An engraving of Orion from Johann Bayer's Uranometria, 1603 (US Naval Observatory Library). In Greek mythology, Orion (/əˈrɪəriən/; Ancient Greek: Ὠρίων or Ὠρῖων; Latin:...

Karen Solie - Poem: 'Orion'
Irb.co.uk
Smoking in the yard two weeks before Christmas out of the wind, under Orion, inhaling anger, exhaling sorrow, which is how anger metabolises, the end product always a sorrow of remorse or failure. I would give this anger to Orion, whom I've only recently learned to identify, forever on his back foot, his stories go from bad to worse, and the benzen..

Orion (constellation)
Constellation straddling the celestial equator
Orion is a prominent set of stars visible during winter in the northern celestial hemisphere. It is one of the 88 modern constellations; it was among the 48 constellations listed by the 2nd-century astronomer Ptolemy. It is named after a hunter in Greek mythology. Orion is most prominent during winter evenings in the Northern Hemisphere, as are five other constellations that have stars in the Winter Hexagon asterism. Orion's two brightest stars, Rigel (β) and Betelgeuse (α), are both among the brightest stars in the night sky; both are supergiants and slightly variable. There are a further six stars brighter than magnitude 3.0, including three making the short straight line of the Orion's Belt asterism. Orion also hosts the radiant of the annual Orionids, the strongest meteor shower associated with Halley's...
