**Can Implicit Gender Bias Influence Female Faculty Advancement in Communication Sciences and Disorders?**

Nicole Rogus-Pulia, PhD, CCC-SLP  
University of Wisconsin-Madison  
William S. Middleton Memorial Veterans Hospital

Despite a predominance of women in Communication Sciences and Disorders (CSD), men receive doctoral degrees, tenure, academic leadership positions, and ASHA awards at disproportionately higher rates than women. The purpose of this session is to explore how implicit gender bias may impact female faculty advancement and contribute to current and projected faculty workforce shortages, and to propose practical, evidence-based solutions.
