**Advent Diamond** – is changing the way the world thinks about electronics through the commercialization of diamond as the next-generation of semiconductor. Using lab-grown, single-crystal, high-quality diamond – both doped and undoped – fabricate high-reliability diamond devices

**B H S-** Over the past decades, our focus has always been to provide integrated logistics solutions. With more than 40 years of handling and transporting sensitive equipment in the semiconductor sector, BHS has the expertise to ensure that your shipment will be delivered safely and on time.

**Brilliant** -provides and integrates the Network Communication System and Automation Technology to our clients the innovative productivity and solutions. To advance our clients' productivity effectively, also increase the return on capital and operating performance. Brilliant has taken the missions above as our vision and value since we were found.

**Crest Technologies** – Design, development and maintenance of industrial machinery and production facilities, after-sales services for general electric equipment, proposal, improvement, and sales of maintenance parts for leading manufacturers of semiconductor and FPD production equipment, electronic information-processing devices, machine tools for automobiles, and home appliances.

**EpiFinder** – provides software to doctors to help diagnose epilepsy syndromes. The software uses machine learning and artificial intelligence algorithms to help ensure more accurate diagnoses and treatments

**Inergy Systems** – High-tech company in the energy smart grid market. Designs and manufactures fully integrated energy engagement and power control systems which provide real-time meter precision monitoring, load scheduling and peak demand reduction.

**Integrity Services** – Offers a variety of design and consulting services, program and project management, and expert field verification services for utility and engineering companies.

**Life365** – Telehealth and remote care management solution provider. Their digital health platform includes solutions for patients with various conditions where remote patient monitoring and active self-management will result in better health outcomes.

**Massively Parallel Technologies** – delivers high-performance computing through Virtual Power Centers, Internet-based hubs designed for specific computationally intense applications that can outperform most mainframes and supercomputers for a fraction of the cost.

**OraVu** – provides an alternative to definitively treat periodontal disease, defining a new gold standard! The DeVA-1™ microendoscopic system with MicroRinse™ technology gives clinicians the tools to non-surgically provide a visual deep cleaning (Visual-SRPSM) to remove the disease-causing bacterial calculus.

**Parent Projects** – connecting family, friends & professional Advocates of the Aged™ to “verified” senior-focused resources supported by timely and relevant content that safeguards dignity and privacy for all involved.

**Painted Desert Energy (PDE)** is a mission-driven utility-scale solar developer focused on Turning Power into Positive Energy. PDE experts have the experience and expertise to take a project from Conception to Electrification. Because PDE has a team of experts that understand, and have completed, projects all along their, typically, 2-year development...we can pick up a project anywhere along the path to completion and take it to the finish line.

**REITIUM** is the simple and secure way to get started with real estate investing. Our streamlined technology is easy for beginners, yet powerful enough for experienced investors. REITIUM is a technology platform powered by NFT's and Blockchain and has a goal to drive financial inclusion; starting with Canada and expanding to the U.S. in 2023.
