security to students in the same measure as provided to employees. This includes orienting students to procedures they should follow for their own safety. In the event of an emergency during the placement, the field instructor should be notified as well as

the faculty adviser. The program director should be notified if the faculty adviser is not available.

Labor Disputes

In cases where there is an anticipated strike or slowdown, agencies must notify the student's faculty adviser immediately. When social work staff is involved in a strike against the agency, students are withdrawn for the duration of the strike. Students are not expected to cross picket lines. The University assumes neutrality. The faculty adviser will be available for consultation in these instances and assumes responsibility for providing the field practicum experience.

Malpractice Insurance

The University provides liability insurance for its students during their field work. The insurance covers claims alleging negligent acts of students that result in harm to clients/client systems served. The policy has an applicable limit of \$1,000,000 per occurrence and \$3,000,000 aggregate for each student in field. The insurance is in effect only during the term period of the student's field practicum experience at the designated agency site. A certificate of insurance may be provided to the agency site upon request.

Qualifications and Requirements for Field Instructors

Prospective field instructors must be graduates of accredited schools of social work, with at least two years of post-master's practice in a social service agency. In recommending a field instructor, agencies attest to the supervisor's ability to impart the knowledge and values of the profession of social work.

Supervisors new to field education must attend a course called Seminar in Field Instruction (SIFI). SIFI is a mandatory course given without charge. Field instructors who have completed the SIFI course at another social work program in the New York City metropolitan area need not take it again. The purpose of SIFI is to provide new field instructors with the knowledge and skills necessary to effectively meet their educational responsibilities as teachers of social work students.

Role and Responsibilities of the Field Instructor

The field instructor is a professional role model for the student. The field instructor conveys specific and general areas of knowledge and skill, provides a stimulus for the student's systematic and reflective thinking about social work theory and practice, and serves as a source of control and direction. The special kind of educational relationship that is established in this tutorial encounter is crucial for the learner.

Field instructors relate not only to the specific practice or methodological orientation of their agency but teach broader concepts by moving out from the specific case to the general professional experience, relating to the theories underpinning practice. This requires skill in moving back and forth from inductive to deductive levels in teaching. Effective field education not only imparts knowledge but encourages the student in the independent use and testing of the various content areas of the academic curriculum, sets clear goals, and fosters a systematic progression in learning related to the student's individual learning needs.

Prior to the student's arrival at the agency, the field instructor should prepare using the information obtained from the school so that there may be appropriate initial activity through which the student's normal anxiety

and insecurity will be lessened. In addition, the student needs to feel that he/she is part of the staff and has something to contribute to the agency.

In order to facilitate the introduction of the student to the agency and to professional practice, the student should be given some general idea of the function and structure of the agency very early. More extensive information on the policies and the functions of the agency and of other agencies and community resources can be given in relation to the student's individual assignments since it is recognized that the student learns this best in relation to particular situations. The initial interview students have with a potential supervisor provides an opportunity for the student to learn about the agency and the department they may be interning in. They should use this opportunity to ask questions about both the agency and the type of work they would be doing if they were to be an intern there.

There are times when supervisors assign students to special projects that are part of another program or department as part of their learning experience. It may be necessary then to assign another supervisor to help the student with this task. There are other times, such as when the field instructor might be absent, that a task supervisor should be assigned to the student. The task supervisor consults with the student's field supervisor as to learning needs and progress. The primary responsibility for the student's learning remains with the field instructor.

The field instructor needs to schedule a minimum of one to one-and-one-half hours per week on a regular basis for individual conferences with each student. Conference periods may be divided into two sessions if necessary. This time should be safeguarded so as not to allow interruptions. During the first few weeks that the student is in the agency, the field instructor should be accessible to the student for brief periods outside scheduled conference time, but this should not take the place of the individual conference. The time given by the field instructor for selecting assignments, reading student's records, or planning for students should be outside of individual conference periods.

Student conference periods should be planned for, and prepared for by both the student and the field instructor so that each may have the stimulation and responsibility of participating. The student should prepare recordings sufficiently in advance of the conference period to enable the field instructor to read the material. The conference can then be focused on the student's thinking and understanding and on planning the next steps. It is essential for sound learning that each keep notes of conferences in order to link thinking and planning from one conference to the next and to provide a base for the formal evaluation.

The field instructor's teaching should be focused on specific situations and consciously correlated with appropriate principles and concepts so that the student is helped to integrate theory and practice. Criticism should be given constructively and in the amount that the student can assimilate. The focus should be kept upon the case material so the student may understand the relevancy of the criticism and not personalize it. Thus the field instructor may suggest better use of self in the helping process without damaging the student's self-confidence. In this way, the students will be helped to develop a professional self and to feel free to look at their own attitudes and feelings as they affect their work. Students may have problems in relation to understanding and accepting themselves as a social worker. The field instructor is expected to help with this professional identification.

Educational Planning

Overview

In order to achieve the objectives of field education, it is essential for the field instructor to develop an educational plan. The first step in formulating this plan is to develop a supervisory contract. Student and supervisor discuss the student's experience, past supervision, professional interests, and learning goals, as well as curriculum requirements and evaluation criteria. From this, supervisor and student enter into a contract.

The educational contract delineates the following mutual expectations:

1. Number and type of assignments
2. Recording requirements
3. Schedule and format of supervision
4. Educational goals for the semester and the year

This contract will be written by the field instructor and submitted to the B.A.S.W. field coordinator. It serves as an important guide for the student and field instructor throughout the year. The educational contract is elastic in that it is open to negotiation as new learning needs arise throughout the year. The educational plan also takes into account the student's tempo of learning. It indicates how the field instructor will help students use professional strengths to achieve agreed upon learning objectives. It is highly recommended that the student be given assignments and meet some of their clients as soon as possible. It is recommended that early reading of records by the student be limited to those for which the student will be responsible. The B.A.S.W. field coordinator provides an educational plan for the field supervisor and student to complete.

Student Process Recording

Process recordings are an essential tool for both learning and teaching the practice of social work. Student written work enables the field instructor to make an adequate educational assessment of the student and helps the student reorganize his/her learning needs. The B.A.S.W. field coordinator will also review samples of student process recordings with the student to assess their progress.

For the baccalaureate program student, process recording is essential to inform the field instructor about what the student is doing with clients. One or two process recordings per week are required throughout the placement. Other techniques for direct monitoring of student work such as audio tape and videotape may be used to supplement, but not replace, process recording. Students should also be taught how to write case summaries, letters, statistical reports, and other records germane to the agency's program. Process recordings and other materials should be kept in a secure place in the agency in order to insure confidentiality.

Process recording is a teaching method utilizing a detailed written description of what occurs during a client(s)/student contact. At the beginning of the academic year, students and field instructors are given our process recording manual that details the structure of process recordings and provides numerous examples of well-structured recordings.

All process recordings, regardless of format or size of client system, include the verbatim exchange of what transpired during the session. Process recordings should be required for a variety of students'

assignments, and when possible, should include group, family, and community sessions in addition to individual contacts.

Student Journaling

Throughout the field work year, students will be required to submit reflective journal entries to their integrative seminar instructor on specific field education issues.

Student Field Evaluations

Evaluation is an important part of the educational process and should be ongoing throughout the year. Written evaluations are done twice yearly, shortly before the end of each semester. These formal evaluations enable the program and the student to see how well the student is applying social work knowledge, values, and principles to practice. They provide the opportunity for both field instructor and student to take stock of the student's skill development and of the supervisory process. The evaluation form also serves as a planning tool. The list of skills contained in the evaluation can guide the field instructor in making assignments and monitoring the student's work.

Written Evaluation

The program provides forms for the written evaluation that is submitted electronically, containing checklist and narrative components. Evaluations should be discussed jointly after the student and field instructor have each reviewed the semester's work and the evaluation form. However, while the student should have input into the process, it is the field instructor's evaluation. Following mutual discussion, the field instructor writes the evaluation and reviews it with the student. Students are expected to achieve a rating of "Competent" in most skill areas.

The written evaluation is divided into sections that address engagement skills, data collection, contracting, intervention and case management skills, and supervisory and professional relationships. Students are given a final rating that includes outstanding, very good, satisfactory, marginal passing, and unsatisfactory performance.

- An **ADVANCED COMPETENCY** rating is given to students who have demonstrated superlative performance in the field, highly integrating classroom and practice skills with a strongly developed, consistent "conscious use of self."
- A **COMPETENT** rating is given to students who fulfill the learning assignments in the field assignment but at a beginning level.
- An **APPROACHING COMPETENCY** rating is given to students who demonstrate an understanding of practice skills but are very uneven and tentative in their demonstration of skills in practice. There may be difficulties in the supervisory or professional relationship that warrant this assessment.
- An **UNSATISFACTORY** rating is given to students who do not understand nor are they able to utilize social work skills in practice. They may demonstrate a substantial ethical gap in their social work skills and may demonstrate major difficulties in the relationships with supervisors and professional colleagues.

The student is presented with the completed evaluation and is asked to sign the evaluation, indicating only that it has been read. Field instructors may decide to have a final discussion about the particular ratings and comments, particularly if there is some disagreement.

At the end of each semester, students independently evaluate the field practicum experience as part of the integrative seminar. This evaluation

focuses on the student's assessment of his/her progress, the agency environment for learning, and the contributions of their field instructor.

Grading of Students in Field Education

Field education is a year-long course and is graded by the faculty adviser on a pass/fail basis. At the end of the first semester, if the student is progressing well, a grade of In Progress (IP) is given. Grades of satisfactory (S) or unsatisfactory (U) are given upon completion of the course, i.e., at the completion of the 420 hours and accompanying integrative seminar in May. Since field education is a full year course, no credit can be given if a student withdraws before the end of the academic year.

The B.A.S.W. field coordinator relies heavily, though not exclusively, on the written evaluation from the field supervisor in assigning a field work grade. Other factors that are taken into consideration are:

1. Other information from the supervisor and other personnel at the time of the field visit
2. Student's process recordings and reflective journaling
3. Information from individual conferences
4. First-hand observation in the integrative seminar
5. Feedback from classroom instructors

Program students are expected to maintain performance standards in the field practicum, as well as in the social work classroom. The full policy describing the maintenance of satisfactory progress in the program and the "program continuance review" mechanism appear in the policy and procedures section of this document.

In the Event of a Problem

A learning problem is that which impedes a student's understanding, acceptance, and use of knowledge in their professional performance. There are multiple circumstances that might result in a learning problem. For example, a learning problem may result from a student's individual reactions, cognitive style, or approach to new learning situations. The learning problem may also be the result of a difficult match between supervisor/agency and student. It is important to get to the root of the problem in order to determine an appropriate solution.

The field instructor is expected to discuss, as part of the educational process, the student's emotional reactions, with focus on the case material, as they affect their ability to work with clients. If it becomes apparent that the student has difficulties or any other problems that interfere seriously with training, the field instructor has the responsibility to bring this assessment to the faculty adviser. After reviewing the situation with the field instructor and student, the faculty adviser may request an administrative review.

Students are rarely removed from agencies in the middle of the year. When this is necessary, it is only for serious educational reasons and only after the adviser has attempted to resolve the problem with both student and field instructor. It is important that students and field instructors work through the above process in resolving differences. In the midst of a frustrating situation in the agency, the field instructor or the student may be tempted to short circuit the process and terminate the placement prematurely. Such action makes it very difficult for the program to assess what went wrong and to plan appropriately for the student. The program established the field placement and must be a full partner in any decision to end it. In addition, when early and full use is made of the

faculty adviser, many placements that are in jeopardy can be turned into productive learning experiences.

In the case of an "unsatisfactory" evaluation from the field instructor, the B.A.S.W. field coordinator has the following options:

1. To reject the unsatisfactory evaluation and give a "satisfactory" grade
2. At mid-year to reject the unsatisfactory evaluation and recommend replacement with the final grade to be determined on the basis of work in the new placement
3. To accept the evaluation and give an "unsatisfactory" (failing) grade in field work. A "program continuance review" meeting will be called, which may determine that the student may repeat the course, subject to availability of an agency, selected by the school, willing to accept the student. The student will be considered on probation and at risk. A placement with appropriate additional support and attention to the student will be sought.
4. To accept the evaluation and give an "unsatisfactory" (failing) grade. A "program continuance review" meeting will be called, and may recommend that the student be discontinued from the program.

There may be times when agencies are unable to fulfill their responsibilities and obligations as field placements. For example: the intended field instructor may leave with no replacement; the quantity or nature of assignments may not be appropriate for student learning; organizational reorganization may result in a chaotic situation; or agencies may be confronting severe external or internal demands and pressures as to present an obstacle to student learning. Under such circumstances, the B.A.S.W. field coordinator in conjunction with the student and the program director will review the situation to determine if a change in placement is warranted.

Students with field related concerns are encouraged to confer with their field instructors. Should the concerns remain unresolved, they may confer with the B.A.S.W. field coordinator and following that, the program director.

Advisement Overview

All students matriculated in Fordham University are assigned a faculty advisor. Advisors assist students in planning their academic careers, their choices of courses, and the fulfillment of the requirements. In addition, advisors help students to choose majors and to discuss future interests. While students must have some contact with their assigned advisors, they are encouraged to seek guidance from other members of the Fordham community. Most students have had contact with faculty in the social work program before they are admitted.

Students who express interest in social work but are not yet ready to apply can seek consultation with the director of the B.A.S.W. program for information, including suggested plans of study in preparing for admission to the program. University faculty advisors and students interested in social work are strongly encouraged to consult with the program director as frequently as needed. In addition to consultation with program faculty, discussion with students already enrolled in the program is encouraged.

Following admission into the program, the B.A.S.W. program director becomes the student's "official" advisor and assumes the responsibilities of advisors across the University. In addition, students are encouraged to maintain mentoring relationships with faculty in other departments,

especially when they are pursuing another major in addition to social work. If a student leaves the program without finishing the required classroom courses and field education, he/she is assigned another faculty advisor from within the University.

The faculty advisement system of the program is operated independently of the Graduate School of Social Service and includes both individual and group components. The program's advisement system supports the development of a sense of community and support among undergraduate social work students and program faculty. It complements the collocated classroom sections and provides forums to address the special needs of students launching social work careers and/or new educational pursuits following graduation.

Students have already become familiar with program faculty during their pre-application advisement period and have met many of their fellow students while taking core curriculum and social work prerequisite courses, such as SOWK 2600 Introduction to Social Work and Social Welfare. These bonds are nurtured as students enter the program together and are introduced to program students already taking social work classes.

The program's advisement activities serve to sustain students as they engage in a rigorous course of study in classroom and field, and include the following:

1. Group advisement.
2. The integrative seminar for students in field education.
3. Frequent individual contacts with faculty advisors.
4. Encouragement of networking among program students through formal and informal mechanisms.

The B.A.S.W. program director assumes responsibility for helping students plan their course of study and work towards their post-graduation goals. The B.A.S.W. program director attends to the needs of students in both classroom and field and assists them in the integration of their classes in social work, their field experiences, their other course work in the University, and other significant life activities.

The B.A.S.W. Program Director meets individually with students for regular consultations and special meetings called by either the faculty advisor or student. Students in field placement participate in the integrative seminar, a group facilitated by the faculty advisor that meets 15 times during the academic year. Attendance at advisement meetings and seminar sessions is mandatory.

Program Director Functions

The functions of the B.A.S.W. program director as they relate to students are to:

1. Know the students and their educational program.
2. Contact classroom instructors regarding concerns about students' academic progress.
3. Plan an academic program with the student.
4. Help identify personal concerns that stand in the way of achieving educational goals.
5. Help students deal with frustration and disappointments.
6. Help students internalize professional norms and controls when this involves clarification of expectations.

7. Enlarge students' self-awareness and understanding of use of self in the educational professional context.
8. Enrich students' efforts to develop professional values.

Course Advising Individual Approaches

It is necessary that the B.A.S.W. program director to assist students with their plans of study and to evaluate their progress. The B.A.S.W. program director has access to teachers and students. Students may share their academic concerns with their faculty advisors, or teachers may alert the faculty advisor to a student's potential academic difficulty.

Group Approaches

The program facilitates the communication of all students in the program via the B.A.S.W. program Blackboard page, and informal networking is encouraged.

The B.A.S.W. program director provides information about the social work curriculum and program requirements and facilitates the integration of the students in the program and the Graduate School of Social Service community.

Policies and Procedures Overview

It should be noted that students in the B.A.S.W. program are subject to the policies of Fordham University that govern all undergraduate students. University policies are distributed to all undergraduate students in the student handbook and are discussed in orientation and advising sessions early in their academic careers. The social work program abides by the University's policies on nondiscrimination, affirmative action, disability, and sexual harassment. While the B.A.S.W. program retains the right to terminate students from the program if warranted, only students' college of matriculation can end their enrollment in the University.

Policy on Student Continuation: Program Continuance Review

The policy on student continuation in the B.A.S.W. program provides an established procedure to determine if a student in academic difficulty in course work or field education should continue their enrollment in the B.A.S.W. program. This same procedure is followed to consider termination of students for non-academic reasons such as drug use, violent behavior, or criminal misconduct. The program continuance review process is initiated in the event of specified academic and non-academic conditions.

Students enrolled in the social work program must maintain a grade point average of at least 3.0 and either IP (In Progress—first semester field) or S (Satisfactory—second semester field) in field education to maintain good standing in the program. Students must demonstrate satisfactory progress in order to enter field education and must maintain satisfactory progress in both field and classroom courses in order to maintain program standing. In addition to these policies, students are subject to University policies regarding overall academic achievement.

A program continuance review is instituted by the program in the event of any of these conditions:

1. When a student's GPA (social work courses only) falls below 3.0.
2. When a student receives a grade below B in any of their social work classes.
3. When a student receives a grade less than IP or satisfactory in their field placement or the B.A.S.W. field coordinator has identified concerns regarding the field placement.
4. When a student is placed on academic probation by the University.
5. When allegations of substance abuse, violent behavior, criminal misconduct, or other serious non-academic behaviors are made against a student in the program.

The review is conducted with the program director, the Assistant Dean of Student Services of the Graduate School of Social Service, and the student. The review results in one of the following actions:

1. No action.
2. Probationary status in the social work program.
3. Dismissal from the social work program.

If the student is placed on probation, the terms of the probationary period and mechanisms for removal of probationary status are identified in writing. If the student is dismissed from the program, the student's college of matriculation is notified.

In cases when the academic or non-academic conditions prompting the review have implications for the student's continued enrollment in the University, they are shared with the assistant dean of the student's college of matriculation.

Students have the right to appeal the decisions of the program continuance review. They can appeal in writing to the Dean of the Graduate School of Social Service, who has the final decision-making authority in the matter.

Grievance Procedures in Academic and Non-Academic Matters

This statement outlines the program's policy on appeals and grievances, and includes a formal mechanism for grievances in academic and non-academic matters within the program that have not been dealt with through a program continuance review proceeding.

Students who believe they have been treated unfairly in the program as to enrollment in courses, treatment in the classroom or field practicum, final course grades, academic probation, or termination from the program for academic or non-academic reasons have the right to seek an impartial and formal review.

Students are expected to first make a complaint to the program faculty member, field instructor, or faculty adviser about the treatment regarded as unfair. If a satisfactory resolution of the complaint is not obtained, students are expected to appeal promptly to the program director.

If informal appeals do not result in resolution of the matter, students can request a formal investigation. This request must be made in writing to the the Assistant Dean of Student Services of the Graduate School of Social Service, and must provide details of the alleged unfair treatment, identifying the particular informal appeal procedures that were used and telling why these procedures did not resolve the matter. This request must be made to the the Assistant Dean of Student Services of the Graduate School of Social Service within two weeks upon completion of

the informal appeals. The Dean of the Graduate School of Social Service has the final decision-making authority in the matter.

Grievances on the part of students that involve alleged discrimination in non-academic matters are handled through the University's Grievance Committee. Such cases may include, but certainly are not limited to, grievances related to allegations of discrimination on the basis of sex, race, disabilities, religion, national origin, or sexual harassment. Also included are any grievances relating to athletics, food services, housing, extracurricular activities, security, or financial aid. Grievances on the part of students that involve academic matters related to another unit or department within the University should be relayed to that unit and/or to the administrative officers of students' college of matriculation. For more information regarding these types of grievances, students are directed to consult the University student handbook and their faculty adviser for further guidance.

Attendance Policy

To gain the most from the Fordham education, students need to be in regular attendance in class and field. However, sometimes emergencies or illnesses can interfere with attendance. Students should contact their faculty advisers if they have any attendance problems in the classroom or field. Excessive absences, even for legitimate reasons, can jeopardize students' academic standing.

Professors have the option of stipulating their own expectations regarding attendance and class participation. They will be spelled out to students in the course outline and assignments. If students are unclear, they should not hesitate to ask their professors for specific information.

Registration

Students are to follow standard undergraduate registration procedures for courses outside the program and the program's guidelines for social work courses. Students should be aware that the course prefix for the program's social work courses (SOWK) is different than the graduate course prefix (SWGS).

Transfer of Academic Credit into the Social Work Program

The program will consider accepting up to 12 credits for coursework in the social work major. In order to be considered, the course(s) in question must be from a CSWE-accredited B.S.W. program. Students must have received a grade of B or better and the course(s) must have been completed within the previous five years. In addition, the content must correspond to the content of the course(s) in the Fordham program. Transfer credit is not given for generalist social work practice courses or the field practicum.

Requests to transfer credit for courses in the University core curriculum, social work prerequisites, or other courses outside of those in the social work program are reviewed and determined by the Fordham admissions group and undergraduate colleges, in consultation with the program director.

Application to Advanced Standing and Other Courses of Social Work Study

Within five years of completion, students who have graduated with a B.A. in social work from the program can submit an expedited application to the advanced standing at Fordham's Graduate School of Social Service.

Students can also apply to other graduate programs in social work that consider advanced standing applications.

Code of Ethics

Code of Ethics of the National Association of Social Workers

Approved by the 1996 NASW Delegate Assembly and revised by the 2017 NASW Delegate Assembly.

The NASW Code of Ethics is intended to serve as a guide to the everyday professional conduct of social workers. This code includes four sections:

- The first section, "Preamble," summarizes the social work profession's mission and core values.
- The second section, "Purpose of the NASW Code of Ethics," provides an overview of the code's main functions and a brief guide for dealing with ethical issues or dilemmas in social work practice.
- The third section, "Ethical Principles," presents broad ethical principles, based on social work's core values, that inform social work practice.
- The final section, "Ethical Standards," includes specific ethical standards to guide social workers' conduct and to provide a basis for adjudication.

Sociology

Note: "Sociology and Anthropology" is a single academic department at Fordham, but the academic information for each subject is listed on a separate web page. Information about anthropology programs is listed under anthropology (p. 177).

Sociology is the study of group life—ranging from the analysis of passing encounters between individuals on a city street to the examination of current trends in globalization. As a social science, it combines scientific and humanistic approaches to study the diversity of social relationships in our modern world. As a liberal arts major, sociology represents excellent preparation for future graduate work by developing critical thinking and research skills, and it similarly provides fundamental grounding for students planning careers in law, business, social work, criminal justice, medicine, and international affairs. The scope of the discipline is quite broad, satisfying a variety of interests. A major or minor in sociology also offers a good background for students whose career goals involve marketing research, teaching, communications, government work, or extensive contact with the public and business. As such, sociology will provide a deeper understanding of the complex social and cultural world that shapes life experiences. The wide selection of courses offers students the opportunity to study crime and criminal justice, urban issues and public policy, social institutions, including education, the economy, religion, the family, and media, as well as social inequalities, including those of class, race, ethnicity, and gender.

Program Activities

Honors and Awards

The Departmental Honors Thesis in Sociology and Anthropology is designed for FCRH and FCLC students who are interested in conducting independent research during their final year. Working closely with a

faculty advisor, students plan and execute their own research, and then report the results in a substantial thesis. Students who earn a minimum grade of B on the thesis will graduate with honors in the sociology or anthropology major. Students are invited to apply by email during the spring of their junior year. Applicants must have a 3.4 overall grade point average and a 3.5 average in their major to be eligible for the program.

The department offers students an opportunity to become members of Alpha Kappa Delta, the international honor society for sociology students. Each spring, students are inducted into Fordham's Chapter Iota. At Rose Hill, the department honors its seniors at the end-of-year awards ceremony, Encaenia, by bestowing the Rev. Joseph P. Fitzpatrick, S.J., Memorial Award for the best submitted essay by a graduating sociology major. At Lincoln Center, the department also recognizes excellence in its graduating seniors with departmental honors in sociology at its own diploma ceremony.

Internships

Both sociology and anthropology majors and nonmajors are encouraged to take advantage of the Internship Seminar offered by the department. This course is designed to provide students with the opportunity to develop skills in social analysis, policy development, program evaluation, and interpersonal relations while being of service to others in a real-life setting outside the classroom. Employment opportunities include agencies and corporations in the New York metropolitan area, ranging from organizations in the public sector, including the New York State Department of Corrections, the Legal Aid Society, and the Puerto Rican Family Institute, to organizations in the private sector such as CBS, Merrill Lynch, and IBM. Participating students are required to take SOCI 4900 (Internship Seminar) and to spend a minimum of eight to 10 hours per week in an agency (public or private) or organization chosen to fit the individual student's interests and expertise.

For more information

Visit the Sociology and Anthropology department web page

Contribution to the Core

Sociology and anthropology offer the following which fulfill the first social science core requirement:

Course	Title	Credits
ANTH 1100	Introduction to Cultural Anthropology	3
ANTH 1300	Introduction to Archaeology	3
SOCI 1100	Introduction to Sociology	3

The advanced social science core requirement may be satisfied by an advanced-level course in sociology or anthropology. The course in Physical Anthropology, ANTH 1200 Introduction to Biological Anthropology, and ANTH 1600 Introduction to Human Variation, each fulfill the life science core requirement for nonmajors. In addition, the department regularly offers courses that fulfill the American Pluralism, Global Studies, Interdisciplinary Capstone, and *Eloquentia Perfecta* 1 and 3, and Values Seminar/EP4 core requirements.

Programs

- Sociology Major (p. 363)
- Sociology Minor (p. 364)

Sociology Major

Learning Objectives

Sociological understanding supports meaningful and effective participation in public discourse, workplaces, and civil life. Sociologists offer explanations for life chances and achievements grounded in evidence and knowledge about how society is organized and operates. Fordham's sociology major will guide you in understanding

- how society shapes people's lives
- [the ways in which people and place interact, in New York City and other areas](#)
- [the patterns, causes, and consequences of social inequality and oppression](#)
- [how and why societies and social structures change](#)
- [how to critically and ethically evaluate sociological research and evidence, and to understand how sociological research is conducted](#)
- [how to communicate sociological research and insights to a range of audiences](#)

CIP Code

45.1101 - Sociology, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

Students majoring in sociology at FCRH, FLC, and PCS are required to complete 10 courses.

Requirements for students in Fordham College at Rose Hill

Course	Title	Credits
Required Courses ¹		
SOCI 1100 or SOCI 1102	Introduction to Sociology Introduction to Sociology: Health Focus	3
SOCI 2800	Sociological Theory	4
SOCI 2850	Methods Social Research I	4
SOCI 2851	Methods Social Research II	4
Electives ²		
Four Sociology electives ³		12 to 16
Two additional Sociology electives or Anthropology electives ⁴		6 to 8

¹ These required courses are designed to help the student achieve basic sociological literacy and obtain a reasonable grasp of empirical research techniques.

² With the written approval of the chairperson or associate chairperson, two courses in other social science departments may be counted toward the elective courses, giving the major considerable opportunity to develop an interdisciplinary approach to the study of human social behavior.

³ Any course with the SOCI subject code or the SOCI attribute code may fulfill this requirement.

⁴ Any course with the SOCI subject code or the SOCI attribute code, or the ANTH subject code or the ANTH attribute code, may fulfill this requirement. Courses with the subject code SSCI (p. 1616) numbered 2000-4999 (offered through PCS) may also fulfill this requirement.

Requirements for students in Fordham College at Lincoln Center

Course	Title	Credits
Required Courses ¹		
SOCI 1100 or SOCI 1102	Introduction to Sociology Introduction to Sociology: Health Focus	3
SOCI 2800 or SOCI 3017	Sociological Theory Inequality in America	4
SOCI 2606 or SOCI 2851	Social Science Statistics Methods Social Research II	4
SOCI 2650 or SOCI 2850	Basic Research Methods Methods Social Research I	4
Electives ²		
Four Sociology electives ³		12 to 16
Two additional Sociology electives or Anthropology electives ⁴		6 to 8

¹ These required courses are designed to help the student achieve basic sociological literacy and obtain a reasonable grasp of empirical research techniques.

² Students may, with prior approval, take up to two courses outside sociology, from African and African American studies, Latin American and Latino studies, and social work.

³ Any course with the SOCI subject code or the SOCI attribute code may fulfill this requirement.

⁴ Any course with the SOCI subject code or the SOCI attribute code, or the ANTH subject code or the ANTH attribute code, may fulfill this requirement. Courses with the subject code SSCI (p. 1616) numbered 2000-4999 (offered through PCS) may also fulfill this requirement.

Requirements for students in School of Professional and Continuing Studies

Select one cross-disciplinary course in consultation with an adviser 3 to 4

Electives

Four Sociology electives ²	12 to 16
One additional Sociology elective or one Anthropology elective ³	3 to 4

¹ These required courses are designed to help the student achieve basic sociological literacy and obtain a reasonable grasp of empirical research techniques.

² Any course with the SOCI subject code or the SOCI attribute code may fulfill this requirement.

³ Any course with the SOCI subject code or the SOCI attribute code, or the ANTH subject code or the ANTH attribute code, may fulfill this requirement. Courses with the subject code SSCI (p. 1616) numbered 2000-4999 (offered through PCS) may also fulfill this requirement.

Availability

The major in sociology is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Sociology Minor

Requirements

The minor in sociology requires a total of six courses. Requirements differ slightly depending on student's college.

The three required courses are designed to help the student achieve basic sociological literacy and understand empirical research techniques.

Requirements for students in Fordham College at Rose Hill, Gabelli School of Business (Rose Hill), and School of Professional & Continuing Studies (Rose Hill)

Sports Business

Major League Baseball. The NBA. Athlete management and licensing. ESPN, *Sports Illustrated*, NBC Sports. The range of employers and careers in the sports world is vast, and the Gabelli School has established a secondary concentration to prepare students for the area where business and sports meet.

Programs

- Concentration in Sports Business (p. 364)

Concentration in Sports Business

The range of employers and careers in the sports world is extraordinarily broad. To prepare students for jobs across this field, the Gabelli School offers a secondary concentration in sports business. It combines three courses with an experience-based capstone component.

The Sports Business concentration can be pursued by Gabelli students as a secondary concentration only.

Requirements

Course	Title	Credits
Two of the following three courses:		6
MKBU 4454	ST: Sports Marketing	
CMBU 4488	ST: Business of Sports Media	
BLBU 4449	ST: Sports and the Law	
Take EITHER the third course from the above group OR one of the following courses:		3
BLBU 4436	ST: Business & Ethics of Sports	
INSY 3437	ST: Sports Analytics	
Capstone requirement		

Capstone Requirement

The students may complete the capstone requirement in any of three ways:

- Presenting scholarly research at the conference of an organization such as the Sports and Recreation Law Association, the Collegiate Sports Research Institute, or the North American Society for Sports Management.
- Holding an approved one-semester internship in a sports field and writing a paper about the experience.
- Traveling during summer or winter break to get an international perspective on the business of sports and writing a paper about the experience.

For more information, please visit the Sports Business program website.

Strategy

Whether you're working at a law or financial firm, advertising or insurance agency, hospital, pharmaceutical company, or other type of organization, strategy and statistics are key to an organization's overall performance. Strategy creates a vision and emphasizes resources needed for firms to develop a competitive advantage. Statistics provides the data and tools executives need to make decisions. Together, these disciplines work continuously to support the firm's long-term sustainability and growth.

At the Gabelli School, students can specialize in either field, preparing for careers as consultants, analysts, general managers, statisticians, strategy staff, and advisors.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

Programs

Concentrations

- Concentration in Business of Healthcare (p. 365)
- Concentration in Consulting (p. 365)
- Concentration in Entrepreneurship (p. 367)
- Concentration in Management (p. 368)

Concentration in Business of Healthcare Overview

The healthcare sector is one of the fastest-growing areas of the global economy. By integrating healthcare into their coursework, business students will be positioned for jobs in corporate human resources departments, hospitals, clinics, government planning and regulatory agencies, health maintenance organizations, hospital associations, consulting firms, computer vendors, health-insurance companies, and hospital equipment and supplies manufacturers. Graduates who choose to emphasize the healthcare aspect of their management concentration could go on for graduate work in health care, social work, or the arts and sciences.

Requirements

Business of Healthcare can be pursued by Gabelli School of business students enrolled at the Rose Hill or Lincoln Center campus.

Course	Title	Credits
Required Course		
SABU 3441	Intro Health Care Systems	3
Electives		6
<i>Choose two of the following courses:</i>		
INSY 4411	ST: Healthcare Info Tech	
FNBU 4468	Healthcare Finance	
SABU 4436	ST: Strategic Management and the Pharmaceutical Industry	
Total Credits		9

Concentration in Consulting Overview

The Consulting Concentration aims for students to learn effective ways of solving business problems by developing skills to anticipate, address, and resolve challenges in managing organizations. Students will learn consulting skills to analyze data, conduct research, work effectively on team-based projects, and persuasively communicate ideas.

Students can pursue consulting at the Rose Hill campus as a:

- Primary concentration in Consulting with a focus in one of the following:
 - Management
 - Strategy
 - IT
 - Marketing
- Secondary concentration in Consulting with a focus in one of the following:
 - Management
 - Strategy

- IT
- Marketing

Students can pursue management at the Lincoln Center campus as a:

- Dual concentration in Consulting with a focus in one of the following:
 - Management
 - Strategy
 - IT
 - Marketing
- Secondary concentration in Consulting with a focus in one of the following:
 - Management
 - Strategy
 - IT
 - Marketing

Students and alumni in this field have held jobs and internships at:

- PwC
- Deloitte
- Grant Thornton
- Gartner
- GE Capital
- KPMG Advisory
- EY
- Duff and Phelps
- Stryker Corporation
- Johnson & Johnson

Requirements

Primary Concentration in Consulting

The Primary Concentration in Consulting requires completion of four courses and one experiential education option.

Concentration in Entrepreneurship

Entrepreneurship: Not just a field, but a mindset.

The Gabelli School of Business prepares its students to tackle real business problems with an arsenal of knowledge, skills, and experiences. The Entrepreneurship program within the Gabelli School of Business turns students into change agents and disruptors to seize countless opportunities in front of them. We do this by re-calibrating how students think about money, failure, what a career is, what kind of lifestyle they want, and what kind of impact they want to have in the world.

Entrepreneurship is not easy. It is not for the faint of heart. But it IS a door to opportunity for students who are intrigued by the path less traveled. For students who value freedom and independence and creativity. For students who don't like being pigeon-holed in the typical career path. For students looking for an exciting, non-traditional lifestyle.

The Entrepreneurship concentration was developed to deliver a forward-thinking, skills-based curriculum driven by experiential learning to change the way students think. Regardless of one's career trajectory (the startup world, corporate America, nonprofits, etc.), students learn how to embrace failure, how to vet opportunities, how to pitch ideas, how to be innovators, and how to confidently change the world for the better.

Students at the Rose Hill and Lincoln Center campuses can earn a concentration in Entrepreneurship as either a primary concentration (four courses) or a secondary concentration (three courses).

For more information

Visit the Entrepreneurship Program web page.

Requirements

Entrepreneurship is available to Gabelli School students as either a primary or secondary concentration.

Concentration in Management

Requirements

Gabelli students may pursue management as a primary or secondary concentration.

Primary Concentration

Students who want to pursue management as a primary concentration are required to complete four upper-level courses in Leading People and Organizations, Strategy, and/or Operations.¹

Secondary Concentration

Students who want to pursue management as a secondary concentration are required to complete three upper-level courses in Leading People and Organizations, Strategy, and/or Operations.¹

¹ Course with subject the code LPBU, SABU, or OPBU numbered 3224 or higher fulfill the requirements for the primary and secondary concentration in management except for SABU 4441 Strategy and OPBU 3438 Operations and Supply Chain Management.

Sustainable Business

Gabelli School students don't simply want to do business. They want to change the world. Studying sustainable business helps students learn how to make a difference conduct business with purpose. Sustainable business keeps in mind the "triple bottom line" of people, planet, and profit and allows students to be not only leaders but "changemakers."

Students will see how business can still turn a profit while benefiting human beings around the world: leading with empathy, providing better working conditions, improving the environment, and finding paths to innovation where others see closed doors.

Programs

- Sustainable Business Minor (p. 368)

Sustainable Business Minor

People, planet, and profit: Sustainable business strikes a balance among these three factors. Sustainability is becoming a national phenomenon, and companies are taking notice, from the smallest startups to the largest multinational banks. A minor in this field is now open to Gabelli School students and their peers at Fordham College Rose Hill. The

sustainable business program aligns seamlessly with Fordham's mission to "promote research and education that assist in the alleviation of poverty, the promotion of justice, the protection of human rights, and respect for the environment."

This minor incorporates business, social science, natural science, and building-design curricula. It can enhance a student's career opportunities in traditional business markets and in the emerging "green sector." Students who pursue this minor take the foundations course, Sustainable Business, and six additional courses. Courses vary depending on whether the student is a Gabelli School student, an FCRH student majoring in a science, or an FCRH student pursuing in a nonscience major.

Learning Goals

- Students will demonstrate a substantive knowledge of key business concepts and theories.
- Students will demonstrate competency in analytical and technical skills in decision-making.
- Students will demonstrate competency in oral and written communication.
- Students will demonstrate capacity for ethical decision-making and an understanding of how business can positively impact society.
- Students will demonstrate an awareness and competency in effectively working in teams and dealing with globally diverse situations.

For more information

Visit the Sustainable Business program web page.

Requirements

Course	Title	Credits
Required courses (all students)		
LPBU 3430	ST: Sustainable Business	3 to 4
or ECON 3430	ST: Sustainable Business	
ECON 3850	Environmental Economics ¹	4
Natural Science course (all students)		
Select one of the following:		3
<i>For non-science majors (including Gabelli students):</i>		
BISC 1002	Ecology: A Human Approach	
CHEM 1109	Chemistry of the Environment	
ENST 4900	Environmental Internship and Media Advocacy	
NSCI 1010	Physical Sciences: From Past to Present	
NSCI 1020	Physical Science: Today's World	
NSCI 1040	People and the Living Environment	
PHYS 1203	Environmental Physics	
<i>For Science majors</i>		
BISC 2561	Ecology	
CHEM 4340	Environmental Chemistry	
ENVS 3000	Environmental Science	
NSCI 2010	Global Ecology Lecture	
PHYS 1203	Environmental Physics	

Sustainable Development course (Gabelli students only)

Select one of the following:

ECON 3210	Development Economics
ECON 3240	World Poverty
ECON 3242	Global Economic Issues
ECON 3884	Contemporary Economic Problems
HIST 3992	Capitalism
PHIL 3109	Environmental Ethics
PHIL 3712	Global Environment and Justice
POSC 3610	Political Economy of Development
POSC 3616	Political Economy of Poverty
POSC 3915	International Political Economy
SOCI 3415	Development and Globalization

Business principles courses (non-Gabelli students only)

Both courses are required

ACBU 2222	Principles of Financial Accounting ²
LPBU 3223	Principles of Management or INSY 230(Information Systems)

Sustainable Design Course (all students)

Select one of the following: 3 to 4

VART 2050	Designing the City
VART 2055	Environmental Design

Capstone Course (all students)

Select one of the following (taken in the senior year): 3

LPBU 3234	ST: Leading for Impact
LPBU 3446	ST: Social Entrepreneurship
CPBU 4004	Entrepreneurship & Fair Trade

¹ Either ECON 1100 Principles of Macroeconomics or ECON 1200 Principles of Microeconomics is a prerequisite for this course.

² ECON 1200 Principles of Microeconomics is a prerequisite for this class.

Availability

The sustainable business minor is available to Gabelli students and to Fordham College students who fulfill all of the minor's requirements. Differences in the minor's requirements are designed to accommodate what is or is not already contained in each school's core curriculum.

Theatre and Visual Arts

Theatre

The Fordham Theatre program trains emerging artists to develop their process through mentored exploration in performance, directing, design and production, and playwriting.

Rigorous conservatory training enriched by an expansive academic curriculum—that is the essence of the Fordham University Theatre program, which prepares students as theatre practitioners and visionaries. In a creatively fertile, experiential, and artistically rigorous environment, the theatre program nurtures the individual, encouraging each student to follow their passions and activism, using theatrical expression to create paths for empathy, understanding, and dialogue. Collaboration is the keystone: Our majors launch their training with a yearlong class in collaboration. We learn by doing: Our experiential curriculum augments our full mainstage season with student-driven

studio productions. Artistic freedom is crucial: Our studio season is creatively led by students. Process is primary: A result reveals itself as a moment in a continuous process. Risk is a muscle: We nurture the impulse to risk, the core of creativity. Ethics surface in an artist's choice: We care for the whole person. Our faculty are leading theatre practitioners, and they cultivate diverse aesthetics: The Fordham Theatre Company explores classical and experimental work. We partner with leading professional artists in our education curriculum and production, and build professional bridges through internships, workshops, and a wealth of other opportunities.

Visual Arts

The study of visual arts provides students with technical knowledge and skills as well as a critical and historical understanding of the field. The visual arts at Fordham are open to all students and are taught within the context of a liberal arts education. Students are given a knowledge base particularly suitable to today's visually oriented world and job market. Classes are small, with considerable one-on-one contact with the instructor. Critique is emphasized in all classes, and students are given the resources to develop and take full advantage of their creativity. Engagement in New York City's culture, museum and gallery tours, studio visits, and visiting artist lectures are integral parts of each concentration's curriculum. In addition, students are encouraged to explore on their own and to take advantage of all that New York City has to offer as the arts capital of the country. There are opportunities for senior thesis projects, study abroad, internships, and tutorials in each area of concentration.

Program Activities

Ildiko Butler and Lipani Galleries

The Ildiko Butler and Lipani Galleries are maintained by the faculty for professional and student art exhibitions. The gallery programmer is Vincent Stracquadanio. Visit the Fordham University Galleries for more information.

Honors in Visual Arts

To graduate with honors, a visual arts student must complete and exhibit a senior thesis project. Majors wishing to have a senior exhibition must submit an application to Junior Review in the spring of their junior year. After Junior Review, students approved for a senior exhibition will work with an adviser and will be admitted to VART 4600 Senior Seminar. Studio Art in the fall of their final year. Students who do not qualify for admission to Senior Seminar may, with instructor and departmental approval, still complete a senior thesis and/or a portfolio.

Visual Arts Awards

Up to three Ildiko Butler Travel Awards are given annually for independent research in the medium of photography. A travel award and a visual arts award are given in honor of Susan Lipani. A portfolio award in honor of James Storey is offered to a senior whose work over their time at Fordham has shown evidence of exemplary talent and potential. The William F. DiPietra Film/Video Production Grant is offered to any visual arts major or minor who has a film project in mind, regardless of their area of study. Three grants of \$1,000 each will be given to outstanding visual arts majors or minors to work on a film.

Junior Review

In the spring of their junior year, visual arts majors wishing to do a seminar thesis will submit a portfolio of their work for faculty review. The purpose of this review is to determine admission to the VART 4600 Senior Seminar. Studio Art. A subsequent review the following fall will determine

whether a student will exhibit in one of the galleries in the spring of senior year.

For more information

Visit the Theatre program web page

Visit the Visual Arts department program page

Contribution to the Core

The Department of Theatre and Visual Arts contributes VART 1101 Urbanism, VART 1135 Visual Thinking, and THEA 1100 Invitation to Theatre as courses to fulfill the fine arts requirement. VART 4300 Representation in Art satisfies the Values Seminar/EP4 requirement, but it is not required. It does not count as an elective toward the visual arts major. THEA 3004 Global Theatre History: Foundational Impulses and THEA 3005 Global Theatre History: Evolutions of the Present each fulfills the Advanced Literature Core requirement.

Programs

- Theatre Major (p. 370)
- Theatre Minor (p. 372)
- Visual Arts Major (p. 372)
- Visual Arts Minor (p. 375)
- Visual Arts and Art History Double Major (p. 375)

Theatre Major

The Fordham theatre program is a B.A. program offering four pre-professional concentrations for theatre majors: performance, directing, playwriting, and design and production. Admission into the performance concentration is by audition only. Admission into the directing, playwriting, and design and production concentrations is by interview and a review of portfolio work (directing and design and production) or writing samples (playwriting). Directing applicants with a portfolio of work may submit that as well. Students should visit the Fordham theatre website to obtain extensive information regarding the program and to schedule an audition or interview via www.fordham.edu/theatre.

Please note that both the theatre major and minor include a lab requirement (THEA 1000 Theatre Practicum) each semester. If a student fails to complete a lab contract, then he or she loses eligibility to participate in any production (mainstage or studio) the following semester. If a student fails to complete a lab contract twice, then he or she may be dropped from the program.

The Fordham theatre program has a policy called warn/cut. In cases when the faculty has doubts about whether a student should continue in his or her concentration, a warning is given. Then the student has another semester to dispel the questions. If the evaluation remains unchanged after the following semester, then the student has the option of remaining a theatre minor, but must choose another major.

THEA 3004 Global Theatre History: Foundational Impulses and THEA 3005 Global Theatre History: Evolutions of the Present each fulfills the Advanced Literature Core (p. 35) requirement.

Theatre majors concentrating in design and production must substitute THEA 3920 History of Theatre Design for any of the two required theatre history courses. Students pursuing other concentrations may request permission to take THEA 3920 in place of one of the two courses.

Theatre majors are exempt from the fine arts requirement in the core curriculum. The minimum acceptable grade in a major course is C-.

CIP Code

50.0501 - Drama and Dramatics/Theatre Arts, General.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The theatre major requires five foundation courses plus coursework in one of four concentrations: performance, design and production, playwriting, or directing.

Course	Title	Credits
THEA 2080	Collaboration I	4
THEA 2090	Collaboration II	4
THEA 3011	Text Analysis	4
THEA 1000	Theatre Practicum ¹	0
<i>Theatre History</i>		8
THEA 3004	Global Theatre History: Foundational Impulses ²	4
THEA 3005	Global Theatre History: Evolutions of the Present ²	4
THEA 3920	History of Theatre Design ³	4

Select a concentration:

Performance
Design and Production
Playwriting
Directing

¹ THEA 1000 Theatre Practicum, which is graded pass/fail, must be taken during each semester of the first and second years of study, and during one semester of the third year of study.

² Each of these courses fulfills the Advanced Literature Core (p. 35) requirement.

³ Theatre majors concentrating in design and production must substitute THEA 3920 History of Theatre Design for any of the two required theatre history courses. Students pursuing other concentrations may request permission to take THEA 3920 History of Theatre Design in place of one of the other two theatre history courses.

Availability

Students who attend study abroad theatre programs may apply certain courses to their theatre major, and should consult with an advisor prior to attending a study abroad program.

The major in theatre is available at Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in theatre only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Lincoln Center campus.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Concentrations

Performance Concentration Requirements

Course	Title	Credits
THEA 2010	Acting I	4
THEA 2700	Acting II	4
THEA 3000	Acting III	4
THEA 3100	Acting IV	4
THEA 3030 & THEA 3040	Actor's Vocal Technique I and Actor's Vocal Technique II ¹	4
THEA 3050 & THEA 3060	Movement for the Actor I and Movement for the Actor II ¹	4
One Advanced Performance course		4
Any one Design and Production elective ²		3 to 4

¹ This sequential pair of two-credit courses, when completed successfully, will count as one course toward satisfying the graduation requirement of 36 courses.

² Consult the Design and Production concentration section for the list of courses that may fulfill this requirement.

Performance Concentration Advanced Electives

These courses are advanced acting courses and are open to performance majors only. During junior and senior year, many theatre majors take more than the required number of electives. This is permitted as long as all Fordham core requirements have been completed.

Courses in this group have the THPE attribute.

Course	Title	Credits
THEA 4000	Creating a Character I	4
THEA 4001	Creating a Character II	4
THEA 4030	Rehearsal Technique	3
THEA 4100	Acting Shakespeare	4
THEA 4250	Acting for the Camera I	4
THEA 4260	Acting for the Camera II	4
THEA 4305	Clown and Improvisation	4
THEA 4306	Clown and Improvisation II	4

Design and Production Concentration Requirements

Course	Title	Credits
THEA 1160	Design Fundamentals	4
THEA 2260	Conceptual Foundations of Theatre Design	4
One of the following courses:		4
THEA 2035	Drafting for the Theatre I (Required for set, light, and sound designers, as well as for stage managers)	
VART 1150	Drawing I (Required for costume designers)	

One of the following courses: ¹ 4

THEA 3205 From Page to Stage

THEA 2045 Introduction to Directing

One of the following courses: 3 to 4

THEA 4505 Design Production Workshop (Required for design students)

THEA 2900 Theatre Management (Required for stage managers)

One of the following courses: 3 to 4

THEA 2037 Drafting for the Theatre II (Required for set, light, and sound designers)

THEA 3950 Production Management (Required for stage managers)

VART 1055 Figure Drawing (Required for costume designers)

Design & Production Electives

Choose three courses from the following options: 9

THEA 2230 Costume Design I

THEA 2805 Stage Management I

THEA 3362 Lighting Design I

THEA 3420 Sound Design I

THEA 3985 Set Design I

THEA 3520 Producing through a Social Justice Lens or THEA 3530 Creative Producing

¹ In general, stage managers should take THEA 3205 From Page to Stage and stage designers should take THEA 2045 Introduction to Directing. Students may consult with their theatre major advisor if they prefer to take the other course.

Playwriting Concentration Requirements

Course	Title	Credits
THEA 3700	Playwriting (taken five times)	4
THEA 3012	New Play Dramaturgy	3
One Playwriting elective ¹		4
One THEA elective ²		4

¹ Student and adviser will determine which class based on student's interest plus level of skill and experience in design.

² Any course with the subject code THEA, numbered 2000-4999 (of 3 or more credits) fulfills this requirement.

Playwriting Electives

Courses in this group have the THPL attribute.

Course	Title	Credits
FREN 3253	Moliere: From Page to Stage	4
THEA 2805	Stage Management I	3
THEA 2815	Stage Management II	3
THEA 2900	Theatre Management	3
THEA 3253	Moliere: From Page to Stage	4
THEA 3362	Lighting Design I	3
THEA 3374	Lighting Design II	3

THEA 3420	Sound Design I	3
THEA 3455	Projection Design I	3
THEA 3985	Set Design I	3
THEA 4501	Directing Production Workshop	3
THEA 4505	Design Production Workshop	3

Directing Concentration Requirements

Course	Title	Credits
THEA 2010	Acting I	4
THEA 2700	Acting II	4
THEA 2260	Conceptual Foundations of Theatre Design	4
THEA 2045	Introduction to Directing	4
THEA 3205	From Page to Stage	4
THEA 4501	Directing Production Workshop (must be taken twice)	6
<i>One design course from the list below:</i>		3
THEA 3985	Set Design I	
THEA 2230	Costume Design I	
THEA 3362	Lighting Design I	
THEA 3420	Sound Design I	

Theatre Minor Requirements

The minor requires the following courses:

Course	Title	Credits
THEA 1100	Invitation to Theatre	3
THEA 3004	Global Theatre History: Foundational Impulses	4
THEA 3005	Global Theatre History: Evolutions of the Present	4
THEA 1000	Theatre Practicum (pass/fail, taken three times) ¹	0

Select five theatre electives from the list below

¹ For details on this requirement, consult the Theatre Department website.

Electives

Courses in this group have the THME attribute.^{1,2}

Course	Title	Credits
THEA 1160	Design Fundamentals	4
THEA 1210	Introduction to Fashion Design	3
THEA 1220	Fashion Techniques	3
THEA 2015	Acting for Non-Majors	4
THEA 2045	Introduction to Directing	4
THEA 2750	Performing Italian	4
THEA 2900	Theatre Management	3
THEA 3011	Text Analysis	4
THEA 3012	New Play Dramaturgy	3
THEA 3017	Song as Scene I	4

THEA 3066	Musical Theatre Intensive	4
THEA 3070	Movement For The Actor (Non-Majors)	3
THEA 3090	Stage Combat	3
THEA 3350	Ancient Theatre in Contemporary Practice	4
THEA 3355	Ancient Theatre in Contemporary Practice II	4
THEA 3520	Producing through a Social Justice Lens	4
THEA 3564	French Theatre and Performance	4
THEA 3700	Playwriting	4
THEA 3750	Plays and Screenplays	4
THEA 3920	History of Theatre Design	4
THEA 4045	Young, Gifted, and Black	4
THEA 4500	Theatre, Creativity, and Values	4

¹ With permission, students minoring in Theatre may fulfill the elective requirement with the following courses:

- THEA 2230 Costume Design I
- THEA 2260 Conceptual Foundations of Theatre Design
- THEA 2805 Stage Management I
- THEA 3362 Lighting Design I
- THEA 3420 Sound Design I
- THEA 3455 Projection Design I
- THEA 3985 Set Design I

² A maximum of two semesters (8 credits total) of THEA 3700 Playwriting may apply towards the minor.

A student can officially declare a theatre minor in his or her sophomore year only after declaring a major. No D grade work will be credited toward the minor in theatre.

Availability

The minor in theatre is available at Fordham College at Lincoln Center and Fordham College at Rose Hill. Fordham College at Rose Hill students should note that the majority of theatre minor courses are offered only on the Lincoln Center campus. Students in Fordham's School of Professional and Continuing Studies may minor in theatre only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Lincoln Center campus.

Visual Arts Major

The Visual Arts program offers six areas of study (p. 373):

- Art and Engagement
- Built Environment
- Film and Video
- Graphic Design
- Painting and Drawing
- Photography

Learning Goals

Upon graduation from the visual arts major, students will have achieved the following curricular goals:

1. Develop a critical, historical, and empirical understanding of the various modes of visual expression embodied in the areas of study that the major encompasses.
2. Understand and be able to articulate the historical, cultural, ethical, and aesthetic aspects of the art that the student learns about and makes.
3. Develop and refine the necessary skill sets to make art in the discipline studied.
4. Explore and develop the student's creativity with the longer-term goal of being able to work independently.
5. Be able to go on to further studies and/or to find meaningful work in the field.
6. To understand the complex language of art and thus appreciate and engage with it over the long term.

CIP Code

50.0799 - Fine Arts and Art Studies, Other.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

A visual arts major consists of a minimum of 10 3- or 4-credit courses from those described below, in addition to the core curriculum of your college.

Course	Title	Credits
Four Required Courses		
<i>Both of the below:</i>		7
VART 1135	Visual Thinking	
VART 1150	Drawing I	
<i>One of the following:</i>		3 to 4
ARHI 1100	Art History Introduction: World Art	
ARHI 1101	Introduction to Art History: Europe	
ARHI 1102	Introduction to Art History: Asia	
ARHI 1103	Introduction to Art History: Americas	
VART 3134	20th Century Art: Modernism and Modernity	
VART 3135	Modernism and Its Aftermath	
<i>One of the following:</i>		3 to 4
VART 2800	Seminar Graphic Design	
VART 3030	Art Design and Politics	
VART 3134	20th Century Art: Modernism and Modernity	
VART 3135	Modernism and Its Aftermath	
VART 3257	Seminar: Avant-Garde Film/Video	
VART 3535	Seminar: History of Photography	

VART 4600 Senior Seminar: Studio Art

Six courses distributed among one or more areas of study.¹ **Varies**

¹ Students are encouraged to work with a faculty adviser to develop an educational plan and select courses. A list of courses in each area of study is available in the Areas of Study tab.

It is strongly recommended that majors start taking visual arts core courses in their first year, and that they complete the first three of the above requirements before the end of their sophomore year.

Students must earn a grade of C or above in order for a required course to count toward their major in visual arts.

A variety of introductory courses in all areas of study except film and video are offered at Rose Hill; more specialized courses are offered at Lincoln Center.

VART 4600 Senior Seminar: Studio Art is open to seniors working on thesis exhibitions; enrollment is contingent upon acceptance at Junior Review.

Availability

The major in visual arts is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional Studies at Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Areas of Study

Art and Engagement

Courses in this group have the VAAE attribute.

Visual Arts Minor

The minor in visual arts is designed for students who would like a creative component to complement a major in a related field, such as communication and media studies, art history, urban studies, or computer and information sciences. A minor in visual arts might also serve as a creative addition to majors that would appear at first glance to be unrelated, like psychology, natural sciences, English, or anthropology.

Learning Goals

Upon graduation with the visual arts minor, students will have achieved the following curricular goals:

1. A visual arts minor will serve as a complement to the students' major area of study. In addition to the knowledge and skills students will have obtained from their major, a visual arts minor will add an important component—a critical, historical, and empirical understanding of the various modes of visual expression.
2. The student will be able to understand and articulate the historical, cultural, ethical, and aesthetic aspects of the art they studied, and apply this understanding to relevant concerns in the students' major.
3. In their art courses they will develop and refine the necessary skill sets to make art in the disciplines studied.
4. Explore and develop the student's creativity in art and other fields.
5. Be able to work independently in art or find meaningful work in an arts-related field.
6. To understand the complex language of art and thus appreciate and engage with it over the long term; in other words, to make art and creativity an ongoing part of their lives after graduation.

Requirements

Six courses must be taken for a minor, consisting of the following:

Course	Title	Credits
VART 1135	Visual Thinking	3
Any Art History (ARHI) course, or one of the following:		
VART 3134	20th Century Art: Modernism and Modernity	

VART 3135	Modernism and Its Aftermath	
-----------	-----------------------------	--

Any 4 Visual Arts (VART) electives¹

¹ Any course with the VART subject code (p. 1700) may fulfill this requirement.

Students must earn a grade of C or above in order for a required course to count toward their minor in Visual Arts.

Availability

The minor in visual arts is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Visual Arts and Art History Double Major

Overview

A double major in art history and visual arts is a desirable choice for students who want the solid background in the humanities that art history offers in tandem with a broad foundation in the visual arts. Students should be aware that some of the courses necessary for completing the double major may be offered only at the Lincoln Center or the Rose Hill campus.

CIP Code

Visual Arts Major

50.0799 - Fine Arts and Art Studies, Other.

Art History Major

50.0703 - Art History, Criticism and Conservation.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

For the double major, a total of 15 courses is necessary.

Course	Title	Credits
ARHI 1100	Art History Introduction: World Art ¹	3
or ARHI 1101	Introduction to Art History: Europe	
or ARHI 1102	Introduction to Art History: Asia	
or ARHI 1103	Introduction to Art History: Americas	
VART 1135	Visual Thinking	3
VART 1150	Drawing I	4
Five additional visual arts electives ²		
One course from each art history area of study: ³		
	Ancient/Medieval	
	Renaissance/Baroque	
	Modern	
	Global	
Two art history elective courses ⁴		

ARHI 4600 Senior Seminar (taken in senior year, only offered fall semester)

¹ Students in the FCRH Honors Program may fulfill this requirement with HPRH 1205 Foundational Topics: Art. Students in the FCLC Honors Program may fulfill this requirement with HPLC 2501 Honors: Art History at the Museums.

² Any course with the VART subject code (p. 1700) may fulfill this requirement. It is assumed that the student will choose courses in more than one visual arts area of study (p. 373) and will pursue advanced courses in at least one of the areas of study (p. 373).

³ See the art history major (p. 180) for courses fulfilling each requirement.

⁴ Any course with the subject code ARHI (p. 1004) numbered 1102-4999 (except for ARHI 4900 Internship) may fulfill this requirement. Both elective courses should preferably be taken in the same area of study (Ancient/Medieval, Renaissance/Baroque, Modern, or Global).

It is suggested that the art history introduction course (ARHI 1100, ARHI 1101, ARHI 1102, or ARHI 1103), VART 1135 Visual Thinking, and VART 1150 Drawing I be completed by the end of sophomore year.

Availability

The double major in art history and visual arts is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

Fordham College at Rose Hill students: *The requirements above are in addition to those of the Core Curriculum (p. 34).*

Fordham College at Lincoln Center students: *The requirements above are in addition to those of the Core Curriculum.*

Theology

The discipline of theology explores the big questions: What does it mean to be human? How shall we live? What does it mean to believe in (or reject) the existence of God? Why are there so many religions? Christian theology tackles these questions by engaging a variety of disciplines, including history, philosophy, and literary studies. It works critically and appreciatively to discover, interpret, and understand the evolving beliefs and practices of Christianity. In light of Fordham's Jesuit heritage and Catholic identity, the department focuses on the rich diversity within the Catholic tradition. Coursework emphasizes the mutual influence of faith and culture historically and in the present. New York City provides a valuable resource, especially for engaging in dialogue with other faith traditions of the world. Located in the poorest U.S. congressional district (Fordham's Bronx campus) and bordering census tracts of both the highest and lowest income levels in Manhattan (at Lincoln Center), our locations in New York City invite faculty and students to repeatedly make the connections between the world's religious and moral teachings and the realities of social injustice.

Majoring in theology provides an excellent liberal arts education. Theology majors learn the crucial skills of thinking critically and analytically, writing persuasively, communicating effectively, and working with others cooperatively. They learn how to interpret classic and contemporary texts, to understand ritual, to analyze and evaluate moral norms, and to explore patterns of authority in the tradition and in the cultures it inhabits. Electives allow students to shape the major in light of their own interests.

4 The department offers a variety of activities each semester, including guest speakers, a movie series, musical events, study trips, informal gatherings with faculty, retreats, and museum visits. All theology majors and minors are invited to attend regular seminars at which faculty and graduate students present their current work

The department also has a chapter of Theta Alpha Kappa, the national honor society for religious studies and theology.

Accelerated Master's Program

The accelerated M.A. program in theology allows theology majors presently enrolled in Fordham College at Rose Hill and Fordham College at Lincoln Center to attain both a bachelor's degree and a master's degree in theology in five years. Graduate courses begin in the student's senior year, providing them with advanced training and enriching the undergraduate experience. An additional year of study permits the student to complete all of the theology department's requirements for the degree of Master of Arts. For further information, contact an associate chair.

Program Activities

The department offers a variety of activities each semester, including guest speakers, a movie series, musical events, study trips, informal gatherings with faculty, retreats, and museum visits. All theology majors and minors are invited to attend the monthly faculty seminar at which faculty present their current work.

For more information

Visit the Theology department web page

Contribution to the Core

The study of theology at Fordham provides an intellectually sophisticated engagement with the Christian tradition. All first years in Fordham College and the Gabelli School of Business take THEO 1000 Faith and Critical Reason, which introduces students to the academic study of religion as well as the intellectual foundations of theological questions past and present. All sophomores and juniors take one core theology course numbered THEO 3000-3799 with the attribute "Sacred Texts and Traditions," which introduces students to the historical-critical study of the scriptures or the classical texts of one or more religious traditions. The theology department offers courses that fulfill American Pluralism, Global Studies, *Eloquentia Perfecta* 3, Interdisciplinary Capstone, and Values Seminar (*Eloquentia Perfecta* 4) requirements.

Programs

- Theology Religious Studies Major (p. 376)
- Theology Religious Studies Second Major (p. 379)
- Theology Religious Studies Minor (p. 380)

Theology Religious Studies Major

The theology religious studies major introduces students to the study of religious textual traditions, the historical and cultural study of religions, foundations of Christian systematic theology and theological and social ethics, and training in theoretical and methodological approaches to the study of religion and theology.

CIP Code

38.0201 - Religion/Religious Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

All Fordham undergraduates are required to take Faith and Critical Reason (THEO 1000) as well as one Sacred Texts and Traditions course (courses with the STXT attribute code) (p. 35). Although they are part of the Core Curriculum (p. 34), they also provide a fundamental introduction to the coursework required of the major.

Course	Title	Credits
THEO 1000	Faith and Critical Reason ¹	3
Textual Traditions: Hebrew Bible/Old Testament or New Testament Course		3 or 4
Textual Traditions other than Christianity Course		3 or 4
History, Culture, and Society (3000 or 4000-level) Course		3 or 4
THEO 4300-level: History, Culture, and Society Advanced Seminar		4
THEO 4400	Foundations of Contemporary Theology	4
THEO 4500	Religion in NYC: Theory & Practice	4
Three general Theology electives ²		9 to 12

One course counting towards the major must focus on a historical period before 1500 (ancient/medieval). Textual Traditions courses do not fulfill this requirement.

¹ Additionally:

- Theology courses taken in the Manresa Scholars Program (THEO 1006 Sin and Salvation in Medieval Theology, THEO 1007 Sinners, Saints, and Stories, THEO 1008 Mystics Monks and Mindfulness: Contemplation-In-Action Today, and THEO 1010 Restless Heart: Quest) may fulfill this requirement.
- The following Theology courses taken in the Fordham College at Rose Hill or Fordham College at Lincoln Center Honors programs may fulfill this requirement: HPRH 1102 Foundational Texts: Theology/Classics, HPRH 3001 Religion in the Modern World, and HPLC 1401 Honors: Theology.

² A Theology elective is any course with the THEO attribute or any THEO course 3000:4999, as well as THEO 1050 Syriac Language and Literature I, THEO 1051 Syriac Language and Literature II, or THEO 1060 Elementary Coptic I.

Textual Traditions: Hebrew Bible/Old Testament or New Testament Courses

Courses in this group have the STCJ attribute.

Course	Title	Credits
THEO 3100	Introduction to Old Testament / Tanakh	3
THEO 3102	Book of Genesis	3
THEO 3105	The Torah	3
THEO 3120	The Prophets	3

THEO 3130	Bible as Migration Literature: Then and Now	4
THEO 3200	Introduction to New Testament	3
THEO 3207	The First Three Gospels	3
THEO 3212	Gospel of John	3
THEO 3300	Who Cares About the Bible?	3
THEO 3345	The Book of Revelation	3
THEO 3826	Women in the Bible	4

Textual Traditions other Than Christianity Courses

Courses in this group have the STSN attribute.

Course	Title	Credits
THEO 3711	Sacred Texts of the Middle East	3
THEO 3713	Classic Jewish Texts	3
THEO 3715	Classic Islamic Texts	3
THEO 3720	Hindu Literature and Ethics	3

PHIL 3664	Contemporary Thomism	4
SOCI 4052	An Ethics of Modern Selfhood: The Pursuit of Authenticity	4

Availability

The major in theology religious studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Lincoln Center and Rose Hill.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

Theology Religious Studies Second Major Requirements

In order to accommodate the needs of overlapping requirements, students who double major in Theology Religious Studies and another major have the option to follow a slightly different set of requirements for their Theology Religious Studies program. Double majors may also follow the standard major requirements if they choose.

All Fordham undergraduates are required to take Faith and Critical Reason (THEO 1000) as well as one Sacred Texts and Traditions course (courses with the STXT attribute code) (p. 35). Although they are part of the Core Curriculum (p. 34), they also provide a fundamental introduction to the coursework required of the major.

The second major comprises eight courses, two of which are Core Curriculum requirements:

Course	Title	Credits
THEO 1000	Faith and Critical Reason ¹	3
Sacred Texts & Traditions Course (STXT attribute) ²		
Choose two of the following three advanced seminars:		12
THEO 4300-level: History, Culture, and Society Course ³		
THEO 4400	Foundations of Contemporary Theology	
THEO 4500	Religion in NYC: Theory & Practice	
Four general Theology electives ⁴		12 to 16

¹ Additionally:

- Theology courses taken in the Manresa Scholars Program (THEO 1006 Sin and Salvation in Medieval Theology, THEO 1007 Sinners, Saints, and Stories, THEO 1008 Mystics Monks and Mindfulness: Contemplation-In-Action Today, and THEO 1010 Restless Heart: Quest) may fulfill this requirement.
- The following Theology courses taken in the Fordham College at Rose Hill or Fordham College at Lincoln Center Honors Program may fulfill this requirement: HPRH 1102 Foundational Texts: Theology/Classics, HPRH 3001 Religion in the Modern World, and HPLC 1401 Honors: Theology.

² Consult the Core Curriculum page (p. 35) for a list of courses fulfilling the Sacred Texts & Traditions requirement. Additionally, the following Theology courses in the Fordham College at Rose Hill and Fordham College at Lincoln Center Honors programs may fulfill this requirement: HPLC 2811 Honors Sacred Texts, HPRH 3201 Focused Study: Theology.

³ See the Theology Religious Studies primary major page (p. 377) for the 4300-level courses that fulfill this option.

⁴ A Theology elective is any course with the THEO attribute or any THEO course 3000:4999, as well as THEO 1050 Syriac Language and Literature I, THEO 1051 Syriac Language and Literature II, or THEO 1060 Elementary Coptic I.

Availability

The secondary major is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

38.0201 - Religion/Religious Studies.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Theology Religious Studies Minor Requirements

The minor consists of four courses in addition to the theology courses all Fordham undergraduates are required to take. Faith and Critical Reason (THEO 1000) as well as one Sacred Texts and Traditions course (courses with the STXT attribute code) (p. 35) are part of the Core Curriculum (p. 34), but also provide a fundamental introduction to the coursework required of the minor.

Course	Title	Credits
THEO 1000	Faith and Critical Reason ¹	3
	Sacred Texts & Traditions (STXT attribute) ²	3
<i>Choose one of the following advanced seminars:</i>		
	THEO 4300-level: History Culture Society Advanced Seminar ³	
THEO 4400	Foundations of Contemporary Theology	
THEO 4500	Religion in NYC: Theory & Practice	
Three general Theology electives ⁴		9 to 12

¹ Additionally:

- Theology courses taken in the Manresa Scholars Program (THEO 1006 Sin and Salvation in Medieval Theology, THEO 1007 Sinners, Saints, and Stories, THEO 1008 Mystics Monks and Mindfulness: Contemplation-In-Action Today, and THEO 1010 Restless Heart: Quest) may fulfill this requirement.
- The following Theology courses taken in the Fordham College at Rose Hill or Fordham College at Lincoln Center Honors Program may fulfill this requirement: HPRH 1102 Foundational Texts: Theology/Classics, HPRH 3001 Religion in the Modern World, and HPLC 1401 Honors: Theology.

² Consult the Core Curriculum page (p. 35) for a list of courses fulfilling the Sacred Texts & Traditions requirement. Additionally, the following Theology courses from the Fordham College at Rose Hill and Fordham College at Lincoln Center Honors Programs may fulfill this requirement: HPRH 3201 Focused Study: Theology and HPLC 2811 Honors Sacred Texts.

³ See the Theology Religious Studies major page (p. 377) for the 4300-level courses that fulfill this option.

⁴ A Theology elective is any course with the THEO attribute or any THEO course 3000:4999, as well as THEO 1050 Syriac Language and Literature I, THEO 1051 Syriac Language and Literature II, or THEO 1060 Elementary Coptic I.

Availability

The minor in theology religious studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center. It is also available to undergraduate students in the Gabelli School of Business.

Urban Studies

Designed as an interdisciplinary program, the urban studies major offers a broad introduction to the city and the urban environment. Students combine coursework and research on urban issues with hands-on experience in New York City as well as other American and international cities. The curriculum prepares majors for graduate school and professional programs in teaching, social work, public policy, architecture and urban planning as well as for careers in government service and community development, the nonprofit sector, journalism and law.

Accelerated Master's Program

Undergraduate students in Fordham colleges with a GPA above 3.5 and a background in urban studies are invited to apply for early admission to the master's degree program in urban studies (p. 657) in the second semester of their junior year. Students applying for this option are not required to submit GRE scores. Students admitted to the urban studies master's program under the early admissions policy will take the three required core courses during their senior year (URST 5000 Issues in Urban Studies, URST 5020 Urban Political Processes, and URST 6200 Research Skills in Urban Studies). These courses will count toward the bachelor's degree (which is awarded at the end of the fourth year) and are accepted for the master's, which can be completed by the May of the following year under full-time study.

Program Activities

The urban studies program hosts a wide variety of events throughout the academic year, including lectures, field trips, and tours, and informational lunches. The Urban Studies Week takes place every spring, bringing urban scholars and practitioners to Fordham University for lectures and faculty-student seminars revolving around one particular issue, such as climate change and sustainability, hip-hop as a culture of (urban) resistance, or immigration. The annual Senior Thesis Dinner presents the outstanding research of graduating seniors. Urban studies students also take part in undergraduate conferences and research forums.

Urban studies majors have received numerous prestigious awards, including the New York City Teaching Fellows and the City of New York Urban Fellows Programs.

For more information

Visit the Urban Studies program web page.

Programs

- Urban Studies Major (p. 381)
- Urban Studies Minor (p. 381)

Urban Studies Major Requirements

The urban studies major consists of 10 courses, including a required internship and senior thesis. Students are also required to demonstrate multidisciplinary diversity. Urban studies courses come from a range of social sciences, such as sociology, economics, history, political science, African American studies, and Latino studies. Architecture, urban design, and environmental studies courses complete the curriculum.

All urban studies electives must be at the 2000 level or above. Only two electives from the same subject code may be counted toward the urban studies major. Students study both American cities and the urban environment worldwide. They are encouraged to study abroad during their junior year in order to complement their learning experience at Fordham.

Students may also form their own concentration and program of study in consultation with their adviser, such as architecture and urban design, urban education, community development, urban economic development, public policy, and journalism.

The following courses are required of all majors:

Course	Title	Credits
Introduction to Urban Studies		
Select one of the following:		
VART 1101	Urbanism	
POSC 2102	Introduction to Urban Politics	
SOCI 3602	Urban Sociology	
Community Internship		
SOCI 4902	Internship Seminar: Community Organizations ¹	
Quantitative Methods		
Select one of the following:		
SOCI 2606	Social Science Statistics	
SOCI 2607	Social Science Research and Statistics	
SOCI 2650	Basic Research Methods	
SOCI 2850	Methods Social Research I	
CISC 2500	Information and Data Management	
Senior Thesis Seminar		
URST 4890	Research Seminar ²	4

Electives

Select six URST electives at the 2000 level and above ³

¹ Students should select an internship based on their area of interest and their professional goals. SOCI 4999, when offered as a summer internship course, may also fulfill this requirement.

With permission from the director, the urban studies internship tutorial (URST 4800 Urban Studies Internship or URST 4999 Tutorial) or an equivalent internship course in political science, economics, sociology, or environmental studies may be used as a substitute for SOCI 4902.

² Taken in the second half of the senior year. This course allows students to complete the required senior thesis in their area of interest or concentration. The senior thesis may also be completed as a tutorial (URST 4999 Tutorial) with the permission of the Director. Any of the faculty affiliated with the urban studies program qualify as tutorial instructors. The research project is designed in conjunction with the instructor and may be an individual effort or a group endeavor. Formal presentation of the research findings is required for completion of the seminar.

³ Select six URST courses according to the student's interests and career goals. Any course with the URST subject code or the URST attribute code may fulfill this requirement. Students may also take graduate-level courses with permission.

Availability

The major in urban studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional Studies may major in urban studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

45.1201 - Urban Studies/Affairs.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Urban Studies Minor Requirements

Minors must complete the following six courses:

Course	Title	Credits
Introduction to Urban Studies		
Select one of the following:		
VART 1101	Urbanism	
POSC 2102	Introduction to Urban Politics	
SOCI 3602	Urban Sociology	
Community Internship		
SOCI 4902	Internship Seminar: Community Organizations ¹	
Quantitative Methods		
Select one of the following:		
SOCI 2606	Social Science Statistics	

SOCI 2607	Social Science Research and Statistics
SOCI 2650	Basic Research Methods
SOCI 2850	Methods Social Research I
CISC 2500	Information and Data Management

Electives

Select three URST electives at the 2000 level and above ²

¹ Students should select an internship based on their area of interest and their professional goals. SOCI 4999, when offered as a summer internship course, may also fulfill this requirement.

With permission from the director, the Urban Studies internship tutorial (URST 4800 Urban Studies Internship or URST 4999 Tutorial) or an equivalent internship course in political science, economics, sociology, or environmental studies may be used as a substitute for SOCI 4902.

² Any course with the URST subject code or the URST attribute code may fulfill this requirement.

Availability

The minor in urban studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional Studies may minor in urban studies only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Women, Gender, and Sexuality Studies

Women, Gender, and Sexuality Studies is a bi-campus multidisciplinary program with a profound social justice goal—to understand how gender and sexuality shape our culture, daily lives, social institutions, and interactions. We invite you to take an interdisciplinary approach to learning about these forces and their implications.

Originally founded as the Women's Studies program, the program in Women, Gender, and Sexuality Studies was renamed in Fall 2016. The program takes an expansive view of gender and sexuality studies as both a lens on and a vehicle of social change. Our dynamic interdisciplinary curriculum covers the breadth of the human experience with gender and sexuality. Our courses will challenge you to explore how gender and sexuality affect how we interact with and navigate the world around us while identifying forces that can reshape old axes of power and cultivating new ones. By looking at gender today—especially where it intersects with sexuality, class, and race—you'll become an expert in these intersectionalities that modern-day scholars have embraced. And since this is an integrative major, you'll take classes in the humanities, arts, and social and natural sciences that focus on these themes.

Program Activities

The Women, Gender, and Sexuality studies program sponsors events on both campuses that pertain to questions about gender and sexuality studies. We aim to introduce students to key local, national, and international artists, activists, scholars, and policymakers whose work focuses on gender and sexuality, and we often partner with student-led events and initiatives.

For more information

Visit the Women, Gender, and Sexuality Studies program web page.

Programs

- Women, Gender, and Sexuality Studies Major (p. 382)
- Women, Gender, and Sexuality Studies Minor (p. 383)

Women, Gender, and Sexuality Studies Major

Requirements

The requirements for the major consist of 10 courses. Students must take the following:

Course	Title	Credits
Required Courses		
WGSS 3000	Gender and Sexuality Studies	4
WGSS 3001	Queer Theories	4
WGSS 3002	Feminist and Women's Studies	4
Electives		
Select six elective courses with the WGSS attribute code ¹		
Senior Capstone		
Select one of the following:		
WGSS 4910	Internship	
WGSS 4920	Senior Project	
WGSS 4930	Senior Thesis	

¹ Any course with the WGSS subject code or the WGSS attribute code may fulfill this requirement. Concentration and distribution courses (previously part of the women's studies major) are no longer required.

The senior project or thesis may build upon work completed in an elective course, but all students who do not opt for an internship must register for WGSS 4920 Senior Project or WGSS 4930 Senior Thesis in their senior year. The internship, WGSS 4910, provides field experience and results in a paper. The internship paper, project documentation, or thesis is placed in the library collection of the WGSS program.

Availability

The major in women, gender, and sexuality studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional Studies at Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum (p. 34).

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.

CIP Code

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Women, Gender, and Sexuality Studies Minor

Requirements

The minor consists of six courses in women, gender, and sexuality studies:

Course	Title	Credits
Two of the following three classes		8
WGSS 3000	Gender and Sexuality Studies	
WGSS 3001	Queer Theories	
WGSS 3002	Feminist and Women's Studies	

Select four electives ¹

¹ Any course with the WGSS subject code or the WGSS attribute code may apply as an elective, including an internship, project, or thesis.

Availability

The minor in women, gender, and sexuality studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional Studies at Rose Hill and Lincoln Center.

GABELLI GRADUATE SCHOOL OF BUSINESS

No matter what your career goal, Fordham has a business program tailored to match it.

How do we make this possible?

Drawing on the depth of expertise of over 120 full-time business faculty members and the breadth and flexibility of myriad graduate business courses, we are able to offer three forms of the M.B.A. program—a full-time cohort M.B.A., Professional M.B.A. (including part-time), and Executive M.B.A.—along with numerous specialized Master of Science and Advanced Certificate programs developed for the business niches that seek today's student talent.

To learn more about the Gabelli Graduate School of Business, visit the Fordham website.

Academic Areas and Course Listings

- Accounting and Taxation (p. 384)
- Business Law and Ethics (p. 389)
- Communication and Media Management (p. 390)
- Finance and Business Economics (p. 394)
- Information, Technology, and Operations (p. 420)
- Leading People and Organizations (p. 420)
- Marketing (p. 424)
- Strategy (p. 432)

Accounting and Taxation

Accounting is the language of business, and Fordham professors help their students to become fluent in that language. Core-level accounting classes give students the basic skills to interpret and analyze financial statements, while upper-level and special-topics courses—such as Corporate and Partnership Taxation, International Accounting, and Ethics in Financial Reporting—let them specialize their knowledge. Fordham's accounting faculty works with highly motivated students through the university's chapter of Beta Alpha Psi and routinely coaches teams of undergraduates and graduates in prestigious accounting competitions organized by multinational accounting firms.

Programs

The accounting and taxation area provides coursework to develop sophisticated usage of accounting information and expertise in taxation. It offers courses leading to six degrees:

- M.B.A. in Public Accountancy (p. 446)
- M.B.A. Concentration in Accounting (p. 441)
- M.B.A. Concentration in Accounting Technology Analytics (p. 441)
- M.S. in Professional Accounting (p. 460)
- M.S. in Professional Taxation (p. 461)
- Advanced Certificate in Accounting Technology Analytics (p. 468)

Courses

Area courses, listed in detail in this section, span three broad categories:

- Financial accounting courses that provide an understanding of U.S. Generally Accepted Accounting Principles (GAAP) and International Accounting Standards to develop skills in financial statement preparation and analysis
- Taxation courses that focus on tax research and compliance
- Audit courses that address auditing from financial statement, information technology, ethics, and compliance perspectives

Accounting Courses

ACGB 0001. Fund Act I (Peking Univ). (4.5 Credits)

ACGB 6111. Financial Accounting & Reporting Data Analysis. (3 Credits)

MBA CORE COURSE This core course in accounting is required of all Gabelli graduate students in every concentration. Provides insights into how accounting information can be used by investors and creditors to measure the results of business operations. Students requiring more in-depth accounting knowledge can select electives in financial and/or managerial accounting as their advisers suggest.

Attribute: ASDM.

Mutually Exclusive: MMGB 6111.

ACGB 7045. International Tax and Accounting. (3 Credits)

Introduces the complexities of international taxation by focusing on the U.S. tax system's impact on U.S. companies investing or operating abroad and on foreign companies investing or operating in the U.S. Topics include tax treaties, foreign tax credits, and controlled foreign operations. It also addresses global initiatives with respect to taxation and accounting. TXGB 7010 is recommended as a prior course.

Prerequisite: TXGB 7001.

ACGB 7076. Tax Accounting. (3 Credits)

This course provides an understanding of the application of accounting standard codification (ASC) topic 740: income taxes—focusing on the financial reporting of income tax amounts on the Statement of Operations, Statement of Financial Position, Statement of Stockholders' Equity, and the Statement of Cash Flows; tax footnote; and related disclosures. It also covers audit issues related to income tax balances, disclosures, identifying tax risks, and internal controls to mitigate such risks.

Prerequisites: TXGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

ACGB 7105. Intermediate Financial Accounting I. (3 Credits)

The course is the first of two which focuses on the theory and techniques utilized in corporate financial reporting. It provides an in-depth understanding of current and non-current assets and how they are accounted for in accordance with financial accounting standards. It emphasizes the analysis and understanding of balance sheets, income statements, and statements of cash flow rather than the mechanics of their construction.

Attribute: ABEP.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7120. Intermediate Financial Accounting II. (3 Credits)

The course is the continuation of ACGB 7105. It examines the standards and pronouncements of the Financial Accounting Standards Board (FASB) and the Securities and Exchange Commission (SEC) with regard to their impact on financial statements. It provides an in-depth understanding of current and noncurrent liabilities and stockholders' equity and their accounting in accordance with the accounting standards. It also covers the intricacies of the cash flow statement and its interaction with the other financial statements. The course emphasizes the analysis and understanding of financial reports rather than the mechanics of their construction, and it is designed primarily, but not exclusively, for the students in the public accounting programs.

Prerequisites: (ACGB 7105 or GBA Waiver Financial Acct with a score of 070) and (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

ACGB 7125. Financial Statement Analysis. (3 Credits)

Gives students in the general MBA program a better understanding of financial statements and the information they communicate on the operating, investing and financing activities of corporations. Focuses on the impact of financial accounting principles, disclosure standards and alternative accounting practices on financial reports. Examines and evaluates traditional and non-traditional methods of financial statement analysis.

Attribute: ASDM.

Prerequisites: (ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070) and (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

ACGB 7128. Advanced Financial Statement Analysis. (3 Credits)

Augments the concepts taught in ACGB 7125. Also introduces state-of-the-art tools based on modern financial theory for analyzing financial reports. Topics may include: off-balance-sheet financing; damage assessment and litigation regarding misrepresentation; new reporting standards; and international accounting standards and consolidation issues.

Attribute: ASDM.

Prerequisite: ACGB 7125.

ACGB 7130. Advanced Concepts in Financial Accounting. (3 Credits)

This course critically examines accounting principles and standards for corporate financial reporting with particular emphasis on mergers and other consolidations, asset sales, and divestitures. Additional topics include fund accounting, foreign currency, partnerships, and segment and interim reporting.

Prerequisites: (ACGB 7120 or GBA Waiver Ext FinInfoReprt with a score of 070).

ACGB 7136. International Accounting. (3 Credits)

Provides students with an understanding of accounting problems and issues encountered by multinational corporations (MNCs) operating in an international environment. Most businesses today, large and small, have customers or clients throughout the world. The course covers the general problems facing MNCs, which will prepare students to interpret financial statements of MNCs.

Attribute: ABIB.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7140. Valuation of Intangibles. (3 Credits)

This class focuses on the identification, economic characteristics, valuation, and accounting of intangible assets and intellectual property (IP). Valuation techniques include the analysis of transactions for comparable assets, discounted projected cash flows from use in operations or from royalty streams, and replication cost. Case studies are used to illustrate how intangible assets and IP are valued in practice and how merger and acquisition transactions can succeed or fail depending on whether intangible assets and IP are properly valued. The accounting analysis focuses on both the determination of cost and the periodic assessment for impairment.

Prerequisites: ACGB 7120 or ACGB 7125 or GBA Waiver Ext FinInfoReprt with a score of 070.

ACGB 7155. Managerial Accounting Analysis. (3 Credits)

MBA FLEX CORE COURSE For students in the general MBA program, focuses on product and service cost determination and using cost analysis in management decision making, control and performance evaluation. Oriented toward the manager as a user and interpreter of accounting information. Teaching includes case analysis and problem-solving.

Attribute: ABEP.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7160. Internal Reporting & Control. (3 Credits)

The objective of this course is to provide students with an understanding of IT internal controls, including the IT audit function as it relates to Sarbanes Oxley. Emphasizes the identification of information technology control weaknesses as well as their impact on risk management.

Prerequisites: ACGB 7171 or GBA Waiver Audit Acct Sys1 with a score of 070.

ACGB 7171. Assurance and Audit. (3 Credits)

This course familiarizes students with the audit procedures required under Generally Accepted Auditing Standards (GAAS). Among the topics covered are audit planning, evaluating internal control, auditing transaction cycles, and audit reports. It is directed toward students in the public accounting programs who plan to take the Uniform Certified Public Accountant examination.

Prerequisites: ACGB 7105 (may be taken concurrently) or GBA Waiver Financial Acct with a score of 070.

ACGB 7176. Advanced Audit Concepts and Practices. (3 Credits)

This class focuses on audit-testing techniques and the current auditing environment. Audit-testing techniques include statistical sampling and analytical procedures. The class will also cover recent trends in audit litigation, IRS uses of statistical methods, and forensic techniques. Conducted as a seminar, students will work individually and in groups on case studies and a term paper. Oral and written presentations are required.

Prerequisites: GBA Waiver Audit Acct Sys1 with a score of 070 or ACGB 7171.

ACGB 7184. Individual and Business Entity Taxation. (3 Credits)

Explores the sources and ideas underlying tax laws and their development in relation to fiscal and social policy. Emphasizes the application of basic concepts in tax planning for individuals and businesses. Topics include gross income, exclusions, deductions, credits, property transactions, basis and the alternative minimum tax.

Attribute: ABEP.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7185. Derivatives and Analytics for Accounting. (3 Credits)

This course is designed to provide a broad introduction to both the valuation of derivative securities and the accounting for derivative securities used for both speculative and hedging purposes. Specific accounting standards related to derivatives will be used to provide guidance on the accounting for these securities. Microsoft Excel is used extensively to both value and account for the derivative securities.

Attribute: ISEL.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 719B. Forensic Accounting. (3 Credits)

In this course, we will emphasize financial crimes components of forensic accounting and, as such, address financial statements fraud. We will also examine other financial crimes, such as embezzlement.

Prerequisites: ACGB 7105 or GBA Waiver Financial Acct with a score of 070.

ACGB 719C. Financial Accounting/Financial Statement Analysis. (3 Credits)

This course will provide students with an introduction to concepts, vocabulary, procedures, and uses of financial accounting. We will adopt several different points of view, including that of users, preparers, auditors, regulators, and standard setters.

ACGB 719D. Accounting Information Systems. (3 Credits)

The purpose of this course is to introduce students to the subject of computer-based accounting information systems. The four critical objectives are a sound understanding in business processes, transaction cycles, internal controls and the systems components of each.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 719E. Data-Based Operation Controls. (3 Credits)

The primary focus of the class will be on the use of data-driven analytics to help managers make key operating and strategic decisions. A secondary focus will be on the use of data-driven analytics for the purpose of internal control.

Prerequisite: ACGB 7155.

ACGB 719F. Data Analytics for Managerial Accounting and Controls. (3 Credits)

The primary focus of the class will be on the use of data-driven analytics to help managers make key operating and strategic decisions. A secondary focus will be on the use of data-driven analytics for the purpose of internal control.

Attribute: ASDM.

Prerequisite: ACGB 7155.

ACGB 719G. Audit Data Analytics. (3 Credits)

Introduces audit and accounting students to data analytics foundations, methods and tools. It reviews industry applications and trends. Students will do hands-on projects analyzing audit and other accounting data.

Attributes: ASDM, BUAN, ISEL.

Prerequisite: ACGB 7171.

ACGB 719H. IT Audit and Information Assurance. (3 Credits)

This course will present an overview of the various elements of IT Audit and Information Assurance. Basic IT audit and information assurance concepts will be discussed and analyzed. General IT and application controls will be covered along with how the controls underlie SOX Section 404 Legislation. The course will also examine business processes, technologies and controls relating to financial reporting. Key components of information systems, including operating system security, database controls, network safeguards, systems development and application maintenance will also be covered. Technology processes supported under COBIT 5 will be discussed along with risk assessment techniques. The challenges around information assurance, data governance and privacy will be explored in detail.

Attributes: ASDM, BUAN, ISEL.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 719J. Industry Analysis and Strategic Planning. (3 Credits)

Discusses techniques for analyzing the long-term attractiveness of different industries and develops a framework to understand the nature of competition and the relative competitive position of firms within industries. Emphasizes global factors that affect industry attractiveness and competitive positioning. In particular, highlights the impact of differences in and the competitive advantages of nations and trade, as well as the development of global standards for the long-term profit potential of industries. While this course emphasizes the industry level, it also includes competitive factors of firms within industries to introduce a framework for strategic planning at the firm level.

Attribute: ASDM.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 719L. Sustainability and Environmental Reporting and Disclosure. (3 Credits)

Students will explore the changing landscape of corporate reporting. In particular, they will learn how organizations articulate the material, non-financial and environmental risks, and opportunities facing companies.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 719M. Financial Modeling for Accounting. (3 Credits)

Develops (using Excel) the type of financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Covers modeling of financial statements and models in many other important practical areas, such as time value of money, project evaluation, bonds, investment management and derivatives. Emphasizes using most powerful and useful tools in Excel, such as logical functions, PivotTables, Data Table, Scenario Manager, and Goal Seek to solve problems that closely resemble real-life situations.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 719N. Business Risks In A Global Digital Economy. (3 Credits)

Our global, digital world has created a complex landscape with unprecedented challenges and risks for business. This course analyzes the ever-changing challenges companies face in this new environment. Lectures will discuss government policies, strategies, and tactics driving enforcement activity and outline the most effective approaches for preventing, detecting, and responding to these risks. Students will gain an understanding of these challenges in both the private and public sectors in varying industries.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 719P. Professional Practice Research Seminar. (3 Credits)

The course will seek to expose students to issues and challenges faced by practitioners and regulators involved in financial reporting and capital markets. It intends to develop the ability to identify fundamental problems and frictions and think about approaches to address them. The course will foster critical thinking, identification and problem-solving skills, and ability to locate and analyze academic, professional, and regulatory information, as well as the ability to express oneself clearly and effectively. We will rely on and harness knowledge that participants have acquired in other courses. Some issues and problems of interest may require some form of data analysis. This may include the need to quantify and assess the scope of the issue, its economic magnitude, and its evolution over time. In some cases, the actual question or solution entirely depends on identifying and assessing the cost and benefit of the policy, phenomena, or behavior. Data-driven decision making will be a component of this course.

Prerequisite: ACGB 7105.

ACGB 719R. Programming with Python. (3 Credits)

Do you want to be able to solve business problems through programming/coding? This course introduces key programming concepts, techniques, and tools. Students will learn programming/coding using the widely used Python programming language.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 719S. US/UK Sustainability Communication and Reporting. (3 Credits)

This course will enable students to develop a deeper understanding of the risks and opportunities of being a sustainable business and the similarities and differences of sustainable communications between companies in the U.S. and in the U.K. Students will have the opportunity to travel to the U.K. and hear directly from leaders of industry about the challenges they face when trying to identify, evaluate, and report the issues that will allow them to operate as a sustainable business. Students will research companies in the U.K. and the U.S. to compare and contrast how different companies are handling similar situations with a focus on how they are using the U.N. Sustainable Development Goals to evaluate risk exposure and to communicate to their stakeholders.

Prerequisite: ACGB 6111.

ACGB 719T. Accounting Internship Seminar. (3 Credits)

Internships are experiential learning activities designed to provide students with opportunities to make connections between the theory and practice of academic study and the practical application of that study in a professional work environment. This course provides students with the unique opportunity to engage with multi-national service corporations and through the completion of weekly exercises and a final reflection paper, earn academic credit. Students will gain relevant experience and professional connections and ultimately accelerate their career.

ACGB 719U. Sustainability Reporting and Finance. (3 Credits)

Financial decisions worldwide are increasingly influenced by the unique risks of the 21st century. All activities demand focus on sustainability issues—from the looming impacts of climate change and risks associated with health and safety to credit and investment gaps that limit business opportunities and hamper economic progress in many parts of the world. As the challenges of scarcity of resources, the search for profits through efficiency, and impact of climate change continue to mount, environmental, social, and governance (ESG) data become essential for prudent decision-making. Along with several multinational investment banks, Dow Jones has a sustainability index indicating that the search for profitability through efficiency has transcended trends and become the new corporate norm. Students in this course study finance, corporate disclosures, and sustainability reporting practices as integrated subjects, beginning with an introduction to financial and reporting principles and moving through financial analysis and industry-focused disclosures. Additionally, the course covers diverse aspects of sustainable reporting and offers tools for effective risk assessment.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of .

ACGB 7811. Accounting -Internship. (1 to 3 Credits)

This course is intended for students with an Accounting internship for this trimester that wish to receive academic credit for it. The course will begin with an orientation session and will be followed by additional meetings with students. The course instructor will provide additional details to enrolled students.

ACGB 819A. Valuation and Modeling for Accounting. (1.5 Credits)

This course expands on valuation techniques discussed in Modern Financial Analysis and Valuation Techniques. Students will have the opportunity to learn the modeling techniques used by today's Wall Street practitioners associated with Discounted Cash Flow Analysis, Merger Analysis, Purchase Price Allocations and Synergy DCFs.

Attribute: ASDM.

Prerequisite: ACGB 819B (may be taken concurrently).

ACGB 819B. Modern Financial Analysis. (1.5 Credits)

Learn how the financial services industry applies valuation techniques in a deal context! In this mini-course, you will demystify the theory behind the analytics and ultimately appreciate the "art" and "science" of valuation analytics. What is a company worth? What is someone willing to pay? The answers depend on: who the seller is; who the potential buyer(s) is; the context of the transaction and the current market conditions.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 819C. ESG and Purpose Driven Business. (1.5 Credits)

Environmental, social, and governance (ESG) covers a broad range of ever-increasingly essential business issues. ESG concerns are becoming part of mainstream business discussions, and they require that companies consider more than just profit but create value for all stakeholders. Through interactive lectures, games, in-class exercises and reflection, you will finish with a well-grounded approach to making the purpose-driven business a reality.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 8999. Independent Study. (2 to 3 Credits)

Accounting Tutorials.

Taxation Courses

TXGB 7001. Corporate Taxation. (3 Credits)

Studies federal income tax laws that apply to the formation, operation, dissolution, and liquidation of corporations. Focuses on the tax impact of various financial transactions upon the corporation, as well as on the shareholders. Issues of distributions and redemptions, accumulated earnings tax, and personal holding companies are covered. Discusses related multiple corporations, earnings and profits, and book-to-tax adjustments. Also studies S corporations and other ways of mitigating double taxation. Includes a brief review of corporate acquisitions and reorganizations.

Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7010. Federal Research and Procedures. (3 Credits)

Concentrates, during the first part of the course, on the skills needed to research and answer tax questions. Then focuses on the procedures to resolve disagreements – both pre-and post-audit – with the Internal Revenue Service.

Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7015. Partnerships. (3 Credits)

Analyzes the uses, formation, operation and termination of partnerships. Topics include the “substantial-economic-effect doctrine,” distributions, sale and exchange of interest, partnership termination, liquidation and disproportionate distributions and limited partnerships and their use as tax shelters.

Prerequisite: TXGB 7001 (may be taken concurrently).

TXGB 7020. Tax Planning for Individuals. (3 Credits)

This course emphasizes the relationship of estate and gift taxes to the income tax. It explores the philosophy underlying federal policy toward the three taxes and the issue of transferring assets. It also introduces basic elements of estate planning, such as trusts, annuities, joint interests, and life insurance.

Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7025. Tax Planning for High Net Worth Individuals. (3 Credits)

Focuses on the practical aspects of taxing wealthy individuals. Reviews general income-tax planning for wealthy individuals; dealing with passive activities (tax shelters); the use and limitations of qualified plans; investment planning (debt versus equity, timeframe, asset allocation); life, disability and liability insurance exposures; retirement planning; and estate planning.

Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7030. Corporate Tax Planning Strategies. (3 Credits)

Offers an in-depth study of Subchapter C of the Internal Revenue Code: the complicated rules governing organization, reorganization and liquidation of corporations. Explores such topics as leveraged buyouts, corporate takeovers and personal holding companies. Provides the groundwork essential for corporate tax planning and the analysis of mergers and acquisitions.

Prerequisite: TXGB 7001.

TXGB 7035. Federal Taxation of Financial Instruments and Transactions. (3 Credits)

This course will provide students with a basic understanding of federal tax consequences of investing and trading in various financial instruments (equity, debt, derivatives). It also will provide an overview of alternative investment funds and common tax issues encountered by such funds and common structuring techniques employed.

Prerequisite: TXGB 7001 (may be taken concurrently).

TXGB 7041. Research Project. (3 Credits)

Offers an opportunity to research a topic in taxation agreed to by the professor and the student. The research is focused on both academic and legal references and may be integrated with current or anticipated tax practice. A written research paper and an oral presentation are required.

Prerequisites: TXGB 7001 and TXGB 7010.

TXGB 7045. International Tax and Accounting. (3 Credits)

This course introduces the complexities of international taxation by focusing on the U.S. tax system’s impact on U.S. companies investing or operating abroad, and on foreign companies investing or operating in the U.S. Topics include tax treaties, foreign tax credits, and controlled foreign operations. The course also addresses global initiatives with respect to taxation and accounting. TXGB 7010 is recommended as a prior course.

Prerequisite: TXGB 7001.

TXGB 7048. Taxation Planning with Trusts. (3 Credits)

Trusts are used in all facets of income tax, gift tax, estate tax and financial planning. Some trusts are created primarily for tax-planning purposes, but others are more general. This course analyzes and evaluates many creative and current planning uses of the following trusts: irrevocable and revocable trusts, grantor trusts, testamentary trusts, trusts for minors, dynasty trusts, life insurance trusts and corporate trusts.

Prerequisite: TXGB 7020.

TXGB 7050. State and Local Taxes. (3 Credits)

Discusses the basic elements of state and local taxes, and surveys the distinctive tax characteristics of major business states, such as New York, New Jersey, Illinois and California.

Prerequisite: TXGB 7001.

TXGB 7056. Taxation of Executive Compensation. (3 Credits)

Covers the tax consequences as well as various strategies relating to the design and implementation of executive compensation programs including stock options, restricted stock, stock appreciation rights, phantom stock and golden parachutes; employee benefit plans, including health care, disability, life insurance, educational assistance, dependent care and cafeteria and flexible spending plans; and retirement plans, including qualified pension, profit-sharing and stock bonus plans, as well as non-qualified supplemental executive retirement plans (SERPS), top hat plans and excess benefit plans.

Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7065. Current Problems in Tax. (3 Credits)

This course analyzes the major provisions of new and proposed federal tax laws and compliance procedures, examining their impact on individual taxpayers, businesses, investments, retirement plans, practices, and procedures. The course uses the current changes and proposals to keep up with the constantly changing tax environment.

Prerequisite: TXGB 7001.

TXGB 7076. Tax Accounting. (3 Credits)

Provides an understanding of the application of Accounting Standard Codification (ASC) Topic 740, Income Taxes. Focuses on the financial reporting of income tax amounts on the Statement of Operations, Statement of Financial Position, Statement of Stockholders' Equity, and the Statement of Cash Flows, tax footnote, and related disclosures.

Also covers audit issues related to income tax balances, disclosures, identifying tax risks, and internal controls to mitigate such risks.

Prerequisites: TXGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7080. Taxation of U.S. and Foreign Expatriates. (3 Credits)

Analyzes how salaries, benefits and special allowances can be structured to minimize individual tax liability under U.S. tax law for citizens working abroad and foreigners working in the United States. Encompasses filing requirements, cost-of-living differentials, foreign business expenses, foreign tax-credit limitations and avoidance of double taxation.

Prerequisite: TXGB 7025.

TXGB 7081. IT and Data Analytics for Taxation. (3 Credits)

This course presents an introduction to the landscape and usage of technology in the area of tax operations. Topics include a deep dive into Microsoft Excel functionality and an introduction to the latest software such as Power Query, Alteryx, and Power BI visualization. The course includes overviews of topics but will also allow for some hands-on application work within the technologies discussed.

Prerequisites: TXGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7085. Foreign Taxation. (3 Credits)

Introduces the tax systems of major foreign countries from two standpoints taxation of U.S. companies investing or operating in foreign countries and taxation of foreign enterprises investing or operating in the U.S.. Extends concepts discussed in TXGB 7045.

Prerequisite: TXGB 7045.

TXGB 709C. Civil and Criminal Tax Enforcement. (3 Credits)

This course focuses on the federal tax crime statutes enumerated in the Internal Revenue Code and the impact on tax practitioners in their capacity as expert witnesses for the defense, as government witnesses against the client, and as the targets of a criminal investigation. The student will be introduced to the function of the Criminal Investigation Division of the Internal Revenue Service and its investigative techniques, as well as to the legal process via the role of the Justice Department. This course may be taken as an elective for students in the MS in Taxation, MTA, MS in Accounting as well an elective in the MBA Program.

Prerequisite: TXGB 7001 (may be taken concurrently).

TXGB 7184. Individual and Business Entity Taxation. (3 Credits)

Explores the sources and ideas underlying tax laws and their development in relation to fiscal and social policy. Emphasizes the application of basic concepts in tax planning for individuals and businesses. Topics include gross income, exclusions, deductions, credits, property transactions, basis, and the alternative minimum tax.

Attribute: ABEP.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

TXGB 719L. Sustainability Research and Reporting. (3 Credits)

This course enables students to develop a deep understanding of industry standards and expanding regulations and guidance by examining current company disclosures and evaluating to what level such disclosures reflect the company's associated industry standard. Students will form their own views on how companies' disclosures compare to the standards with respect to their relevance, fair representation, and usefulness in helping investors assess performance on material sustainability topics.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

TXGB 7811. Taxation - Internship. (1 to 3 Credits)

This course is intended for students with a Taxation internship for this trimester that wish to receive academic credit for it. The course will begin with an orientation session and will be followed by additional meetings with students. The course instructor will provide additional details to enrolled students.

TXGB 8999. Independent Study. (3 Credits)

Business Law and Ethics

The law and ethics area provides students with valuable courses that examine and analyze legal and ethical concepts that are critical to the business environment.

All students in the primary-model M.B.A. program are required to take BLGB 6310 Business Law I, which explores the requirements of a business contract and the rights and obligations of the parties to a contract. It also examines the functions of business organizations, such as partnerships, limited liability companies, and corporations. They are also required to take the one-year course BLGB 6321 Markets, Business, and Society that examines ethical issues in business.

Accounting students are encouraged to take BLGB 7320 Business Law II, which covers commercial law issues relevant to the CPA examination. Because the topics in the class center on sales contracts and negotiable instruments, this course may also be useful to students in other programs as an elective.

Courses

The law and ethics area offers elective and special topics courses that may be of interest to students across the range of Fordham's business programs. They cover topics such as securities law, international business law, business ethics, international business ethics, employment law, sports law, white-collar crime, and business organizations.

BLGB 6310. Business Law I. (3 Credits)

MBA FLEX CORE COURSE Introduces the fundamental concepts and legal principles that are applicable to the American legal system, its development and inherent ethical considerations. Discusses the basis and structure of business contracts; the creation and characteristics of agencies, partnerships, limited liability companies and corporations; and the rights and liabilities of agents, partners, directors and shareholders. Students analyze cases and discuss and solve problems.

BLGB 6321. Markets, Business, and Society. (3 Credits)

MBA CORE COURSE Markets, Business, and Society is about the responsibilities of businesspeople. It is based on the assumption that business, like law and medicine, is a profession whose practitioners carry out an important role in society. When individuals enter the profession, they take on a distinctive set of responsibilities that go with the role. The purpose of the course is to provide a realistic understanding of these responsibilities and a set of practical tools to help students carry them out. This is the only course at the MBA program focusing on the question: what is the right thing to do in business? Other courses explore the causes and consequences of wrongdoing and the institutions that regulate conduct in business. This course will also consider these empirical topics but only as background. Instead, the focus of Markets, Business, and Society is normative reasoning about gray area problems in business, which involve conflicts of values, clashing responsibilities, ambiguous standards, factual uncertainties, aggressive stakeholders, and intense time pressures, among others. The course will help students develop their decision-making principles and devise implementation plans that meet relevant economic, legal, and ethical responsibilities and fulfill the organization's values and commitments. Deciding on a course of action will require careful analysis, thoughtful deliberation, and, in some instances, difficult trade-offs. By working through the choices and dilemmas presented in the course, students will hone their skills in decision making and action planning while also building their own decision-making frameworks.

BLGB 7320. Business Law II. (3 Credits)

Examines the legal aspects of business and focuses on personal property, sales, product liability, secured transactions, insurance, negotiable instruments, banking and bankruptcy. Students analyze applicable provisions of the Uniform Commercial Code and cases and problems on the above topics.

Attribute: ABEP.

Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 7325. Law of Trad & New Media. (3 Credits)

Analyzes the legal parameters and constraints on freedom of expression that govern traditional and new communications technologies. Probes the various constitutional, statutory and regulatory protections accorded the Internet and more traditional media, such as print, broadcast and cable, as well as governmental attempts to regulate certain aspects of these technologies. Topics include modern First Amendment interpretation, defamation, privacy, commercial speech, indecency/obscenity, contracts, intellectual property and e-commerce. Also offered as CMGB 7556.

Attribute: ABEB.

BLGB 739C. International Business Ethics. (3 Credits)

In this course we analyze global business activities from a moral perspective. Also, we will examine debates about what it means for a multinational firm to compete successfully in the world marketplace with moral integrity, and what obligations it has to respect transnational laws, codes of conduct and ethical guidelines.

Attributes: ABGS, ABIB.

Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 739F. Contemporary Iss Int'l Bus Law. (3 Credits)

A study of the contemporary issues of international business law.

Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 7400. TMBA: International Business Law and Ethics. (3 Credits)

TMBA:Intrnt'l Bus Law & Ethics.

BLGB 839A. Contemporary Ethical Issues in Business. (1.5 Credits)

This course explains various ethical schools of thought and their application to business.

Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 8999. Independent Study. (3 Credits)

Communication and Media Management

The communication and media management faculty includes leading scholars and industry professionals who bring cutting-edge research and experiences to the classroom. Their courses are useful to students pursuing degrees outside this area as well, providing a thorough grounding in all facets of organizational communication that can benefit professionals in all business fields.

Area faculty also run Fordham's Center for Communications, which brings prominent communications and media figures to campus for special lectures and symposia.

Programs

The communications and media management area oversees programs designed for students pursuing careers in the communication, media, information, and entertainment industries:

- M.B.A. Concentration in Communications and Media Management (p. 441)
- M.S. in Media Management (p. 459)
- Online M.S. in Strategic Marketing Communications (p. 463) (Interdisciplinary)

Courses

CMGB 6550. Advanced Business Communication. (3 Credits)

Communicating effectively is essential to successful management, yet many managers lack an understanding of their own communication skills. This course instructs students on what effective management communication means for teams and leadership styles, including communicating change, managing stakeholders, empowering others, and presenting compelling ideas. Students learn how to provide constructive feedback and how to examine their own communication style, applying theories and concepts via practical means in course activities and assignments.

Attribute: MOE.

Mutually Exclusive: CMGB 7550.

CMGB 7500. Media Systems and Markets. (3 Credits)

Introduces students to all of the key elements that constitute contemporary media systems and to the key stakeholders in—and evolving dynamics of—contemporary media markets. Includes comparative analyses of international media systems and the economic, technological and regulatory parameters under which they operate. Also provides historical, economic and technological perspectives on the evolution of media systems and markets. PREVIOUSLY TITLED: MEDIA & COMMUNICATION INDUSTRIES.

Attributes: ABEB, PMMA.

CMGB 7525. Cross Cultural Negotiation and Communication. (3 Credits)

Explores how cultural differences and international settings affect business communication and negotiation—key skills for managers who seek to get solutions accepted and implemented. The dimension of culture is used to increase the student-managers' self-awareness and reflection and to build flexibility in their conceptual understandings and skills. Emphasizes specific strategies, styles, and techniques that help the negotiator/communicator.

Attributes: ABGS, ABIB, BLEB, GSSE, PMMA.

CMGB 7530. Innovation in Media Business Models. (3 Credits)

This course examines the factors that have contributed to the emergence, institutionalization, and decline of traditional media business models, as well as to exploring, assessing, and critiquing the wide range of new and innovative business models that are emerging in the contemporary media environment. Students will draw upon these analyses to develop new business models or innovative variants of existing business models for discussion and critique.

Attribute: ABEP.

CMGB 7531. Comm Corp Image Responsibility. (3 Credits)

Demonstrates the value of pragmatic public relations activities through basic principles, case studies and guest speakers. Examines how inept communications and resulting public perceptions can create or deepen corporate crises. Stresses criteria for selecting outside counsel, establishing relationships with the media and communicating with employees and stockholders. Also offered as MKGB 7782.

Attributes: ABGS, MEMG.

CMGB 7534. Public Relations. (3 Credits)

This course examines the use of public relations strategies to replace or augment more traditional communications efforts. It will feature agency publicists and company representatives who will discuss this trend. This course will also include case studies that illustrate how techniques such as video press releases, expert spokespeople, and inventive news pegs are used as part of an overall communications plan.

Attributes: MEMG, PMMA.

CMGB 7537. Crisis Communication and Leadership Strategies. (1.5 to 3 Credits)

Every organization faces crises. Yet, how crisis is handled is critical to helping its brand move forward. Students learn theoretical conceptualizations, public relations and crisis management skills to handle real world crises. Students assess how public-relations fits into the strategic management and decision-making of an organization during a crisis situation. Possible remedies for crisis are examined by applying best strategies for specific situations, using both traditional and new media, while also focusing on strategies and approaches for crisis prevention.

Attributes: ABIB, MEMG, MOE, PMMA.

CMGB 7540. The Business of Music. (3 Credits)

This course has a rotating focus each semester that it is offered, but each instance will involve an intensive focus on a single industry sector. Specific sectors that will be the subject of semester-long intensive analysis include the television industry, the music industry, and the motion picture industry. Students will apply the analytical skills and conceptual understandings developed in other courses in the curriculum as part of an effort to achieve a detailed understanding of the challenges and opportunities facing an individual media sector. Students will also gain a detailed understanding of the history, evolution, economics, and key stakeholder dynamics of these individual industry sectors.

Attributes: MEMG, PMMA.

CMGB 7541. Applied Project. (3 Credits)

This course provides students the opportunity to apply their skills to a project with a real client. Students will gain real-world experience as they learn how to manage a project and client relationship virtually as they maintain effective client engagement. Students will be responsible for managing their project and the client relationship, as well as submitting deliverables on time. During this course, we will discuss effective project management and the importance of stakeholders. We will review the various deliverables for this project, including the project management deliverables and final presentation deliverable.

CMGB 7550. Leadership Communication. (3 Credits)

MBA FLEX CORE COURSE A leader's success hinges on the ability to communicate effectively with diverse stakeholders in divergent settings. This applied course introduces students to academic theories that describe, explain, and predict effective and ineffective leadership communication behaviors. Throughout the semester students solicit candid and constructive feedback about their leadership communication strengths and improvement opportunities. Then, they apply practical strategies, validated by academic research, to improve their communication effectiveness as leaders. Previously titled Management Communication.

Mutually Exclusive: CMGB 6550, MMGB 6650.

CMGB 7554. Consumer Adopt of New Med. (3 Credits)

Examines new communications technologies using guest speakers, videotapes and case studies. Surveys cable, video, satellite transmission, digital television, Internet media and other new and emerging forms of information transmission, with particular emphasis on their interaction and impact on society and business. PREVIOUSLY TITLED: NEW MEDIA AND MASS COMMUNICATIONS.

Attributes: ABEB, PMMA.

CMGB 7556. Law of Trad & New Media. (3 Credits)

Analyzes the legal parameters and constraints on freedom of expression that govern traditional and new communications technologies, focusing on the Internet. Probes the various constitutional, statutory and regulatory protections accorded the Internet and more traditional media, such as print, broadcast and cable, as well as governmental attempts to regulate certain aspects of them. Topics include modern First Amendment interpretation, defamation, privacy, commercial speech, indecency/obscenity, contracts, intellectual property and e-commerce.

Also offered as BLGB 7325.

Attributes: ABEB, MEMG.

CMGB 7561. New Media Product Dev Prac I. (3 Credits)

Intended to help students understand the practical application and integration of compelling content and the various formats of modern media in business application. The course includes most forms of video, audio, and social media. Students will develop a media strategy, delivery plan, and create actual media to solve communications challenges for real companies.

Attribute: MEMG.

CMGB 7563. Ethics & Soc Resp in Media Ent. (3 Credits)

This course explores the wide range of ethical issues affecting contemporary media enterprises and the role that social responsibility should play in the operation of these unique and influential enterprises. Specific issues addressed in this course include consumer privacy, codes of conduct and self-regulatory principles, the concepts of the 4th and 5th estates and their evolving role in the operation of media enterprises, and issues of media effects and how such potential effects should factor into decision-making.

Attribute: ABGS.

CMGB 759B. Sports Media & Promotional Comm. (3 Credits)

Sports Media and Promotional Communication examines the mass media industry in relation to the sports field. The sports industry is unique in its economic structure and its consumers – the sports fans. The course focuses on the "off-the-field" industries of television, digital communication, advertising, sponsorship, marketing, and public relations that greatly impact all sports. The course looks at various sports as well as various forms of media and various promotional communication strategies. Students will get an understanding of the industry today, as well as learn about the history of the sports media and the pivotal people who helped shape the field.

Attribute: PMMA.

CMGB 759L. Comm for Entrepreneurs. (3 Credits)

This advanced course, granted an "Entrepreneurship and Venture Initiation" (ENT) designation, will help you launch your venture. Specifically, this class will help you: (1) Pitch your ideas with clarity and confidence. (2) Sell your ideas to critical stakeholders. (3) Brand yourself and establish your credibility in less than 60 seconds. (4) Spin your ideas so they "stick" in a crowded marketplace. (5) Gain valuable feedback about your ideas, brand, and expertise.

Attribute: ABEP.

CMGB 7590. International Comm & Neg. (3 Credits)

Addresses three broad topics: 1. Culture and Behavior: How culture, and cultural differences, affect human behavior in general and communication in particular. 2. Culture and business communication needed adaptations in correspondence, presentations, and meeting behavior to accommodate cultural differences. 3. Culture and Negotiation. How culture becomes a factor in business negotiations, how it changes "the game".

CMGB 759R. Social Media. (3 Credits)

Study and application of social media communication and strategy, including social media platforms and user devices, message distribution, and personal and professional online, social environments. The course examines relationships between the technical affordances of technology and the social norms, and how to understand emerging technologies (and social media that doesn't exist yet!). Students will also gain practical social media skills: understanding the landscape, learning "best practices," and using different social media technologies throughout the class to create and propagate content.

Attributes: ABEP, MEMG, PMMA.

CMGB 759Z. Gaining Global Bus Pers:Galway. (3 Credits)

This course provides students the opportunity to travel to Galway, Ireland and participate in a week-long study program that will focus on global business from an Irish perspective. The objectives of the course include: Understand the business environment in Ireland; Understand the role of multinational versus start-up organizations within Ireland; Identify benefits to investing in Ireland; Practice key communication skills for global business. The course will include academic sessions and industry site visits. Participants of the course will include Executive MBA students, MBA students, eligible MS students, and executive education participants. Please click here for more information. Please contact Francis Petit, Associate Dean at petit@fordham.edu for additional information on registration, logistics and cost. Professor Dr. Meghann L. Drury, Ph.D., M.A., H.Dip.B.S. Assistant Professor, Communication and Media Management.

Attribute: ABIB.

CMGB 75AA. Media Executive Playbook. (3 Credits)

This course will take an in-depth look at the strategies, plans, and programs developed and implemented by media industry executives to help their businesses survive and thrive in an increasingly changing and competitive media industry environment. The course will include case studies, topic-specific projects, and reviews of current industry trends, issues, and opportunities. Media industry executives and subject matter experts will be asked to guest lecture certain classes to provide a practical perspective about how to address and solve industry challenges. The class will look at the business' audience and marketplace dynamics, content offerings, media distribution and delivery platforms, branding, marketing, business models, and operations. We will also review how a business' mission, vision, strategic plan, goals, strategies, priority initiatives, operating plans, financials, etc., create a successful business. The course includes lectures, discussion and guest speakers along with current articles and other readings, video materials, and digital sources. Whenever possible, the course draws on Fordham's unique setting in New York City, the media capital of the world.

Attribute: PMMA.

CMGB 75AB. The Power of Open Knowledge. (3 Credits)

This is a hybrid course and include active participation in MOOC (Massive Open Online Learning Course). The goal of this course is to prepare business students to the foundations of open knowledge creation, use, dissemination, and evaluation, to collaborate with professionals from other cultures and disciplines, and to work effectively in rapidly changing knowledge environments. It has been designed to help students develop a high level of self-determination in their own learning, which is a critical skill for future professional success.

CMGB 75AC. Organizational Comm & Theater. (3 Credits)

In this course students critically analyze theatrical works about business and leadership issues using through the lens of organizational communication theories. Throughout the semester students analyze a range of theatrical works and performances through readings, guest lectures, and attendance at theatrical events outside of class. Upon completion of the course students will have developed a unique perspective on how theatrical works bring organizational communication concepts and theories to life.

CMGB 75AD. The Storytelling Project. (3 Credits)

In this course students apply narrative theories from multiple disciplines - communication, psychology, literature, neuroscience, and theater - to critically analyze the anatomy of effective and persuasive stories. Investigating historical folklore and contemporary narrative paradigms from the 21st century, students analyze why some stories and forms are more persuasive, inspiring, and mythic than others. Through practice and developmental coaching, students enhance their own repertoire of persuasive storytelling abilities and discover their own authentic and rhetorical voices.

CMGB 75AE. Graduate Study Tour Poland. (3 Credits)

Media and technology industries in Poland and Central Europe Study Tour Course for Graduate Business students Krakow, Poland.

CMGB 75AF. Business and Entertainment. (3 Credits)

This course will give students the opportunity to analyze different entertainment artifacts (television programs, movies, theatrical productions, and written publications) using a curated body of academic organizational communication theories.

CMGB 75AG. The Business of TV. (3 Credits)

Television has been one of the cornerstones of media for more than 75 years and has become a medium through which we understand and study our culture. From the first moon landing to “Who Shot JR,” from the White Ford Bronco chase involving OJ Simpson to the 2016 presidential election, television has helped to shape our industrial paradigms, social trends, and culture, and has served as a mirror to society. This class will study the sociocultural issues and effects associated with television by looking at it from various angles—including social, economic, political, and entertainment perspectives—and by reviewing the past, present, and future of television.

Attribute: PMMA.

CMGB 75AH. Professional Communication. (3 Credits)

This course will prepare you for communicating in the workplace with multiple levels in an organization. We will examine group communication, decision making in organizations, professional presentations, and strategic communication, including issues and solutions for each. This course is appropriate for multiple levels in an organization, and you do not need a background in communication. It will help you better communicate at work whether you are a seasoned communicator or a novice wanting to improve.

CMGB 75AJ. Financial Media. (3 Credits)

Financial Media examines the complex interactions between business, politics, and the press. The course is designed to help students achieve a better understanding of how business content is delivered and retrieved in the current media environment. The course focuses on the dynamics of reporting about companies and business industry leaders who are using the media to deliver critical messages to several stakeholder groups, including investors and consumers. The course provides numerous examples of business or political leader interactions with the media and debates their communication strategy as well as their outcomes.

Attribute: PMMA.

CMGB 75AK. Persuasive Corporate Communications. (3 Credits)

Business professionals have long known that the ability to influence is a critical business skill. Developing long-term relationships with clients and developing an effective corporate culture is highly valued. Students will critically examine contemporary scholarship from the academic and applied field detailing effective and ineffective practices for persuading stakeholders at various levels. Students will examine how different communication channels can impact the degree to which an audience is persuaded. The course will focus on internal and external organizational communication.

Attributes: MOE, PMMA.

CMGB 75AL. Investor Relations. (3 Credits)

A corporate Investor Relations program formulates and communicates the financial performance and strategic direction of diversified corporations to the global investment community. Investor Relations professionals are well versed in accounting, compliance, finance, governance, marketing and communications. They collaborate with senior management and the Board of Directors to convey and interpret corporate matters to the public. This course will teach students the skills and competencies required to become a corporate Investor Relations professional. The course utilizes a course textbook, case studies, investor relations guest speakers and participation in investor relations events.

CMGB 75AM. Sponsorship. (3 Credits)

Total global sponsorship spending is now an estimated \$60 billion annually with most major companies employing sponsorship as a way to achieve a variety of brand goals. This course focuses on the unique advantages of sponsorship as a form of marketing communication. Students will understand how and why sponsors choose certain properties, how properties prospect, recruit, and retain sponsors, the unique opportunities for brand exposure and brand recall, the brand image opportunities created through a brand association, and the importance of product category exclusivity. Special attention will be placed on sponsorship activation and the development of a flexible, customizable sponsorship to fulfill specific brand goals. The course will also focus on evaluation and measurement in determining the effectiveness of the sponsorship.

CMGB 75AN. Digital Media Sales Technologies and Strategies. (3 Credits)

This course will provide a thorough understanding of the technologies underpinning digital media sales and advertising technology (Adtech) and the strategies by which publishers maximize monetization. Students will learn about the full life cycle of digital advertising and all the different technologies and ad impression funnels. The course will cover the different types of ad capabilities and monetization strategies that are available on all existing types of digital content, such as websites, apps, social platforms, and OTT. Students will be challenged to synthesize all aspects of ad tech and provide a critical analysis toward potential monetization strategies and the upcoming industry predictions.

Attribute: PMMA.

CMGB 75AP. Business of Media and Entertainment. (3 Credits)

An introduction to the substantive business operations and media economics issues in the publishing, broadcasting, recorded music, new media, and film industries. A required project links the course to the student's specific business discipline.

CMGB 75AQ. Financing New Media Ventures. (3 Credits)

This course is designed for students to learn how to launch new business lines in large media corporations or new startups directly to market. Learn the critical thinking processes of venture fund managers and corporate innovation leaders in charge of dispensing capital to finance new media ventures. Students will also master effective channels of communication with key stakeholders and champions while utilizing venture capital metrics to quantify and evaluate strategic market opportunities.

CMGB 75AR. Influencing Through Content and Communication. (3 Credits)

There's a battle raging in digital media today for attention, with power shifting from organizations to individuals to the tune of \$3.7 billion a year. Now consumers control the narrative, “media” is in the mind of the beholder, and influencers shape the messaging. So, it's essential to understand the best way to work with influencers and to know how to make influencer-worthy content yourself in order to get communications out to the right audience. In this hands-on course, you'll learn the skills needed to execute innovative and disruptive content that drives advocacy and influence, to think differently to foster originality, to implement impactful influencer content plans, and to look to the future for breakthrough solutions right now.

CMGB 75AS. Visual Business Communication Design. (3 Credits)

A hands-on, workshop-style class that teaches students how to design effective business communication assets such as decks, one-pagers, and data visualizations. Students will be introduced to the foundational elements of visual communication. In this learn-by-doing model, weekly student projects will explore design techniques to graphically communicate through persuasive messaging and storytelling.

CMGB 75AT. Managing Diversity in Media. (3 Credits)

Today's media managers find themselves at a critical moment in which audiences and communities are rapidly becoming more and more diverse. Managing diversity as a media executive comes with unique considerations that extend beyond the employee composition of the firm, as both audiences and the content distributed play a role in maintaining diversity and inclusion. In this course, students will learn about how to better understand the race, ethnicity, and cultural backgrounds of media audiences; the social, political, and economic effects of creating content that features diverse topics, casts, and themes; and the value of having a diverse workforce of artists, producers, and managers. Over the course of the semester, students will develop a strategic diversity plan for a real-world media firm that includes a stakeholder register; PEST analysis; business need and justification; diversity goals and metrics; and specific recommendations, actions, and tactics with which the firm should proceed.

CMGB 75AU. Designing Your Life. (3 Credits)

This course teaches design principles for building an intentional, fulfilling life and career. In the same way that designers solve problems to build technology, products, and spaces that serve the needs of their users, participants will employ design thinking to develop their personal and professional lives. The class offers a framework, tools, and, most importantly, a place and a community of peers and mentors where we'll work on these issues through assigned readings, reflections, and in-class exercises. Topics include the integration of work and worldviews, ideation techniques, a portfolio approach to thriving, designing to increase balance and energy, and prototyping all aspects of your life. We also touch on the realities of engaging the workplace and practices that support vocation formation throughout your life. This is an experiential class that includes seminar-style discussions, personal written reflections, and individual mentoring/coaching.

CMGB 75AV. Going Viral: Best Practices for Communication Leaders. (3 Credits)

This course is designed to help students develop skills to address one of the most requested yet misunderstood directives for content today: "Make it go viral!" This course demystifies such "viral content" by analyzing it as a utility (vs. fad). Instead of studying influencers who are often famous for being famous, this course elucidates best practices for content as implemented by unknown copywriters and indie filmmakers as well as content creators from the tourism, startup, sports, and entertainment fields.

CMGB 75AW. Forecasting Trends in Media Industry. (3 Credits)

This discussion and project based course is designed to interrogate new technologies and trends for media professionals (and consumers). By taking this course, students will understand how the digital revolution has upended traditional media and study examples of innovative media and technology. We will systematically explore the future of media and technology in order to forecast it so that we might all make better professional decisions in the present. In teams, students will use strategic foresight and trend analysis to conceive, develop, and pitch scenario-based strategic responses.

CMGB 7811. Media Management Internship. (1 to 3 Credits)**CMGB 8999. Independent Study. (3 Credits)**

Finance and Business Economics

The goal of the finance M.B.A. curriculum is to provide students with the conceptual foundation and technical skills necessary to make sound financial decisions in a changing domestic and international business environment. In particular, the program aims to develop a

thorough understanding of global financial markets and instruments, business valuation and shareholder value creation, implementation of financial strategy through various forms of corporate restructuring, risk management in a global context, and the nature of risk and reward in formulating long-term investment strategies. The curriculum emphasizes interaction with practitioners in a number of innovative course offerings.

M.B.A. students with special quantitative skills may consider specializing in the advanced applied corporate finance track. Students who qualify and are selected will take a special set of courses, chosen in consultation with their academic adviser. The finance and business economics area also offers M.B.A. students the option of a full concentration in finance and elective courses in business economics. Students are encouraged to work with their adviser and faculty members to plan their program relatively early in the course of their studies.

The M.S.F. degree is offered in three formats: on campus, online, and collaborative (delivered in cooperation with select University partners). For more information, visit the M.S.F. program page (p. 454).

The M.S.Q.F. degree prepares students to meet the global financial service industry's need for graduates who have both a deep knowledge of finance and a command of the latest quantitative techniques for financial problem-solving. For more information, visit the M.S.Q.F. program page (p. 462).

Programs

As the Gabelli School's largest academic area, finance and business economics offers several graduate paths:

- M.B.A. Concentration in Finance (p. 442)
- M.S. in Finance (p. 454) (on campus and online)
- M.S. in Quantitative Finance (p. 462)
- M.B.A. Secondary Concentration in Compliance and Risk Management (p. 448)
- M.B.A. Secondary Concentration in ESG Finance (p. 449)
- M.B.A. Concentration in FinTech (p. 442) (Interdisciplinary)
- M.B.A. Secondary Concentration in Blockchain (p. 446) (Interdisciplinary)

Courses

Below are the courses currently offered by the finance and business economics area.

Business Economics Courses

BEGB 6220. Econ Analysis & Bus Decisions. (3 Credits)

MBA CORE COURSE Presents economic theories to examine business pricing, production, marketing, and profits within different market structures and environments. Topics include: consumer choice and demand; the behavior of firms; market power and structure; the efficiency of competitive markets; externalities and social costs; information and behavior under uncertainty. The course also discusses social costs and benefits of business actions and related ethical and regulatory issues. (Formerly Managerial Economics)

Attribute: BUAN.

BEGB 7240. Money Credit Interest Rates. (3 Credits)

Studies the role of money, credit and interest rates in the efficient and ethical functioning of domestic and global financial markets. This building-block course assumes a background in macroeconomics and finance, and it establishes a foundation for further study in all areas of finance. Topics include: flow of funds and interdependency within the financial system; the Federal Reserve System and its role in money creation; interest rates; the links between interest rates and the growth of money; and the effects of inflation and term structure. Prerequisites: BEGB 6220 and FNGB 6411. Also offered as FNGB 7441.

Attribute: ABEP.

Prerequisites: (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

BEGB 7243. Contemp Issues Global Fin. (3 Credits)

Explores current issues relevant to the global financial system, including international commercial and investment banking and international investments. Emphasizes the underlying conditions and fundamental trends in various sectors of international finance. Also offered as FNGB 7458.

Attribute: ABIB.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

BEGB 7244. Global Finance. (3 Credits)

The first half of the course focuses on the theories and practices of world trade, including comparative advantage, the changing trade competitiveness of nations, and protectionism. The second half focus shifts to developing countries: including foreign investment and technology, and investment and trade opportunities, policies and regulations. For SATURDAY / HYBRID sections of this course, there will normally be 4 class meetings, and the balance on-line / contact the professor for further detail. Prerequisite: BEGB 6220.

Attribute: ABIB.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

BEGB 7251. Intl Trade & Development. (1.5 or 3 Credits)

The first half of the course focuses on the theories and practices of world trade. Topics include comparative advantage, the changing trade competitiveness of nations and protectionism. During the second half, the focus shifts to developing countries: the process of economic development, including the contribution of foreign investment and technology as well as investment and trade opportunities, policies and regulations.

Attributes: ABGS, ABIB.

Prerequisites: BEGB 6220 or GBA Waiver Managerial Eco with a score of 070.

BEGB 7300. TMBA: Global Managerial Eco. (3 Credits)

TMBA: Global Managerial Eco.

BEGB 8999. Tutorial. (3 Credits)

Independent study.

Finance Courses

FNGB 640A. Finance Bootcamp. (0 Credits)

Self Study.

FNGB 6411. Intro Financial Sys & Methods. (3 Credits)

FT MBA CORE/ PMBA FLEX CORE COURSE. Introduces the financial system and basic methods of valuation. Students will learn how to interpret financial data reported in the press and will discuss topical subjects facing the financial industry and the economy. Course topics include: financial markets, instruments, and institutions; time value of money, net present value, and applications; valuation of stocks and bonds; elements of firm and enterprise value; risk and return. (Formerly Financial Environment)

Prerequisites: (ACGB 6111 (may be taken concurrently) or GBA Waiver Fundamentals Acct with a score of 070) and (BEGB 6220 (may be taken concurrently) or GBA Waiver Managerial Eco with a score of 070).

Mutually Exclusive: MMGB 6411.

FNGB 7415. Credit Management. (3 Credits)

This course focuses on the analytic approach (stemming from Basel II capital accords) and will help students make wise credit decisions and manage lending portfolios. Topics include the latest lending techniques based on cash flow, advanced forecasting methods (including simulation and stochastic optimization), pricing, portfolio management, default probability, valuation analysis risk rating and credit derivatives.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7421. Prins of Modern Finance. (3 Credits)

Provides a conceptual framework that allows both corporate finance and portfolio investment decisions to be viewed and understood in a unified context of risk and return. Examines concepts of valuation, risk and return, diversification, asset pricing and efficient markets.

Prerequisites: (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

FNGB 7422. Corporate Finance. (3 Credits)

Studies corporate finance and its specific decisions. Topics include evaluating capital expenditure proposals, forecasting financing requirements and selecting sources of financing. The course also discusses working capital management, dividend policy and contingency planning, and addresses the additional challenges of multinational firms. Students taking FNGB 7422 Corporate Finance will not receive credit for FNGB 7400 Business Finance.

Prerequisite: FNGB 7421.

FNGB 7423. Mergers, Acquisitions, and LBOs. (3 Credits)

Focuses on identifying and evaluating target companies and structuring deals. Also considers the economic and social impact of such changes in corporate ownership. Students analyze recent cases, evaluate strategic rationale, examine deal structuring and assess financial impact.

Prerequisite: FNGB 7421.

FNGB 7431. Options and Futures Markets. (3 Credits)

Examines the institutional aspects of options and futures markets and discusses the strategies of hedgers, arbitrageurs and speculators.

Provides an introductory analytical foundation for pricing futures and option contracts.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7433. Fixed Income Analysis. (3 Credits)

Introduces techniques for valuing fixed income securities and their derivatives. Emphasizes pricing and risk-measurement for government, corporate and mortgage-backed instruments. Analyzes embedded options using the binomial model. Develops fixed-income trading and portfolio management techniques, including the use of repo, futures, options, swaps and credit derivatives. Examines theory and empirical evidence on the term structure of interest rates, including the derivation of spot and implied forward yield curves.

Prerequisite: FNGB 7421.

FNGB 7441. Money Credit Interest Rates. (3 Credits)

Studies the role of money, credit and interest rates in the efficient and ethical functioning of domestic and global financial markets. This building-block course assumes a background in macroeconomics and finance, and it establishes a foundation for further study in all areas of finance. Topics include: flow of funds and interdependency within the financial system; the Federal Reserve System and its role in money creation; interest rates; the links between interest rates and the growth of money; and the effects of inflation and term structure. Prerequisites: BEGB 6220 and FNGB 6411. Also offered as BEGB 7240.

Prerequisites: (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

FNGB 7455. Global Finance. (3 Credits)

The first half of the course focuses on the theories and practices of world trade, including comparative advantage, the changing trade competitiveness of nations, and protectionism. The second half focus shifts to developing countries: including foreign investment and technology, and investment and trade opportunities, policies and regulations. For SATURDAY / HYBRID sections of this course, there will normally be 4 class meetings, and the balance on-line / contact the professor for further detail. Prerequisite: BEGB 6220.

Attribute: ABIB.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7458. Contemp Issues Globl Fin. (3 Credits)

Explores current issues relevant to the global financial system, including international commercial and investment banking and international investments. Emphasizes the underlying conditions and fundamental trends in various sectors of international finance. Also offered as BEGB 7243.

Attribute: ABIB.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7460. Portfolio Management. (3 Credits)

Examines portfolio objectives and links them to appropriate investment strategies. Considers the asset-allocation decision, equity and fixed-income portfolio management, return enhancement/risk control techniques and performance evaluation. Commercial-level portfolio optimization software is applied to a range of institutional portfolio problems.

Prerequisite: FNGB 7421.

FNGB 7470. Real Estate Finance. (3 Credits)

Discusses the major factors affecting the valuation and financial structuring of real estate, including general tax and depreciation policies. Presents the roles of principal lending institutions, mortgage banks and investment banks in real estate lending, syndications and partnerships. Also surveys real estate-related securities and their markets.

Attribute: ABEP.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7475. Marketing of Financial Service. (3 Credits)

Provides a scientific understanding of tactics and strategies associated with the marketing of financial services. Emphasizes the role of industry deregulation, intensified competition, and the emergence of new technologies and products on the emerging marketing practices used by financial services institutions. Explore consumers' unique decision-making styles in financial matters, the effects of technology deployment, and the fiduciary constraints that guide marketing activities in the markets for commercial banking services, mutual funds, investment banking services, insurance and other forms of financial services.

Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

FNGB 749A. Financial Modeling. (3 Credits)

This course helps students develop the type of excel –based financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Students deliver written and oral presentations of their models and practice critical skills for a successful career in finance.

Attribute: ASDM.

Prerequisite: FNGB 7421.

FNGB 749C. Venture Capital Financing. (3 Credits)

We will examine the changes in the asset class over time – from the formation of American Research & Development in 1946 to the formation of some of the angel-type funds of the present. We also will examine the geographical differences between venture funds – West Coast and East Coast . We also will look at specialization – the beginnings of IT-focused investing and the move into healthcare and finally into energy. Finally we will examine the phenomenon of global venture capital. How does that vary from the way venture capital is practiced in the US. The class will be taught in modules and we also will rely on practitioners and experts to visit with the class. Where possible, the students will be asked to visit venture capital fund presentations, expert briefings as well as personal briefings.

Attribute: ABEP.

Prerequisite: FNGB 7421.

FNGB 749E. Technical Analysis. (1.5 or 3 Credits)

This course is designed to inform students about how the markets and individual stocks behave (i.e., technical analysis), and how they differ from the economy and individual companies (i.e., fundamental analysis).

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749I. Equity Analysis. (3 Credits)

This course will feature a series of guest lecturers who are highly regarded experts in their respective areas. The course will cover wealth management, private equity, equity analysis in general and analysis within specific industry sectors such as retail, media, insurance, etc. We are looking for highly motivated students who will ask lots of questions and who will engage the guest lecturers in meaningful dialog during the discussion periods.

Prerequisite: FNGB 7421.

FNGB 749J. Sustainability and Finance. (3 Credits)

In this course we explore how the evolving needs of society are changing the way financial theories, tools, and techniques are conceived and applied. GLOBAL SUSTAINABILITY COURSE .

Attributes: ABEP, ABGS.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749M. Hedge Fund. (3 Credits)

This course will provide an overview of hedge funds and the hedge fund industry including structure, regulation, major strategies, operations and risk management, due diligence, performance and the role of hedge funds in asset allocation and the global financial system.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749R. ESG - Student Managed Investment Fund 1. (3 Credits)

The course is part of track and secondary concentration in ESG investing. It focuses on traditional stock analysis, whereas the subsequent SMIF 2 incorporates ESG into traditional stock analysis. The course trains students on selecting stocks using a disciplined investment process that systematically screened an investment universe for attractive quality stocks that are undervalued (Graham & Dodd). Students are expected to focus on the examination and evaluation of individual companies on a standalone and comparable basis. Understanding a company's competitive positioning via Porter's five forces is emphasized. Students will look at the fundamentals of the company recognizing that a sound business, trading at a reasonable price, as a potential investing opportunity. The importance of creating relationships with Investor Relations (IR) person(s) of the targeted company is highlighted. A team of industry experts, fundamental analysts, portfolio managers, risk managers and other investment professionals will work closely with students to ensure that the students are exposed to various tools and methods that are currently being employed in the industry.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749U. Global Financial Markets. (3 Credits)

This course provides a comprehensive overview to the workings of the global financial markets, the functions and goals of the key financial institutions, and the role played by central banks and regulatory agencies. It will cover international money markets, international equity markets, the foreign exchange market, forward markets for commodities and financial instruments, bond markets and derivative markets.

Prerequisites: BEGB 6220 and FNGB 7421 .

Attribute: ABIB.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749X. CFA Competition and Workshop. (0 Credits)

While this course is for 0-credit, it has a heavy work load and provides valuable practical experience. Students will be arranged into teams. Each team will write a full sell-side coverage report, build out a presentation, and pitch it to Fordham Wall Street Alumni.

Prerequisite: FNGB 7421.

FNGB 74AD. Student Mgt Investment Fund II. (3 Credits)

In the second class, in the spring semester, students will learn the practice of asset allocation with focus on advantages and pitfalls of asset allocation theory. Coverage includes practiced methodologies in assessing and measuring risk, including applications of the BARRA risk models, strategies for entry and exit, and portfolio revision. A lot of care will be taken to expose the students to real-life aspects of portfolio management. This includes arranging lectures from portfolio managers, with different philosophies on portfolio selection and risk management.

Prerequisite: FNGB 749R or Corequisite: FNGB 7460 .

Prerequisite: FNGB 6411.

FNGB 74AG. Finance in the Healthcare Ind. (3 Credits)

This course will present a historical development of the American healthcare system and will address the current challenges faced by both health insurers and providers, specific to managed care, reimbursement methods, and contracting. Students will learn to apply the standard tools of financial analysis and financial management in the complex and evolving setting in which the global healthcare system is currently situated. Students will also learn how to analyze the key financial indicators specific to hospitals and their direct application towards managed care contracting initiatives, debt restructure and bond rating status. Finally, the course will address the future of health insurance and managed care.

Attribute: ABHM.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AH. Global Corp Governance. (3 Credits)

Examines how modern publicly traded corporations are governed in the global markets. It discusses the roles of the board of directors, corporate management, institutional investors, and other shareholders, and also discusses the effects of the recent legislation and financial market developments on corporate governance. Provides international comparisons of corporate governance structures and issues arising in contests for corporate control.

Attribute: ABIB.

Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 74AI. Global Equity Portfolio Management. (3 Credits)

Provides a comprehensive overview of equity portfolio management in theory and practice. Examines portfolio objectives and links them to appropriate investment strategies. It covers pricing of equities, the asset-allocation decision, return enhancement/risk control techniques, performance evaluation and recent changes in international fund management. Analyzes international investment strategy and the relative merits of various approaches.

Attribute: ABIB.

Prerequisite: FNGB 7421.

FNGB 74AJ. Global Risk Management. (3 Credits)

Covers market risk and volatility, calculation of VaR (value at Risk), Monte Carlo Simulation, credit risk and use of credit derivatives, operational risk, counterparty risk and other topics. Discusses risk regulations, including Basel II, recent developments in Basel III, and recent regulations on the banking industry in the U.S.

Attribute: ABIB.

Prerequisite: FNGB 7421.

FNGB 74AK. Raising Capital and Investing in Global Financial Markets. (3 Credits)

Provides a comprehensive overview of the going-public decision. Examines the strategies and process of corporate restructuring and investing activities, such as mergers and acquisitions, corporate diversification, spin-offs, carve outs, asset sell-offs, tracking stock, exchange offers, and debt restructuring.

Attribute: ABIB.

Prerequisite: FNGB 7421.

FNGB 74AL. Adv Corporate Finance. (3 Credits)

This course teaches the art of applying corporate finance theory and essential tools and techniques to strategic decision-making in critical real-life situations faced by organizations. The course enhances the students' understanding of corporate finance by providing a comprehensive examination of selected advanced topics, such as alternative valuation methods, real options in corporate finance, decision trees, international operations, mergers and acquisitions, risk arbitrage, debt capacity and leveraged buyouts, private equity, warrants and convertibles, and ethical issues. The learning experience is based on lectures and a series of business cases involving individual and group work, classroom discussions, and written assignments, as well as readings and problem-solving. The case studies are drawn from a variety of industries and countries, including emerging markets, and involve complex real challenges. The course is designed for students who are already familiar with valuation, cost of capital, capital structure theory and option pricing theory and who want to learn more advanced skills and techniques required for making important executive-level decisions. Note: Students should be proficient with computer spreadsheets and financial calculators.

Prerequisite: FNGB 7422.

FNGB 74AM. Emerging Markets. (1.5 or 3 Credits)

This course explores how the major "emerging market" (EM) states have evolved from "traditional" societies with "underdeveloped" economies into modern societies with more developed economies ever since the Berlin Wall came down. Because these EM states reformed and opened up their economies, they benefited from their vast human and commodities resources and rapidly increased their per capital income.

Attribute: ABIB.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AN. Investment Banking. (3 Credits)

This course is intended to give students a practical introduction to investment banking and its role in helping corporations raise capital from the global capital markets. Topics include: venture capital, public offerings, private placements, going public, stock and bond financing, convertibles and other hybrid instruments, design of innovative securities, swaps and other derivative instruments, mergers and acquisitions and leveraged buyouts.

Attribute: ABEP.

Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 74AO. Alternative Investments. (3 Credits)

The course is an introduction to the rapidly evolving universe of alternative investments. Delivered in modules, the course covers a broad array of alternative strategy classes (Quantitative/Systematic, Fundamental Long/Short, Global Macro, Private Equity) ranging across all major asset classes (Equities, Fixed Income, Currencies, Commodities, Derivatives). The first half of the course constructs a broad framework for the evaluation of alternative strategies, focusing on the quantitative strategy class as a diverse and relatively easier-to-evaluate source of investment ideas for discourse and case study. The second half progresses through the remainder of the alternative strategy classes under the evaluation framework, ties together the role of alternatives within an asset allocation framework, studies subjective decision making in the context of alternatives and concludes with student presentations of their favorite investment thesis from the course. Throughout, there will also be discussion of career development both within and without the alternative investment space.

Prerequisite: FNGB 7421.

FNGB 74AP. Real Estate Capital Markets. (3 Credits)

This Real Estate Capital Markets course will cover both the primary and secondary debt and equity markets linked to real estate assets. While the underlying real estate assets in the primary markets will be covered, a greater portion of the class will be devoted to the secondary debt and equity markets, mainly dealing with mortgages, mortgage backed securities, and Real Estate Investment Trusts (REITs). A distinguishing aspect of this course is the focus on the intersection of the primary and secondary real estate capital markets, investor perspectives, and the impact of macroeconomic factors. Additionally, this course will include a robust mix of quantitative and qualitative factors in order to provide a holistic, less technical perspective on the real estate capital markets, and the real estate industry at large.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AQ. Adv Global Portfolio Mgt. (3 Credits)

The course will review (1) basics of modeling of securities' returns and volatility in the context of portfolio management / "buy-side"; (2) theoretical basis and empirical evidence of risk-return trade off and investor preferences; (3) main approaches to portfolio construction and challenges with their practical application; (4) performance evaluation, and other relevant portfolio management topics.

Prerequisite: FNGB 7421.

FNGB 74AR. ST: Corporate Restructuring. (3 Credits)

The course discusses the strategies, valuation, and processes of corporate restructuring decisions such as mergers and acquisitions, corporate diversification, spin-offs, carve-outs, asset sell-offs, tracking stock, exchange offers, and/or debt restructuring. It also discusses various securities issuances, including initial public offerings.

Prerequisite: FNGB 6411.

FNGB 74AS. Financial Modeling. (3 Credits)

Develops (using Excel) the type of financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Covers modeling of financial statements and models in many other important practical areas, such as time value of money, project evaluation, bonds, investment management and derivatives. Emphasizes on using most powerful and useful tools in Excel, such as logical functions, PivotTables, Data Table, Scenario Manager, Goal Seek to solve problems that closely resemble real-life situations.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AT. Fintech Compliance- Asia to Us. (3 Credits)

An overview of the components of an effective global Corporate Compliance Program. Examination of the Part C Risk Assessment and the Seven Steps of a corporate compliance and ethics program. Review of compliance program design and best practices, including the roles of the corporate compliance office and in-house counsel, risk assessments, Foreign Corrupt Practices Act, global codes of conduct, corporate governance, monitoring and re-evaluation.

Attribute: ABFF.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AU. Algorithm Trading. (3 Credits)

Electronic algorithms are being used by major institutions, investment banks, and hedge funds to trade stocks, bonds, currencies, and a plethora of financial derivatives. Algorithms are being used for all aspects of trading - from asset allocation and stock selection, to execution and implementation, and for risk management and regulatory and compliance reporting. In this course, students will learn the necessary skill sets, and underlying math, statistics, and programming skills to build, develop, manage, and implement profitable algorithms across all asset classes.

Attribute: ABFF.

Prerequisite: FNGB 7421.

FNGB 74AV. Seminar in Value Investing. (3 Credits)

This survey course is designed to introduce the fundamentals of the Graham and Dodd value approach to investment analysis. The course will be segmented into two parts: the basic structure of the analytical approach to value investing and its relationship to many of the elements of the MBA curriculum will be described through lectures, exercises, readings, in-class discussions and homework assignments; the last sessions of the course will be devoted to student presentations of their investment recommendations. Parts of the course will entail empirical data analysis.

Prerequisite: FNGB 7421.

FNGB 74AW. Applied Capital Markets and Financial Regulations. (3 Credits)

This course will explore how the market structure has fundamentally changed after the 2008 liquidity and credit crisis, and how this crisis has affected liquidity, balance sheets, risk taking, and returns across the entire financial services industry. The new reality is that regulation has changed the landscape of Wall Street and the dynamic of how the sell-side and buy-side will interact in the foreseeable future.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AX. International Fin Mgt. (3 Credits)

The goal of this course is to explain the concepts of corporate finance and their applications in an international setting. We will examine opportunities and problems that are faced specifically by multinational and foreign corporations and will compare corporate finance practices around the world. Topics covered in the course include foreign exchange rate mechanics, international parity theories, forecasting and hedging, international cost of capital, capital budgeting, capital structure, and valuation of foreign investments.

Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 74AY. Global Financial Markets. (3 Credits)

This course is intended as an introduction to Global Financial Markets. We will discuss the instruments traded in the markets, the institutions that support and frame the markets, the trading mechanisms and the regulatory structure. The course is intended to be descriptive and conceptual. The aim is to familiarize you with the breadth and scope of equity, debt, and derivative markets. We shall discuss the recent developments in the US and the development of financial markets globally.

Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 74AZ. Innov in Business & Energy. (3 Credits)

This course aims to frame and critique opportunities for business to create innovations in energy systems. It discusses how contemporary energy systems have evolved and how energy infrastructures vary across regions of the world. It also examines how business decision makers can think about choices of energy and energy systems by encouraging students to think broadly in terms of innovation possibilities.

Attribute: ABGS.

FNGB 74BA. Communicating Finance Theory. (0 Credits)

This lecture series will provide a summary of many financial topics. The class will also train students to communicate knowledge of this material to professionals at financial institutions.

FNGB 74BB. Applied Investment Principles. (3 Credits)

This course provides applications that follow Principles of Finance or Global Investment Principles. EXCEL models will be applied to CAPM modeling of Risk and Return, to Factor Models, and to Portfolio Attribution. Data may be drawing from Boomerang, Yahoo Finance, and other sources.

Prerequisite: FNGB 7421.

FNGB 74BC. Research in Value Invest. (3 Credits)

Prof. Johnson, a leading expert in the field of Value Investing, will lead a small, project based seminar that focuses on best practices in the field. Selective enrollment by approval of the instructor.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74BD. Impact Investing. (3 Credits)

This course will discuss investment strategies that have a societal orientation from both financial and socially responsible perspectives. The key questions are: how can we allocate money in a manner that is beneficial to all stakeholders and viable in a business sense, and, what are the appropriate metrics to evaluate such investments. Impact investments to be analyzed include government and ESG (environmental, social, governance) policies, micro finance, philanthropy, and green energy.

Attribute: ABGS.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74BE. Lectures in Applied Port Mgt. (3 Credits)

This advanced Portfolio Management course quickly reviews Modern Portfolio Theory (MPT) conceptual underpinnings and builds on MPT 1.0. It delves into contemporary liability driven asset allocation, MPT 2.0 and portfolio management industry practices, issues and concerns. Lectures, problem solving, and self-study along with extensive hands-on tools using Microsoft Excel based models will be used to provide a practitioner's perspective. We will review and demo contemporary asset allocation optimization and forecasting techniques, new asset class pricing and valuation, performance and risk attribution, tail risk measurement and management tools etc. using real time vendor based (third party) solutions. As prerequisites - the student should have class exposure to investment and portfolio analysis, Excel, stats, and basic regressions.

Prerequisite: FNGB 7421.

FNGB 74BF. Financial Innova & Institu. (3 Credits)

This course will introduce major financial institutions, such as commercial and investment banks, insurance companies, mutual funds, hedge funds, and credit rating agencies with a focus on their risk contributions to the modern financial system. We will examine their credit risk in depth, and how to model and analyze credit risk and products. We will also understand new financial sector regulations and systemic risk by focusing on Dodd-Frank, market based stress-testing, Comprehensive Capital Analysis and Reviews (CCAR), and other methods. This course will help prepare students for the job market at financial institutions and regulators.

Prerequisite: FNGB 6411.

FNGB 74BG. Auto Trading Systems - Intro. (3 Credits)

This course discusses key issues involved in the design of an Auto (Algorithmic) Trading Systems, and provides hands-on experience. The end product is a prototype Auto Trading System designed by students that successfully trades in the real market (stock, futures, option) using live data feeds from exchanges. Issues covered include: typical structures of trading systems; efficient processing of live information; minimizing trade slippages; handling large number of securities; asynchronous information processing; GUI interfaces; etc. Industry experts are invited to discuss new developments. Key programming techniques will be reviewed at the beginning, very briefly. The course is suitable for students in MSGF, MSQF, and other master level students with programming skills equivalent to one formal course (e.g, R, Matlab, VBA, etc). Students with less programming skill may take the course if approved by instructor.

Attributes: ABFF, BUAN.

Prerequisite: FNGB 7421.

FNGB 74BH. Investing in European Union. (3 Credits)

The EU is the largest market for US exports and foreign direct investment. The objective of the course is to familiarize students with the process of regional integration and monetary unification in Europe and the opportunities and challenges which this has created for foreign investors. Regulatory differences between the US and EU in competition laws and financial sector will related to the investment climate for foreign companies. The course will highlight that despite the deep economic and financial integration in the EU, significant country- and regional differences exist. This will be assessed through the analysis of several Harvard Business case studies covering different country- and industry experiences.

Prerequisite: FNGB 7421.

FNGB 74BJ. Financial Media. (3 Credits)

Financial Media examines the complex interactions between business, politics, and the press. The course is designed to help students achieve a better understanding of how business content is delivered and retrieved in the current media environment. The course focuses on the dynamics of reporting about companies and business industry leaders who are using the media to deliver critical messages to several stakeholder groups, including investors and consumers. The course provides numerous examples of business or political leader interactions with the media and debates their communication strategy as well as their outcomes.

Prerequisite: FNGB 6411.

FNGB 74BK. Fintech -An Introduction. (3 Credits)

FinTech is a new and emerging field of technology that is disrupting the way that many companies are conducting business. FinTech has already "forever" changed many sectors including mobile payments, social media, money transfers, loans, fundraising, travel, trading and asset management. It has completely revolutionized the way companies are developing products, conducting research, establishing directed sales and marketing plans, and utilizing start-up technology. Businesses are using FinTech to expand their products and services at a fraction of its previous cost. Entrepreneurs are utilizing FinTech as a central foundation for research, funding, and product development. Customers are already utilizing FinTech as part of their daily lives - mobile apps, social media, banking, online shopping, entertainment and gaming. This course will introduce students to the breadth of FinTech, and touch upon the technical underpinnings.

Attributes: ABBC, ABEP.

Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 74BL. Stress Tests and Cap Adequacy. (3 Credits)

The financial crisis of 2007 -08 taught us all a lesson: that preparedness is everything. How resilient and prepared will we be, and how fast will we be able to recover? This is the key focus of this course: how to plan for moments of distress so that firms such as yours have capital of a sufficient quality to survive potential storms. We will demonstrate how to create a robust capital plan and test it for moments of hypothetical stress. We will investigate exactly how a bank holding company and an insurance company should conduct their capital plan, highlighting the significant differences between the two industries. By the end of the course, you will be able to create a capital plan for your business on your own.

FNGB 74BM. Empirical Value Investing. (3 Credits)

This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed.

Prerequisite: FNGB 7421.

FNGB 74BN. Investor Relations. (3 Credits)

corporate Investor Relations program formulates and communicates the financial performance and strategic direction of diversified corporations to the global investment community. Investor Relations professionals are well versed in accounting, compliance, finance, governance, marketing and communications. They collaborate with senior management and the Board of Directors to convey and interpret corporate matters to the public. This course will teach students the skills and competencies required to become a corporate Investor Relations professional. The course utilizes a course textbook, case studies, investor relations guest speakers and participation in investor relations events.

Prerequisite: FNGB 6411.

FNGB 74BP. Wharton-Impact Investment Workshop. (3 Credits)

Students will attend workshops on ESG (Environmental, Social, and Corporate Governance) and Impact Investing. They will will compete in teams of three to five against other nationwide schools to construct a 100% Impact Portfolio. Since this is a two-semester competition, only students who participated in Fall may register in Spring.

Attribute: ABGS.

Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 74BQ. Contemp Develop in Corp Fin. (3 Credits)

This course will cover a number of important topics of current interest to the corporate finance industry, such as : executive compensation and governance; utilizing and responding to fintech; importance of the growth of intangible assets; importance of large corporate cash holdings invested in risky assets, such as hedge funds and private equity.

Prerequisite: FNGB 7422.

FNGB 74BR. Behavioral Finance. (3 Credits)

Over the past several decades, the field of finance has developed a successful paradigm based on the notions that investors and managers are generally rational and that the prices of securities are generally efficient. In recent years, however, anecdotal evidence as well as theoretical and empirical research has shown this paradigm to be insufficient to describe various features of actual financial markets. In this course we will use psychology and more realistic settings to guide and develop alternative theories of financial markets. We will examine how the insights of behavioral finance complement the traditional paradigm and shed light on investors' trading patterns, the behavior of asset prices, corporate finance, and various financial market practices through lectures, case studies, and our own discussions.

Prerequisite: FNGB 7421.

FNGB 74BS. Student Managed Investment Fund: ESG-Impact. (3 Credits)

In this joint graduate and undergraduate course, students will apply their investment and portfolio skills in the analysis and selection of a real set of securities and opportunities. Selection will focus on ESG investments and/or those that stress societal impact.

Prerequisite: FNGB 7421.

FNGB 74BT. Fintech Lending & Payments. (3 Credits)

This course will consider modern on-line methods of lending and borrowing that may be outside of the traditional banking environment. The main players in the space will be analyzed, as well as their websites. Students will learn their business models, methods of credit analysis, and measures of return to investors.

Attribute: ABFF.

Prerequisite: FNGB 7421.

FNGB 74BU. Global Financial Markets and the Macro-Economy. (3 Credits)

The overarching goal of this course is to give students an understanding of the forces affecting real income growth, inflation, and asset prices in the world economy. The specific topics the course will address include: the operation of monetary and fiscal policy; how those policies affect financial markets and the broader economy; the determinants of countries' long-term rates of growth; the factors behind the recent financial crises in the US and EU; the features of currency crises, business cycles, and financial crises historically; and the relationships linking global interest rates, exchange rates, and inflation rates. The course will combine economic theory and empirical evidence to provide a toolbox of skills that students can use to analyze these and similar issues going forward.

Prerequisite: BEGB 6220.

FNGB 74BV. Practical Exploration of M&A. (1.5 Credits)

This class will provide an introduction to the essential elements of large-cap merger and acquisition (M&A) transactions from the perspective of real, recent examples taught by a senior investment banker.

Prerequisite: FNGB 6411.

FNGB 74BW. Corporate Valuation. (1.5 to 3 Credits)

The objective of the course is to learn firm, debt, and equity valuation methods from both a conceptual and practical framework. It combines both accounting and finance into practical valuation frameworks. Adequate accounting and finance backgrounds are required. Working knowledge of Microsoft Excel is important.

Prerequisites: FNGB 6411 and FNGB 7421 (may be taken concurrently).

FNGB 74BX. Financial Markets and Major Players. (3 Credits)

This course will provide an overview of a broad range of financial markets from practitioner standpoints. It will discuss how secondary market prices—ranging from equity and fixed income to commodities and complex derivatives—are established in listed exchanges, OTC markets, and dealer platforms. We will examine the roles of both market-makers (“sell-side”) and price takers (“buy-side”), with the latter further divided into two major groups: institutional or retail. We will survey sell-side businesses, including market-makers versus agents in listed markets and OTC markets, institutional block trading, securities lending, and prime-brokerage. On the retail clientele side, we will discuss the wholesale market-making business. On the risk management end of the sell-side business, we will cover market risk, credit risk, and counterparty credit risk. At the end of the course, students should have a thorough understanding of how various businesses fit together. Hopefully, the course will help students better understand the area in which they might pursue their career paths in financial markets.

Prerequisite: FNGB 6411.

FNGB 74BY. Econtech: Econ and Data Mining. (3 Credits)

Overall financial markets and individual company performance are largely driven by the growth rate of the economy, which in turn is affected by monetary, fiscal, and currency policies. Our understanding and forecasting ability are based on analyzing and mining available data. This course will examine data and data mining to better understand a range of policy and output variables, and how they interact under different regimes.

Prerequisite: FNGB 7421.

FNGB 74BZ. ESG & Portfolio Management. (3 Credits)

This course will introduce students to the management of investment portfolios with an awareness of environmental, social, and governance (ESG) risks and objectives. We'll start with an introduction to ESG and everything that means today. We'll then examine a variety of approaches to ESG-aware portfolio management, including security screening and exclusion, ESG integration, best-in-class investing, thematic investing, portfolio tilting, active ownership, and impact investing. We'll focus primarily on public equity, but other asset classes will be introduced over the term. The emphasis will be on developing a practical and applied understanding of the subject. Data widely used by ESG-aware investors will be reviewed and analyzed, including company-level third-party ESG data, ratings, and climate-related measures. Students will complete computational exercises involving that content, and will be assumed to be proficient with Excel or similar spreadsheet software, but no other coding ability will be required. The course is intended to provide the ESG investing background necessary for students seeking to participate in the ESG Student Managed Investment Fund sequence, but other students meeting the course requirements are also welcome to enroll.

Prerequisite: FNGB 7421.

FNGB 74CA. ESG Finance: Issues & Challenges. (3 Credits)

This graduate course is designed in a seminar format and will delve into topics ranging from the successful implementation of sustainability goals by corporations to evaluation of ESG-tilted portfolios by an investor. Students and participants are expected to have a basic understanding of the issues surrounding sustainability. The course is open to graduate students from the Gabelli School and the economics department. A limited number of undergraduate students from the Gabelli School may take the course with the instructor's permission.

Prerequisite: FNGB 6411.

FNGB 74CB. Financing New Media Ventures. (3 Credits)

This course is designed for students to learn how to launch new business lines in large media corporations or new startups directly to market. Learn the critical thinking processes of venture fund managers and corporate innovation leaders in charge of dispensing capital to finance new media ventures. Students will also master effective channels of communication with key stakeholders and champions while utilizing venture capital metrics to quantify and evaluate strategic market opportunities.

Prerequisite: FNGB 6411.

FNGB 74CC. Sustainable Investing and ESG Analysis. (3 Credits)

This course has been designed to develop sustainability competencies for those aspiring to create an impact in their personal and professional lives. Students are exposed to new techniques and tools enabling them to develop sustainable investing strategies and positive outcomes. Through this course, students will learn how to identify, analyze, and integrate ESG factors across a range of asset classes while learning best practices of sustainable and impact investing. This course culminates with a case study in which you will develop your own sustainable investment strategy.

Prerequisite: FNGB 6411.

FNGB 74CD. US/UK Sustainability Communication and Reporting. (3 Credits)

This course will enable students to develop a deeper understanding of the risks and opportunities of being a sustainable business and the similarities and differences of sustainable communications between companies in the U.S. and in the U.K. Students will have the opportunity to travel to the U.K. and hear directly from leaders of industry about the challenges they face when trying to identify, evaluate, and report the issues that will allow them to operate as a sustainable business. Students will research companies in the U.K. and the U.S. to compare and contrast how different companies are handling similar situations with a focus on how they are using the U.N. Sustainable Development Goals to evaluate risk exposure and to communicate to their stakeholders.

Prerequisite: FNGB 6411.

FNGB 74CE. Introduction to ESG and Finance. (1.5 to 3 Credits)

In this course, students will learn about the history of ESG and impact investing, as well as the evolution of key social, environmental, and economic challenges. They will examine the use of ESG Value Reporting Foundation (Sustainability Accounting Standards Board) standards in the United States, Europe, and China, and they will review regulatory factors in relation to the ability of an institution to drive value for its multiple stakeholders. Students will also evaluate social tensions relating to climate change and the exponential growth of investor interest in transformative climate tech solutions. We will look at how policies and market environments, including in each student's native country, support ESG development. The course will leverage Fordham's relationship with the United Nations PRME (Principles of Responsible Management Education) program, and students will examine in detail the UN's 17 Sustainable Development Goals and the Business Roundtable pledge.

Prerequisite: FNGB 6411.

FNGB 74CF. Introduction to Climate Finance. (3 Credits)

In this course, students explore the science of climate change and its related economic and environmental impacts. They study changing global policies and examine financial tools and techniques to fight climate change in its context. Specific areas covered include the use of capital markets to create market-based emission trading systems, project finance to build renewable energy projects, venture capital to fund innovative low emission technologies, etc. The course will feature a large number of readings and a few cases to introduce students to climate finance.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 70.

FNGB 74CG. ESG - Student Managed Investment Fund 2. (3 Credits)

This course is an intensive experiential learning opportunity in which students who already completed ESG—SMIF 1 apply their skills in investment analysis and risk attribution in order to manage an actual portfolio of securities on behalf of the University. Students act as fiduciaries for a portion of the University's endowment. This is the second and immediate followup course to ESG—SMIF 1. ESG—SMIF 2 is designed to apply the analytical framework concerning financial statements, economic indicators, geopolitical concerns, ESG filters and rankings, and other investment management concerns within an ESG-based portfolio and under specific strategies. Through structured research and quantitative analysis concerning companies and their equity, debt, and other financial asset classes, students manage a portfolio, produce detailed and weekly metrics, pitch securities for trading, prepare trading tickets for actual execution, and recommend securities trades. Enrollment is open to both graduate and advanced undergraduate students.

Prerequisite: FNGB 749R.

FNGB 74CH. Managing Business Climate Change Risk Exposure. (3 Credits)

This course will introduce you to the effects that climate change is having on business organizations across the globe and how businesses are responding to these risks. We will explore the short-term impact on businesses of extreme weather events and the long-term impact of chronic changes in weather patterns due to global warming. The course will explain the full range of potentially severe physical risks and transition risks of climate change facing businesses today and how these risks are changing due to global warming. You will learn the strategies that businesses utilize to manage these risks, including risk avoidance, risk mitigation, and risk transfer. We will study how businesses use such important climate risk transfer mechanisms as buying insurance, including general business, flood, and business interruption insurance, and issuing catastrophe bonds. You will also learn how businesses can use derivatives, such as specialized weather derivatives and certain traditional derivatives like forwards, futures, and swaps, to hedge their climate change risk exposure. The course will explain how climate change can also give rise to opportunities for businesses to develop innovative products, services, and strategies to help other businesses. You will learn how successful businesses that recognize these opportunities can turn climate change into an advantage for their stakeholders and society.

Prerequisite: FNGB 74CF.

FNGB 74CJ. Financial Regression and Application. (3 Credits)

This course will cover basic regression analysis for finance students. The software will be based on Excel and basic Python. It will be useful to have had some exposure to Python, or other programming skills. If not, extra effort on your part should be expected—or take a Python class at the same time. You will learn how to import data and conduct analysis such as computing Beta, estimating simple multifactor models, assessing the relation between standard accounting data and stock returns, etc.

Prerequisite: FNGB 7421.

FNGB 74CK. Global Commodities Markets & Trading. (3 Credits)

The aim of this course is to introduce students to the structure of the global commodity markets and the fundamental concepts of physical and financial commodity trading, hedging, and arbitrage. The course will cover the cash, derivative, and bank-lending markets related to energies, precious metals, and agricultural commodities. It will explore the value chain of each commodity from the upstream point of production to the downstream point of distribution and consumption. The course will cover cash, derivative, and financial market pricing, as well as risk management tools and techniques employed in the "spot", commodity, "listed" and "over-the-counter" markets utilizing live financial derivative markets and real world case studies. A knowledge of the basic operation of the futures, forwards, and listed options markets would be helpful for all students enrolled in this course.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74CL. Intro to Fintech in Portfolio Management. (3 Credits)

This course aims to provide students with basic knowledge and skills in fintech via a comprehensive introduction to the field. Students should be able to conduct fintech problem-solving professionally and present their results to peers after taking this class. The major skills to be covered include models in fintech, financial data acquisition, data mining and visualization, machine learning in finance, and high frequency trading analytics. Topics covered include portfolio analysis, portfolio formation, and portfolio optimization using machine learning.

Prerequisite: FNGB 7421.

FNGB 74CM. Sustainability Reporting and Finance. (3 Credits)

Financial decisions worldwide are increasingly influenced by the unique risks of the 21st century. All activities demand focus on sustainability issues—from the looming impacts of climate change and risks associated with health and safety to credit and investment gaps that limit business opportunities and hamper economic progress in many parts of the world. As the challenges of scarcity of resources, the search for profits through efficiency, and impact of climate change continue to mount, environmental, social, and governance (ESG) data become essential for prudent decision-making. Along with several multinational investment banks, Dow Jones has a sustainability index indicating that the search for profitability through efficiency has transcended trends and become the new corporate norm. Students in this course study finance, corporate disclosures, and sustainability reporting practices as integrated subjects, beginning with an introduction to financial and reporting principles and moving through financial analysis and industry-focused disclosures. Additionally, the course covers diverse aspects of sustainable reporting and offers tools for effective risk assessment.

Prerequisite: FNGB 6411.

FNGB 74CN. Real Estate Capital Market Analysis. (1.5 to 3 Credits)

This course examines selected topics and issues related to real estate capital markets. Special emphasis will be placed on mortgage backed securities (MBSs) and real estate investment trusts (REITs). This class will be conducted using a lecture format. The topics include the primary mortgage market and secondary markets, the objectives and processes for designing, implementing, and servicing mortgage and asset backed securities, the tools used by the capital market for pricing and analyzing risks of MBSs, and the regulatory environment and trend of the securitization market.

Prerequisite: FNGB 7421.

FNGB 74CP. Data Analytics for Finance. (3 Credits)

This course teaches students how to apply the tools and techniques of data science to big financial data and, combined with finance theory and concepts, enhance the quality of empirical analysis, problem-solving, and decision-making in finance. Students will engage in diverse projects related to the field of finance, using big data drawn from proprietary financial databases, such as S&P Compustat, CRSP, Execucomp, ISS Directors, RepRisk, Thomson/Refinitiv, and others, as well as the Web. The projects will be executed using the Python programming language and its system of libraries, such as Pandas, Numpy, Matplotlib, Statsmodels, Numba, SciPy, etc. A wide range of interesting problems from various areas in finance will be investigated, such as capital structure, cost of capital, payout policy, simple multifactor models, portfolio construction, financial ratio analysis, firm liquidity, executive compensation, boards and institutional investors, diversity in corporate governance, ESG and firm market and financial performance, and others. The course will equip the students with the necessary knowledge and skills to extract useful information from the ever-increasing volume of data and use it for improved understanding of financial concepts and better decision-making.

Prerequisite: FNGB 7421.

FNGB 74CQ. Fundamental Stock Analysis. (3 Credits)

This course is designed to simulate the experiences a student can obtain as an equity analyst in the asset management industry. As such, while a broad survey of the market and asset classes is covered, the course provides an in-depth understanding of equity stock selection and trains students in selecting stocks using a disciplined investment process that systematically screens an investment universe for attractive quality stocks that are undervalued (Graham & Dodd). Students are expected to focus on the examination and evaluation of individual companies on a standalone and comparable basis, and to understand a company's competitive positioning via Porter's five forces. Students will look at the fundamentals of the company, recognizing a sound business, trading at a reasonable price, as a potential investing opportunity. Students will also learn to appreciate that buying businesses that they don't completely understand adds uncertainty, and they should, therefore, demand a higher risk premium (margin of safety). The course also stresses the importance of creating relationships with people in investor relations at the targeted companies. A team of industry experts, fundamental analysts, portfolio managers, risk managers, and other investment professionals will work closely with students to ensure that the students are exposed to various tools and methods that are currently being employed in the industry.

Prerequisite: FNGB 7421.

FNGB 74CR. Investment Analysis with Data Visualization and GenAI. (3 Credits)

This course is an advanced investment analysis course with three overlapping parts. The first part focuses on utilizing well-regarded investment websites available on the internet to speed up economic data analysis, portfolio evaluation, and stock selection. The second part involves using GenAI to rapidly ask questions and gain various perspectives, uncovering blind spots and opening new areas of opportunity. Effective prompt engineering and checking against GenAI's hallucinations is crucial. In the final three weeks, students will work in groups of four on a pro bono consulting project for an industry practitioner, applying what they have learned in the course.

FNGB 74CS. Fund Strategies and Performance. (3 Credits)

This course examines how money is managed by organizations such as university endowments, pension funds, mutual funds, hedge funds, and private equity funds. It provides an advanced treatment of asset allocation and equity portfolio strategies, and a performance evaluation of U.S. mutual funds and hedge funds. The course provides a deeper understanding of the measurement of risk and its relationship to return, as well as of multi-factor models. Implementation issues, including statistical estimation, back-testing, portfolio construction, and performance evaluation, are covered. Some programming skill (likely Python/SAS) will be important, and partly taught.

FNGB 74CT. Advanced Value Investing. (3 Credits)

Students will study a variety of advanced topics that build on the principles outlined in Introduction to Value Investing and Behavioral Finance. The class will study real-world situations in the current market environment, employ multiple valuation frameworks, and improve students' ability to make informed decisions. Among other topics, the class will study business strategy, Mario Gabelli's Private Market Value with a Catalyst, capital allocation principles, distressed investing, and merger arbitrage.

FNGB 74CU. Investment Applications. (3 Credits)

The objective of this course is to introduce the student to investment principles in the U.S. and in the global capital market. We will understand existing assets and investment vehicles, the functioning of capital market, the theoretical principles that underline asset pricing, and its applications in the valuations of fixed income and equity securities.

FNGB 74CV. Technical Analysis. (3 Credits)

A study of the Elliot Wave theory, a technical analysis approach used in financial markets, particularly in the analysis of stock market price movements. It was developed by Ralph Nelson Elliott in the 1930s and is based on the idea that market prices move in predictable patterns and cycles. The theory is widely used by traders and investors to forecast future price movements. Students will study the theory alongside money management techniques in real time.

FNGB 74CW. Machine Learning for Finance. (3 Credits)

Machine learning (ML) methods of data analysis and prediction are transforming the financial landscape. This course provides a broad overview, knowledge, and practical skills of ML, focusing on applications in finance. The course will introduce various ML methods including supervised and unsupervised learning, as well as deep and reinforcement learning. Students will understand the general landscape of available ML algorithms and learn to implement the most appropriate solutions of a given problem. The course will use Python programming and open source Python packages, and it requires knowledge of statistics. Class sessions will provide the basics of Python.

FNGB 74CX. Investment Analysis with Data Visualization and GenAI. (3 Credits)

This course is an advanced investment analysis course with three overlapping parts. The first part focuses on utilizing well-regarded investment websites available on the internet to speed up economic data analysis, portfolio evaluation, and stock selection. The second part involves using GenAI to rapidly ask questions and gain various perspectives, uncovering blind spots and opening new areas of opportunity. Effective prompt engineering and checking against GenAI's hallucinations is crucial. In the final three weeks, students will work in groups of four on a pro bono consulting project for an industry practitioner, applying what they have learned in the course.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 70.

FNGB 74CY. Introduction to Wealth Management. (1.5 Credits)

This class is intended to demystify the wealth management process. Class lectures will be open-ended discussions with the goal of providing a better understanding of personal wealth and the business of wealth management by combining some aspects of financial planning and overall portfolio management.

FNGB 74CZ. Introduction to Venture Capital. (3 Credits)

This course offers a comprehensive introduction to the world of venture capital, a critical component of the global financial system that drives innovation, rewards founders and drive economic growth. If you are a financial professional, investor or an aspiring entrepreneur, this course will give you a deep understanding of how venture capital firms operate, how deals are sourced, evaluated and how deals are structured. You will also learn about the history of venture capital and the key opportunities and challenges venture capitalists are facing today.

FNGB 7811. Finance - Internship. (1 to 3 Credits)**FNGB 8009. M&A and Leverage Acquisition. (1.5 Credits)**

The course covers corporate debt solutions and provides an overview of credit risk principles. It will focus on corporate acquisitions and LBOs, and analyze different sources of funding, from senior to subordinated. Students will hear from many guest speakers, learn main capital structure issues, and be exposed to the current market environment.

Prerequisite: GFGB 6006.

FNGB 8405. Iss. Fin: Delevgd Fin. (1.5 Credits)

This course discusses the use of debt in Leverage Buyouts, recapitalization, restructuring and refinancing, including Debtor-in-Possession (DIP) financing. Students develop practical insights by utilizing case studies from several public highly leveraged firms; practical insights are critically reviewed.

Prerequisite: FNGB 7421.

FNGB 8408. Acquisition & Leveraged Fin. (1.5 Credits)

The course covers corporate debt solutions and provides an overview of credit risk principles. It will focus on corporate acquisitions and LBOs, and analyze different sources of funding, from senior to subordinated. Students will hear from many guest speakers, learn main capital structure issues, and be exposed to the current market environment.

Prerequisite: FNGB 7422.

FNGB 8414. Modern Financial Analysis. (1.5 Credits)

Learn how the financial services industry applies valuation techniques in a deal context! In this mini-course, you will demystify the theory behind the analytics and ultimately appreciate the "art" and "science" of valuation analytics. What is a company worth? What is someone willing to pay? The answers depend on: who the seller is; who the potential buyer(s) is; the context of the transaction and the current market conditions....

Attribute: ABEP.

Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 8415. Fin/Imkts: Cncpts/Methods/Trd. (1.5 Credits)

This course provides a real-life, hands-on experience of financial market activity and its impact on the broader economy. Throughout the course, students will participate in a trading game (which is explained in more details below) to assess and manage real world factors such as counterparty risk, liquidity, leverage, etc. They will also learn the impact of various policy issues on the markets and thus the economy (ex: impact of limiting foreclosures), some of the mathematics behind the markets, and the broad spillover effects of various investor / issuer decisions. Class sessions will be divided into two parts, lectures and trading. No prior market experience is required, but students are expected to have a passion to learn about financial market activity and stay aware of current market and political conditions. Trading Game: Students participate in 5 sessions of the trading game. Essentially, this game operates in a closed economy with various market participants (sell side, buy side, central bank, etc.) that trade a wide variety of assets, including stocks, bonds, loans, indices, commodities, CDS, currencies, and options, and do so in the context of the current, real world market environment (ex: record Treasury issuance). Each class will have an active trading session, and all market participants are expected to keep and update their trade books to track their P and L.

Prerequisite: FNGB 7421.

FNGB 849C. Fin/Imkts: Cncpts/Methods/Trd. (1.5 Credits)

This course provides a real-life, hands-on experience of financial market activity and its impact on the broader economy. Throughout the course, students will participate in a trading game to asses and manage real world factors such as counter party risk, liquidity, leverage, etc.

Prerequisite: FNGB 7421.

FNGB 849G. Mergers and Acquisitions. (1.5 Credits)

Mergers and acquisitions constitute some of the most important growth, diversification, and globalization strategies for firms. Finance, specifically corporate finance, plays an important role in M&A because the completion of a deal requires careful attention to valuation, risk management, and the designing of an appropriate payment package. That design is an important part of a deal for reasons ranging from accounting and tax to synergies and stock price. In this course, students will examine these features through a number of cases and readings. We will also briefly discuss issues of corporate governance, securities law, and corporate law whenever the context requires us to do so.

Prerequisite: FNGB 7421.

FNGB 849H. Advanced Financial Modeling. (1.5 Credits)

Advanced financial modeling.

Prerequisite: FNGB 7421.

FNGB 849I. Blockchain. (1.5 Credits)

The course will explore the role currency plays in the economy, the emerging technologies pioneering new forms of digital money, and the impact these technologies will have on currency, the economy and the broader category of capital.

Attributes: ABBC, ABEP, ABFF.

Prerequisite: FNGB 849J (may be taken concurrently).

FNGB 849J. Digital Currencies. (1.5 Credits)

Digital Currencies-New Revolution. The course will leverage what was taught in Digital Currency to explore specific examples of new technologies being used to develop new forms of currency and digital money, and redefine the broader category of capital. The course will use real products/service to explore these topics.

Attributes: ABBC, ABEP, ABFF.

Prerequisite: FNGB 6411.

FNGB 849K. Valuation and Modeling for Accounting. (1.5 Credits)

This course expands on valuation techniques discussed in Modern Financial Analysis and Valuation Techniques. Students will have the opportunity to learn the modeling techniques used by today's Wall Street practitioners associated with Discounted Cash Flow Analysis, Merger Analysis, Purchase Price Allocations and Synergy DCFs.

Prerequisite: FNGB 8414 (may be taken concurrently).

FNGB 849L. Empirical Value Investing - A. (1.5 Credits)

This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The "A-section" will examine several topics / methods. It is a pre-req for the "B-section," which will investigate the same issues more fully.

Prerequisite: FNGB 7421.

FNGB 849M. Empirical Value Investing - B. (1.5 Credits)

This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The "A-section" is a pre-req for the "B-section," which will investigate the same issues more fully.

Prerequisite: FNGB 849L (may be taken concurrently).

FNGB 849N. Fintech: Disruption in Finan Services. (1.5 to 3 Credits)

The course is designed and built to ensure that students gain the knowledge and insight they need to understand the latest developments in Fintech and their disruptive impact on the global financial service industry. Upon completion of this course, students will develop a deeper understanding of business and economic aspects of financial services-based technologies; gain insight into financial ecosystems; understand the Fintech regulatory frameworks; and be able to critically evaluate the disruptiveness of Fintech innovations.

Attributes: ABEP, ABFF.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 70.

FNGB 849Q. Identifying Corporate Culture to Uncover Positive Alpha Investment. (1.5 Credits)

This course will provide a solid introduction to financial linguistic analysis that allows investors to measure the relevance and importance of intangibles like corporate culture and leadership as important contributors to future share value and Alpha. The aim of this first-ever financial linguistics course is to introduce students to the Candor Analytics process. Students will learn how this analytic process has consistently identified high-performing and underperforming stocks over the past decade.

Prerequisite: FNGB 6411.

FNGB 849R. Booms, Bubbles, Busts, and Crashes: A Capital Markets History. (1.5 Credits)

This course will prepare students to understand and anticipate regulatory and institutional changes in financial markets. Fintech and other technological changes are disrupting the financial markets in an unprecedented way—and will probably usher in new regulations. A good understanding of the market's institutional evolution, including the evolution of money, is essential to prepare for a successful career in the financial services industry.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 84AA. Financial Markets and Responsibility- A. (1.5 Credits)

This course is intended as an introduction to Financial Markets and Responsibility. In the first half, we will discuss the instruments traded in the markets, the institutions that support and frame the markets, the trading mechanisms, and the regulatory structure. The course is intended to be descriptive and conceptual. The aim is to familiarize you with the breadth and scope of equity, debt, and currency markets. We shall discuss the recent developments in the U.S. and the development of financial markets globally.

Prerequisite: FNGB 6411.

FNGB 84AB. Financial Markets and Responsibility-B. (1.5 Credits)

The course will provide an introduction to the environmental, social, governance (ESG) aspects of business, as well as diversity, equity, and inclusion (DEI) issues. A central theme will be the social responsibility of corporations. We will discuss how social considerations impact business and financial markets, and how business practices and disruptions affect employees and society. The focus will be on the financial implications, e.g., shareholder versus stakeholder primacy. Cases and some data analysis may be included in class discussions.

Prerequisite: FNGB 6411.

FNGB 8999. Independent Study. (3 Credits)

Finance M.S. Courses

GFGB 6000. CFA Prep. (0 Credits)

Student prep for the CFA exam; second year students and alumni along with faculty help students study and prepare for the CFA exam.

GFGB 6002. Basics of Finance. (1 to 3 Credits)

This course is an introduction to the financial system and the basic techniques in valuation of financial and physical assets. The course is primarily meant for someone who has not had a formal introduction to financial markets, institutions, and instruments. The course will cover the topics of Financial Statement Analysis, Time Value of Money, Valuation of Stocks and Bonds, Capital Budgeting, Cost of Capital, and the Efficient Market Hypothesis.

GFGB 6003. Basics of Economics. (1 to 3 Credits)

Examines microeconomic theory and concepts that strive to explain economic decisions of businesses in the marketplace. The dominant issues addressed are the factors of supply and demand and the relationship of production costs, output and market structures to pricing. Designed to provide the economic foundation for management decisions.

GFGB 6005. Financial Modeling. (3 Credits)

This course helps students develop, using Excel, the type of financial models that businesses use every day to analyze a wide range of financial problems and make decisions. This course covers modeling of financial statements and models in many other important practical areas, such as time value of money, project evaluation, bonds, investment management, and derivatives. It emphasizes using the most powerful and useful tools in Excel, such as logical functions, PivotTables, Data Table, Scenario Manager, and Goal Seek to solve problems that closely resemble real life situations.

Attribute: BUAN.

GFGB 6006. Corporate Finance Applications. (3 Credits)

This course will explain the concepts of corporate finance and their applications in an international setting. We will examine opportunities and problems that are faced specifically by multinational and foreign corporations and will compare corporate finance practices around the world. Topics covered in the course include foreign exchange rate mechanics, international parity theories, forecasting and hedging, international cost of capital, capital budgeting, capital structure, and valuation of foreign investments.

GFGB 6007. Investment Applications. (3 Credits)

The objective of this course is to introduce the student to investment principles in the U.S. and in the global capital market. We will understand existing assets and investment vehicles, the functioning of capital market, the theoretical principles that underline asset pricing, and its applications in the valuations of fixed income and equity securities.

GFGB 6008. Financial Econometrics. (3 Credits)

This course covers estimation of parametric and non-parametric techniques commonly used in finance, applying high-frequency financial databases. We will discuss properties of financial data; linear time-series data analysis; and the basic theory of statistical inference with linear models, general linear models, conditional Heteroskedasticity models, nonlinear models, and Bayesian inference and estimation.

GFGB 6010. Financial Markets and Responsibility. (3 Credits)

This course is intended as an introduction to Financial Markets and Responsibility. In the first half, we will discuss the instruments traded in the markets, the institutions that support and frame the markets, the trading mechanisms, and the regulatory structure. The course is intended to be descriptive and conceptual. The aim is to familiarize you with the breadth and scope of equity, debt, and currency markets. We shall discuss the recent developments in the U.S. and the development of financial markets globally. The second half will provide an introduction to the environmental, social, governance (ESG) aspects of business, as well as diversity, equity, and inclusion (DEI) issues. A central theme will be the social responsibility of corporations. We will discuss how social considerations impact business and financial markets, and how business practices and disruptions affect employees and society. The focus will be on the financial implications, e.g., shareholder versus stakeholder primacy. Cases and some data analysis may be included in class discussions.

GFGB 6011. Basics of Accounting. (1 to 3 Credits)

This course provides a basic understanding of the preparation and analysis of corporate financial statements; introduces generally accepted accounting principles (GAAP) and the standard-setting process; and discusses current issues in the reporting process, such as the benefits and problems of the Sarbanes-Oxley Act.

GFGB 6012. Basics of Statistics. (1 to 3 Credits)

This course introduces the basic statistical concepts essential for business research and decision-making. These include descriptive statistics, probability distributions, statistical inference, and simple and multiple regressions.

GFGB 6013. Communicating Finance Theory. (0 Credits)

This lecture series will provide a summary of many financial topics. The class will also train students to communicate knowledge of this material to professionals at financial institutions.

GFGB 6014. MSGF—Industry Applications. (0 Credits)

This course is required for all new students in the Master of Science in Global Finance (MSGF) program. The program director will lead lectures and bring in many industry professionals to expose MSGF students to a range of financial applications and opportunities. Grading will be Pass/Fail.

GFGB 6015. MSGF Roundtable. (0 Credits)

This course is required for all new students in the Master of Science in Global Finance program. The program director will lead small group seminars of 15 to 20 students. Topics will be focused on student interests and needs. Each student will select two sessions to attend during the term, one in the first half and in the second half. Grading will be Pass/Fail.

GFGB 6016. Introduction to Financial Data and Analytics. (3 Credits)

This course introduces students to the different financial data sources used in practice and in research. Students will learn how to access and download data from Bloomberg, financial data websites, and research databases. Students will also be introduced to data manipulation tools and basic statistical tools in Python and will engage in short projects that use the data and implement the tools developed in class. The focus is to provide a knowledge of financial data, Python data-frame techniques, and data visualization and inferences using Python.

GFGB 6017. Fundamentals of Finance. (3 Credits)

This course is an introduction to the financial system and the basic techniques in valuation of financial and physical assets. The course is primarily meant for someone who has not had a formal introduction to financial markets, institutions, and instruments. The course will cover the topics of financial statement analysis, time value of money, valuation of stocks and bonds, capital budgeting, cost of capital, and the efficient market hypothesis.

GFGB 601A. Financial Markets and Responsibility A. (1.5 Credits)

This course is intended as an introduction to Financial Markets and Responsibility. In the first half, we will discuss the instruments traded in the markets, the institutions that support and frame the markets, the trading mechanisms, and the regulatory structure. The course is intended to be descriptive and conceptual. The aim is to familiarize you with the breadth and scope of equity, debt, and currency markets. We shall discuss the recent developments in the U.S. and the development of financial markets globally.

GFGB 601B. Financial Markets and Responsibility-B. (1.5 Credits)

The course will provide an introduction to the environmental, social, governance (ESG) aspects of business, as well as diversity, equity, and inclusion (DEI) issues. A central theme will be the social responsibility of corporations. We will discuss how social considerations impact business and financial markets, and how business practices and disruptions affect employees and society. The focus will be on the financial implications, e.g., shareholder versus stakeholder primacy. Cases and some data analysis may be included in class discussions.

GFGB 601C. Statistics Prep. (0 Credits)

Statistics prep.

GFGB 601D. Finance Prep. (0.5 Credits)

Finance prep.

GFGB 601E. Python Prep. (0 Credits)

Python prep.

GFGB 601F. Finance Primer. (1 Credit)

Finance Primer.

GFGB 7001. Global Financial Markets. (3 Credits)

AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Provides a comprehensive overview of global financial markets, the functions and goals of key financial institutions and the role played by central banks and regulatory agencies. Covers international money markets, international equity markets, the foreign exchange market, forward markets for commodities and financial instruments, bond markets and derivative markets.

Prerequisites: GFGB 6001 and GFGB 6003.

GFGB 7002. Contemp Issues Global Finance. (3 Credits)

Explores current issues relevant to the global financial system, including international commercial and investment banking and international investments. It emphasizes the underlying conditions and fundamental trends in various sectors of international finance.

Attributes: GFCE, GFFA, GFIM.

GFGB 7004. Global Equity Portfolio Mgt. (3 Credits)

Provides a comprehensive overview of equity portfolio management in theory and practice. Examines portfolio objectives and links them to appropriate investment strategies. It covers pricing of equities, the asset-allocation decision, return enhancement/risk control techniques, performance evaluation and recent changes in international fund management. Analyzes international investment strategy and the relative merits of various approaches.

Attribute: GFIM.

Prerequisite: GFGB 6007.

GFGB 7005. Global Corp Governance. (3 Credits)

AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Examines how modern publicly traded corporations are governed in the global markets. It discusses the roles of the board of directors, corporate management, institutional investors, and other shareholders, and also discusses the effects of the recent legislation and financial market developments on corporate governance. Provides international comparisons of corporate governance structures and issues arising in contests for corporate control.

Attribute: GFCE.

Prerequisites: GFGB 601A and GFGB 601B.

GFGB 7006. Global Risk Management. (3 Credits)

Covers market risk and volatility, calculation of VaR (value at Risk), Monte Carlo Simulation, credit risk and use of credit derivatives, operational risk, counterparty risk and other topics. Discusses risk regulations, including Basel II, recent developments in Basel III, and recent regulations on the banking industry in the U.S.

Attributes: GFCE, GFFA, GFIM.

Prerequisites: GFGB 6006 and GFGB 6007.

GFGB 7007. Raising Capital and Investing in Global Financial Markets. (3 Credits)

This course provides a comprehensive overview of the decision to go public. Students examine the strategies and process of corporate restructuring and investing activities, such as mergers and acquisitions, corporate diversification, spin-offs, carve-outs, asset sell-offs, tracking stock, exchange offers, and debt restructuring.

Attribute: GFCE.

Prerequisite: GFGB 6006.

GFGB 7009. Money Credit Interest Rates. (3 Credits)

Studies the role of money, credit and interest rates in the efficient and ethical functioning of domestic and global financial markets. This building-block course assumes a background in macroeconomics and finance, and it establishes a foundation for further study in all areas of finance. Topics include: flow of funds and interdependency within the financial system; the Federal Reserve System and its role in money creation; interest rates; the links between interest rates and the growth of money; and the effects of inflation and term structure.

Attribute: GFCE.

GFGB 700A. Financial Data and Analytics. (3 Credits)

This course introduces students to the different financial data sources used in practice and in research. Students will learn how to access and download data from Bloomberg, financial data websites, and research databases. Students will also be introduced to data manipulation tools and basic statistical tools in Python and will engage in short projects that use the data and implement the tools developed in class. The focus is to provide a knowledge of financial data, Python data-frame techniques, and data visualization and inferences using Python.

Prerequisite: GFGB 6007.

GFGB 700B. Sustainability Reporting and Finance. (3 Credits)

Financial decisions worldwide are increasingly influenced by the unique risks of the 21st century. All activities demand focus on sustainability issues—from the looming impacts of climate change, to risks associated with health and safety, to credit and investment gaps that limit business opportunities and hamper economic progress in many parts of the world. As the challenges of scarcity of resources, the search for profits through efficiency, and impact of climate change continue to mount, environmental, social, and governance (ESG) data become essential for prudent decision-making. Along with several multinational investment banks, the Dow Jones has a sustainability index indicating that the search for profitability through efficiency has transcended trends and has now become the new corporate norm. Students in this course study finance, corporate disclosures, and sustainability reporting practices as integrated subjects beginning with an introduction to financial and reporting principles and moving through financial analysis and industry-focused disclosures. Additionally, the course covers diverse aspects of sustainable reporting and offers tools for effective risk assessment.

Prerequisites: GFGB 601A and GFGB 601B.

GFGB 700C. Introduction to Financial Data and Analytics. (3 Credits)

This course introduces students to the different financial data sources used in practice and in research. Students will learn how to access and download data from Bloomberg, financial data websites, and research databases. Students will also be introduced to data manipulation tools and basic statistical tools in Python and will engage in short projects that use the data and implement the tools developed in class. The focus is to provide a knowledge of financial data, Python data-frame techniques, and data visualization and inferences using Python.

GFGB 700D. Programming with Python. (3 Credits)

Do you want to be able to solve business problems through programming and coding? This course introduces key programming concepts, techniques, and tools. Students will learn programming and coding using the widely used Python programming language. This section of Programming with Python will include additional finance applications.

GFGB 700E. Advanced Consulting Seminar. (3 Credits)

Students in this seminar will work directly with, and be mentored by, an industry practitioner as well as a Fordham faculty member. The work will normally involve solving problems related to current issues of industry relevance. Projects will be spread over a large part of the semester. Grading criteria will be based on thoroughness, realism, analysis, and imagination.

GFGB 700F. ESG & Portfolio Management. (3 Credits)

This course will introduce students to the management of investment portfolios with an awareness of environmental, social, and governance (ESG) risks and objectives. We'll start with an introduction to ESG and everything that means today. We'll then examine a variety of approaches to ESG-aware portfolio management, including security screening and exclusion, ESG integration, best-in-class investing, thematic investing, portfolio tilting, active ownership, and impact investing. We'll focus primarily on public equity, but other asset classes will be introduced over the term. The emphasis will be on developing a practical and applied understanding of the subject. Data widely used by ESG-aware investors will be reviewed and analyzed, including company-level third-party ESG data, ratings, and climate-related measures. Students will complete computational exercises involving that content, and will be assumed to be proficient with Excel or similar spreadsheet software, but no other coding ability will be required. The course is intended to provide the ESG investing background necessary for students seeking to participate in the ESG Student Managed Investment Fund sequence, but other students meeting the course requirements are also welcome to enroll.

Prerequisite: GFGB 6007.

GFGB 700G. ESG Finance: Issues & Challenges. (3 Credits)

This graduate course is designed in a seminar format and will delve into topics ranging from the successful implementation of sustainability goals by corporations to evaluation of ESG-tilted portfolios by an investor. Students and participants are expected to have a basic understanding of the issues surrounding sustainability. The course is open to graduate students from the Gabelli School and the economics department. A limited number of undergraduate students from the Gabelli School may take the course with the instructor's permission.

Prerequisites: GFGB 601A and GFGB 601B.

GFGB 700H. Cloud Computing and Finance Uses. (1.5 Credits)

This course introduces the core concepts of cloud computing, including networking, storage, database, access control, security, compliance, and pricing. Cases will be drawn from the finance industry. The course does not require prior programming or cloud computing experience. Students will create their own account on a cloud platform and gain some hands-on experience by provisioning a cloud service and working with it.

Prerequisites: GFGB 6006 and GFGB 6007.

GFGB 700J. Identifying Corporate Culture to Uncover Positive Alpha Investment. (1.5 Credits)

This course will provide a solid introduction to financial linguistic analysis that allows investors to measure the relevance and importance of intangibles like corporate culture and leadership as important contributors to future share value and Alpha. The aim of this first-ever financial linguistics course is to introduce students to the Candor Analytics process. Students will learn how this analytic process has consistently identified high-performing and underperforming stocks over the past decade.

Prerequisites: GFGB 6006 and GFGB 6007.

GFGB 700K. Mergers, Acquisitions, and LBOs. (3 Credits)

In this course, students will focus on identifying and evaluating target companies and structuring deals. They also will consider the economic and social impact of such changes in corporate ownership, and they will analyze recent cases, evaluate strategic rationale, examine deal structuring, and assess financial impact.

Prerequisite: GFGB 6006.

GFGB 700L. Sustainable Investing and ESG Analysis. (3 Credits)

This course has been designed to develop sustainability competencies for those aspiring to create an impact in their personal and professional lives. Students are exposed to new techniques and tools enabling them to develop sustainable investing strategies and positive outcomes. Through this course, students will learn how to identify, analyze, and integrate ESG factors across a range of asset classes while learning best practices of sustainable and impact investing. This course culminates with a case study in which students develop their own sustainable investment strategy.

Prerequisite: GFGB 6007.

GFGB 700M. Introduction to ESG and Finance. (1.5 to 3 Credits)

In this course, students will learn about the history of ESG and impact investing, as well as the evolution of key social, environmental, and economic challenges. They will examine the use of ESG Value Reporting Foundation (Sustainability Accounting Standards Board) standards in the United States, Europe, and China, and they will review regulatory factors in relation to the ability of an institution to drive value for its multiple stakeholders. Students will also evaluate social tensions relating to climate change and the exponential growth of investor interest in transformative climate tech solutions. We will look at how policies and market environments, including in each student's native country, support ESG development. The course will leverage Fordham's relationship with the United Nations PRME (Principles of Responsible Management Education) program, and students will examine in detail the UN's 17 Sustainable Development Goals and the Business Roundtable pledge.

GFGB 700N. Introduction to Climate Finance. (3 Credits)

In this course, students explore the science of climate change and its related economic and environmental impacts. They study changing global policies and examine financial tools and techniques to fight climate change in its context. Specific areas covered include the use of capital markets to create market-based emission trading systems, project finance to build renewable energy projects, venture capital to fund innovative low emission technologies, etc. The course will feature a large number of readings and a few cases to introduce students to climate finance.

Prerequisite: GFGB 6006.

GFGB 700P. Advanced Machine Learning. (3 Credits)

The primary focus of the course is on developing computational models to identify/forecast economic regimes, factor-based smart beta, strategic risk budgeting, and trading decisions. The topics covered in this course will help students gain theoretical knowledge and practical skills to work with global financial firms across different asset classes. Students are required to be proficient in Python programming and have knowledge of basic data mining algorithms and techniques.

Prerequisites: GFGB 7050 and GFGB 7039.

GFGB 700Q. Managing Business Climate Change Risk Exposure. (3 Credits)

This course will introduce you to the effects that climate change is having on business organizations across the globe and how businesses are responding to these risks. We will explore the short-term impact on businesses of extreme weather events and the long-term impact of chronic changes in weather patterns due to global warming. The course will explain the full range of potentially severe physical risks and transition risks of climate change facing businesses today and how these risks are changing due to global warming. You will learn the strategies that businesses utilize to manage these risks, including risk avoidance, risk mitigation, and risk transfer. We will study how businesses use such important climate risk transfer mechanisms as buying insurance, including general business, flood, and business interruption insurance, and issuing catastrophe bonds. You will also learn how businesses can use derivatives, such as specialized weather derivatives and certain traditional derivatives like forwards, futures, and swaps, to hedge their climate change risk exposure. The course will explain how climate change can also give rise to opportunities for businesses to develop innovative products, services, and strategies to help other businesses. You will learn how successful businesses that recognize these opportunities can turn climate change into an advantage for their stakeholders and society.

Prerequisite: GFGB 700N.

GFGB 700R. Financial Regression and Application. (3 Credits)

This course will cover basic regression analysis for finance students. The software will be based on Excel and basic Python. It will be useful to have had some exposure to Python or other programming skills. If not, extra effort on your part should be expected—or take a Python class at the same time. You will learn how to import data and conduct analysis such as computing Beta, estimating simple multifactor models, assessing the relation between standard accounting data and stock returns, etc.

Prerequisite: GFGB 7039.

GFGB 700S. Equity Factor Investment Strategy. (2 to 3 Credits)

This quantitative course is designed to teach students how to backtest a quantitative strategy using the programming language Python. Equity factor investing is a systematic approach to evaluating companies. Companies are assessed on how attractive they are based on one or more factors and then ranked against other firms. Higher-ranked companies may indicate a greater opportunity for alpha. Students will learn about risk exposures and alpha generation. Students will be exposed to long-only and long-short quantitative strategies.

Prerequisites: GFGB 6006 and GFGB 6007.

GFGB 700T. Intro to Fintech in Portfolio Management. (3 Credits)

This course aims to provide students with basic knowledge and skills in fintech via a comprehensive introduction to the field. Students should be able to conduct fintech problem-solving professionally and present their results to peers after taking this class. The major skills to be covered include models in fintech, financial data acquisition, data mining and visualization, machine learning in finance, and high frequency trading analytics. Topics covered include portfolio analysis, portfolio formation, and portfolio optimization using machine learning.

Prerequisites: GFGB 6006 and GFGB 6007.

GFGB 700U. Real Estate Capital Market Analysis. (1.5 to 3 Credits)

This course examines selected topics and issues related to real estate capital markets. Special emphasis will be placed on mortgage backed securities (MBSs) and real estate investment trusts (REITs). This class will be conducted using a lecture format. The topics include the primary mortgage market and secondary markets, the objectives and processes for designing, implementing, and servicing mortgage and asset backed securities, the tools used by the capital market for pricing and analyzing risks of MBSs, and the regulatory environment and trend of the securitization market.

Prerequisite: GFGB 6006.

GFGB 700V. Data Analytics for Finance. (3 Credits)

This course teaches students how to apply the tools and techniques of data science to big financial data and, combined with finance theory and concepts, enhance the quality of empirical analysis, problem-solving, and decision-making in finance. Students will engage in diverse projects related to the field of finance, using big data drawn from proprietary financial databases, such as S&P Compustat, CRSP, Execucomp, ISS Directors, RepRisk, Thomson/Refinitiv, and others, as well as the Web. The projects will be executed using the Python programming language and its system of libraries, such as Pandas, Numpy, Matplotlib, Statsmodels, Numba, SciPy, etc. A wide range of interesting problems from various areas in finance will be investigated, such as capital structure, cost of capital, payout policy, simple multifactor models, portfolio construction, financial ratio analysis, firm liquidity, executive compensation, boards and institutional investors, diversity in corporate governance, ESG, and firm market and financial performance, and others. The course will equip the students with the necessary knowledge and skills to extract useful information from the ever-increasing volume of data and use it for improved understanding of financial concepts and better decision-making.

GFGB 700W. Fundamental Stock Analysis. (3 Credits)

This course is designed to simulate the experiences a student can obtain as an equity analyst in the asset management industry. As such, while a broad survey of the market and asset classes is covered, the course provides an in-depth understanding of equity stock selection and trains students in selecting stocks using a disciplined investment process that systematically screens an investment universe for attractive quality stocks that are undervalued (Graham & Dodd). Students are expected to focus on the examination and evaluation of individual companies on a standalone and comparable basis, and to understand a company's competitive positioning via Porter's five forces. Students will look at the fundamentals of the company, recognizing a sound business, trading at a reasonable price, as a potential investing opportunity. Students will also learn to appreciate that buying businesses that they don't completely understand adds uncertainty, and they should, therefore, demand a higher risk premium (margin of safety). The course stresses the importance of creating relationships with people in investor relations at targeted companies. A team of industry experts, fundamental analysts, portfolio managers, risk managers, and other investment professionals will work closely with students to ensure that the students are exposed to various tools and methods that are currently being employed in the industry.

Prerequisite: GFGB 6007.

GFGB 700X. Investment Analysis with Data Visualization and GenAI. (3 Credits)

This course is an advanced investment analysis course with three overlapping parts. The first part focuses on utilizing well-regarded investment websites available on the internet to speed up economic data analysis, portfolio evaluation, and stock selection. The second part involves using GenAI to rapidly ask questions and gain various perspectives, uncovering blind spots and opening new areas of opportunity. Effective prompt engineering and checking against GenAI's hallucinations is crucial. In the final three weeks, students will work in groups of four on a pro bono consulting project for an industry practitioner, applying what they have learned in the course.

GFGB 700Y. Advanced Value Investing. (3 Credits)

Students will study a variety of advanced topics which build on the principles outlined in Introduction to Value Investing and Behavioral Finance. The class will study real-world situations in the current market environment, employ multiple valuation frameworks, and improve students' ability to make informed decisions. Among other topics, the class will study business strategy, Mario Gabelli's Private Market Value with a Catalyst, capital allocation principles, distressed investing, and merger arbitrage.

GFGB 700Z. Technical Analysis. (3 Credits)

A study of the Elliot Wave theory, a technical analysis approach used in financial markets, particularly in the analysis of stock market price movements. It was developed by Ralph Nelson Elliott in the 1930s and is based on the idea that market prices move in predictable patterns and cycles. The theory is widely used by traders and investors to forecast future price movements. Students will study the theory alongside money management techniques in real time.

GFGB 7010. Investment Banking. (3 Credits)

This course is intended to give students a practical introduction to investment banking and its role in helping corporations raise capital from the global capital markets. Topics include: venture capital, public offerings, private placements, going public, stock and bond financing, convertibles and other hybrid instruments, design of innovative securities, swaps and other derivative instruments, mergers and acquisitions and leveraged buyouts.

Attribute: GFCE.

Prerequisite: GFGB 6006.

GFGB 7011. Hedge Fund. (3 Credits)

The course provides in-depth analysis of hedge fund strategies including absolute-return; controlled risk arbitrage; equity market neutral, long short, and statistical arbitrage; derivatives including options and credit derivatives; fixed income, currency and global macro arbitrage; distressed debt and emerging markets. It examines the role of various participants including regulators, banks, brokerage firms, market makers and investors, both private and institutional.

Attribute: GFIM.

Prerequisite: GFGB 6007.

GFGB 7013. Fixed Income Securities. (3 Credits)

Introduces fixed-income securities, basic fixed-income concepts, the different sectors of the fixed-income market and basic bond mathematics. Studies quantitative fixed-income analysis and its use in valuing bonds and quantifying risk-return characteristics. Involves extensive training in the mathematical formulation of bond valuation problems and in the use of the existing models and software to solve these problems.

Attribute: GFIM.

Prerequisite: GFGB 6006.

GFGB 7014. Futures and Options. (3 Credits)

Examines the institutional aspects of options and futures markets and discusses the strategies of hedgers, arbitrageurs and speculators. Provides an introductory analytical foundation for pricing futures and option contracts.

Attribute: GFIM.

Prerequisite: GFGB 6007.

GFGB 7015. Credit Management. (3 Credits)

This course focuses on the analytic approach (stemming from Basel II capital accords) and will help students make wise credit decisions and manage lending portfolios. Topics include the latest lending techniques based on cash flow, advanced forecasting methods (including simulation and stochastic optimization), pricing, portfolio management, default probability, valuation analysis risk rating and credit derivatives.

Prerequisite: GFGB 6007.

GFGB 7016. Real Estate Capital Markets. (3 Credits)

This Real Estate Capital Markets course will cover both the primary and secondary debt and equity markets linked to real estate assets. While the underlying real estate assets in the primary markets will be covered, a greater portion of the class will be devoted to the secondary debt and equity markets, mainly dealing with mortgages, mortgage backed securities, and Real Estate Investment Trusts (REITs). A distinguishing aspect of this course is the focus on the intersection of the primary and secondary real estate capital markets, investor perspectives, and the impact of macroeconomic factors. Additionally, this course will include a robust mix of quantitative and qualitative factors in order to provide a holistic, less technical perspective on the real estate capital markets, and the real estate industry at large.

Prerequisite: GFGB 6007.

GFGB 7017. Real Estate Finance. (3 Credits)

Discusses the major factors affecting the valuation and financial structuring of real estate, including general tax and depreciation policies. Presents the roles of principal lending institutions, mortgage banks and investment banks in real estate lending, syndications and partnerships. Also surveys real estate-related securities and their markets.

Prerequisite: GFGB 6007.

GFGB 7018. Adv Global Portfolio Mgt. (3 Credits)

The course will review (1) basics of modeling of securities' returns and volatility in the context of portfolio management / "buy-side"; (2) theoretical basis and empirical evidence of risk-return tradeoff and investor preferences; (3) main approaches to portfolio construction and challenges with their practical application; (4) performance evaluation, and other relevant portfolio management topics.

Prerequisite: GFGB 6007.

GFGB 7019. Equity Analysis. (3 Credits)

This course explores techniques and skills required to evaluate the attractiveness of investment opportunities. Experts in the field will be invited to join the class and lead discussions on issues facing analysts, how analysis is used by money managers in making investment decisions, wealth management, and private equity analysis. The course is a combination of guest lectures, case studies and team projects. Students will be expected to analyze an industry as well as engage in a discussion with guest speakers and class participants.

Prerequisite: GFGB 6007.

GFGB 7020. Value Investing Student Mgt Fund. (3 Credits)

This course aims to familiarize the student with the principles and techniques of value investing, the investment philosophy pioneered by Graham and Dodd during their years at Columbia Business School. This will be done through a combination of formal lectures, in-class valuation discussions (see below) and three presentations by leading investors.

Prerequisite: GFGB 6007.

GFGB 7021. Emerging Markets. (3 Credits)

This course will focus on government policies; their motivation, transmission and limitations. Students will learn how a country's investment possibilities and potential GDP is driven by its labor force and productivity. In turn, the level of productivity can be affected by a confluence of monetary, fiscal, currency and regulatory policies developing at the "emerging growth" phase when political goals and legal structures are still in transition, financial and government institutions are not yet fully formed and consumer spending behavior and market availability are evolving.

Attribute: GFIM.

Prerequisite: GFGB 6006.

GFGB 7022. Venture Capital Finacing. (3 Credits)

We will examine the changes in the asset class over time - from the formation of American Research and Development in 1946 to the formation of some of the angel-type funds of the present. We also will examine the geographical differences between venture funds - West Coast and East Coast . We also will look at specialization -- the beginnings of IT-focused investing and the move into healthcare and finally into energy. Finally we will examine the phenomenon of global venture capital. How does that vary from the way venture capital is practiced in the US. The class will be taught in modules and we also will rely on practitioners and experts to visit with the class. Where possible, the students will be asked to visit venture capital fund presentations, expert briefings as well as personal briefings.

Attribute: ABEP.

Prerequisite: GFGB 6006.

GFGB 7024. Fintech Compliance-Asia to US. (3 Credits)

An overview of the components of an effective global Corporate Compliance Program. Examination of the Part C Risk Assessment and the Seven Steps of a corporate compliance and ethics program. Review of compliance program design and best practices, including the roles of the corporate compliance office and in-house counsel, risk assessments, Foreign Corrupt Practices Act, global codes of conduct, corporate governance, monitoring and re-evaluation.

Prerequisite: GFGB 6006.

GFGB 7025. Adv Corporate Finance. (3 Credits)

This course teaches the art of applying corporate finance theory and essential tools and techniques to strategic decision-making in critical real-life situations faced by organizations. The course enhances the students' understanding of corporate finance by providing a comprehensive examination of selected advanced topics, such as alternative valuation methods, real options in corporate finance, decision trees, international operations, mergers and acquisitions, risk arbitrage, debt capacity and leveraged buyouts, private equity, warrants and convertibles, and ethical issues.

Attribute: GFCE.

Prerequisite: GFGB 6006.

GFGB 7026. Alternative Investments. (3 Credits)

The course is an introduction to the rapidly evolving universe of alternative investments. Delivered in modules, the course covers a broad array of alternative strategy classes (Quantitative/Systematic, Fundamental Long/Short, Global Macro, Private Equity) ranging across all major asset classes (Equities, Fixed Income, Currencies, Commodities, Derivatives).

Attribute: GFIM.

Prerequisites: GFGB 6006 and GFGB 6007.

GFGB 7027. Algorithm Trading. (3 Credits)

Electronic algorithms are being used by major institutions, investment banks, and hedge funds to trade stocks, bonds, currencies, and a plethora of financial derivatives. Algorithms are being used for all aspects of trading - from asset allocation and stock selection, to execution and implementation, and for risk management and regulatory and compliance reporting. In this course, students will learn the necessary skill sets, and underlying math, statistics, and programming skills to build, develop, manage, and implement profitable algorithms across all asset classes.

Prerequisite: GFGB 6007.

GFGB 7028. Technical Analysis. (3 Credits)

This course is designed to inform students about how the markets and individual stocks behave (i.e., technical analysis), and how they differ from the economy and individual companies (i.e., fundamental analysis).

Prerequisite: GFGB 6007.

GFGB 7029. ESG Student Managed Investment Fund 1. (3 Credits)

This course will focus on ESG-aware analysis of equity securities, culminating in the creation of a hypothetical equity portfolio consisting entirely of holdings proposed by students and vetted by the class as a whole under the instructor's supervision. While all investing in this class will be simulated, the intent is to enable students to hit the ground running in the subsequent ESG Student Managed Investment Fund 2 course, where an actual portfolio will be created and managed. This course will start with a very brief overview of modern equity security analysis, including especially the use of alpha and risk factors to codify equity characteristics. We'll then build upon the techniques described in the ESG & Portfolio Management course to satisfy an ESG investment mandate while seeking investment outperformance based on ESG insights. The bulk of the term will then be devoted to students pitching investment ideas, and incrementally constructing a hypothetical risk-managed portfolio on that basis.

Prerequisites: GFGB 6007 and GFGB 700F (may be taken concurrently).

GFGB 7030. CFA Competition and Workshop. (0 Credits)

While this course is for zero credit, it has a heavy work load and provides valuable practical experience. Students will be arranged into teams. Each team will write a full sell-side coverage report, build out a presentation, and pitch it to Fordham Wall Street alumni.

GFGB 7031. Seminar in Value Investing. (3 Credits)

This survey course is designed to introduce the fundamentals of the Graham and Dodd value approach to investment analysis. The course will be segmented into two parts: the basic structure of the analytical approach to value investing and its relationship to many of the elements of the MBA curriculum will be described through lectures, exercises, readings, in-class discussions and homework assignments; the last sessions of the course will be devoted to student presentations of their investment recommendations.

Prerequisite: GFGB 6007.

GFGB 7032. Applied Capital Markets and Financial Regulations. (3 Credits)

This course will explore how the market structure has fundamentally changed after the 2008 liquidity and credit crisis, and how that crisis has affected liquidity, balance sheets, risk taking, and returns across the entire financial services industry. The new reality is that regulation has changed the landscape of Wall Street and the dynamic of how the sell-side and buy-side will interact in the foreseeable future.

GFGB 7033. Corporate Finance. (3 Credits)

Studies corporate finance and its specific decisions. Topics include evaluating capital expenditure proposals, forecasting financing requirements and selecting sources of financing. The course also discusses working capital management, dividend policy and contingency planning, and addresses the additional challenges of multinational firms.

Prerequisite: GFGB 6006.

GFGB 7034. Finl Statement Analysis. (3 Credits)

Gives students a better understanding of financial statements and the information they communicate on the operating, investing and financing activities of corporations. Focuses on the impact of financial accounting principles, disclosure standards and alternative accounting practices on financial reports. Examines and evaluates traditional and non-traditional methods of financial statement analysis.

GFGB 7035. Intl Trade & Development. (3 Credits)

The first half of the course focuses on the theories and practices of world trade. Topics include comparative advantage, the changing trade competitiveness of nations and protectionism. During the second half, the focus shifts to developing countries: the process of economic development, including the contribution of foreign investment and technology as well as investment and trade opportunities, policies and regulations.

GFGB 7036. Research in Value Invest. (3 Credits)

Prof. Johnson, a leading expert in the field of Value Investing, will lead a small, project based seminar that focuses on best practices in the field. Selective enrollment by approval of the instructor.

Prerequisite: GFGB 6007.

GFGB 7037. Applied Investment Principles. (3 Credits)

This course provides applications that follow Principles of Finance or Global Investment Principles. EXCEL models will be applied to CAPM modeling of Risk and Return, to Factor Models, and to Portfolio Attribution. Data may be drawing from Boomerang, Yahoo Finance, and other sources.

Prerequisite: GFGB 6007.

GFGB 7038. Applied Quant Invest Strateg. (1.5 Credits)

This course provides applications that follow Financial Econometrics, using SAS or similar software. The techniques from that course will be reviewed, extended, and applied to stock return and accounting data. The focus will be on anomalies, predictions, and multifactor models.

Prerequisite: GFGB 6007.

GFGB 7039. Computational Finance. (3 Credits)

The course will introduce students to programming in R and Python, and will provide many basic finance applications.

Attributes: ABFF, GFFA.

GFGB 7040. Lectures in Applied Port Mgt. (3 Credits)

This advanced Portfolio Management course quickly reviews Modern Portfolio Theory (MPT) conceptual underpinnings and builds on MPT 1.0. It delves into contemporary liability driven asset allocation, MPT 2.0 and portfolio management industry practices, issues and concerns. Lectures, problem solving, and self-study along with extensive hands-on tools using Microsoft Excel based models will be used to provide a practitioner's perspective. We will review and demo contemporary asset allocation optimization and forecasting techniques, new asset class pricing and valuation, performance and risk attribution, tail risk measurement and management tools etc. using real time vendor based (third party) solutions. As Pre-reqs - the student should have class exposure to investment and portfolio analysis, Excel, stats, and basic regressions.

Prerequisite: GFGB 6007.

GFGB 7041. British Economy and Brexit. (3 Credits)

This intensive course is designed to give students an in-depth understanding of Brexit including the implications for the British economy and the companies that operate in it. Students meet three times as a class in preparation for travel to England, scheduled for May 10-20, 2017. This course may count toward a Finance or Management concentration. Please see your program director or dean-adviser for further registration information.

GFGB 7042. Sustainability and Finance. (3 Credits)

In this course we explore how the evolving needs of society are changing the way financial theories, tools, and techniques are conceived and applied.

Prerequisites: GFGB 601A and GFGB 601B.

GFGB 7043. Financial Innova & Institu. (3 Credits)

This course will introduce major financial institutions, such as commercial and investment banks, insurance companies, mutual funds, hedge funds, and credit rating agencies with a focus on their risk contributions to the modern financial system. We will examine their credit risk in depth, and how to model and analyze credit risk and products. We will also understand new financial sector regulations and systemic risk by focusing on Dodd-Frank, market based stress-testing, Comprehensive Capital Analysis and Reviews (CCAR), and other methods. This course will help prepare students for the job market at financial institutions and regulators.

Prerequisite: GFGB 6006.

GFGB 7044. Auto Trading Systems - Intro. (2 to 3 Credits)

This course discusses key issues involved in the design of an Auto (Algorithmic) Trading Systems, and provides hands-on experience. The end product is a prototype Auto Trading System designed by students that successfully trades in the real market (stock, futures, option) using live data feeds from exchanges. Issues covered include: typical structures of trading systems; efficient processing of live information; minimizing trade slippages; handling large number of securities; asynchronous information processing; GUI interfaces; etc. Industry experts are invited to discuss new developments. Key programming techniques will be reviewed at the beginning, very briefly. The course is suitable for students in MSGF, MSQF, and other master level students with programming skills equivalent to one formal course (e.g, R, Matlab, VBA, etc). Students with less programming skill may take the course if approved by instructor.

Prerequisite: GFGB 6007.

GFGB 7045. Investing in European Union. (3 Credits)

The EU is the largest market for US exports and foreign direct investment. The objective of the course is to familiarize students with the process of regional integration and monetary unification in Europe and the opportunities and challenges which this has created for foreign investors. Regulatory differences between the US and EU in competition laws and financial sector will related to the investment climate for foreign companies. The course will highlight that despite the deep economic and financial integration in the EU, significant country- and regional differences exist. This will be assessed through the analysis of several Harvard Business case studies covering different country- and industry experiences.

GFGB 7046. Fintech -An Introduction. (3 Credits)

FinTech is a new and emerging field of technology that is disrupting the way that many companies are conducting business. FinTech has already "forever" changed many sectors including mobile payments, social media, money transfers, loans, fundraising, travel, trading and asset management. It has completely revolutionized the way companies are developing products, conducting research, establishing directed sales and marketing plans, and utilizing start-up technology. Businesses are using FinTech to expand their products and services at a fraction of its previous cost. Entrepreneurs are utilizing FinTech as a central foundation for research, funding, and product development. Customers are already utilizing FinTech as part of their daily lives - mobile apps, social media, banking, online shopping, entertainment and gaming. This course will introduce students to the breadth of FinTech, and touch upon the technical underpinnings.

Prerequisite: GFGB 6007.

GFGB 7047. Stress Tests and Cap Adequacy. (3 Credits)

The financial crisis of 2007 -08 taught us all a lesson: that preparedness is everything. How resilient and prepared will we be, and how fast will we be able to recover? This is the key focus of this course: how to plan for moments of distress so that firms such as yours have capital of a sufficient quality to survive potential storms. We will demonstrate how to create a robust capital plan and test it for moments of hypothetical stress. We will investigate exactly how a bank holding company and an insurance company should conduct their capital plan, highlighting the significant differences between the two industries. By the end of the course, you will be able to create a capital plan for your business on your own.

GFGB 7048. Dynamics of Banking & Fin Mkts. (3 Credits)

This course is designed to provide students a well-rounded and hands-on perspective on the practical functioning and decisions in financial markets and banking.

Prerequisite: GFGB 6006.

GFGB 7049. Global Financial Markets and the Macro-Economy. (3 Credits)

The overarching goal of this course is to give students an understanding of the forces affecting real income growth, inflation, and asset prices in the world economy. The specific topics the course will address include: the operation of monetary and fiscal policy; how those policies affect financial markets and the broader economy; the determinants of countries' long-term rates of growth; the factors behind the recent financial crises in the U.S. and EU; the features of currency crises, business cycles, and financial crises historically; and the relationships linking global interest rates, exchange rates, and inflation rates. The course will combine economic theory and empirical evidence to provide a toolbox of skills that students can use to analyze these and similar issues going forward.

Prerequisite: GFGB 6006.

GFGB 7050. Machine Learning for Finance. (3 Credits)

Machine learning (ML) methods of data analysis and prediction are transforming the financial landscape. This course provides a broad overview, knowledge, and practical skills of Machine Learning (ML), focusing on applications in Finance. The course will introduce various ML methods including supervised and unsupervised learning, as well as deep and reinforcement learning. Students will understand the general landscape of available ML algorithms and learn to implement the most appropriate solutions of a given problem. The course will use Python programming and open source Python packages, and requires knowledge of statistics. Class sessions will provide the basics of Python.

Attributes: ABFF, GFFA.

GFGB 7051. Econtech: Econ & Data Mining. (3 Credits)

The overall financial markets and individual company performance are largely driven by the growth rate of the economy, which in turn is affected by monetary, fiscal, and currency policies. Our understanding and forecasting ability are based on analyzing and mining available data. This course will examine data and data mining to better understand a range of policy and output variable, and how they interact under different regimes.

Attributes: ABFF, GFFA, GFIM.

Prerequisite: GFGB 6006.

GFGB 7052. Empirical Value Investing. (3 Credits)

This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed.

Prerequisite: GFGB 6006.

GFGB 7053. Investor Relations. (3 Credits)

A corporate Investor Relations program formulates and communicates the financial performance and strategic direction of diversified corporations to the global investment community. Investor Relations professionals are well versed in accounting, compliance, finance, governance, marketing and communications. They collaborate with senior management and the Board of Directors to convey and interpret corporate matters to the public. This course will teach students the skills and competencies required to become a corporate Investor Relations professional. The course utilizes a course textbook, case studies, investor relations guest speakers and participation in investor relations events.

Prerequisite: GFGB 6006.

GFGB 7054. Wharton-Impact Investment Workshop. (3 Credits)

Students will attend workshops on ESG (Environmental, Social, and Corporate Governance) and Impact Investing. They will compete in teams of three to five against other national schools to construct a 100% Impact Portfolio. Since this is a two-semester competition, only students who participated in Fall may register in Spring.

GFGB 7055. Research Seminar. (3 Credits)

Students will learn from industry practitioners how textbook concepts are applied in the finance industry. Guest lecturers will cover areas which include wealth management, equity research, portfolio management, investment banking, risk management and FinTech.

GFGB 7056. Blockchain Tech & App Dev. (3 Credits)

The main objective of this course is to familiarize you with the ecosystem, technologies, and development skills surrounding Blockchain. The course starts with foundational concepts such as distributed state machine, hash tree, P2P network, GPU processing, cryptocurrency, and cryptography. Using both simulated sandbox and locally installed environments, the course then guide you through the development, front-end integration, and deployment of Blockchain-based smart contracts. Other topics covered include rapid prototyping, design patterns, and agile process to maximize the success likelihood for Blockchain projects. Proficiency in computer programming; basic knowledge in analysis and linear algebra required.

Prerequisite: GFGB 7039.

GFGB 7057. Contemp Develop in Corp Fin. (3 Credits)

This course will cover a number of important topics of current interest to the corporate finance industry, such as : executive compensation and governance; utilizing and responding to fintech; importance of the growth of intangible assets; importance of large corporate cash holdings invested in risky assets, such as hedge funds and private equity.

Prerequisite: GFGB 6006.

GFGB 7058. Behavioral Finance. (3 Credits)

Over the past several decades, the field of finance has developed a successful paradigm based on the notions that investors and managers are generally rational and that the prices of securities are generally efficient. In recent years, however, anecdotal evidence as well as theoretical and empirical research has shown this paradigm to be insufficient to describe various features of actual financial markets. In this course we will use psychology and more realistic settings to guide and develop alternative theories of financial markets. We will examine how the insights of behavioral finance complement the traditional paradigm and shed light on investors' trading patterns, the behavior of asset prices, corporate finance, and various financial market practices through lectures, case studies, and our own discussions.

Prerequisite: GFGB 6006.

GFGB 7059. Student Managed Investment Fund: ESG-Impact. (3 Credits)

In this joint graduate and undergraduate course, students will apply their investment and portfolio skills in the analysis and selection of a real set of securities and opportunities. Selection will focus on ESG investments and/or those that stress societal impact.

GFGB 7060. Practical Exploration of M&A. (1.5 Credits)

This class will provide an introduction to the essential elements of large cap M&A transactions from the perspective of real, recent examples taught by a senior investment banker.

Prerequisite: GFGB 6006.

GFGB 7061. Corporate Valuation. (1.5 to 3 Credits)

The objective of the course is to learn firm, debt, and equity valuation methods from both a conceptual and practical framework. It combines both accounting and finance into practical valuation frameworks. Adequate accounting and finance backgrounds are required. Working knowledge of Excel is important.

Prerequisite: GFGB 6006.

GFGB 7062. Financial Markets and Major Players. (3 Credits)

This course will provide an overview of a broad range of financial markets, from practitioner standpoints. It will discuss how secondary market prices, ranging from equity and fixed income to commodities and complex derivatives, are established in listed exchanges, OTC markets, and dealer platforms. We will examine the roles of both market-maker (“sell-side”) and price takers (“buy-side”), with the latter further divided into two major groups: institutional or retail. We will survey sell-side businesses, including market-makers vs. agents in listed markets and OTC markets, institutional block trading, securities lending, and prime-brokerage. On the retail clientele side, we will discuss the whole-sale market making business. On the risk management of the sell-side business, we will cover market risk, credit risk, and counterparty credit risk. At the end of the course, students should have a thorough understanding of how various businesses fit together. Hopefully, the course will help students better understand the area in which they might pursue their career path in financial markets.

GFGB 7063. ESG - Student Managed Investment Fund 2. (3 Credits)

This course is an intensive experiential learning opportunity in which students who already completed ESG—SMIF 1 apply their skills in investment analysis and risk attribution in order to manage an actual portfolio of securities on behalf of the University. Students act as fiduciaries for a portion of the University’s Endowment. This is the second and immediate followup course to ESG—SMIF 1. ESG—MIF 2 is designed to apply the analytical framework concerning financial statements, economic indicators, geopolitical concerns, ESG filters and rankings, and other investment management concerns within an ESG-based portfolio and under specific strategies. Through structured research and quantitative analysis concerning companies and their equity, debt, and other financial asset classes, students manage a portfolio, produce detailed and weekly metrics, pitch securities for trading, prepare trading tickets for actual execution, and recommend securities trades. Enrollment is open to both graduate and advanced undergraduate students.

Prerequisite: GFGB 7029.

GFGB 70AA. Quantitative Asset Management Capstone Consulting Projects. (3 Credits)

The course bridges the gap between academics and practice by immersing students in the entire life cycle of real-world analytics engagements. Divided into small groups, students will work on pre-defined projects designed to boost your career with real-world experience and formulated to be completed within a single semester. This project-based course is structured as a consulting internship with actual companies, augmented with lectures to form a comprehensive framework based on the course textbook. Big data combined with machine learning and artificial intelligence provides amazing opportunities for institutional investors. Apply modern tools to investing with real-world details such as currency controls, market impact, and taxes. Study the entire investing process, from designing goals to planning, research, implementation, testing, and risk management. Use Python, MATLAB, and R to build alpha and risk engines, optimal multi-factor models, contextual nonlinear models, multi-period portfolio implementation, and more.

GFGB 70AB. Introduction to Venture Capital. (3 Credits)

This course offers a comprehensive introduction to the world of venture capital, a critical component of the global financial system that drives innovation, rewards founders and drive economic growth. If you are a financial professional, investor or an aspiring entrepreneur, this course will give you a deep understanding of how venture capital firms operate, how deals are sourced, evaluated and how deals are structured. You will also learn about the history of venture capital and the key opportunities and challenges venture capitalists are facing today.

GFGB 8001. Iss in Fin: Modern Fin'al Ana. (1.5 Credits)

Learn how the financial services industry applies valuation techniques in a deal context! In this mini-course, you will demystify the theory behind the analytics and ultimately appreciate the “art” and “science” of valuation analytics. What is a company worth? What is someone willing to pay? The answers depend on: who the seller is; who the potential buyer(s) is; the context of the transaction and the current market conditions... The seminar is ideal for individuals are currently working in or are considering a career in the following disciplines: • Financial services industry (investment banking, consulting, research, asset management, private equity, brokerage, sales & trading, insurance, etc.) • Finance or strategic development group of a corporation – mid-sized thru multinational • Marketing, brand management or a non-finance field... namely anyone interested in gaining a solid foundation in valuation analytics in a condensed, real-world context.

Prerequisite: GFGB 6006.

GFGB 8002. Fin'lmkts: Cncpts/Methods/Trd. (1.5 Credits)

This course provides a real-life, hands-on experience of financial market activity and its impact on the broader economy. Throughout the course, students will participate in a trading game to asses and manage real world factors such as counterparty risk, liquidity, leverage, etc.

Prerequisite: GFGB 6006.

GFGB 8004. Iss in Fin: Delevgd Finance. (1.5 Credits)

This course discusses the use of debt in Leverage Buyouts, recapitalization, restructuring and refinancing, including Debtor-in-Possession (DIP) financing. Students develop practical insights by utilizing case studies from several public highly leveraged firms; practical insights are critically reviewed.

Prerequisite: GFGB 6006.

GFGB 8005. Business Communication for Finance- A. (0.5 to 1 Credits)

Effective communication is the ability to convey your ideas in a logical and convincing manner in order to persuade others to take an action, modify their viewpoint, or at least be open to your perspective. This requires practice for many different situations, whether it is to promote an investment, prioritize your project, or convince your manager why you deserve a promotion. Simply being fluent in a language is not enough to communicate effectively. You must also know how to construct a compelling narrative to address the priorities, sensitivities, and concerns of your audience. As the world becomes more technical and data-driven, it is the ability to effectively communicate, verbally and in writing, which will be the differentiator to progress in your career. Teamwork, leadership, and management are all skills rooted in strong communications skills –again, just being able to speak a language in not enough to be an effective presenter, negotiator or salesperson. The only way to improve is through practice, so the course will be focused on student presentations on a varied set of topics, from current events to investment ideas.

GFGB 8006. Business Communication for Finance - B. (0.5 to 1 Credits)

This class will enable qualified students to more fluently converse with professionals on a variety of financial topics, and will improve students' ability to achieve success as they enter the business community.

GFGB 8009. Mergers and Acquisitions. (1.5 Credits)

Mergers and acquisitions constitute some of the most important growth, diversification, and globalization strategies for firms. Finance, specifically corporate finance, plays an important role in M&A because the completion of a deal requires careful attention to valuation, risk management, and the designing of an appropriate payment package. That design is an important part of a deal for reasons ranging from accounting and tax to synergies and stock price. In this course, students will examine these features through a number of cases and readings. We will also briefly discuss issues of corporate governance, securities law, and corporate law whenever the context requires us to do so.

Prerequisite: GFGB 6006.

GFGB 800A. Booms, Bubbles, Busts, and Crashes: A Capital Markets History. (1.5 Credits)

This course will prepare students to understand and anticipate regulatory and institutional changes in financial markets. Fintech and other technological changes are disrupting the financial markets in an unprecedented way—and will probably usher in new regulations. A good understanding of the market's institutional evolution, including the evolution of money, is essential to prepare for a successful career in the financial services industry.

Prerequisite: GFGB 6006.

GFGB 800B. Introduction in Wealth Management. (1.5 Credits)

This class is intended to demystify the wealth management process. Class lectures will be open-ended discussions with the goal of providing a better understanding of personal wealth and the business of wealth management by combining some aspects of financial planning and overall portfolio management.

GFGB 8010. Advanced Finan Modeling. (1.5 Credits)

Advanced Financial Modeling.

Prerequisite: GFGB 6006.

GFGB 8011. Blockchain. (1.5 Credits)

Blockchain.

Attribute: ABEP.

Prerequisite: GFGB 6006.

GFGB 8012. Digital Currencies. (1.5 Credits)

Digital Currencies.

Attribute: ABEP.

Prerequisite: GFGB 6006.

GFGB 8013. Acct & Corp Fin-Valua&Modeling. (1.5 Credits)

This course expands on valuation techniques discussed in Modern Financial Analysis and Valuation Techniques. Students will have the opportunity to learn the modeling techniques used by today's Wall Street practitioners associated with Discounted Cash Flow Analysis, Merger Analysis, Purchase Price Allocations and Synergy DCFs. COREQUISITE: GFGB 8001.

GFGB 8014. Empirical Value Investing - A. (1.5 Credits)

This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The "A-section" will examine several topics / methods. It is a pre-req for the "B-section," which will investigate the same issues more fully.

Prerequisite: GFGB 6006.

GFGB 8015. Empirical Value Investing - B. (1.5 Credits)

This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The "A-section" is a pre-req for the "B-section," which will investigate the same issues more fully.

Prerequisite: GFGB 6006.

GFGB 8016. Fintech: Disruption in Finan Services. (1.5 to 3 Credits)

The course is designed and built to ensure that students gain the knowledge and insight they need to understand the latest developments in Fintech and their disruptive impact on the global financial service industry. Upon completion of this course, students will develop a deeper understanding of business and economic aspects of financial services-based technologies; gain insight into financial ecosystems; understand the Fintech regulatory frameworks; and be able to critically evaluate the disruptiveness of Fintech innovations.

Prerequisite: GFGB 6006.

GFGB 8017. Fintech Lending & Payments. (3 Credits)

This course will consider modern on-line methods of lending and borrowing that may be outside of the traditional banking environment. The main players in the space will be analyzed, as well as their websites. Students will learn their business models, methods of credit analysis, and measures of return to investors.

Prerequisite: GFGB 6006.

GFGB 8018. Fund Strategies and Performance. (3 Credits)

This course examines how money is managed by organizations such as university endowments, pension funds, mutual funds, hedge funds, and private equity funds. It provides an advanced treatment of asset allocation and equity portfolio strategies, and a performance evaluation of U.S. mutual funds and hedge funds. The course provides a deeper understanding of the measurement of risk and its relationship to return, as well as of multi-factor models. Implementation issues, including statistical estimation, back-testing, portfolio construction, and performance evaluation, are covered. Some programming skill (likely Python/SAS) will be important, and partly taught.

Prerequisite: GFGB 6007.

GFGB 8951. Internship & Project Report. (1.5 to 6 Credits)

Residential students have the option of including up to 6 credits of internships as part of their program of study. Please note that an internship is not required as part of the program; students may complete any two MBA or MSGF courses in lieu of an internship.

GFGB 8999. Independent Study. (1 to 3 Credits)

Independent study.

Quantitative Finance Courses

QFGB 8900. Greenpoint/Finastra Project. (0 Credits)

The goal of this program is conceptual learning and hands-on research with real-life portfolios and enterprise systems, including the Finastra Capital Markets Fusion Platform. At the end of the program students are expected to have enriched their learning—and their CVs—with projects that have direct industry applicability and through achievements that will enhance their employment prospects and career growth. The research will include FRTB QIS on a portfolio, model sensitivity of PLA tests, impact of specific portfolio features, and risk parameters on FRTB SA and IMA charges.

QFGB 8901. Basics of Accounting. (1 to 3 Credits)

This course provides students with a basic understanding of the preparation and analysis of corporate financial statements. It also introduces generally accepted accounting principles (GAAP) and the standard-setting process, and students discuss current issues in the reporting process, such as the benefits and problems of the Sarbanes-Oxley Act.

QFGB 8902. Basics of Economics. (1 to 3 Credits)

Covers both microeconomics and macroeconomics. Microeconomics topics include theory of demand and the nature of profit and utility-maximizing market equilibrium that constitute the economic basis of finance theory and applications. The macroeconomics segment defines the major components of the economy, outlines a simple model of long-run, real economic behavior with competitive, market clearing prices, then establishes a companion model of short-run adjustments without flexible pricing.

QFGB 8903. Basics of Finance. (1 to 3 Credits)

Provides a conceptual framework for decision-making processes in many diverse areas of finance. Concepts including time value of money, stock and bond valuation, project and firm valuations, risk and return measures, portfolio management, basic CAPM and APT, diversification and hedging are reviewed. Basic theoretical aspects of corporate finance, such as dividend policy and capital structure, are also introduced.

QFGB 8905. Math for Quantitative Finance. (1.5 Credits)

Reviews the basics of mathematics in preparation for advanced courses in the MSQF program. Topics include: Special functions, Multivariate calculus, Optimization, Integration, Differential equations (ODE and PDEs), and Linear algebra.

QFGB 8906. Probability and Statistics. (1.5 Credits)

Reviews the basics of probability and statistics in preparation for advanced courses in the MSQF program. Topics include special distributions like binomial, poisson, normal, lognormal, gamma, beta, and fat-tailed distributions.

QFGB 890C. Cloud Computing and Finance Uses. (1 to 1.5 Credits)

This course introduces the core concepts of cloud computing, including networking, storage, database, access control, security, compliance, and pricing. Cases will be drawn from the finance industry. The course does not require prior programming or cloud computing experience. Students will create their own account on a cloud platform and gain some hands-on experience by provisioning a cloud service and working with it.

QFGB 890H. Advanced Machine Learning. (2 to 3 Credits)

The primary focus of this course is on developing computational models to identify/forecast economic regimes, factor-based smart beta, strategic risk budgeting, and trading decisions. The topics covered in this course will help students gain theoretical knowledge and practical skills to work with global financial firms across different asset classes. Students are required to be proficient in Python programming and have knowledge of basic data mining algorithms and techniques.

QFGB 890K. Python Bootcamp. (0 Credits)

The goal of this bootcamp and workshop is for the students to learn basic Python. The coverage includes Python programming environment, Python shell, Python IDE, Jupyter notebook, Python data types and complex type operations, Pandas data structure, I/O, and visualization.

QFGB 890M. Market Impact Model. (1 Credit)

Stochastic calculus and derivatives pricing courses must be completed prior to taking this demanding quantitative finance course. Market Impact Model is designed to provide students with a mathematical framework grounded in academic references to apply price impact models to quantitative trading and portfolio management. Automated trading is now the dominant form of trading across all frequencies. Furthermore, the rise of algorithmic trading introduces questions professionals must answer. For instance: How do stock prices react to a trading strategy? How can you scale a portfolio considering its trading costs and liquidity risk? How can you measure and improve trading algorithms while avoiding biases? Price impact models answer these novel questions at the forefront of quantitative finance. Using these models, students learn how to build a market simulator to back-test trading algorithms, implement closed-form strategies that optimize trading signals, measure liquidity risk and stress-test portfolios for fire sales, analyze algorithm performance controlling for common trading biases, and estimate price impact models using public trading tape.

QFGB 890N. Real Estate Capital Market Analysis. (3 Credits)

This course examines selected topics and issues related to real estate capital markets. Special emphasis will be placed on mortgage backed securities (MBSs) and real estate investment trusts (REITs). This class will be conducted using a lecture format. The topics include the primary mortgage market and secondary markets, the objectives and processes for designing, implementing, and servicing mortgage and asset backed securities, the tools used by the capital market for pricing and analyzing risks of MBSs, and the regulatory environment and trend of the securitization market.

QFGB 890P. AI in Asset Management. (1 Credit)

The objective of this course is to use AI or machine learning to evaluate complex financial contracts (often involving derivatives). To do that, we not only need to be able to use on-the-shelf libraries but also need to understand the underlying math and algorithms. In other words, we will "open the black box" of every method we use in this class. Derivations as well as good skills in Python or R are required for this course.

QFGB 890Q. Monte Carlo Simulations. (1 Credit)

This course introduces and develops methods and techniques for applying simulations and using them to solve a variety of problems in finance. Simulations are a powerful numerical technique that allow us to solve complex, otherwise difficult or intractable problems. Simulations also give us the ability to make predictions under given scenarios. This course will proceed linearly. First, we'll have a standard review of statistics and probability topics. Then we'll introduce a new simulation method or technique that will be applied to solve problems in quantitative finance. All applications will be done using Python programming language incorporating widely used Python packages in scientific computing and mathematical modeling.

Prerequisites: QFGB 8906 and QFGB 890K.

QFGB 890R. Machine Learning and LLMs. (2 Credits)

The goal of this course is to introduce students to the modern techniques of machine learning and their application to practical problems. Throughout the term, students will learn multiple classical and modern machine learning tools, their uses, limitations, and how the performance of each technique depends on the quantity and quality of the available training data. Special emphasis will be put on working with actual data sets, using proper methodology for model selection, and performance evaluation.

Prerequisites: QFGB 8905 and QFGB 890K.

QFGB 890S. Quantitative Asset Management Capstone Consulting Projects. (2 to 3 Credits)

The course bridges the gap between academics and practice by immersing students in the entire life cycle of real-world analytics engagements. Divided into small groups, students will work on pre-defined projects designed to boost your career with real-world experience and formulated to be completed within a single semester. This project-based course is structured as a consulting internship with actual companies, augmented with lectures to form a comprehensive framework based on the course textbook. Big data combined with machine learning and artificial intelligence provides amazing opportunities for institutional investors. Apply modern tools to investing with real-world details such as currency controls, market impact, and taxes. Study the entire investing process, from designing goals to planning, research, implementation, testing, and risk management. Use Python, MATLAB, and R to build alpha and risk engines, optimal multi-factor models, contextual nonlinear models, multi-period portfolio implementation, and more.

QFGB 8911. Financial Markets and Modeling. (2 Credits)

This course provides the foundation for developing skills in the quantitative analysis of financial decisions, primarily using R and Python. Topics include business planning, forecasting, sensitivity and scenario analyses, risk and return measures, portfolio analysis, binomial option pricing, and value-at-risk (VAR) analysis. It emphasizes practical skills to produce computer models that are useful for a variety of decision-making purposes.

Attribute: BUAN.

QFGB 8914. Derivatives. (2 Credits)

This course introduces deferred delivery (i.e., exchange-traded futures and OTC-traded forward) markets and option markets. The course covers the following: (1) briefly examines the institutional features of these markets; (2) discusses hedger, arbitrageur, and speculator strategies; (3) provides an analytical foundation for the pricing of these contracts; (4) reviews some of the available empirical evidence concerning these markets; and (5) uses the data to perform small-scale, suggestive tests of the theories and strategies.

QFGB 8915. Introduction to Stochastic Calculus. (2 Credits)

Focuses on the practical applications of stochastic differential equations subject to appropriate boundary conditions, solving valuation problems, and using measure-transformations as required in advanced financial engineering practice to value assets within a risk-neutral framework. Builds a theoretical foundation for continuous-time models that are essential for the pricing and hedging of financial derivatives.

QFGB 8923. Machine Learn & Econometrics. (2 Credits)

Covers estimation of parametric and non-parametric techniques commonly used in finance, applying high-frequency financial databases. Discusses properties of financial data, linear time series data analysis, basic theory of statistical inference with linear models, general linear models, conditional Heteroskedasticity models, nonlinear models and Bayesian inference and estimation.

Attribute: BUAN.

QFGB 8924. Advanced Derivatives. (2 Credits)

Designed to complement and extend the topics discussed in QFGB 8914, this course includes all types of derivatives for which a commodity, equity, or currency is the underlying asset. Hull's software and a Bloomberg/Reuters terminal are used for pricing options and gathering data. The data to perform small-scale, suggestive tests of theories and strategies is used.

QFGB 8925. Simulation Applications. (2 Credits)

Introduces state-of-the-art computational techniques essential for implementing financial models, pricing derivatives, obtaining numerical solutions to estimation problems, and simulating stochastic systems in risk management. Provides conceptual framework for gaining experience on simulation design and implementation using METLAB. This course builds a skill set that combines financial modeling, data analysis, and computation.

Attributes: ASDM, BUAN.

QFGB 8926. Finance Theory. (2 Credits)

This course introduces financial theory with a particular emphasis on portfolio choice and the fundamentals of asset pricing. Focuses on both the partial equilibrium theory (CAPM) and the general equilibrium theory (Arrow-Debreu Pricing Theory), with brief introductions on the arbitrage-based theories. The course introduces the basics of asymmetric information and how the problems it imposes can be mitigated via security design. It also emphasizes an understanding of the theories of Discrete-Time Asset Pricing, studies the application of the theory of stock options to real options and complex corporate liabilities, and explores the basic foundation of the GMM tests of asset-pricing theories.

QFGB 8928. Auto Trading Systems - Intro. (2 to 3 Credits)

This course discusses key issues involved in the design of an Auto (Algorithmic) Trading Systems, and provides hands-on experience. The end product is a prototype Auto Trading System designed by students that successfully trades in the real market (stock, futures, option) using live data feeds from exchanges. Issues covered include: typical structures of trading systems; efficient processing of live information; minimizing trade slippages; handling large number of securities; asynchronous information processing; GUI interfaces; etc. Industry experts are invited to discuss new developments. Key programming techniques will be reviewed at the beginning, very briefly. The course is suitable for students in MSGF, MSQF, and other master level students with programming skills equivalent to one formal course (e.g., R, Matlab, VBA, etc). Students with less programming skill may take the course if approved by instructor.

QFGB 8931. Fixed Income Securities. (2 Credits)

Introduces fixed-income securities, basic fixed-income concepts, the different sectors of the fixed-income market, and basic bond mathematics. Studies quantitative fixed-income analysis and its use in valuing bonds and quantifying risk-return characteristics. Involves extensive training in the mathematical formulation of bond valuation problems and in the use of the existing models and software to solve these problems.

QFGB 8933. Time Series Econometrics. (2 Credits)

This course introduces modern financial econometric techniques with a special focus on applications to finance. Both the theoretical framework for making statistical inference and exemplary applications using data in modern finance are emphasized. The course involves extensive use of commercial software packages, as well as implements new financial econometric techniques using high-level programming language, such as MATLAB.

Prerequisite: QFGB 8906.

QFGB 8934. Interest Rate Derivatives. (2 Credits)

Studies continuous time no-arbitrage models of yield curves and pricing of fixed-income securities and derivatives. In particular, treasury bonds as well as more complicated instruments, such as options on bonds, interest rate swaps, option on interest rate swaps, caps, floors, and Mortgage Backed Securities are priced and analyzed.

Prerequisite: QFGB 8915.

QFGB 8935. Risk Management. (2 Credits)

Builds strong understanding of the risks of individual products and methods of hedging and/or replication those products. Also examines firm-wide risk issues from a financial perspective which requires aggregation of multiple positions and consideration of interrelationships among asset price fluctuations. Regulatory and other non-market risk issues are considered and simulation techniques for modeling risk are practiced.

Attribute: ASDM.

QFGB 8943. Large-Scale Data Modeling. (2 Credits)

Explores financial modeling topics using large data sets and various econometric techniques applied in a variety of financial problems. Topics include modeling the yield curve in the US and other countries, application of pattern recognition techniques in developing stock-rating systems, factor models in portfolio construction, and portfolio performance evaluation. Emphasis on project analysis using SAS to process large data sets and develop appropriate models for solving real problems in equity and fixed-income research.

Attribute: BUAN.

QFGB 8944. Credit Risk Mgmt. (2 to 3 Credits)

Introduces modern credit risk models with particular focus on credit derivative instruments. Focuses on derivative market methods, rather than accounting analyses of business risks. Exposes students to institutional practices and commonly used data. Students will be expected to thoroughly understand professional software output, along with the risks and rewards of credit product strategies.

QFGB 8946. Financial Programming. (2 Credits)

This course uses C++ to solve finance problems. Two types of students will take this course. One type is the student with a strong computer programming background (perhaps an engineering undergraduate), but who has not taken C++ or applied it to finance problems. The other type may have been a finance undergraduate student who had little computer programming experience before entering the MSQF program. The latter student must take the spring introduction to C++ course offered by the computer science department before taking this course in their second fall term.

QFGB 8948. Quantitative Methods for Portfolio Management. (2 to 3 Credits)
