

# UC DAVIS

---

**General Catalog  
1998-99**

## From the Chancellor

Welcome to UC Davis. We're delighted you've chosen the Davis campus as the place to pursue your academic goals. All of us—faculty, staff and administrators—are committed to helping you toward their successful attainment.

In the time you spend at UC Davis, you will acquire knowledge and skills that will help you shape the rest of your life. You will make lifelong friends and have experiences that will determine the direction of your growth as a human being and as a member of the larger community in which you live. For that to happen there must be a partnership among many individuals working together to ensure the most intellectually stimulating, technologically sophisticated and culturally rich environment. That partnership includes you, the student. Your energy and vision are the catalysts that energize and inspire each of us to help make your time at UC Davis challenging, meaningful—and, yes—fun.

We are very proud of UC Davis. Long renowned for its agricultural and veterinary science programs, in recent years we have attained international stature for our programs in engineering, biological sciences, the humanities and the social sciences. Members of our faculty have won MacArthur genius grants, Pulitzer prizes, Fulbright scholarships and election to the nation's top academies of the arts and sciences. UC Davis is a member of the prestigious Association of American Universities, a select group of 62 institutions of higher learning whose membership is by invitation only. Our alumni have made significant and lasting contributions to society as leaders in government, business, technology, media and the arts. And our students—the cream of California's crop—consistently persist and graduate at the highest rates among the University of California campuses.

UC Davis' character has been built through decades of commitment to a unique core of values and principles. We are using our talents and ingenuity to continue working toward a community that honors our diversity as individuals and reflects our belief in a shared set of values. I'm happy you're about to join our community. Congratulations on becoming an Aggie!

Larry N. Vanderhoef  
Chancellor

## CONTENTS

### Address Directory/4

### Academic Calendar/5

### Degrees Offered by UC Davis/6

### Minor Programs Offered by UC Davis/8

### Introduction/9

The University of California and UC Davis, 10  
 Visiting the Campus, 11  
 Principles of Community, 12  
 Undergraduate Colleges, 13  
 Graduate and Professional Study, 14

**Summer Sessions I and II, 1999**

**June 28–August 6, 1999, and August 9–September 17, 1999**

**Financial Aid Deadlines**

Filing period for grants, loans, work-study and California Student Aid awards for **1999-2000: January 1-March 2, 1999**

\* Dates are subject to change and should be checked with appropriate *Class Schedule and Room Directory*.

\*\* **RSVP** (Register Students Via Phone) is the UC Davis telephone registration system.

† For students graduating September 1999, the filing period is May 25–July 2.

‡ For students graduating September 1999, the deadline to file a minor program with Dean's Office is July 2.

§ Law—May 22; Medicine—June 11; Graduate Studies—June 17; Veterinary Medicine—June 18; Engineering—June 18; Management—June 19; Agricultural and Environmental Sciences—June 19; Biological Sciences—June 19; Letters and Science—June 20.

## DEGREES OFFERED BY UC DAVIS

Undergraduate majors are administered by the colleges of Agricultural and Environmental Sciences (A&ES), Letters and Science (L&S) and Engineering. Professional studies are administered by the schools indicated. All graduate programs are administered by Graduate Studies. The list below indicates the major or discipline, the degree(s) offered and the school or college offering the major.

Degrees offered: A.B.—Bachelor of Arts, B.S.—Bachelor of Science, M.A.—Master of Arts, M.A.M.—Master of Agricultural Management, M.A.T.—Master of Arts in Teaching, M.B.A.—Master of Business Administration, M.Ed.—Master of Education, M.Engr.—Master of Engineering, M.F.A.—Master of Fine Arts, M.P.V.M.—Master of Preventive Veterinary Medicine, M.S.—Master of Science, Ed.D.—Doctorate in Education, D. Engr.—Doctor of Engineering, Ph.D.—Doctor of Philosophy, J.D.—Doctor of Law, LL.M.—Master of Laws, M.D.—Doctor of Medicine, D.V.M.—Doctor of Veterinary Medicine;  
\*=closed to new students.

## MINOR PROGRAMS OFFERED BY UC DAVIS

Minor programs are offered by both the College of Agricultural and Environmental Sciences (A&ES) and the College of Letters and Science (L&S). The College of Engineering does not offer any minors. The list below indicates the minor program, the offering department (if the department name is different than the name of the minor) and the college offering the minor.

|                                                                                        |                                                                                                                                     |

## Small town. Big school.

**W**ELCOME TO THE University of California, Davis. Set between the Coast Range to the west and the towering Sierra Nevada to the east in the heart of California's Central Valley, UC Davis is close to the thriving and vibrant state capital and the San Francisco Bay Area but cherishes its small-town culture and security. Nearly everyone—students, faculty, administrators, staff—lives near campus, close enough to ride a bicycle to class or work, close enough to walk to town for dinner and a movie. Our students come from every California county, all 50 states and 111 foreign countries, creating a diverse cultural and intellectual community that enriches us all.

The campus's reputation has attracted a distinguished faculty of scholars and scientists in all fields. UC Davis faculty rank 16th in quality among comprehensive public universities nationwide, according to a multi-year study of U.S. doctoral programs reported in 1995 by the National Research Council. Creative teaching and academic innovation are encouraged by several programs, including the \$30,000 Prize for Teaching and Scholarly Achievement, believed to be the largest award of its kind in the country. And UC Davis undergraduate students persist and graduate at the highest rates among UC campuses.

### **The University of California**

UC DAVIS IS ONE of nine campuses of the University of California, which was chartered as a land grant college in 1868 and now constitutes the pre-eminent system of public higher education in the country. Together, the nine campuses have an enrollment of more than 157,000 students, 90 percent of them California residents. Some 150 laboratories, extension centers, research and field stations strengthen teaching and research while providing public service to Califor-

nia and the nation. The collections of the more than 100 UC campus libraries are surpassed in size in the United States only by that of the Library of Congress.

Founded in 1905 as the University Farm, where students from the first UC campus in Berkeley learned the latest in agricultural methods and technology, UC Davis today offers a full range of undergraduate and graduate programs, along with professional schools of law, management, medicine and veterinary medicine. Our agricultural roots are still honored, however, in our nickname—the “Cal Aggies.”

UC Davis is the largest of the nine University of California campuses, with 5,200 acres, second in total expenditures and third in enrollment. UC Davis stands 22nd in research funding among universities in the United States, according to the most recent information from the National Science Foundation. For the third consecutive year, *U.S. News & World Report* ranked UC Davis among the top 10 public universities nationally.

UC Davis is one of only 62 universities admitted to the prestigious Association of American Universities.

The Davis campus has undergraduate colleges of Agricultural and Environmental Sciences, Engineering and Letters and Science. Undergraduate enrollment is more than 19,000 students. Graduate Studies administers graduate study and research in all schools and colleges. Professional studies are carried out in the schools of law, management, medicine and veterinary medicine; more than 5,100 students are engaged in graduate or professional study. Located off-campus are numerous labora-

ories, extension centers and facilities, including the UC Davis Medical Center in Sacramento, the Veterinary Medicine Teaching and Research Center in Tulare, Bodega Marine Laboratory at Bodega Bay, the College of Engineering's Applied Science Department at Livermore, and the UC Davis Washington Center in Washington, D.C.

### A Small-Town Setting

DAVIS IS SURROUNDED by open space—including some of the most valuable agricultural land in the state. Outdoor sports enthusiasts will find many beautiful recreational areas within a 70-mile drive from campus: the American River, Clear Lake, Lake Berryessa, the Napa and Sonoma valleys and the historic Mother Lode country. The Sierra Nevada, Lake Tahoe ski resorts and coastal areas of Mendocino and Monterey are about 150 miles from Davis.

If you prefer city life, Sacramento, the state capital, is 15 miles to the east, and San Francisco is just 72 miles to the southwest. Both cities offer music, the ballet, professional sports, theater and other entertainment.

For long-distance travel, Davis has a Greyhound bus terminal and an Amtrak station. If you travel by plane, the Sacramento Metropolitan Airport is an easy 20-minute drive from downtown Davis. Within Davis, bicycles are a favorite mode of transportation. The terrain is flat and 50 miles of bike paths crisscross the city. With more bicycles per capita than any other city in the nation, Davis has earned the title "City of Bicycles."

Winters in Davis are generally mild. It rarely snows, but you should get good use from your rainwear. Summers are sunny, hot and dry. Although on some days the thermometer can exceed 100 degrees, summer days are usually in the low 90s, with overnight temperatures in the 60s. Spring and fall weather is some of the most pleasant in the state.

### The City of Davis

ECOLOGICALLY AWARE and socially innovative, Davis has a small-town friendliness and spirit of volunteerism that distinguish it from cities of similar size. Residents are active in local, national and international political causes, in the arts, and in community organizations ranging from Little League to the Rotary Club.

Students compose a large portion of the city's population of 53,000, making Davis one of the state's few remaining college towns. You'll find an abundance of bookshops, coffee houses and restaurants catering to students in the bustling downtown area adjacent to campus.

Though closely linked to the university, the city maintains a strong identity of its own. The Davis Art Center,

Davis Comic Opera Company, Davis Musical Theatre Company and several local galleries provide creative outlets for people in the community and supplement the cultural events presented by the university.

The city has long recognized the importance of open space in maintaining its small-town atmosphere and has created 31 city parks offering a variety of attractions: tennis courts, playgrounds, swimming pools, playing fields and even a skateboard facility.

### Campus Life

LIKE THE CITY of Davis, the campus has a relaxed atmosphere, with plenty of open space, trees and lawns. Even as the student population grows, the campus continues to maintain its informal, friendly ambience.

Underlying the casual style of Davis students, however, are a fundamental seriousness and a dedication to academic excellence. Davis students do study hard. After your studying is done, however, you can relax at a movie, public lecture, dance recital or concert. For the energetic, intercollegiate sports, club sports and one of the largest intramural programs in the country offer athletics for fun or competition. UC Davis' reputation for producing outstanding student athletes was reinforced this past spring when the men's basketball team won the National Collegiate Athletic Association Division II championship—just one of several sports in which Aggies excel.

Davis welcomes the exchange of opinions and ideas and is committed to advancing the diversity of its students, faculty, staff and administrators. UC Davis' commitment to a learning environment characterized by mutual respect and understanding is reflected in the "Principles of Community," reprinted on the next page.

## VISITING THE CAMPUS

Information:  
Visitor Services Office  
Buehler Alumni and Visitors Center  
530-752-8111

YOU ARE WELCOME to pay us a visit. Weekend tours depart from the Buehler Alumni and Visitors Center at 11:30 a.m. and 1:30 p.m. No appointment is necessary. For weekday individual or group campus tours, contact the Visitor Services Office at least one week in advance. If you have questions about application procedures or entrance requirements, write or visit Undergraduate Admissions and Outreach Services in Mrak Hall.

## University of California, Davis

# Principles of Community

**T**HE UNIVERSITY OF CALIFORNIA, DAVIS, is first and foremost an institution of learning and teaching, committed to serving the needs of society. Our campus community reflects and is a part of a society comprising all races, creeds, and social circumstances. The successful conduct of the University's affairs requires that every member of the University community acknowledge and practice the following basic principles:

**W**E AFFIRM THE DIGNITY inherent in all of us, and we strive to maintain a climate of justice marked by respect for each other. We acknowledge that our society carries within it historical and deep-rooted misunderstandings and biases, and therefore we will endeavor to foster mutual understanding among the many parts of our whole.

**W**E AFFIRM THE RIGHT of freedom of expression within our community and also affirm our commitment to the highest standards of civility and decency towards all. We recognize the right of every individual to think and speak as dictated by personal belief, to express any idea, and to disagree with or counter another's point of view, limited only by University regulations governing time, place, and manner. We promote open expression of our individuality and our diversity within the bounds of courtesy, sensitivity, and respect.

**W**E CONFRONT AND REJECT all manifestations of discrimination, including those based on race, ethnicity, gender, age, disability, sexual orientation, religious or political beliefs, status within or outside the University, or any of the other differences among people which have been excuses for misunderstanding, dissension, or hatred. We recognize and cherish the richness contributed to our lives by our diversity. We take pride in our various achievements, and we celebrate our differences.

**W**E RECOGNIZE that each of us has an obligation to the community of which we have chosen to be a part. We will strive to build a true community of spirit and purpose based on mutual respect and caring.

The "Principles of Community" were prepared and adopted after extensive discussion within the campus community about the need for a statement that reflects UC Davis' commitment to a learning environment characterized by diversity, understanding and the acceptance of all people. This statement of common principles was published on April 20, 1990, carrying the endorsement of Chancellor Theodore L. Hullar and the leadership of the Davis Division of the Academic Senate, the Academic Staff Organization, the UCD Staff Assembly, the UCDCM Staff Assembly, the Associated Students of UC Davis (ASUCD), and the Graduate Student Association.

## THE UNDERGRADUATE COLLEGES

### The College of Agricultural and Environmental Sciences

Information:  
College Office  
228 Mrak Hall  
530-752-0108; <http://www.aes.ucdavis.edu>

The College of Agricultural and Environmental Sciences offers a diverse program of majors and courses and is committed to education that emphasizes a spirit of discovery. Based on the premise that tomorrow's citizens will need to anticipate, understand and solve emerging societal problems and contribute to the discovery and application of new knowledge, the college fosters:

- critical thinking and an appreciation for diversity in thought and approaches to problem solving
- an ethos of lifelong learning—of teaching oneself and others while confronting challenges and solving problems
- an ability to move beyond either/or thinking and to pursue innovative and integrative understanding of the biological, social and physical sciences
- intellectual skills that prepare individuals to secure a life-affirming physical and cultural environment based on sound, respectful management of resources
- a commitment to serve the public with informed and open-minded dedication to understanding, critiquing and addressing complex societal needs and interests

The college is proud of its rich agricultural history. From this foundation, it has expanded its educational offerings to encompass programs that highlight interconnections among the environment, plant and animal biology, and human health and well-being. Through a wide array of major programs, the college prepares high-potential students for advanced studies in diverse disciplines and leadership in such arenas as public policy; research and development; managerial and natural resource economics; agricultural systems; environmental protection, safety and design; human nutrition, health and development; and the food, fiber, textile and apparel industries.

Undergraduate students enjoy early contact with faculty advisers, graduate students and postgraduate researchers, enriching and broadening the educational experience of all.

Several levels of academic advising are available that are designed to enhance your undergraduate experience. Advisers help you plan your courses, meet degree requirements and take maximum advantage of the resources available at UC Davis. You are encouraged to meet regularly with your assigned faculty adviser and with the Advising Associates and departmental peer advisers. Through a shared commitment to education

for service to society, college faculty, staff and students work together to improve the relationship between humanity and the natural world.

### The College of Engineering

Information:  
Dean's Office  
1050 Engineering II  
530-752-0557; <http://www.engr.ucdavis.edu>

The College of Engineering is the largest undergraduate engineering college in the University of California system, with an undergraduate enrollment of approximately 2,500 and graduate enrollment of 700. The college offers both a friendly atmosphere and the varied academic programs in basic sciences and engineering that have made UC Davis engineering graduates highly valued in private practice and research. The college has seven departments; each has outstanding programs of instruction.

- The **Department of Applied Science** instructs engineering graduate students in broad areas of scientific technology.
- The **Department of Biological and Agricultural Engineering** combines study in engineering with instruction in the biological processes used to solve challenging environmental and technical problems.
- The **Department of Chemical Engineering and Materials Science** offers curricula integrating knowledge of chemistry, biological sciences or materials science engineering that enable students to solve problems in both current and future manufacturing technologies or to analyze the structure, properties and behaviors of materials.
- The **Department of Civil and Environmental Engineering** educates students to plan and design systems that have a direct impact on health and human productivity and on the quality of human life.
- The **Department of Computer Science** offers programs in all aspects of design and use of computer hardware and software systems. The department also plays a significant service role for programs throughout the campus.
- The **Department of Electrical and Computer Engineering** offers programs in research and education crucial for the continued success of high technology industries in California and the nation, preparing students to design, analyze and use electronic and computer systems effectively.
- The **Department of Mechanical and Aeronautical Engineering** educates students in the design and manufacture of complex engineering systems for transport, industry or energy and to design, manufacture and operate aircraft and aeronautical structures.

Every effort has been made to provide engineering students with the maximum flexibility consistent with rigorous professional education standards. The key to flexibility is academic advising. As an incoming student, you will be given the name and office hours of your departmental staff adviser; you should arrange an appointment as soon as you arrive on campus. A well-developed peer advising system supplements the departmental advisers.

Undergraduate education in engineering at UC Davis serves as a sound basis for beginning professional prac-

tice in engineering design and development, as a preparation for careers in corporate or governmental operations or as a foundation for graduate study. To these ends, the college emphasizes fundamental sciences to give students the maximum postgraduate flexibility. Technological developments in recent years have made it clear that engineering education must be based on fundamentals or rapidly become obsolete.

Engineers will continue to face new challenges as society demands improvements in the quality of life, and as our state and nation demand greater participation by engineers in efforts toward competitiveness in a global market. As a unit in a land-grant institution, the UC Davis College of Engineering must help maintain the technological leadership long enjoyed by the United States, while advancing technology for the benefit of all.

### The College of Letters and Science

Information:  
Office of the Deans  
200 Social Sciences and Humanities Building  
530-752-0392; <http://www-lsdo.ucdavis.edu>

The College of Letters and Science provides students with the opportunity to actively engage the central academic disciplines of the university. The largest of the three undergraduate colleges at UC Davis, the College of Letters and Science offers the majority of the campus's general education courses, more than 50 major programs of study and thousands of courses per year across a broad range of subject areas. Its nearly 500 faculty members are organized into three Divisions—Humanities, Arts and Cultural Studies; Mathematical and Physical Sciences; and Social Sciences—and the affiliated intercollege Division of Biological Sciences. The college confers Bachelor of Arts (A.B.), Bachelor of Science (B.S.) and Bachelor of Arts and Science (B.A.S.) degrees.

The College of Letters and Science is a community of scholars and students sharing a commitment to liberal education rather than to specialized, vocationally oriented training. The college exposes you to the worlds of human experience, of ideas, of artistic accomplishments and of matter and things. Within this curriculum you are able to explore a variety of academic fields, engage

in the pursuit of fundamental knowledge, and gain the capacity for independent study and thought. By learning to think carefully and critically, you will be able to continue the ongoing process of education that begins in the classroom but continues over a lifetime. You will have learned how to learn—the ultimate objective of a liberal arts education.

The educational goals of the college are reflected in the three primary groups of requirements established by the faculty: the English Composition Requirement, the Foreign Language and Area Requirements and the Major Requirements.

The **English Composition Requirement** ensures that you are well versed in the skills of written communication.

The **Foreign Language and Area Requirements** provide you with a broad background of knowledge, guide you in an exploration of the interdependencies of knowledge and acquaint you with other cultures.

The **Major Requirements** provide you with intellectual depth and competence in a selected area of study.

The college has a well-developed system of faculty advisers, student peer advisers and professional staff advisers who are available for individual consultations with undergraduates in a variety of settings, from the deans' office to departmental offices to campus residence halls.

The strength of the college lies in the faculty's commitment to advancing the frontiers of human knowledge through research, artistic expression and other creative endeavors, and to the effective communication and application of that knowledge through teaching and public service. Together, faculty and students in the College of Letters and Science create a climate that enables students to achieve their highest potential.

### GRADUATE STUDY

Information:  
Office of Graduate Studies  
250 Mrak Hall  
530-752-0650;  
<http://pubweb.ucdavis.edu/documents/gradstudies/homepage.htm>

Graduate students at UC Davis have the the opportunity to work with and learn from accomplished faculty, recognized for their contributions to research in their fields. The Office of Graduate Studies oversees more than 70 graduate programs leading to master's or doctoral degrees, which together enroll more than 2,800 graduate students. Many of Graduate Studies' programs are offered through graduate groups, an interdisciplinary concept that allows students to study and work in inter-related areas to broaden their intellectual experiences. See the Graduate Studies chapter.

### PROFESSIONAL STUDY

UC Davis has three professional schools—the School of Law (J.D.), the School of Medicine (M.D.) and the School of Veterinary Medicine (D.V.M., M.P.V.M.)—and the Graduate School of Management offers the M.B.A. degree. These schools and programs are described in later chapters.

## ACADEMIC RESOURCES

### The University Library

Information:

530-752-6561; <http://www.lib.ucdavis.edu>

The General Library at UC Davis is one of the premier research libraries in North America. In addition to Peter J. Shields Library, there are four other General Library facilities: the Physical Sciences Library, the Loren D. Carlson Health Sciences Library, the Agricultural and Resource Economics Library and the Medical Center Library in Sacramento. The combined collections of the various General Library facilities total more than 2.6 million volumes, and more than 41,000 periodical and journal titles are received annually. An extensive variety of government documents, maps, microfilms and CD-ROMs are also part of the collection.

Shields Library houses the collections in the humanities, arts, social sciences, biological sciences, agricultural sciences, mathematics and computer science. The Physical Sciences Library collections support teaching and research in engineering, chemistry, geology and physics. The Carlson Health Sciences Library serves the Schools of Medicine and Veterinary Medicine. The library at the UC Davis Medical Center provides a clinical collection of 25,000 volumes. A law library, administered by the School of Law, is located in King Hall.

The MELVYL® System, an online catalog of books and journals, can be used to access the collections of UC Davis and the other eight UC campuses. The MELVYL System can be searched in the libraries, at campus computer laboratories, and remotely with a modem and on the Internet. The libraries also offer access to databases and numerous other electronic resources, both on site and via UCD Network. Terminals with Internet access are available for patron use in all of our facilities.

Information about library services, new full text electronic databases, important subject-specific World Wide Web sites and a current schedule of free library classes on the use of MELVYL and the Internet is available at the library's Web site. Librarians are also available for consultation on resources for research projects.

### UC Davis Arboretum

Information:

Arboretum Headquarters

530-752-2498; <http://arboretum.ucdavis.edu>

The 95-acre UC Davis Arboretum, located along Putah Creek's historic north fork, maintains a documented collection of more than 4,000 different kinds of trees, shrubs and perennials for use in teaching and research. Outstanding plant collections include the Shields Oak Grove, the Mary Wattis Brown Garden of California native plants, the Ruth Storer Garden of flowering perennials and small shrubs, and the T. Elliot Weier Redwood Grove. The arboretum program of seed exchange, international in reputation, serves to distribute California native plants throughout the world and has provided the university with numerous exotic plant specimens. Internships are available in nursery management, landscape design and maintenance, environmental education, conservation biology, Integrated Pest Management (IPM) and Geographic Information Systems (GIS).

### Information Technology

Information:

I.T. Express

First Floor, Shields Library

530-754-HELP (754-4357); [ithelp@ucdavis.edu](mailto:ithelp@ucdavis.edu);

<http://it.ucdavis.edu>

The Division of Information Technology (I.T.) provides computing, communications and media resources and services in support of research and instruction. The Network 21 project is installing a high-speed fiber-optic infrastructure that will enable UC Davis to participate in Internet 2, which will connect research institutions across the nation.

Every UC Davis student is issued a free campus e-mail account, which is required for many computing services, including use of computer classrooms. Computer classrooms provide access to the Internet and a range of software programs in use in UC Davis courses. Classrooms are available on a drop-in basis when not being used for instruction (TB 114 is reserved solely for drop-in use). Multimedia labs provide access to media production and editing equipment.

At I.T. Express, you can activate your e-mail account, consult with staff about the various information technologies used at UC Davis, make use of copy services, and pick up publications on computing and information technology.

I.T. Training offers free computer workshops, technology presentations, self-paced technology training materials on topics ranging from word processing and databases to desktop publishing, and on-line training materials. Creative Communications Services offers audio-visual equipment loan; photographic, digital imaging, and graphic services; and copy services. The Center for Advanced Information Technology will help you evaluate computer systems and software.

Students who have their own computers may purchase Bovine Online, a comprehensive Internet software package, at the UCD Bookstore or I.T. Express, or download the programs for free. UC Davis contracts with a number of software vendors to make widely used programs available to all UC Davis affiliates at minimal or no cost.

ResNet, the residence hall computer network, will extend to all UC Davis residence halls in 1998-99 and allow residents with computers to connect directly to the campus network. Students living off campus need a modem to access the campus network. The campus modem bank can provide only limited access, so some students opt to connect via an Internet Service Provider.

Information about I.T.'s many services, including computer classroom locations and hours, IT Express hours, training classes and materials, is available at I.T.'s extensive Web site.

## RESEARCH PROGRAMS AND RESOURCES

### Organized Research Units

Organized Research Units (ORUs) are campuswide interdisciplinary research programs that further the university's missions of teaching, research and public service, but do not offer courses of instruction. Members of an ORU come from more than one department and normally from more than one school, college or division.

### Agricultural History Center

Information:  
5202 Social Sciences and Humanities Building  
530-752-1827

The center coordinates and administers several research and publication programs that further the study of agricultural and natural-resource history. Research activities include studies of comparative farm policy, migration and agricultural development, the history of farm land values, the agricultural-environmental border, rural international borderlands in the Americas, the causes and consequences of agricultural mechanization and other sources of productivity improvements in the 19th and 20th centuries, and the impact of scientific research.

### Bodega Marine Laboratory and Reserve

Information:  
Bodega Marine Laboratory  
P.O. Box 247  
Bodega Bay, CA 94923  
707-875-2211; 707-875-2089 (fax); [ucdbml@ucdavis.edu](mailto:ucdbml@ucdavis.edu);  
<http://www-bml.ucdavis.edu>

The Bodega Marine Laboratory is dedicated to research and teaching in marine biology and related fields. Research areas include population biology/ecology, cell and developmental biology, and aquaculture and fisheries. Well-equipped facilities feature running seawater in two classrooms and most laboratories, a marine science library, lecture hall, housing facilities, greenhouses, experimental freshwater system for anadromous fish studies, and a dive locker and air station. Faculty teach a number of undergraduate courses during the acade-

mic year and summer session. The laboratory is located in Bodega Bay, Sonoma County, 100 miles west of Davis.

The Bodega Marine Reserve, part of the UC Natural Reserve System, is 362 acres of remarkably diverse habitats, including an excellent rocky intertidal zone, sand beaches, saltmarsh, lagoon tidal flats, freshwater marsh, coastal prairie and dunes. The reserve also administers adjacent subtidal sand and rock habitats in a marine life refuge. Areas of research include a broad spectrum of field studies of plants and animals in coastal marine, intertidal and terrestrial ecosystems.

### California Regional Primate Research Center (CRPRC)

Information:  
Primate Center  
530-752-0447;  
<http://www.crprc.ucdavis.edu/crprc/homepage.html>

The California Regional Primate Research Center investigates selected human health problems for which the nonhuman primate is the animal model of choice. Research programs include behavioral and neurobiology, developmental and reproductive biology, respiratory diseases, virology and immunology, genetics and a variety of biomedical collaborative research projects. Self-sustaining breeding colonies of macaques, squirrel and titi monkeys are available for study of spontaneously occurring disorders.

### Center for Geotechnical Modeling

Information:  
119 Everson Hall  
530-752-6986; <http://www.engr.ucdavis.edu/~cgm/>

At the Center for Geotechnical Modeling, students and faculty from several departments and other universities conduct research in physical and numerical modeling of geotechnical problems. The center operates two centrifuges, including the 9-m radius, 4,500-kg payload National Geotechnical Centrifuge. These centrifuges are used to study a variety of topics, including the effect of earthquakes on earth structures, toxic waste transport in groundwater, and deformations of foundations of bridges and large buildings.

---

*Television news reporters covered the story when UC Davis researchers uncovered the genetic origins of Cabernet Sauvignon.*

---

### **Center for Image Processing and Integrated Computing**

Information:

Bernd Hamann and David Rocke  
530-752-2387; 530-752-8894 (fax);  
<http://info.cipic.ucdavis.edu>

The Center for Image Processing and Integrated Computing focuses on data analysis, visualization, computer graphics, optimization, and electronic imaging. The central emphasis is the investigation of techniques for the study of large-scale, multi-dimensional data sets. These techniques may be applied to the analysis and visualization of environmental, geophysical, astrophysical, biological, fluid flow, and satellite data. The center seeks to solve complex data analysis and visualization problems in a cross-disciplinary environment, working with researchers in academia, national research laboratories and industry.

### **Crocker Nuclear Laboratory**

Information:

Crocker Nuclear Laboratory  
530-752-1460

This facility is an interdepartmental laboratory for the application of nuclear science to a variety of disciplines. The laboratory has research programs in nuclear physics and chemistry, air pollution analysis, use of pulsed ultraviolet light as an alternative to pesticides and insecticides, biology, material damage studies, the effect of background radiation on computers, and historical studies. Isotopes produced by the variable-energy 76-inch cyclotron are used in clinical and research applications, including pioneering work in brain imaging.

### **Institute of Governmental Affairs**

Information:

Shields Library  
530-752-2042; <http://polar.ucdavis.edu/igahome.html>

The Institute of Governmental Affairs (IGA) serves as a research base for social science faculty in eight departments on campus and for visiting scholars from throughout the world. IGA houses five formal research programs: Center for State and Local Taxation; Joint Center for International and Security Studies; Program on Immigration, Population and the Economy; Program on Pacific Rim Business and Development; Program on Telecommunications Policy; and the Undergraduate Fellows Research Program. The institute provides specialized services, including grant advising, preparation and administration; academic program development; library and data services; social science computing, programming and statistical consulting; seminar, workshop and conference organization. IGA enhances the education of undergraduate and graduate students by providing research opportunities and by exposure to its public affairs programs.

### **Institute of Theoretical Dynamics**

Information:

2201 Academic Surge Building  
530-752-0938; [info@itd.ucdavis.edu](mailto:info@itd.ucdavis.edu); <http://itd.ucdavis.edu/>

The institute promotes research and graduate education in the mathematical sciences and provides a focus for extramural and intramural research pursuits. The two most important research themes are dynamics and stochastic processes. Approximately 30 faculty from all of

the colleges participate in conferences, workshops, seminars and summer schools. The institute provides networking of computer workstations, a gateway to supercomputers, research offices and facilities for interaction with students, faculty and visitors. The institute supports research in mathematical biology, mathematical physics and applied mathematical analysis, especially fluid dynamics, and houses the NSF Computer Graphics Facility for computational biology, which is open to faculty, graduate students and postdoctoral researchers for graphic visualization in biology. The institute also coordinates a campuswide NSF research training group, "Nonlinear Dynamics in Biology."

### **Institute of Toxicology and Environmental Health (ITEH)**

Information:

Institute of Toxicology and Environmental Health  
530-752-1340

ITEH coordinates interdisciplinary research on biomedical and toxicological problems related to exposure to chemical, physical and biological toxic agents or to ionizing radiation. This research aims to determine basic mechanisms of toxic effects and to predict hazards to human and animal health from continual exposure to realistic levels of toxic substances in the environment or at the workplace. Studies on toxic, radioactive, mutagenic, carcinogenic and teratogenic compounds are carried out in special animal holding facilities. Laboratories are equipped for studies in analytical chemistry, biochemical toxicology, cell and molecular biology, endocrinology, inhalation toxicology, morphology and reproductive and developmental biology. The institute houses a major universitywide program and federally funded center in occupational medicine and a School of Medicine program in reproductive biology.

### **Institute of Transportation Studies**

Information:

Daniel Sperling  
530-752-6548; 530-752-6572 (fax); [dsperling@ucdavis.edu](mailto:dsperling@ucdavis.edu);  
<http://www.engr.ucdavis.edu/~its>

The institute conducts multidisciplinary research on complex problems related to traffic congestion and local and global pollution, and disseminates research results to the broader academic and professional community. Research priorities are advanced vehicle and highway systems, travel behavior, electric vehicle technology and policy, and energy and environmental projects. About 25 faculty members and 70 students from more than 10 academic disciplines, including the departments of Civil and Environmental Engineering and Mechanical Engineering, Economics, Environmental Science and Policy, Agricultural and Resource Economics, and the Graduate School of Management, participate in the research activities of the institute. The institute also houses the Graduate Group in Transportation Technology and Policy.

### **John Muir Institute of the Environment (JMIE)**

Information:

Robert G. Flocchini  
530-752-1460

The institute facilitates research and exchange of information to improve the scientific basis for decisions on environmental issues. It encourages and facilitates mul-

tidisciplinary research focused on environmental topics, acts as administrative coordinator for specific programs of organized environmental research, and facilitates communication among policy makers, resource agencies, academic scientists and the public through outreach programs.

### **Program in International Nutrition**

Information:  
Kenneth H. Brown  
3150 Meyer Hall  
530-752-1992; 530-752-3406 (fax); khbrown@ucdavis.edu;  
<http://www-nutrition.ucdavis.edu/pin/index.htm>

Faculty members of the Program in International Nutrition are studying the epidemiology and causal mechanisms of the major nutritional problems of human populations in developing countries, with the ultimate objective of planning, implementing, and evaluating programs to ameliorate these problems. Current areas of research emphasis include maternal and child nutrition, nutrition and infection, nutritional assessment, and food and nutrition policy. The program manages a small microcomputer center for the analysis of clinical and population-based studies of relevance to international nutrition.

### **Additional Research Centers and Resources**

#### **Adult Fitness Program**

Information:  
Department of Exercise Science  
530-752-2540

The Adult Fitness Program serves as an educational laboratory for undergraduate and graduate students engaged in advanced study of the role of exercise and nutrition in the management of optimal physiological function. Basic and clinical research studies focus on cardiovascular, respiratory and metabolic functions. The program emphasizes risk reduction for cardiovascular disease and development of cardiorespiratory endurance. Studies stress fitness, relaxation, and weight reduction and control through appropriate diet and exercise programs that are individually prescribed after extensive medical and physiological testing.

#### **California Agricultural Experiment Station**

Information:  
College of Agricultural and Environmental Sciences  
530-752-1610

The California Agricultural Experiment Station has branches in Davis, Riverside and Berkeley. The Davis branch includes 500 faculty in more than 30 departments in the College of Agricultural and Environmental Sciences, the Division of Biological Sciences and the School of Veterinary Medicine. In addition to laboratory facilities, it has approximately 3,000 acres devoted to

agricultural research in the areas of experimental crops, orchards and animal facilities. The Experiment Station facilitates research in agricultural production, food processing, nutrition, animal care and disease prevention, consumer sciences and community development and environmental quality, with emphasis on resource conservation and management, water and soil pollution and regional planning.

#### **Center for Child and Family Studies**

Information:  
West House of Child and Family Study Center  
530-752-2888; <http://ccfs.ucdavis.edu>

The Center for Child and Family Studies is a research, teaching and demonstration laboratory of the Division of Human Development and Family Studies in the Department of Human and Community Development. At the laboratory, students enrolled in human development courses develop observational techniques and participate with peers, children, parents and professionals in a fully integrated laboratory of developmental programs for young children. Students study theories of development in a naturalistic setting, linking theory to principles of interaction and developing a recognition and respect for individual differences. Selected undergraduate students participate in faculty and graduate student research at the laboratory.

#### **Center for Neuroscience**

Information:  
Edward G. Jones, Director  
1544 Newton Ct.  
Davis, CA 95616  
530-757-8708; 530-757-8827 (fax);  
<http://www.neuroscience.ucdavis.edu>

The Center for Neuroscience is an interdisciplinary unit that serves as the focal point for the study of the neurosciences at UC Davis. Faculty affiliated with the center are from 13 departments and sections. The center sponsors a seminar series, conferences and symposia, distributes a quarterly newsletter, provides research space for center members and supports graduate students, postdoctoral scholars and distinguished visitors.

Faculty and students are engaged in the study of brain mechanisms responsible for normal human cognitive and perceptual processes. A core group of cognitive neuroscientists uses various imaging techniques and electrophysiological techniques to study both the normal and lesioned cortex to increase their understanding of how the normal brain produces behavior. Four faculty members use animal models to understand how information is processed in the cortex.

#### **Facility for Advanced Instrumentation**

Information:  
9 Hutchison Hall  
530-752-0284

The Facility for Advanced Instrumentation is a training and research center where students, faculty and staff have access to major scientific instruments. An electron microscope laboratory houses scanning and transmission electron microscopes with x-ray microanalytical capabilities and an atomic force microscope. A mass spectrometer laboratory consists of a research-grade GC/MS, a high resolution instrument, and an HPLC/MS equipped with electrospray ionization for analysis of

proteins and peptides. The facility also coordinates access to additional instruments located in other departments on campus.

### **Food Intake Laboratory**

Information:  
TB 33  
530-752-7516

The Food Intake Laboratory supports predoctoral and postdoctoral research in nutrition and behavior, emphasizing studies on the control of food intake and the nature of the factors that govern feeding choices. The laboratory promotes collaborative research involving the roles of metabolic, psychological, neurochemical, hormonal, gender, genetic and sensory inputs in the feeding behavior of experimental animals.

### **Health Sciences Research Laboratories**

The Health Sciences Research Laboratories are biological science facilities with research staff and assistance for faculty, staff and students.

- **Animal Surgery Laboratory**

Information:  
Buildings H and J—ARS  
530-752-7756

Animal Surgery Laboratory provides facilities in compliance with NIH/AAALAC standards for researchers who perform both survival and non-survival experimental animal surgeries.

- **Biochemistry and Special Instrumentation Laboratory**

Information:  
TB 161  
530-752-0320

This central facility provides investigators access to certain common but expensive laboratory equipment, including ultracentrifuges and high-speed centrifuges with rotors, scintillation and gamma counters, UV/VIS spectrophotometers, densitometers, Betaplate and Elisa readers.

### **Human Performance Laboratory**

Information:  
164 Hickey Gym  
530-752-0965/530-754-8675

The Human Performance Laboratory houses equipment for the study of blood and muscle chemistry and enzymology, metabolism and energetics, muscle mechanics and electromyography, movement kinetics and kinematics, body composition and anthropometry, cardio-respiratory function during exercise in a controlled environment, control and acquisition of motor skills and the psychosocial aspects of human performance. The laboratory has Apple Macintosh and IBM micro-computers that can be used for data collection, reduction, graphing and statistical analysis as well as for biomechanical, physiological systems and human performance modeling.

### **Humanities Institute**

Information:  
2223 Social Sciences and Humanities Building  
530-752-2295; 530-752-4263 (fax)

The Davis Humanities Institute organizes interdisciplinary research seminars open to graduate students and faculty and promotes creative exchanges among the humanities, social sciences and environmental sciences. Its fellowship program enables campus fellows and distinguished visitors to participate in year-long seminars on designated themes. The seminar theme in 1998-99 will be "Migrations to, from and within the Americas." The institute also sponsors distinguished visiting lecturers, supports interdisciplinary research clusters and a graduate student research assistantship program, co-sponsors lectures with other departments, organizes a Friday noon series of talks and films entitled "Problems and Paradigms," produces a calendar of events and publishes a newsletter, *Humanities at Davis*.

### **Intercampus Institute for Research at Particle Accelerators**

Information:  
Richard L. Lander  
325 Physics/Geology Building  
530-752-1780

This institute conducts research using the unique facilities at national and international accelerator laboratories, particularly the Enrico Fermi National Accelerator Laboratory and the Large Hadron Collider to be built in Europe. High-energy particle physics is the dominant area of research. The institute also promotes seminars and lectures by visiting researchers.

### **Mann Laboratory**

Information:  
104 Mann Laboratory  
530-752-1410; 530-752-4554 (fax)

Plant scientists in the Louis K. Mann Laboratory direct their physiological, biochemical and molecular research to improving the quality of harvested fruits, vegetables and seeds. The five faculty housed in this facility are members of the Department of Vegetable Crops and are assisted by numerous students, postdoctoral researchers and visiting scientists. Research ranges from the basic molecular biology of fruit ripening and seed development to practical storage technologies for lightly processed fruits and vegetables. Results are communi-

cated to other researchers and to growers, shippers, marketers and consumers. The facility is equipped with 18 controlled-temperature rooms, seven research laboratories, a teaching laboratory and a conference room and library.

### Natural Reserve System

Information:  
Office of Research  
410 Mrak Hall  
530-752-6949; <http://www.ucop.edu/DANR/nrs/nrs.html>

The Davis campus administers seven natural reserves that are available for teaching and research.

- Bodega Marine Reserve, located at Bodega Bay, 100 miles west of campus, consists of coastal dune vegetation and bay and coastal tidal areas with facilities for overnight and longer stays. (See Bodega Marine Laboratory above.)
- Eagle Lake Field Station is on the shore of Eagle Lake in northeastern California and has boats, a small laboratory and facilities for overnight and longer stays.
- Jepson Prairie Reserve, located in Solano County 15 miles south of the campus, consists of native California bunchgrass grasslands and vernal pools.
- Donald and Sylvia McLaughlin Reserve, located near Clear Lake about 70 miles northwest of campus, consists of intercoastal range habitat and serpentine soil habitat.
- Putah Creek Campus Reserve is a 150-acre corridor along the north bank of Putah Creek with a remnant of the riparian (streamside) ecosystem.
- Quail Ridge Reserve consists of intercoastal range habitat located about 25 miles west of campus on a peninsula jutting into Lake Berryessa. The reserve has a small facility plus camping for overnight stays.
- Stebbins Cold Canyon Reserve, located about 24 miles west of campus, consists of several different plant communities found in California's inner and outer coast ranges.

The university maintains over 30 reserves throughout the state, many of which are available for teaching and research.

### Nuclear Magnetic Resonance Facility

Information:  
Medical Sciences 1D  
530-752-7677

The Nuclear Magnetic Resonance Facility provides qualified researchers in the biological, medical and physical sciences access to state-of-the-art NMR instrumentation for spectroscopy and imaging. At present, the facility operates six spectrometers of varying purposes and capabilities. Three horizontal magnet bore spectrometers are used for in vivo spectroscopy and imaging of small animals and materials, and in vitro spectroscopy of perfused organs. Two vertical bore spectrometers are used primarily for solution studies of biomolecules, with an additional vertical bore instrument for in vitro studies. All of the spectrometers are multinuclear, and a large variety of high resolution, surface and imaging coils are available for use. The facility also has SUN and Silicon Graphics workstations for off-line data processing and molecular modeling.

### Protein Structure Laboratory

Information:  
1145 Surge 1  
530-752-6228

The Protein Structure Laboratory provides state-of-the-art biotechnological instrumentation for protein sequencing, amino acid analysis, and protein and DNA synthesis and consultation for protein-related research. Also available are a micro-protein sample preparation (in-gel and on-membrane digestions) and various analyses (amino acid analysis, sequencing, peptide mappings and MS analysis) for protein identification.

### Social Science Data Service

Information:  
107 Social Sciences and Humanities Building  
530-752-6063; <http://polar.ucdavis.edu/Welcome.html>

The Social Science Data Service (SSDS) is a unit of the Institute of Governmental Affairs (IGA). SSDS provides consulting, computing and specialized support services to faculty involved in quantitative social science research on the UC Davis campus. SSDS staff provides consulting on a wide range of software used by social scientists and assists with questions regarding the use of SSDS computers, as well as statistical and data-related programming. SSDS manages a UNIX system that provides a platform for quantitative social science computing. Specialized support is available for extramurally funded research projects managed by IGA.

### Student Experimental Farm

Information:  
Student Experimental Farm  
530-752-7645

The Student Experimental Farm is an innovative teaching and research facility located on 25 acres of university land just west of the Recreation Pool. Since its inception, the Student Experimental Farm has provided students with unique opportunities to explore alternative agricultural technologies and philosophies through classes, special projects, internships, work study jobs and original research. Because the farm includes several acres of land that have been managed organically for two decades, it provides researchers with a facility for conducting field research into sustainable agriculture.

## UC Agricultural Issues Center

Information:  
132 Social Sciences and Humanities Building  
530-752-2320; <http://aic.ucdavis.edu>

The UC Agricultural Issues Center, headquartered at Davis, is a universitywide research and outreach unit that draws on expertise from many disciplines. The center focuses on issues related to science and technology, international trade, agribusiness trends, rural-urban interrelations, resources and the environment, human resources and commodity policy and markets.

## UC Davis Herbarium

Information:  
Section of Plant Biology  
530-752-1091/0617; <http://herbarium.ucdavis.edu>

The UC Davis Herbarium is used for research in plant systematics and ecology, as well as for public service requests (especially identification of weeds and poisonous plants). The herbarium contains more than 200,000 plant specimens, including vascular plants, bryophytes, lichens and algae. The majority of these specimens are angiosperms (flowering plants), mainly from California, but the collections are worldwide in scope, with strong holdings from North America, Ecuador, Baja California and regions with Mediterranean climate regimes. The herbarium is well known for its collection of weeds and poisonous plants, although it also has world-class collections of grasses, oaks and spurges.

## Veterinary Genetics Laboratory

Information:  
Horse Bloodtyping Laboratory, Armstrong Tract, 530-752-2211  
Cattle Bloodtyping Laboratory, Armstrong Tract, 530-752-7383

The laboratory is recognized for its pioneering research on animal blood groups and biochemical polymorphisms. Current research activities include studies of the genetic basis of animal diseases, development of DNA marker screening tests and gene mapping. Knowledge acquired is applied to genetic disease diagnostics and parentage verification for domestic animals (horses, cattle, sheep, goats, elk, llamas, alpacas and dogs) and wildlife.

## Veterinary Medicine Teaching and Research Center (VMTRC)

Information:  
UC Davis VMTRC  
18830 Road 112  
Tulare, CA 93274  
209-688-1731; <http://www.vmtre.ucdavis.edu>

VMTRC is a clinical teaching and research center within the UC Davis School of Veterinary Medicine. The center offers a forum for teaching, research and service programs for D.V.M. students, M.P.V.M. students, graduate students, residents, university faculty and visiting

researchers interested in food animal medicine. VMTRC programs emphasize herd health medicine, epidemiology and preventive medicine, production management, agricultural economics, environmental protection, food safety and animal welfare.

## Water Resources Center

Information:  
1323 Academic Surge  
530-752-8070

The center supports water-related research in such areas as agricultural and biological sciences, economics, engineering, history, geography, law, meteorology, physical sciences and political science. Research interests include drought responses, aquatic ecosystem structure and function, water resource systems engineering, economic evaluation of water development and conservation, political strategy in water resources development, environmental and energy relationships in water resources management, watershed hydrology, ground water use, water re-use, soil and land use management in relation to water resources use, and maintenance and improvement of water quality. The center has an annual call for proposals in fall quarter.

## Wildland Resources Center

Information:  
1323 Academic Surge  
530-752-8070

The center coordinates activities among the university's research and extension programs and stimulates research into conservation, management and utilization of wildland resources with a view toward the optimum present and future uses of wildlands. Projects focus on such topics as habitat conservation, assessment and management of timber resources and old-growth forests, and development of a system for evaluating California's environmental resources. The center increases the awareness of the university's research and extension programs related to wildlands and serves as liaison between the university and state and federal agencies and other organizations concerned with wildland resources and problems.

## X-Ray Crystallographic Facility

Information:  
Marilyn Olmstead  
Department of Chemistry  
530-752-6668

The X-Ray Crystallographic Facility is located in the Department of Chemistry. There are three automated four-circle diffractometers. One of these is equipped with a Siemens 15-kW rotating anode X-ray source. There are also traditional Weissenberg and precession cameras. All diffraction equipment is fitted with low-temperature (liquid nitrogen) attachments. In addition, the facility contains a Silicon Graphics Indigo 2, two VAX-station 3000 series computers, microcomputers, graphics terminals and multi-pen plotters. The laboratory is known for pioneering work in low-temperature crystallography, for the development of rapid structure determination methods, and techniques for handling reactive materials.

**UNDERGRADUATE  
ADMISSION**

---

# UNDERGRADUATE ADMISSION

Information:  
Undergraduate Admissions and Outreach Services  
178 Mrak Hall  
One Shields Avenue  
Davis, CA 95616-8507  
530-752-2971; 530-752-4360 (TTY), 530-752-1280 (fax);  
undergradadmissions@ucdavis.edu;  
http://www.ucdavis.edu/admissions.html

You can apply via the World Wide Web at <http://www.ucop.edu/pathways>. The *Application for Undergraduate Admission and Scholarships* can also be obtained from the counseling office of any California high school or community college or from the admission office of any UC campus.

### Application Filing Periods

Submit your application for admission and scholarships during the filing period for the quarter in which you want to attend UC Davis.

| Quarter of Attendance | Filing Period       |
|-----------------------|---------------------|
| Winter quarter 1999   | July 1–31, 1998     |
| Spring quarter 1999   | October 1–31, 1998  |
| Fall quarter 1999     | November 1–30, 1998 |

Submit your completed application form to:

University of California  
Undergraduate Application Processing Service  
P.O. Box 23460  
Oakland, California 94623-0460

*For winter and spring quarters at UC Davis, you will need to submit a completed application with fee and appeal letter directly to Undergraduate Admissions and Outreach Services.*

### Application Fees

The application fee of \$40 entitles you to apply to one University of California campus. If you want to apply to more than one UC campus, you must pay an additional \$40 for each campus you select. These fees are not refundable. You must include the fee with the application or it will not be processed. Attach a check or money order made payable to the Regents of the University of California to the application form.

### Preparing for University Work—Freshman

A carefully planned program of high school courses provides you with the best preparation for university work. As a prospective university student, you should give priority to completing the high school courses required for admission—known as the “A to F” subject requirements.

You should take college preparatory courses that will challenge you to work hard and will prepare you beyond minimum levels of competence in reading, writing and mathematics. A student who is well prepared for university work will have taken four years of English in high school, four years of mathematics, two to three years of foreign language, two to three years of laboratory science, two or more years of history/social science, and one or more years of art or humanities.

**Reading:** You should become proficient in reading and understanding technical materials and scholarly works.

Learn to read analytically and critically, actively questioning yourself about the author’s intentions, viewpoint, arguments and conclusions. Become familiar and comfortable with the conventions of standard written English, and with various writing strategies and techniques. Your reading experience should include original works in their entirety, not just textbooks and anthologies, and should encompass a wide variety of forms and topics.

**Writing:** Effective critical thinking and proficiency with the written language are closely related, and both are skills that every university student must master. By university standards, a student who is proficient in English composition is able to understand the assigned topic; select and develop a theme by analysis and argument; choose words that aptly and precisely convey the intended meaning; construct effective sentences, i.e., sentences that economically and successfully convey the writer’s ideas and display a variety of structures; and demonstrate an awareness of the conventions of standard written English.

If you plan to attend the university, you must take English courses in high school that require the development and practice of these skills. You must take at least four years of English composition and literature classes that stress expository writing.

**Mathematics:** Many undergraduate majors require preparation in mathematics beyond the three years required for admission to the university. All majors in the natural and life sciences, engineering and mathematics require calculus. Many majors in the social sciences require statistics or calculus, or both. Calculus is also required for undergraduates preparing for careers in the environmental sciences, dentistry, medicine, optometry, pharmacy and biostatistics. If you select a major that requires either calculus or statistics, you should expect to take that course during your first year at the university.

Prepare yourself for university courses in mathematics while you are still in high school. Good preparation includes a year of mathematics beyond second-year algebra (such as precalculus, mathematical analysis, analytic geometry) and definitely a course in mathematics during your senior year.

Algebra is necessary for success in university mathematics courses. Students who do not take a mathematics course during their last year in high school often find they need to take a preparatory course at the university in order to renew their algebra skills. The need to take such a course at the university could delay your undergraduate studies that require mathematics as a prerequisite.

Finally, take advantage of any guidance your high school offers in study skills and diagnostic tests designed to help you assess your preparation for col-

lege. Managing your time well and studying effectively are critical to excelling at the university. Together with solid academic preparation, these skills should enable you to realize your educational goals and, ultimately, fulfill your career aspirations.

## ADMISSION AS A FRESHMAN

The University of California defines a *freshman applicant* as a student who has graduated from high school but has not enrolled since then in a regular session in any college-level institution. Summer session immediately following high school graduation is excluded in this determination.

Admission requirements for California residents are different from those for nonresidents. Nonresidents must meet higher scholarship requirements.

The following describes the minimum requirements to establish eligibility at the University of California. **At UC Davis, students generally must perform well above these minimums in order to gain admission**, since the number of eligible applicants exceeds the number of students we can admit. We give priority to students on the basis of highest academic achievements and test scores.

### Minimum Requirements for California Residents

To be minimally eligible for admission to the University of California as a freshman, you must meet the subject requirements, scholarship requirement and examination requirements that are described on this and the following pages.

#### Subject Requirements: A to F

You must complete at least 15 high school units in the subject areas listed below. At least seven of the required 15 units will have to be taken in the last two years of high school. The required course sequence is often referred to as the “A to F” pattern.

Courses taken in the 9th grade and completed with a grade of C or better can satisfy a subject requirement; however, the grades will not be used in computing your grade point average. If you receive a grade of D or lower in a 9th-grade course, you have not satisfactorily completed the subject requirement until you repeat the course (or, in some cases, complete a more advanced course) with a grade of C or better.

#### A. History/Social Science—2 years

One year of United States history, or one-half year of United States history and one-half year of civics or American government; and one year of world history, cultures and geography.

#### B. English—4 years

Four years of English—composition and literature. Classes should stress preparation for university study, including frequent and regular practice in writing expository prose compositions of some length. Not more than one year will be accepted from the 9th grade. (See English Proficiency below.)

#### C. Mathematics—3 years; 4 years recommended

Three years of mathematics—elementary algebra, geometry and intermediate algebra. (Courses taken in

grades 7 and 8 may partially satisfy the requirement if they are accepted by the high school as equivalent to its own courses.)

#### D. Laboratory Science—2 years; 3 years recommended

Two years of laboratory science providing fundamental knowledge in at least two of these three areas: biology, chemistry and physics. Not more than one year of laboratory science taken in the 9th grade may be used to meet this requirement.

#### E. Language other than English—2 years; 3 years recommended

Two years of the same language other than English. Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading and composition. (Courses taken in grades 7 and 8 may satisfy this requirement if they are accepted by the high school as equivalent to its own courses.)

#### F. College Preparatory Electives—2 years

Two years in addition to those required in “A” through “E” above.

- **History and English:** courses that fit the general description for courses above.
- **Advanced mathematics:** trigonometry, linear algebra, pre-calculus (mathematical analysis), calculus, statistics, computer science and similar courses. (Courses containing significant amounts of material for arithmetic or from shop, consumer or business mathematics are not acceptable.)
- **Laboratory science:** courses in the biological and physical sciences. A general science course taken in grade 9 as preparation for a laboratory science may be used.
- **Language other than English:** courses may be in either the same language used to satisfy the “E” requirement or a second foreign language. If a second language is chosen, however, at least two years of work in that language must be completed.
- **Social science:** courses that serve as preparation for lower division work in social science at the university. (Courses of an applied, service or vocational nature are not acceptable.)
- **Visual and performing arts:** courses should enable you to understand and appreciate artistic expression, and to talk and write with discrimination about artistic materials studied. Courses that develop creative artistic ability or artistic performance may be used. (Courses that are recreational or are offered under physical education are not acceptable.)

If you are a California high school graduate, the courses used to satisfy the **Subject Requirement** must appear on a list that your high school principal has certified meets the course descriptions above, and has been accepted by

the university's Office of Student Academic Services. If you submit courses from an out-of-state school, Undergraduate Admissions and Outreach Services will determine if your courses fulfill the Subject Requirement.

### English Proficiency

Instead of a fourth year of high school English, you may satisfy the **English Proficiency Requirement** by completing one of the following:

- SAT II Subject Test in Writing (a score of 660 or above);
- OR**
- Advanced Placement Examination in English Composition and Literature or English Language and Composition (a score of 5, 4, or 3).

### OR

- International Baccalaureate Higher Level Examination in English (a score of 7, 6 or 5).

The requirement may also be satisfied with a transferable college-level English course in literature or composition worth 3-semester or 4-quarter units in which you earned a grade of C or higher.

### Scholarship Requirement

You must have earned a grade of C or better in all high school courses to satisfy the "A to F" requirements above. The grades earned in these courses that are taken in grades 10 through 12 will be used to evaluate your grade point average for minimum eligibility.

If you attain a grade point average of 3.30 (where the letter grade A=4, B=3, C=2, and D=1, and in university-approved honors or advanced placement courses taken during the 10th, 11th and 12th grades [limit of four year-long courses with not more than two coming from the tenth grade] where the letter grade A=5, B=4, and C=3) in the required "A to F" subjects taken after the 9th grade, you will meet the minimum requirements to be eligible to enter the university, regardless of your scores on standardized tests. If your grade point average falls between 3.29 and 2.82, you will meet the minimum requirements for the university if you achieve the specified scores on the standardized tests (see the Eligibility Index opposite).

In determining the required grade point average, the university will use a semester grade of A in one course to balance a semester grade of C in another. Grades you received in courses taken in the 9th grade or earlier are not used in determining your grade point average. (However, these courses may be used to satisfy subject requirements.) The grades that appear on your official high school transcript, including those earned in accelerated and advanced courses, are the grades the university will use in evaluating your record. Grades are counted on a semester basis unless your school gives only year grades.

To meet the **Subject** and **Scholarship Requirements** you may repeat courses in which you received a grade of D or lower. The grade achieved in the repeated course will be calculated into the grade point average. There is no limit to the number of repeated courses that may be used in the "A to F" pattern, but each course may be repeated only one time.

### Eligibility Index

| "A-F"<br>GPA |    | SAT I<br>ACT <sup>1</sup> |      | SAT I<br>total <sup>2</sup> |      |
|--------------|----|---------------------------|------|-----------------------------|------|
| 2.82         | 36 | 1600                      | 3.06 | 25                          | 1150 |
| 2.83         | 36 | 1590                      | 3.07 | 24                          | 1130 |
| 2.84         | 35 | 1580                      | 3.08 | 23                          | 1110 |
| 2.85         | 35 | 1570                      | 3.09 | 23                          | 1090 |
| 2.86         | 35 | 1560                      | 3.10 | 22                          | 1070 |
| 2.87         | 34 | 1550                      | 3.11 | 22                          | 1050 |
| 2.88         | 34 | 1530                      | 3.12 | 21                          | 1030 |
| 2.89         | 33 | 1510                      | 3.13 | 21                          | 1010 |
| 2.90         | 33 | 1490                      | 3.14 | 20                          | 980  |
| 2.91         | 33 | 1470                      | 3.15 | 20                          | 960  |
| 2.92         | 32 | 1450                      | 3.16 | 19                          | 940  |
| 2.93         | 31 | 1430                      | 3.17 | 19                          | 920  |
| 2.94         | 31 | 1400                      | 3.18 | 18                          | 900  |
| 2.95         | 31 | 1370                      | 3.19 | 18                          | 870  |
| 2.96         | 30 | 1350                      | 3.20 | 17                          | 840  |
| 2.97         | 30 | 1330                      | 3.21 | 17                          | 810  |
| 2.98         | 29 | 1310                      | 3.22 | 16                          | 780  |
| 2.99         | 28 | 1290                      | 3.23 | 16                          | 750  |
| 3.00         | 28 | 1270                      | 3.24 | 15                          | 720  |
| 3.01         | 27 | 1250                      | 3.25 | 15                          | 690  |
| 3.02         | 27 | 1230                      | 3.26 | 14                          | 660  |
| 3.03         | 26 | 1210                      | 3.27 | 14                          | 630  |
| 3.04         | 26 | 1190                      | 3.28 | 13                          | 600  |
| 3.05         | 25 | 1170                      | 3.29 | 12                          | 570  |

<sup>1</sup>The American College Test (ACT) is scored in intervals of 1 point from a minimum of 1 to a maximum of 36.

<sup>2</sup>The Scholastic Aptitude Test (SAT) is scored in intervals of 10 points from a minimum of 400 to a maximum of 1600.

### Examination Requirement

All freshman applicants must submit official scores from the College Board or the American College Testing (ACT) Program. If you are applying for admission to the fall quarter, take the tests no later than December of your senior year (earlier testing is recommended). The following tests are required:

- Scholastic Assessment Test-I (SAT-I—College Board)—The verbal and mathematics tests scores you submit must be from the same sitting,

### OR

- American College Test—the composite score is used,

### AND

- Three Scholastic Assessment Tests-II (SAT-II—College Board), which must include (a) writing test, (b) mathematics (level I or II) and (c) one test from the social studies or science or foreign language, or the test in English literature. The English Language Proficiency Test is not an acceptable option.

If you are a California resident and your grade point average in the required high school subjects is 3.30 or higher, the tests are required but your scores will not be used to determine your minimum eligibility for admission. (**Reminder: At UC Davis, students generally must perform well above the minimums in order to gain admission.**)

If your grade point average in the "A to F" requirement is less than 3.30, refer to the table above to see the examination scores you must earn to be eligible for university admission.

Make arrangements to take the required SAT-I and SAT-II by writing to College Board SAT, Princeton, NJ 08541. For the American College Test (ACT) write to American College Testing Program, Registration Unit, P.O. Box 168, Iowa City, IA 52240. (Test fees should be paid to the Testing Service, not to the university.) UC Davis' College Board code is 4834 and the ACT code is 0454.

### Minimum Requirements for Residents of Other States

If you are a freshman applicant who does not claim California residency, you must meet the following requirements for minimum admission eligibility to the University of California (**Students generally must perform well above the minimum in order to gain admission to UC Davis**):

- Graduate from a regionally accredited or state-accredited high school
- Satisfactorily complete the subject requirements listed under Requirements for California Residents
- Earn a grade point average of at least 3.40 (B+) in the courses used to meet the subject requirements
- Complete the examination requirements listed for California residents

### Minimum Eligibility by Examination Alone

If you do not meet the minimum scholarship and subject requirements for admission, you can meet minimum requirements for eligibility as a freshman by examination alone. The examinations must be taken before you graduate from high school. (If you have completed transferable college courses, College Board subject tests cannot be taken in academic subjects covered in those courses.) You must take the same College Board tests discussed above and receive a total score of at least 1400 on the SAT-I, or a score of 31 on the American College Test. Your total score on the SAT-II must be 1760 or higher with no score less than 530 on an individual test. If you are a nonresident applicant, your score on the SAT-II must be 1850 or higher with no score less than 530 on an individual test.

### High School Proficiency Examination

The University of California will accept the Certificate of Proficiency or the General Education Development (GED) certificate awarded by the State Department of Education in lieu of the regular high school diploma. However, you must also meet all other university entrance requirements (subject, scholarship and examination).

### Transfer Credit

Transfer credit may be granted to a freshman applicant for an acceptable college course taken while still in high school if an official transcript is received from the college that conducted the course.

Transfer credit is also granted for each College Board Advanced Placement Examination completed with a score of 3, 4 or 5. International Baccalaureate Higher Level Examinations with scores of 5, 6 or 7 will receive transfer credit. If students take college courses in combination with Advanced Placement or International Baccalaureate Examinations in the same subject areas, transfer credit may be limited due to duplication of credit.

### Advanced Placement Examinations

If you take one or more of the College Board Advanced Placement (AP) Examinations and score 3, 4 or 5, you will be awarded college credit. The credit will become part of the minimum 180 quarter units you need in order to receive a bachelor's degree. The credit from the AP Examinations may also be used to satisfy specific degree requirements.

Consult the chart on the facing page to learn how many units you will receive for an AP Examination (see the column headed: Credit Toward Degree). How those units will be applied toward specific degree requirements in each college is explained for each exam category and in the notes below each exam listing. Please note that the courses for which AP credit has been granted may not be used as a substitute for courses required as part of the UC Davis General Education Requirement. (See General Education in the "Undergraduate Education" chapter.)

In general, you may not earn university credit for courses that duplicate credit already earned through AP. There are, however, a few exceptions to this general rule. Since it is often difficult to know exactly which UC Davis course you should take when you have earned AP credit, you should talk with an academic adviser in your department or dean's office before selecting and enrolling in classes.

### ADMISSION AS A TRANSFER STUDENT

The University of California defines a *transfer applicant* as a student who has been a registered student in a college or university or in college-level extension classes since last attendance at high school. Summer session attended immediately following high school graduation is excluded in this determination. If you are a transfer applicant, you may not disregard your college record and apply for admission as a freshman.

California residents must meet the requirements that follow. If you are not a California resident, see Requirements for Residents of Other States below. **At UC Davis, students generally must perform well above the minimums in order to gain admission**, since the number of eligible applicants exceeds the number of students we can admit.

The highest priority for admission is given to California Community College transfer applicants with 60 semester or 90 quarter units of transfer work with the highest academic achievement, as well as, in some areas, the completion of lower division major program.

### UC Minimum Requirements for California Residents

Transfer applicants must meet one of the following conditions:

- Students who were eligible for admission to the university when they graduated from high school—meaning they satisfied the Subject, Scholarship and Examination Requirements—are UC minimally eligible to transfer if they have a C (2.00) in their transferable college course work.

## College Board Advanced Placement (AP) Examination Credit

| Examination                                                                                                                                                                                                                                        | Score   | UC Davis Course Equivalencies       | Continuing Course                                                          | Credit Toward Degree |

---

*The Bodega Marine Reserve, located on the Sonoma coast, provides research opportunities for graduate and undergraduate students.*

---

- Students who met the Scholarship Requirement but did not satisfy the Subject Requirement must take transferable college courses in the subjects they are missing, earn a grade of C or better in each of these required courses, and earn an overall C (2.00) average in all transferable college course work to be minimally eligible to transfer. Students who met the Scholarship Requirements but did not meet the Examination Requirement must complete a minimum of 12 semester (18 quarter) units of transferable work and earn an overall C (2.00) average in all transferable college course work completed.
- Students who were not eligible for admission to the university when they graduated from high school because they did not meet the Scholarship Requirement must:

a. complete 90 quarter units or 60 semester units of transferable college credit with a grade point average of at least 2.40,

**and**

- b. Complete a course plan requirement to include:
1. Two transferable college courses (3 semester or 4-5 quarter units each) in English composition; and,
  2. One transferable college course (3 semester or 4-5 quarter units) in mathematical concepts and quantitative reasoning; and,
  3. Four transferable college courses (3 semester or 4-5 quarter units each) chosen from at least two of the following subject areas: the arts and humanities, the social and behavioral sciences, the physical and biological sciences.

Each of the courses in this pattern must be completed with a grade of C or better.

### **Minimum Requirements for Residents of Other States**

If you meet the requirements for admission as a nonresident freshman, you must have a grade point average of 2.80 or better in college courses that are accepted for transfer credit by the University of California.

If you don't meet the minimum requirements for admission as a nonresident freshman, you must have completed at least 90 quarter units (60 semester units) of transferable work with a grade point average of 2.80 or better and have completed the subject requirements for California residents. Students generally must perform **well above the minimums** to gain admission to UC Davis.

### **Transfer Admission to the College of Engineering**

The College of Engineering, in screening applicants, gives priority to junior-level California community college students who have completed a minimum of 60 semester/90 quarter units of transfer work **and** the specified required lower division engineering courses and who have high GPAs.

The lower division programs and required courses are specified in the "Programs and Courses" section of this catalog, under the specific engineering major. You can also find this information on the World Wide Web at <http://registrar.ucdavis.edu/UCDWebCatalog>. Direct questions about courses required for transfer admission to your counselor or to the Engineering Undergraduate Office (530-752-0556).

### **Unit Credit for Courses Taken Elsewhere**

The university gives unit credit to transfer students for courses they have completed at other accredited colleges and universities. To be accepted for credit, your

courses must be comparable to those offered at the university, as determined by Undergraduate Admissions and Outreach Services.

A total of 105 quarter units (70 semester units) toward a university degree may be earned at a community (two-year) college. Only subject credit will be granted for courses taken in excess of these amounts.

### UC Intercampus Transfer

If you are an undergraduate student currently or previously registered at another UC campus and have not since been registered in another institution, you may apply for transfer to the Davis campus. Filing dates, the application, fees and admission requirements are the same as those listed for new applicants.

## ADMISSION AS AN INTERNATIONAL STUDENT

UC Davis welcomes competent, qualified applicants from around the world. An application may be obtained by writing to Undergraduate Admissions and Outreach Services, University of California, One Shields Avenue, Davis, California, 95616-8507, or students may apply via the World Wide Web at <http://www.ucop.edu/pathways>. It is very important to file the application during the appropriate filing period.

To be eligible for admission to the university, international students need to meet specific academic and financial qualifications. International students are responsible for providing the university with all secondary school and college transcripts. The Test of English as a Foreign Language (TOEFL) is a requirement of admission for applicants from abroad or for those with little schooling in the United States when English is not the applicant's native language. A minimum score of 500 is required.

The Scholastic Assessment Tests (SAT-I and SAT-II) are required for international freshman applicants who are graduates of U.S. high schools or American-type schools abroad. These tests are also required for applicants who come from countries that do not have national, external examinations at the end of secondary school. Because many preliminary admission decisions are made on the basis of test scores and marks, all international freshman applicants are strongly encouraged to take these tests and to have the official scores reported to UC Davis as early as possible.

For transfer students, course work is considered transferable if the applicant completed the course at an institution that is recognized by the University of California and is comparable to course work offered at the University of California.

Most international students are required to complete a "Financial Statement for Students Seeking Nonimmigrant Status" that attests to the student's ability to pay for nonresident tuition and fees and living expenses.

All international students who have not satisfied the Subject A requirement through domestic course work or testing, or whose native language is not English, must take the Examination in English as a Second Language upon entering UC Davis. Depending on the

results of the exam, students may be required to enroll in appropriate classes until they have achieved the necessary language skills.

## CAMPUS ADMISSION STANDARDS

The University of California makes every effort to provide a place for all California resident applicants who meet the minimum UC admission requirements and file an application during the appropriate priority filing period.

In recent years, UC Davis has received more applications than the number of spaces available. When UC Davis cannot accept all eligible applicants, it uses standards that are **more demanding than the minimum requirements** to select students. These standards, which are called selection criteria, identify those students who have demonstrated the capacity for high academic achievement and who have a variety of other qualities that can contribute to the strength and diversity of the campus community.

The selection criteria described below will be used for applicants for the fall 1999 term. The criteria may differ for the winter and spring terms because enrollment targets and applicant qualifications change. Applicants for winter or spring should contact Undergraduate Admissions and Outreach Services for more information.

### Selection Guidelines

Each campus, in consultation with the Office of the President, develops enrollment targets that specify the number of new freshman and advanced standing students expected to enroll. Campuses that receive more applications than required to meet their enrollment target admit students using the criteria described below.

### Freshman Applicants

**Academic Criteria** (*used to select up to 60 percent of admits*): UC Davis selects freshman applicants who have made the greatest effort to fully prepare academically as measured by the following criteria:

1. Calculated GPA on all academic courses completed in the "A to F" subject areas, with additional points given for honors courses. Maximum value is 4.00.
2. College entrance test scores—SAT-I or ACT **and** the three SAT-II test scores.
3. The number and content of college preparatory courses taken in academic subjects beyond UC minimums.
4. The number of university-approved honors or advanced placement courses completed or in progress.

**Supplemental Criteria** (*used to select up to 40 percent of admits*): Applicants are evaluated using the selection cri-

teria described above in conjunction with the following supplemental criteria:

1. Personal accomplishments, talents, school and community experiences or interests that will contribute to the educational environment of the campus.
2. Special circumstances that may have affected the applicant's life, including personal hardship and economic and educational disadvantage.

### Transfer Applicants

**Academic Criteria:** Top priority for admission consideration is given to UC-eligible California community college junior level transfer applicants with 60 semester/90 quarter units of transfer work. Other UC-eligible transfer applicants will be admitted if space is available.

When applications far exceed the number of spaces available—for majors such as engineering, biological sciences, computer science, exercise science, international relations and psychology, for example—the completion of specific lower division preparatory courses for the major is required. Contact Undergraduate Admissions and Outreach Services for information on which majors are so impacted.

**Supplemental Criteria:** The same supplemental criteria described above for freshmen are used.

### Notification and Acceptance of Admission

Upon completion of a review of your academic records, you will be notified of your admission status by letter.

The length of time before admission notification varies, depending upon the completeness of your application. For example, most applicants for fall quarter will be notified of their admission status between March 1 and mid-March for freshmen, and March 1 and May 1 for transfer applicants. When you receive your notification of admission you will also receive an important form called the **Statement of Intent to Register (SIR)**. Complete the form and return it to the Cashier's office, along with the required *nonrefundable* \$100 deposit, in order to complete the admissions process. This advance deposit is applied to your university registration fee as long as you register in the quarter to which you are admitted. EOP applicants are not required to submit the \$100 advance deposit; however, they will pay full registration fees at the time of registration.

The Statement of Intent to Register (SIR) for the fall term should be returned by May 1 (freshman) or June 1 (transfer) to notify the campus that you wish to attend. Students admitted to winter or spring quarter must return the SIR by the date specified in the notification letter of admission.

## READMISSION

If you are a former UC Davis undergraduate student planning to resume studies at the Davis campus as an undergraduate, you must file an Application for Readmission, available in the Office of the Registrar, and pay a nontransferable, nonrefundable fee of \$40. (You are a former student if you have interrupted the completion of consecutive terms of enrollment on the Davis campus.) Official transcripts of all work you may have

attempted in the interim must be submitted to the Office of the Registrar.

Students applying for readmission must file their applications on or before the following deadlines:

| Quarter     | Deadline Date    |
|-------------|------------------|
| Fall 1998   | July 31, 1998    |
| Winter 1999 | October 30, 1998 |
| Spring 1999 | January 29, 1999 |

## SPECIAL PROGRAMS

### Concurrent Enrollment

Concurrent courses are regular university courses open to the community on a space-available basis through University Extension. This program allows an individual to pursue academic interests and to test academic abilities at the university.

For information, write to the University Extension office, Research Park, University of California, Davis, CA 95616 (530-757-8777).

### Educational Opportunity Program (EOP)

The Educational Opportunity Program (EOP) assists students from economically, socially, and/or educationally disadvantaged backgrounds. EOP can help students with the admission application process and offers academic, social and cultural support. (See also under the "Academic Advising and Student Resources" chapter.) Application fee waivers and financial aid are available to those individuals with demonstrated financial need. Contact Undergraduate Admissions and Outreach Services for information on obtaining fee waivers, and contact the Financial Aid Office regarding financial assistance. Once enrolled, contact the EOP Information Office for a quarterly newsletter and class information.

To apply for the program, each applicant must complete the regular UC admission application form and complete the appropriate items related to EOP. In addition, the applicant is advised to discuss the reasons for requesting EOP assistance in the required personal statement.

### Limited Status

Students in limited status are those whose special attainments qualify them to take certain courses in the university toward a definite and limited objective. To apply for limited status admission, you must either have a bachelor's degree but not be a candidate for an advanced degree, or have completed a substantial amount of college work with a satisfactory grade point average. You must submit an undergraduate application with fee as well as a limited status petition and official transcripts from all schools attended. As a limited status student you will be expected to maintain a certain scholarship average during a predetermined time of enrollment.

Application filing dates are the same as those for new undergraduate applicants. Fees for limited status students are the same as those for new applicants. You will not be admitted to limited status for the purpose of raising a low scholarship average.

Admission to the College of Agricultural and Environmental Sciences requires the approval of the undergraduate admissions director and the dean of the college.

Enrollment pressures have necessitated closing this category of admission for the College of Engineering and the College of Letters and Science.

### Second Baccalaureate

If you have a bachelor's degree substantially equivalent to one that is granted by the University of California, you **may** be allowed to enroll as an undergraduate seeking a second bachelor's degree. Admission in this category will depend upon a superior academic record and clear evidence of a change in objective.

Admission to the Colleges of Agricultural and Environmental Sciences and Engineering requires the approval of the undergraduate admissions director and the dean of the college. You must submit an undergraduate application, a second baccalaureate petition (except College of Engineering) as well as official transcripts from all schools attended. Application filing dates are the same as those for new undergraduate applicants.

*The College of Engineering will accept applicants if their first degree is **not** in engineering **and** if they complete the lower division engineering program at a California community college. Enrollment pressures have necessitated closing this category of admission for the College of Letters and Science.*

### Special Status

The special status classification is for applicants 21 years of age or older who have not had the opportunity to complete a satisfactory high school program or who have not completed a substantial amount of college work, but by reason of special attainment or background may be prepared to undertake certain courses at UC Davis toward a definite and limited objective.

You will not be admitted to special status for the purpose of fulfilling requirements for admission as a regular student. Conditions for admission are determined by the admissions director and are subject to approval by the dean of Agricultural and Environmental Sciences. Admission is for a specified time only and a prescribed scholastic average must be maintained. Application, special status petition, fees and filing dates are the same as those for new applicants.

*Enrollment pressures have necessitated closing this category of admission for the College of Engineering and the College of Letters and Science.*

## ADMISSION CHECKLIST

- 1.** Apply via the World Wide Web at <http://www.ucop.edu/pathways>. You can also obtain the *Application for Undergraduate Admissions and Scholarship* from your local high school, community college, or a campus of the University of California. If you are not a California resident and cannot apply via the web, request an application from Undergraduate Admissions and Outreach Services, 178 Mrak Hall, University of California, One Shields Avenue, Davis, CA 95616-8507.
- 2.** Complete the application, including the essay, and list the college and major you prefer. Attach a check or money order to cover the application fee with your application materials, and return them in the preaddressed envelope **during the priority filing period for the quarter in which you are interested**; do not attach any other documents.
- 3.** **Keep a copy of your application and essay.**
- 4.** Keep the notices you receive from both the Undergraduate Application Processing Service and the Undergraduate Admissions offices.
- 5.** If you are applying from high school, *do not send* a preliminary transcript unless asked to do so by Undergraduate Admissions and Outreach Services. Please arrange to have official test scores forwarded by the testing agency. If you are applying as a transfer student, arrange to have **all** official transcripts sent to each UC campus to which you applied.
- 6.** High school applicants for the fall quarter should take the SAT-I or ACT **and** the **three** SAT-II tests **no later than December**. We strongly encourage you to complete these tests by the November test date.
- 7.** Undergraduate Admissions and Outreach Services may request additional information, such as official transcripts, or confirmation of work in progress. Send this information right away so your application can be evaluated without delay.  
**Your eligibility for admission cannot be evaluated until all your application materials are received**; i.e., application form, filing fee, essay, official transcripts (if required), work in progress, and test scores (if required).
- 8.** If you are admitted, keep your admission letter for your records.
- 9.** Return your “**Statement of Intent to Register**” (SIR), “Statement of Legal Residence,” Student Address form, and the nonrefundable advance deposit of \$100 (if required) no later than the date stated on the SIR, so you can be authorized to complete registration.
- 10.** After your SIR is received, you will be sent information from the Cowell Student Health Center. Return your completed Medical History and Immunization forms to the Cowell Student Health Center as soon as possible.

**FEES, EXPENSES  
AND FINANCIAL AID**

---

**FEES AND EXPENSES**

Give careful consideration to the total financing of your university education. If you will need funds beyond those that you and your family can provide, you should apply for financial aid well in advance of enrollment. The deadlines for applying for financial aid (grants, loans, work-study and scholarships) are listed on the following pages.

For details concerning fees and deposits, consult the publication *1998-99 Student Fees and Deposits*, available from the Office of the Registrar. Current fees are also published in the current *Class Schedule and Room Directory*, and on the World Wide Web at: [http://www.pbo.ucdavis.edu/student fees/](http://www.pbo.ucdavis.edu/student%20fees/)

At the time of registration each quarter, every student must pay the quarterly fees as shown in the box at right. (A Registration Fee Deferred Payment Plan, which allows students to pay quarterly fees in three monthly installments, is available.)

**Course Materials Fees**

Students may be charged fees in some courses for the use, rental or consumption of materials, tools or equipment, or for the costs of materials or services necessary to provide a special supplemental educational experience. For example, course materials fees may cover the purchase of chemicals and glassware for a science laboratory or of art supplies for an art studio class. They might also cover film rentals, field trips, or the purchase or rental of specific equipment. The campus is currently reviewing the application and extent of such fees.

**Part-Time Students**

Students approved for enrollment on a part-time basis pay the same fees as full-time students, but pay only one-half of the Educational Fee. Part-time nonresidents pay one-half of the Nonresident Tuition Fee. Undergraduates file their part-time petition with the Office of the Registrar, 12 Mrak Hall. Graduate students file their petition with Graduate Studies, 250 Mrak Hall.

**UC Employee-Student Fees**

Reduced fees are available to UC career employees and certain UC retirees who are qualified for admission to the university. Once admitted, the employee-student must file a petition for the reduction in fees before each quarter of enrollment. Employee-students pay one-third of the full-time Registration Fee, one-third of the full-time Education Fee. Employee-students also pay the Memorial Union Fee and the Student Facilities Safety Fee. Please refer to the quarterly *Class Schedule and Room Directory* for fee information.

Employee students may enroll for up to nine units or three courses per quarter or semester, whichever is

**Undergraduate Student Fees**

*These are the proposed fees for the 1998-99 academic year. Because fees are subject to gubernatorial, legislative and regental action, these fees may change without notice.*

\* Undergraduates may elect to purchase university-sponsored health insurance at registration. The fee for the 1998-99 academic year is approximately \$138.00 per quarter. Foreign undergraduate students and students in the Family Nurse Practitioner and Physician Assistant Programs must participate in the Graduate Student Health Insurance Plan (GSHIP) and pay a Graduate Student Health Insurance Plan Fee of approximately \$133.50 per quarter.

greater. Information is in the Personnel Policies For Staff Members Manual (section 51) available in department offices, at Shields Library, the Staff Development and Professional Services Office, and on the World Wide Web. Petitions can be obtained through the employee's unit.

**Graduate and Professional Student Fees**

Graduate and professional student fees are listed in the relevant chapters of this catalog.

**Motor Vehicle Parking Permit and Bicycle Licensing Fees**

Parking permit rates are available at Parking Services or you may call (530) 752-8277.

A California State License fee is required for all bicycles on campus (initial license, \$6; renewals, \$3).

**Costs for a Year at UC Davis**

The costs listed below are average costs, and your own living expenses may differ somewhat from these. More information on living expenses can be found in the section on housing or from the Financial Aid Office.

| <b>Average Student Costs Annually</b>            |                    |
|--------------------------------------------------|--------------------|
| <b>Undergraduate</b>                             |                    |
| Fees .....                                       | \$4,157            |
| Books and supplies .....                         | \$820              |
| Housing and Food .....                           | \$5,161            |
| Personal expenses .....                          | \$1,978            |
| Transportation.....                              | \$673              |
| <b>Total (off-campus residence) .....</b>        | <b>\$12,799</b>    |
| <b>Total (on-campus residence) .....</b>         | <b>\$13,916</b>    |
| <b>Graduate (single; living off campus).....</b> |                    |
| Graduate School of Management .....              | \$21,407           |
| School of Law                                    | \$21,651 to 21,460 |
| (depending upon the year in school)              |                    |
| School of Medicine                               | \$22,238 to 23,988 |
| (depending upon the year in school)              |                    |
| School of Veterinary Medicine                    | \$20,357 to 21,569 |
| (depending upon the year in school)              |                    |

**International Student Expenses**

International students are responsible for all of their expenses while studying at UC Davis. The expenses include non-resident tuition, educational fees, room and board and a modest amount for personal expenses. For the 1998-99 academic year, we estimate the cost will be \$25,000. Because the exact cost for tuition and fees is not determined until just before the beginning of the academic year, \$25,000 is only a preliminary figure. This minimum allowance may be increased without advance notice.

During the admission process, most international undergraduate students are required to complete the Financial Statement for Students Seeking Nonimmigrant Status form certifying that funds are available for twelve months support. It is very important that students have adequate, reliable, and continuing financial support for the whole time they are here. After students arrive in the United States, it is extremely difficult to obtain additional funding. The university does not offer grants or financial aid to international undergraduate students.

All students need to be aware that there are numerous initial expenses during the first few months, including

tuition and fees, an initial down payment for housing, food and personal expenses. We suggest that you bring a minimum of \$4,000 for immediate expenses. Careful budgeting is essential for international students.

**Fee Refunds**

**Cancellation, Withdrawal and Fee Refunds**

To cancel your registration before the first day of instruction or to withdraw from the university on or after the first day of instruction, you must complete a Notice of Cancellation/Withdrawal form and return the form to the Office of the Registrar. If you don't submit a Notice of Cancellation/Withdrawal form, you will be liable for fees according to university policy (below). No exceptions will be made to this policy.

For students who paid fees and cancel or withdraw with official approval before the end of any quarter, fees may be refunded according to the Schedule of Refunds below.

The effective date for determining a refund of fees is the date you file a completed Notice of Cancellation/Withdrawal form with the Office of the Registrar, and it is presumed that no university services will be provided to you after that date. The percentage of fees that may be refunded is determined by the number of calendar days (not school days) elapsed, beginning with the first day of instruction.

If you enrolled in classes, you will be dropped from all of your courses automatically when the Notice of Cancellation/Withdrawal form is processed. If you enrolled, but have not paid fees in full by the tenth day of instruction, you will be dropped for non-payment and officially withdrawn from the university.

**New Undergraduate Students:**

The nonrefundable \$100 deposit paid when you accepted admission and returned your Statement of Intent to Register (SIR) is withheld from the registration fee and the Schedule of Refunds (below) is applied to the balance of fees assessed.

Thus, before or on the first day of instruction, registration fees paid are refunded in full minus \$100. After the first day of instruction, the nonrefundable \$100 deposit is withheld from the registration fee and the Schedule of Refunds is applied to the balance of fees assessed.

**All Continuing Students, Readmitted Students and New Graduate Students:**

On or before the first day of instruction, registration fees are refunded in full minus a \$10 service charge for cancellation/withdrawal. After the first day of instruction, the Schedule of Refunds is applied to the total of fees assessed.

**Planned Educational Leave Program**

The Schedule of Refunds also applies to students who participate in the Planned Educational Leave Program (PELP). Thus, for a full refund of registration fees paid, you must file a completed approved PELP form with the Office of the Registrar before or on the first day of instruction. See Planned Education Leave in the "Academic Information" chapter.

**Schedule of Refunds**

The Schedule of Refunds applies to all continuing and readmitted students and new students **who do not receive** federal financial aid.\*

The Schedule of Refunds refers to calendar days beginning with the first day of instruction. The number of days elapsed is determined from the date the completed Notice of Cancellation/Withdrawal form is returned to the Office of the Registrar. Percentages listed (days 1-35) should be applied respectively to University Registration Fee, Educational Fee, Nonresident Tuition, and other student fees.

**University Registration Fee, Educational Fee, Nonresident Tuition and other student fees:**

| <b>Calendar Days Elapsed</b> | <b>Percentage of Fees Refunded</b> |
|------------------------------|------------------------------------|
| 0-1                          | 100% less \$10.00                  |
| 2-7 days                     | 90%                                |
| 8-18 days                    | 50%                                |
| 19-35 days                   | 25%                                |
| 36 days and over             | 0%                                 |

\*New students who receive federal financial aid and withdraw during their first academic term may be refunded fees according to a Modified Fee Refund Schedule, available at the Financial Aid Office.

**Refund of Health Insurance Fee**

If you paid the health insurance fee and you are cancelling your registration on or before the first day of instruction, you are entitled to a 100 percent refund of this fee. **Undergraduates** must contact the Health Insurance Office at 530-752-2612 to receive the refund. **Graduates** will get an automatic refund from the Accounting Office.

After the first day of instruction, no refund of the health insurance fee will be issued. Any questions regarding the refund of health fees for withdrawals should be directed to the Student Health Center.

**FINANCIAL AID**

Information:  
Financial Aid Office  
227 Voorhies Hall  
530-752-2390; 530-754-6073 (TTY);  
undergradfinaid@ucdavis.edu; http://faoman.ucdavis.edu

The Financial Aid Office provides financial assistance in the form of scholarships, loans, grants and work-study employment. Financing an education is a responsibility that is shared by the student, the parents of dependent students and the Financial Aid Office (through distribution of federal, state and university funds). All students are expected to work to help finance their education.

**Financial Aid Deadlines**

Priority filing period for grants, loans, work-study and California Student Aid Commission applications for 1999-2000 Jan. 1–Mar. 2

Deadline to file for fellowships and graduate scholarships for 1999-2000 with Graduate Studies Jan. 15

Students who miss the March 2 deadline should still apply for financial aid. Even though Cal Grant, scholarship, and work-study funds may be depleted, eligible applicants can receive Pell Grants and Federal Direct Stafford/Ford Student Loans to help meet their need. The Free Application for Federal Student Aid (FAFSA) is available at local high schools, community colleges and the Financial Aid Office. Continuing UC Davis students and prospective graduate students should obtain the FAFSA from the Financial Aid Office in December.

Undergraduates with outstanding academic records are encouraged to apply for scholarships. See “Scholarships and Awards” at the end of this chapter for information about scholarship applications.

Graduate students are eligible for most of the same types of financial aid as undergraduates. In addition, graduate scholarships, fellowships, and teaching and research assistantships are administered through Graduate Studies. State graduate fellowships are awarded to students who are pursuing an advanced or professional degree with intent to become college or university faculty members. Applicants must demonstrate financial need and academic eligibility. The awards pay part of the cost of registration fees and are based on undergraduate grades, test scores, parents’ educational level and consideration of disadvantaged background and parents’ financial information.

Eligibility for most assistance is based upon demonstrated financial need. (However, most scholarships are not based on need.) Eligibility is determined by the following formula: (1) the student is assigned a standard budget reflecting the average costs for a student attending UC Davis; (2) the student’s resources are analyzed according to federal and state regulations; (3) the resources and an expected student contribution from work are subtracted from the budget; the remainder is the amount of eligibility. The Financial Aid Office attempts to fill this amount with a combination of grants, work-study, and loans.

The awards for married students are based on the same basic budget plus the addition of a standard child care allowance, unless documentation is provided about a spouse who is unable to work, in which case a dependent living allowance will also be awarded. Single parents’ awards are based on the single student’s budget and a child care allowance. If single parents’ resources (earnings and benefits) are not sufficient to meet the basic living expenses of their dependents, a standard dependent living allowance may be awarded upon receipt of documentation. The Financial Aid Office can assist student parents who qualify for financial aid with allowances for direct child care costs.

**Satisfactory Academic Progress.** Federal regulations require that financial aid recipients meet the published Standards for Satisfactory Academic Progress for Financial Aid concerning units, grade point average and maximum quarters of attendance allowed to obtain a degree. A copy of these standards is available at the Financial Aid Office. Review the policy in detail and discuss it with your academic adviser.

For more information, contact the Financial Aid Office. Regulations and deadlines are subject to change.

## Types of Financial Aid

### Grants

A grant is an award that does not have to be repaid as long as the student remains eligible. Whenever criteria and funding levels permit, a student's financial aid award includes grants.

**Federal Pell Grants.** All undergraduate financial aid applicants are required to apply for a Federal Pell Grant each year by following the instructions in the financial aid application packet. Recipients must be enrolled at least half time and must maintain good academic standing and make satisfactory academic progress. Eligibility is determined by the federal government according to a formula developed by the Department of Education and approved annually by Congress. All applicants are notified via a "Student Aid Report" (SAR). The amount you receive depends on your financial need.

**Cal Grants** are awarded by the California Student Aid Commission and may be renewed each year. All undergraduate financial aid applicants who are California residents are required to apply for one of these awards. Follow the instructions in the financial aid application packet.

*Cal Grant A* awards are based on financial need and academic achievement. Recipients must complete at least 36 units per academic year. Cal Grant A pays partial registration fees.

*Cal Grant B* awards are based on financial need and are for entering undergraduate students primarily from low-income backgrounds. Recipients are required to complete at least 12 units each quarter. Cal Grant B pays a quarterly stipend for living expenses for first-year students, and a portion of the registration fees plus a quarterly stipend for living expenses for students in their second through fourth years.

**University Grants** are available to both graduate and undergraduate students. The University determines grant eligibility for undergraduates by subtracting a stu-

dent and parent contribution, any federal or state resources the student receives, and a standard work and loan contribution from the cost of attendance. Any remaining eligibility would be funded with UC Grant. Graduate students are awarded UC Grant funds based on need determined by the federal processor.

**Bureau of Indian Affairs (BIA) Grants** are awarded to students who are at least one-fourth American Indian, Eskimo or Aleut as recognized by a tribal group served by the Bureau of Indian Affairs and who show financial need. Applicants must submit a Free Application for Federal Student Aid (FAFSA) and provide supporting documents. Write to the agency that administers your tribal affairs and request a BIA Higher Education Assistance application. The BIA Financial Aid officer on campus can help you complete the application. The amount of BIA grant depends on need and availability of funds at each BIA agency.

### Loans

Financial Aid almost always includes a long-term loan. Repayment of these loans (with the exception of Federal Direct PLUS loans) begins after you graduate or withdraw from school. Students are encouraged to work as much as possible (while remaining full-time students) and to develop modest personal budgets to keep final loan indebtedness within a manageable range.

**Federal Perkins Loans** are for U.S. citizens or permanent U.S. residents. Loans may be limited to a percentage of student's need because of demand and limited funds. This is a *subsidized* loan, which means the federal government pays the interest on the loan while the student is enrolled in school. Repayment starts six to nine months after graduation or withdrawal from school and may be extended over 10 years. Additional deferments are possible for temporary total disability or volunteer service in a private, non-profit organization, VISTA or the Peace Corps. Some teachers of students from low-income families and full-time teachers of handicapped children may also qualify for partial loan cancellation.

---

*Students in the Residence Halls have access to ResNet, a data network that gives them a direct connection to the Internet.*

---

- \$3,000 undergraduate annual loan limit
- \$15,000 undergraduate maximum loan limit
- \$30,000 maximum for graduate students, including loans for undergraduate studies
- 5 percent interest (subject to change)

**Health Profession Student Loans (HPSL)** are awarded to students in the Schools of Medicine and Veterinary Medicine who demonstrate exceptional financial need. Parental income information is required for all applicants regardless of age and dependency status. HPSL borrowers must commit themselves to complete a primary care residency program, and practice in a primary care field until their HPSLs are repaid.

- \$2,500 plus fees maximum for veterinary medicine and first-year medical students
- \$3,333 plus fees maximum for medical students in the second, third or fourth year of study
- 5 percent interest
- Repayment begins twelve months after receipt of the degree or withdrawal

#### **Federal Direct Subsidized and Unsubsidized**

**William D. Ford Student Loans (Direct Loans)** are available through the Financial Aid Office. Subsidized loans are based on financial need, and interest accrued while the student is in school is paid by the federal government. Unsubsidized loans are available to students regardless of income and assets, and there is no interest subsidy. Students are advised to speak with a Financial Aid officer before borrowing an unsubsidized loan.

- Undergraduate students may borrow up to annual maximums of \$2,625 for freshmen, \$3,500 for sophomores, and \$5,500 for juniors and seniors, up to a maximum aggregate indebtedness of \$23,000.
- Independent undergraduate students may borrow unsubsidized Direct Loans up to annual maximums of \$4,000 for freshmen and sophomores, and \$5,000 for juniors and seniors.
- Graduate and professional students may borrow up to \$8,500 per year, not to exceed a maximum aggregate of \$65,500 for combined undergraduate and graduate borrowing.
- Graduate and professional students may borrow unsubsidized Direct Loans up to an annual maximum of \$10,000.
- Variable interest rate is adjusted annually, capped at 8.25 percent.
- Repayment begins six months after graduation or withdrawal.

**Federal Direct Parent Loans for Undergraduate Students (Direct PLUS)** are government-insured loans that are made to parents of dependent students.

- Parents may borrow Direct PLUS up to the cost of education minus other financial aid received during the years the dependent student is an undergraduate.
- The maximum interest rate is 9%. There is no interest subsidy for this loan.
- Repayment begins within 60 days after loan disbursement.

**Short-Term Loans** meet temporary or emergency financial needs of registered students. Loan funds are provided by UC Davis alumni, ASUCD, the Cal Aggie Foundation, the Regents of the University of California, and private donors.

- Emergency Loans: \$200 maximum. The maximum repayment period is 30 days.
- Short-Term Loans: \$300 maximum. The maximum repayment period is five months or the end of the academic year.
- Assistant Loans: graduate students who are in the teaching assistant, research assistant, associate-instructor or postgraduate researcher classifications can apply for a maximum of one month's salary. The maximum repayment period is six months or the end of the academic year.

For information about how to apply, applications are available in the display rack on the first floor of Voorhies Hall. Application procedures vary slightly during the registration cycle of each quarter. Check the Short-Term Loan bulletin board outside 116 Voorhies Hall for instructions.

#### **Work-Study**

Information:  
Student Employment Center  
16 South Hall  
530-752-0520; sec@ucdavis.edu; <http://jobs.ucdavis.edu>

College work-study programs enable students to earn part of their financial aid through part-time employment. To participate, you must first receive work-study as a part of your financial aid package. Your work-study award offers you both money for your education and work experience. You should obtain a work-study job or ask to defer your work-study before October 31 or your award will be canceled. The Student Employment Center coordinates all undergraduate college work-study programs.

Work-study funds for graduate students are allocated directly to the chairpersons of the graduate programs or departments. Graduate students seeking work-study funding should contact their respective departments for further information.

**Federal College Work-Study Program** is funded by the federal government. Employment may be on or off campus with profit or nonprofit organizations. Many community service work-study jobs are available that can provide you with an educational and rewarding work experience. To be eligible, you must be a citizen or permanent resident of the U.S., carry at least a half-time academic course load, and maintain minimum academic progress.

**California State Work-Study** is funded by the state, and employment may be with profit or nonprofit organizations. The employment must be educationally beneficial or related to a particular career interest or the exploration of a career option. To be eligible, students must meet the requirements for federal student aid eligibility and be California residents.

**University Work-Study** is funded by the University of California, and employment is limited to jobs on campus.

## UNDERGRADUATE SCHOLARSHIPS AND AWARDS

Information:  
Scholarship Office  
228 Voorhies Hall  
530-752-2804; ugscholofc@ucdavis.edu;  
<http://faoman.ucdavis.edu/schol.htm>

Mailing address:  
Scholarship Office  
University of California  
One Shields Avenue  
Davis, CA 95616-8696

UC Davis recognizes outstanding students with scholarships awarded on the basis of academic excellence and exceptional promise. The Scholarship Office administers approximately 200 different undergraduate scholarships. Many more scholarships are handled through outside agencies.

Scholarship recipients are chosen by committees made up of both students and faculty. In addition to academic records (a minimum grade point average of 3.25 is required), selection may be based on letters of recommendation, test scores, and a personal essay in which your university goals and objectives are stated. *Some awards are limited to students in specific majors or colleges, residents of certain geographical areas, students of a particular class standing, or students with demonstrated financial need.* Most scholarships are not renewable and you must re-apply each year for scholarship aid.

Students applying to the university for the fall quarter are considered for scholarships using the same forms completed for admission purposes. Winter and spring quarter admission applicants should contact the Scholarship Office for instructions no later than November 1. Continuing students should obtain scholarship applications from the Scholarship Office in October. These applications are due in early December. Announcement of winners is usually made beginning in April.

Graduate students are also eligible for various scholarships and fellowships. (See the Graduate Studies chapter.)

**Regents Scholarships**, among the highest honors that undergraduates at the university can receive, are granted to exceptionally promising freshmen or juniors enrolling in the fall quarter. Awards may be honorary (a \$1,000 per year award) or may be accompanied by a stipend generally covering the difference between family resources and yearly educational costs. These scholarships are renewable as long as you maintain a 3.25 grade point average.

- Dollar amounts vary—up to full financial need
- 2-year and 4-year renewable scholarships

**Alumni Scholarships**, provided by the Alumni Association in cooperation with the university, are based primarily upon leadership and scholastic achievement.

Your financial need and extracurricular activities may also be considered.

- \$1,000 maximum
- New undergraduates only
- Selection by local Alumni Association chapters

**Military Scholarships** are awarded to outstanding high school seniors without regard to financial need, as well as to UC Davis students who have demonstrated exceptional leadership and scholastic achievement during their freshman and/or sophomore years. Eligible high school seniors apply for the full 4-year scholarship and must file applications by November. UC Davis scholarship students participate in the Military Science (ROTC) Program. Information and applications are available from the Department of Military Science, 125 Hickey Gymnasium, 530-752-0543.

- Full fees, books and supplies
- \$1,000 per year for miscellaneous expenses
- 1-, 2-, 3-, or 4-year scholarships

**Other Scholarships** are made possible by individual donors, private corporations, and various agencies. Many organizations and groups conduct their own scholarship programs. In most cases, you apply directly to these sponsoring groups. Free scholarship search services are available through our web site.

- Generally \$100 to \$3,200

**Special Prizes** at UC Davis recognize outstanding performance, achievement and promise in special programs or majors. The most prestigious prize is the University Medal, presented to the most outstanding graduating senior.

- Plaques or certificates and cash awards
- College and school medals to outstanding graduates

# **STUDENT LIFE**

**LIVING AT DAVIS****On-Campus Housing****Residence Halls**

Information:  
 Student Housing Office  
 530-752-2033; housing@ucdavis.edu;  
<http://www.housing.ucdavis.edu>

Living on campus adds a measure of convenience to your life and helps familiarize you with the campus. Some 3,600 undergraduate and graduate students live on campus each year, including about 90 percent of freshman students and 25 percent of transfer students. In each of the residence hall complexes, students and staff help create and maintain an environment conducive to personal growth and educational achievement.

Rooms are furnished with a bed, desk and chair, bookcase, chest of drawers, study lamp and bulletin board for each resident. Cost depends on which of the eight meal plans you choose. The total room-and-board rate for the 1998-99 academic year is \$5,800–\$6,585 for a double-occupancy room and \$6,415–\$7,200 for a single room (of which there are very few available to new residents). Rates shown have not yet been formally approved.

All new freshmen whose Statements of Intent to Register (SIR) are received on time are guaranteed residence hall housing as long as they complete all of the instructions that accompany their contracts. Graduate students are offered contracts on a space-available basis in Lysle Leach Hall.

If the Davis campus is your choice, the Student Housing Office mails housing information with your admissions letter. If you have a physical disability that requires special housing accommodation, please send a detailed letter of explanation to the Housing Residential Services Office, Room 160, Student Housing Office, at the time you return your Statement of Intent to Register. Your housing contract will be mailed to you between May 15 and July 15. At that time you will be able to choose your meal plan.

**Student Family Housing**

Information:  
 Orchard Park/Solano Park Apartments  
 530-752-2033

Orchard Park and Solano Park Apartments offer 476 university-operated, furnished and unfurnished on-campus apartments for UC Davis student families. The monthly rates for the 1998-99 academic year will be as follows:

- Orchard Park
  - two-bedroom unfurnished apartment, \$526
  - two-bedroom furnished apartment, \$559
- Solano Park
  - one-bedroom unfurnished apartment, \$427
  - two-bedroom unfurnished apartment, \$485

Rates shown have not yet been formally approved. Once approved, they will be effective Aug. 1, 1998. Vacancies in Orchard Park/Solano Park Apartments are filled from a waiting list based on the date the application is received. For a fall assignment, you should apply at least six to nine months in advance. For an assignment during the remainder of the year, the waiting period is usually shorter. (You may submit an application before you are admitted to the university and before you are married, but you must show documentation of your student or parental status before occupancy can be granted.) If a member of your family has a physical disability that requires special housing accommodation, please attach a detailed letter of explanation to your application.

Cooperative playgroups are sponsored by the student family housing parents' associations of Orchard and Solano Parks (530-759-0146). Each program may serve up to 15 children aged 2 to 5 years.

**Russell Park**

Information:  
 530-753-7322

*Privately owned and managed* on-campus living accommodations are available for student families. Russell Park features one-, two-, and three-bedroom unfurnished units.

### Graduate Student Apartment Housing

Information:  
The Atriums  
530-753-0659

The Atriums offers on-campus living accommodations for single graduate students. The *privately owned and managed* apartments feature studio and two-bedroom unfurnished units.

### Off-Campus Housing

The majority of UC Davis students live off campus. The City of Davis has ample apartments for rent, from one-person studio apartments to 5- or 6-person suites. Townhouses, duplexes and houses throughout the city are also available for student rental.

### Transportation and Parking

Information:  
Transportation and Parking Services (TAPS)  
Extension Center Drive  
530-752-8277  
Motorist Assistance Program: 530-752-3729  
Bicycle Program: 530-752-BIKE

The central campus is closed to motor vehicles. Walking and bicycling are the usual ways to traverse the campus, though some students prefer roller blades.

**Bicycles.** All bicycles ridden or parked on campus must have a current California State Bicycle License. You may get a license or renewal tag at TAPS. Bicycle riding and parking regulations are strictly enforced. Be sure to lock your bicycle to the provided racks and pods—bike theft is common in Davis. The **Bike Barn** offers repairs and rentals, and sells bicycle parts and accessories. Students can also check out tools to do their own repairs or maintenance.

**Buses.** Unitrans, 13 bus lines operated by the Associated Students, serves the campus and city year round. Unitrans is free to undergraduate students with a valid registration card; others may ride by paying the single ride fare or by purchasing passes from TAPS or at the Campus Box Office. Full service is provided each UC Davis school day (Monday through Friday) and Monday through Thursday night during the regular school year—fall, winter and spring quarters. Reduced schedule bus service operates during the summer, finals week, all academic break periods and on Saturdays. Schedules are available at the MU Campus Information Center, bus terminals, Davis City Hall and the Unitrans office.

**Parking.** If you park a vehicle (including a motorcycle or moped) on campus, you must have a valid parking permit or pay at a meter. You may buy a daily permit at dispensers in any Visitor/Public parking lot. All other lots require long-term permits, which you may purchase at Parking Services. UC Davis encourages ridesharing. Registered carpools and vanpools receive reduced park-

ing rates and preferential parking. Parking lots on campus are financed solely by fees collected from parking permits and meters. For information on transportation alternatives, public transit, or commuter match assistance, call 752-MILE or visit TAPS.

**Shuttles.** The UCD/UCDMC Shuttle provides hourly service Monday through Friday between the Davis campus and the medical center in Sacramento. The shuttle is available to all members of the UC Davis community.

The Intracampus Bus provides transportation between the Davis campus and the Berkeley campus for university employees, registered students and other university affiliates. Call Fleet Services at 752-8287 for schedule information and reservations.

### Student Employment

Information:  
Student Employment Center  
16 Basement, South Hall  
530-752-0520; <http://jobs.ucdavis.edu>

The Student Employment Center advertises student employment opportunities both on and off campus. Full-time or part-time students, students on PELP, students' spouses, and students with a letter of acceptance for the following quarter who have not yet registered are eligible.

Full-time, part-time and temporary jobs are available year-round. New listings are posted daily. Listings of employment opportunities for the summer with government agencies, camps and resorts throughout California are located at the center, as are job listings of parents wishing to hire child care providers. Registered students may access employment opportunities on-line at the World Wide Web address given above and use their student identification number as their password.

### Computing and Internet Resources

Information:  
I.T. Express  
First Floor, Shields Library  
530-754-4357; [ithelp@ucdavis.edu](mailto:ithelp@ucdavis.edu); <http://it.ucdavis.edu>

Each year, more services and information are available to registered students through e-mail, news groups and the Internet. Many departments and offices have information on the World Wide Web that students will find useful. New undergraduate students will find a personal computer very useful in their studies. Campus computing accounts are available to all registered students through the Division of Information Technology. You can activate your account at I.T. Express at the copy services desk on the first floor of Shields Library, and then use the microcomputers in computing laboratories on campus. For your personal computer, you can purchase the Bovine Online installation program at the UCD Bookstore or I.T. Express and use it to open your computer account, send e-mail and surf the Internet.

### Child Care Services

Information:  
260 Student Housing Office  
530-752-5415; [baashby@ucdavis.edu](mailto:baashby@ucdavis.edu);  
<http://www.housing.ucdavis.edu/general/child.htm>

Student Housing/Child Care Services provides child care information, referrals, and publications and serves

as the university's liaison with the on-campus day care centers and the off-campus child care services available through the City of Davis Parks and Community Services/Child Care.

### On-Campus Child Care Programs and Resources

- **LaRue Park Children's House** (753-8716; [laruepark@ucdavis.edu](mailto:laruepark@ucdavis.edu)) and **Russell Park Child Development Center** (753-2487; [jonhillis@ucdavis.edu](mailto:jonhillis@ucdavis.edu)) are privately owned and operated, serving infants through kindergarten-age children. Residents of student family housing pay reduced rates.
- The **Center for Child and Family Studies** (752-2888), a teaching and research laboratory for the Department of Human and Community Development, offers four part-time programs for children aged six months to five years. Children are selected from a waiting list according to criteria designed to meet academic goals.
- The UC Davis **Breastfeeding Support Program** provides lactation sites with electric breast pumps, registration and orientation sessions, and sales of breastfeeding supplies for mothers who wish to continue breastfeeding their infants after returning to school or work. Call 752-5415 for information.
- The Women's Resources and Research Center (752-3372) sponsors the **Child Emergency Notification Service**, which offers schools and child care providers a way to contact student parents in class if their child has a health-related emergency.
- The **Student Employment Center** (752-0520) posts listings for parents seeking license-exempt providers.

### Community Child Care Programs

Information and application:  
City of Davis Parks and Community Services/Child Care  
604 Second Street  
Davis, CA 95616  
530-757-5691;  
<http://city.davis.ca.us/city/parks/ssvcs/caremain.htm>

**City of Davis Parks and Community Services/Child Care** maintains information on licensed family child care homes, day care centers, nursery schools, playgroups and other family-related services for Yolo County. Additional services include parenting workshops and handouts; a bimonthly newsletter; a parenting resource library; and a book, video and toy lending library. The program provides referrals to licensed family child care homes and administers the **UC Davis Child Care Subsidy Program** and the **Child Care Grant**, both of which can help low-income families pay for child care.

## COUNSELING AND HEALTH SERVICES

### Counseling Center

Information:  
219 North Hall  
530-752-0871; <http://www.counselingcenter.ucdavis.edu>

The Counseling Center offers free, confidential psychological, psychiatric and peer counseling services to all registered students having problems that affect their academic progress and sense of well-being. Staff members offer assistance with personal and interpersonal

issues such as relationships, family, stress, cultural differences, assertiveness, self esteem and intimacy. Additionally, staff can help with educational/vocational concerns such as coping with university life, academic performance, test anxiety, reentry adjustment and determining life goals. Services for relationship issues are also offered to students and their partners.

Services are free to all registered students. Confidentiality is strictly maintained in accordance with state laws and ethical standards. Walk-in services are available daily if you need immediate assistance. The center also provides short-term individual counseling, group counseling and assistance with off-campus referrals. Career interest testing, personality testing and information about graduate school admissions tests and the Planned Educational Leave Program are available.

Students, faculty or staff who are concerned about a student or desire consultation or assistance in making a referral are encouraged to call the center. To make an appointment, call or come to the Counseling Center.

### Cowell Student Health Center

Information:  
Cowell Student Health Center  
530-752-2300; <http://healthcenter.ucdavis.edu>

As an enrolled student, you are eligible to use the Health Center from the first day of the quarter through the last day of the quarter or to the date of official withdrawal. Health Center services and facilities include advice nurse; general outpatient care; regularly scheduled clinics; X-ray, laboratory and pharmacy services; physical therapy; and Women's Clinic. The Health Center does not provide routine dental or optical services.

The services of Cowell Student Health Center are made possible, in part, by the Student Health Services Fee. Co-payments are required for visits and most clinical services. Health Center services are available to students' dependents on a fee-for-service basis.

**Health Insurance.** Graduate, professional and international students must purchase a mandatory insurance plan as part of registration. Undergraduate students may purchase a voluntary plan. You may also purchase a Health Insurance Plan at the Health Center for your spouse and children. For more information, call 752-2612 or visit the Patient Accounts Office at Cowell Student Health Center.

### Health Education

Information:  
Cowell Student Health Center  
530-752-9652

Maintaining and enhancing good health is vital for the successful pursuit of your goals at UC Davis and the rest of your life. The Health Education Program provides information and services through trained peer counselors, health educators, workshops and resource libraries.

**Health Advocates** (752-9651) present small and large group workshops, health information, peer counseling and resource referrals for students dealing with personal substance abuse issues or those of friends/family members, as well as nutrition, personal dietary analysis, exercise, injury prevention, stress management and other wellness issues.

**Peer Counselors in Sexuality** (752-1151) provides peer counseling (in person or by phone) and group presentations on birth control, pregnancy, sexually transmitted diseases (including HIV/AIDS), safer sex, healthy relationships, partner communication skills, sex roles and other issues related to sexuality and reproductive health.

**Peer Counselors in Athletics** (752-6334) is an athlete-to-athlete health promotion program providing outreach presentations on alcohol, tobacco, steroids, racism, and other issues affecting student athletes.

The **Campus Alcohol and Drug Abuse Prevention Program (CADAPP)** (752-6334) organizes campuswide substance abuse prevention programs, as well as providing assessment, education and referral for students with identified needs related to alcohol and other drug abuse. CADAPP coordinates substance abuse services of both *Health Advocates* and *Peer Counselors in Athletics*.

### The House

Information:

Temporary Building 16 (two-story house by Housing Office)  
24-hour hotline: 530-752-2790; business line: 530-752-5665

The House is a professionally managed peer counseling program of the Counseling Center. Students receive confidential support, information and referrals regarding personal or social problems. Well-trained student volunteers assist fellow students through individual peer counseling and a wide variety of workshops and support groups held in an informal setting. No appointment is necessary and services are offered on a drop-in basis from 9:00 a.m. to 11:00 p.m., seven days a week, with 24-hour telephone assistance. The House is wheelchair accessible.

Volunteers for peer counselor positions at the House are accepted each quarter. Students are trained in basic counseling skills and can receive units for training. Transcript notation is also available for quarters working as a peer counselor volunteer.

## ARTS AND RECREATION

Whatever your recreational bent—horseback riding, outdoor activities, music, arts and crafts, or sports—there's a place or program on the Davis campus for you to enjoy your favorite activities.

Social, physical, creative, intellectual and cultural activities and programs provide many healthy activities to offset the stresses associated with a rigorous academic environment. These programs complement the academic mission of the university and enhance the quality of life for the campus.

In addition, the City of Davis has 31 parks with various facilities, including tennis courts, playgrounds, swimming pools, playing fields, and a skateboard facility. The city has several movie theaters, art galleries, the Davis Art Center, Davis Comic Opera Company, and Davis Musical Theatre.

### Campus Recreation

Information:

Memorial Union Programs and Campus Recreation  
Memorial Union, Room 460  
530-752-1730; <http://campusrecreation.ucdavis.edu>

The following programs are available through Memorial Union Programs and Campus Recreation. A catalog of recreational activities is published quarterly, mailed to all residences in Davis and distributed throughout campus.

#### Outdoor Adventures

The Barn (on the corner of California and Hutchison)  
530-752-1995/1730

Outdoor Adventures will help you develop your outdoor skills and plan your outdoor excursions. You can rent equipment of professional quality and arrange for custom-designed trips and group rates. An up-to-date library contains topographic maps, trail guides and other materials. Classes, excursions and clinics in backpacking, rock-climbing techniques, whitewater rafting, kayaking, sea kayaking, mountaineering, cross-country skiing and other sports are offered throughout the year.

---

**The  
Cal Aggie  
Marching  
Band-uh  
is a  
formidable  
presence at  
all UC Davis  
home games.**

---

Outdoor experts conduct many special activities, such as wilderness emergency-care clinics, whitewater river guide training, slide presentations and programs.

#### **Equestrian Center**

Garrod Dr. (southwest of Veterinary Medical Teaching Hospital)  
530-752-2372/1730

The Equestrian Center is open year round, offering trail rides, practice sessions and instruction in both English and Western riding. Group and private lessons are available for beginning through advanced levels, along with training in horse care and stable management. The Equestrian Center sponsors clinics, horse shows, summer equestrian camps and special events, and coordinates the Equestrian Club.

#### **Craft Center**

South Silo  
530-752-1475/1730

The Craft Center is an ideal place to channel your creative energy. Facilities are available on a drop-in basis, or purchase a pass for more frequent use of the equipment and work space. Workshops and classes are offered each quarter in woodworking, weaving, jewelry-making, art and graphics, computer imaging, ceramics, photography, silkscreen printing, welding, leatherworking, stained glass and other crafts.

#### **Recreation Swimming Pool**

Corner of La Rue Road and Hutchison Drive  
530-752-2695 or 530-752-1995/1730

The Rec Pool is a large free-form pool with a separate wading pool, a bathhouse, shuffleboard courts and a large grass area for sunbathing. The staff offers swimming lessons to all age groups and arranges for special events, such as family nights. The pool opens for the season in April and closes in October.

#### **The Games Area**

Games Area (located below the UCD Bookstore)  
530-752-2580/1730

The Games Area features bowling lanes, billiards room, video arcade, lounge and storage lockers. The Games Area conducts bowling leagues, classes, clinics and tournaments for all ages from beginning through advanced skill levels. The facility is fully accessible to those with disabilities.

#### **The Memorial Union (MU)**

MU Campus Information Center  
530-752-2222; infocenter@ucdavis.edu

The MU complex serves as the community center for the campus. The **MU Campus Information Center's** student staff can refer you to people, places, programs and services on and off campus, maintains an up-to-date database of 1,200 organizations, and takes reservations for the use of tables and display boards in and around the MU.

The complex houses the UCD Bookstore, Corral gift shop, Coffee House, MU II Conference Center, Campus Box Office (where you can purchase tickets for campus events and cash checks), Campus Events and Visitors Services (CEVS) and the MU Business Office.

King Lounge, on the second floor, provides a comfortable and relaxed atmosphere popular for studying, leisure reading and listening to music. The adjacent Music and Periodicals Center (752-2885) contains current popular periodicals and a large library of music.

**Freeborn Hall**, a 1,250-seat assembly hall in the MU complex, is used for performing arts, dances, banquets, lectures and conferences.

The Memorial Union operates several facilities that can be rented for group gatherings. With its rustic wood-paneled interior and ceiling-high windows, **Rec Pool Lodge** is an ideal location for meetings, lectures or dances. The covered patio surrounding the lodge offers a lovely, shaded environment for outside dining during the warm weather months. **Putah Creek Lodge**, secluded in the Arboretum, provides a relaxing atmosphere for lectures, banquets, weddings or dances. The spacious lawn surrounding the lodge is suitable for volleyball and games, receptions and picnics. The lodge has kitchens and outdoor barbecues.

#### **Silo Union**

The Silo Union houses food services, meeting/conference facilities, lounges and the campus pub. In the **South Silo** are the ASUCD Experimental College (752-2568), Student Special Services (752-2007), Graduate Student Association (752-6108) and a branch of the Bookstore serving the School of Law (752-2961). To reserve space in the Silo for a meeting, social event or conference, call Campus Events and Information at 752-2813.

#### **Recreation Hall**

Information:  
Entrance 1B  
530-752-6074

Recreation Hall is a multi-use facility for intramural and informal recreation play, intercollegiate athletic basketball and women's gymnastics, physical education classes and sports clubs. Numerous special events sponsored each year by the campus and community are held in the 8,400-seat arena. The tri-level facility has locker rooms; a flat running track; an equipment room; racquetball, wallyball and squash courts; two weight rooms with free weights, universals, Nautilus weight training circuit, stair machines, rowing machines, treadmills, cross-training machines and bicycles; court areas for basketball, volleyball and badminton; and areas for martial arts, table tennis, gymnastics and dance. Aerobics

classes are offered daily on a walk-in basis. A state-of-the-art artificial rockclimbing wall is available for climbers of all skill levels under the supervision of Outdoor Adventures.

Undergraduate students can use Rec Hall facilities by showing their current valid photo ID card. Graduate students pay a \$5.00 per quarter activity fee. Students may also purchase a \$6.00 guest pass valid for three people. Non-students may purchase a daily, monthly, quarterly or yearly privilege card at Rec Hall to use lockers, equipment and facilities. Prices are available at the Recreation Hall Equipment Room.

Surrounding Recreation Hall are an outdoor fitness cluster, the in-line skate facility, volleyball and basketball courts, the Community Baseball Field, soccer field, and intramural playing fields.

### **Intramural Sports/Sports Clubs and Intercollegiate Athletics**

Information:

IM Sports/Sports Clubs  
140 Recreation Hall  
530-752-3500

Intercollegiate Athletics  
264 Hickey Gymnasium  
530-752-1111

Intramural Sports, Sports Clubs and Intercollegiate Athletics programs provide a coordinated program of organized sports competition and physical recreational activities to meet student needs at every level of skill and interest.

Intramural Sports is a structured, competitive program involving 36 men's, women's and coed activities with over 13,000 participants. Complementing this highly popular activity is the sports club program. Twenty-six recreational and competitive offerings for men and women attract roughly 1,000 athletes in activities ranging from archery, badminton, crew, horse polo, water and snow skiing to the traditional volleyball, lacrosse, rugby and equestrian events.

Although Intercollegiate Athletics at Davis benefits the campus by fostering school spirit, its primary role is to provide personal development opportunities for as many non-scholarship student-athlete participants as facilities and resources permit. Currently, the program consists of varsity teams in 11 men's sports and 12 women's sports. Membership affiliation is with the Northern California Athletic Conference and Division II of the National Collegiate Athletic Association. Approximately 650 students compete on varsity teams each year.

### **Arts and Entertainment**

Whether you want to participate, be entertained or be inspired, an abundance of musical, theater, art, design and dance offerings are happening on campus all year long.

#### **UC Davis Presents**

Information:

200 B Street, Suite A  
530-757-3199; <http://ucdpresents.ucdavis.edu>

UC Davis Presents brings a wide variety of world-class performing artists to UC Davis to serve the campus and surrounding communities. During the academic year, UC Davis Presents offers concerts and recitals by classi-

cal, jazz and folk music artists; drama; classical, modern and ethnic dance; and lectures by eminent public figures. Tickets for UC Davis Presents events may be purchased at the Campus Box Office (Freeborn Hall, 530-752-1915) or any BASS/TM outlet.

#### **Music**

Information:

Department of Music  
530-752-0888; <http://musdra.ucdavis.edu>

The Department of Music sponsors the UCD Symphony Orchestra, Chorus, Chamber Singers, Early Music Ensemble, Gospel Choir, Concert Band, Jazz Band and small ensemble groups. Music majors and other interested students can receive credit for participating in these groups, which perform at concerts and recitals open to the university community. The department sponsors artists-in-residence who give concerts, recitals and lectures. Free noon concerts featuring individual performers and ensembles—both professional musicians and music students—are a favorite weekly event during the school year. The Empyrean Ensemble and the UCD Wind Quintet are in residence on campus. The Department of Music sponsors nearly 100 public concerts each year.

#### **Drama and Theater**

Information:

Department of Dramatic Art  
530-752-0888; <http://musdra.ucdavis.edu>

The Department of Dramatic Art has one of the finest theater facilities in California, with an unusually good stock of scenery, props, costumes and state-of-the-art lighting and sound equipment. Facilities are complemented by an excellent faculty, the Granada Artists-in-Residence program (which brings a major British director to the department each quarter), and graduate students working on Master of Fine Arts degrees in acting and Ph.D. degrees in 20th Century Performance and Culture, all of whom contribute to the fine quality of UC Davis drama and dance productions.

Each year's schedule includes University Theatre Season (five major productions of established plays); Dance Concert (student and faculty choreographed dance numbers); and Studio Season (four to six productions). Studio Season features premiere performances of new plays written at UC Davis, productions of established plays, and performance projects conceived and produced for the first time at UC Davis. The final production each year is the Undergraduate Playwright's Festival, a collection of three or four one-act plays written by undergraduates and produced for the first time. These productions are part of the academic program of the department and serve an important purpose in the study of dramatic art. Participation is open to all students.

#### **Art Galleries**

**The MU Art Gallery** (second floor of the MU; 530-752-2885) features a changing series of contemporary and historical art exhibits throughout the school year. Works by professional artists as well as students are on display for periods of six weeks. The gallery sponsors print sales, special programs and lectures, and offers internships for those interested in career work in an art gallery or museum.

The **Design Gallery** (first floor of Walker Hall; 530-752-4139) explores diverse topics and media with an emphasis on ethnographic arts and consumer cultures. The gallery is internationally known, with innovative exhibitions based on design from a global perspective. Historical cultural artifacts, contemporary functional objects and creative installations are presented in changing spaces designed specifically for each exhibit.

The **Richard L. Nelson Gallery** (first floor of the Art Building; 530-752-8500), named in honor of the first chair of the Department of Art, organizes regularly changing exhibitions of historical and contemporary works of art. The gallery's program reflects and complements the teaching program of the Department of Art and brings art to the university community and the Northern California area at large.

The **Fine Arts Collection** (Art Building, adjacent to the Nelson Gallery; 530-752-8500), representing various historical periods and cultures, is the Davis campus's major collection of art.

The **Basement Gallery** (Art Building basement) is a student-directed gallery that exhibits the artwork of advanced UC Davis art majors. The exhibitions change biweekly throughout the academic year.

The **Carl N. Gorman Museum** (first floor of Hart Hall; 530-752-6567, Native American Studies) was established in honor of Carl N. Gorman, an artist, advocate and former faculty member of Native American Studies. The museum features changing exhibitions of works by Native American and diverse artists. Selections from the permanent collection of art are also exhibited on a rotating basis throughout the year.

## STUDENT GOVERNMENT

### Associated Students (ASUCD)

Information:  
Student Government Administrative Office  
14 South Hall  
530-752-3632

ASUCD Main Office  
Basement, South Hall  
530-752-1990; <http://asucd.ucdavis.edu>

The Associated Students of the University of California, Davis (ASUCD), authorized by the regents and the chancellor, represents all undergraduate students. Graduate and law students also have access to all ASUCD commercial activities. Funds allocated to ASUCD provide activities and services that make life as a student a little easier, less expensive, or just more fun.

ASUCD operates more than 40 activities, including the Unitrans bus system, *The California Aggie* newspaper, the Bike Barn repair services, travel service, free legal advice for undergraduate students, a convenience store,

a photocopy service, Project Recycle, Cal Aggie Camp, Book Exchange, U.S. Post Office and the Coffee House.

The ASUCD-sponsored Experimental College offers a variety of nontraditional classes each quarter for students interested in diversifying their educational experience. Radio KDVS stereo 90.3 FM, the student-run campus radio station, broadcasts at 5,000 watts. Other ASUCD activities include Classical Notes and Campus Copies, *Housing Viewpoint*, Homecoming, Student Forums, Entertainment Council, and the Whole Earth Festival.

Picnic Day, a UC Davis tradition since 1909, Picnic Day is the largest student-run event in the nation. This annual spring open house features more than 100 exhibits and cultural displays, including a parade, a fashion show, sports, sheep dog trials, dachshund races, food, music and dancing.

You can find information about ASUCD programs in the *Student Directory*, which combines details about ASUCD services and organizations with the ASUCD student telephone directory, or by visiting the ASUCD office.

Allocated funds are budgeted through the ASUCD Senate. Based on a modified federal form of government, the senate consists of 12 elected senate members and the ASUCD president and vice president. The senate is the policy-making body for ASUCD and supervises all aspects of the association. The ASUCD president is the chief administrative officer and is assisted by the vice president who serves as the executive aide. ASUCD is the liaison for the undergraduate student body and represents the students with other universities, the UC Office of the President and the regents.

Six **commissions** advise the senate and assist the governing board with its decisions by researching legislation and making recommendations. Commission chairs are ex-officio members of the senate. Each commission also involves itself with various projects that relate to its specific area.

- External Affairs deals with off-campus concerns (the regents, UC Office of the President, etc.).
- Internal Affairs recommends policies to improve the quality of nonacademic student life on campus.
- Academic Affairs advocates for student rights in the area of academics, including dealing with the Academic Senate and with issues such as grading policies, tenure and teacher evaluations.
- Business and Finance makes recommendations to the Senate on all financial matters.
- Ethnic and Cultural Affairs makes recommendations on policies and programs concerning UC Davis' ethnic community, for establishing liaison and achieving rapport with on-campus and off-campus bodies affecting ethnic students and their quality of life while at the university.
- Environmental Policy and Planning addresses all issues and concerns that pertain directly to the campus environment.

The **judicial branch** authority is vested in the ASUCD Supreme Court. The court reviews legislation at the request of any ASUCD member and has the ultimate authority to interpret the ASUCD constitution.

**UC Davis Administrative Advisory Committees**

If you would like to participate in issues affecting the campus community, you may apply for membership on an administrative advisory committee. Each committee advises on policies affecting a specific area, such as athletics, child care, disability issues, or student services and fees.

The committees respond to requests for advice, identify needs or concerns within the charge of the committee, and recommend action to the administration. Applications are accepted each winter for service on committees the next academic year.

**Graduate Student Association (GSA)**

Information:  
Room 253, South Silo  
530-752-6108; 530-752-5158 (fax); gsa@ucdavis.edu;  
<http://pubweb.ucdavis.edu/Documents/GSA/homepage.html>

The Graduate Student Association (GSA) is the officially recognized student government for UC Davis graduate students. GSA provides a forum for addressing the concerns of graduate students and promotes communication with campus administrators. GSA also serves as an advocate at all levels of the university on behalf of graduate students. Funded by graduate student fees, GSA provides services to all academic graduate students and to professional students in the Graduate School of Management. Services include new student orientation, legal service, fax service, travel awards, newsletters and assorted social events. Other professional students are eligible to join GSA by paying a fee.

GSA General Assembly representatives are designated by other students in their department or graduate group. General Assembly meetings are held once a month and are open to all graduate and professional students. Each year the General Assembly elects the members of the Executive Council, who serve in a variety of positions to carry out the policies and functions of the organization.

**STUDENT ORGANIZATIONS**

Information:  
Student Programs and Activities Center  
Memorial Union, 4th Floor  
530-752-2027

More than 300 registered student organizations at UC Davis, including cultural, social, religious, political, ethnic, academic, international, recreational, performing and service groups, provide students and the entire campus with important educational experiences. The **Student Programs and Activities Center** registers these diverse groups and provides educational programs, advising and support for activities, event planning, leadership development, conflict resolution, resources and campus policies.

In addition to the activities described below, the center administers a number of campus programs: Activities Faire, Club Finance Council, College Bowl, Danzantes del Alma folkloric dance troupe, leadership training programs, campus service awards, and liaison to fraternities and sororities. Center staff assist individual students who want to become involved in activities or start

new organizations. You are encouraged to drop by the center to explore these “hands-on” experiences.

**Cultural Days** is an annual series of programs celebrating the diverse ethnic cultures of the university community. Programs include African Continuum, Asian Pacific Cultural Week, La Raza Cultural Days and the Native American Powwow. Everyone is invited to share in these programs featuring speakers, workshops, films, entertainment and family events.

The **Cal Aggie Marching Band** entertains spectators at athletic, campus and community events. As one of the last remaining “student-run” bands in the nation, the band has a style and personality all its own.

**Cal Aggie Student Alumni Network (CASAN)**

Information:  
Cal Aggie Student Alumni Network (CASAN)  
Walter A. Buehler Alumni and Visitors Center  
530-752-0115 or 530-752-0286; caaa@ucdavis.edu;  
[http://www-caaa.ucdavis.edu/SP\\_casan.html](http://www-caaa.ucdavis.edu/SP_casan.html)

All UC Davis students are encouraged and welcome to become CASAN members. CASAN involves students and alumni in a variety of academic, philanthropic and professional programs that build lasting ties to the university. You may join any time during the academic year; the annual \$15 membership fee includes membership in the Cal Aggie Alumni Association.

---

*Picnic Day, UC Davis' annual open house, is the largest student-run event in the nation.*

---

**ACADEMIC ADVISING &  
STUDENT RESOURCES**

---

## ACADEMIC ADVISING

UC Davis offers many different types of academic advising to help you get the most from your education. College advisers can assist you in meeting degree requirements and taking maximum advantage of the resources available in the university. A conference at least once a quarter with your faculty or staff adviser is especially desirable during your first year and during your final quarters preceding graduation.

### College Advising

#### College of Agricultural and Environmental Sciences

Information:  
Office of the Dean  
228 Mrak Hall  
530-752-0108

In the Dean's Office you will find

- Staff advisers who can help with university and College rules, regulations and policies and procedures that affect students.
- Academic advising: in-depth advice regarding probation/dismissal status, admission to the College, readmission, and second bachelor's, limited and regular status.
- Advice and action on petitions.
- Other services include study plan clearance, College English requirement check, release of holds on registration packets and final evaluation for graduation.

#### Associate Dean of Undergraduate Academic Programs

Information:  
Annie King, Associate Dean  
228 Mrak Hall  
530-752-0108

The College has an associate dean of undergraduate academic programs and advising staff who welcome the opportunity to become acquainted and to talk informally with individual students. They can also help you with academic problems if you are placed on probation or subject to dismissal.

**Academic Advising Center.** Coordination of the College's Advising Center and the Summer Advising Program is available in the College's Academic Advising Center, 213 Mrak Hall. The Academic Advising Center advises students in the Exploratory Program and the Individual Major.

**Faculty Advisers/Staff Advisers.** You will be assigned a faculty adviser to help you plan a program that corresponds to your individual educational interests. The Master Advisers coordinate advising within a major. Staff advisers in the department can advise you on courses, specific requirements of majors and career opportunities. You are strongly urged to consult with your faculty adviser or staff adviser each quarter before selecting your courses.

As educational objectives evolve, you may, in consultation with the Master Adviser for your major, choose a new faculty adviser whose area of expertise corresponds more directly to your specific objectives.

### Exploratory Program (non-degree program)

Information:  
College Academic Advising Center  
228 Mrak Hall  
530-752-0610

Are you unsure what major you really want to pursue? If so, you may want to register in the Exploratory Program. With the help of staff in the college's Academic Advising Center and the major advisers, you can explore specialized options, develop your decision-making abilities and ultimately select the major best suited to your needs. For registration purposes, indicate "Exploratory" on your admissions materials. You must declare a major before you complete 120 units (see Declaration of Major in the "Academic Information" chapter).

### Division of Biological Sciences

Information:  
Dean's Office  
202 Life Sciences Addition  
530-752-0410

The associate dean and staff in the Dean's Office offer complete academic advising services for the Biological Sciences major and general advising information about other divisional majors. The office also advises on college and university requirements, policies, and procedures, including PELP, withdrawal, change of major and late actions.

This office is also responsible for the academic progress of all students majoring in the division. If you have any problems (personal, medical, financial) that are affecting your academic performance, or if you are on academic probation, make an appointment to see one of the advisers in the Dean's Office.

**Sections and Advising Centers.** Students entering or intending to declare sectional majors in biochemistry; cell biology; evolution and ecology; genetics; microbiology; neurobiology, physiology and behavior; or plant biology should contact the specific section office for academic advising services, where both faculty and staff advisers are available. Students selecting the biological sciences major should contact the Dean's Office for academic advising services.

**Peer Advisers.** Peer advisers are available in each section. Biological Sciences houses its peer advisers in the Dean's Office.

### College of Engineering

Information:  
Undergraduate Office  
1050 Engineering II  
530-752-0557

Information and assistance on academic, career and personal matters is available in the Undergraduate Office, either through direct assistance from one of the staff advisers or through referral to other offices on campus. The Undergraduate Office handles student petitions, transfer evaluation, articulation and degree certifications.

**Advising.** As soon as you arrive on campus, you should consult with your departmental staff adviser, whose name and office hours you can obtain at the department office. The departmental staff adviser is aware of the requirements for your major and can assist you with planning your program.

**Mandatory Advising.** The College has implemented a mandatory advising system through RSVP, the telephone registration system. You are required to meet with your adviser once a year, during a specific quarter, which is determined by the number of units you have completed. When you telephone to enroll in classes for your advising quarter, you will be told that you have an advising hold on your registration. You may enroll in classes for and during this quarter. If you meet with your adviser during this quarter, there will be no difficulties with subsequent registration. If, however, you fail to meet with your adviser during your assigned quarter, you will be dropped from all your classes on the first day of the *following* quarter. Therefore, you have approximately four months to clear an advising hold. For more information on mandatory advising, call the Advising Office at 752-0557.

**Peer Advisers.** A well-developed peer advising system complements faculty and staff advising. Student advisers are available at Bainer Hall, Engineering II, and other locations.

### College of Letters and Science

Information:

Office of the Deans/Undergraduate Education and Advising Office  
200 Social Sciences and Humanities Building  
530-752-0392

The deans and staff in the Undergraduate Education and Advising Office can help you with issues relating to your academic goals and experiences. You can consult the Advising Office on matters such as program planning, selection of a major, exceptions to regulations and academic enrichment opportunities. The office also provides a number of additional services:

- Determines how your transfer credits from other institutions apply towards completion of breadth and unit requirements for the bachelor's degree. (Applicability of transfer credit toward the major is determined by your major faculty adviser.)
- Provides degree checks to identify remaining college requirements and certifies graduation.
- Acts on petitions requiring the dean's approval.
- Reviews the records of students who are subject to disqualification and determines whether such students may continue at UC Davis.

**Faculty Advisers.** New students are assigned to a faculty adviser during their first term of enrollment. If you indicated an interest in a particular program on your application, your adviser will be a faculty member associated with that major. If you change your major, you will be reassigned.

New students are encouraged to see their faculty adviser at least once every quarter during their first year on campus to discuss their educational goals, course program and progress.

Continuing students who have completed three quarters in residence in the College should consult with an adviser at certain important checkpoint stages in their academic careers (explained below). You are urged, however, to maintain regular contact with an adviser in your major to avoid program errors that may delay graduation. Seniors should maintain close contact with their advisers to ensure that they are meeting the major requirements.

**Academic Options Program.** If you did not indicate an initial commitment to a particular major program on your application, you will participate in the Academic Options Program, which provides academic advising to lower division students. You will be assisted by an advising team available at sites in each of the university residence hall complexes. Students living off campus should contact the Letters and Science Undergraduate Education and Advising Office early in the quarter to receive their adviser assignments.

**Advising Checkpoints.** You should consult with your faculty adviser at two, possibly three, critical stages in your academic career:

- Before you complete 90 units of degree credit, including transfer work, you must develop in consultation with your faculty adviser a proposal for a quarter-by-quarter program of courses showing how you will meet your educational goals and graduation requirements. You must also have declared a major by this time. Filing this plan with your adviser does not preclude subsequent modifications of the plan or a change of major.
- When you complete 135 units of degree credit, including transfer work, pick up Degree Check materials from the Letters and Science Advising Office and consult your adviser concerning course selection and satisfaction of requirements in the major.
- Before you complete 195 units of degree credit, including transfer work, you must develop in consultation with your faculty adviser a firm study plan, in the form of a quarter-by-quarter program that will satisfy all remaining degree requirements as expeditiously as possible. This plan will be filed with your adviser. If the plan indicates that you will have to register beyond the 225-unit limit in order to meet degree requirements, you must contact the Undergraduate Education and Advising Office immediately. Exceptions to the 225-unit limit are granted by the dean only rarely. Typically, approval is granted only to allow completion of *minimum* degree requirements.

---

*The geology department's Professor Geerat Vermeij, a MacArthur Award recipient, measures the shape, texture and size of shells to give us valuable insights into the nature of evolution.*

---

If you have not met with your faculty adviser before these established checkpoints, a hold may be placed on your registration as a reminder.

**Peer Advisers.** Student-to-student advising is an important part of the university advising services. The College of Letters and Science dean's office peer advisers are available in the Undergraduate Education and Advising Office, 200 Social Sciences and Humanities Building, and on a weekly basis in the campus residence halls to talk with students about their academic concerns.

## Advising Services

Information:  
Advising Services  
111 South Hall  
530-752-3000; <http://advisingservices.ucdavis.edu>

**Academic Peer Advising (APA)** places peer advisers in over 45 departments to help students find the answers to their questions about major requirements, courses and university regulations. The academic peer adviser complements faculty advising by providing a student perspective on the department. The Academic Peer Advising staff is trained to provide information and assistance about graduate schools, career opportunities and college requirements.

The **Orientation and Summer Advising Office** coordinates the Summer Advising and Registration Program, fall quarter Orientation activities and other student assistance and orientation programs for new students. The staff will introduce you to the campus environment, procedures and opportunities, and offers programs relevant to your changing needs. Your contribution to orientation programs, through ideas and assistance, is always welcome.

The **Pre-Graduate School Advising Office** assists students interested in M.A., M.B.A., Ph.D. or teaching credential programs. Services include help in locating graduate school programs in specific fields, completing application forms and statements of purpose, and planning financial options. This unit also coordinates the Undergraduate Research Conference, an annual event open to all undergraduate UC Davis researchers.

The **Pre-Law Advising Office** offers help with admission requirements and program planning to students interested in the legal profession. You can learn about preparing for law school and a legal career through the many seminars and workshops held each year.

The **Health Sciences Advising Office** is an important resource if you are preparing for a profession in the health sciences. Staff and student advisers can provide information on requirements, application procedures, professional school curricula and related options.

**Career and Graduate Study Resource Center**, 114 South Hall, is an extensive reference library managed by Advising Services and the Internship and Career Center. Resources include numerous graduate and professional school catalogs and program directories, admission test materials, fellowship directories, videotapes, and books and journals related to health education. Also available are job listings, general career information materials, and information about companies who recruit at UC Davis. Several personal computers are available to

search the Internet for information on graduate and professional study and job opportunities.

## Educational Opportunity Program (EOP)

Information:  
228 North Hall  
530-752-3472

The Educational Opportunity Program Office serves EOP students by assisting them with their academic, social and personal adjustments to the university environment; coordinates EOP new student orientation programs; and serves as liaison to staff, faculty and administrators. The office's multicultural peer staff is particularly sensitive to differing social, cultural and ethnic concerns. Students interested in pursuing the helping professions can receive training and experience through the Peer Adviser Counselor training program.

EOP Information Office services are also accessible at various locations on campus, such as the Colleges of Agricultural and Environmental Sciences, Letters and Science and Engineering; Learning Skills Center; The House; and all ethnic studies departments. You are invited to telephone or stop by the EOP Information Office on the second floor of North Hall or at any of the outreach locations to find out more about the peer counseling services.

## The First Resort

Information:  
First floor lobby, South Hall  
530-752-2807 or 530-752-3323

The First Resort is a place to go if you are feeling bogged down by university red tape, registration procedures, course selection, choosing a major or other general advising questions. The student advisers here can either answer your questions or put you in contact with others who can. The staff can give you advice and assistance from the point of view of someone who has "been there." The First Resort maintains a referral service, a listing of courses of 1 to 3 units and other valuable resources. If you have a problem, remember—start with The First Resort.

## STUDENT CONDUCT

Information:  
Student Judicial Affairs  
3rd Floor, North Hall  
530-752-1128; <http://sja.ucdavis.edu/sja/>

Students enrolling or seeking enrollment in the university assume an obligation to act honestly, ethically and responsibly in a manner compatible with the university's function as an educational institution. Rules concerning student conduct, student organizations, use of university facilities and related matters are set forth in both university policies and campus regulations.

Standards for student conduct are included in the *UCD Code of Academic Conduct*, the *Student Activities Handbook*, the *Guide to Residence Hall Life* and the *University of California Policies Applying to Campus Activities, Organizations and Students*. The operation of the campus student disciplinary system is outlined in the booklet *Administration of Student Discipline*. These policies and regulations are available from the Office of Student Judicial Affairs and on the World Wide Web. A summary of

student conduct expectations is published each quarter in the *Class Schedule and Room Directory*.

### **Misconduct and Discipline**

Misconduct for which students are subject to discipline includes, but is not limited to, plagiarism; cheating; knowingly furnishing false information to the university; sexual or other physical assault; threats of violence; possession of weapons; harassment, including stalking, sexual harassment or “fighting words”; forgery; theft; vandalism; illegal possession, use or sale of drugs or alcohol; hazing; obstruction or disruption of university activities or functions; and alteration or misuse of university documents, records, keys or identification.

Disciplinary sanctions that may be imposed range from a warning to dismissal, and may include restitution and/or assigned community service. Alleged violations of campus or university standards should be referred to the Office of Student Judicial Affairs. If complaints cannot be resolved informally between Student Judicial Affairs, the accused student and the referring party, the case may be referred to a hearing before the Student Conduct Committee, Campus Judicial Board, or a hearing officer. The president of the university, through the chancellor, has ultimate authority for the administration of student discipline.

### **Student Responsibilities**

You are responsible for complying with the announcements and regulations printed in this catalog and in the *Class Schedule and Room Directory*, and with all policies, rules and regulations of the university and this campus. You will not be able to register or receive transcripts of record or diplomas until you have met all university obligations.

### **Student Judicial Affairs**

Information:  
Student Judicial Affairs  
3rd Floor, North Hall  
530-752-1128

Student Judicial Affairs supports the standards of the campus by responding to alleged violations of university policies or campus regulations. The office coordinates the informal resolution process and receives formal complaints for student grievances based on impermissible discrimination or harassment (sexual, racial, religious, handicap, etc.), or on violations of student rights to obtain access to or prevent disclosures from their campus records. The office can help with conflict resolution and provide interpretations of university policies and regulations.

### **Resolving Academic Problems**

#### **Grade Changes**

If you believe you received an incorrect grade due to a clerical or procedural error, ask your instructor to file a grade change form with the Registrar's Office. If you believe you received an incorrect grade due to any type of discrimination, consult the office of Student Judicial Affairs (see above).

### **Other Grievances**

If you need a requirement waiver or any other type of variance, contact your faculty adviser or the appropriate dean's office for information on your college's procedures. If you cannot get satisfaction through normal channels, contact the ASUCD Grievance Center or the Committee on Student-Faculty Relationships (see below).

### **Discrimination/Harassment**

If you believe that you have been discriminated against or harassed, you may contact the office of Student Judicial Affairs (see above) or the ASUCD Grievance Center (see below) for information and assistance. It is important to seek assistance as soon as possible, as a 30-day time limit applies to some grievance processes. Advice is also available from the Sexual Harassment Information Line (752-2255). Graduate students may contact Graduate Studies (752-0650) and/or the Graduate Student Association (752-6108). Mediation services are available to resolve student grievances. For information, call Student Housing (752-2491).

### **ASUCD Grievance Center**

Information:  
ASUCD Grievance Center  
7 South Hall  
530-754-4131; 530-752-6101 (ASUCD Academic Affairs);  
530-752-3339 (ASUCD Campus Affairs)

The ASUCD Grievance Center advocates students' academic and nonacademic concerns to the faculty and administration. Grievance counselors assist students one-on-one, directing them to appropriate channels through which to state their academic grievances (e.g., student-faculty relations, sexual harassment, grade change problems, prejudicial treatment in the classroom and problems with academic procedure and policy) and nonacademic grievances (e.g., campus facilities, campus safety, ASUCD, and any other nonacademic concerns). All information discussed between counselors and students is completely confidential. Students can get counseling, referrals and support to aid in the resolution of these matters.

### **Committee on Student-Faculty Relationships**

Information:  
Academic Senate Office  
356 Mrak Hall  
530-752-3920

If students with a grievance feel they cannot get satisfaction through normal procedures, they may contact the Committee on Student-Faculty Relationships for assistance. The committee is advisory and can make recommendations to the office having authority to resolve the problem. It may also meet informally with the students involved with the grievance.

## TUTORING AND LEARNING RESOURCES

### EOP Tutoring

Information:  
Learning Skills Center  
Third Floor Voorhies Hall  
530-752-2013

EOP tutoring is a free service for EOP students. If you are having difficulty with your course work, the Learning Skills Center offers tutoring in many course areas. Tutoring is provided in groups and on a drop-in basis. For students in academic difficulty, a limited amount of one-to-one tutoring is also available. Although primary emphasis is on the assignments in your classes, tutorial services may also be used to improve study habits and learning skills. The tutoring program is staffed by students carefully selected for both their knowledge of course content and their sensitivity to the needs of students being tutored.

### Learning Resource Centers

Information:  
Student Housing  
Sue Franck  
530-752-1736

Learning Resource Centers are located in the Segundo, Tercero and Cuarto residence hall areas. They offer the following services to all residence hall students: PC computer terminals (IBM clones and Macintosh) and assistance, free computer software tutoring, a reference library, language tapes, an exam file and a quiet place to study.

### Learning Skills Center

Information:  
Third Floor Voorhies Hall  
530-752-2013

At the Learning Skills Center you can receive help with such things as general study skills, math/science study skills, writing essays and term papers, reading efficiency, English as a second language, time-management skills, test-taking skills and test anxiety reduction.

Learning specialists can help you individually, or you may participate in workshops covering specific areas of study. The Learning Laboratory has self-help tapes and films that let you work at your own pace. The LSC library contains a variety of programmed instructional materials, reference books, preparation materials for the GRE, MCAT and LSAT exams, and a file of course examinations given in past quarters. Most materials may be checked out.

Under certain circumstances, the center also provides individual tutoring sessions for students on academic probation or subject to dismissal. Group and drop-in tutoring is available to all students. Come in and ask about our services, which are free to all UC Davis students.

### Special Transitional Enrichment Program

Information:  
Learning Skills Center  
Third Floor Voorhies Hall  
530-752-2013

Freshman EOP students admitted by special action are expected to participate in the Special Transitional Enrichment Program (STEP). Selected regularly admit-

ted EOP students are encouraged to do so. The program begins in summer and continues through the first academic year, providing preparatory course work and developing academic skills. It helps students adjust academically and socially to the campus by strengthening their learning skills and study habits, and by providing an extensive orientation to campus life.

## INTERNSHIPS AND CAREER SERVICES

### Internship Programs

Information:  
The Internship and Career Center  
2nd floor, South Hall  
530-752-2855; <http://icc.ucdavis.edu>

You can take advantage of one of the hundreds of organized internships through the Internship and Career Center or initiate your own.

An internship may be full time or part time, credit or non-credit, voluntary or involving a stipend, depending on your needs and interests and the availability of openings. Internship experiences must emphasize learning rather than routine activities, include field supervision by a qualified professional and, where appropriate, the faculty member responsible for giving credit. Academic credit is awarded only for experiences planned and approved in advance by the sponsoring faculty member.

### The Internship and Career Center

Information:  
2nd floor, South Hall  
530-752-2855  
World Wide Web: <http://icc.ucdavis.edu>

If you are an undergraduate, graduate or alumnus, ICC can help you identify your abilities and interests and relate them to jobs; gain access to practical experience to increase your competitiveness in the job market; and find out how and where to look for the jobs you want. If you are considering dropping out of the university for a term or longer, an adviser can also give you information about internships and employment opportunities.

The Career and Graduate Study Resource Room (1st floor, South Hall) contains materials that can help you learn how your major field of study can be translated into job opportunities, and data concerning types of employment graduates have obtained. Useful to job-seekers—and available free of charge—is ICC's *Career Resource Manual*, which provides guidelines for preparing a resume, tips on being interviewed and information on employment in government, business and education.

The office solicits and maintains job vacancy listings, arranges employment interviews and schedules on-campus recruiting by employers.

### Education and Graduate Placement Services

Information:  
The Internship and Career Center  
2nd floor, South Hall  
530-752-0724

Any student enrolled in the teaching credential program or pursuing a master's or doctoral degree in order to teach should register with the Education and Graduate Placement Office.

---

*Innovative engineering students took first prize in the annual FutureCar Challenge with their energy-saving hybrid vehicle that goes 1,000 miles before needing to be refueled or recharged.*

---

Services include teaching job vacancy listings, placement files (professional dossiers), special workshops on writing teaching resumes and curriculum vitae, on preparing for interviews, and individual advising.

Advisers maintain contact with school district personnel and work with undergraduate students to explore teaching through internships. The office sponsors the Graduate Career Options Program for advanced degree candidates originally planning a teaching career and now considering other career options.

### **Human Corps Program**

Information:  
The Internship and Career Center  
126 South Hall  
530-752-3813

Human Corps is the student community services program at UC Davis. Public service work can be a rewarding and satisfying experience that may also improve your qualifications for the job market. Community service may or may not be compensated through wages, academic credit or transcript notation and can take many forms, from a one-day activity to a long-term commitment.

The Human Corps is a referral center for students who want to perform community service and as a resource for agencies and campus units with service opportunities. The office has a database and directories with information about non-profit agencies in California, community service opportunities throughout the world and employment in the non-profit or public sectors after graduation.

## **STUDENT RESOURCE AND INFORMATION CENTERS**

### **Cross-Cultural Center**

Information:  
Winnie LaNier, Director  
Corner of East Quad and Shields road  
530-752-4287; 530-752-5067 (fax);  
<http://pubweb.ucdavis.edu/documents/CCC/index.html>

The Cross-Cultural Center fosters a multi-ethnic and multi-cultural community through educational and cultural programs, and leadership development opportunities. Everyone is welcome and encouraged to participate in the many programs, special events and activities sponsored by the center.

### **Lesbian, Gay, Bisexual and Transgender Resource Center**

Information:  
University House, Room 105  
530-752-2452; <http://lgbtcenter.ucdavis.edu>

The Lesbian, Gay, Bisexual and Transgender (LGBT) Resource Center has information and resources about lesbian, gay, bisexual and transgender issues and offers a safe, supportive environment to meet other members of the Davis community. Students who are studying or researching these issues are encouraged to use the center's resources. The center also serves as a meeting place for local organizations or support groups. Resources include a library with books on topics ranging from domestic partnership issues to lesbian humor, and local and national newspapers and magazines; a resource database and files on local resources, including health professionals, legal services, clubs, organizations and community contacts; and a bulletin board exchange, where community members may advertise special events and services. The LGBT Resource Center is staffed by volunteers and is open Monday through Friday; call for daily hours.

## Rape Prevention Education Program

Information:  
Fire and Police Building, Kleiber Hall Drive  
530-752-3299;  
<http://pubweb.ucdavis.edu/Documents/RPEP/RPEP.HTM>

The Rape Prevention Education Program (RPEP) explores myths and expose the realities of sexual assault, focusing on prevention through education. The program offers discussions and workshops; self-defense classes; short-term counseling, referrals and support groups for victims of rape, sexual assault, or incest survivors; 24-hour crisis intervention and advocacy for victims of sexual violence; training for peer counselors and professionals; and a circulating library of books, videos and articles on sexual assault and related issues.

RPEP has student work-study positions and a volunteer staff; call for drop-in hours or to make an appointment.

## Services for International Students and Scholars (S.I.S.S.)

Information:  
Services for International Students and Scholars  
530-752-0864

Services for International Students and Scholars assists international students, faculty and researchers throughout their programs of study, teaching and research at UC Davis, offering orientation, personal and cultural advising, information and assistance with U.S. Immigration and Naturalization Services regulations. The office serves as a liaison with home governments and sponsors, and provides orientation to the U.S. university system.

All new and transfer international students must attend a special orientation program held just before each quarter begins. The orientation helps new students with registration, class enrollment, making housing arrangements, immigration regulations, and finding campus services and community resources. Orientation for new international faculty and researchers is held weekly.

Students and scholars should report to S.I.S.S. as soon as possible after arriving in Davis.

## Women's Resources and Research Center (WRRC)

Information:  
North Hall, First Floor  
530-752-3372; 752-0222 (fax); <http://wrrc.ucdavis.edu/wrrc>

The Women's Resources and Research Center educates the campus community about women's issues and concerns, promotes an understanding of the role and impact of gender in our lives and in our society, helps women of diverse backgrounds achieve their intellectual, professional and personal goals, and advocates for women's full inclusion, equality and advancement.

The WRRC's staff can answer questions, locate resources and help you with personal, academic or work-related concerns. Services and resources include lectures, workshops and forums; a library staffed by a full-time librarian; resource listings of campus and community services such as health care, counseling, child care, women's organizations and legal resources; child emergency notification service for student parents; and specialized programs, discussion groups and individualized consultation for faculty and graduate students on research, academic, career and personal topics.

## Student Special Services

Information:  
160 South Silo  
530-752-2007

Student Special Services coordinates a variety of programs and services to meet the special needs of students.

## Disability Resource Center

Information:  
Disability Resource Center (DRC)  
160 South Silo  
530-752-3184 (voice) or 752-6833 (TTY);  
<http://www.drc.ucdavis.edu>

The Disability Resource Center (DRC) coordinates specialized support services and accommodations for students with documented disabilities. Accommodations are directly related to disability-based limitations and may include alternate exam arrangements, materials in alternate formats, notetakers, sign language and oral interpreters, real-time captioning, assistive listening devices, on-campus shuttle service, and disability management counseling.

## Reentry Student Services

Information:  
Reentry Student Services  
160 South Silo  
530-752-2005

Reentry Student Services helps students who have returned to the university after several years of life and work experience. The office provides admissions assistance, information, orientation and peer support, and provides referral assistance through the Reentry Resource Network. The office sponsors an annual Reentry Day for prospective reentry students on the last Saturday in February.

## Transfer Student Services

Information:  
Transfer Student Services  
160 South Silo  
530-752-2200

Transfer Student Services helps students who have transferred from other institutions of higher education, coordinating transfer student matters among existing student services units to ensure an easy and smooth transfer to the university. It also sponsors special receptions and workshops for new transfers and publishes an annual *Transfer Guide* of available campus services.

## Veterans Affairs

Information:  
Veterans Affairs Office  
160 South Silo  
530-752-2020

Veterans Affairs assists veterans, dependents and reservists with a number of services, including certifying course attendance to the Department of Veterans Affairs, coordinating a tutorial assistance program, providing advice and support, and helping with educational fee waivers, work study and financial aid concerns. To initiate a benefit claim, write or drop by with your letter of admission. The office can give you the forms, information and advice to process your claim.

**ACADEMIC  
INFORMATION**

---

## Registration

Information:  
Office of the Registrar  
12 Mrak Hall  
530-752-2973; <http://registrar.ucdavis.edu>

Registration is the way in which you become a student at the university. Every UC Davis student must register each quarter. Registration includes enrolling in classes via RSVP, the telephone registration system; paying fees and other financial obligations; filing your current address with the Office of the Registrar; and completing and filing other information forms.

If you are a *new* or *reentering* student you must also:

- Have a photo ID picture taken.
- Submit a Statement of Legal Residence (see Appendix).
- Return the completed Medical History form, evidence of rubella immunity, results of a tuberculin skin test and the Insurance Information Request form. These forms are mailed to each new student from the Student Health Center.

**Change of Name.** Petitions to change your name on official university records may be obtained from the Office of the Registrar. (Students planning to graduate should file this petition no later than the fifth week of the quarter in which they intend to graduate.)

**Change of Address.** Be sure to inform the Office of the Registrar of any change of address. Important registration materials, information and announcements are mailed to students throughout the year, so keep your campus/local mailing address, your billing address and your permanent address up to date. Failure to file your current address can result in a hold on your registration. You can update your address in three ways:

- Complete a Change of Address form, available at the Office of the Registrar.
- Call our Voice Mail Form at 754-9427.
- Correct your information on the “Student Data” section of your RSVP registration form and turn it in to the Office of the Registrar.
- Use the World Wide Web form available from the “Student” menu of the Office of the Registrar web site.

New graduate students who have been registered previously at UC Davis as undergraduates are considered to be new students.

## Late Registration

Late registration privileges extend through the tenth day of instruction, but you will be assessed a fee of \$50 to defray the extra clerical costs of late registration. Registration after the deadline will be allowed only under conditions where action or inaction on the part of the university delays registration. A recommendation from an appropriate administrative unit will be required, and the registration fee must be paid with cash, cashier’s check, credit union check, university check or fee credit.

## Enrolling in Courses

**RSVP.** Students enroll in courses using the UC Davis telephone registration system, RSVP (Register Students Via Phone), at 530-752-7787.

The *Class Schedule and Room Directory*, available several weeks before the start of each quarter, explains registration procedures, gives class meeting times and locations, changes to the *General Catalog*, and the most up-to-date information on fees and RSVP.

The Office of the Registrar World Wide Web site, <http://registrar.ucdavis.edu>, includes the each quarter’s “Schedule of Classes,” RSVP information, the “Open Courses” list, *General Catalog*, academic calendar and other general information, and a link to WIRES (WIRES gives registered students access to their grades, current schedule and account balance).

**Registration Priority.** Access to RSVP is by priority groups. The groups are established according student class level, as determined by the number of units completed. Undergraduate classification is determined by the number of quarter units you have completed:

| Class Level | Units        |
|-------------|--------------|
| Freshman    | 0.0 — 44.9   |
| Sophomore   | 45.0 — 89.9  |
| Junior      | 90.0 — 134.9 |
| Senior      | 135.0 —      |

**Study List.** You are officially registered in all courses listed on your individual study list. You are responsible for completing each of the courses. A course that is on your study list and for which you did no work that could be graded is reflected on your official transcript by the notation “ENW” (Enrolled–No Work Submitted).

To confirm your study list (class schedule), you can call RSVP, view and print your class schedule at Office of the Registrar Kiosk in Mrak Hall lobby, or access WIRES at <http://www.ucdavis.edu/ucnames/wires>. You can also check your grades using RSVP, the Kiosk, or WIRES.

## Adding and Dropping Courses

You may adjust your schedule by adding or dropping courses using RSVP until the published deadlines. The last day to drop a course via RSVP is the tenth day of instruction. The last day to add a course via RSVP is the 15th day of instruction. The *Class Schedule and Room Directory* for each quarter lists the add and drop deadlines and explains how to use RSVP to adjust your

---

*History professor Alan Taylor’s love for a novel by James Fenimore Cooper led him to write William Cooper’s Town, which won a Pulitzer Prize.*

---

schedule and what add/drop procedures and fees apply after the published deadlines. The academic calendar in the front of this catalog also lists the deadlines each quarter to add or drop courses.

### Late Drop

To drop a course after the deadline (but before the day of the scheduled final examination), you need approval of the dean of your college or school. Graduate students must have their adviser's approval in order to drop courses. A \$3.00 fee applies to late drops. Permission to drop courses after the deadline may be granted only in exceptional circumstances.

### Late Add

To add a course after the deadline (but before the day of the scheduled final examination), you need approval of the department. A \$3.00 fee applies to late adds.

### Retroactive Drop

Occasionally, in exceptional circumstances, students are allowed to drop a course after the course is completed. Reasons for seeking a retroactive drop are very specific: medical problems, severe emotional difficulties, or recent death or severe illness in the immediate family. Petitions are available from the Office of the Registrar and should include a detailed account of the problem, appropriate documentation and an adequate explanation of why an "I" grade or late drop was not taken during the quarter in which the problem occurred. The instructor's signature is required on the petition. A \$3.00 fee is applicable on all retroactive drops.

### Retroactive Add

In some rare circumstances, students are allowed to add a course after the course is completed. Petitions for retroactive adds are available from the Office of the Registrar. Each petition must include the reason for the student's failure to add the course during the quarter in which it is offered. The petition must be supported by the instructor's signed approval, together with a statement from the instructor indicating knowledge of the student's participation and performance during the presentation of the course in question and the instructor's understanding as to the reason for the student's failure to add the course before the end of the quarter. A course grade must be assigned by the instructor. A \$3.00 fee is applicable on all retroactive adds.

## COURSE LOAD

Students are normally expected to graduate in 12 quarters (four years). To do this, **students should plan to complete an average of 15 units per quarter** (15 units per quarter for 12 quarters totals 180 units). It is understood that for various reasons students will occasionally need to take fewer than 15 units per quarter. However, students must meet the minimum progress requirements of the campus.

**Minimum Progress Requirements.** Minimum progress is defined as an average of 12 units (including workload units) passed per quarter, calculated at the end of every quarter for the preceding three quarters of enrollment. Undergraduate students falling below this required

average may be subject to academic disqualification. Under minimum progress, a student will earn the 180-unit minimum degree requirement within 15 quarters (5 years) of enrollment. Normal progress would achieve 180 units in 12 quarters.

Minimum progress requirements do not apply to students who have been granted part-time status or to students who have their dean's approval to carry less than the minimum progress load because of medical disability, employment, a serious personal problem, a recent death in the immediate family, or a serious accident involving the student.

**Certification of Full-Time Status.** Undergraduate students must carry a study load of at least 12 units (including workload units) each quarter in order to be certified as full-time students for insurance and financial aid purposes or to compete in intercollegiate athletics. Graduate students must carry a study load of at least 12 units each quarter in order to be certified as full-time students for insurance and financial aid purposes.

**Course Load Limits in the College of Letters and Science.** Freshman students in their first year and transfer students in their first quarter of residence may not take more than 17 units each quarter. For all other Letters and Science students, the study list may not exceed 21 units each quarter. These unit limitations include non-credit remedial courses and repeated courses, but not make-up work to remove incomplete grades.

### Part-Time Student Status

If, for reasons of occupation, family responsibility, health or, for one term only, graduating senior status, you are unable to attend the university on a full-time basis, you may qualify for enrollment in part-time status. Students may change status between full-time and part-time as their circumstances change. To be considered eligible, undergraduate students must be registered in 10 units (including workload units) or fewer by the tenth day of instruction that quarter, and graduate students must be registered in 6 units or fewer by the tenth day of the instruction. Minimum progress requirements

---

*Students have access to the collections of all UC libraries via MELVYL, the online catalog of books and journals.*

---

are waived for part-time students. Undergraduate petitions are available at the Office of the Registrar and require approval by the Registrar. Graduate petitions are available at Graduate Studies and approved by the Dean of Graduate Studies. Part-time students have use of the same facilities and are eligible for the same services, including Student Health Services, as full-time students.

## THE MAJOR

You'll find a complete list of the majors offered at UC Davis in a chart at the front of this catalog.

### Declaration of Major

#### College of Agricultural and Environmental Sciences.

Students must declare a major by the time they have completed 120 units. Failure to declare a major at this point may result in a hold on further registration. In order to declare a major, you must meet with your faculty adviser and/or advising associate, fill out a Change of Major petition obtainable at the Office of the Registrar or dean's office and file the petition with the dean's office. If you have completed 120 units you must prepare a study plan with your adviser and/or advising associate at the same time. You are accepted into a major only after your major department and the dean's office have approved the Change of Major petition.

**College of Engineering.** Students must declare a major when they apply to the College of Engineering. Their freedom to change majors thereafter may be limited.

**College of Letters and Science.** Students must declare a major by the time they have completed 90 units. If you have not declared a major by this point, a hold may be placed on your registration materials. Such a hold would be removed only when your Declaration of Major petition is filed in the deans' office. Petitions can be obtained from faculty advisers, department offices or the Office of the Registrar. As a part of the declaration procedure, you must, in consultation with a faculty adviser, prepare a projected plan of study. You are accepted into the major when your adviser and the dean have approved the petition.

To be accepted into a major, you must have a C average in all courses you have completed that are required for that major, as well as a C average in the upper division courses you have taken toward the major. With the approval of the College Executive Committee, additional requirements, such as completion of a particular set of required courses with a specified grade point average (usually well above a C average), may be introduced as conditions for acceptance into any major at any time.

If your performance is unsatisfactory after you have declared a major program, you may be required to withdraw from that major by the dean, upon written recommendation from the chair of the department or the curriculum committee that administers the major.

### Change of Major Within a College

To change from one major to another within a college, you will need the consent of the department or committee in charge of your proposed new major. Admission into a major program may be denied by the program or by the dean if your grade point average (GPA) in courses required for the selected major is less than 2.0.

Procedures for change of major within a college are the same as for declaration of major and the same conditions apply. If you wish to change to a major that has admission restrictions, you must comply with the special procedures and requirements for that major.

Except under unusual circumstances, no change of major will be permitted after you attain senior standing (135 units). It is not possible to change or declare a major in the quarter in which you file to graduate.

**College of Engineering.** The above provisions may not apply to students in the College of Engineering, whose freedom to change majors is limited. Please contact the Engineering dean's office for specific change-of-major requirements.

### Change of Major Accompanied by Change of College

A change petition, available at the dean's office and Office of the Registrar, must be endorsed by a faculty adviser of the new major you are selecting and signed by the dean of the college from which you wish to transfer. In addition, admission to the new college will require that dean's approval. Permission to transfer from one college to another may be denied or deferred if you are in academic difficulty or have a GPA of less than 2.0 in courses that are required by the new major.

**College of Engineering.** You must submit your petition for change of major by the tenth day of instruction and declare a specific major at this time. You may submit petitions for transfer into the College of Engineering from another UC Davis college only if you are in good academic standing and are making minimum progress towards a degree. If you have completed more than 120 units (excluding AP units), you will not be allowed to file a change of major petition, except by appeal. Your appeal must include a quarter-by-quarter plan of study before a review of your appeal will be considered.

*Requirements for students changing their majors to Aeronautical Engineering, Biological Systems Engineering, Chemical Engineering, Civil Engineering, Food Engineering, Materials Science, or Mechanical Engineering or double majors within these fields:* You must have completed at least 40 units as a registered student on the Davis campus; have successfully completed Mathematics 21A, 21B, and 21C and Physics 9A (or their equivalents); have and maintain a minimum GPA of 2.5 in all mathematics and physics course work in the Mathematics 21 and 22 series and in the Physics 9 series; and have a minimum UC GPA of 2.5. (Petitions submitted for a change of major to the Department of Civil and Environmental Engineering will be accepted on a first-come, first-served basis, subject to available space. If you transfer to a major in the College of Engineering other than Civil Engineering, you may not later change into the Civil Engineering major.)

*Requirements for students changing their majors to Electrical Engineering, Electrical Engineering/Materials Science and Engineering, or Computer Engineering, or double majors that include any of these fields:* You must be a registered student at UC Davis for at least one quarter before petitioning for a change of major; be in good academic standing; be making minimum progress towards a degree with an overall UC GPA of at least 2.5; and

have completed Mathematics 21A, 21B, and 21C; Engineering 5 or Computer Science Engineering 30, Physics 9A, and Chemistry 2A with a GPA of at least 2.75 in these courses and have and maintain a GPA of 2.75 in all technical course work. *Requirements for students changing their major to a **double major in Electrical and Computer Engineering***: You must fulfill all of the preceding requirements, and you must be a registered student at UC Davis for at least one quarter before petitioning for the double major, have completed all lower division requirements, and have a GPA of at least 3.2. You must be able to demonstrate that the double major can be completed in five years (for a student who began UC Davis as a freshman) or three years (for a student who transferred to UC Davis).

*Requirements for students changing their majors to Computer Science and Engineering or a double major that includes Computer Science and Engineering*: You must be a registered student at UC Davis for at least one quarter before petitioning for a change of major; be in good academic standing; be making minimum progress towards a degree with an overall UC GPA of at least 2.5; and have completed Mathematics 21A, 21B, and 21C; Computer Science Engineering 20, 30 and 40; and Physics 9A with a GPA of at least 2.75 in these courses. If you have completed the equivalent course work at another institution, you must have a GPA of 3.0 in the equivalent course work and have a minimum of two UC Davis Computer Science Engineering (ECS) courses (with the exceptions of ECS 10, 15, 15AT, and 167) with a GPA of at least 2.75 in all ECS courses and have and maintain a GPA of 2.75 in all technical course work.

### Multiple Majors

**College of Agricultural and Environmental Sciences.** Because of similarity in course requirements for many of the major programs in the college, requests for multiple majors are not normally approved. If you are interested in two or more areas of study, you should consider the options of planning an individually designed major, or of adopting one or more of the minor programs offered by the college to complement your major. If you complete two majors, you may petition for recognition that you have completed all the requirements for study of a major in addition to your selected major. At least 80 percent of the upper division units used to satisfy course and unit requirements in each major selected must be unique and not duplicate those of the other major. In planning for multiple majors, you should determine the total requirements needed for each major as well as for graduation from each college involved.

**College of Engineering.** Engineering has several established double majors. Enrollment in combinations of engineering majors other than the established double majors or in an engineering major and a non-engineer-

ing major may be possible. A change of major petition is required; this should be filed in the Undergraduate Office and is subject to approval. Double-major students must satisfy the requirements for both majors. Degree requirements for such double majors ordinarily cannot be completed within four academic years.

The Department of Computer Science does **not** allow double majors of Computer Science Engineering and Computer Engineering, **or** Computer Science Engineering and Electrical Engineering, **or** Computer Science Engineering and Computer Science.

If you want to double major in any of the over-subscribed majors listed above, you will be subject to the additional restrictions for transferring into those majors and must satisfy the requirements of both majors.

**College of Letters and Science.** Students choosing to major in multiple subjects must notify the dean's office of their decision by submitting for approval a petition endorsed by faculty advisers in the majors. The dean's approval of the declaration of more than one major is subject to the following conditions:

1. At least 80 percent of the upper division units used to satisfy course and unit requirements in each major selected must be unique and may not be counted toward the upper division unit requirements of any other major undertaken. Courses with substantial overlap in content will not count as part of the 80 percent.
2. At the time of request, a substantial part of the preparatory subject matter and at least two upper division courses in each major must have been successfully completed.

All degree requirements must be completed within the 225-unit limit.

Combination proposals that *cannot be approved* are two or more majors

1. in the following group: biochemistry; biological sciences; cell biology; evolution and ecology; genetics; microbiology; neurobiology, physiology and behavior; and plant biology; or,
2. offered by the same discipline, *except* art history and art studio.

A student who completes all requirements for approved multiple majors in which one major normally leads to an A.B. degree and another normally leads to a B.S. degree, will receive a B.A.S. degree. A single degree is granted to students who graduate with multiple majors.

### Cross-College Majors

**College of Agricultural and Environmental Sciences.** The College does encourage multiple majors between colleges whenever your academic interests and abilities indicate this to be the best route. After endorsement of the Change of Major petition by the appropriate faculty in the colleges involved, each dean may approve the petition if there are sufficient differences between the

requirements for the major programs you wish to study. At least 80 percent of the upper division units used to satisfy course and unit requirements in each major selected must be unique and not duplicate those of the other major. In planning for multiple majors, you should determine the total requirements needed for each major as well as for graduation from each college involved.

**College of Engineering.** Enrollment in a combination of an engineering major and a non-engineering major may be possible. A change of majors petition must be filed in the Undergraduate Office and is subject to approval. Such double-major students must satisfy the requirements for both majors. Degree requirements for such double majors ordinarily cannot be completed within four academic years.

**College of Letters and Science.** The same conditions apply for cross-college majors as for multiple majors. Cross-college programs will not be approved if the majors involved are available within a single college as well. For example, cross-college programs between the Colleges of Letters and Science and Agricultural and Environmental Sciences will not be approved if one of the majors is biochemistry; biological sciences; cell biology; evolution and ecology; genetics; microbiology; neurobiology, physiology and behavior; or plant biology.

### Individual Major

Students with academic interests not covered by an established major have the opportunity to develop an individual major. Such a major requires the selection of interrelated courses totalling a minimum of 45 upper division units from two or more areas of study. If you choose this option you will work closely with faculty advisers to develop a coherent and rigorous academic program. This program is then submitted to a faculty committee for review and approval. Submit the proposed program to the committee **by the fourth full week of the fifth quarter before graduation.** If you wish to undertake an individual major, request the appropriate forms from your dean's office. Program requirements are outlined under Individual Major in the Programs and Courses section of this catalog. The College of Engineering does not offer an individual major.

## THE MINOR

If you are interested in two or more areas of study, you should consider completing one or more minor programs. Minor program requirements are listed in the "Programs and Courses" chapter of this catalog under the department that offers them. You will find a complete list of the minors offered at UC Davis in a chart at the front of this catalog.

A minor consists of 18 to 24 units in upper division courses specified by the department or program offering the minor. Courses used to satisfy the requirements of a minor, including those completed elsewhere, must be approved by an adviser in the sponsoring department or program. **For minors offered by the College of Agricultural and Environmental Sciences, at least half of these units and courses must be completed in residence on the Davis campus.** You are also expected to complete all courses that are prerequisite to the upper division courses required for the minor. Minors offered by

the College of Letters and Science do not require that a portion of the units be completed at UC Davis.

To request certification of a minor, **you must have a grade point average of 2.0 in all courses required for the minor.** At most, one course used in satisfaction of your major may be applied to your minor. If you elect more than one minor, these minors may not have any courses in common.

If you want to have completion of a minor certified on your transcript, you must obtain a minor petition from your dean's office and file it no later than the deadline for filing for graduation. You can elect only one minor in a subject area. Requirements for the minor must be met by the time of graduation.

No minors are available in the College of Engineering, although students in Engineering may, with the approval of the Engineering dean's office *and* the adviser in the minor department, elect a minor in either the College of Letters and Science or in the College of Agricultural and Environmental Sciences. You must pick up a minor petition in the office of the college that offers the minor you want and have the completed petition approved by the minor adviser and then certified by the Undergraduate Office of the College of Engineering. A minor is not required and may not be used to substitute for approved Humanities and Social Sciences (HSS) electives. The Undergraduate Office in the College of Engineering has the primary responsibility for certifying minors for engineering students and should be consulted before you begin the minor sequence.

## ACADEMIC CREDIT

### Units of Credit

Academic work at the university is measured by "units of credit." In conjunction with the letter grade you receive from the course instructor, units of credit give a fairly accurate evaluation of the amount of time you have devoted to a given subject. Units of credit also make it possible to anticipate the amount of work involved in a particular course and enable you to transfer from one campus or university to another without undue difficulty. (To convert quarter units to semester units, multiply by 0.66; from semester to quarter units, multiply by 1.5.)

Units of credit are assigned to courses based on the "Carnegie unit," which assigns 1 unit of credit for three hours of work by the student per week. Usually this means one hour of lecture or discussion led by the instructor and two hours of outside preparation by the student. In laboratory courses, two or three hours of work in the laboratory are normally assigned 1 unit of credit.

In most courses at UC Davis, the standard procedure prevails, so that a 3-unit course meets for three hours a week, a 4-unit course for four hours, and so on. Courses that are an exception to this pattern may require additional class time or give more demanding assignments. If you have questions about the number of units assigned to a course, you should check the expanded course descriptions (if your college or department provides them) or ask the instructor what is required in

terms of outside reading, term papers, problem sets or field trips. These are not always spelled out completely in the *General Catalog*. By knowing the amount of work that will be required, you can plan your course load more systematically and realistically.

### **Credit by Examination**

Under certain prescribed conditions, currently registered students in good standing may receive course credit by taking an examination without formally enrolling in a course. You may obtain a petition and a copy of the prescribed conditions from the Office of the Registrar. The petition is subject to the approval of the instructor giving the examination and the department involved.

The completed petition, accompanied by a fee of \$5.00, must be presented for final approval to the dean of your college or school, or if you are a graduate student, to the dean of Graduate Studies.

The credit received for the examination may not duplicate any credit you have already earned toward your degree. You may not use credit by examination to repeat any course you have taken previously, regardless of the grade you received in that course. The final results will be reported to the Office of the Registrar, which will assign you the appropriate grade and grade points. Since failure to pass the examination will be recorded as an F, you are encouraged to prepare fully for such an examination before attempting it.

You may also receive credit for learning in nonacademic settings through credit by examination.

To earn credit through the credit by examination process, the examination must be given by a UC Davis instructor and be for a course listed in the current *General Catalog*. Students are not eligible to take a credit by examination in a quarter in which they are not currently enrolled.

### **Concurrent Credit from Another Institution**

A student may not obtain transfer credit for courses taken at a non-University of California campus in a term during which the student is registered as a full-time student at UC Davis. A variance can be obtained only by petitioning the dean of your college well in advance of the desired registration. When a variance is granted, units earned are counted toward minimum progress for the term in which the dual registration occurs. Summer session courses are exempt from this regulation.

Students may gain credit for courses taken during the summer at other institutions, provided the courses parallel those given in the University of California. Assurance that such credit will be accepted, however, can be given only after the courses have been completed. You should arrange to have the transcripts of your summer session grades sent to Undergraduate Admissions and Outreach Services for evaluation. See the Summer Sessions bulletin for detailed information.

### **Intercampus Visitor Program**

Qualified undergraduates may take advantage of educational opportunities on other University of California campuses as an Intercampus Visitor (ICV). This program enables students who have completed at least one year in residence on their home campus and have maintained a

grade point average of at least 2.0 to take courses not available on their home campus, to participate in special programs, or to study with distinguished faculty members on other campuses of the university. Students who meet the above requirements should complete an application available in the Office of the Registrar.

### **Summer Sessions**

44 Mrak Hall  
One Shields Avenue  
Davis, CA 95616-8715  
530-752-1641 or 1-800-VIP-2738;  
summer-sessions@ucdavis.edu  
International programs: 1-800-SUMMER6;  
<http://summer-sessions.ucdavis.edu>

Every summer, several thousand students earn units, complete their undergraduate degrees, expand their knowledge, do research, take special study courses, meet prerequisites or take courses that are often over-enrolled during the academic year by participating in Summer Sessions at UC Davis. More than 6,700 students enrolled in 1997.

Summer Sessions offers more than 200 lower and upper division courses in a wide range of subject areas that provide full university credit transferable to most campuses. Since admission is open to virtually all adults, Summer Sessions traditionally attracts students from universities and colleges, high school graduates and many other qualified applicants. Admission to a summer session, however, does not guarantee or imply admission to the university's regular academic quarters.

In 1999, the Office of Summer Sessions will offer two six-week sessions, which will run from June 28 to August 6 and from August 9 to September 17. All UC Davis undergraduates will automatically receive our 1999 Summer Sessions Catalog and application materials by the end of April; non-UC Davis undergraduates should contact us by phone, e-mail or in writing to the address above.

International and special programs offered in 1998 included the Summer Institute of Fine Arts; Literature of the Wilderness, in McCall, Idaho; the study of volcanoes in Hawaii; Rivers of California; and other special topic programs of different lengths. In 1998, students had the opportunity to study in England, France, Italy, Jamaica, Japan, Korea and Peru.

### **UC/CSU/Community College Cross Enrollment**

If you are interested in taking a particular class a nearby CSU or Community College campus, you may now do so through the Intersegmental Cross Enrollment program. Enrollment is limited to one course per term and participating students need the approval of both the home and the host campus. (Please note that the Los Rios Community College district is NOT participating in the program.)

Senate Bill 1914, also known as the Killea Bill, requires that UC, CSU and the California Community Colleges permit students to enroll in one course per term at a campus of either of the other two systems on a space available basis at the discretion of the two campuses. This program aims to encourage community college students to enroll concurrently in courses offered at

local universities, potentially increasing the number of community college transfers, including students from underrepresented groups.

Students must meet certain qualifications and be certified by their home campus as to eligibility, residence, fee, financial aid and health status. Generally, students will be allowed to add a class, if space is available, after the add/drop period on the host campus. To add a course, students must obtain the faculty member's approval and signature on a Cross-Enrollment form, available at their home campus Registrar's Office. The student takes the signed form to the Registrar's Office at the host campus for processing. If you are interested in participating, come to the service counter at the Office of the Registrar, 12 Mrak Hall, for information.

### University Extension

Credit for a limited number of units may be granted for specified University Extension courses, subject to the regulations of the individual colleges (see Bachelor's Degree Requirements section). No grade points are assigned for courses completed through University Extension.

## EXAMINATIONS

### Midterms

In undergraduate courses for which a midterm examination is required, each student has the right to take the midterm (or submit the take-home examination as opted by the instructor) during one of the regularly scheduled meetings of the class as published in the *Class Schedule and Room Directory*. The scheduling of a midterm examination at a time other than a regularly scheduled class meeting requires mutual consent of the instructor and each student registered in the course. A student who does not consent in writing to the different time must be permitted to take the examination (or submit the take-home examination) at the officially scheduled time. A student who consents in writing to the change of examination time waives the right to take the midterm at the officially scheduled time.

### Final Examinations

**Scheduling.** The *Class Schedule and Room Directory* lists the times that final examinations are to be held. These are set up according to the day-and-hour periods in which the classes are given during the quarter. This information is available in the *Class Schedule and Room Directory* each term so that you can avoid final examination conflicts.

The scheduling of an examination at a time other than the specified time requires the mutual consent of the instructor and each student involved in the change. Any student who does not consent in writing to a different time must be permitted to take an examination (or submit the instructor-opted take-home examination) at the officially scheduled time. A student who consents in writing to a change in the final examination time waives the right to take the examination as originally scheduled. Departures from the published examination schedule should be carried out so as not to disadvantage students who are unable to accept the alternate schedule. An in-class final examination may not be rescheduled for a date earlier than the first day of finals week.

The due date for a take-home final examination may not be rescheduled for a date earlier than the first day of finals week. A student who is improperly denied the right to take a required final examination on the published date (or submit the take-home examination as opted by the instructor) may file a petition with the Executive Council of the Davis Division of the Academic Senate by the end of the next regular term for appropriate action.

**Requirements.** Except under certain specified circumstances, Academic Senate Regulations require that final examinations be given in all undergraduate courses. Final examinations may be given in graduate courses. Exceptions to the regulation would be independent study courses, courses that consist of laboratory work only, and courses in which the examination has been waived (course descriptions will include the statement, "no final examination").

At the instructor's option, the final examination may be completely or in part a take-home examination. The writing time (in undergraduate courses) of a take-home and an in-class final examination together should not exceed three hours. In each course in which a final examination is required, the students have the right to take the final examination (and/or submit the take-home examination) at the time published in the *Class Schedule and Room Directory*.

An instructor may release each student's original examination, or a copy, at any time. Otherwise, the instructor will keep the exams, or copies thereof, until the end of the next quarter and students may pick up their exams during this period.

**Disabilities.** Students with documented disabilities may be entitled to in-class accommodations. The student shall provide the instructor with a letter from the Disability Resource Center (DRC) recommending those academic accommodations that the instructor is responsible for providing. Students must request accommodation as soon as possible, to allow the university reasonable time to evaluate the request and offer necessary adjustments. No accommodations shall alter the nature of the academic demands made of the student nor decrease the standards and types of academic performance, nor require facilities or personnel that cannot reasonably be provided. The instructor should consult with the student and DRC on any questions or concerns.

**Religious observances.** UC Davis seeks to accommodate any student who, in observance of a religious creed, encounters an unavoidable conflict with a test or examination schedule. The student is responsible for providing, in writing and at the beginning of the quarter, notification of a potential conflict to the individual responsible for administering the examination and requesting accommodation. Instructors will consider such requests on a case-by-case basis and determine whether such conflicts can be resolved without imposing on the instructor or the other students in the class an undue hardship which cannot be reasonably avoided. If so, the instructor will determine, in consultation with the student, a time during which the student can take the test or examination without incurring a penalty or violation to the student's religious creed.

## GRADES

Every instructor is required to assign a grade for each student enrolled in a course. The following grades are used to report the quality of a student's work at UC Davis:

|     |                                                                                   |
|-----|-----------------------------------------------------------------------------------|
| A   | <i>excellent</i>                                                                  |
| B   | <i>good</i>                                                                       |
| C   | <i>fair</i>                                                                       |
| D   | <i>barely passing</i>                                                             |
| F   | <i>not passing (work so poor that it must be repeated to receive recognition)</i> |
| P   | <i>passed (grade C– or better)</i>                                                |
| NP  | <i>not passed</i>                                                                 |
| S   | <i>satisfactory</i>                                                               |
| U   | <i>unsatisfactory</i>                                                             |
| I   | <i>incomplete (work is satisfactory but incomplete for a good cause)</i>          |
| IP  | <i>in progress</i>                                                                |
| ENW | <i>enrolled–no work submitted</i>                                                 |

The grades A, B, C and D may be modified by a plus (+) or minus (–).

The notation “ENW” (Enrolled–No Work Submitted) will be recorded on a student's official transcript for any course on the student's study list for which, to the best of the instructor's knowledge, the student did not present any work subject to grading.

### Grade Points

Grade points are assigned each letter grade as follows:

|          |          |            |
|----------|----------|------------|
| 4.0 = A+ | 2.3 = C+ | 0.0 = F    |
| 4.0 = A  | 2.0 = C  | 0.0 = I    |
| 3.7 = A– | 1.7 = C– | 0.0 = P/NP |
| 3.3 = B+ | 1.3 = D+ | 0.0 = S/U  |
| 3.0 = B  | 1.0 = D  |            |
| 2.7 = B– | 0.7 = D– |            |

### Grade Point Average (GPA)

The grade point average is computed on courses taken at the University of California, with the exception of courses taken in University Extension. The value of grade points over units attempted determines your grade point average. The grade point balance represents the number of grade points above or below a C average. The grades IP, P, S, NP and U carry no grade points and are not included in grade point computations. Incomplete (I) grades are not included in the GPA at the end of the quarter, but are counted as F in determining if a bachelor's degree candidate has earned the minimum 2.0 GPA required for graduation.

A student at Davis is expected to maintain a C (2.0 GPA) or better in all work undertaken in the university. If you fall below a C average, you are considered “scholastically deficient” (see Probation and Dismissal).

## Passed/Not Passed (P/NP) Grading

Subject to regulation by the faculties of the colleges and schools, an undergraduate student **in good standing** may request to take specific courses on a Passed/Not Passed basis. Such requests must be submitted and confirmed before the 25th day of instruction.

The grade P is assigned for a grade of C– or better. Units thus earned are counted in satisfaction of degree requirements but are not counted in determining your grade point average.

The intent of this option is to encourage exploration in areas in which you have little or no previous experience by alleviating grading pressures. **The maximum number of units graded P that will be accepted for degree credit is one third of the units completed in residence on the Davis campus.** Consequently, at least two thirds of the units completed in residence at Davis and presented in satisfaction of degree requirements must be in courses taken for a letter grade.

In specific approved courses instructors will assign only Passed or Not Passed grades. Such courses count toward the maximum number of units graded P allowable toward the degree. If you are planning to take courses on a P/NP basis, you should also familiarize yourself with the requirements of your particular school or college, which may have placed conditions or restrictions in addition to the university requirements. If you plan to attend graduate or professional school, you should consult with Advising Services regarding Passed/Not Passed grading.

If you elect the P/NP grading option for courses graded upon completion of a two- or three-quarter sequence (In-Progress grading), a petition must be submitted before half of the time covered by the IP grading has elapsed. The P/NP grading will then be in effect for the entire course sequence.

If you receive a D or an F in a course, you may not repeat it using the P/NP option. If you receive an Incomplete in a course you took for a letter grade, you may not complete the course on a Passed/Not Passed basis.

### College of Agricultural and Environmental Sciences:

The Passed/Not Passed option should be used only for elective courses, not for courses taken to fulfill major requirements. An NP grade in a course required by the major could prevent graduation. When in doubt, check with your faculty adviser before electing to take a course on a Passed/Not Passed grading basis.

**College of Engineering:** Students enrolled in any undergraduate major offered by the College of Engineering may **not** exercise the Passed/Not Passed grading option for any course work presented in satisfaction of course or unit requirements for any undergraduate major or degree offered by the College of Engineering. Additionally, undergraduate students may not exercise the P/NP option for any course offered through the College of Engineering. Courses offered only on a P/NP basis are acceptable for specific program area degree requirements.

**College of Letters and Science:** Students enrolled in the College of Letters and Science are subject to an additional limitation on the number of units that may be completed employing the Passed/Not Passed grading

option (see Bachelor's Degree Requirements for the college in the "Undergraduate Education" chapter). Graduating seniors, and other students planning to undertake graduate or professional studies, should consult an adviser before electing for Passed/Not Passed grading in courses required for the major program.

### Satisfactory/Unsatisfactory (S/U)

The grade of S is awarded to graduate students for work in graduate courses that otherwise would receive a grade of B- or better and for work in undergraduate courses that otherwise would receive a grade of C- or better.

Graduate students, under certain circumstances, may be assigned grades of S or U, but units earned in this way will not be counted in calculating the grade point average. Petitions to elect S/U grading are available from the Graduate Studies Office and must be signed by your graduate adviser. Graduate students may petition to take no more than one course per quarter on an S/U grading basis. A graduate course in which a C, D or F grade is received may not be repeated with the S/U option.

In specific approved courses, instructors will assign only Satisfactory or Unsatisfactory grades. Such courses count toward the maximum number of units graded S allowable toward the degree, as specified by each degree program.

### In-Progress (IP) Grading

For a course extending over more than one quarter (designated "deferred grading only, pending completion of sequence" in course descriptions), evaluation of student performance is deferred until the end of the final quarter. Provisional grades of IP are assigned in the intervening quarters and are replaced with the final grade at the completion of the sequence. In order to gain credit toward graduation, a student must successfully complete the entire sequence. (See above for electing P/NP grading for a course graded in-progress.)

### Incomplete Grades

The grade of I may be assigned when a student's work is of passing quality and represents a significant portion of the requirements for a final grade, but is incomplete for a good cause as determined by the instructor. (Good cause may include current illness, serious personal problems, an accident, a recent death in the immediate family, a large and necessary increase in working hours or other situation of equal gravity.)

You may replace an I grade with a passing grade and receive unit credit (and grade points if the instructor assigns a letter grade) provided you satisfactorily complete the course work as specified by the instructor. In order to change your records, you must obtain a petition from the Office of the Registrar and present it to your instructor for completion and mailing.

An I grade must be replaced with a letter grade (or P or S grade) before the end of the third succeeding quarter (excluding summer sessions) of the student's academic residence, or the grade will revert to an F (or NP or U). If a student's degree is conferred before the expiration of the time limit for an I-grade conversion, the graduated student shall have until the end of the third quarter succeeding the quarter in which the I grade was assigned to

replace the I grade. If the grade is not replaced by then, the I grade will remain on the student's record.

You may not re-enroll for credit in a course for which an I grade has been assigned. An undergraduate student whose record shows more than 16 units of I grades will be subject to disqualification. A graduate student who accumulates more than eight units of I grades will be subject to probation.

Incomplete grades will not be included in your grade point average at the end of a quarter. At the time of graduation, however, any remaining I grades are included when your grade point average is computed, in order to determine whether you have achieved the 2.0 average required for the bachelor's degree. An Incomplete grade, in these computations, has the same effect as a grade F, NP or U, depending on which option you have exercised. Therefore, it is recommended that students not delay the clearance of incomplete grades so as not to jeopardize graduation.

### Retroactive Grade Changes

All grades except I and IP are final when filed by an instructor at the end of the quarter. No final grade except I may be revised by examination or the submission of additional work after the close of the quarter.

If, however, a clerical or procedural error in the reporting of a grade by the instructor can be documented, you may request a change of grade with a petition available from department offices. The request must be made by the fifth week of the following quarter.

Grade changes for "clerical" errors (such as incorrect addition of points), upon documentation, are automatically granted. Requests to interchange "P," "NP," "S," or "U" grades with normal letter grades based upon student need (such as to allow graduation or to meet entrance requirements for professional school) do not involve clerical or procedural errors and are automatically denied. Thus, students should exercise the Passed/Not Passed or Satisfactory/Unsatisfactory grading options with caution.

Students are reminded of their responsibility to be aware of the procedures and regulations contained in this catalog and the *Class Schedule and Room Directory*, to verify their schedules via RSVP, and to familiarize themselves with the expectations of their instructors. No changes, except completion of an I grade as noted above, can be made to the student's record once he or she has graduated.

### Repeating Courses

**Undergraduate students** may only repeat courses in which they received a D, F or NP. Courses in which students received a grade of D or F may not be repeated on a P/NP grading basis. (Courses in which a grade of NP was received may be repeated on a P/NP grading basis.)

Degree credit for a repeated course will be given only once, but the grades assigned for both the first and second time a course is taken will appear on the student's transcript. In computing the GPA of undergraduates who have received a grade of D, F or NP, only the grade and corresponding grade points earned the second time a course is taken will be used, up to a maximum of 16

units for all courses repeated. After the 16-unit maximum is reached, the GPA shall be based on all grades assigned and total units attempted.

Repeating a course more than once requires approval by the appropriate college dean. Departments may restrict the repetition of a course if it is a prerequisite to a course the student has already completed with a grade of C– or better.

**Graduate students**, with the consent of the appropriate graduate adviser and the dean of Graduate Studies, may repeat any course in which they received a C, D, F or U, up to a maximum of 9 units for all courses repeated. Courses in which a grade of C, D or F has been earned may not be repeated on a S/U basis. (Courses in which a grade of U was received may be repeated on a S/U basis.)

Degree credit for a repeated course will be given only once, but the grades assigned for both the first and second time a course is taken will appear on the student's transcript. In computing the GPA of graduate students who have received a grade of C, D or F, only the most recently earned grade for each course and corresponding grade points will be used, up to a maximum of 9 units for all courses repeated. After the 9-unit maximum is reached, the GPA shall be based on all grades assigned and total units attempted.

### Mid-Term Grade Standing

Students wishing to know their grade at the mid-quarter should ask the instructor. Those who have deficient grades (D, F or Not Passed) are urged to confer with their advisers.

### Final Grades

Grades are generally available about three weeks after a quarter has ended. You can check your grades in a number of ways:

- Call RSVP to hear your grades, available at the dates published by the Office of the Registrar
- Check your grades using a Web browser by accessing WIRES at: <http://www.ucdavis.edu/ucnames/wires>
- Use the Office of the Registrar Kiosk, Mrak Hall lobby
- Have your grades mailed to you, by bringing a stamped, self-addressed envelope with your student photo ID card to the Office of the Registrar before the end of the quarter

### Transcripts

A record of each student's academic work at UC Davis is retained permanently by the Office of the Registrar. Copies of your official transcript may be obtained from that office for \$4.00 a copy. Application for a transcript of record should be made at least two weeks in advance of the time needed.

Transcripts of all work done through University Extension or Concurrent Enrollment should be requested directly from the University Extension Office, 1333 Research Park Drive, Davis, CA 95616. Transcripts of work completed at another campus of the university or at another institution must be requested directly from the campus or institution concerned.

## PROBATION AND DISMISSAL

The following provisions apply to all undergraduates. Graduate and professional students with scholarship deficiencies are subject to action at the discretion of their respective deans.

### Scholastic Deficiencies

A student will be placed on probation or subject to disqualification for failure to meet qualitative or quantitative standards of scholarship.

The **qualitative standards** of scholarship require that a student maintain a C average (2.0) or better for all work undertaken in the university and for the work undertaken in any one quarter.

A student will be placed on **probation for qualitative reasons** if, at the end of any quarter, the student's grade point average (GPA):

- is less than 2.0, but not less than 1.5, for the quarter,
- or**
- is less than 2.0 for all courses taken within the University of California.

A student will be subject to **disqualification for qualitative reasons** if, at the end of any quarter,

- the student's grade point average is less than 1.5 for the quarter,
- or**
- the student's grade point average is less than 1.5 for all courses taken within the University of California.
- or**
- the student has attempted more than 16 units graded I (Incomplete),
- or**
- the student has spent two consecutive quarters on academic probation.

In the case of probation or disqualification the official transcript will state "not in good standing." Once a student has met qualitative standards for scholarship, the notation will be removed from the transcript.

The **quantitative standards**, referred to as minimum progress requirements, define scholarship in terms of the number of units that you must satisfactorily complete. It is assumed that a student will earn the 180-unit minimum degree requirement within 12 quarters (four years). This means students must plan to complete, on average, 15 units per quarter. Because occasions arise which prevent students from achieving normal progress towards the degree, the campus has established minimum progress requirements, to which students must adhere. Minimum progress is defined as an average of 12 units passed per quarter, calculated at the end of every quarter for the preceding three quarters.

A student will be placed on **probation for quantitative reasons** if the student fails to make minimum progress for that quarter. The notation "warning—minimum progress" will be noted on the grade report for a quarter in which the student has passed less than 12 units. Students calling RSVP to check their grades will hear a warning that they are not in good academic standing; if they print their grades from the Office of the Registrar Kiosk, they will see the same warning on their printout.

A student will be subject to **disqualification for quantitative reasons** if the total number of units passed at UC Davis is **less than 36**, calculated at the end of every quarter for the preceding three quarters of enrollment. The notation “minimum progress—subject to academic disqualification” will be noted on the grade report the first time the total number of units passed at UC Davis is **less than 36**, calculated at the end of every quarter for the preceding three quarters of enrollment.

Quantitative standards are not reflected on the official transcript.

The following courses may be counted toward unit minimum progress:

- Required non-credit courses, e.g., Mathematics B, will be evaluated according to the “Carnegie unit” rule and counted as units passed
- Repeated courses passed to improve D or F grades
- Courses passed in Summer Sessions at UC Davis or at another accredited school and transferred to UC Davis will be counted as units passed (applied to the quarter of registration just preceding the summer session)
- Courses passed by examination in accordance with policies established by the Divisional Committee on Courses (applied to quarter in which exam is taken)
- Courses that are IP (in progress) will be counted as units passed
- Courses graded I will be counted as units passed when replaced by a passing grade (applied to the quarter in which the I grade is received)

The dean of the student’s college may grant a student a minimum progress variance of one or more quarters for an acceptable reason.

Minimum progress requirements do not apply to students who have part-time status or to students who have their dean’s approval to carry less than the minimum progress load because of medical disability, employment, a serious personal problem, a recent death in the immediate family, or a serious accident involving the student.

### Dismissal

Dismissal for either qualitative or quantitative reasons (defined above) is based on the decision of the dean of the college in which you are enrolled. Such dismissal is from the University of California system and not simply the college or the Davis campus. Should a former Davis student later wish to be readmitted on the Davis campus, the authority to do so rests with the dean of the college from which the student was dismissed. If you are dismissed from your college, you will automatically receive a full refund of registration fees paid.

See your faculty adviser or go to the dean’s office of your college if you need academic advising about probation and dismissal.

### Transfer with Scholastic Deficiencies

To transfer from one University of California campus to another, or from one college or school to another on the same campus, a disqualified or probational student must obtain the approval of the dean whose jurisdiction is being sought. Following the transfer, the student is subject to supervision by the faculty of the new college, school or campus.

## HONORS AND PRIZES

### Scholarships

Information:  
228 Voorhies Hall  
530-752-3153; <http://faoman.ucdavis.edu/schol.htm>

By mail:  
Scholarship Office  
University of California  
One Shields Avenue  
Davis, CA 95616-8696

Students with outstanding academic records who show promise of continued scholarly achievement are encouraged to apply for scholarship recognition and awards. Awards are accompanied by a financial honorarium or stipend.

### Deans’ Honors Lists

According to Davis campus regulations, the quarterly Dean’s Honors List includes names of students who have completed, for a letter grade, a minimum of 12 units in a specific quarter with a grade point average equal to or higher than the minimum grade point average attained by the upper 16 percent of those registered in the same class level and college during that quarter. Honors lists will be posted quarterly outside deans’ offices, and a notation of these honors will be placed on each student’s permanent record by the Office of the Registrar.

### Graduation Honors

Honors at graduation are awarded to students who have a grade point average in the top percent of their college as shown in the table below. (The College of Letters and Science requires that additional criteria be met for high and highest honors—see explanation below.)

| Total Quarter Units Completed at UC | Highest Honors | High Honors | Honors | Total |
|-------------------------------------|----------------|-------------|--------|-------|
| 45-89                               | 2%             | 2%          | 4%     | 8%    |
| 90-134                              | 3%             | 3%          | 6%     | 12%   |
| 135+                                | 4%             | 4%          | 8%     | 16%   |

Grade point averages from the winter quarter previous to graduation are used to determine the averages that will earn an honors designation. Following are the averages for winter quarter 1998. These averages will be used through winter 1999.

| Percent Determining Cut-Off Point | Grade Point Average by College          |             |                     |
|-----------------------------------|-----------------------------------------|-------------|---------------------|
|                                   | Agricultural and Environmental Sciences | Engineering | Letters and Science |
| 2%                                | 3.883                                   | 3.858       | 3.888               |
| 3%                                | 3.844                                   | 3.809       | 3.850               |
| 4%                                | 3.807                                   | 3.773       | 3.808               |
| 6%                                | 3.742                                   | 3.700       | 3.729               |
| 8%                                | 3.667                                   | 3.618       | 3.671               |
| 12%                               | 3.550                                   | 3.506       | 3.565               |
| 16%                               | 3.444                                   | 3.391       | 3.490               |

An honors notation is made on students’ diplomas and on their permanent records in the Office of the Registrar.

**College of Letters and Science.** Graduation with honors requires that a student meet the appropriate grade point requirement described in the above table for all UC courses completed. Students who meet the grade point requirement for graduation with honors and who complete the Honors Program of the College of Letters and Science may be recommended by their departments

---

*No matter what your mode of locomotion, UC Davis' level terrain makes it easy to get around.*

---

for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major and in the honors project in particular. A notation shall appear on the student's official transcript indicating that the 194H Honors Thesis was completed. Graduating students will not be awarded honors with the bachelor's degree if more than eight units of grade I (Incomplete) appear on their transcripts. The College Committee on Honors may consider exceptions to this condition. Petitions for this purpose should be submitted to the dean's office.

### **The Honors Program of the College of Letters and Science**

The Honors Program in the College of Letters and Science permits students to pursue a program of study in their major at a level significantly beyond that defined by the normal curriculum. It represents an opportunity for the qualified student to experience aspects of the major that are representative of advanced study in the field. Successful completion of the College Honors Program is a necessary prerequisite to consideration for the awarding of high or highest honors at graduation.

Entrance into the honors program requires that a student have completed at least 135 units with a minimum grade point average of 3.5 in courses counted toward the major. Other prerequisites for entrance into the program are defined by the major. The program consists of a project whose specific nature is determined by consultation with the student's major adviser. It may involve completion of a research project, a scholarly paper, a senior thesis, or some comparable assignment depending on the major. The project will have a minimum duration of two quarters and will be noted on the student's record by a variable unit course number or special honors course designation. Successful completion of the honors program requires that a minimum of six units of credit be earned in course work for the project.

### **Davis Honors Challenge**

Information:  
530-752-9797; <http://www-honors.ucdavis.edu>

The Davis Honors Challenge (DHC) is a campuswide program for highly motivated students interested in

enhancing their education through special courses, closer contact with faculty and dynamic interaction with academic peers.

DHC participants take two honors courses and one problem-oriented interdisciplinary seminar per academic year. The seminars are designed to foster critical thinking and analytical interpretation, improve oral and written communication skills, enhance research skills, provide experience with group dynamics and collaborative exploration of problems, and develop familiarity with electronic communication and visual presentations.

DHC seminars are limited in size so that participants receive substantial individual attention from faculty. In return, students are expected to participate actively in analyzing real-world problems that require the best intellectual efforts of us all. Honors courses and small honors sections of regular courses also encourage individual student participation and self-challenge. Students satisfactorily completing the Davis Honors Challenge will receive transcript notation for each academic year of participation.

Entering first-year students who file a "Statement of Intent to Register" at UC Davis will be mailed detailed information about the DHC application process. Continuing students may obtain information and an application from the DHC Office after the start of spring quarter. In addition, a limited number of third-year students will be admitted to an upper division honors pilot program.

### **Integrated Studies**

Information:  
530-752-9797

Integrated Studies is a campuswide, invitational, first-year residential honors program associated with the Davis Honors Challenge. Integrated Studies offers theme-oriented, specially designed, interdisciplinary honors courses that satisfy General Education requirements. Approximately 70 students live in an Academic Residential Community on campus and take three limited-enrollment honors courses open only to Integrated Studies students and two integration seminars.

HOLDERS of Regents Scholarships, the university's most prestigious scholarship awards, are guaranteed places in Integrated Studies. Other highly qualified students are also invited to participate and are selected to create a balanced community of students from all three undergraduate colleges and the Division of Biological Sciences.

### **Prizes and Awards**

The University Medal is the highest campus honor awarded to a graduating senior in recognition of superior scholarship and achievement. In addition, a College or School Medal is given to the outstanding graduating student in each of the colleges and professional schools.

Departmental citations, special awards and prizes are also awarded to students for superior achievement and scholarship.

### **College of Agricultural and Environmental Sciences.**

Each year the outstanding graduating senior in the College is awarded a silver medal, known as the "Agricultural and Environmental Sciences Medal." Scholastic

excellence (in a minimum of six quarters at UC Davis) is the primary basis for choosing the recipient. The Mary Regan Meyer Prize is awarded to an outstanding graduate who has demonstrated expertise and an interest in serving humanity. The Kinsella Memorial Prize, in honor of John E. Kinsella, is awarded annually to an outstanding individual who submits his or her Ph.D. dissertation during the spring, fall or winter quarter immediately preceding the due date for nomination.

**College of Engineering.** Each year outstanding senior students in engineering are recommended by the faculty of the College as nominees for the M.S. Ghausi Medal. Academic excellence is the primary basis for selecting the recipient of the award.

**College of Letters and Science.** Graduating seniors with a distinguished academic record may be recommended by the faculty as nominees for the College's Herbert A. Young Medal. Each June, one medalist is selected from among the graduates of the current academic year. The Leon H. Mayhew Award is conferred upon the outstanding graduate from a disciplinary area other than that of the College medalist. Academic excellence is the primary basis for selecting the recipients of these awards. The Lawrence J. Andrews prize is awarded to a student entering the senior year who not only has achieved academic excellence but who also has demonstrated interests outside of pure scholarship.

### Chancellor's Award

This award recognizes students who have distinguished themselves through their excellence in and contribution to undergraduate research and encourages others to become involved in these types of efforts. Recipients of the award receive a certificate of commendation and inscribed plaque from the president of the university.

In conjunction with the Chancellor's Award, Professor Dean Simonton of UC Davis' Department of Psychology established an endowment for funding a cash prize of \$500 for each year's student recipient.

### Honorary Societies

Election to an honorary society is one of the most prestigious awards a student can receive. At UC Davis, the following honorary societies are represented:

- Alpha Kappa Delta (Sociology)
- Alpha Omega Alpha (Medicine)
- Alpha Zeta (College of Agricultural and Environmental Sciences)
- Delta Phi Alpha (German)
- Golden Key (All colleges and schools)
- Kappa Omicron Nu (Family and Consumer Sciences)
- Omicron Delta Epsilon (Economics)
- Order of Omega (Fraternities–Sororities)

- Order of the Coif (Law)
- Phi Alpha Theta (History)
- Phi Beta Kappa (College of Letters and Science)
- Phi Kappa Phi (All colleges and schools)
- Phi Sigma (Biological Sciences)
- Phi Zeta (Veterinary Medicine)
- Pi Delta Phi (French)
- Pi Mu Epsilon (Mathematics)
- Pi Sigma Alpha (Political Science)
- Prytanean Honor Society (All colleges—undergraduate women only)
- Psi Chi (Psychology)
- Sigma Pi Sigma (Physics)
- Sigma Xi (All colleges and schools—research)
- Tau Beta Pi (Engineering)

## LEAVING UC DAVIS

### Graduation

Each candidate for an undergraduate degree must file an **Announcement of Candidacy** with the Office of the Registrar for the quarter in which the candidate plans to receive the degree. The dates for filing are published in the Academic Calendar at the front of this catalog and the quarterly *Class Schedule and Room Directory*.

Students in the College of Agricultural and Environmental Sciences must have their Major Certification form evaluated by the dean's office before their candidacy for a degree can be finalized (see Bachelor's Degree Requirements for the college in the "Undergraduate Education" chapter).

### Leave of Absence: Planned Educational Leave Program (PELP)

The Planned Educational Leave Program allows students to suspend academic work at UC Davis, leave the campus and later resume studies at UC Davis with a minimum of procedural difficulties.

Any registered student on the Davis campus, undergraduate or graduate, is eligible to enroll in the Planned Educational Leave Program, although restrictions may be imposed on the number of times a student can participate in the program. To apply for PELP, first complete an application, including a brief written explanation of the reason for leaving the campus and stating when you intend to resume academic work at UC Davis. You must then obtain approval from the dean of your college or school. Applications for PELP are available at the Office of the Registrar and should be filed with the Office of the Registrar **no later than the first day of instruction**.

An application fee of \$40 is charged, payable when you enroll in the PELP program. This fee is identical to that paid by a student who withdraws and is required to pay a readmission fee upon return.

The minimum Planned Educational Leave is one full quarter; the maximum leave is one full academic year. Applications for PELP should be filed no later than the first day of instruction. While approved applications can be accepted as late as the tenth day of instruction, filing after the first day of instruction will entitle you to only a partial refund of fees paid, in accordance with the Schedule of Refunds. The Schedule of Refunds refers to **calendar days** beginning with the first day of instruc-

*More than two miles of paths in the Arboretum provide lots of space to bike, jog or just watch the ducks.*

tion. The effective date for determining a refund of fees is the date the completed and approved PELP form is returned to the Office of the Registrar. (See the “Fees, Expenses and Financial Aid” chapter.)

While students may receive academic credit at other institutions and transfer this credit to UC Davis (subject to rules concerning transfer credit), participants are reminded that the intent of the program is to “suspend academic work.” Therefore, students should carefully evaluate the desirability of taking academic work while away from the campus during PELP.

Readmission is guaranteed assuming you resume regular academic work at the agreed-upon date and satisfy any holds that may have been placed on your registration. Students who do not return at the agreed-upon date and who do not officially extend their leave will be automatically withdrawn from the university.

You will not be eligible to receive all normal university services during the planned leave. Certain limited services, however, such as placement and student employment services, counseling and faculty advising are available. Students on Planned Educational Leave may purchase a health care card from the Student Health Service and may retain library privileges by purchasing a library card. International students should consult Services for International Students and Scholars to find out what effects the Planned Educational Leave will have on their status. Grants and other financial aids will be discontinued for the period of the leave, but every effort will be made, where legally possible, to allow you to renegotiate loan payment schedules and to ensure the availability of financial aid upon your return.

**Withdrawal**

Withdrawals may be granted by the university for emergency reasons or for good cause. In order to withdraw, you must first obtain approval from the dean of your college or school. Unauthorized withdrawals will jeopardize registration privileges and result in failing grades.

Petitions for withdrawal (Notice of Cancellation/Withdrawal) are available at the Office of the Registrar. The following signatures are required on withdrawal peti-

tions: laboratory or course instructor; dean of your college or graduate faculty adviser; Student Aid Accounting Office. A percentage of fees paid may be refunded, in accordance with the Schedule of Refunds (see the “Fees, Expenses and Financial Aid” chapter). The effective date for determining a refund of fees is the date the completed withdrawal form is returned to the Office of the Registrar.

If you are receiving financial aid, you must report your change of status immediately, in person or by mail, to the Financial Aid and Student Aid Accounting Offices. If you are receiving veterans benefits, you must also report your withdrawal to the Veterans Affairs Office.

**Retroactive Withdrawals.** Petitions for retroactive withdrawals may be obtained from the Office of the Registrar. Reasons for seeking such are medical problems, severe emotional difficulties, or death or severe illness in the immediate family. Petitions should include a detailed account of the problem, appropriate documentation and an adequate explanation of why withdrawal was not taken during the quarter in which the problem occurred.

**UNDERGRADUATE  
EDUCATION**

## UNDERGRADUATE EDUCATION

Students may choose from over 150 major programs in a wide variety of disciplines offered by the three undergraduate colleges. Minor programs, more than 60 in all, are offered by the College of Agricultural and Environmental Sciences and the College of Letters and Science.

### College of Agricultural and Environmental Sciences

Office of the Dean, Academic Advising Center  
228 Mrak Hall  
530-752-0108; <http://www.aes.ucdavis.edu>

Major programs in the College of Agricultural and Environmental Sciences highlight the multiple connections among the environment, plant and animal systems, and human health and development, all within the larger context of the quality of life in the global economy. The majors fall into four broad areas of study described below. Majors in a fifth area of study, the biological sciences, are offered through both the College of Agricultural and Environmental Sciences and the College of Letters and Science and are administered by the Division of Biological Sciences. Refer to the following section, "Division of Biological Sciences," for more information. The College of Agricultural and Environmental Sciences also offers two collegewide degree programs and two collegewide non-degree programs.

#### The Undergraduate Programs

##### Animal Biology

These majors prepare students in animal biology and the management of environmental resources as needed to develop sustainable animal production technologies. Also considered is the impact of production and management processes on animal health and welfare, human diet and health, and the natural environment.

##### Majors:

Animal Biology, B.S.  
Animal Science, B.S.  
Animal Science and Management, B.S.  
Avian Sciences, B.S.  
Biotechnology, B.S. (see also Plant Science)  
Entomology, B.S.  
Wildlife, Fish and Conservation Biology, B.S. (see also Environmental and Resource Sciences and Policy)

##### Minors:

Agricultural Entomology (Entomology)  
Animal Science  
Apiculture Entomology (Entomology)  
Avian Sciences  
Entomology  
Insect Ecology (Entomology)  
Medical-Veterinary Entomology (Entomology)  
Nematology

##### Environment

These majors focus on the broad facets of the human and natural environments and their interactions. They draw on the social, physical and biological sciences as needed to prepare students for leadership and advanced studies in the areas of natural resource management, environmental quality and stewardship, community planning and design, and public policy decision making.

##### Majors:

Atmospheric Science, B.S.  
Environmental and Resource Sciences, B.S.  
Environmental Biology and Management, B.S.  
Environmental Horticulture and Urban Forestry, B.S.  
Environmental Policy Analysis and Planning, B.S.  
Environmental Toxicology, B.S.  
Hydrology, B.S.  
Landscape Architecture, B.S.  
Soil and Water Science, B.S.  
Wildlife, Fish and Conservation Biology, B.S.  
(see also Animal Biology)

##### Minors:

Applied Biological Systems Technology (Biological and Agricultural Engineering)  
Atmospheric Science (Land, Air and Water Resources)  
Energy Policy (Environmental Studies)  
Environmental Policy Analysis (Environmental Studies)  
Environmental Toxicology  
Geographic Information Systems (Biological and Agricultural Engineering)  
Geographic Studies (Environmental Design)  
Hydrology (Land, Air and Water Resources)  
Soil Science (Land, Air and Water Resources)

#### Human Health and Development

These majors foster a deeper understanding of the multiple connections between scientific and cultural issues in the context of human health and the quality of life. Basic physical and biological science, social science, design, and economic principles are taught in this context, linking food and fiber production to consumption, emerging knowledge to societal applications and policy, and human development to active, informed citizenship. Emphasis is on linking resources for humans with humans as resources. Physiological, social, and aesthetic dimensions of the human experience are explored.

##### Majors:

Agricultural and Managerial Economics, B.S.  
Community and Regional Development, B.S.  
Community Nutrition, B.S.  
Design, B.S.  
Dietetics, B.S.  
Fermentation Science, B.S.  
Fiber and Polymer Science, B.S.  
Food Biochemistry, B.S.  
Food Science, B.S.  
Human Development, B.S.  
Nutrition Science, B.S.  
Textiles and Clothing, B.S.  
Viticulture and Enology, B.S.

##### Minors:

Aging and Adult Development  
(Human and Community Development)  
Agricultural and Managerial Economics  
(Agricultural and Resource Economics)  
Community Development (Human and Community Development)  
Community Nutrition (Nutrition)  
Fiber and Polymer Science (Textiles and Clothing)  
Food Service Management (Nutrition)  
Human Development  
(Human and Community Development)  
Nutrition and Food (Nutrition)

Nutrition Science (Nutrition)  
Textiles and Clothing

### Plant Science

These majors provide a strong background in plant biology in the context of agricultural and environmental systems and societal needs. The Agricultural Systems and Environment major couples a strong background in plant biology with an ecological understanding of food and fiber production systems. The Crop Science and Management major provides a foundation in both the biological and economic principles that underlie management decisions in agribusiness. The Plant Biology major provides a basic background in all areas of plant biology, including plant development, plant protection, biotechnology and postharvest physiology.

#### Majors:

Agricultural Systems and Environment, B.S.  
Biotechnology, B.S. (see also Animal Biology)  
Crop Science and Management, B.S.  
Plant Biology, B.S.

#### Minors:

Agricultural Computing and Information Systems  
(Agronomy)  
Environmental Horticulture  
Precision Agriculture  
(Biological and Agricultural Engineering)

### Collegewide Programs

The collegewide programs cut across all of the above areas, providing students in a variety of majors with a background in such areas as public policy, economic principles in a global context, and the intersections among environmental, agricultural and socio-economic issues. Collegewide programs also include non-degree, lower division curricula aimed at providing students with a foundational knowledge base and the potential for developing individualized programs.

#### Majors:

Individual Major, B.S.  
International Agricultural Development, B.S.

#### Minors:

International Agricultural Development  
Science and Society

#### Non-degree programs:

Exploratory  
Science and Society

## Division of Biological Sciences

### (College of Agricultural and Environmental Sciences and College of Letters and Science)

Dean's Office  
202 Life Sciences Addition  
530-752-0410; <http://www.dbs.ucdavis.edu>

The Division of Biological Sciences is an intercollege unit that coordinates campuswide programs in basic biology and administers undergraduate programs in the core disciplines of biology on behalf of the College of Agricultural and Environmental Sciences and the College of Letters and Science.

The division is organized into five sections that represent major themes of modern biology: Evolution and

Ecology; Microbiology; Molecular and Cellular Biology; Neurobiology, Physiology, and Behavior; and Plant Biology. The individual sections offer seven specialized majors, each focusing on one of the core disciplines of basic biology. The major in Biological Sciences and the Bodega Marine Laboratory Program are offered by the entire division.

## The Undergraduate Programs

### Biological Sciences

This major is broad in concept, designed to span the numerous core disciplines of biology. The Biological Sciences major covers most dimensions of the study of life, ranging from molecules and cells to populations of organisms. While emphasizing breadth, the Biological Sciences major also requires the student to select an area of emphasis that provides concentrated attention to one facet of biology at the upper division level. Each area of emphasis coincides with one of the divisional sections.

#### Major:

Biological Sciences, A.B., B.S.

#### Minor:

Biological Sciences

### Evolution and Ecology

The major in evolution and ecology offers the student a broad background in the theoretical and empirical basis of our understanding of evolution and ecology of living organisms. The program of study begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in evolution and ecology and more specialized courses that allow the student to focus his or her studies.

#### Major:

Evolution and Ecology, A.B., B.S.

### Microbiology

Microbiology deals with bacteria, yeasts and other fungi, algae, protozoa, and viruses. These microorganisms are ubiquitous in nature and play a crucial role in areas such as agriculture, biotechnology, ecology, medicine, and veterinary science. The field of microbiology contributes to areas of fundamental inquiry such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis, and physiology.

#### Major:

Microbiology, A.B., B.S.

### Molecular and Cellular Biology

The Section of Molecular and Cellular Biology offers three majors. The biochemistry major introduces students to the chemistry of living organisms and the experimental techniques that are used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology

and who are comfortable with quantitative approaches to problem solving will find biochemistry a rewarding field of study.

The cell biology major provides a comprehensive understanding of the cell, the basic structural and functional unit of all living organisms. The major emphasizes principles that govern how biomolecules interact with one another to organize themselves into higher order structures that comprise cells and how cellular organization and function contribute to the development, maintenance, and reproduction of adult organisms.

The genetics major provides a broad background in the biological, mathematical, and physical sciences basic to the study of heredity and evolution. The major is sufficiently flexible to accommodate students interested in the subject either as a basic discipline in the biological sciences or in terms of its applied aspects such as biotechnology, medicine, and agriculture.

*Majors:*

Biochemistry, B.S.

Cell Biology, B.S.

Genetics, B.S.

### Neurobiology, Physiology, and Behavior

All animals perform certain basic functions—they grow, reproduce, move, respond to stimuli, and maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and highly integrated through the actions of the nervous and endocrine systems to determine behavior and the interaction between organisms and their physical and social environments. Students in this major will study functional mechanisms; the control, regulation, and integration of these mechanisms; and the behavior which relates to those mechanisms at the level of the cell, the organ system, and the organism.

*Major:*

Neurobiology, Physiology, and Behavior, B.S.

### Plant Biology

Plant biology is the study of plants as organisms. It includes the newer disciplines of cellular and molecular plant biology and the traditional areas of botany, such as anatomy, morphology, systematics, physiology, mycology, phycology, ecology, and evolution.

*Major:*

Plant Biology, A.B., B.S.

*Minor:*

Plant Biology

### Divisionwide Program

#### Bodega Marine Laboratory Program

A full quarter of undergraduate course work in marine biology is available each spring quarter at the Bodega Marine Laboratory (BML) located in Bodega Bay, CA. Course offerings include lecture and laboratory instruction in the developmental biology of marine invertebrates, physiological adaptation of marine organisms, and population biology and ecology; a weekly colloquium; and an intensive individual research experience under the direction of laboratory faculty (Biological Sciences courses 120, 120P, 122, 122P, 123; Neurobiology, Physiology and Behavior 141, 141P). The program is

residential, with students housed on the laboratory grounds. Participants are assessed a room and board fee in addition to standard campus registration fees.

## College of Engineering

Undergraduate Advising Office

1050 Engineering II

530-752-0557; <http://www.engr.ucdavis.edu>

Engineering is the profession in which the physical and biological sciences are applied in a practical way for the benefit of society. As an engineering student, you will learn to observe and describe technological problems and to seek useful solutions to them. Your skills upon graduation will be useful to you not only as an engineer, but also as a professional in management, sales, operations, manufacturing, and other fields.

Fifteen undergraduate engineering curricula, including five formal double-major programs, are offered. Each of these is a four-year program leading to the degree of Bachelor of Science. Ten programs are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), the nationally recognized accrediting body for engineering curricula: Aeronautical Science and Engineering, Biological Systems Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science and Engineering, Electrical Engineering, Electrical Engineering/Materials Science and Engineering, Materials Science and Engineering, and Mechanical Engineering.

The four-year undergraduate program is divided into two parts: the Lower Division Program and the Upper Division Program.

**Lower Division Programs.** If you enter the College of Engineering with fewer than 90 quarter units of credit, follow the lower division program specified for your major. If you enter the College with 90 or more quarter units of credit, you must fulfill the requirements outlined in this chapter under “College of Engineering, Unit Requirements.”

**Upper Division Programs.** If you have completed the requirements for the lower division program or have entered the College of Engineering with more than 90 quarter units of credit, you should follow the upper division requirements for the major you have selected from the programs that follow.

**Minor Programs:** The College of Engineering does not offer minor programs.

### The Undergraduate Programs

#### Biological and Agricultural Engineering

The Department of Biological and Agricultural Engineering offers two majors. Biological Systems Engineering majors learn to combine the science and art of engineering with the science of biology to design systems that influence, control, or use biological materials and organisms for improving the quality of life. Specific objectives include designing systems to process biological materials into consumer products; designing machines to interact with biological systems in disciplines ranging from agriculture to medicine; managing, recycling, and using wastes; and developing systems to protect and preserve our natural resources and environment.

Food engineering majors use engineering science principles in conjunction with biological, chemical, and physical sciences to produce, process, package, store, and distribute food efficiently. Specific objectives include developing and improving processing systems for cooking, freezing, drying, baking, canning, frying and extruding; designing equipment and systems that eliminate microbial and chemical hazards, reduce nutrient losses, and otherwise improve nutrition and diets; and minimizing waste discharge to the environment.

*Majors:*

Biological Systems Engineering, B.S.

Food Engineering, B.S.

### **Chemical Engineering and Materials Science**

The Department of Chemical Engineering and Materials Science offers four majors, including two approved double majors.

Chemical Engineering majors learn to apply chemical and engineering principles to create useful products ranging from antibiotics to zirconium, from petroleum to plutonium, from agricultural chemicals to plastics. Specific objectives include the design of industrial processes as diverse as integrated circuit materials production, integrated waste management, and petroleum refining.

Chemical/Biochemical Engineering majors combine chemical engineering studies with studies in the life sciences and bioprocess engineering. Bioprocess engineering is the application of engineering principles to develop, optimize, and commercialize manufacturing processes. Specific objectives include pharmaceuticals production, environmental repair, industrial chemical production, and food production.

Materials Science and Engineering majors learn to understand the microscopic structure, properties, and behavior of materials in order to produce new and improved materials with capabilities far superior to common metals, alloys and ceramics. Specific objectives include the development of materials for high-speed transportation systems, surgical and dental implants, new generations of power plants, and solid-state electronic devices in computer and optical communications technology.

*Majors:*

Chemical Engineering, B.S.

Chemical Engineering/Materials Science and Engineering, B.S.

Chemical/Biochemical Engineering, B.S.

Materials Science and Engineering, B.S.

### **Civil and Environmental Engineering**

Civil Engineering majors learn to apply the principles of the physical and biological sciences and engineering to plan and design systems to improve the quality of life. Specific objectives include providing potable drinking water and freedom from disease-carrying wastes; protecting the natural environment; mitigating the effects of earthquakes and other natural disasters; designing land-, water-, and air-transportation systems; and building roads and structures.

*Majors:*

Civil and Environmental Engineering, B.S.

Civil Engineering/Materials Science and Engineering, B.S.

### **Computer Science and Engineering**

The field of computer science and engineering encompasses the organization, design, analysis, theory, programming, and application of digital computers and computing systems. The curriculum develops versatile engineers with backgrounds spanning a broad computer/software spectrum. The Computer Science and Engineering major provides a solid background in mathematics, physics, chemistry, and electronic circuits and systems—all supporting the computer hardware and software courses that form the focus of the curriculum. A key theme is the hardware/software interaction in computer system design; this theme is reflected in the balance between hardware and software course requirements and in the orientation of the courses themselves. The major requires more humanities and social science electives than other college majors, in order to produce the verbal skills and intellectual breadth demanded by today's employers.

*Major:*

Computer Science and Engineering, B.S.

### **Electrical and Computer Engineering**

Electrical Engineering majors learn to apply the principles of the physical sciences and engineering to the design, analysis, development, production, and evaluation of electronic systems. Specific objectives include the provision of systems for communications, control, signal processing, integrated circuit fabrication, optoelectronics, consumer electronics, and digital systems.

Computer Engineering majors study the design, development, analysis, organization, theory, programming, and application of digital computers. Specific objectives include developing the student's ability to design both software and hardware. In comparison to the Computer Science and Engineering major, the Computer Engineering major provides greater emphasis on hardware in the key hardware/software interaction in computer system design.

*Majors:*

Computer Engineering, B.S.

Electrical Engineering, B.S.

Electrical Engineering/Materials Science and Engineering, B.S.

### **Mechanical and Aeronautical Science Engineering**

Aeronautical Science and Engineering majors learn to apply the principles of the physical sciences and engineering to vehicles whose motion is determined by aerodynamic forces. Specific objectives include the design, development, and manufacture of aircraft and other transportation systems integrating the disciplines associated with aerodynamics, propulsion, structures, and guidance/control.

Mechanical Engineering majors learn to apply physical and mechanical principles to the design and manufacture of machines and products, energy conversion systems, and equipment for guidance and control. Specific objectives include the provision of products and processes for intelligent manufacturing systems, biomechanical and sports equipment, power generation systems, propulsion for transportation, integration of vehicles and automated highways, and applications of computer and automation technologies.

*Majors:*  
Aeronautical Science and Engineering, B.S.  
Mechanical Engineering, B.S.  
Mechanical Engineering/Materials Science  
and Engineering, B.S.

### College of Letters and Science

Office of Undergraduate Education and Advising  
Room 200, Social Sciences and Humanities Building  
530-752-0392; <http://www-lsdo.ucdavis.edu/>

Major programs in the College of Letters and Science provide students systematic exposure to the key principles, methods, findings and representations of a selected area of study. In pursuing a major, students gain intellectual depth and competency in that subject matter, explore important linkages with collateral fields of inquiry, and are encouraged to engage in independent study.

Most of the academic programs offered through the college are grouped in three divisions: Humanities, Arts, and Cultural Studies; Mathematical and Physical Sciences; and Social Sciences. One collegewide degree program, the individual major, also is available. A set of majors in the basic biological sciences are offered through both the College of Letters and Science and the College of Agricultural and Environmental Sciences and are administered by the Division of Biological Sciences. Refer to the earlier section, "Division of Biological Sciences," for more information.

#### The Undergraduate Programs

##### Division of Humanities, Arts, and Cultural Studies

These majors focus centrally on the artifacts, expressions and concerns of humankind in various cultures and times. They provide students the opportunity to explore the creation, performance and analysis of works of art, the language and customs of non-English speaking societies, the theory and criticism of literature, and the peoples and cultures of this nation and its hemisphere. Students interested in studying these types of issues may select from more than 20 different majors.

*Majors:*  
African American and African Studies, A.B.  
American Studies, A.B.  
Art History, A.B.  
Art Studio, A.B.  
Chicana/Chicano (Mexican-American) Studies, A.B.  
Chinese, A.B.  
Classical Civilization, A.B.  
Comparative Literature, A.B.  
Dramatic Art, A.B.  
East Asian Studies, A.B.  
English, A.B.  
French, A.B.  
German, A.B.  
Italian, A.B.  
Japanese, A.B.  
Medieval Studies, A.B.  
Music, A.B.  
Native American Studies, A.B.  
Nature and Culture, A.B.  
Religious Studies, A.B.  
Russian, A.B.  
Spanish, A.B.  
Women's Studies, A.B.

*Minors:*  
African American and African Studies  
American Studies  
Art History  
Art Studio  
Asian American Studies  
Chicana/Chicano (Mexican-American) Studies  
Chinese  
Classical Civilization  
Comparative Literature  
Dramatic Art  
East Asian Studies  
English  
Film Studies  
French  
German  
Greek  
Italian  
Japanese  
Jewish Studies  
Latin  
Medieval Studies  
Music  
Native American Studies  
Nature and Culture  
Religious Studies  
Russian  
Social and Ethnic Relations  
Spanish  
Women's Studies

##### Division of Mathematical and Physical Sciences

These majors focus primarily on the description and interpretation of the structure, processes and events of the physical universe. They provide students the opportunity to explore in depth the structure, properties and reactions of substances; fundamental mathematical techniques and models and their application to the interpretation and explanation of phenomena; studies of matter and energy and their interconversions; the nature and development of computer languages; and earth and environmental processes. Students interested in studying these types of subjects may select from seven different majors. The division strongly encourages undergraduates to enroll in undergraduate research projects with one-on-one instruction by faculty scholar/researchers.

*Majors:*  
Applied Physics, B.S.  
Chemistry, A.B., B.S.  
Computer Science, B.S.  
Geology, A.B., B.S.  
Mathematics, A.B., B.S.  
Physics, A.B., B.S.  
Statistics, A.B., B.S.

*Minors:*  
Computer Science  
Environmental Geology  
Geology  
Geophysics  
Mathematics  
Physics  
Statistics

## Division of Social Sciences

These majors focus largely on issues and problems that characterize social, cultural, political, and economic life across human societies. They provide students the opportunity to explore the relationships between people and the groups and organizations of which they are a part, the antecedents of individual behavior, the development of political and economic systems, the social forces that have shaped the contemporary world, and the foundations of language, thought, knowledge and perception. Students interested in studying these types of issues may select from more than a dozen different majors.

### Majors:

Anthropology, A.B., B.S.  
 Communication, A.B.  
 Economics, A.B.  
 Exercise Science, A.B., B.S.  
 History, A.B.  
 International Relations, A.B.  
 Linguistics, A.B.  
 Philosophy, A.B.  
 Political Science, A.B.  
 Political Science–Public Service, A.B.  
 Psychology, A.B., B.S.  
 Sociology, A.B.  
 Sociology–Organizational Studies, A.B.

### Minors:

Anthropology  
 Communication  
 Economics  
 Economy, Justice and Society  
 Education  
 Exercise Science  
 History  
 History and Philosophy of Science  
 Linguistics  
 Philosophy  
 Political Science  
 Psychology  
 Sociology  
 War-Peace Studies

## Collegewide Program

Students whose academic interests cannot be satisfactorily met through the completion of an established major have the opportunity to develop an individual major. Individual majors may reflect the most recent trends in scholarship and research and are typically interdisciplinary in nature. The major proposal is developed in close and active consultation with two faculty advisers from the academic disciplines most closely related to the subject matter of the individual major. Careful faculty guidance and review assure that individual majors are comparable in academic rigor and intellectual coherence to those regularly available through the departments and programs of the college.

### Major:

Individual Major, A.B., B.S.

## BACHELOR'S DEGREE REQUIREMENTS

You must satisfy four groups of requirements before you can become eligible for candidacy for the bachelor's degree. (See box on next page.) The four groups are:

- University requirements, which apply to all colleges;
- General Education requirement, which applies to all colleges;
- College requirements; and
- Major requirements.

Detailed information on university requirements, the General Education requirement and college requirements can be found in this chapter.

**Every student is responsible for seeing that all his or her degree requirements are fulfilled.**

## UNIVERSITY REQUIREMENTS

All students must fulfill the following University of California requirements.

### Subject A: English Requirement

The university requires every undergraduate student to demonstrate college-level proficiency in English composition. Satisfaction of the Subject A requirement is a prerequisite to all other undergraduate courses in English.

The requirement, as determined by Undergraduate Admissions, may be met in one of the following ways:

- By achieving a score of 660 or higher on the SAT II-Writing Test.
- By achieving a grade of 5, 4, or 3 on the College Board Advanced Placement Examination in English.
- By entering the university with credentials showing the completion of an acceptable 3 semester-unit or 4 quarter-unit college-level course in English composition with a grade of C or better.
- By writing a passing essay on the Subject A Examination. This examination may be taken only once prior to enrollment. It is offered in the spring at local sites throughout California; a student admitted for fall quarter who has not already satisfied the Subject A requirement must take this examination. An out-of-state student or any California freshman admitted after mid-April will take another form of the Subject A Examination, which will be offered on the UC Davis campus during the orientation period each quarter. For the time and location consult the *Class Schedule and Room Directory*, published before the beginning of each quarter.

If you have not satisfied the requirement in one of the ways described above, *you must enroll in English 57 during your first quarter of residence at the university, or as soon thereafter as space is available in the course.* English 57, offered by Sacramento City College on the Davis campus, counts as 4.5 units on your study list and toward minimum progress but is not transferable as units toward graduation. To satisfy the requirement, students must pass the Subject A Examination offered as the final examination for English 57. Students failing the examination must repeat English 57. If the require-

## Bachelor's Degree Requirements

### University Requirements

All students must fulfill the following University of California requirements:

Subject A  
American History and Institutions  
Unit Requirement  
Residence Requirement  
Scholarship Requirement

### General Education Requirement

Students must complete three courses in the two areas of *topical breadth* outside the assigned area of their major. Students also must complete three *writing experience* courses and one *social-cultural diversity* course.

### College Requirements

#### College of Agricultural and Environmental Sciences

Unit  
Residence  
Scholarship  
English Composition

#### College of Engineering

Unit  
Residence  
Scholarship  
English Composition  
Design

#### College of Letters and Science

Unit  
Residence  
Scholarship  
English Composition  
Area (Breadth)  
Foreign Language (A.B. and B.A.S. degrees)

### Major Requirements

Course requirements for each major are listed in the Programs and Courses section of this catalog.

ment has not been satisfied by the end of your third quarter, a hold will be placed on your registration.

Students whose native and school language is not English, and some students whose schooling combines work in the United States and in another country, must demonstrate proficiency in English. The level of proficiency must meet the standards of both the non-native speakers of English program and the Subject A program. The results of the Subject A Examination and a special examination in English administered during the orientation period each quarter determine whether a student has met the Subject A requirement or must take specific course work before meeting that requirement.

#### American History and Institutions

The American History and Institutions requirement ensures that every graduating student will have at least a minimum knowledge of the background of this country's development and an understanding of the political, economic and social interrelationships of its way of life.

You may meet this requirement in any of these ways:

- By offering one high school unit in American history, or 1/2 high school unit in American history and 1/2 high school unit in civics or American government, with a grade of C or better in each course.
- By completing any one of the following courses:  
African American and African Studies 10, 100, 120, 121  
Asian American Studies 1, 2  
Economics 111A, 111B  
History 17A, 17B, 17C, 72A, 72B, 170A, 170B, 170C,

171A, 171B, 174A, 174B, 174C, 175A, 175B, 175C, 176A, 176B, 177A, 177B, 179, 180A, 180B, 183A, 183B (upper division courses may be taken only with the consent of the instructor)  
Native American Studies 1, 10, 55, 116, 130A, 130B, 130C  
Political Science 1, 5, 100, 101, 102, 103, 104, 105, 106, 108, 109, 113, 130, 131, 160, 163

(Students electing to offer one of the above courses are subject to the rules for prerequisites and majors.)

- By presenting evidence that the requirement has been accepted as satisfied at another campus of the university.
- By presenting evidence that the requirement has been satisfied through courses in the area of American History and Institutions at another collegiate institution whose credits are acceptable for transfer to UC Davis.
- By successful completion of the Advanced Placement Examination in American History.

International students, regardless of the type of visa they hold, must meet the university's American History and Institutions requirement for graduation.

#### Unit Requirement

A minimum of 180 quarter units is required for graduation. These must be distributed according to the minimum requirements set forth by the faculty of your college.

A maximum of 12 units of Internship Courses (92, 192, or a combination) may be counted toward the 180-unit bachelor's degree requirement.

The acceptability of transfer courses for unit credit is determined by Undergraduate Admissions and Outreach Services. The acceptability of such courses toward specific requirements is determined by the individual college or school.

Students should refer to the Advanced Placement Examination chart and their transcripts to eliminate the possibility of duplication of credit.

### Residence Requirements

The minimum residence requirement for a bachelor's degree at the University of California is one academic year (three quarters). Thirty-five of the final 45 quarter units completed by each candidate must be earned while in residence on the Davis campus. Each summer session in which a student completes a course of at least 2 quarter units may be counted as half a quarter's residence. Not more than 18 of these 35 quarter units may be completed in summer session courses at UC Davis.

Regularly approved courses (laboratory, field, or other individual work) done outside of a regular session but under the direction of a department of instruction may be accepted upon the recommendation of the department in partial fulfillment of the residence requirement for the bachelor's degree. Registration is with the consent of the instructor only.

University Extension courses are not accepted as part of the university residence requirement.

There are additional residence requirements for students enrolled in the Colleges of Letters and Science and Engineering. If you are planning to study abroad during your senior year, you should consult your college dean's office.

With the approval of the dean of a student's college or school, a candidate for the bachelor's degree who was in active service in the armed forces of the United States in the year preceding the awarding of the degree may be recommended for the degree after only one quarter of university residence in which the candidate completes at least 16 units or passes a comprehensive examination in the major or field of concentration.

### Scholarship Requirement

To receive a bachelor's degree, you must obtain twice as many grade points as units (a 2.0 GPA) for all courses you have attempted in the university. An exception to this rule is made for those students undertaking certain honors courses. Grades earned in University Extension courses are not used in calculating individual grade point averages. For specific college requirements consult the college sections following.

## GENERAL EDUCATION REQUIREMENT

The General Education (GE) requirement promotes the intellectual growth of all undergraduates by ensuring that they acquire a breadth of knowledge that will enlarge their perspectives beyond the focus of a major and serve them well as participants in a knowledge-based society. It seeks to stimulate continued intellectual growth by providing students with knowledge not only of the content but also of the methodologies of dif-

ferent academic disciplines. It involves students in the learning process by its expectation of considerable writing and class participation. It encourages students to consider the relationships between disciplines.

The GE requirement has three components:

**Topical Breadth, Social-Cultural Diversity and Writing Experience.**

### Topical Breadth

A GE course in *topical breadth* addresses broad subject areas that are important to the student's general knowledge. It takes a critical, analytical perspective on knowledge, considering how knowledge has been acquired and the assumptions, theories, or paradigms that guide its use.

*Topical breadth* courses are grouped into three broad subject areas of knowledge:

1. **Arts and Humanities.** Courses in this area provide students with knowledge of significant intellectual traditions, cultural achievements and historical processes.
2. **Science and Engineering.** Courses in this area provide students with knowledge of major scientific ideas and applications. They seek to communicate the scope, power, limitations and appeal of science.
3. **Social Sciences.** Courses in this area provide students with knowledge of the individual, social, political and economic activities of people.

### Social-Cultural Diversity

Courses in *social-cultural diversity* teach students the significance of the many patterned differences that characterize human populations—particular differences of gender, race, ethnicity, sexuality, religion or social class.

### Writing Experience

A GE course in *writing experience* normally requires a minimum of five pages of writing in a block, which will be evaluated for content, use of language and logical coherence.

## Fulfilling the General Education Requirement

### Topical Breadth Component: 6 courses

To fulfill the *topical breadth* component of the General Education requirement you must successfully complete three approved courses in each of the two subject areas of *topical breadth* other than the one that includes your major. To identify the area of *topical breadth* to which your major belongs, refer to the chart on the following page. Each academic major has been assigned to one of the three subject areas of GE *topical breadth*. If you have any questions concerning the subject area to which your major is assigned, consult your college dean's office.

- **Double majors** will satisfy the *topical breadth* subject areas to which they are assigned. You will still be responsible for completing any *topical breadth* subject area in which you do not have a major. If, for example, two majors are assigned to the same subject area, you will need to complete the *topical breadth* component in each of the other two other subject areas. If, on the other hand, you complete two majors that have been assigned to two different areas of *topical breadth* then you will be responsible for completing the *topical breadth* component in only the remaining subject area.

### Fulfilling the General Education Requirement

Students entering UC Davis during the 1996-97 academic year, and thereafter

#### Freshman student, or Transfer student\* who has not completed TCC or IGETC†

6 GE courses in topical breadth—3 courses in each of the two subject areas other than your major's assigned area  
1 GE course in social-cultural diversity  
3 GE courses in writing experience

Bear in mind that some courses may count toward two or three components of GE. For example, a single course might provide GE credit for *topical breadth*, *writing experience* and *social-cultural diversity*. Depending on the GE courses you choose, you can satisfy the GE requirement with 6 courses.

\* Transfer work comparable to approved UC Davis GE courses may be used to satisfy the GE requirement, as determined by the college dean's office.

#### Transfer student who has successfully completed TCC or IGETC†

GE requirement satisfied; no further GE courses required

† Transfer Core Curriculum (TCC) or Intersegmental General Education Transfer Curriculum (IGETC); completion must be certified by the community college.

- **Individual majors** are assigned to an area of *topical breadth* at the time they are approved by your college.
- **Each minor** has also been assigned to one of the three subject areas of *topical breadth*. A minor assigned to a subject area other than the area of your major will satisfy the GE course requirement for *topical breadth* in that subject area.
- **Courses in your major** may count toward the *topical breadth* component when those courses are also assigned to subject areas other than the area of your major.
- **A course approved in more than one topical breadth subject area** may only be offered in satisfaction of **one** of those subject areas.

#### Social-Cultural Diversity Component: 1 course

To fulfill the *social-cultural diversity* component of the GE requirement, you must successfully complete one course from the approved list that follows.

#### Writing Experience Component: 3 courses

To fulfill the *writing experience* component of the GE requirement, you must successfully complete three courses from the approved list that follows.

- **Subject A.** You must satisfy the university Subject A requirement **before** you take any *writing experience* course for GE credit. If you take an approved *writing experience* course but have not yet satisfied the Subject A requirement, you will **not** receive GE *writing experience* credit for that course.

#### Additional Conditions

1. **Letter grading.** All courses taken to fulfill the GE requirement must be taken for a letter grade. No GE credit will be awarded for a course that you take on a Passed/Not Passed basis.

#### 2. College and university composition requirements.

The following GE courses may not be used to satisfy university or college requirements in composition and GE *writing experience* simultaneously: Communication 1, Comparative Literature 1, 2, 3, 4, English 1, 3, 18, 19, 101, 102, 104A, 104B, 104C, 104D, 104E, Native American Studies 5.

Remember: You must satisfy the university Subject A requirement **before** you take any *writing experience* course for GE credit.

#### 3. Courses approved for multiple GE components.

Courses approved for more than one component of the GE requirement (*topical breadth*, *writing experience* and *social-cultural diversity*) will be accepted toward satisfaction of all components for which the course has been approved.

4. **Approved GE courses.** You cannot claim GE credit for any course you completed before it was an approved GE course.

#### GE Exemption

**IGETC, TCC, and UC Reciprocity.** You are exempt from the UC Davis GE requirement if you come from a California community college and are certified as having successfully completed the "Intersegmental General Education Transfer Curriculum" (IGETC) or "Transfer Core Curriculum" (TCC), or if you come from another UC campus and are certified as having successfully completed the lower division breadth or General Education requirements of that UC campus (UC reciprocity).

#### Approved General Education Courses

A list of the courses that provide General Education credit for 1998-99 appears on the following pages. These courses may be used to fulfill the GE Requirement for students entering UC Davis in 1996-97 and thereafter. Please note that you cannot claim GE credit for a course you completed **before** it was an approved GE course. This list is subject to change. You should check the *Class Schedule and Room Directory* each quarter for the most current information.

## GENERAL EDUCATION COURSES

### TOPICAL BREADTH

These courses provide GE credit for *topical breadth*. Many of these courses also satisfy the GE requirement for *social-cultural diversity* (indicated by D) and/or provide GE credit for *writing experience* (indicated by W). Complete lists of the courses that satisfy the *social-cultural diversity* requirement and the courses that provide *writing experience* credit follow this list.

| <b>Arts and Humanities</b>                      |                                    |

\* This course may not be used to satisfy a college or university composition requirement and GE *writing experience* simultaneously.

† Also assigned to another area of *topical breadth*. # Credit for *writing experience* allowed if co-course taken concurrently (see *Writing Experience* list).

## GENERAL EDUCATION COURSES

### Writing Experience

These courses satisfy the GE requirement for *writing experience*, provided you have previously satisfied the Subject A requirement. Many of these courses also provide GE credit for *topical breadth* or *social-cultural diversity*. Refer to the *topical breadth* and *social-cultural diversity* course lists to determine if any additional GE credit applies.

### GENERAL EDUCATION REQUIREMENT FOR 1992-93 THROUGH 1995-96

(Applies only to students who entered UC Davis before 1996-97)

Students who entered UC Davis before the 1996-97 academic year may elect to complete the requirement in effect the year of their entrance to UC Davis or to fulfill the GE requirement for students entering in 1996-97 or thereafter.

If you elect to complete the GE requirement in effect the year of your entrance to UC Davis, you must meet the requirements and conditions listed below and select approved GE courses from the list on page 89.

If you elect to complete the GE requirement for 1996-97 and thereafter, you must meet all of the requirements and conditions explained in the preceding section and select approved GE courses from the lists on the preceding pages. Courses completed before 1996-97 may be counted towards fulfillment of the GE requirement only if they appear on the list of approved GE courses in the 1996-97 *General Catalog*. In all other cases, you cannot claim GE credit for a course you completed **before** it was an approved GE course.

#### Determining Your General Education Requirement

Each academic major, minor and degree program has been assigned to one of the three areas of General Education: **Civilization and Culture**, **Contemporary Societies**, and **Nature and Environment**. Each GE course has also been assigned to one of the three areas. You

must complete three courses in each of the two General Education areas outside of the area of your major. Two of the three courses in each area must be certified General Education courses. One of the three courses in each area must be an upper division course.

**Double majors** will satisfy the GE requirement in two areas only if the majors are assigned to two different areas. You will still be responsible for completing the GE requirement in the third area. Double majors in the same area do not reduce your GE requirements.

**Individual majors** are assigned to one of the three General Education areas when the major is approved by your college. If you have any questions concerning the GE area to which your major was assigned, consult your college dean's office.

**A minor** in an area outside the area of your major will satisfy your GE requirement in that minor's area. The minor in Science and Society may satisfy the GE requirement in any one of the three areas.

The specific General Education requirements for students who entered UC Davis from the 1992-93 academic year through the 1995-96 academic year are detailed in the General Education Requirements table on the next page. Students who entered UC Davis before the 1992-93 academic year should consult their college dean's office to determine their GE requirement.

#### Additional Conditions

In addition to the requirements outlined above and in the GE requirements table, you must meet the following conditions:

1. **Letter grading.** All courses taken to fulfill the GE requirement must be taken for a letter grade. No GE

### Fulfilling the General Education Requirement

#### Students who entered UC Davis from the 1992-93 academic year through the 1995-96 academic year

(GE courses must be completed in the areas of General Education other than the area containing the major.)

#### Freshman or transfer student with 40 or fewer transfer units

6 GE courses:

- 3 courses in each of two areas;
- at least 1 upper division course in each area;
- at least 2 of the 3 courses in each area *must* come from the list of certified GE courses;
- the third course in each area may come from a list of courses approved for GE credit by your college.

#### Transfer student with more than 40 but fewer than 84 units

4 GE courses:

*Option 1:* 2 courses in each of two areas:

- at least 1 course in each area must be upper division;
- at least 1 course in each area must come from the list of certified GE courses;
- the second course in each area may come from a list of courses approved for GE credit by your college.

*Option 2:* 3 courses in one area;

- at least 1 course must be upper division;
- 2 courses must come from the list of certified GE courses;
- the remaining course may come from a list of courses approved for GE credit by your college;

**and**

- 1 upper division course in the other area, which must come from the list of certified GE courses.

#### Transfer student with 84 or more units

2 or 3 GE courses:

*Option 1:* 1 upper division course in each of two areas;

- both courses *must* come from the list of certified GE courses.

*Option 2:* 3 courses in one area;

- at least 1 course must be upper division;
- 2 courses *must* come from the list of certified GE courses;
- the remaining course may come from a list of courses approved for GE credit by your college

credit will be awarded for a course that is taken on a Passed/Not Passed basis.

2. **Subject A.** This requirement must be completed before you begin your GE course work.

Exception: GE credit may be earned before completing the Subject A requirement for the following course sequences which have been approved for the General Education Program: Chemistry 2A-2B, Economics 1A-1B and Music 3A-3B.

#### Transfer Credit

If you have transferred from a community college or other post-secondary institution, or enter with Advanced Placement (AP) units, you still have to complete some

GE courses at UC Davis, but the number of required courses may be reduced depending upon the number of transfer or AP units you have brought with you.

The following courses and transfer credits will be used in determining the General Education requirement for transfer students:

- UC Davis Extension courses if they are accepted for transfer by Undergraduate Admissions and Outreach Services
- Advanced Placement credit
- Transfer work from other community colleges and four-year institutions

UC Davis Summer Sessions courses completed before entry do not count as “transfer credit” for determining your GE requirement. Successful completion of an approved GE course during a UC Davis Summer Session before entry, however, will count toward satisfaction of the GE requirement.

Consult the “Transfer Credit Evaluation” form prepared for you by Undergraduate Admissions and Outreach Services to determine your transfer credits.

#### GE Exemption

You are exempt from the UC Davis GE Requirement if you come from a California community college and have completed the “Intersegmental General Education Transfer Curriculum” (IGETC) or “Transfer Core Curriculum” (TCC), **or** you come from another campus of the University of California and have completed the lower division breadth or General Education requirements of that campus. Your college dean’s office can tell you whether you fall into either of these categories.

#### Approved General Education Clusters

General Education “clusters” are groups of closely related lower division GE courses. You may earn credit for having satisfied the entire requirement in an area of General Education by completing an approved cluster. A cluster allows you to substitute lower division for any required upper division courses. There are two approved clusters in the area of Civilization and Culture: History 4A, 4B, 4C; and Comparative Literature 1, 2, 3. There is one approved cluster in the area of Nature and Environment: Animal Science 1, 2, 42.

#### GE Courses for Continuing Students

The list on the following page contains approved GE courses **for continuing students who entered UC Davis from 1992-93 through 1995-96** and have elected to complete the GE requirement in effect the year of their entrance to UC Davis. Please consult prior years’ catalogs or the Deans’ offices for the lists of courses approved in previous years.

**Approved courses for students who entered UC Davis from 1992-93 through 1995-96 and who have elected to complete the GE requirement in effect the year of their entrance to UC Davis.**

**Undergraduate Education**

Please consult prior years' catalogs or the Deans' offices for the lists of courses approved in previous years. Please note that you cannot claim GE credit for a course you completed **before** it was an approved GE course.

**Civilization and Culture**

*Courses in this area present dominant intellectual traditions, achievements and socio-political institutions, and increase awareness of cultural diversity within the Western tradition and in other civilizations.*

<sup>1</sup>These GE courses must be taken concurrently for General Education credit and will satisfy the requirement for one GE course.

<sup>2</sup>This is a two-course sequence of non-GE courses which will satisfy the requirement for one GE course.

<sup>3</sup>Nutrition 10 and 11 must both be completed to satisfy the requirement for one GE course. These courses may be taken concurrently, if offered, or sequentially (10 then 11).

<sup>4</sup>GE courses in Integrated Studies are open only to students in the Integrated Studies program.

**COLLEGE REQUIREMENTS FOR THE  
BACHELOR'S DEGREE****College of Agricultural and  
Environmental Sciences****Unit Requirements**

Of the required 180 units counted toward a degree, **54 units must be upper division work**. In addition, the following unit limitations apply to all majors:

- Not more than 6 units can be Physical Education 1 and 6
- Not more than 20 units can be courses numbered 90X, 92, 97T, 97TC, 99, 190C, 190X, 192, 197T, 197TC, or 199
- Not more than 12 units can be courses numbered 92 and/or 192 (credit will not be given for 192s or 199s taken before the completion of 84 units)
- Not more than 5 units per quarter of Special Study courses (99, 194H, 199)
- Not more than 9 units of professional courses (numbers 300–499) may be used toward the 54 upper division units

**Credit in University Extension Courses.** Students in residence may apply a maximum of 9 units of credit earned in some University Extension courses toward the 180-unit requirement *provided* written approval has been obtained from the dean *before* registering. Units of credit allowed by the dean may be less than the number of units listed for a course. No grade points are assigned for courses completed through University Extension.

**Residence Requirement**

Thirty-five of the final 45 quarter units completed by each candidate must be earned while in residence on the Davis campus. Not more than 28 of these 35 quarter units may be completed in summer session courses at UC Davis.

**Scholarship Requirement**

Students in the College are required to attain a minimum grade point average of 2.0 for all courses specified as depth subject matter in their major. Each candidate must complete a program of study either as prescribed in (a) a major approved by the Undergraduate Majors and Courses Subcommittee and printed in this catalog, or (b) an individual major approved by the Individual Major Subcommittee.

**English Composition Requirement**

The English Composition requirement can be met in one of two ways:

1. by taking, before you have completed 120 units, **either** two courses emphasizing written expression **or** one course emphasizing written expression and one course emphasizing oral expression. The following UC Davis courses satisfy this requirement:
  - (a) one course must be selected from English 1, 3, 18, 19, 101, 104A, 104B, 104C, 104D, or 104E (courses with primary emphasis in writing skills);

(b) one course selected from the courses not selected above, or from English 102, Communication 1, Comparative Literature 1, 2, 3, 4, or Native American Studies 5 (courses emphasizing either writing or speaking skills);

**OR**

2. by passing the English Composition Examination administered by the College of Letters and Science upon completion of 70 units of degree credit (the examination does not yield credit).

**General Education**

You should consult your Dean's Office or department adviser in advance to determine exactly how your General Education courses will apply toward your major.

**Study Plan Approval**

A Study Plan provides for attainment of specific long-term goals and should allow for the acquisition of prerequisite knowledge for courses to be taken in subsequent quarters; the fulfillment of College and major requirements; a proper balance between the demands of the courses and your ability to master the subject matter; and meeting the minimum progress requirements (see the "Academic Information" chapter).

In conjunction with a faculty adviser and/or staff adviser, you must plan and prepare a program that specifies your goals and shows how the graduation requirements will be met. It is a regulation that a written "study plan" be filed with your faculty adviser or staff adviser by the end of the second quarter of the junior year (having completed not more than 120 units either in residence and/or by transfer).

You may be denied registration for future quarters if you do not comply with this regulation. However, filing this study plan does not preclude a change of major or program modifications.

**Major Degree Certification**

A Major Certification is completed during the quarter you plan to graduate. At that time, you and your faculty adviser and/or staff adviser check to see that all *major* requirements have been completed. The Dean's Office completes the degree certification by verifying that all *college* and *university* requirements have been satisfied.

**Degree Requirement Changes**

On occasion, the faculty make changes in the requirements that students must satisfy to obtain the baccalaureate degree. So that you will not be penalized by changes that may work to your disadvantage and so that you will benefit by changes that assist you in completing your degree requirements, it is college policy that you may choose to fulfill the university, college and

major requirements in effect at the time you were registered at UC Davis. If you have transferred to UC Davis from a community college, state college, or another university, you may follow the requirements as stated in any UC Davis catalog in effect either during the three years immediately preceding your transfer to Davis or at the time you first registered at that institution, whichever is most recent. Once you have chosen the year of the General Catalog under which you wish to be governed, you must satisfy all of the university, college and major requirements specified in that catalog.

### College of Engineering

#### Unit Requirements

Each candidate for the degree of Bachelor of Science in Engineering must satisfactorily complete an approved curriculum in engineering. Each curriculum consists of a specified Lower Division Program (or an approved equivalent program for students who transfer into the College with 90 or more quarter units) and a specified Upper Division Program. Detailed requirements for the approved curricula are given in the "Programs and Courses" section of this catalog; to see the courses required in your major, consult this section.

The minimum number of required units in the combined Lower and Upper Division Programs varies, with the curriculum, from 180 to 195.

You may, for good cause, request a modification of particular degree requirements by submitting a student petition. These petitions, which are available in the Undergraduate Office, can be a valuable aid in resolving individual program conflicts or other special problems. Such petitions are subject to approval by the Undergraduate Study Committee, a body of six professors and six (non-voting) students. A negative decision by the committee may be appealed to the College faculty for action at a regular meeting.

**Transfer students.** If you are admitted with 90 or more quarter units, you are classified as having upper division standing, but you are required to complete the minimum number of quarter units in the subject areas specified below before your Lower Division Program is considered complete. You may, however, start your Upper Division Program while completing your Lower Division Program requirements. For more specific advice on your requirements, see the transfer counselor of your institution.

| Subject Areas<br>Units                                                                                                                                                                                                                                                         | Minimum<br>Quarter<br>Units |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| <b>Mathematics</b> (calculus, differential equations, linear algebra, vector analysis).....                                                                                                                                                                                    | 22                          |
| <b>Physical and biological sciences</b> (typically, at least 10 units must be in general chemistry and at least 12 units in physics courses designed for engineering and physical science students).....                                                                       | 22-26                       |
| <b>Engineering</b> (lower division subjects such as graphics, properties of materials, surveying, computer programming, statics and circuit theory. These courses must include statics, circuits and FORTRAN for all but Electrical and Computer Engineering and Computer Sci- |                             |

ence majors, who must take C and C++ programming. Students majoring in Mechanical, Aeronautical, Materials Science, Civil, Electrical or Computer Engineering, or Computer Science may have additional course requirements specific to their respective majors.

Because of additional lower division chemistry requirements, Chemical Engineering majors may elect to take only 10 units—FORTRAN, circuit theory and statics—of engineering in their lower division programs)...15-26

**Written and oral expression** English 1 or 3 and Communication 1 or 3, or courses that are their equivalents .....8

**Humanities–Social Sciences** (courses must be selected from a list of course groups approved by the Committee on Undergraduate Study) .....5-12

**Additional subjects** (Chemical Engineering majors should cover quantitative analysis and one course in organic chemistry with a laboratory component during their sophomore year) .....7-8

**Total** .....90

Once you have completed the Lower Division Program and fulfilled these specified subject area requirements, you need not take additional lower division courses, **except** those that are prerequisite to upper division courses in your curriculum. For additional information on core prerequisite courses, please contact your department or college adviser.

**Credit in University Extension Courses.** Appropriate courses taken through University Extension may be used for degree credit; however, you may use a maximum of 16 units of courses taken through University Extension for degree credit. Simultaneous registration in resident courses and Extension courses requires *prior approval* by the College's Associate Dean for Undergraduate Studies. Such approval will be given only for a limited number of credits. No grade points are assigned for courses completed in University Extension.

#### Residence Requirement

In addition to fulfilling the university residence requirement, you must complete at least 35 of the final 45 units characteristic of your curriculum in engineering while registered in the College.

#### Scholarship Requirement

In addition to meeting the university scholarship requirement, you are required to maintain a 2.0 grade point average for all course work within Engineering.

#### English Composition Requirement (Upper Division)

After completing 70 quarter units, you may elect to satisfy the upper division English Composition requirement by passing the English Composition Examination administered by the College of Letters and Science. (You should take it early in your junior year and must take it before your last quarter. Units of credit are not given for passing this examination.)

Or, upon completion of 90 quarter units, you may satisfy this requirement by completing English 101, 102, 104A, or 104E with a grade of C– or higher.

This requirement is in addition to the expository writ-

ing course requirement (English 1 or 3; Comparative Literature 1, 2, 3 or 4; or Native American Studies 5) specified in the Lower Division Programs.

During the 1998-99 academic year, the English Composition Examination will be offered on the following three Saturdays: October 24, 1998; January 30, 1999; and April 24, 1999. Sign-up rosters will be posted on the bulletin board near the main English Department office (176 Voorhies), Monday until noon on Friday (or until they are filled) just preceding each Saturday examination date. You must sign up, in person, by noon on Friday. You must obtain the English Composition Examination form, available at the UCD Bookstore, to take the exam.

### Engineering Design Requirement

Engineering design is the process of devising a system, component, or process to meet certain needs. Design involves a decision-making process (often iterative), in which the basic sciences, mathematics and engineering sciences are applied to convert resources optimally to meet a stated objective. Among the fundamental elements of the design process are the establishment of objectives and criteria, synthesis, analysis, construction, testing and evaluation. You must take at least 24 quarter units of such design course work through a combination of required and restricted elective courses. Specific comments about design are included in individual curricula descriptions. You should also review the design content of your individual program with your adviser in the course of completing the upper division advising worksheet.

### Electives

In general, there are four kinds of elective courses in the engineering curricula: *Humanities–Social Sciences*, *General Education*, *technical and unrestricted*. Transfer students have an additional set of electives: *Physical and Biological Sciences electives* or *Mathematics/Science electives*.

**Humanities–Social Sciences electives:** Because engineers are significant agents of social change, they must be sensitive to the human setting in which that change takes place. The Humanities–Social Sciences (HSS) electives have been selected within the engineering curricula to increase your awareness of the human and societal implications of engineering practice. The humanities include subject areas such as literature, philosophy, history and the fine arts. The social sciences include areas such as anthropology, political science, sociology, psychology and economics.

You must take at least 24 quarter units of course work in the humanities and social sciences; Computer Science and Engineering majors must have 33 quarter units. For all engineering majors at least 8 of these units must be upper division courses. Subjects that are vocationally oriented or skills oriented, such as management and accounting, or that contain a preponderance of scientific or mathematical content, are not suitable for HSS credit even though a course may be offered by a department ordinarily classified as a humanities or social science department. Foreign language courses must stress literature, not skills, and fine arts courses must emphasize the history and appreciation of forms of expression, not development of performance or other technical

skills. You may petition to have a non-literature course in a foreign language which is not your native language count as a humanities course. Students enrolled in the Davis Honors Challenge may receive HSS credit for approved Honors Seminars; consult with the Undergraduate Advising Office for a list of approved seminars each quarter. You may petition for HSS credit for 92, 98, 99, 192, 197, 198 and 199 courses in appropriate cases. If you repeat any of the courses which may be repeated for credit, not more than 4 units in any such courses can be counted toward your HSS requirement.

Your HSS electives should be selected to include a comprehensive and coherent set of courses and may, in some cases, be integrated with your General Education electives, as described in the next section. HSS electives must be selected from the following list.

African American and African Studies 10, 12, 15, 50, 51, 52, 80, 100, 101, 107A, 107B, 107C, 110, 123, 130, 133, 141, 145A, 145B, 150A, 150B, 151, 152, 153, 155A, 160, 162, 170, 171  
 Agricultural and Resource Economics 1, 15, 100A, 100B, 120, 141, 141M, 150, 175, 176  
 American Studies 1A, 1B, 1C, 1E, 1F, 2, 30, 101A-H, 110, 111, 115, 120, 125, 130, 151, 152, 153, 154, 155, 156  
 Anthropology 2, 3, 4, 20, 21, 23, 101, 110, 112, 113, 117 through 149B, 170 through 179, 184  
 Art History 1A, 1B, 1C, 1D, 25, 150 through 188C, 190 (also Art History 1AG, 1BG, 1CG, 1DG and 25G when taken concurrently with Art History 1A, 1B, 1C, 1D and 25)  
 Art Studio 10, 147 through 150  
 Asian American Studies 1, 2, 20, 100, 101, 110, 111, 112, 120, 130, 136, 150, 155  
 Chicana/Chicano Studies 10, 21, 30, 40, 50, 60, 70, 100 through 140, 154, 155, 156, 165  
 Chinese 10, 11, 50, 104 through 109A-I, 110, 114, 115, 116, 130, 131, 132, 140, 160  
 Classics 1, 2, 3, 10, 15, 20, 50, 102, 110, 140, 141, 142, 143, 150, 171, 174, 175  
 Communication 103 through 145, 152

 through 176  
 Textiles and Clothing 7, 107  
 Women's Studies 20, 50, 60, 70, 80, 102, 103, 104, 130,  
 140, 158, 160, 162, 164, 180, 182, 184, 187

**General Education electives** are used to satisfy a campus requirement and are chosen from the list of General Education Courses for 1998-99 given earlier in this chapter. Since all engineering majors are in the Science and Engineering GE *topical breadth* area, you must fulfill the campus requirement by taking courses in the Arts and Humanities area and the Social Sciences area.

You should note that the requirement of 24 quarter units of Humanities and Social Science (HSS) course work is a College of Engineering requirement and is in addition to the campus General Education (GE) requirement of a fixed number of courses. *You may satisfy the HSS and GE requirements simultaneously*, provided that you take the courses that are listed on both the list of HSS courses above and the GE courses list shown earlier in this chapter.

In satisfying the GE requirement, note that (a) *you must take GE courses for a letter grade*, and (b) *you must fulfill*

the Subject A requirement before you can receive GE credit for any course providing writing experience credit. In consultation with your academic adviser, you should attempt to design a comprehensive and coherent set of courses using both the HSS electives and GE electives.

**Technical electives** permit you to tailor a program to your own academic and career objectives. For some, the technical electives offer the opportunity to prepare for a specific occupation. For others, they offer an opportunity to broaden a background in the sciences and engineering.

You may receive technical elective credit to a maximum of 6 units for any combination of engineering courses numbered 190C, 192, 197, 198 and 199, unless further restrictions are imposed on your major. Academic credit for 199 courses is limited to a maximum of 5 units per quarter for each substantially different project. Academic credit for engineering internship courses (192s) is also limited to a maximum of 5 units per quarter.

With the exception of the following courses, all upper division courses in engineering, physics, chemistry, mathematics and statistics may be taken as technical electives. The courses which may *not* be used are:

Applied Science Engineering 137 (restricted to one unit of technical elective)  
Physics 137 and 160 (restricted to one unit of technical elective), 194H, 195, 197T, 198, 199  
Chemistry 194H, 197, 198, 199  
Engineering 160 (restricted to one unit of technical elective)  
Mathematics 192, 197TC, 198, 199  
Statistics 102

In addition to upper division engineering, physics, chemistry, mathematics and statistics courses, the following courses may be taken as technical electives:

Agricultural and Resource Economics 100A, 100B, 106, 113, 118, 136, 138, 139, 155, 156, 157, 171A, 171B, 175, 176  
Agricultural Systems and Environment, any upper division course except 101 and 190 through 199  
Anatomy, Physiology, and Cell Biology 100  
Animal Genetics 101, 107, 108, 109, 110  
Animal Science 104, 105  
Applied Biological Systems Technology 110L, 134, 161, 163, 180, 181, 182  
Atmospheric Science 111, 120, 121A, 121B, 124, 128, 133, 149, 150, 158, 160  
Biological Sciences 1A, 1B, 1C, 101, 102, 103, 104, 120, 120P, 122, 122P  
Chemistry 2B, 2BH (if not used for your major requirement), 2C, 2CH, 8A, 8B  
Economics 140  
Environmental Science and Policy 100, 128, 128L, 140, 150A, 150B, 150C, 151, 151L, 155, 155L, 163, 167, 168A, 168B, 173, 179  
Environmental Toxicology 101, 114A, 114B, 128, 131, 132, 135, 155  
Evolution and Ecology 100, 102, 103, 105, 108, 112, 112L, 117, 134, 134L, 140, 170, 170L  
Fiber and Polymer Science 100, 150, 161, 161L  
Food Science and Technology 100A, 100B, 100C, 101A, 101B, 102A, 102B, 103, 104, 107, 104L, 107A, 107B, 108, 109, 110A, 110B, 119, 120, 120L, 121, 122, 123, 123L, 127, 128, 131, 140, 151, 159, 160, 180

Geology 17, 50, 50L, 100, 100L, 101, 101L, 102N, 108N, 109, 109L, 134, 143, 144N, 145N, 146N, 150A, 150B, 150C, 152N, 161, 162N, 163, 170  
Hydrologic Science 110, 115, 117, 122, 122L, 124, 134, 141, 142, 143, 145A, 145B, 150, 151A, 151B, 182  
Management 11A, 11B  
Microbiology 102, 102L, 105, 120, 120L, 140, 150, 155L, 160, 162, 177, 177L  
Molecular and Cellular Biology 120L, 121, 122, 123, 126, 140L, 141, 142, 146, 150, 150L, 151L, 160L, 161, 162, 163, 164, 166, 170L  
Neurobiology, Physiology and Behavior, any upper division course  
Plant Biology 105, 108, 111, 111D, 111L, 112, 112D, 113, 113D, 116, 117, 118, 121, 123, 125, 143, 144, 148, 152, 153, 154, 157, 158, 160, 161A, 161B, 173, 174, 175, 176, 177, 178  
Plant Pathology 119, 120, 125, 130  
Soil Science 100, 102, 107, 109, 111, 118, 120  
Wildlife, Fish and Conservation Biology 100, 102, 102L, 110, 110L, 111, 111L, 120, 120L, 121, 122, 123, 130, 131, 136, 140, 151, 152, 153, 154

You are urged to discuss the selection of technical elective courses with your academic adviser.

**Unrestricted electives.** You may count any course for which university credit is allowed as an unrestricted elective in the engineering curricula.

**Physical and Biological Science electives.** Engineering students are required to have 26 units in physical and biological sciences, typically 10 units of chemistry and 16 units of physics. Students who transfer into the College of Engineering with advanced standing are required to complete 26 units of physical and biological science by graduation, but need only have completed 5-10 units of chemistry (depending on major) and 12 units of physics by the time of transfer. Transfer students may make up the remaining 4 units by taking 4 additional units of chemistry, 4 additional units of physics, or 4 units in courses selected from any of the curricula listed below, with the restrictions that follow.

Atmospheric Science  
Biological Science  
Chemistry  
Evolution and Ecology  
Geology  
Microbiology  
Molecular and Cellular Biology  
Neurobiology, Physiology and Behavior  
Physics  
Plant Biology

All courses in these departments numbered 10 and 190–199 are excluded for credit, as are the following courses:

Evolution and Ecology 138  
Geology 1-1L, 3-3G-3L, 43, 116-116G, 135-135G  
Microbiology 20  
Physics 137, 160  
Plant Biology 1, 11, 12

### Degree Check

Use the Degree Requirement Check sheets for each of the curricula for monitoring your progress toward a

degree. The Undergraduate Office will prepare only one *unofficial* preliminary degree check for you (preferably at the end of your junior year). You should also request an exit interview during the quarter before you plan to graduate. To have this degree check prepared, submit a signed Degree Check Request and request an appointment. You can get further information concerning these services and the forms for requesting a degree check or an exit interview in the Undergraduate Advising Office.

### Degree Requirement Changes

Since engineering is a rapidly developing profession, curricular changes are made by the faculty from year to year. To ensure that you benefit from these changes, the College of Engineering has established a policy that you must fulfill the degree requirements stated in the catalog for the year in which you complete degree work or in the catalog for the year immediately preceding.

## College of Letters and Science

### Unit Requirements

A minimum of 180 units is required for the bachelor's degree. Of these units, 64 must be earned in upper division courses.

**Registration Beyond the 225-unit Limit.** You are normally expected to fulfill all degree requirements within the 180- to 225-unit range. Once 225 units have been completed (excluding units awarded for College Board Advanced Placement Examinations), you may register only with the permission of the dean. Such permission is rarely granted, and then typically only to allow completion of *minimum* degree requirements. You will be expected to adhere to a program of courses agreed upon and to meet other conditions that may have been set. Approval must be obtained before you will be permitted to register for courses for the quarter following completion of 225 or more units.

If you are in good standing, you will be able to complete 12 quarters or the equivalent (e.g., four years) of college work even if you have earned more than 225 units before you finish your fourth year. You must petition for continuation, however, and file the quarter-by-quarter course program you have planned.

### Unit Credit Limitations

For certain courses, limits have been established on the number of units that can be counted towards the 180-unit minimum required for the degree. To avoid discovering just before graduation that you are short units, keep track of the number of units you have taken in each of the following categories.

**Limitation on Credit for Graduate and Professional Courses.** Undergraduates may enroll in graduate and professional courses in the 200, 300 and 400 series subject to the restrictions described in the Academic Information section in this catalog. Graduate and professional courses that have been completed will be listed on the student's transcript in the usual manner. *However, the units earned may be counted toward degree requirements only under the conditions listed below.*

Within the limitations A, B and C given below, undergraduate students in the College may count an unlim-

ited number of units in graduate 200 series courses and up to a combined total of 9 units in 300 and 400 series professional courses toward degree requirements. These units, however, are not counted as upper division units unless this is granted by petition to the dean.

- A. The recommendations of the instructor in the course and the department chairperson—in addition to approval from the dean—must be obtained by petition in order to receive credit toward the degree for the following kinds of courses:
  - all graduate courses 200–298, whether offered by a department or program outside of or within the College of Letters and Science
  - all professional courses 300–398 for teachers offered outside of the College of Letters and Science
  - all postgraduate professional courses 400–498 offered outside of the College of Letters and Science
  - all variable unit courses 300–398 and 400–498 offered within the College of Letters and Science
- B. The minimum eligibility conditions for an undergraduate student in the College to petition for degree credit for a 200, 300, or 400 series course are a UC grade point average of 3.3 and completion of 18 upper division units basic to the subject matter of the course. These eligibility conditions may be waived, however, upon the recommendation of the course instructor and concurrence of the department chairperson if the student's preparation warrants exception.
- C. Undergraduates in the College cannot receive degree credit for special study courses 299, 399, or 499.

**Limitation on Credit for Units Graded P.** *Excluding courses that are graded on a Passed/Not Passed (P/NP) basis only, the number of units graded P that may be accepted towards a degree in the College of Letters and Science is limited to not more than one fourth of the units completed in residence on the Davis campus.*

The Academic Senate limits the *total* number of courses graded P, *including units earned in courses graded "P/NP only," to one third of the units completed on the Davis campus.* This limitation applies to *all* Davis undergraduates, including Letters and Science students.

**Limitation on Credit for University Extension Courses.** Students may apply credit earned in University Extension courses toward the 180-unit requirement only when written approval has been obtained from the dean before registration. The degree credit allowed by the dean for Extension courses is usually less than the unit value listed in the course description. A maximum of 9 units may be offered for elective credit only. Such units and courses may not be applied toward fulfillment of the Area, Foreign Language, Upper Division, or Residence requirements of the College. No grade points are assigned for courses completed in University Extension.

**Other Unit Credit Limitations.** The following are additional courses that have limits on the number of units that can be counted toward your degree.

*Internship courses (numbers 92, 192):* 12 units maximum including internship units taken at other institutions. (See under Nonstandard courses below.)

*Nonstandard courses (92, 97T, 97TC, 99, 192, 194H, 197T, 197TC, 199 and similar courses):* 30 units maximum or one-sixth of the units taken at UC Davis, whichever is the smaller. (Note the separate unit limits on internship, special study and tutoring courses; and major limitations.)

*Physical Education 1 and 6 (combined):* 6 units maximum.

*Special Study courses (99, 194H, 199):* 5 units maximum in any one quarter. (See under Nonstandard courses above.)

*Tutoring courses (97T, 97TC, 197T, 197TC):* 10 units maximum. (See under Nonstandard courses above.)

### Residence Requirement

While registered in the College of Letters and Science, a minimum of 27 upper division units, including 18 upper division units in the major, must be completed on the Davis campus. (Work completed while registered in the Education Abroad Program does not satisfy campus or College Residence requirements.)

### Scholarship Requirement

The minimum grade point average to satisfy the scholarship requirement is 2.0 for all courses counted toward the major and for all upper division courses used to satisfy major requirements. Only grades earned in courses taken at UC Davis will be included in the grade point computations. To obtain these minimal averages in the major, you may repeat courses that are graded D or F. If you have to repeat a course more than once, you need the dean's approval.

### English Composition Requirement

The English Composition requirement can be met in one of two ways:

1. by passing the English Composition Examination upon completion of 70 units of degree credit (the examination does not yield credit);

OR

2. by completing with a grade of C– (or P) or better
  - (a) one course in English composition from English 1, 3, 18, 19, Comparative Literature 1, 2, 3 or 4, or Native American Studies 5; **and**
  - (b) English 101, 102, or 104A, 104B, 104C, 104D, or 104E (which must be taken after 84 units have been completed).

**Transfer Courses in English Composition.** Transfer courses considered by the dean to be equivalent or comparable to English 1, 3, 18, 19, 101, 104A, 104B, 104C, 104D, 104E, Comparative Literature 1, 2, 3, 4, or Native American Studies 5 will be accepted toward satisfaction of the English Composition requirement. Note that English 101 and 104A, 104B, 104C, 104D, and 104E or the equivalent must be taken after you have completed 84 units of transferable degree credit.

If your transfer work does not include an acceptable English composition course taken after you had completed or accumulated 84 units, you may fulfill the requirement by examination (see below) or take English 101, 102, 104A, 104B, 104C, 104D, or 104E at UC Davis.

**English Composition Examination.** This academic year, the no-fee examination will be offered on the following Saturday mornings:

October 24, 1998

January 30, 1999

April 24, 1999

There are no examinations given during the summer. Sign-up rosters will be posted on the bulletin board near the main English Department office (176 Voorhies), Monday until noon on Friday (or until they are filled) just preceding each Saturday examination date. You must sign up, in person, by noon Friday. The English Composition Examination form, available at the UCD Bookstore, is required.

### Area (Breadth) Requirement

The College Breadth Requirement promotes the intellectual growth of students by asking them to acquire a broader background of knowledge than is provided by the usual major. The Breadth requirement also guides students in exploring the interdependence of knowledge and, in the case of the A.B. degree, provides students the opportunity to become acquainted with performance in the fine arts.

**A.B. degree**—satisfaction of the campus General Education requirement **plus** completion of one of the following options:

- a. a “Mini Minor” consisting of a minimum of three **approved** upper division courses in a single Letters and Science department or program other than the major (and which are not offered in satisfaction of major requirements);

OR

- b. a minimum of three **approved** lower or upper division courses in Art, Music, or Dramatic Art from outside the student's major;

OR

- c. a certified minor from any UC Davis college or program.

The Letters and Science faculty believes that the completion of a certified minor is often the best way for a student to obtain structure and coherence in pursuit of intellectual breadth.

**For the purposes of options a and b above, all courses are considered as approved except:** courses bearing less than 3 units of credit, internship courses, non-standard courses, directed group study courses, and courses used to satisfy the College English Composition Requirement.

**B.S. degree**—a total of 90 units in natural sciences/mathematics; and satisfaction of the General Education

**Foreign Language Requirement  
(A.B. and B.A.S. degrees)**

The Foreign Language requirement may be satisfied in any language offered at UC Davis, or for which transfer credit is allowed from another academic institution (including American Sign Language).

You may also satisfy this requirement by examination in a language not offered on the Davis campus. In this case, the Dean's Office will assist you in making arrangements to take an examination on another University of California campus, with a faculty member who teaches the language in question.

**Satisfaction of the Requirement.** Plan to complete the Foreign Language Requirement by the end of your first or second year, as program priorities permit. This is particularly important if you plan to apply for the university's Education Abroad Program. The Foreign Language requirement may be satisfied by examination or completion of language courses as follows:

1. *Foreign Language Placement Test.* This test does not yield unit credit—it only determines whether the Foreign Language requirement has been met, or at which point in the language sequence you should enroll.

You may validate your knowledge of a language learned in high school by taking this test. A test may not be taken, however, in a language for which you have already received degree credit. If you are a transfer student, consult your *Graduation Requirement Degree Check*, which is issued by the Dean's Office within a quarter after enrollment.

2. *College Board SAT II: Subject Test.* Earning a qualifying score of at least 550 on a College Board Foreign Language Subject Test satisfies the requirement. This test may be taken at any time during your high school career. Once your score is on file at Undergraduate Admissions and Outreach Services, notify the Letters and Science Dean's Office so that satisfaction of the College requirement can be noted on your record.
3. *College Board Advanced Placement Examination.* A score of 5, 4, or 3 on any foreign language College Board Advanced Placement Examination, with the exception of Latin, taken in high school will satisfy the Foreign Language requirement.
4. *Course Completion in College (or the equivalent).* A.B. and B.A.S. degrees—15-unit level in one language (e.g., Spanish 3 or Japanese 3). B.S degree—none, but as is required in the major program.

If you have successfully completed (C– or better) the second or third year of a language in the tenth or higher grade in high school you may receive unit credit for course 1 of that language on a P/NP grading basis only. Although a Passed or Not Passed grade will be charged to your P/NP option, no petition is required. [See “Passed/Not Passed (P/NP) Grading” in the “Academic Information” chapter.]

5. *Proficiency Examination.* If you have not completed the required level language course, but assume you have attained equivalent knowledge, you may satisfy the language requirement by passing a proficiency examination. For more information, consult the

requirement.

Courses numbered 92, 97T, 97TC, 98, 192, 197T, 197TC, 198, and from 200 through 499 cannot be counted toward satisfaction of the natural sciences/mathematics Area requirements. A maximum of 10 units in special study courses (99, 194H, 199) may be counted toward that portion of the Area requirements. Courses used to satisfy the English Composition and Foreign Language requirements may not be counted toward the Area requirement. Subject to the restrictions just listed, courses acceptable for fulfilling the 90-unit natural sciences/mathematics Area requirement are:

**Natural Sciences and Mathematics**

Anatomy, Physiology and Cell Biology 100  
 Animal Science 135  
 Anthropology 1, 5, 15, 151, 152, 153, 154A, 154B, 155, 156, 157, 158  
 Astronomy  
 Avian Sciences 13

**GRADUATE STUDIES**

---

## GRADUATE STUDIES

Information:  
250 Mrak Hall  
530-752-0655;  
<http://pubweb.ucdavis.edu/documents/gradstudies/homepage.htm>

UC Davis offers advanced degrees in more than 70 graduate programs. Students' graduate study is guided by either departments or graduate groups. Graduate groups are composed of individual faculty members with similar disciplinary or research interests. The group structure, used extensively at Davis, permits faculty to be affiliated with graduate programs in more than one discipline and offers students flexibility and breadth by crossing the administrative boundaries of the various departments, colleges, schools and sometimes campuses. In keeping with UC Davis' progressive spirit, the group structure also allows for expansion of established degree programs and facilitates the development of new ones. Almost half of the graduate programs at Davis are sponsored by graduate groups. You will find a list of the graduate degrees available at UC Davis in the front of this catalog.

Graduate study is administered by the Graduate Council, a standing committee of the Davis Division of the Academic Senate and by the dean of Graduate Studies. A universitywide Coordinating Committee on Graduate Affairs determines general policies and establishes common procedures.

### Preparing for an Advanced Degree

Admission to a graduate program at the University of California requires a bachelor's degree that is comparable to a degree from the University of California both in distribution of academic subject matter and in scholarship achievement.

The primary requirement for admission to any program is evidence of intellectual achievement and promise. Your application will be evaluated primarily on the basis of your transcript to assure that your qualifications meet minimum standards as set by universitywide and UC Davis Graduate Councils. Generally, you must have a minimum B average in undergraduate course work from an institution of acceptable standing to be considered for admission. Graduate programs frequently require submission of additional materials such as a separate application form, Graduate Record Examination (GRE) scores, letters of recommendation, portfolios, or examples of written work to assist in selecting from among qualified applicants. Admission to graduate study is limited by the number of spaces available in major programs. Not all eligible applicants can be admitted.

UC Davis is committed to maintaining excellence, preserving fairness and promoting diversity in its student

population. In addition to an applicant's past scholastic achievement, admissions criteria include an applicant's potential for service in the field, keeping in mind the needs of our society and of underrepresented and disadvantaged communities. Criteria also attempt to take into account any prior disadvantages applicants have experienced that may bear on future achievements and services.

### Applying for Admission

World Wide Web (applications for admission):  
<https://secureweb.ucdavis.edu:2443/>

**March 1** Deadline for **international students** to file applications for admission to graduate standing, with complete credentials, with the program or department

**April 1** Deadline for **United States residents** to file applications for admission to graduate standing, with complete credentials, with the program or department

Applications are accepted for fall quarter only. You may apply for admission to graduate study via the World Wide Web at: <https://secureweb.ucdavis.edu:2443/>. If you apply electronically, the \$40 nonrefundable application fee and official transcripts from each college and university you have attended must be mailed directly to the program to which you are applying.

You should begin the application process as early as possible in the academic year, since many programs have early deadlines. In addition, your chances for appointment as a teaching or research assistant or of receiving financial support are greatly enhanced by applying early. The application deadlines are as noted above, unless otherwise indicated by the program, or until your proposed graduate program is full, whichever occurs first.

If you do not apply electronically, you may request the application for admission and fellowship from the Office of Graduate Studies, One Shields Avenue, University of California, Davis, CA 95616. The completed application form, the application fee and official transcripts must be sent directly to the program to which you are applying. Supplemental application materials required by the graduate program must be sent directly to the graduate adviser for that program.

The Graduate Admissions Advisory Committee for the program will submit its recommendation and evaluation to Graduate Studies; final admission decisions rest with the dean of Graduate Studies. This approval procedure applies to all applicants, including those seeking a transfer to UC Davis from another UC campus.

Applications for the degrees of Juris Doctor, Doctor of Medicine, Doctor of Veterinary Medicine, Master of Business Administration and Master of Preventive Veterinary Medicine must be filed directly with the appropriate professional school.

### Readmission

**April 1** Deadline to file applications for **readmission** to graduate status with Graduate Studies

If you were formerly registered at UC Davis as a graduate student and wish to return to the **same degree pro-**

**gram and major**, you must apply for readmission and pay the readmission application fee of \$40. The readmission application must be filed with Graduate Studies by April 1 (or earlier if the program specifies an earlier date). Readmission to quarters other than fall is granted on an exception basis by special petition to the dean of Graduate Studies. If you are seeking to return to a new degree program and/or new major, you must apply for admission along with other new applicants. Obtain an application from the Graduate Studies office. Transcripts of all work undertaken since you were last registered in graduate status at Davis must be presented with the application. (There is no assurance of reentry, as applicants for readmission will be considered in competition with other applicants for the program.)

### International Students

Assessment of a foreign degree is based on the characteristics of the national system of education, the type of institution attended and the level of study completed.

If you are an international student with credentials from universities outside the U.S., you should begin the application process as early as a year in advance. Official copies or certified copies of all transcripts in English and in the original language are required before your application can be processed. Completed applications from international students along with the nonrefundable \$40 application fee must be received by the program to which you are applying by March 1, unless your proposed program has an earlier deadline.

International students may also apply via the World Wide Web at <https://secureweb.ucdavis.edu:2443/>

**English Requirement.** If English is not your native language and you have not studied at an institution where English was the language of instruction, you will be required to demonstrate proficiency in English by submitting your test scores from the Test of English as a Foreign Language (TOEFL). This test is given six times each year by the Educational Testing Service, CN6151, Princeton, NJ 08541-6151. The minimum score required for admission to graduate study at UC Davis is 550 (or 600 for Linguistics).

**Visas.** If you need a certificate of eligibility for a student visa issued by UC Davis, you will be required to complete a certification of finances form showing the avail-

ability of sufficient funding for your graduate program (see International Student Services in the "Academic Advising" chapter for complete details). No financial aid of any kind (grants, loans, fellowships, scholarships, or work-study awards) is available to international students during their first year of registration at UC Davis.

### Fees

At the time of registration each quarter, every student must pay the following fees.

#### Graduate Student Fees (per quarter)

*These are the proposed fees for the 1998-99 academic year. Because fees are subject to gubernatorial, legislative and regental action, these fees may change without notice.*

|                                                  |                   |
|--------------------------------------------------|-------------------|
| University Registration Fee . . . . .            | \$238.00          |
| Educational Fee . . . . .                        | \$1,029.00        |
| Memorial Union Fee . . . . .                     | \$28.50           |
| Student Health Services Fee . . . . .            | \$32.00           |
| Health Insurance* . . . . .                      | \$133.50          |
| Graduate Student Association Fee . . . . .       | \$6.50            |
| Student Facilities Safety Fee . . . . .          | \$22.00           |
| <b>Total Full-time California Resident . . .</b> | <b>\$1,489.50</b> |
| Nonresident tuition . . . . .                    | \$3,128.00        |
| <b>Total Full-time Nonresident . . . . .</b>     | <b>\$4,617.50</b> |
| Reduced Nonresident Tuition** . . . . .          | \$782.00          |
| <b>Total Full-time Nonresident, Reduced . .</b>  | <b>\$2,346.00</b> |
| Total Part-time California Resident . . . . .    | \$979.00          |
| Total Part-time Nonresident . . . . .            | \$2,539.00        |
| Total Employee-student . . . . .                 | \$473.50          |

\*Graduate students must purchase the Graduate Student Health Insurance Plan (GSHIP) unless they are able to prove comparable coverage under another insurance plan. GSHIP is approximately \$133.50 per quarter.

\*\*Nonresident Ph.D. candidates who have advanced to candidacy by the first day of the quarter will be assessed 25% of the 1998-99 nonresident tuition charge. The reduced nonresident tuition will be applied for three calendar years, after which enrolled nonresident advanced doctoral students will again be charged the full nonresident tuition in effect at that time.

### Program of Study

New students are assigned an adviser within the appropriate department or graduate group who assists them in planning a program of study. The program will depend to some degree on the student's undergraduate training and may include undergraduate courses to remove deficiencies. Each student must satisfy the degree requirements as published in the Graduate Program Directory, or as documented by the program. Additional requirements for study may be established by the department or group and approved by the Graduate Council. These requirements often include a core of required courses, but considerable flexibility is permitted to suit individual needs. Undergraduates at Davis who plan to pursue graduate study should consult with their major adviser early in their senior year to guarantee adequate preparation.

A graduate degree is awarded to recognize a student's command of a wide range of knowledge in an academic

*Intramural sports each year draw more than 13,100 students for men's and women's teams.*

\* Deadlines are subject to change without notice.

field. It is not awarded merely for fulfillment of technical requirements, such as residence, or the completion of specific courses.

### Master's Degree

Students working toward a master's degree must be registered in residence for at least three quarters. Two regular six-week Summer Sessions may count as the equivalent of one quarter. Usually, all work for the master's degree is done in residence on the Davis campus. With the consent of the graduate adviser and the dean of Graduate Studies, however, some work taken elsewhere may be credited toward your degree. The normal limit for such transfer credit is 6 units from another institution, or 12 concurrent units, or up to one half of the unit requirement if the courses were taken at another UC campus—providing the units were not used to satisfy requirements for another degree.

A master's degree may be awarded upon completion of one of two basic plans in which either a thesis or a comprehensive examination is required.

### Ph.D. Degree

The Doctor of Philosophy degree, as granted at the University of California, means that the recipient possesses knowledge of a broad field of learning and has given evidence of distinguished attainment in that field; it is a warrant of critical ability and powers of imagination and synthesis. It means, too, that the candidate has presented a dissertation containing an original contribution to the knowledge of the chosen field of study.

Students working toward a doctorate must be registered and in university residence for a minimum of six regular quarters. Experience indicates that it takes considerably

longer than this to complete a degree program. Two consecutive regular Summer Sessions may count as the equivalent of one regular quarter.

There is no university unit requirement for the doctoral degree. However, individual programs have course requirements that must be completed before admission to the qualifying examination.

The qualifying examination is administered by a committee appointed by the dean of Graduate Studies. The examination is intended to demonstrate critical thinking ability, powers of imagination and synthesis and broad knowledge of the field of study. Upon recommendation of the Qualifying Examination Committee, and with the approval of the Graduate Council, the examination may be repeated one time.

After successful completion of the Qualifying Examination, the student must file for Advancement to Candidacy for the degree. At this time, a committee is appointed to direct the research problem and guide in the preparation of the dissertation.

Graduate students in certain Ph.D. programs may participate in a **Designated Emphasis**, a specialization that might include a new method of inquiry or an important field of application which is related to two or more existing Ph.D. programs. The Designated Emphasis is awarded in conjunction with the Ph.D. degree and is signified by a transcript designation; for example, "Ph.D. in History with a Designated Emphasis in Critical Theory." Programs approved as Designated Emphases include Biotechnology; Computational Science; Critical Theory; Economy, Justice and Society; Feminist Theory and Research; International Nutrition; Native American Studies; and Social Theory and Comparative History.

## Intercampus Exchange Program

A graduate student registered on any campus of the university may become an intercampus exchange student with the approval of the graduate adviser, the chairperson of the department or group on the host campus and the dean of Graduate Studies on both the home and the host campuses.

An intercampus exchange student has library, health service and other student privileges on the host campus, but is considered a graduate student in residence on the home campus. The grades obtained in courses on the host campus are transferred to the home campus and entered on the student's official graduate transcript.

Application forms may be obtained in Graduate Studies and should be submitted six weeks before the beginning of the quarter in which you wish to participate in the program.

## Fellowships, Assistantships and Loans

World Wide Web (applications for fellowships and scholarships): <http://pubweb.ucdavis.edu/documents/gradstudies/support/studsup.htm>

Financial support for graduate study at UC Davis is available in several forms: teaching and research assistantships, financial aid and fellowships/scholarships.

Financial aid, which is available to U.S. citizens, permanent residents or immigrants only, is awarded on the basis of demonstrated financial need and is administered by the Financial Aid Office. Federal financial aid includes student loans, grants and work-study funding. You may apply for financial aid before you have been admitted. To be considered for financial aid, or for any awards based on financial need, you must file a "Free Application for Federal Student Aid" (FAFSA) no later than March 2, prior to the fall quarter enrollment. This form, submitted directly to the Federal Student Aid Program Office, Iowa City, IA, is used to determine financial need only. Contact the Graduate Financial Aid Office for information regarding loans, grants and work-study.

Fellowships and graduate scholarships are awarded primarily on the basis of scholarship and promise of outstanding academic and professional achievement. Fellowship awards can include a stipend, fees and/or nonresident tuition. Considered in evaluations are the Graduate Record Examination (GRE) scores, undergraduate and graduate grade point averages, academic transcripts, statement of purpose, letters of recommendation and other documentation such as publications or awards. The minimum cumulative undergraduate or graduate grade point average required for a stipend or in-state fee award is 3.5 (A=4.0); for nonresident tuition fellowships the minimum is 3.25. Applicants must be U.S. citizens, or permanent residents of the U.S., or immigrants. U.S. citizens and permanent residents are eligible for nonresident tuition fellowships for their first three quarters only at UC Davis. New international students may be awarded nonresident tuition fellowships, but not stipend or in-state fee fellowships, in their first three quarters.

Applications for fellowships and graduate scholarships are due by **January 15** for awards beginning fall quarter. Information for both new and continuing students and application materials for fellowships and graduate scholarships are available on the World Wide Web. You may print the application forms, complete them and submit them by mail. The fellowship applications may NOT be submitted electronically.

Entering students submit the "Application for Graduate Admission and Fellowship;" continuing students file an "Application for Fellowships and Graduate Scholarships for Continuing UCD Graduate Students" with their graduate program.

## Graduate Certificate Program for Engineers

For engineers who already have a degree, the College of Engineering offers a Graduate Certificate Program. This program consists of course work in selected engineering subjects and requires fewer units than the degree programs. The purpose of the Graduate Certificate Program is to provide practicing engineers with an opportunity to develop additional expertise in specific areas and to explore new fields of technical interest.

General requirements for the program are

- 15 or 16 units of specified graduate course work, or a combination of specified graduate and undergraduate course work
- Admission to Graduate Studies

Further information on the Graduate Certificate Program may be found in the *College of Engineering Bulletin*.

## Teacher Credential Programs

Information:  
Division of Education  
Student Services Office  
2078 Academic Surge  
530-752-0757; [jgmacdonald@ucdavis.edu](mailto:jgmacdonald@ucdavis.edu);  
<http://education.ucdavis.edu/>

Department of Agronomy (Agriculture Teaching Credential)  
Agricultural Education Program Office  
132 or 155 Hunt Hall  
530-752-3040 or 752-4369

The Division of Education offers programs for students interested in becoming elementary or secondary teachers. The elementary education program prepares you to teach all the subjects commonly taught in an elementary classroom. In addition, it offers the option of receiving in-depth training for teaching in a bilingual (Spanish) or English as a Second Language classroom. The secondary education program is designed to prepare teachers who will work in grades 7 through 12 in the following areas: agriculture, English, foreign language (Spanish), science (biology, chemistry, geoscience and physics), math, music, physical education and social studies education.

To apply you need to have done the following:

- completed a bachelor's degree;
- completed most of the required course work in the area you want to teach, or have taken a National Teacher Exam (NTE) and National Evaluation Systems (NES) exam in the area you want to teach;

- taken the California Basic Education Skill Test (CBEST);
- worked with school-age children; and,
- met Graduate Studies minimum GPA requirement (3.0).

There are additional requirements that we encourage you to take as undergraduates. Information is available in the Student Services Office.

The teaching credential program starts in the fall quarter only and is nine months long. It is a full-time professional program with a rigorous schedule. Student teachers are in classrooms in the morning and early afternoon and back on campus in the afternoon and evening for course work. The student teaching assignments generally are in the following communities: Davis, Winters, Woodland, Dixon, Vacaville, Fairfield, Sacramento and West Sacramento. Student teachers are required to participate in the schools in the role of a regularly credentialed teacher. A typical course schedule follows:

- student teaching
- teaching methods courses [on how to teach your subject area(s) and grade level(s)]
- reading methods course
- computer education course
- health education course
- special education course

Upon satisfactory completion of all requirements, you will be recommended to receive a California teaching credential.

Applications and filing deadlines should be obtained from the Division of Education or from the Department of Agronomy (agricultural education).

The teacher education program is also available to upper division students who have a 3.3 GPA and room in their schedule for a full-time teaching program. Satisfactory completion of your degree and the credential program would entitle you to a nonrenewable **preliminary** credential. Within five years you must complete a graduate year of study to be eligible for an additional credential. Specific requirements may be obtained from the Student Services staff in the Division of Education.

Students considering teaching as a career should consult the Division of Education or the Department of Agronomy **as early as their freshman year**. Because of the complexity of the Teacher Preparation and Licensing Law and the requirements of Davis campus programs, students are encouraged to maintain close contact with education advisers throughout their undergraduate years.

### **UC Davis/CSU Sacramento Collaborative Elementary Credential Program**

The Collaborative Elementary Credential Program offers accelerated course work for the CLAD or BCLAD elementary credential during the summers; the supervised field experience is completed during the academic year. This program is designed to meet the needs of emergency credential holders and working professionals who are changing careers.

### **Program in College Teaching**

Information:  
Teaching Resources Center  
17 Wellman Hall  
530-752-6050; <http://trc.ucdavis.edu/trc/grad/colteach.htm>

The Program in College Teaching provides graduate students interested in college and university teaching the opportunity to improve their teaching skills and gain familiarity with a wide range of issues important to a faculty career. The program focuses on teaching in the participant's own discipline area. Direction and instruction are predominantly provided by a faculty mentor selected by the participant. Successful participants earn a certificate of completion and an appropriate annotation is added to their university transcripts. They also have the opportunity to construct a well-developed teaching portfolio for prospective employers.

The heart of the program is co-teaching with a faculty mentor. Many participants choose UC Davis faculty members as their mentors and do their teaching on the Davis campus. Participants considering a career at a community college or at a four-year teaching college are encouraged to find faculty mentors and teaching opportunities at cooperating colleges nearby, thereby developing contacts and references at institutions similar to those at which they intend to eventually teach. Participants also complete individualized learning contracts and attend regularly scheduled "Teaching Roundtables."

The program begins in late spring quarter, lasts until the end of the following spring quarter, and is designed to fit into the student's existing schedule. The Teaching Resources Center administers this graduate student professional development program, with the support of the Office of Graduate Studies.

**SCHOOL OF LAW**

---

## SCHOOL OF LAW

Information:  
School of Law  
530-752-6477; <http://kinghall.ucdavis.edu>

The School of Law offers a three-year professional curriculum leading to the degree of Juris Doctor. In addition to the traditional professional curriculum, the School provides professional skills training in interviewing and counseling, negotiation and dispute resolution and trial practice. It also offers opportunities for practical experience through clinical programs and for in-depth study of an area of law in an individualized program of classroom work, research, writing, or experience in the community. The School seeks to promote critical evaluation of law and legal institutions in a broad perspective, integrating non-legal disciplines with professional legal education.

The School is fully accredited by the American Bar Association, is a member of the Association of American Law Schools, and has a chapter of the Order of the Coif.

### Preparing for the Study of Law

No specific college major is required for admission to the School of Law, and there is no prescribed pre-legal program. Your college record and Law School Admission Test (LSAT) score must, of course, demonstrate that you are highly qualified for the study of law.

As a pre-law student, you should plan a course of study that will give you a broad cultural background and include intensive work for a substantial period of time in a selected field of study. Pre-law students should develop the ability to think critically. They should gain an understanding of people and institutions and know how to gather and weigh facts, to solve problems and think creatively. They should be able to read rapidly with comprehension, and express themselves clearly, completely and concisely, both orally and in writing.

You can get help with program planning from the Pre-Law Advising Office, 227 Voorhies Hall, 752-3009.

For additional information, see the *Official Guide to U.S. Law Schools*, a publication of the Law School Admission Council in cooperation with the American Bar Association and the Association of American Law Schools. This book includes material on the law and lawyers, pre-law preparation, applying to law school and the study of law, together with individualized information on all ABA approved law schools. It can be found at college and major bookstores or ordered from Law Services, Box 2400, Newtown, PA 18940-0977.

### Applying for Admission

**February 1** Deadline for filing applications for admission for 1999-2000 to the School of Law

1. Request application forms and the school catalog from the Office of Admissions, School of Law, University of California, 400 Mrak Hall Drive, Davis, CA 95616-5201 or post an e-mail request to: [lawadmissions@ucdavis.edu](mailto:lawadmissions@ucdavis.edu). Return your completed application to that office, plus a \$40 nonrefundable application fee, in the form of a check or money order made payable to the Regents of the University of California.

The last date for filing completed application forms, together with all supporting documents, including LSAT scores, Law School Data Assembly Service (LSDAS) reports and letters of recommendation, is *February 1* of the year in which admission is sought. Early filing of all application materials is strongly recommended and will materially assist the School of Law Admissions Committee in its considerations. Applications postmarked after February 1 will be returned to the applicant.

2. You must take the Law School Admission Test and register with the Law School Data Assembly Service so that the score will be reported to the school. You are urged to take the test as early as possible, and no later than December preceding the year in which admission is sought.

Testing centers are located in all parts of the United States and in many foreign countries. Tests are given four times a year: February, June, September and December. The completed test application blank, accompanied by the required fee, should be postmarked approximately six weeks before the date of the test to ensure that you will be registered for that test date.

To obtain application forms, information about the test, specific test dates and the location of testing centers, write to: Law Services, Box 2000, 661 Penn Street, Newtown, PA 18940-0998. You can also contact Law Services via e-mail at [lsacinfo@lsac.org](mailto:lsacinfo@lsac.org). The LSAT/LSDAS Registration and Information book is also available in the Law School Admission Office and the Pre-Law Advising Office on campus.

3. Register with the LSDAS no later than December 1 by completing and mailing the registration form supplied in each LSAT/LSDAS Registration and Information book. Have a transcript from each college or university you have attended sent directly to Law Services, Box 2700, 661 Penn Street, Newtown, PA 18940-0978.

4. Submit an official transcript of college work completed during the first semester or quarter of your senior year directly to the School of Law as soon as it is available. Failure to do so may delay consideration of your application materials. Successful applicants must submit directly to the School of Law a final transcript showing the award of a bachelor's degree.

5. Provide two letters of recommendation from objective and responsible persons to whom you are well known. At least one of these letters should come from a faculty member under whom you studied while in college. These letters of recommendation should be enclosed in sealed envelopes, the recommender must sign across the seal, and the letters should be submitted along with the application for admission; or they may be sent directly from the recommender, a college placement center, a career center, or a college pre-law office. Your application cannot be considered until two letters have been received.

Your application will be reviewed by the School of Law Admissions Committee, which seeks students of demonstrated academic ability, as evidenced by LSAT scores and the undergraduate grade point average (GPA). The committee seeks students of diverse backgrounds and considers economic factors, advanced

degrees or other advanced studies, significant work experience and extracurricular and community activities during and after the college years. An applicant's growth, maturity and commitment to the study of law are also major considerations. Students are admitted only on a full-time basis and only in August.

6. When accepted by the School of Law, you are simultaneously admitted to Graduate Studies on the Davis campus of the university for the program leading to the degree of Juris Doctor. If you intend to pursue studies leading to other graduate degrees, or wish to become a candidate for a Combined Degree Program (see below), you must make separate application to Graduate Studies before commencing such studies.

### **Admission to Advanced Standing**

If you have completed at least one year of full-time law course work in another approved law school, you may be considered for admission to advanced standing with credit for not more than one year of such work. The application filing period is June 1–30. No application for advanced standing will be considered until the Office of Admissions has received transcripts for all prior law school work.

Application procedures for advanced standing are the same as described above with the addition of (1) a letter of good standing including class rank from the dean of any law school previously attended; (2) at least one letter of recommendation from a law professor; (3) transcripts of all law school work; (4) LSAT score (no need to register with LSDAS—a copy of the report previously submitted to the school you are presently attending will suffice); and (5) an official transcript from the school where you earned your undergraduate degree, stating the date the degree was conferred. The deadline for transfer applications is *June 30* of the year for which transfer is sought. Committee decisions on advanced standing are normally made in late July or early August of the year in which admission is sought.

Students who have been disqualified at another law school will not be admitted to this school.

### **Recruitment of Underrepresented Groups**

The students and faculty of the School of Law recognize the great need for lawyers from underrepresented groups. The School, therefore, actively solicits applications from those groups that reflect the many diverse populations of California but, traditionally, have been underrepresented in the law school population.

The School of Law, in cooperation with the Association of American Law Schools (AALS) and the Council on Legal Education Opportunity (CLEO), participates in programs designed to increase the number of law students from underrepresented groups. CLEO applications may be obtained by writing to: Council on Legal Education Opportunity, 1420 N Street, N.W., Terrace One, Washington, D.C. 20005.

Applications for the Prelaw Summer Institute for American Indians and Alaskan Natives may be obtained from the American Indian Law Center, P.O. Box 4456-Station A, Albuquerque, NM 87196 (505-277-5462).

The Mexican-American Legal Defense and Education Fund (MALDEF) has scholarships available for Latino students who have applied to law school. Applications may be obtained by writing to MALDEF, 634 So. Spring Street, 11th Floor, Los Angeles, CA 90014 (213-629-2512, ext. 146).

### **Program of Study**

The professional curriculum requires six semesters for completion and extends over a period of three years. It is for full-time students only; no part-time or evening program is offered. New students are admitted only at the beginning of the fall semester.

After satisfactorily completing the professional curriculum of 88 semester units and the required period of resident study, you will receive the degree of Juris Doctor. Students who fail to attain satisfactory grades may be required to withdraw from the School at the end of any academic year.

The first year's work is prescribed and provides the essential foundation for subsequent legal study. Satisfactory completion of the first-year courses is, in all cases, prerequisite to second- and third-year courses. The work of the second and third years is elective. The courses of the professional curriculum are listed in the "Programs and Courses" section of this catalog. Courses taken in summer sessions at other accredited law schools may, with prior permission, be credited toward the units required for the professional degree.

### **Combined Degree Programs**

Students may find a combined degree involving law and another discipline such as economics, business, sociol-

---

*The sunken courtyard at King Hall offers a welcome change of scene for study sessions.*

---

ogy, or science advantageous. To encourage this kind of study, the School, in conjunction with other schools and university departments, has established Combined Degree Programs. Under these programs, a student may work toward a J.D. degree and a master's degree in another discipline at the same time. In some instances it may be possible to work on a Ph.D. degree as well. Students working toward a combined degree are required to spend their first year at the law school.

Normally, a Combined Degree Program will take at least four years. You will usually be able to earn up to 10 semester-hours of law school credit for work in the related discipline and normally can complete the combined degrees in less time than it would take to earn the two degrees separately. The first year of the Combined Degree Program must be taken entirely in the School of Law. During the remaining years, course work may be divided between the law school and the related discipline. You must satisfy the admission requirements for both programs and file applications with both units.

Students have pursued degree programs in combination with UC Davis departments for the M.A. degree in economics and sociology, and with the School of Management for the M.B.A. degree. The law school will attempt to work out an additional program if you are interested in other disciplines. You may enroll in the Combined Degree Program any time before the beginning of your third year in law school. If you are interested in pursuing a Combined Degree Program, and have made a separate application to another school or department, you should notify the School of Law if that application is accepted.

### The LL.M. Program

Information:  
University Extension  
530-757-8569; 530-575-8596 (fax )  
clolla@unexmail.ucdavis.edu

The law school LL.M. (Master of Laws) program integrates American and foreign law students at all levels of study. For foreign law graduates, the program provides an opportunity to gain a basic knowledge of the United States legal system. United States law school graduates and selected foreign LL.M. candidates may also seek admission on a thesis rather than a course basis. Other opportunities available to all graduate law students include developing special expertise in a particular area and doing special projects and original research under the direction of a faculty member.

Each LL.M. candidate must successfully complete a minimum of 20 semester units of work, usually 10 units each semester. Foreign LL.M. students must enroll in the 1-unit course *Introduction to Legal Research* and the 2-unit course *Introduction to the Law of the United States*. They earn the remainder of their required course credit in regular elective J.D. courses. Each foreign student must also complete an intellectually rigorous legal research and writing project, constituting at least 2 units of credit.

All LL.M. candidates begin their year of study with a complete orientation in the academic and social life of the law school, the UC Davis campus and the city of Davis. LL.M. students are encouraged to enroll in the School of Law's Orientation in U.S.A. Law Program, given in the month before the LL.M. Program begins.

### Student Fees: School of Law

At the time of registration each semester, every student must pay the following fees.\*

*These are the proposed fees for the 1998-99 academic year. Because fees are subject to gubernatorial, legislative and regental action, these fees may change without notice.*

|                                   | Per<br>Quarter     | Annually           |
|-----------------------------------|--------------------|--------------------|
| University Registration Fee       | \$356.50           | \$713.00           |
| Educational Fee                   | \$1,543.00         | \$3,086.00         |
| Law Student Association Fee       | \$10.00            | \$20.00            |
| Memorial Union Fee                | \$42.75            | \$85.50            |
| Student Health Services Fee       | \$48.00            | \$96.00            |
| Health Insurance**                | \$200.25           | \$400.50           |
| Student Facilities Safety Fee     | \$33.00            | \$66.00            |
| Professional School Fee           | \$3,188.00         | \$6,376.00         |
| <b>Total for Calif. residents</b> | <b>\$5,421.50</b>  | <b>\$10,843.00</b> |
| Nonresident Tuition               | \$4,692.00         | \$9,384.00         |
| <b>Total for nonresidents</b>     | <b>\$10,113.50</b> | <b>\$20,227.00</b> |

\*\* Students must purchase the Graduate Student Health Insurance Plan unless they are able to prove comparable coverage under another plan.

\* These fees apply to students admitted to the School of Law in 1998-99, 1997-98, or 1996-97.

**PELP students** are considered continuing students.

**Readmitted students** are considered new (entering) students.

### School of Law: Academic Calendar 1998-99

The School of Law operates on a semester system rather than the quarter system used on the remainder of the Davis campus.

|                                  | FALL 1998               | SPRING 1999*               |

**GRADUATE SCHOOL  
OF MANAGEMENT**

---

## GRADUATE SCHOOL OF MANAGEMENT

Information:

Graduate School of Management

106 AOB IV

530-752-7399; <http://www.gsm.ucdavis.edu>

The Graduate School of Management offers a full-time, two-year program leading to the Master of Business Administration degree. The program provides both entry-level and mid-career students with an understanding of management approaches to problem solving and an awareness of the environment within which public and private management decisions are made. Successful completion requires not only a sophisticated understanding of a variety of functional skills in finance, marketing, production, program evaluation and accounting, but also an understanding of computers, information systems and the application of scientific methods to the identification and solution of management problems.

### Preparing for the Study of Management

A bachelor's degree and a strong interest in professional management are prerequisites for admission to the Graduate School of Management. The school seeks students from diverse professional and academic backgrounds and does not limit its consideration to applicants from any particular category of majors. Entry-level and mid-career applicants are considered, and women and minorities are encouraged to apply.

Although the program has no specific subject prerequisites, it is strongly recommended that students complete the following course work before enrolling:

*Accounting*—an introductory course in financial accounting.

*Economics*—introductory courses in micro- and macroeconomics.

*English*—a business communications course.

*Mathematics*—an introductory course in calculus.

*Statistics*—one course in elementary statistics.

## Applying for Admission

Deadlines for filing applications for admission for 1998-99 to the School of Management:

| Application Deadline | Decision made no later than |
|----------------------|-----------------------------|
| February 1, 1999     | March 26                    |
| April 1, 1999        | May 28                      |

**Interviews are highly recommended but not required, unless the applicant has less than two years of work experience.** A completed application should be on file before scheduling an interview.

Admission is for the fall quarter only. Application materials may be obtained from the Graduate School of Management, One Shields Avenue, University of California, Davis, CA 95616 or by calling 530-752-7399. Complete and return your application, with all supporting documents, by the deadlines given above. The application fee is \$40.00.

### In addition to your application, you need to submit:

- Transcripts from all colleges or universities previously attended.
- Graduate Management Admission Test (GMAT) taken within the last five years of the admission date. Applicants must take the GMAT no later than March to be considered for fall admission. For further information and registration forms contact: Graduate Management Admission Test, Educational Testing Service, P.O. Box 6103, Princeton, NJ 08541-6103; 609-771-7330; [www.gmat.org](http://www.gmat.org).
- Three letters of recommendation. Applicants currently enrolled in school should include one recommendation from a professor. For individuals who are out of school, recommendations from employers or business associates are acceptable.
- A writing sample and a personal statement which discusses career objectives and educational reasons for seeking admission to the program.

Personal interviews are not required, although visits from applicants are welcomed.

---

*The GSM "Briefcase Brigade" makes an appearance in the annual Picnic Day parade.*

---

### International Students

Foreign students for whom English is a second language must take the Test of English as a Foreign Language (TOEFL) by March 1, and receive a score of 600 or better. To receive registration forms, write to: TOEFL, Educational Testing Service, P.O. Box 6155, Princeton, NJ 08541-6155; 609-771-7100; www.toefl.org.

International students must show proof of financial support for one academic year including tuition and living expenses.

### Criteria for Admission

The major criterion of the committee granting admission is what an applicant has to gain from, and offer to, the program. Consideration of an applicant's undergraduate performance includes a review of trends in scholastic performance and areas of academic strength as well as an assessment of overall grade point averages. Admissions standards and grading policies of the schools attended are also considered. Both verbal and quantitative scores on the GMAT are used to evaluate measurable general aptitude for management. Background and maturity as indicated by employment history, service and activity records, recommendations and the applicant's personal statement are factors in the committee's evaluation. Professional management experience is not required for admission but is favorably considered.

### Program of Study

In the first year, the program offers a series of core courses that focus on all the basic disciplines of business—accounting, economics, finance, marketing, organizational behavior, decision sciences and information systems.

The second year of the program allows students to take courses in individually selected concentrations. These concentrations include accounting, agricultural management, environmental and natural resource management, finance, international management, management information systems, management science, marketing, public sector management, and technology management. Students may also design their own concentration.

Whether in  
an office or  
outdoors in  
the sun,  
students have  
ample opportunity to  
meet and talk  
with faculty.

### Student Fees:

#### Graduate School of Management

At the time of registration each quarter, every student must pay the following fees.\*

*These are the proposed fees for the 1998-99 academic year. Because fees are subject to gubernatorial, legislative and regental action, these fees may change without notice.*

|                                   | Per<br>Quarter    | Annually           |
|-----------------------------------|-------------------|--------------------|
| University Registration Fee       | \$238.00          | \$713.00           |
| Educational Fee                   | \$1,029.00        | \$3,086.00         |
| Graduate Student Assoc. Fee       | \$6.50            | \$19.50            |
| Memorial Union Fee                | \$28.50           | \$85.50            |
| Student Facilities Safety Fee     | \$22.00           | \$66.00            |
| Student Health Services Fee       | \$32.00           | \$96.00            |
| Health Insurance*                 | \$133.50          | \$400.50           |
| Professional School Fee           | \$2,000.00        | \$6,000.00         |
| <b>Total for Calif. residents</b> | <b>\$3,489.50</b> | <b>\$10,466.50</b> |
| Nonresident Tuition               | \$3,128.00        | \$9,384.00         |
| <b>Total for nonresidents</b>     | <b>\$6,617.50</b> | <b>\$19,850.50</b> |

\* These fees apply to students admitted to the Graduate School of Management in 1998-99, 1997-98, or 1996-97. For students admitted in 1995-96, the Professional School Fee is \$4,000 per year, and total annual student fees for California residents are \$8,466.50 for nonresidents, \$17,850.50.

\*\* Students must purchase the Graduate Student Health Insurance Plan unless they are able to prove comparable coverage under another plan.

**PELP students** are considered continuing students.

**Readmitted students** are considered new (entering) students.

### MBA Program for Working Professionals

In addition to the above full-time program, the Graduate School of Management offers an evening MBA Program for Working Professionals.

**Application Deadline**      **Decision made no later than**  
May 15, 1999                      June 30

**Interviews are required** and may be scheduled once your application is submitted.

If you would like more information about the evening program, please contact the Graduate School of Management Admissions office at 530-752-7399.

**SCHOOL OF  
MEDICINE**

**SCHOOL OF MEDICINE**

Information:  
School of Medicine  
530-752-2717; <http://www.med.ucdavis.edu>

The Doctor of Medicine degree requires the satisfactory completion of a four-year course of study composed of 15 consecutive quarters. Course work is conducted on the Davis campus, at the UC Davis Medical Center, Sacramento; and in nearby affiliated hospitals.

**Preparing for the Study of Medicine**

When you apply to the School of Medicine, you must submit the results from the New Medical College Admission Test (MCAT), so it is recommended that you take the MCAT by the spring before application. Information can be obtained at your undergraduate institution or directly from MCAT Program, Box 24720, Oakland, CA 94623-1720. To be acceptable for the entering class of fall 1999, the new MCAT must be taken no later than fall 1998. No scores before August 1995 will be accepted.

Applicants must also meet the following academic requirements:

- A. Must have completed at least three years of study in an accredited college or university in the United States or Canada. A minimum of 90 semester hours or 135 quarter units of college-level work is required. Courses in highly specialized fields are acceptable only at the discretion of the medical school.
- B. Must have completed satisfactorily before matriculation each of the following courses:

|                                                                                                                                                                                     | Quarter<br>Units | Semester<br>Units |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|-------------------|
| 1. English, 1 year or its equivalent .....                                                                                                                                          | 12               | 6                 |
| 2. Biological science, 1 year including laboratory, or its equivalent .....                                                                                                         | 15               | 8                 |
| 3. General chemistry, 1 year including laboratory, or its equivalent .....                                                                                                          | 15               | 8                 |
| 4. Organic chemistry, 1 year or its equivalent. If two or more undergraduate organic chemistry courses are offered, it is recommended that you elect the more rigorous option ..... | 12               | 8                 |
| 5. Physics, 1 year including laboratory or its equivalent.....                                                                                                                      | 12               | 8                 |
| 6. Mathematics, course work sufficient to satisfy prerequisites for integral calculus. (Course work through integral calculus is recommended) .....                                 | 6                | 4                 |

**(You will find helpful experience and knowledge gained in biochemistry, genetics and embryology.)**

- C. Must demonstrate the potential to perform academically at least as well as the average of the current first year class. This reflects the School of Medicine's generally higher standards and our emphasis on potential as judged from the application as a whole, including but not limited to MCAT and GPA scores.

For additional information, contact the School of Medicine Admissions Office and request *A Guide for Prospective Students*.

**Applying for Admission**

**November 1** Deadline for filing applications for admission for 1999-2000 to the School of Medicine

The School of Medicine participates in the centralized American Medical College Application Service (AMCAS). Application request cards are available from the Office of Admissions, School of Medicine, University of California, One Shields Avenue, Davis, CA 95616-8661, after April 1 of each year. You may also secure this form from other AMCAS-participating medical schools or from your premedical adviser. You need to submit only one application and one set of official transcripts to AMCAS, regardless of the number of member schools to which you are applying.

Upon receipt of the application request form, AMCAS will send you an application for admission, together with descriptive material and instructions. Submit the completed application and other required credentials directly to AMCAS for verification, reproduction and immediate distribution to the medical schools you have indicated.

After your AMCAS application has been received by the School of Medicine, the Admissions Office will notify you and may request a secondary application and two letters of recommendation along with a nonrefundable application fee of \$40. Send these items directly to the Chairperson of the Admissions Committee, Office of Admissions, School of Medicine, University of California, One Shields Avenue, Davis, CA 95616-8661, and not to AMCAS. Recommendations can be in the form of a report by a premedical advisory committee at the college or university where you are enrolled or letters from two faculty members who are familiar enough with you and your abilities to make a meaningful evaluation. We recommend that one letter be from a science instructor and the other from a non-science instructor.

Applications are accepted by AMCAS between *June 1* and *November 1*. We strongly recommend that you make an early request for application materials from AMCAS and see that the necessary supporting items reach the Committee as soon as possible after the School of Medicine requests them. The Committee reviews only complete application files and schedules interviews for highly qualified applicants throughout the application period and beyond.

A personal interview is usually required before a place in the first-year class can be offered. However, because of the large number of applicants, it is not possible to interview each one, and for this reason interviews are held only at the invitation of the Admissions Committee. Interviews take place at the medical school in order to provide you with first-hand knowledge of programs and facilities and give you the opportunity to meet some of the students.

As decisions are made, letters of acceptance are sent; this can be as early as mid-October and as late as September of the following year.

**Applicant Selection.** The class entering in the fall will be limited to 93 students selected on the basis of academic achievement, academic promise and personal char-

acteristics. The Admissions Committee uses these criteria to determine if a candidate will be able to complete satisfactorily the requirements of the medical curriculum and become excellent medical practitioners. Factors taken into consideration include scholastic records, Medical College Admission Test performance, and reports of teachers, advisers and interviewers with regard to intellectual capacity, motivation, emotional stability and personal dedication.

The majority of openings in the entering class will be awarded to students who are California residents. However, the School of Medicine participates in the program of the Western Interstate Commission for Higher Education (WICHE) and residents of participating states will be considered as residents for purposes of admission. For more information, write the WICHE at Post Office Drawer P, Boulder, CO 80302.

The School of Medicine selects students for admission with a view to meeting the needs of society, of the medical profession and of the School. Because we live in a pluralistic society, and the educational experience is enhanced by the interaction of students from various backgrounds, the School desires diversity in its student body. This is reflected in the School's commitment to expand opportunities in medical education for individuals from groups underserved in medicine as the result of socioeconomic disadvantage and to increase the number of physicians practicing in underserved areas. Therefore, the Admissions Committee, composed of individuals from a variety of backgrounds and representative of a broad spectrum of medical sciences, evaluates applicants in terms of all relevant factors. These include academic credentials, with due regard to how they may have been affected by disadvantages experienced by the applicant, such personal traits as character and motivation, experience in the health sciences and/or the community, career objectives, and the ability of the individual to make a positive contribution to society, the profession and the School.

### **Transfer with Advanced Standing**

Currently enrolled students in good standing at approved medical schools in the United States or Canada may apply for admission to the third year of study. In order to provide the best facilities and clinical resources, however, we must limit the number of students in our clinical clerkships. Therefore, applications for transfer to the third year are considered on a space-available basis.

Deadline for application is April 1 of the year of transfer. A nonrefundable application fee of \$40.00 is required. Applicants must provide medical school transcripts, and if accepted, must pass Part I of the USMLE at their current institution. Available spaces may be filled by the

Admissions Committee based upon the entire content of an application, or they may request additional information including letters of recommendation and a personal interview. All applicants for transfer must meet the usual requirements for admission, as well as satisfactorily completing the equivalent of two years of study at the medical school. Applicants will be notified of the Admissions Committee's decision starting April 30.

### **Program of Study**

**Doctor of Medicine.** The curriculum for the M.D. degree is normally a four-year program that provides comprehensive training for the practice of medicine, and provides a blend of basic sciences training and clinical experience. Although the emphasis during the first two years is on the basic-science foundations of medicine, medical students are introduced to patient care during their very first quarter of study, reflecting the school's commitment to the training of highly skilled clinicians. Several volunteer clinics, largely staffed by UC Davis medical students, provide an ideal setting for hands-on clinical experience.

**Combined Degree Program.** In addition to the Doctor of Medicine degree, the School of Medicine at Davis offers two formal combined M.D./Ph.D. programs that trains physicians to meet, respond to and solve the broad diversity of problems and dilemmas facing current and future health care.

Meeting this challenge requires those capable of advancing our biological sciences knowledge base, and others who can recognize and solve the ethical, political and humanitarian issues that confront the broad delivery of health care to all. Hence, the field for the Ph.D. in the joint degree program at UC Davis can be any graduate program offered on the Davis campus, extending beyond the traditional biological sciences boundaries, and strongly encouraging candidates to seek degrees in social sciences and humanities. All requirements for both degrees are met in a course of study that usually lasts six years. To be admitted, and be concurrently enrolled in both degree programs, students must apply for separate admission to both the M.D. and Ph.D. programs and obtain permission of the School of Medicine M.D./Ph.D. Advisory Committee. Funding for two com-

---

*Medical students volunteer at Clinica Tepati, one of several such clinics for underserved populations in the Sacramento region.*

### Student Fees: School of Medicine

At the time of registration each quarter, every student must pay the following fees.

*These are the proposed fees for the 1998-99 academic year. Because fees are subject to gubernatorial, legislative and regental action, these fees may change without notice.*

#### Students entering 1998-99

|                                  | Per<br>Quarter    | Annually           |
|----------------------------------|-------------------|--------------------|
| University Registration Fee      | \$238.00          | \$713.00           |
| Educational Fee                  | \$1,029.00        | \$3,086.00         |
| Memorial Union Fee               | \$28.50           | \$85.50            |
| Student Facilities Safety Fee    | \$22.00           | \$66.00            |
| Disability Insurance Fee*        | \$61.00           | \$61.00            |
| Student Services Health Fee      | \$32.00           | \$96.00            |
| Health Insurance**               | \$133.50          | \$400.50           |
| Professional School Fee          | \$1,792.00        | \$5,376.00         |
| <b>Total for Calif residents</b> | <b>\$3,336.00</b> | <b>\$9,884.00</b>  |
| Nonresident Tuition              | \$3,128.00        | \$9,384.00         |
| <b>Total for nonresidents</b>    | <b>\$6,464.00</b> | <b>\$19,268.00</b> |

\* The Disability Insurance Fee applies to medical students only (not interns, residents, or health science academics). The annual disability insurance fee of \$61.00 is assessed fall quarter.

\*\* Students must purchase the Graduate Student Health Insurance Plan unless they are able to prove comparable coverage under another plan.

#### Students previously admitted

The Professional School Fee for students previously admitted to the School of Medicine is as follows:

**1997-98:** \$5,376 per year. Total annual student fees for California residents are \$11,021.50; for non-residents, \$20,405.50.

**1996-97:** \$4,376.00 per year. Total annual student fees for California residents are \$10,021.50; for nonresidents, \$19,405.50.

**1995-96:** \$3,376.00 per year. Total annual student fees for California residents are \$9,021.50 for nonresidents, \$18,405.50.

**PELP students** are considered continuing students.

**Readmitted students** are considered new (entering) students.

petitive fellowships is awarded annually to students enrolled in the M.D./Ph.D. program.

The Sierra Health Foundation M.D./M.B.A. program is designed to attract academically outstanding students who are committed to a career in health care leadership and who want to remain in Northern California.

Selected students will embark upon a six-year course resulting in a degree in Medicine from the UC Davis School of Medicine and an MBA in Health Services Management from the UC Davis Graduate School of Management. Students receive funding for tuition and fees for the full six years of the program.

**Advisory Committee.** Inquiries about admission to graduate education should be directed to the Dean of Graduate Studies, University of California, One Shields Avenue, Davis, CA 95616. For more information concerning the M.D./Ph.D. program, contact Ed Dagang, Office of Student Affairs, Room 126, Medical Sciences 1C, School of Medicine, University of California, One Shields Avenue, Davis, CA 95616.

**Family Nurse Practitioner/Physician Assistant Program.** The Family Nurse Practitioner/Physician Assistant (FNP/PA) credential program educates health care professionals to act as members of a health care team, and improves the availability of culturally relevant primary health care in underserved populations throughout central and northern California. Enrollment in these courses (see Medicine, School of, Department of Family and Community Medicine) is limited to students who are enrolled in the FNP/PA program.

#### Academic Calendar

The School of Medicine operates on a different schedule from the rest of the campus. A detailed academic calendar may be obtained from the Office of Curricular Support, 2427 Tupper Hall, University of California, One Shields Avenue, Davis, CA 95616.

The program is a continuous four-year academic experience, with the first year commencing in fall quarter. A six-week break is scheduled between the first and second year academic schedule following spring quarter. The second year concludes with a three- to four-week period for preparation for USMLE Step 1 examination. The third and fourth year clinical experiences begin in summer and continue through spring.

With approval, students may extend the first two years over three years and use the additional time to individualize their programs. This alternative time is highly suitable for including research experiences and/or meeting other academic objectives. Flexibility in the third and fourth years also permits alternate scheduling.

**SCHOOL OF  
VETERINARY MEDICINE**

---

**SCHOOL OF VETERINARY MEDICINE**

Information:  
School of Veterinary Medicine  
Office of the Dean  
Surge IV  
530-752-1383; <http://www.vetmed.ucdavis.edu>

The mission of the School of Veterinary Medicine is to provide the best possible health care for animals through teaching, research and public service. Students are offered a rigorous four-year program of study that prepares them for diverse career opportunities in veterinary medicine.

**Preparing for the Study of Veterinary Medicine**

To be considered for admission to the School, you must have completed 108 quarter units (72 semester units) in an accredited college or university and have completed the following courses:

| Lower Division Required Sciences             | Quarter Units |
|----------------------------------------------|---------------|
| General Chemistry.....                       | 15            |
| Organic Chemistry.....                       | 6             |
| Physics .....                                | 6             |
| Biological Sciences .....                    | 10            |
| Upper Division Required Sciences             |               |
| Embryology.....                              | 4             |
| Genetics .....                               | 4             |
| Biochemistry .....                           | 3             |
| Physiology.....                              | 5             |
| Required English .....                       | 12            |
| Required Humanities and Social Sciences..... | 12            |
| Required Statistics.....                     | 4             |

(To convert semester units to quarter units, multiply by  $\frac{3}{2}$ . For example, a 4-unit semester course is equivalent to a 6-unit course in the quarter system.)

You should plan your preveterinary medical education carefully. The required courses should be spaced to permit maximum scholastic achievement. An undergraduate major should be selected on the basis of individual interest and aptitude; there is no advantage gained toward admission by selecting one major over another. If you have definite areas of interest within the general field of veterinary medicine, you are encouraged to take courses (for example, computer science, agricultural economics, molecular and biochemical genetics) that will broaden your background in these areas. Some specialized areas include laboratory animal medicine, exotic animal medicine, public health, food animal practice and biomedical research.

**Examinations.** You must take the General Aptitude Test of the Graduate Record Examination (GRE) by September 30th of the year you apply for admission. Applications for the exams and additional information may be obtained from the Educational Testing Service, Box 23470, Oakland, CA 94623-0470. The GRE must be taken within five years of the time you submit your application. The highest scores will be used when the GRE is taken more than once.

**Grade Point Average.** To be considered for admission, you must have a minimum grade point average of 2.50 for both the required sciences and the cumulative grade point average. Applicants who do not meet the mini-

mum grade point average can qualify for admission by receiving GRE scores in the upper 30th percentile for the combined General Aptitude Test scores. Applicants who do not have transcripts with letter grading can qualify for consideration with these same scores or by receiving a bachelor's degree with honors.

**Practical Experience.** Admission to the School requires extensive experience with animals. This experience should entail more than having family pets and should include experience with several animal species if that experience includes activities that gives you an appreciation and understanding of the veterinary profession. The minimum requirement for animal, veterinary and biomedical science experience is 180 hours (4.5 weeks). This experience should also include working with veterinarians, to give you an understanding of the duties and responsibilities of a practitioner and the breadth of veterinary medicine.

**Applying for Admission**

**October 1, 1998** Deadline for filing applications for admission for Fall 1999 to the School of Veterinary Medicine

The Veterinary Medical Colleges Application Service (VMCAS) is the central distribution, collection and processing service for applications to the School of Veterinary Medicine and to other veterinary colleges.

Students are admitted to the School of Veterinary Medicine in the fall only. You may request an application any time after July 15 by writing to the Office of the Dean—Student Programs, School of Veterinary Medicine, University of California, One Shields Avenue, Davis, CA 95616 or by calling 530-752-1383.

Students interested in admission to the School of Veterinary Medicine are urged to request an *Announcement of the School of Veterinary Medicine* at an early date so that all minimum academic requirements and deadlines are met.

Applicants with disadvantaged backgrounds (cultural, economic, social, educational, disabled and other factors) are encouraged to apply to the Veterinary Medical Opportunity Program (VMOP). For further information and advising services, write or call the Office of the Dean—Student Programs (530-752-1383).

**Letters of Evaluation.** Three letters of evaluation are required and are submitted with your VMCAS application. Letters should be requested from those who know you well, who understand academic and professional demands and have had the opportunity to evaluate your personal qualities and potential as a professional person. The evaluator should be willing to write a thorough, comprehensive letter on your behalf.

**Interviews.** Interviews may be requested, as deemed necessary, by the Dean and Admission Committee to obtain additional information. The Dean and Admission Committee may require additional evaluation procedures for selecting candidates for admission.

**Out-of-State and Foreign Applicants.** California residents are given priority for admission to the school. A small number of uniquely qualified applicants who are not California residents may be admitted as nonresidents. The criteria for determining residency are

explained in Residence for Tuition Information in the Appendix of this catalog. Specific questions should be addressed to the Legal Analyst—Residence Matters, 111 Franklin St., 8th Floor, Oakland, CA 94607-5206. No other persons are qualified to give rulings on residency.

If you are from a country other than the United States, you must include a certified English version of your college transcript, and, if English is your second language, the official scores from the Test of English as a Foreign Language (TOEFL) taken within five years of the date when your application is submitted.

## Criteria for Selection

### I. Academic Factors (50-60%)

#### A. College course work:

1. GPA of all undergraduate and graduate course work
2. GPA of required science course work
3. GPA of last two years of college work (minimum of 45 semester units)

#### B. Graduate Record Examination:

1. General Aptitude Test (Verbal, Quantitative and Analytical)

### II. Non-Academic Factors (40-50%)

#### A. Narrative (5-20%)

#### B. Letters of Evaluation (5-20%)

#### C. Interviews (0-20%)

Applicants will also be evaluated for their understanding of the profession and the responsibilities of being a veterinarian, interest in serving the public, maturity, motivation and other qualities necessary for successful academic and professional work.

## Program of Study

**Doctor of Veterinary Medicine.** To receive a Doctor of Veterinary Medicine degree, students must study veterinary medicine for the equivalent of 12 quarters of 12 weeks each (the last six quarters must have been spent in the School of Veterinary Medicine, University of California, Davis). A grade point average of 2.0 (C), computed on all courses taken in the School, is required and students must satisfactorily complete all required work as determined by the faculty of the School.

**Master of Preventive Veterinary Medicine.** Applicants for candidacy to the Master of Preventive Veterinary Medicine (M.P.V.M.) degree program must have completed the Doctorate in Veterinary Medicine or the equivalent; final admission decisions rest with the Admissions Committee, M.P.V.M. program. Application deadline for August admission is March 15. International applicants are encouraged to apply as early as possible.

The M.P.V.M. degree normally takes one year to complete; however, some students may require as much as two years to finish the program. Students who intend to complete the program in one calendar year must begin the program in August. Candidates for the M.P.V.M. degree must satisfactorily complete a total of 40 units of course work while in residence. This includes 27 units of required courses in epidemiology, biostatistics, information management and a minimum of 13 units of approved electives. Students must also complete a research study which culminates in a written report and oral presentation. A committee consisting of three faculty members reviews each paper for acceptability and assigns an appropriate grade.

Application forms and information about the program are available from the Director, M.P.V.M. Program, Office of the Dean, School of Veterinary Medicine, University of California, One Shields Avenue, Davis, CA 95616.

---

*For 50 years,  
the veteri-  
nary school  
has been  
training stu-  
dents to care  
for every-  
thing from  
horses to  
parrots.*

---

**Combined Program.** Students may enroll in the combined D.V.M./M.P.V.M. program in which the M.P.V.M. degree may be awarded by the end of the fall quarter of the fifth year or as soon thereafter as all requirements for both the D.V.M. and M.P.V.M. degrees are completed, allowing students to complete the M.P.V.M. program within six months after normal completion time of the D.V.M. degree, rather than 15 months, as would be the case if taken sequentially.

**Master of Science and Doctor of Philosophy.** General information regarding these degrees will be found in the Announcement of Graduate Studies, available from Graduate Studies, University of California, One Shields Avenue, Davis, CA 95616. For more detailed information, write to the chairperson of the department in which you want to study.

### School of Veterinary Medicine Academic Calendar 1998-99

#### FALL QUARTER 1998

|                                                            |                                   |
|------------------------------------------------------------|-----------------------------------|
| Orientation for 4th-year students                          | Fri., September 4                 |
| Instruction begins for 4th-year students                   | Tues., September 8                |
| Orientation for 1st-year students                          | Wed. and Fri.,<br>Sept. 16 and 18 |
| Instruction begins for 1st-, 2nd- and<br>3rd-year students | Mon., September 21                |
| Thanksgiving Holiday                                       | Thur.-Fri., Nov. 26-27            |
| Instruction ends                                           | Fri., December 11                 |
| Finals end                                                 | Fri., December 18                 |

#### WINTER QUARTER 1999

|                                                            |                   |
|------------------------------------------------------------|-------------------|
| Instruction begins for 4th-year students                   | Mon., January 4   |
| Instruction begins for 1st-, 2nd- and<br>3rd-year students | Mon., January 4   |
| M. L. King Holiday                                         | Mon., January 18  |
| President's Holiday                                        | Mon., February 15 |
| Monday classes meet                                        | Wed., March 17    |
| Instruction ends                                           | Wed., March 19    |
| Finals end                                                 | Friday, March 26  |

#### SPRING QUARTER 1999

|                         |                 |
|-------------------------|-----------------|
| Instruction begins      | Mon., April 5   |
| Student Awards Ceremony | Wed., May 5     |
| Memorial Day Holiday    | Mon., May 31    |
| Instruction ends        | Friday, June 11 |
| Finals end              | Friday, June 18 |
| Commencement            | Friday, June 18 |

### Student Fees: School of Veterinary Medicine

At the time of registration each quarter, every student must pay the following fees.\*

*These are the proposed fees for the 1998-99 academic year. Because fees are subject to gubernatorial, legislative and regental action, these fees may change without notice.*

|                                   | Per<br>Quarter    | Annually           |
|-----------------------------------|-------------------|--------------------|
| University Registration Fee       | \$238.00          | \$713.00           |
| Educational Fee                   | \$1,029.00        | \$3,086.00         |
| Memorial Union Fee                | \$28.50           | \$85.50            |
| Student Health Services Fee       | \$32.00           | \$96.00            |
| Health Insurance**                | \$133.50          | \$400.50           |
| Student Facilities Safety Fee     | \$22.00           | \$66.00            |
| Professional School Fee†          | \$1,334.00        | \$4,000.00         |
| <b>Total for Calif. residents</b> | <b>\$2,817.00</b> | <b>\$8,447.00</b>  |
| Non-Resident Tuition              | \$3,128.00        | \$9,384.00         |
| <b>Total for nonresidents</b>     | <b>\$5,945.00</b> | <b>\$17,831.00</b> |

\* These fees apply to students admitted to the School of Veterinary Medicine in 1998-99, 1997-98 or 1996-97. For students admitted in 1995-96, the Professional School Fee is \$3,000 per year, and total annual student fees for California residents are \$7,447.00; for nonresidents, \$16,831.00.

\*\* Students must purchase the Graduate Student Health Insurance Plan unless they are able to prove comparable coverage under another plan.

† M.P.V.M., Masters, and Ph.D. students do not pay the Professional School Student Fee or Course Materials Fee. These students pay the Graduate Student Fees (see Graduate Studies).

**PELP students** are considered continuing students.

**Readmitted students** are considered new (entering) students.

*Dogs need their teeth cleaned, too; the veterinary school trains doggie dentists to take care of canine canines.*

**PROGRAMS  
& COURSES**

---

**COURSES****Undergraduate Courses****Lower Division Courses**

These courses, **numbered 1–99**, are open to all students for lower division credit, but are designed primarily for freshmen and sophomores.

**Upper Division Courses**

These courses, **numbered 100–199**, are open to all students who have met the necessary prerequisites as indicated in the catalog course description. Preparation should generally include completion of one lower division course in the given subject or completion of two years of college work.

**Variable-Unit Courses**

Subject to approval by the department chair, an instructor may arrange to give a special study course (numbers 90X, 92, 97T, 97TC, 98, 99, 190X, 192, 194H, 197T, 197TC, 198, 199) to interested students.

- **90X/190X (Seminar)** are seminar courses for in-depth examination of a special topic within the subject area.
- **92/192 (Internship)** courses enable individual students to obtain practical experience to complement their educational goals or to explore potential career interests and opportunities. Students must have completed 84 units before enrolling in course 192.
- **97T/197T (Tutoring)** and **97TC/197TC (Tutoring in the Community)** are courses for students who want to tutor in a subject in which they are proficient—generally in their major field—while enrolled as an undergraduate.
- **98/198 (Directed Group Study)** courses are set up on a one-time basis for a group of students in a subject for which no regular courses have been established.
- **99 (Special Study for Undergraduates)** is a course arranged for an individual student who shares with an instructor an academic interest that cannot be accommodated within the formal course structure.
- **194H (Special Study for Honors Students)** courses are for individual students with honor status, as determined by the department offering the course, and who have completed 84 units.
- **199 (Special Study for Advanced Undergraduates)** courses are the upper division counterparts of course 99, and involve supervised independent study and research requiring adequate background in the subject proposed for study as well as prior completion of 84 units.

Credit in courses 99, 194H and 199 is limited to a total of 5 units per term.

**Autotutorial Courses** are courses in which students instruct themselves at their own pace. These courses can be identified by the letters AT on their course numbers, e.g., 13AT, 141AT.

**Research Conference Courses** are courses in which advanced undergraduate students may participate in critical discussions of staff research activities. These one-unit courses are numbered 190C and are graded on a Passed/Not Passed basis.

**Graduate Courses**

Courses **numbered 200–299** are open to graduate students and to undergraduates who have completed 18 units of upper division work basic to the subject matter of the course. However, admission is subject to the approval of the instructor in charge of the course. Grading in 290C courses and variable-unit 299 or 299D courses is Satisfactory/Unsatisfactory.

**Professional Courses for Teachers and Nurse Practitioners**

Courses **numbered 300–399** are teacher-training courses in the Division of Education and in other departments and are especially intended for teachers or prospective teachers. Included are courses designed to provide instruction to teaching assistants. Also included are courses for certification of family nurse practitioners and physician assistants. These courses are open only to students enrolled in those programs.

**Other Professional Courses**

Courses **numbered 400–499** are professional training courses. Graduate students should consult their faculty adviser or contact the Graduate Studies Office before registering in 400 series courses to determine if graduate credit may be awarded for the course in question.

**Prerequisites**

Prerequisites for courses should be noted carefully; the responsibility for meeting these requirements rests on the student. If you can demonstrate that your preparation is equivalent to that specified by the prerequisites, the instructor may waive these requirements for you. However, the prerequisite that requires that you complete 84 units before registering in the course may not be waived.

**COURSE DESCRIPTIONS**

Here is a sample of how a course is listed in this catalog.

**190. Proseminar in Nutrition** (1) I, II, III. The Staff Seminar—1 hour. Prerequisite: senior standing; course 111. Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical and dietetic problems of community, national and international scope. May be repeated for credit with consent of instructor. (P/NP grading only.)

**Top line:** course number; title; units; quarters offered; instructor(s).

**Paragraph following:** course instructional format; prerequisite; course description; grading if other than letter grading.

**Quarters offered:** the quarter in which a course is intended to be given is shown as follows:

- I. Fall Quarter (September to December) or Fall Semester (August to December), School of Law
- II. Winter Quarter (January to March) or Spring Semester (January to May), School of Law
- III. Spring Quarter (April to June)
- IV. Summer Quarter (July to September) for students in the School of Medicine only

**Alternate Year Designation**

Some course descriptions will include the phrase “Offered in alternate years.” If the course number is marked with an asterisk (\*), this indicates that the course *will not* be offered this academic year, but will be offered the following year. If the course number is not marked with an asterisk, this indicates that the course *will* be offered this academic year, but will not be offered the following year.

**Multi-Quarter Courses**

A series of course numbers followed by two or three letters (for example, Physics 110A-110B-110C) is continued through three successive quarters, ordinarily from September to June. The first quarter course listed this way is a prerequisite to the second, and the second is prerequisite to the third. On the other hand, where A and B portions of a course are listed separately (for example, Economics 160A and 160B), the A course is not a prerequisite to B, unless it is specifically mentioned in the list of prerequisites.

**Expanded Course Descriptions**

You may find that, because of space limitations, the descriptions in the *General Catalog* will not include all the information you would like about a course. The faculty has responded to this need by writing the “Expanded Course Descriptions,” giving more detailed explanations about each course offering. These descriptions are available each quarter to assist students in selecting their courses. They contain such information as course goals, texts used, preparation required of students, basis for grading, course format, special assignments (papers, field trips, etc.), and a topical outline of the material to be covered.

Copies of the “Expanded Course Descriptions” are available for on-campus use at the Shields Library Reference and Periodicals desks, the College deans’ offices, advisers’ offices, advising centers, departmental offices, and at The First Resort.

**The course offerings and instructors listed in this catalog are subject to change without notice. For more current quarter offerings and instructors, refer to the *Class Schedule and Room Directory*, available in the UCD Bookstore.**

## African American and African Studies

(College of Letters and Science)

Patricia A. Turner, Ph.D., Director

Program Office, 2201 Hart Hall (530-752-1548)

Moradewun Adejunmobi, Ph.D., Assistant Professor

Bobbie J. Bolden, M.A., Lecturer

Jacob K. Olupona, Ph.D., Professor

Ella Ray, Ph.D., Assistant Professor

John H. Stanfield, II, Ph.D., Professor

John O. Stewart, Ph.D., Professor

Patricia A. Turner, Ph.D., Associate Professor

### Affiliated Faculty

Kristee Haggins, Ph.D., Adjunct Assistant Professor

## The Major Program

The African American and African Studies Program provides courses on the history and culture of African Americans. The program provides students with a multi-disciplinary learning experience. Students in the major take selected courses in other programs and departments that complement courses offered within African American and African Studies. Majors and minors are also encouraged to take advantage of internship programs.

**The Program.** Students are encouraged to combine an examination of African American history and culture in the U.S.A. with African or diaspora studies. The emphasis in African American (U.S.A.) culture includes courses on the history, culture, arts, and literature of African Americans, the patterns of their socio-political and cultural movements, and the struggle with racism as a social and psychological problem. The emphasis in African Studies focuses on the social organization, culture, and religion of West African societies. The diaspora emphasis includes courses on the African heritage in the Americas, Islam in Africa and the Americas, African religion in the diaspora and cinema studies. In addition, students may choose to do special research projects.

**Career Alternatives.** Students completing the African American and African Studies major are well prepared for employment in the Office of Education, human service units, county social service programs, and counseling services. The major is also an appropriate background for work in community organizations like the Urban League, NAACP, Urban Affairs, and Office of Economic Opportunity, or future study in graduate school.

## A.B. Major Requirements:

The major program must be developed in consultation with an African American and African Studies faculty member, and approved by the program's Major Adviser.

UNITS

### Preparatory Subject Matter .....36

African American and African Studies 10...4

Two courses from Anthropology 2; Economics

1A, 1B; Geography 2; Sociology 1; Political

Science 1, 2; Psychology 1.....8

Two courses from Chicana/o Studies 10;

Native American Studies 1, 10; American

Studies 45; Asian American Studies 1, 2

.....8

Two courses from History 17A, 17B, 17C...8

Music 28.....4

One course from Statistics 13, Sociology 46A,

or Psychology 41 .....4

**Depth Subject Matter .....36**

African American and African Studies 101,

110, 133.....12

A coordinated program of upper division

courses, selected and approved in con-

sultation with the major advisers and chosen

to reflect the student's major

emphasis.....24

(These areas of emphasis are offered as

guidelines for students in the major. They

are not the only areas students may

choose for the major.)

*Culture of African American emphasis:*

African American and African Studies

107A, 107B, 153; Anthropology 140A,

140B; History 177A, 177B; Political Sci-

ence 167.

*African emphasis:* African American and

African Studies 110, 162, 171; Anthropol-

ogy 140A, 140B; History 115A, 116;

Political Science 134, 146.

**Total Units for the Major .....72**

**Major Adviser.** E.M. Ray.

## Minor Program Requirements:

UNITS

### African American and African Studies.....24

Select one course from African American and

African Studies 10, 15, or 80.....4

Select five courses from African American

and African Studies 100, 101, 107A, 110,

123, 133, 141, 145A, 145B, 151, 152,

153, 160, 162, 170 .....20

**American History and Institutions.** This University requirement can be satisfied by completion of African American Studies 10, 100. (See also under University requirements.)

### Related Upper Division Courses

The following courses are offered by faculty members in other disciplines and focus on African and African American people and their culture.

Anthropology 104, 139A, 139B, 140, 153; Art History

150; Community and Regional Development 151,

152, 153, 159A, 159B, 172; Dramatic Art 155; Educa-

tion 150; English 179, 181; Geology 125A, 125B; History

102, 115A, 115B, 115C, 116, 177; Music 113B;

Political Science 134, 138, 146, 151, 167, 176; Sociol-

ogy 129, 130.

## Courses in African American and African Studies (AAS)

### Lower Division Courses

#### 10. Introduction to Afro-American Culture and Society (4) I. Turner

Lecture—4 hours. Introduction to the contemporary Black American experience by critically examining historical, political and social and economic factors that have affected the development and status of Afro-American people.

#### 12. Introduction to African Studies (4) II.

Olupona, Adejunmobi

Lecture/discussion—4 hours. Introduction to African Studies which will focus on the various disciplinary perspectives through which African society and culture are generally studied. A survey of methods, resources and conceptual tools for the study of Africa. GE credit: ArtHum, Div, Wrt.

#### 15. Introduction to African American Humanities (4) I. Ray, Stewart

Lecture—3 hours; discussion—1 hour. Introduction to the humanist tradition developed by writers, philosophers, and artists of African descent in the West. Attention given to African sources, as well as European, Caribbean, Latin-American, and North American variations on this tradition. GE credit: ArtHum, Div, Wrt.

#### 16. Verbal and Performance Arts in Africa (4) II.

Adejunmobi, Ray

Lecture/discussion—4 hours. African verbal arts; oral texts from different African cultures. Types of critical response to oral texts, role of oral artists, context and esthetics of oral performance in Africa. GE credit: ArtHum, Div, Wrt.

#### 17. Women in African Societies (4) I.

Adejunmobi

Lecture/discussion—4 hours. Gender relations in traditional and contemporary African society. Involvement of African women in politics, religion, the economy, the arts. African responses to feminist theory. Images of women in African literature. GE credit: Div, Wrt.

#### 50. Black Images in Popular Culture (4) III.

Turner

Lecture—2 hours; discussion—2 hours. A survey of the depictions of Blacks in popular culture (popular press, stage, radio, film, television, advertising) from the middle of the sixteenth century to the present. GE credit: ArtHum, Div, Wrt.

#### 51. History of Afro-American Dance (4) III.

Wynn-Bolden

Lecture—2 hours; discussion—2 hours. Evolution of African American dance, tracing its history and development from West Africa through the Caribbean and to the United States. Investigates the social relevance of African American dance and the artistic merits and contributions of African American choreographers and performers.

#### 52. African Traditional Religion (4) II. Olupona

Lecture—2 hours; discussion—2 hours. Introduction to the traditional religions of the sub-Saharan African peoples: emphasis on myths, rituals and symbols in West, East, Central and South African indigenous religions. Examines themes such as sacred kingship, divination system, women, prophecy, conversion and adaptation to Islam and Christianity. GE credit: ArtHum, Div, Wrt.

#### 54. University Gospel Choir (2) I, II, III. Lymus,

Stewart

Rehearsal—4 hours. Prerequisite: consent of instructor; open to any student in the university. Rehearsal, study, and performance of Gospel music. May be repeated for credit. (Same course as Music 54.) (P/NP grading only.)

#### 80. Introduction to Black Politics (4) III.

The Staff

Lecture—4 hours. Introduction to the analysis of Afro-American politics, using conceptual frameworks from political science and other social sciences. GE credit: SocSci, Div, Wrt.

#### 99. Special Study for Undergraduates (1-5) I, II,

III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

#### 100. Survey of Ethnicity in the U.S. (4) II. Turner

Lecture—4 hours. The history, culture, philosophy, and current problems of groups considered ethnic minorities in the United States as viewed by the groups themselves. GE credit: ArtHum, Div.

**101. Introduction to Research in the****Afro-American Community (4) III.** The Staff

Lecture—4 hours. Prerequisite: course 10 or consent of instructor. Introductory survey of Afro-American Studies methods and techniques; problems and methodology in Afro-American Studies.

**107A. African Descent Communities and Culture in the Caribbean and Latin America (4)**

I. Stewart, Ray

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: upper division standing. Origin and development of African descent communities and culture in the Caribbean and Latin America: (a) the evidence for pre-Columbian arrivals; (b) the African slave trade and its aftermath; (c) the emergence of the African-creole cultures. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**107B. African Descent Communities and Culture in North America (4) I.** Stewart, Ray

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: upper division standing. Origin and development of African descent communities and culture in the U.S.A., Canada, and Mexico from the African slave trade to contemporary urban society. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**107C. African Descent Communities and Culture in Europe and Asia (4) I.** Stewart, Ray

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: upper division standing. The study of early African kingdoms, their relationship with Europe and Asia, and the development of African descent communities and culture in Europe and Asia from the pre-Columbian to the post-colonial era. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**110. West African Social Organization (4) II.**

Olupona, Adejunmobi

Lecture—4 hours. Prerequisite: course 101 or consent of instructor. Ecology, population, social organization, and survival culture of West Africa in the pre-colonial, colonial, and post-colonial periods. GE credit: SocSci, Div.

**111. Cultural Politics in Contemporary Africa (4) II.** Adejunmobi

Adejunmobi

Lecture/discussion—4 hours. Prerequisite: upper division standing or course 12. Themes and style of new cultural forms in Africa as displayed in art, music, film and writing, especially in regard to blending of indigenous and foreign influences. Social and political forces shaping contemporary cultural expression. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**123. The Black Female Experience in Contemporary Society (4) III.** Ray

Lecture—4 hours. Prerequisite: upper division standing or consent of instructor. Black female social, intellectual, and psychological development. Black women's contributions in history, literature, and social science; life experiences of Black women and philosophical underpinnings of the feminist movement. GE credit: ArtHum, Div.

**130. Education in the African American Community (4) I.** The Staff

The Staff

Lecture—2 hours; discussion—1 hour; fieldwork—3 hours. Prerequisite: course 10 or 100, and completion of the Subject A requirement. Examination of the history of the education of African Americans in the United States. Examination and critique of contemporary theories concerning the schooling of African Americans. (Former course 140.)

**133. The Black Family in America (4) III.** Ray

Lecture—4 hours. Prerequisite: upper division standing or consent of instructor. Analysis of social science research to examine relationship between Black family structures, patterns of functioning, and political, economic, and social conditions. Examination of role differentiation within families by race and social class. GE credit: SocSci, Div.

**141. Psychology of the African American Experience (3) III.** Haggins

Haggins

Lecture—2 hours; discussion—1 hour. Prerequisite: course 10 or consent of instructor. Introduction to the psychological issues faced by African Americans. Analysis of issues from European/Western and Afro-centric frame of reference. Emphasis on Optimal Theory, a psychological theory based on an Afrocentric world view.

**145A. Black Social and Political Thought (4) III.** The Staff

Lecture—4 hours. Prerequisite: course 10 or 80, or consent of instructor. Exploration and analysis of Black social and political thought in the Americas. GE credit: SocSci, Div.

**145B. Black Intellectuals (4) III.** The Staff

Lecture—4 hours. Prerequisite: course 10, 80, 145A, or consent of instructor. Exposition and critical analysis of selected theoretical writings of Black intellectuals, and especially political and social thinkers, in the Americas. GE credit: SocSci, Div.

**\*150A. The Afro-American Visual Arts Tradition: A Historical and Cultural Study (4) I.** The Staff

Lecture—4 hours. Prerequisite: upper division standing. Afro-American visual arts tradition, folk and formal, in historical and cultural context, from 1600 through Reconstruction. GE credit: ArtHum, Div.

**\*150B. The Afro-American Visual Arts Tradition: A Historical and Cultural Study (4) II.** The Staff

Lecture—4 hours. Prerequisite: upper division standing. Afro-American visual arts tradition, folk and formal, in historical and cultural context, from Reconstruction to present. GE credit: ArtHum, Div.

**151. Afro-American Vernacular Music and Verbal Arts (4) III.** Turner

Turner

Lecture—2 hours; discussion—2 hours. Socio-political dimensions of Afro-American musical forms like spiritual, work song, minstrelsy blues, rhythm and blues, jazz, gospel, soul and contemporary pop, and related verbal arts like preaching, toasting, rapping.

**152. Major Voices in Black World Literature (4) II.** Stewart

Stewart

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: upper division standing, completion of course 15 or comparable course in literature or the humanities. The recurrence of cultural tropes in the works of major black world authors and formation of an African-oriented canon. Principal activities include critical reading and the discovery of literature as a cultural resource. GE credit: ArtHum, Div, Wrt.

**154. University Gospel Choir (2) I, II, III.** Lymus, Stewart

Lymus, Stewart

Rehearsal—4 hours. Prerequisite: consent of instructor; open to any student in the university. Rehearsal, study, and performance of Gospel music. May be repeated for credit. (Same course as Music 154.) (P/NP grading only.)

**155A. African American Dance and Culture in the United States, Brazil and the Caribbean (4) II.** Bolden

Bolden

Lecture/discussion—4 hours. A comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as Dramatic Art 155A.)

**156. Language and Identity in Africa and the African Diaspora (4) III.** Adejunmobi

Adejunmobi

Lecture/discussion—4 hours. Prerequisite: upper division standing or course 12. Relationship between language and identity in literature from Africa and the African Diaspora. Use of pidgins, Creoles, translation from African languages and impact of language policies. GE credit: Div.

**157. Literature and Society in South Africa (4) III.** Adejunmobi

Adejunmobi

Lecture/discussion—4 hours. Prerequisite: upper division standing or course 12. Political and social developments in 20th-century South Africa as illustrated by a range of South African writing. Response of different writers to race relations, impact of government policy on types of context of writing. Offered in alternate years. GE credit: Div, Wrt.

**160. African American Folklore (4) III.** Turner

Turner

Lecture—2 hours; discussion—1 hour; fieldwork—3 hours. Prerequisite: course 10. Theory and history of African American folklore and folklife, including music, material culture, oral narrative, proverbs, and humor. African and Caribbean cultural influences on New World folk genres will be probed. GE credit: ArtHum, Div.

**162. Islam in Africa and the Americas (4) III.** Olupona

Olupona

Lecture—3 hours; discussion—1 hour. Prerequisite: course in African American or Religious Studies, preferably course 12 or 110 or Religious Studies 60. A comparative and historical survey of Islam in the regional and cultural settings of Sub-Saharan Africa and the Americas. GE credit: ArtHum, Div, Wrt.

**163. African Religions in the Americas (4) III.** Olupona

Olupona

Lecture—2 hours; discussion—2 hours. Prerequisite: course 10; course 15 or consent of instructor. Comparative study of African religious heritage in the Americas: Jamaica, Trinidad, Cuba, U.S.A., Haiti, and Brazil. Emphasis on the origins and development of Candomble, Santeria, Shango, Vodun, and Rastafarianism in the New World. (Former course 153.) GE credit: ArtHum, Div, Wrt.

**170. African American Film and Video (4) II.** Ray and staff

Ray and staff

Lecture/discussion—2 hours; term paper; film viewing—2 hours. Prerequisite: one of courses 15, 50, or English 160, or 162. A comparative approach in the study of fictional film and video produced and directed by African Americans, drawing on the social sciences and black feminist theory to examine and discuss selected works. GE credit: ArtHum, Div, Wrt.

**171. Black African and Black European Film and Video (4) III.** Ray and staff

Ray and staff

Lecture/discussion—2 hours; term paper; film viewing—2 hours. Prerequisite: one of courses 15, 50, or English 160 or 162. A comparative approach in the study of dramatic films and videos that treat black life in Africa and Europe. Critical attention will focus on the imaginative construction of ethnicity, race, nationality, gender, and sexuality in each particular work. GE credit: ArtHum, Div.

**190. Topics in African and African-Diaspora Studies (4) III.** The Staff

The Staff

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing in African American and African Studies or consent of instructor. Intensive treatment of a special topic or problem in African or African Diaspora Studies. May be repeated once for credit when topic differs.

**192. Internship in African American and African Studies (1-8) I, II, III.** The Staff

The Staff

(Chairperson in charge)

Internship—3-24 hours. Prerequisite: upper division standing, completion of 12 units of upper division study in African American and African Studies courses and consent of instructor. Enrollment limited to African American and African Studies majors and minors. Supervised internship in community, government, or private institutions, in all subject areas offered by the African American and African Studies Program. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**197T. Tutoring in Afro-American Studies (1-5) I, II, III.** The Staff

The Staff

(Chairperson in charge)

Tutoring—1-5 hours. Prerequisite: consent of major committee; upper division standing with major in Afro-American Studies. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

**198. Directed Group Study (1-5) I, II, III.** The Staff

The Staff

(Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5) I, II, III.** The Staff

The Staff

(Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

## Agricultural and Environmental Chemistry (A Graduate Group)

David S. Reid, Ph.D., Chairperson of the Group  
Group Office, 111 Cruess Hall (530-752-1415)

**Faculty.** Includes members from various departments in the Colleges of Agricultural and Environmental Sciences, Engineering, and Letters and Science, and the Schools of Medicine and Veterinary Medicine.

**Graduate Study.** The Graduate Group in Agricultural and Environmental Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees. Study relates to the chemical and biochemical aspects of foods, wine, fibers/polymers, pesticides, and environmental pollution. Detailed information regarding graduate study may be obtained by writing the Group Chairperson.

**Graduate Advisers:** D.O. Adams (*Viticulture and Enology*), C.F. Shoemaker (*Food Science and Technology*), Y.-L. Hsieh (*Textiles and Clothing*), T. Shibamoto (*Environmental Toxicology*), R.J. Zasoski (*Land, Air, and Water Resources*).

### Courses in Agricultural and Environmental Chemistry (AGC)

#### Graduate Courses

**290. Seminar** (1) I, II, III. The Staff (Chairperson in charge)  
Seminar—1 hour. Selected topics in agricultural and environmental chemistry, presented by students. (S/U grading only.)

**\*298. Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: consent of instructor. The chemistry and biochemistry of foods, nutritional chemicals, pesticides, and other special topics as they apply to agricultural and environmental chemistry.

**\*299. Research** (1-12) I, II, III, summer. The Staff (Chairperson in charge)  
Arrangements should be made well in advance with a faculty member of the Group in Agricultural and Environmental Chemistry. (S/U grading only.)

## Agricultural and Managerial Economics

(College of Agricultural and Environmental Sciences)

### The Major Program

The major in agricultural and managerial economics teaches students to apply economics and quantitative principles to problems in agricultural production, management, and marketing.

**The Program.** Each student must specialize in at least one of three options: agricultural economics, which focuses on topics related to the production and marketing of foods and fibers; environmental and resource economics, which focuses on issues related to use of resources and environmental quality; or managerial economics, which focuses on topics related to evaluating, financing, and managing business activities.

**Internships and Career Alternatives.** Students in agricultural and managerial economics have opportunities to gain additional career information and preparation through internships in a variety of private business and governmental agencies. Graduates qualify for supervisory and management training positions in farm and ranch production, food and agricultural processing, agricultural sales and service, banking, finance, commodity and stock brokerages in the private sector, and a variety of agency career positions in local, state, and federal government. Students who desire additional training are well qualified to enter graduate programs in agricultural economics, economics, business administration, or law.

### B.S. Major Requirements:

(For convenience in program planning, the *usual* courses taken to satisfy the requirements are shown in parentheses. Equivalent or more comprehensive courses are acceptable. *Courses shown without parentheses are required.*)

#### UNITS

**English Composition Requirement.....4-12**  
See College requirement .....0-8  
Additional English (English 1, 3, 18, 19, 101, 104A, 104B, 104C, 104D, or 104E) ...3-4

**Preparatory Subject Matter .....65-68**  
Accounting (Management 11A-11B) .....8  
Computer Science (Agricultural Systems and Environment 21, Computer Science Engineering 10, 15 or 30, Engineering 5)...3-4  
Economic principles (Economics 1A-1B)...10  
Calculus (Mathematics 16A-16B or 21A-21B) .....6-8  
Statistics (Statistics 13, 103) .....8  
Social Science, Natural Science, Agricultural Science .....40  
(See undergraduate handbook in Department Advising Office for complete list of courses.)

**Breadth/General Education.....6-24**  
*Note:* Approved General Education courses may be used to simultaneously satisfy Social, Natural, and Agricultural Science courses as defined in the Preparatory Subject Matter for the major and the campus General Education requirement.

**Depth Subject Matter .....19-21**  
Students graduating with this major are required to attain at least a C average (2.0) in all upper division courses taken at the University in the depth subject matter.

Micro theory, Agricultural and Resource Economics 100A, 100B .....8  
Quantitative methods, Agricultural and Resource Economics 106, 155 .....8  
Macro theory, Economics 101 or 105 .....4-5

**Restricted Electives .....32**  
Choose at least one of the options below

**Agricultural Economics** option  
Choose at least 15 units from Agricultural and Resource Economics 120, 130, 132, 138, 139, 140, 145, 150. Select the remaining 13 units from the aforementioned courses, Agricultural and Resource Economics 18, or upper division courses in Agricultural and Resource Economics and/or Economics.

**Environmental and Resource Economics** option  
Agricultural and Resource Economics 175, 176.

Choose at least 18 units from Agricultural and Resource Economics 15, 120, 138, 145, 146, 150, 156, Economics 123, 125, 130, Environmental Science and Policy 168A, 168B, 178. Select the remaining 8 units from the aforementioned courses or upper division courses in Agricultural and Resource Economics and/or Economics, Environmental Science and Policy 160,

161, 163, 165, 166, 167, 171, 172, 173, Environmental Toxicology 138.

**Managerial Economics** option  
Agricultural and Resource Economics 18.  
Choose at least 12 units from Agricultural and Resource Economics 112, 118, 136, 157, 171A, 171B. Select the remaining 16 units from the aforementioned courses or from Agricultural and Resource Economics 120, 130, 132, 138, 139, 140, 143, 144, 145, 146, 150, 156, 175, 176, 194HA-194HB, Economics 121A, 121B, 151A, 151B, 160A, 160B, Political Science 174, 188.

**Unrestricted Electives .....37-48**  
**Total Units for the Degree.....180**

**Advising Center** for the major is in 1176 Social Sciences and Humanities Building (530-752-6185).

**Major Adviser.** R. Green (*Agricultural and Resource Economics*).

### Minor Program Requirements:

The Department of Agricultural and Resource Economics offers four minor emphases open to students majoring in other disciplines who wish to complement their study programs with a minor in Agricultural and Managerial Economics. Each emphasis requires Agricultural and Resource Economics 100A, which has prerequisites of Economics 1A-1B and Mathematics 16A-16B. For some courses, Statistics 13 and 103 may be required. Variable-unit courses are not accepted for any emphasis.

#### UNITS

#### Agricultural and Managerial Economics.....18

**General** emphasis  
Agricultural and Resource Economics 100A or the equivalent .....4  
Additional upper division courses in Agricultural and Resource Economics .....14

**Agricultural Economics** emphasis  
Agricultural and Resource Economics 100A or the equivalent .....4  
Additional upper division courses in Agricultural and Resource Economics .....14  
Select 9 or more units from Agricultural and Resource Economics 120, 130, 132, 138, 139, 140, 145, 150.

Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

#### Environmental and Natural Resource

**Economics** emphasis  
Agricultural and Resource Economics 100A or the equivalent .....4  
Additional upper division courses in Agricultural and Resource Economics .....14  
Select 9 or more units from Agricultural and Resource Economics 175 and 176, and either 100B or 120.

Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

#### Managerial Economics

emphasis  
Agricultural and Resource Economics 100A or the equivalent .....4  
Additional upper division courses in Agricultural and Resource Economics .....14  
Select 9 or more units from Agricultural and Resource Economics 112, 118, 136, 157, 171A, 171B.

Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

**Graduate Study.** See the Graduate Studies section in this catalog.

**Major Advisers.** See the *Class Schedule and Room Directory*.

**Related courses.** See Environmental Biology and Management 110; Environmental Science and Policy 160, 168A, 168B, 173; and courses in Economics.

## Courses in Agricultural and Resource Economics (ARE)

### Lower Division Courses

#### \*1. Economic Basis of the Agricultural Industry (4)

Lecture—4 hours. Agriculture and man; the agricultural industry in U.S. and world economies; production and supply, marketing and demand; agricultural land, capital and labor markets; economic and social problems of agriculture in an urban and industrialized economy emphasizing California. GE credit: SocSci.

#### 15. Population, Environment and World Agriculture (4) I. Jarvis

Lecture—3 hours; discussion—1 hour. Economic analysis of interactions among population, environment, natural resources and development of world agriculture. Introduces students to economic thinking about population growth, its causes and consequences for world food demand, and environmental and technological limits to increasing food supplies. GE credit: SocSci, Div, Wrt.

#### 18. Business Law (4) I, III. Alcauskas; summer. The Staff

Lecture—4 hours. Prerequisite: sophomore standing. General principles of business law in the areas of contracts, business organization, real property, uniform commercial code, sales, commercial paper, employment relations, and creditor-debtor against a background of the history and functioning of our present legal system.

#### \*49A-49B-49C. Field Practice (1) I, II, III.

Discussion—1 hour; three field trips. Prerequisite: consent of instructor. Field trips and experiences to observe the various management aspects of Agricultural Production. Emphasis will be placed on developing the student's understanding and awareness of economics and management and their application in agricultural production. (P/NP grading only.)

#### 98. Directed Group Study

(1-5) I, II, III. The Staff (Chairperson in charge) Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5) I, II, III.** The Staff (Chairperson in Charge) Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

#### 100A. Intermediate Microeconomics: Theory of Production and Consumption (4) I. Holloway, Holloway; II. Carman; III. Farzin

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A, 1B; Mathematics 16B. Theory of individual consumer and market demand; theory of production and supply of agricultural products, with particular reference to the individual firm; pricing, output determination, and employment of resources under pure competition. (Not open for credit to students who have completed Economics 100 or the equivalent; however, Economics 100 will not serve as prerequisite to course 100B.)

#### 100B. Intermediate Microeconomics: Imperfect Competition, Markets and Welfare Economics (4) I. Martin; II. Sexton; III. Caputo

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A. Pricing, output determination, and employment of resources under conditions of monopoly, oligopoly, and monopolistic competition.

#### 106. Quantitative Methods in Agricultural Economics (4) I. Green; II. Taylor; III. Chalfant

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A, Statistics 103. Statistical methods for analyzing quantitative agricultural economics data: linear and multiple correlation and regression analysis.

#### 112. Fundamentals of Business Organization (4) I. Butler; III. Faber; summer. The Staff

Lecture—2 hours; discussion—2 hours. Prerequisite: upper division standing or consent of instructor. The role of organizational design and behavior in business and public agencies. Principles of planning, decision making; individual behavior, motivation, leadership; informal groups; conflict and change in the organization.

#### 113. Fundamentals of Marketing Management (4) I. Butler

Lecture—4 hours. Prerequisite: Economics 1A. For non-majors only. Nature of product marketing by the business firm. Customer-product relationships, pricing and demand; new product development and marketing strategy; promotion and advertising; product life cycles; the distribution system; manufacturing, wholesaling, retailing. Government regulation and restraints. (Not open for credit to students who have completed course 136.)

#### 115A. Economic Development (4) I. Rozelle; II. The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A and 1B. Major issues encountered in emerging from international poverty, problems of growth and structural change, human welfare, population growth and health, labor markets and internal migration. Important issues of policy concerning international trade and industrialization. (Same course as Economics 115A.) GE credit: SocSci, Div.

#### 115B. Economic Development (4) III. Woo (Economics)

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A and 1B. Major macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries. (Same course as Economics 115B.) GE credit: SocSci.

#### 118. Tax Management (4) III. Butler

Lecture—4 hours. Prerequisite: Management 11A, 11B; course 18 recommended. Development and application of a framework to understand the tax effects of typical management decisions on both entities and their owners. Impacts that different methods of taxation have on business entities with emphasis on tax planning, using income and deduction strategies, retirement plans, and choice of business entity for tax minimization.

#### 120. Agricultural Policy (4) II. Sumner

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A or the equivalent. Analytical treatment of historical and current economic problems and governmental policies influencing American agriculture. Uses of economic theory to develop historical and conceptual understanding of the economics of agriculture; how public policy influences the nature and performance of American agriculture. GE credit: SocSci.

#### 130. Agricultural Markets (4) III. L. Butler

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A. The nature, function, organizational structure, and operation of agricultural markets; prices, costs, and margins; market information, regulation, and controls; cooperative marketing.

#### 132. Cooperative Business Enterprises (3) I. Lang

Lecture—3 hours. Prerequisite: Economics 1A. Study of cooperative business enterprise in the United States and elsewhere; economic theories of behavior, principles of operation, finance, decision-making, and taxation.

#### 136. Managerial Marketing (4) II. Carman

Lecture—4 hours. Prerequisite: course 100A; Statistics 103. Application of economic theory and statistics in the study of marketing. Marketing measurement and forecasting, market planning, market segmentation, determination of optimal product market mix, sales and cost analysis, conduct of marketing research, marketing models and systems.

#### 138. International Commodity and Resource Markets (3) III. Williams

Lecture—3 hours. Prerequisite: course 100A, Economics 100 or 104. Basic nature and scope of international trade in agricultural commodities, agricultural inputs, and natural resources. Market dimensions and policy institutions. Case studies to illustrate import and export problems associated with different regions and commodities.

**139. Futures and Options Markets** (3) I. Carter  
Lecture—3 hours. Prerequisite: course 100A; Statistics 103. History, mechanics, and economic functions of futures and options markets; hedging; theory of inter-temporal price formation and behavior of futures and options prices; price forecasting; futures and options as policy tools.

**140. Farm Management** (5) II. The Staff  
Lecture—5 hours. Prerequisite: Economics 1A. Farm organization and resources; economic and technological principles in decision making; analytical techniques and management control; problems in organizing and managing the farm business.

**142. Personal Finance** (3) I. Shepard; II. Butler; summer. The Staff  
Lecture—3 hours. Prerequisite: Economics 1B. Management of income and expenditures by the household. Use of consumer credit, savings, and insurance by households. Principles of tax, retirement, and estate planning.

**143. Investments** (3) II. Shepard  
Lecture—3 hours. Prerequisite: course 142 or consent of instructor. Survey of investment institutions, sources of investment information, and portfolio theory. Analysis of the stock, bond and real estate markets from the perspective of the investor.

**144. Real Estate Economics** (3) III. Shepard  
Lecture—3 hours. Prerequisite: course 100A. The economic theory, analysis, and institutions of real estate markets and related financial markets. Case studies drawn from the raw land, single family, multi-family, industrial and office real estate markets.

**145. Farm and Rural Resources Appraisal** (4) III. Johnston  
Lecture—3 hours; laboratory—3 hours; field trip. Principles of farm and ranch appraisal; land utilization in relation to problems of development and valuation. Real estate instruments and elements of real estate finance.

**146. Government Regulation of Business** (3) II. Goodhue  
Lecture—3 hours. Prerequisite: course 100A or the equivalent. Variety, nature and impact of government regulation: anti-trust laws and economic and social regulation. Nature of the legislative process, promulgation of regulations, and their impact, especially as analyzed by economists. GE credit: SocSci.

**147. Resource and Environmental Policy Analysis** (3) II. The Staff  
Lecture—3 hours. Prerequisite: Economics 1A; enrollment open to non-majors only. Natural resource use problems with emphasis on past and current policies and institutions affecting resource use; determinants, principles, and patterns of natural resource use; property rights; conservation; private and public resource use problems; and public issues. (Students who have had or are taking course 100A, Economics 100, or the equivalent, may receive only 2 units of credit, so must enroll in course 147M instead.) GE credit: SocSci.

**147M. Resource and Environmental Policy Analysis** (2) II. The Staff  
Lecture—3 hours. Prerequisite: Economics 1A; enrollment open to non-majors only. Natural resource use problems with emphasis on past and current policies and institutions affecting resource use; determinants, principles, and patterns of natural resource use; property rights; conservation; private and public resource use problems; and public issues. (Students who have had or are taking course 100A, Economics 100, or the equivalent, must enroll in this course (for 2 units) rather than course 147.)

**150. Agricultural Labor** (4) I. Martin  
Lecture—3 hours; discussion—1 hour. Importance of family and hired labor in agriculture; farm labor market; unions and collective bargaining in California agriculture; simulated collective bargaining exercise; effects of unions on farm wages and earnings. GE credit: SocSci, Div, Wrt.

**155. Quantitative Analysis for Business Decisions** (4) I, II. The Staff; III. Howitt  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A; Statistics 103. Introduction to selected top-

ics in management science and operations research: decision analysis for management, mathematical programming, competitive analysis, and others.

**156. Introduction to Mathematical Economics** (4) I. Holloway  
Lecture—4 hours. Prerequisite: courses 100A and 155; Mathematics 16C or 21C recommended (students should note that the formal mathematical content of this course is higher than other courses in the curriculum). Linear algebra for economists; necessary and sufficient conditions in static optimization problems; implicit function theorem; economic methodology and mathematics; comparative statics; envelope theorem; Le Chatelier principle; applications to production and consumer models.

**157. Analysis for Production Management** (4) III. Carman  
Lecture—4 hours. Prerequisite: course 100A; Statistics 103. Application of economic theory and quantitative methods in analyzing production management problems including inventory control, production scheduling, quality control, simulation, systems approach, and work measurement.

**171A. Financial Management of the Firm** (4) I. The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 106; Management 11A-11B. Financial analysis at the firm level: methods of depreciation; influence of the tax structure; inventory, cash, and accounts receivable management; sources of short-term and long-term financing, and financial problem solving using a computer spreadsheet program. (Students who have had or are taking Economics 134 may not receive credit for this course.)

**171B. Financial Management of the Firm** (4) II. The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 171A. Financial analysis at the firm level: methods of capital budgeting; calculating the cost of capital; dividend policies; mergers and acquisitions; and special current topics in finance.

**175. Natural Resource Economics** (3) III. Farzin  
Lecture—3 hours. Prerequisite: course 100B or Economics 100 or the equivalent. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations), and non-renewable resources (minerals and energy resources, soil). (Same course as Environmental Science and Policy 175.) GE credit: SocSci.

**176. Environmental Economics** (3) II. Larson  
Lecture—3 hours. Prerequisite: course 100B or Economics 100 or the equivalent. Analytical treatment of the role of the environment in economic activity and methods for protecting and enhancing environmental quality; implications of market failures for public policy; design of environmental policy; theory of welfare measurement; measuring the benefits of environmental improvement. GE credit: SocSci.

**192. Internship** (1-6) I, II, III, summer. The Staff (Chairperson in charge)  
Internship—3-18 hours. Internship experience off and on campus in all subject areas offered in the Department of Agricultural and Resource Economics. Internships are supervised by a member of the staff. (P/NP grading only.)

**194HA-194HB. Special Study for Honors Students** (3-3) I-II. Martin  
Independent study—2 hours; seminar—1 hour. Prerequisite: course 100B; 106 or 155. The remaining course (106 or 155), if any, may be taken concurrently with 194HB. Open to seniors majoring in Agricultural and Managerial Economics with a minimum GPA of 3.50. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of course.)

**197T. Tutoring in Agricultural Economics** (1-3) I, II, III. The Staff (Chairperson in charge)  
Hours and duties will vary depending upon the course being tutored. Prerequisite: senior standing in Agricultural and Resource Economics and consent of Department Chairperson. Tutor will lead small discus-

sion groups affiliated with one of the department's regular courses, under the supervision of, and at the option of the instructor in charge of the course. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate Courses

**200A. Microeconomic Theory** (5) I. The Staff (Economics)  
Lecture—4 hours; discussion—1 hour. Prerequisite: graduate standing. Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer. (Same course as Economics 200A.)

**200B. Microeconomic Theory** (5) II. Helms (Economics)  
Lecture—4 hours; discussion—1 hour. Prerequisite: course 200A. Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failures. (Same course as Economics 200B.)

**200C. Microeconomic Theory** (5) III. Makowski (Economics)  
Lecture—4 hours; discussion—1 hour. Prerequisite: course 200B. Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed. (Same course as Economics 200C.)

**202A. Introduction to Applied Research Methods** (3) I. Taylor  
Lecture/discussion—3 hours. Prerequisite: courses 204 and 256, or the equivalent; 200A concurrently. Study of philosophy and methodology of applied research in agricultural economics. Methods of conceptualization of researchable topics. Method of communication and constructive criticism.

**202B. Applied Microeconomics I: Consumer and Producer Behavior** (3) II. Morrison  
Lecture/discussion—3 hours. Prerequisite: courses 200A and 202A; course 200B concurrently. Application of consumer and producer theory in models of individual behavior and market-level phenomena. Implications of consumer and producer theory for specification of empirical models of supply and demand for inputs and outputs and market equilibrium displacement models.

**202C. Applied Microeconomics II: Welfare Analysis and Imperfect Competition** (3) III. Goodhue  
Lecture/discussion—3 hours. Prerequisite: course 202B; course 200C concurrently. Methods of applied welfare economics with emphasis on problems arising in agriculture and the environment. Models of imperfectly competitive markets and their application to industries and institutions in the agricultural sector.

**204. Microeconomic Analysis** (5) I. Sexton  
Lecture—4 hours; discussion—1 hour. Prerequisite: Economics 100 or courses 100A-100B and Mathematics 16A-16B; open to advanced undergraduates with consent of instructor. Economic reasoning and social choice: behavior of firms and households, theory of markets, partial and general equilibrium analysis, welfare economics, illustrations and applications. (Same course as Economics 204.)

**214. Development Economics** (4) I. Rozelle (in charge), Jarvis, Taylor  
Lecture—4 hours. Prerequisite: course 100A, 100B, Economics 101; course 204 and Economics 160A, 160B recommended. Review of the principal theoretical and empirical issues whose analysis has formed development economics. Analysis of economic development theories and development strategies and their

application to specific policy issues in developing country contexts. (Same course as Economics 214.)

**215A. Agriculture and Economic Development** (4) I. Taylor (in charge), Jarvis, Rozelle  
Lecture—3 hours; discussion—1 hour. Prerequisite: courses 200A or 204 and 214. Agricultural development theory and application. Analysis of rural-urban linkages and their role in economic development, food price policy, and interactions between economic development and the environment. Analytical focus on household-farm and intersectoral models. (Same course as Economics 215A.)

**215B. Open Macroeconomics of Development** (4) II. Kaneda (Economics)  
Lecture—3 hours; discussion—1 hour. Prerequisite: courses 200A or 204, 200D or 205, and 214 or 215A. Models and policy approaches regarding trade, monetary and fiscal issues, capital flows and debt are discussed in the macroeconomic framework of an open developing country. The basic analytical focus is real exchange rate and its impact on sectoral allocation of resources. (Same course as Economics 215B.)

**\*215C. Empirical Approaches to Development Analysis** (4) III.  
Lecture—3 hours; discussion—1 hour. Prerequisite: courses 215A, 215B. Extension of development models for policy analysis including Household-Farm models, models of resource allocation under uncertainty. Social Accounting Matrix and Computable General Equilibrium models. Analysis and case studies of methods of project evaluation with and without income-distribution weights. (Same course as Economics 215C.)

**\*215D. Environment and Economic Development** (4) III. Farzin  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A, 204 or 275. Interdisciplinary course drawing on theoretical and empirical research on interactions between environmental resource use and economic development processes. Analysis of issues emerging at the interface of environmental and development economics. (Same course as Economics 215D.)

**221. Agricultural Policy in Developed Countries** (4) II. Sumner  
Lecture/discussion—4 hours. Economic policy, its nature, formation and analysis; characteristics of agricultural sectors in developed countries; comparative analysis of policies relating to production, marketing, price, income, rural poverty, and resource adjustment; international trade policies for temperate zone agricultural commodities.

**\*222. International Agricultural Trade and Policy** (3) II. Carter  
Lecture—3 hours. Prerequisite: course 100B or 204; Economics 160A or the equivalent. Analysis of country interdependence through world agricultural markets. Partial equilibrium analysis is used to study the impacts of national intervention on world markets, national policy choice in an open economy and multinational policy issues. Offered in alternate years.

**240A. Econometric Methods** (4) II. Green  
Lecture—4 hours. Prerequisite: Statistics 133 and a course in linear algebra or the equivalent. Least squares, instrumental variables, and maximum likelihood estimation and inference for single equation linear regression model; linear restrictions; heteroskedasticity; autocorrelation; lagged dependent variables. (Same course as Economics 240A.)

**240B. Econometric Methods** (4) III. Chalfant  
Lecture—4 hours. Prerequisite: course 240A. Topics include analysis of variance, pooled time-series, cross-section estimation, seemingly unrelated regression, classical hypothesis tests, and identification and estimation of simultaneous equation models. (Same course as Economics 240B.)

**240C. Econometric Theory** (4) I. The Staff (Economics)  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 240B. Finite sampling theory; nonlinear and dynamic econometric models; asymptotic distribution theory. (Same course as Economics 240C.)

**240D. Topics in Econometrics** (4) III. The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 240B. Advanced topics in nonlinear econometric modelling. Contents may vary from year to year. (Same course as Economics 240D.)

**252. Applied Linear Programming** (4) II. Howitt  
Lecture—3 hours; discussion—1 hour. Applied linear programming methods emphasizing uses for business decisions: production, diet, blending, network and related problems.

**253. Optimization Techniques with Economic Applications** (4) I. Williams  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 200C. Optimization techniques and methods including linear and nonlinear programming. Empirical applications to household, firm, general equilibrium and economic growth problems.

**254. Dynamic Optimization Techniques with Economic Applications** (4) II. Caputo  
Lecture—4 hours. Prerequisite: course 253 and elementary knowledge of ordinary differential equations. Necessary and sufficient conditions in the calculus of variations and optimal control, economic interpretations, the dynamic envelope theorem and transversality conditions, infinite horizon problems and phase diagrams, local stability and comparative statics of the steady state, comparative dynamics.

**255. Advanced Topics in Economic Dynamics** (3) III. Caputo, Howitt  
Lecture—3 hours. Prerequisite: course 254. Local stability analysis, steady state comparative statics and comparative dynamics, dynamic duality theory and the principle of optimality, differential games, numerical solution of deterministic and stochastic dynamic models using GAMS, stochastic optimal control, plus other advanced topics in economic dynamics. Offered in alternate years.

**256. Applied Econometrics** (4) II. Heien  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 106, Economics 140 or the equivalent, or consent of instructor. Application of statistical tools to economic and business analysis. Emphasis on regression analysis, problems of specification, and model development. (Same course as Economics 256.)

**\*257. Analysis and Applications in Production Economics** (4) III. The Staff  
Lecture—4 hours. Prerequisite: courses 204, 252, and 256 or the equivalent. Micro-level analysis of decision problems in agricultural production processes, e.g., investment, resource conservation, pest management, and irrigation scheduling. Covers static and dynamic models under risk and uncertainty and some aggregate aspects of production.

**258. Demand and Market Analysis** (3) III. Morrison  
Lecture—3 hours. Prerequisite: courses 204 and 256 or consent of instructor. Quantitative and theoretical analysis of the factors affecting supply, demand and price determination for agricultural products. Emphasis on analytical tools for assessing the impacts of changes in government policies and macroeconomic variables.

**\*261. Case Problems in Management** (3) II.  
Lecture—1 hour; discussion—2 hours. Case problem analysis and discussion of business policy and strategy including organization, planning, production, marketing, and financing issues. Emphasis is on problem definition and solution using current examples drawn primarily from agriculturally oriented firms.

**275. Resource and Environmental Economics of Agriculture** (3) III. Weinberg  
Lecture/discussion—3 hours. Prerequisite: course 204/Economics 204. Development of externality theory and market failure in agricultural production; use of discounting, welfare economics, and political economic models in analyzing agricultural public policies; exploration of theory of renewable and nonrenewable resources in agricultural issues.

**276. Institutional and Economic Analysis of Natural Resources** (3) I. Larson  
Lecture—2 hours; discussion—1 hour. Prerequisite: course 204/Economics 204 or consent of instructor. Natural resources are developed and allocated in a milieu of institutional arrangements that significantly affect their economic yields: definition/enforcement of property rights; information and search costs; market externalities, transactions and adjustment costs. Applications to land/water policy.

**\*280. Analysis of Research in Production Economics** (4) II.  
Lecture—3 hours; discussion—1 hour. Current problems and methods of analysis in agricultural production economics research. Emphasizes both firm and industry.

**281. Analysis of Research in Agricultural Marketing** (4) III. Williams  
Lecture—4 hours. Current problems and methods in agricultural market analysis with emphasis on marketing sector firm behavior. Topics include market definition, marketing margins and derived demand, spatial markets, technology analysis, models of imperfect competition, cooperatives, and marketing orders.

**283. Analysis of Research in Natural Resource Economics** (3) III. Wilen  
Lecture—3 hours. Prerequisite: course 254. Scope and disciplinary context of natural resource economics. Recent problems affecting policy and use planning including efficiency and welfare criteria, technological externalities, public goods, extramarket goods, indivisibilities, and intertemporal problems, benefit cost analysis and public and private investment criteria.

**\*284. Applied Demand Analysis** (4) I. The Staff  
Lecture—4 hours. Prerequisite: courses 200A, 240A, and 240B. Issues, techniques and methodology currently used in applied demand analysis. Demand parameter estimates will be used to answer various policy questions. Problem identification, model specification, hypothesis stipulation, and econometric estimation of various demand models.

**293. Analysis of California Agriculture and Resources** (3) III. Johnston  
Lecture—1.5 hours; fieldwork—45 hours total of field trip, including one 5-day summer field trip. Review and analysis of production, marketing, and resource issues facing agricultural firms in California. Application of economic theory and measurement to individual firm and industry decisions in an applied setting. (S/U grading only.)

**293M. Analysis of California Agriculture and Resources** (2) III. Johnston  
Lecture—0.5 hours; fieldwork—45 hours total, including one 5-day summer field trip. Prerequisite: Ph.D. level standing. Review and analysis of production, marketing, and resource issues facing agricultural firms in California. (S/U grading only.)

**298. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)  
Advanced study through special seminars, informal group studies, or group research on problems for analysis and experimentation. Sections: (1) Managerial Economics; (2) Agricultural Policy; (3) Community and Regional Development; (4) Natural Resources; (5) Human Resources; (6) Research Methods and Quantitative Analysis.

**299. Individual Study** (1-12) I, II, III. The Staff (Chairperson in charge)  
Sections: (1) Managerial Economics; (2) Agricultural Policy; (3) Community and Regional Development; (4) Natural Resources; (5) Human Resources; (6) Research Methods and Quantitative Analysis; and (7) Dissertation Research Prospectus. (S/U grading only.)

**299D. Special Study for Doctoral Dissertation** (1-12) I, II, III. The Staff (Chairperson in charge) (S/U grading only.)

#### Professional Course

**396. Teaching Assistant Training Practicum** (1-4) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Agricultural Computing and Information Systems

(College of Agricultural and Environmental Sciences)

This minor is for students interested in applying modern computer technology to management problems in agriculture, resource management, and other areas. Course work provides knowledge of the use of information technology and the methodology of applied quantitative and systems analysis. The minor is offered by the Department of Agronomy and Range Science.

### Minor Program Requirements:

UNITS

#### Agricultural Computing and Information Systems .....18

Two or three of the following courses: Agricultural Systems and Environment 120, 121, 122, Animal Science 128. (The third course may be taken in substitution for a course from either of the elective groups.)  
Remainder of the units to be made up of courses in one or both of the following groups.....6-12

*Computer systems, statistics, and simulation:*

Agricultural and Resource Economics 106, 155, Applied Biological Systems Technology 180, Community and Regional Development 160, Computer Science Engineering 167, Statistics 141

*Communication and business organization:*

Agricultural and Resource Economics 112, Agricultural Education 171, 172, Community and Regional Development 168, Communication 103, 136

**Minor Adviser.** R.E. Plant (*Agronomy and Range Science*), J. Fadel (*Animal Science*).

**Advising Center** is located in 152 Hunt Hall (530-752-1715).

## Agricultural Education

(College of Agricultural and Environmental Sciences)

**Faculty.** See under the Department of Agronomy and Range Science.

**Major Program.** An undergraduate program leading to a bachelor of science degree is offered in Agricultural Systems and Environment with a specialization in Agricultural and Environmental Education.

**Advising Center** for the major is located in 152 Hunt Hall (530-752-1715).

**Teaching Credential Subject Representative.** You may make an appointment with a credential counselor and obtain a statement of the complete requirements for the credential at the Agricultural Education Program Office, 132 or 255 Hunt Hall (530-752-3040 or 4369). Since many majors in the college do not offer the minimum preparation necessary for entering the Agriculture Teaching Credential program, you should seek counseling as early as possible. See also the Teacher Education Program.

**Graduate Study.** For graduate study refer to the Graduate Studies chapter of this catalog. The Department of Human and Community Development offers a program of study leading to the M.Ed. degree. Further information may be obtained from the Department and the *Graduate Announcement*.

**Graduate Adviser.** L.S. Whent (*Agronomy and Range Science*).

### Courses in Agricultural Education (AED)

*Questions pertaining to the following courses should be directed to the instructor or to the Agricultural Education Program Office, 152 Hunt Hall.*

#### Lower Division Courses

**92. Internship** (1-12) I, II, III. The Staff (Chairperson in charge)

Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Supervised internship off and on campus in areas of agricultural education. (P/NP grading only.)

**98. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

#### Upper Division Courses

##### 100. Concepts in Agricultural and Environmental Education

(3) I. Zilbert  
Lecture—2 hours; laboratory—3 hours. Prerequisite: upper division standing. Philosophy and nature of formal and non-formal agricultural and environmental education programs. Emphasis on understanding the role of the teacher and observing a variety of programs. GE credit: SocSci, Wrt.

##### 160. Vocational Education

(3) II. Whent  
Lecture—3 hours. Philosophy and organization of vocational education, with particular reference to educational principles for agriculture, commerce, home economics, and industry. GE credit: SocSci, Wrt.

##### \*163. Measurement and Evaluation in Teaching

(3) II. The Staff  
Lecture—3 hours. Prerequisite: elementary statistics; upper division standing. Development of selection, use and assessment of evaluation procedures for measuring cognitive, affective and psychomotor growth.

**171. Audiovisual Communications** (2) II. Zilbert  
Lecture—1 hour; laboratory—3 hours. Prerequisite: upper division standing. Theory and principles of audiovisual communications. Comparison of audiovisual materials such as transparencies, slides, computer-generated graphics, and videos. Operation and use of audiovisual equipment is stressed.

**\*172. Multimedia Productions** (3) III. Zilbert  
Lecture—2 hours; laboratory—3 hours. Prerequisite: course 171 recommended. Design and production of educational, technical, and professional multimedia presentations. Instructional or professional presentations using a variety of media, including slides, video, transparencies, and computer-generated graphics. Offered in alternate years. GE credit: SocSci, Wrt.

##### 190. Seminar in Agricultural Education

(2) II. Whent  
Seminar—2 hours. Discussion of selected critical issues in agricultural education. May be repeated for credit with consent of instructor. (P/NP grading only.)

**192. Internship** (1-12) I, II, III. The Staff (Chairperson in charge)

Internship—3-36 hours. Prerequisite: upper division standing; consent of instructor. Supervised internship off and on campus in areas of agricultural education. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
(P/NP grading only.)

#### Professional Courses

**300. Directed Field Experience in Teaching** (2) I, III. Zilbert

Discussion—1 hour; field experience—3 hours. Prerequisite: course 100. Experience as teaching assistant in agriculture or home economics programs in public schools. May be repeated once for credit. (P/NP grading only.)

**301. Planning for Instructional Programs** (3) II. Zilbert

Lecture—3 hours. Prerequisite: course 100; course 300 (may be taken concurrently). Major paradigms in program planning and development. Emphasis on key steps in curriculum development, including selection and organization of educational objectives, learning experiences and teaching materials and resources.

**302. Teaching Methods in Agricultural Education** (3) I. Whent

Lecture—2 hours; laboratory—2 hours. Prerequisite: course 100, course 300 (may be taken concurrently). Development of teaching strategies with special emphasis on the designing of learning experiences, instructional execution, and use of teaching aids in agricultural education.

**306A. Field Experience with Future Farmers of America and Supervised Experience Programs**

(4) I, III. Whent  
Lecture/discussion—2 hours; field work—6 hours. Prerequisite: acceptance into the Teacher Education Program; course 306B (concurrently). Develop an understanding of the Future Farmers of America and supervised occupational experience programs through planning, conducting, and evaluating actual programs.

**306B. Field Experience in Teaching Agriculture** (5-18) I, II, III. Whent

Student teaching (corresponds with public school session). Prerequisite: acceptance into the Teacher Education Program; course 306A (concurrently); courses 100, 300, 301, 302. Directed teaching including supervision of occupational experience programs and youth activities in secondary schools or community colleges. May be repeated for credit up to a maximum of 18 units.

**\*307. Teaching in Secondary Schools** (5-18) I.

The Staff  
Student teaching (corresponds with public school session). Prerequisite: acceptance into Teacher Education Program; courses 100, 300, 301, 302. Supervised teaching in secondary school or community college general agriculture or home economics programs. (Deferred grading only, pending completion of course.)

**323. Resource Development: Agricultural Education** (3) III. Whent

Lecture—3 hours. Prerequisite: courses 306A, 306B. Selection and implementation of community resources in teaching.

**390. Seminar: Issues in Agricultural Education** (2) III. Whent

Discussion/laboratory—4 hours. Prerequisite: acceptance into the Teacher Education Program and courses 306A-306B. Discussion and evaluation of current issues, theories and research in agricultural education. (S/U grading only.)

# Agricultural Systems and Environment

(College of Agricultural and Environmental Sciences)

**Faculty.** See under the departments of Agronomy and Range Science; Pomology; and Vegetable Crops.

## The Major Program

This major is for students who are interested in understanding agricultural systems as they relate to the environment and society. The selected courses provide an interdisciplinary background that encompasses both natural science and social science disciplines. Students acquire a core understanding of agricultural production systems as managed ecosystems, how they function, how they interact with the natural environment and how they are intimately connected with human society and social changes. In addition, students develop an area of specialization. Within each of these areas of specialization, students choose between a broad-based education and one focused in selected areas.

**The Program.** Specialization in *Sustainable Production Systems* covers food and agricultural production, agroecology, pest ecology and management, crop improvement and propagation. Students may also develop an emphasis in particular production areas, such as agronomy, environmental horticulture, pomology, vegetable crops or viticulture. The *Range and Natural Resources* specialization emphasizes the theory and practice of natural resource management in grazed ecosystems. The *Agricultural and Environmental Education* specialization provides preparation in educational foundations, planning and teaching strategies, with development of an agriculture and environment emphasis. Specialization in *Agricultural and Environmental Communication and Information* offers preparation in agricultural and environmental science, along with in-depth understanding of communication and information management.

All students gain practical experience through a combination of internships and practica. Students may also pursue an Honors thesis in their senior year.

**Career Alternatives.** Graduates from this program are prepared to pursue a wide range of careers, including various technical and management positions in agricultural and business enterprises; farming; consulting; private, state and federal agencies concerned with rangeland and natural resource management; Cooperative Extension; international development; teaching; agricultural and environmental journalism, information and communication services. Graduates are qualified to pursue graduate studies in the natural and social sciences, such as agroecology, environmental studies, pest management, education, business management.

## B.S. Major Requirements:

(For convenience in program planning, the *usual* courses taken to satisfy the requirements are shown in parentheses. Equal or more comprehensive courses are acceptable. *Courses shown without parentheses are required.*)

| Senior thesis. The Senior Honors Thesis includes two or three successive quarters of guided scientific and/or scholarly research on an agricultural and/or environmental subject of special interest to the student. With adviser approval, the senior thesis can satisfy up to 12 units of restricted electives in the major.                                                     |                    |
| <b>Area of Specialization (choose one):</b>                                                                                                                                                                                                                                                                                                                                        |                    |
| <b>Sustainable Production Systems</b> .....                                                                                                                                                                                                                                                                                                                                        | <b>53-57</b>       |
| Includes food and agricultural production, agroecology, crop improvement, propagation, and pest management. Students may choose between a broad education in sustainable agriculture or focus on one or two areas of agriculture (e.g., agricultural management, agronomy, crop improvement, environmental horticulture, pest management, pomology, vegetable crops, viticulture). |                    |
| Crop biology and ecology depth requirement must be met with Plant Biology 142.                                                                                                                                                                                                                                                                                                     |                    |

Unrestricted Electives .....

## Range and Natural Resources .....

**54-56**  
This specialization brings together courses that provide a unified understanding of the interaction between livestock production and environmental quality in rangelands.

|                                                                                                                                                  |       |

| <b>39-43</b><br>This specialization includes preparation in educational foundations, planning and teaching strategies, and development of an agricultural and environmental science emphasis. Along with a broad preparation in the natural sciences, social sciences and agriculture, this specialization prepares the student for entry into the graduate agriculture teaching credential program, for employment in the private sector in areas of training and human resource development, for working in nonformal educational programs involving environmental education, outdoor education, 4-H and other youth organizations, and pursuing further graduate studies in the social or natural sciences. |       |
| Soil science (Soil Science 10 or 100) .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 3-4   |
| Concepts in agricultural and environmental education (Agricultural Education 100) .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 3     |
| Directed field experience in teaching (Agricultural Education 300) .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 2     |
| Educational foundations (Education 110, 115, 120, or 153) .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 8     |
| Planning and teaching strategies (Agricultural Education 171, 301 and 302 and either 160 or 172) .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 11    |
| Agricultural and environmental science emphasis .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 12-15 |
| Courses to be selected in consultation with academic adviser. Students typically                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |       |

will select one area of agriculture to develop a strength by taking three to four courses.

Unrestricted Electives .....27-38  
Students pursuing a teaching credential in agriculture need at least 10 units of Animal Science, 8 units of Plant and Soil Science, 6 units of Agricultural Economics, 4 units of Applied Biological Systems Technology, and 4 units of Environmental Horticulture. See adviser for list of required courses.

### Agricultural and Environmental Communications and Information Management .....32-42

This specialization provides broad preparation in the agricultural and environmental sciences along with in-depth understanding of communications and information management. The option prepares individuals for careers in agricultural and environmental science journalism, newscasting, information services and industrial communications.

Soil science (Soil Science 10 or 100) .....3-4  
Professional writing (English 104A or 104C)

.....4  
Upper division internship (Agricultural Education 192) .....6-9

Information technology (Agricultural Education 171 and one course from (Agricultural Education 172, Agricultural Systems and Environment 121, 122) .....5-6

Communications and information transfer (Communication 130, 140) .....4

Agricultural and environmental communications and information emphasis .....10-15  
Courses to be selected in consultation with academic adviser. Students typically will select one area of agriculture to develop a strength by taking three to four courses.

Unrestricted Electives .....28-45

**Total Units for the Major .....180**

**Major Adviser:** R. Plant.

**Advising Center** located in 152 Hunt Hall (530-752-1715).

## Minor Program Requirements:

UNITS

### Agricultural Systems and Environment .....18

Preparatory material: Statistics 13, 32, Agricultural Systems and Environment 120 or Sociology 42B, or the equivalent.

Select one of the two following tracks:

#### Sustainable Agriculture track

Agricultural Systems and Environment 105, 150, Plant Biology 142, Soil Science 100 .....15

Minimum of three units from the following: Agricultural Systems and Environment 107, 110A, 110B, 110C, 112, 170A, 170B .....3

#### Range and Natural Resources track

Agricultural Systems and Environment 121, 130 .....7

Minimum of 11 units from the following: Agricultural Systems and Environment 131, 134, 135, 150, Environmental Science and Policy 123, 172 .....11

**Minor Advisers:** R.E. Plant (*Agronomy and Range Science*), K.J. Rice (*Agronomy and Range Science*).

**Advising Center** is located in 152 Hunt Hall.

**Honors.** The Senior Honors Thesis (Agricultural and Environmental Sciences 194H) includes two or three successive quarters of guided, scientific and/or scholarly research on an agricultural and/or environmental subject of special interest to the student.

With adviser approval the Senior Thesis can satisfy up to 12 units of restricted electives in the major.

## Courses in Agricultural Systems and Environment (ASE)

### Lower Division Courses

#### 1. Agriculture, Nature and Society (3) I.

Gradziel (Pomology)

Lecture—2 hours; discussion/laboratory—1 hour. Multiple perspectives and connections between the natural sciences, social sciences, and agriculture. Emphasis on agriculture's central position between nature and society and its key role in our search for a productive, lasting and hospitable environment. Several full-period field trips provide hands-on learning.

#### 2. Botany and Physiology of Cultivated Plants (4) II. Saltveit, Marrush (Vegetable Crops)

Lecture—3 hours; discussion/laboratory—3 hours. Prerequisite: high school course in biology and chemistry recommended. A holistic introduction to the underlying botanical and physiological principles of cultivated plants and their response to the environment. Includes concepts behind plant selection, cultivation, and utilization. Laboratories include discussion and interactive demonstrations.

#### 7. Molecules, Risk and Public Policy (3) II.

Phillips

Lecture—3 hours. Natural functions of molecules, their effects on humans, and their regulation through public policy. Students will learn about molecules that are discussed daily in newspapers. GE credit: Sci-Eng, Wrt.

#### 21. Applications of Microcomputers in

**Agriculture (3) I.** The Staff; II. Laca; III. Geng (Agronomy and Range Science)

Lecture—1.5 hours; laboratory/discussion—2 hours; autotutorial—2 hours. Prerequisite: high school algebra. Concepts of computing and applications using personal computers, spreadsheets, database management, word processing and communications. Not open for students who have completed Computer Science Engineering 15, 30, 35 or Engineering 5.

#### 49. Organic Crop Production Practices (3) III.

Van Horn

Lecture—1 hour; discussion—1 hour; field work—3 hours. Principles and practices of organic production of annual crops. Topics include organic crop, soil, and pest management, cover cropping, composting, seeding, transplanting, irrigation, harvesting and marketing. Includes field trip(s). (P/NP grading only.)

#### 90X. Agricultural Systems and Environment

**Seminar (1-4) I, II, III.** The Staff

Seminar—1-4 hours. Prerequisite: consent of instructor. Examination of a special topic in a small group setting.

#### 92. Internship (1-12) I, II, III.

The Staff (Director in charge)  
Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in all subject areas pertaining to agricultural and environmental sciences. Internship supervised by faculty member in the animal, plant, and environmental sciences. (P/NP grading only.)

#### 98. Directed Group Study (1-5) I, II, III.

The Staff (Director in charge)  
Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5) I, II, III.

The Staff (Director in charge)  
Primarily intended for lower division students. (P/NP grading only.)

### Upper Division Courses

#### 101. Agriculture and the Environment (3) II.

Hill (Agronomy and Range Science)  
Lecture—2.5 hours; Saturday field trip. Prerequisite: course 22 and consent of instructor. Focus on the interaction between agriculture and environment to address the principles required to analyze conflict and develop solutions to complex problems facing society.

#### 105. Concepts in Pest Management (3) III.

Norris (Weed Science Program)

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Biological Sciences 1C or course 2, Chemistry 8B. Introduction to the ecological principles of integrated pest management, biology of different classes of pests and the types of losses they cause, population assessment, evaluation of advantages and disadvantages of different techniques used for pest management, IPM programs.

#### \*107. Small Fruit Production (2) II.

Shaw (Pomology)

Lecture—2 hours; two field trips arranged at mutual convenience. Prerequisite: Biological Sciences 1C or the equivalent. Strawberries (*Fragaria*), blackberries-raspberries (*Rubus*), blueberries-cranberries (*Vaccinium*) as important nutritional resources; their origin, production and utilization with emphasis on recent progress in integrated management. Offered in alternate years. Not open for credit to students who have taken Pomology 107. (Former course Pomology 107.)

#### 110A. Principles of Agronomic Crop Production in Temperate and Tropical Systems (3) II.

Travis, Rains (Agronomy and Range Science)

Lecture—3 hours. Prerequisite: course in general botany or course 2 recommended. Fundamentals of field crop production in temperate and tropical climates. Resource utilization and economic, political and social problems are considered in relation to technological problems and their influences on agricultural development.

#### 110B. Management of Agronomic Crops in Temperate and Tropical Systems (3) III.

Travis, Rains (Agronomy and Range Science)

Lecture—3 hours. Prerequisite: course in general botany or course 2; course 110A recommended. Application of agronomic principles in production of temperate and tropical crops. Specific crops discussed with reference to management and efficient use of physical and biological resources.

#### 110C. Crop Management Systems for

**Vegetable Production (4) I.** Mitchell, Marrush (Vegetable Crops)

Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 2; course 110A recommended. Horticultural principles applied to production and management systems for vegetable crops. Laboratory and discussion will illustrate efficient field management and resource use practices.

#### 110L. Principles of Agronomy Laboratory (1)

III. Travis, Rains (Agronomy and Range Science)  
Laboratory—3 hours. Prerequisite: course 110B (may be taken concurrently). Field-oriented introduction to principles of agronomic crop production. Not open for credit to students who have completed Agronomy 100L. (Former course Agronomy 100L.)

#### 112. Forage Crop Ecology (3) III.

Teuber (Agronomy and Range Science)

Lecture—3 hours. Prerequisite: Biological Sciences 1C or consent of instructor. Forages as a world resource in food production. Ecological principles governing the adaptation, establishment, growth and management of perennial and annual forages, including pastures, rangelands and hay; aspects of forage quality which affect feeding value to livestock. Offered in alternate years. Not open for credit to students who have completed Agronomy 112. (Former course Agronomy 112.)

#### \*118. Seed Production and Quality (4) III.

Bradford (Vegetable Crops)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 2 or Biological Sciences 1C; Plant Biology 152 recommended. Principles of crop seed production, storage and utilization. Biological and environmental factors influencing seed quality. Measurement and preservation of seed vigor and viability. Technological aspects of crop establishment from seeds. Laboratories include field trips to seed industry facilities. Offered in alternate years. Not open for credit to students who have completed Vegetable Crops 118. (Former course Vegetable Crops 118.)

**120. Applied Statistics in Agricultural Science**

(4) I. Geng (Agronomy and Range Science)  
Lecture—3 hours; discussion/laboratory—2 hours.  
Prerequisite: upper division standing. Applications of statistical methods to the analysis and interpretation of research data in plant, animal, behavioral, food and nutritional sciences. Lectures cover basic concepts and statistical methods. Specialized laboratory sections cover procedures, data processing and interpretations. Not open for credit to students who have completed Agricultural Science and Management 150. GE credit: SciEng.

**121. Systems Analysis in Agriculture and Resource Management**

(4) II. Foin (Agronomy and Range Science)  
Lecture—2 hours; discussion/laboratory—2 hours.  
Prerequisite: course 21 or equivalent computer experience, and Mathematics 16A. The process of systems analysis and dynamic simulation of biological and environmental systems, use of systems analysis for development of optimal management strategies for agricultural and environmental systems. Not open for credit to students who have taken Agricultural Science and Management 121. GE credit: SciEng, Wrt.

**122. Management of Information for the Agricultural and Environmental Sciences**

(4) III. Zilbert (Agronomy and Range Science)  
Lecture—3 hours; laboratory—3 hours. Prerequisite: course 21 or consent of instructor. Introduction to systems and technology for acquiring, storing, manipulating and communicating various types of information including numerical data, text, graphics and multimedia images. Laboratory exercises introduce a wide variety of information management systems used in offices and laboratories. Not open for credit to students who have taken former course 101.

**\*130. Rangelands: Ecology, Conservation and Restoration**

(3) II. Rice (Agronomy and Range Science)  
Lecture—3 hours. Prerequisite: Biological Sciences 1C; introductory ecology course and junior standing recommended. Introduction to the ecological principles and processes important for an understanding of the dynamics of range ecosystems. Emphasis on ecological and evolutionary concepts underlying management strategies for conserving biological diversity and environmental quality in rangelands. Offered in alternate years. GE credit: SciEng, Wrt.

**131. Identification and Ecology of Grasses**

(2) III. Rice (Agronomy and Range Science)  
Lecture—7.5 hours; laboratory—20 hours; discussion—5 hours (total for course). Prerequisite: Biological Sciences 1C or course 2; Plant Biology 102 and junior standing recommended. Taxonomy and identification of western grasses. Development of skills in using plant identification keys. Ecology and evolution of grasses in grazing ecosystems. Given the week following spring quarter.

**132. Geographic Information Systems in Applied Ecology**

(3) II. Plant (Agronomy and Range Science)  
Lecture—2 hours; laboratory—3 hours. Prerequisite: course 21 or the equivalent computer skills; Mathematics 16A, and course 120 or the equivalent. Introduction to GIS and its application in agriculture and resource management. Field use of global positioning systems. GIS data organization, acquisition, and analysis. Use of Arcview GIS.

**\*134. Comparative Ecology of Major Rangeland Systems**

(3) II. The Staff  
Lecture—3 hours; one Saturday field trip required. Prerequisite: course 130 or the equivalent; Environmental Studies 100 recommended. Study of vegetation structure, composition, and succession in North American rangeland communities. Description and comparison of interactions between vegetation and grazing animals on grassland, desert, forested, and tundra rangelands. Discussion of current rangeland management strategies. Offered in alternate years.

**135. Ecology and Community Structure of Grassland and Savannah Herbivores**

(3) I. Demment  
Lecture—3 hours. Prerequisite: Biological Sciences 1A or 1B and course 2, or Biological Sciences 1C; general ecology course (Environmental Studies 100) recommended. Feeding ecology of grassland herbivores and its importance in evolution of herbivore communities and social systems. Optimal foraging, interspecific interactions, and primary productivity are considered as factors structuring natural and managed grassland and savannah systems. Offered in alternate years. Former course Range Science 135.

**137. Field Course in Rangeland Monitoring and Management**

(2) III. The Staff  
Lecture—1 hour; fieldwork—3 hours (week-long intensive field course given the week following spring quarter). Prerequisite: course 2 or the equivalent, Plant Biology 102 and junior standing. Introduction to rangeland vegetation monitoring methods and management strategies. Field sampling of vegetation composition and structure, soil status, and wildlife and fish habitat. Grazing management strategies to achieve desired future condition of rangelands.

**150. Cropping Systems of the World**

(4) II. vanKessel (Agronomy and Range Science)  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or Biological Sciences 1C, and Soil Science 10. General concepts of the functioning of cropping systems as related to resource availability, energy flow, economic yield, sustainability and integration; means of increasing resource use efficiency; low and high input cropping systems in temperate and tropical zones.

**160. Agroforestry: Global and Local Perspectives**

(2) I. Weinbaum (Pomology)  
Lecture/discussion—2 hours. Prerequisite: course 2 or Biological Sciences 1C; Plant Biology 142 or a general ecology course (Environmental Science and Policy 100). Explores traditional and evolving use of trees in agricultural ecosystems, their multiple roles in environmental stabilization and the production of food, fuel and fiber, and socioeconomic barriers to adoption. Offered in alternate years. (Same course as International Agricultural Development 160.)

**\*170A. Fruit and Nut Cropping Systems**

(2) I. McGranahan, Ferguson (Pomology)  
Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C, or consent of instructor. Overview of production and handling systems of major pomological crops, analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing. Offered in alternate years. Not open for credit to students who have completed Pomology 170A. (Former course Pomology 170A.)

**\*170B. Fruit and Nut Cropping Systems**

(2) III. Gradziel (Pomology)  
Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C, or consent of instructor. Overview of production and handling systems of major pomological crops, including analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing. Offered in alternate years. Not open for credit to students who have completed Pomology 170B. (Former course Pomology 170B.)

**188. Undergraduate Research: Proposal**

(3) III. Bloom, Yoder (Vegetable Crops)  
Lecture/discussion—3 hours. Prerequisite: consent of instructor. Through lectures, class discussion and individual mentoring, students will define a problem, identify objectives, conduct a literature survey, generate testable hypotheses, design experiments, plan data analysis, prepare an outline, and write a scientific proposal. (Same course as Plant Biology 188.) (P/NP grading only.)

**189. Undergraduate Research: Experiment**

(3) I, II, III. The Staff  
Laboratory/discussion—6 hours. Prerequisite: course 188 and consent of instructor. Experimental testing of the hypothesis developed in course 188. May be repeated for a total of 12 units. (P/NP grading only.)

**190. Seminar on Alternatives in Agriculture**

(2) II. Van Horn (Agronomy and Range Science)  
Seminar—2 hours. Prerequisite: upper division standing. Seminar on topics related to alternative theories, practices and systems of agriculture and the relationship of agriculture to the environment and society. Scientific, technological, social, political and economic perspectives. (P/NP grading only.)

**191. Current Topics in Agricultural Science Research**

(1) I. The Staff  
Discussion—1 hour. Prerequisite: consent of instructor. Introduction to current areas of experimental investigation in the Agricultural and Plant Sciences. Seminar format with short presentations of current directions of research, followed by interactive discussions. (P/NP grading only.)

**192. Internship**

(1-12) I, II, III. The Staff (Director in charge)  
Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship on and off campus in agricultural and environmental sciences. (P/NP grading only.)

**194H. Senior Honors Thesis**

(2-6) I, II, III. The Staff  
Independent study. Prerequisite: Agricultural Systems and Environment major; senior standing; overall GPA of 3.25 or higher and consent of master adviser. Two or three successive quarters of guided research on an agriculturally related subject of special interest to the student. Not open for credit to students who have completed Agrarian Studies 188H. (P/NP grading only; deferred grading only, pending completion of thesis.)

**195. Field Study of Vegetable Industry**

(1) III. Jackson, Mitchell (Vegetable Crops)  
Field Study. Prerequisite: consent of instructor. Field study illustrating different aspects of California agriculture, including research institutions, farm operations, field stations, Extension Service, marketing, processors, equipment, etc. Given between winter and spring quarters. Considered a spring course for pre-enrollment. Not open for credit to students who have completed Vegetable Crops 195. (Former course Vegetable Crops 195.) (P/NP grading only.)

**198. Directed Group Study**

(1-5) I, II, III. The Staff (Director in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates**

(1-5) I, II, III. The Staff (Director in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

## Agronomy

(College of Agricultural and Environmental Sciences)

**Faculty.** See under Department of Agronomy and Range Science.

**Major Program.** See the major in Agricultural Systems and Environment.

**Graduate Study.** A program of study is offered leading to the M.S. degree in Agronomy. Information may be obtained in the Advising Office at 132 Hunt Hall. Also see the Graduate Studies chapter of this catalog.

**Graduate Adviser.** R. Plant.

**Related Courses.** Agronomy and Range Science faculty also teach the following courses that contribute to majors and graduate programs in Agriculture Teaching Credential, Agricultural Systems and Environment, Ecology, Genetics, International Agricultural Development, and Plant Biology:

Agricultural Education 100, 160, 163, 171, 172, 190, 300, 301, 302, 306A, 306B, 307, 323, 390, Agricultural Systems and Environment 21, 101, 110A, 110B, 110L, 112, 120, 121, 122, 130, 131, 134, 135, 137, 150, 190, Ecology 206, 207, Genetics 201A, 201B, International Agricultural Development 200, Plant Biology Graduate Group 220, Plant Biology 116, 142, 143, 146, 152, 161A, 161B.

## Courses in Agronomy (AGR)

Questions pertaining to the following courses should be directed to the instructor or to the Advising Center, 152 Hunt Hall.

### Lower Division Course

**92. Agronomy Internship** (1-12) I, II, III, summer. The Staff (Department Chairperson in charge) Internship—3-36 hours. Prerequisite: consent of instructor. Internship on or off campus in all subject areas pertaining to agronomy. Internships supervised by a member of the faculty. (P/NP grading only.)

### Upper Division Courses

**192. Internship** (1-12) I, II, III, summer. The Staff (Department Chairperson in charge) Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Internship on or off campus in all subject areas pertaining to agronomy. Internships supervised by a member of the faculty. (P/NP grading only.)

**197T. Tutoring in Agronomy** (1-5) I, II, III. The Staff (Chairperson in charge) Tutoring—1-5 hours. Prerequisite: course to be tutored or the equivalent; upper division standing and consent of instructor. Designed for undergraduate students who desire teaching experience. Student will assist in courses under the direction of the faculty. May be repeated for credit up to a total of 5 units. Same course may not be tutored more than one time. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge) Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge) Prerequisite: 6 upper division units of agronomy. (P/NP grading only.)

### Graduate Courses

**205. Experimental Design and Analysis** (4) II. Dubcovsky Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural Systems and Environment 120 or the equivalent. Graduate students in agricultural and environmental sciences will be introduced to the research process and statistical methods to plan, conduct and interpret experiments. Not open for credit to students who have completed course 205A. (Former course 205A.)

**206. Multivariate Systems and Modeling** (4) III. Laca Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural Systems and Environment 120 or the equivalent. Graduate students in the biological and environmental sciences will be presented multiple regression, multivariate and computer modeling methods needed to conduct research experiments and analyze multivariate data systems. Not open for credit to students who have completed course 205B. (Former course 205B.)

**207. Plant Population Biology** (3) II. Rice Lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: advanced undergraduate ecology course (e.g., Environmental Studies 100, Evolution and Ecology 125, Plant Biology 117, or Entomology 104); an advanced undergraduate course in genetics and/or evolution (e.g., Biological Sciences 101 or Evolution and Ecology 100). Provides entry-level graduate students and advanced undergraduates with an introduction to both theoretical and empirical research in plant population biology. Emphasis will be placed on linking ecological and genetic approaches to plant population biology. Offered in alternate years. (Same course as Ecology 207.)

**211. Principles and Practices of HPLC** (2) III. Goyal Lecture—1 hour; laboratory—3 hours. Prerequisite: undergraduate physics and chemistry; Biological Sciences 102, 103 recommended. Principles and theory of HPLC involving various modes of separation and

detection. Optimization of separation using isocratic and gradient elution. Develop practical knowledge about the use, maintenance and troubleshooting of HPLC equipment, including HPLC columns. Development of new HPLC methods.

**\*221. Advanced Plant Breeding** (4) III. Teuber Lecture—3 hours; laboratory—3 hours. Prerequisite: course 205; Genetics Graduate Group 201D or Animal Genetics 107; Plant Science 113. Philosophy, methods, and problems in developing improved plant species. Topics include: inbreeding, heterosis, progeny testing, breeding methodology, index selection, germplasm conservation, and breeding for stress resistance. Laboratories include tours of breeding facilities and calculation and interpretation of quantitative data. Offered in alternate years.

**\*224. Chromosome Evolution** (3) I. Dvorak Lecture—3 hours. Prerequisite: Genetics 201A and 201B or the equivalent. Structure and function of chromosomes. Dynamics of their evolution at the molecular and structural levels. Offered in alternate years.

**290. Seminar in Crop Growth, Production and Utilization** (1-2) I. The Staff Seminar—1-2 hours. Topics of current interest related to plant growth processes, production and management systems, and utilization of cultivated food, feed and fiber crops.

**291. Seminar in Plant Breeding and Evolution of Cultivated Plants** (1-2) III. The Staff Seminar—1-2 hours. Topics of current interest related to plant breeding systems and the origins and evolution of cultivated plants.

**297T. Tutoring in Agronomy** (1-5) I, II, III. The Staff (Chairperson in charge) Tutoring—1-5 hours. Prerequisite: graduate standing; consent of instructor; and course to be tutored or the equivalent. Designed for graduate students who desire teaching experience but are not teaching assistants. May be repeated for credit for a total of 5 units. Same course may not be tutored more than one time. (S/U grading only.)

**298. Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

**299. Research** (1-12) I, II, III. The Staff (Chairperson in charge) (S/U grading only.)

### Committee in Charge

Michael L. Smith, Ph.D. (*History*), Chairperson  
Carole Blair, Ph.D. (*American Studies*)  
Ruth Frankenberg, Ph.D. (*American Studies*)  
Susan B. Kaiser, Ph.D. (*Textiles and Clothing*)  
Jay Mechling, Ph.D. (*American Studies*)  
Judith Newton, Ph.D. (*Women's Studies*)  
Kent Ono, Ph.D. (*American Studies, Asian American Studies*)  
Patricia Turner, Ph.D. (*African American and African Studies, American Studies*)  
Jon Wagner, Ph.D. (*Education*)  
David Scofield Wilson, Ph.D. (*American Studies*)

### Faculty

Carole Blair, Ph.D., Associate Professor  
Ruth Frankenberg, Ph.D., Associate Professor  
Jay Mechling, Ph.D., Professor, *Academic Senate Distinguished Teaching Award*  
Kent Ono, Ph.D., Assistant Professor  
Eric Schroeder, Ph.D., Lecturer  
Patricia Turner, Ph.D., Professor

### Emeriti Faculty

David Scofield Wilson, Ph.D., Senior Lecturer Emeritus

## The Major Program

American Studies offers an alternative approach to the study of American experience for students who feel too limited by departmental approaches. Lower division, introductory classes explore the ways in which cultural systems shape and reflect life in the United States. These classes pay close attention to

the ways in which differences of class, race, gender, generation, ethnicity, religion, and sexual orientation unevenly affect American lives.

**The Program.** American Studies majors take five upper division, in-depth classes and participate in three smaller proseminars limited to majors and devoted to close study of major thinkers and of issues crucial to the practice of American Studies. Advanced work in at least two other departments or programs allows each student to emphasize a period, a problem, or a subject tailored to his or her own individual education goals. Students have the option of writing a senior thesis within this emphasis.

**Career Alternatives.** As an interdisciplinary program, American Studies provides a good liberal arts and sciences undergraduate education. American Studies maximizes a student's contact with a variety of subject matter and approaches. Graduates have moved into a broad range of career settings, including journalism, law, medicine, nursing, law enforcement, teaching, environmental planning, library science, museum curatorship, and business. Some students discover new career possibilities through their internships in American institutions.

**A.B. Major Requirements:**

UNITS

|                                                                                                                                                                                                                                                                                                                                                               |           |

| American Studies, upper division courses...                          | 20        |
| No more than 8 units of course 192 may be counted toward this total. |           |

**Faculty Advisers.** C. Blair, R. Frankenberg, J. Mechling, K. Ono.

**Teaching Credential Subject Representative.** J. Mechling. See also the Teacher Education Program.

**Courses in American Studies (AMS)**

**Lower Division Courses**

**\*1A. Technology, Science, and American Culture** (4) III. Mechling

Lecture—3 hours; discussion—1 hour. American science and technology as cultural systems, mutual influence and interaction of those systems with other cultural systems, including religion, social thought, art, architecture, literature, music, and common sense. GE credit: ArtHum or SocSci, Div, Wrt.

**1B. Religion in American Lives** (4) I.

Frankenberg

Lecture—2 hours; discussion—1 hour; tutorials and field exercises. Examines ways Americans have ordered their lives with religion; how latter-day churches, imported faiths, and Indian cultures differ or converge; attention to "civil religion" and mass-media evangelism; genres of religious experience, such as testimony, song, dance, ritual, meditation, vision, trance. GE credit: ArtHum or SocSci, Div, Wrt.

**1C. American Lives through Autobiography** (4) II. Turner

Lecture—2 hours; discussion—2 hours. American culture as understood through the individual life stories told by Americans, with attention to the roles of gender, race, ethnicity, social class, and sexual orientation in the individual's life course. GE credit: ArtHum or SocSci, Div, Wrt.

**\*1E. Nature and Culture in America** (4) III.

The Staff

Lecture—3 hours; fieldwork—3 hours. Uses and abuses of nature in America; patterns of inhabitation, exploitation, appreciation, and neglect; attention to California; emphasis on metaphor as a key to understanding ourselves and the natural world; attention to models of healing: stewardship, ecology, the "rights" movement. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.

**\*1F. The Popular Image of Women in America**

(4) II. Blair

Lecture—2 hours; discussion—1 hour; directed analysis of popular media. Lecture; media exposure; special projects. Examines the image of women as presented in popular media. Emphasis on the politics of gender roles and the connection between the popular feminine image and the demands of the larger American culture.

**\*2. Forms of American Wisdom** (2) III. Mechling

Lecture—1 hour; discussion—1 hour. Exploration of the forms wisdom takes in America: folk knowledge, popular belief, prophetic wisdom, public religion, common sense, science, literature; special attention to the grounding of wisdom in circumstance of race, gender, generation, ethnic identity, and region. (P/NP grading only.)

**\*4. Freshman Seminar** (2) II, III. The Staff

(Program Director in charge)

Seminar—2 hours. Prerequisite: open only to students who have completed fewer than 40 quarter units. Investigation of a special topic in American Studies through shared readings, discussions, written assignments, and special activities (such as fieldwork, site visits). Emphasis on student participation in learning. Limited enrollment.

**30. Images of America and Americans in Popular Culture** (4) I. Blair

Lecture—3 hours; discussion—1 hour. Investigation of verbal and visual discourses about American identity in various popular culture products, including film, television, radio, music, fiction, art, advertising, and commercial experiences; discourses about the United States in the popular culture of other societies. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.

**98. Directed Group Study** (1-5) I, II, III. The Staff

(Chairperson in Charge)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

**99. Individual Study for Undergraduates** (1-5) I, II, III. The Staff

(Chairperson in charge)

(P/NP grading only.)

**Upper Division Courses**

**\*101A-H. Special Topics** (4) I, II, III. The Staff

(Chairperson in charge)

Seminar—3 hours, intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. Content will vary according to the instructor and in accord with the following titles:

- (A) Popular Culture Studies; (B) Women's Studies; (C) Material Aspects of American Culture; (D) American National Character; (E) American Lives Through Auto-

biography; (F) The Interrelationship Between Arts and Ideas; (G) New Directions in American Culture Studies; (H) Problems in Cross-Cultural American Studies. May be repeated for credit in different subject area only.

**110. A Decade in American Civilization** (4) I.

Schroeder

Lecture—2 hours; discussion—2 hours. Prerequisite: one of courses 1A, 1B, 1C, 1D, 1E or 1F. Close examination of a single decade in American civilization; the connections between the history, literature, arts, customs, and ideas of Americans living in the decade. GE credit: ArtHum or SocSci, Div, Wrt.

**\*111. Theories and Practices of Everyday Life in the United States** (4) I. Ono

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division status; preparatory courses for the American Studies major or the equivalent interdisciplinary experience. Introduction to the cultural studies theories and to critical practices that seek to understand everyday life in the United States, with special attention to uncovering the vernacular theories governing these practices.

**115. Living in Bodies: Body Politics in the United States** (4) II. Frankenberg

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division status; preparatory courses for the American Studies major or the equivalent interdisciplinary experience. Examination of human bodies as sites for cultural constructions of identities and "selves" in the United States; attention to bodily norms, crises, and transgressions; the relation between disciplining the body and controlling social categories, including race, gender, class and sexualities.

**120. American Folklore and Folklife** (4) III.

Mechling

Lecture—3 hours; fieldwork—1 hour. Theory and method of the study of American folk traditions, including oral lore, customs, music, and material folk culture; the uses and meanings of those traditions in various folk communities, including families, ethnic institutions, voluntary organizations, and occupational groups GE credit: ArtHum or SocSci, Div, Wrt.

**\*125. Corporate Cultures** (4) III. The Staff

Lecture—2 hours; discussion—1 hour; fieldwork—1 hour. Prerequisite: one course chosen from course 120, Anthropology 2, Psychology 16, or Sociology 1; or consent of instructor. Exploration of the small group cultures of American corporate workplaces, including the role of environment, stories, jokes, rituals, ceremonies, personal style, and play. The effects of cultural diversity upon corporate cultures, both from within and in contact with foreign corporations.

**130. American Popular Culture** (4) II. Blair

Lecture/discussion—3 hours; fieldwork—1 hour. Prerequisite: course 1 or upper division standing. American popular expression and experience as a cultural system, and the relationship between this system and elite and folk cultures. Exploration of theories and methods for discovering and interpreting patterns of meaning in American popular culture. GE credit: ArtHum or SocSci, Div, Wrt.

**132. Critical Approaches to Media Culture** (4) II. Ono

Lecture/discussion—4 hours; film viewing—2 hours. Critical approaches to the study of contemporary media culture, focusing specifically on film, television, computer, and print media and their products and on the various interrelationships between media and U.S. culture. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.

**133. Rhetoric of Media on Social Issues** (4) III. Ono

Lecture/discussion—4 hours. An introduction to rhetorical analysis of social issues as depicted within media culture, with specific emphasis on the way media frame messages about new social problems. Not open to students who have taken Rhetoric and Communication 124 or Communication 124. Offered in alternate years. GE credit: SocSci, Div, Wrt.

**139. Feminist Cultural Studies** (4) III.

Frankenberg

Lecture/discussion—4 hours. Prerequisite: one course in Women's Studies or American Studies. The histories, theories, and practices of feminist traditions within cultural studies. (Same course as Women's Studies 139.) GE credit: SocSci, Div, Wrt.

**\*151. American Landscapes and Places** (4) II.

Blair

Lecture—2 hours; discussion—1 hour; fieldwork—3 hours. Prerequisite: course 1, upper division standing. Comparative study of several American cultural populations inhabiting a region, including their relationship to a shared biological, physical, and social environment, their intercultural relations, and their relationships to the dominant American popular and elite culture and folk traditions. GE credit: ArtHum or SocSci, Div, Wrt.

**\*152. The Lives of Children in America** (4) III.

Mechling

Lecture—2 hours; discussion—2 hours. Experience of childhood and adolescence in American culture, as understood through historical, literary, artistic, and social scientific approaches. GE credit: ArtHum or SocSci, Div, Wrt.

**\*153. The Individual and Community in America** (4) II.

Frankenberg

Lecture—2 hours; discussion—2 hours. Interdisciplinary examination of past and present tensions between the individual and the community in American experience, as those tensions are expressed in such cultural systems as folklore, public ritual, popular entertainment, literature, fine arts, architecture, and social thought. GE credit: ArtHum or SocSci, Div, Wrt.

**154. The Lives of Men in America** (4) I.

Mechling

Lecture—2 hours; discussion—2 hours. Interdisciplinary examination of the lives of boys and men in America, toward understanding cultural definitions of masculinity, the ways individuals have accepted or resisted these definitions, and the broader consequences of the struggle over the social construction of gender. GE credit: ArtHum or SocSci, Div, Wrt.

**155. Symbols and Rituals in American Life** (4) III.

Mechling

Lecture—2 hours; discussion—2 hours. Prerequisite: course 1. Interdisciplinary examination of selected, richly expressive events (parades, festivals, holidays) and symbols (flags, memorials, temples) which encode nationwide values and understandings (Thanksgiving, New Year's, etc.) or which realize more limited, special meanings (Mardi Gras, rodeo, Kwanza, graduation, bar mitzvah, etc.). Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.

**\*156. Race, Culture and Society in the United States** (4) II.

Frankenberg

Lecture—2 hours; discussion—2 hours. Prerequisite: course 1. Interdisciplinary examination of the significance of race in the making of America; how race shapes culture, identities and social processes in the United States; the interweaving of race with gender, class and nationhood in self and community. GE credit: ArtHum or SocSci, Div, Wrt.

**160. Undergraduate Seminar in American Studies** (4) II, III.

Schroeder, Mechling

Seminar—3 hours; term paper. Prerequisite: open to junior and senior American Studies majors only. Intensive reading, discussion, research, and writing by small groups in selected topics of American Studies scholarship; emphasis on theory and its application to American material. Limited enrollment. May be repeated once for credit when content differs.

**\*180. Junior Proseminar** (2) I, II, III.

Turner, Frankenberg

Discussion—2 hours. Prerequisite: junior standing in American Studies major. A small-group, intensive study of works frequently cited in American Studies scholarship; emphasis on theory and its application to American materials. May be repeated for credit with consent of instructor.

**190A-190B. Senior Thesis** (4-4) I.

Blair

Seminar—2 hours; independent study—2 hours. Prerequisite: senior standing in American Studies major.

In consultation with adviser, student contracts to write an extended research paper on a topic mutually agreed upon and enunciated in a prospectus reviewed and accepted by faculty. (Deferred grading only, pending completion of sequence.)

**192. Internship in American Institutions** (1-12)

I, II, III. The Staff (Chairperson in charge)

Internship—1-12 hours. Prerequisite: enrollment dependent on availability of intern positions, with priority to American Studies majors. Supervised internship and study within and about key organizations in American civilization at archives, museums, schools, historical societies, governmental and social agencies, etc., with attention to the techniques of participant observation and the collection of ethnographical data. May be repeated for credit for a total of 12 units. (P/ NP grading only.)

**197T. Tutoring in American Studies** (1-5) I, II, III.

The Staff (Chairperson in charge)

Tutorial—1-5 hours. Prerequisite: consent of Chairperson of American Studies Program. Tutoring in lower division American Studies courses, usually in small discussion groups. Periodic meetings with the instructor in charge; reports and readings. May be repeated for credit when the tutoring is for a different course. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III.

The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor and Chairperson of American Studies Program. (P/NP grading only)

**Graduate Courses****298. Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (S/U grading only.)

**299. Individual Study** (1-12) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum** (1-4) I, II, III. The Staff (Chairperson in charge)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Courses in Anatomy, Physiology, and Cell Biology (APC)

**Upper Division Courses****100. Comparative Organology of Vertebrates** (4) II. Plopper

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1B. Integrative study of the organization of cells and tissues into organs and organ systems in vertebrates. The following organ systems will be compared between fish, birds, and mammals: musculoskeletal, gastrointestinal, cardiovascular, respiratory, integumentary, urinary, reproductive, and nervous.

**198. Directed Group Study** (1-5) I, II, III.

The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses****202. Organology** (2) II. The Staff (Chairperson in charge)

Lecture—2 hours. Prerequisite: course 100 or the equivalent and consent of instructor. Comparative development, growth patterns, and composition of selected organs: liver, kidney, lung, mammary gland, brain, and a skeletal muscle. Offered in alternate years.

**205. Ultramicroscopic Anatomy** (3) III. The Staff (Chairperson in charge)

Lecture—3 hours. Prerequisite: histology. The electron microscopic appearance of cells, tissues, and organs of animals emphasizing the structural basis for their physiological functions. Offered in alternate years.

**207. Perspectives in Morphological Research** (3) III. The Staff (Wu, Tablin in charge)

Lecture—2 hours; discussion—1 hour. Consideration of the principles and applications of modern morphological methods and their role in biomedical research. Examples of specific methods include stereology, computer analysis of images, scanning and transmission electron microscopy, histochemistry, autoradiography, rapid freezing, and vascular injections. Offered in alternate years.

**215. Veterinary Histology** (6) II. The Staff (Chairperson in charge)

Lecture—3 hours; laboratory—9 hours. Prerequisite: Biological Sciences 1B. The microscopic anatomy of

tissues and organs of mammalian and avian species of veterinary significance.

### 220. Physiology and Pathophysiology of the Liver (3) I. Bruss

Lecture—2.6 hours; laboratory—1.2 hours. Prerequisite: systemic physiology; biochemistry or physiological chemistry. Topics in functional morphology, physiology, intermediary metabolism, pharmacology, and disorders of the liver. Emphasis on bile formation; bile pigments; bile acids; drug and toxin metabolism; circulation; carbohydrate, lipid and protein metabolism; trace minerals; basic pathological processes; and function tests. (Same course as 420.)

### 230. The Secretory Process (2) I. The Staff (Chairperson in charge)

Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Structural and intracellular events involved in secretion with emphasis on physiological initiators and modifiers. All secretory systems, but emphasis on the beta cell of the endocrine pancreas as role model. Offered in alternate years.

### 283. Tumor Biology (3) I. The Staff (Chairperson in charge)

Lecture—3 hours. Prerequisite: graduate standing and consent of instructor. Growth, invasion and metastasis of tumors; mechanisms of carcinogenesis; intrinsic and extrinsic etiologic factors. Offered in alternate years.

### 284. Ruminant Nutrition and Physiology (3) III. Bruss, Morris

Lecture—2.7 hours, laboratory—0.9 hours. Prerequisite: graduate or veterinary student standing. Upper division nutrition courses (e.g., Nutrition 110), upper division systemic physiology (e.g., Neurobiology, Physiology and Behavior 110), Biochemistry (e.g., Biological Sciences 102 and 103) or the equivalent. Basic and applied aspects of ruminant nutrition and physiology, nutritional and metabolic disorders of ruminants. (Same as course 484.)

### 285. Morphometry of Cells, Tissues and Organs (2) III. Hyde

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 100 or the equivalent, and Statistics 13. At the end of the course, students will be able to define what critical data need to be collected to estimate volumes, surfaces and lengths of organs and their components (e.g., vessels, ducts and airways). Students will also learn how to estimate the number of cells in an organ or tissue, their volumes, products and gene expression using morphometry. Offered in alternate years.

### 290. Seminar (1) I, II, III. The Staff

Seminar—1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (S/U grading only.)

### 291. Topics in Biology of Respiratory System

(1) I, II, III. Hyde, Plopper, Wu, Pinkerton  
Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Topics concerning structure and function of respiratory system. Possible topics include: lung growth, pulmonary reaction to toxicants, pulmonary inflammation, lung metabolism, biology of lung cells, tracheobronchial epithelium, nasal cavity structure and function. May be repeated for credit. (S/U grading only.)

### 292. Topics in Neuroscience Research (1) III. The Staff

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Students will examine current topics in neuroscience research literature, as well as evaluate rationale, methods, results, interpretation of data, and relevance of studies. Possible topics include pain, autonomic nervous system, neuroendocrinology, neurotransmitter regulation of gene expression, neuroendocrine-immune interactions, stress. (S/U grading only.)

### 298. Group Study (1-5) I, II, III. The Staff (Chairperson in charge)

Laboratory—6-15 hours. Prerequisite: consent of instructor.

### 299. Research (1-12) I, II, III. The Staff (Chairperson in charge)

Laboratory—6-36 hours. Prerequisite: consent of instructor. (S/U grading only.)

## Professional Course

### 397T. Tutoring in Veterinary Anatomy, Physiology and Cell Biology (1-5) I, II, III.

The Staff  
Lecture—1 hour; laboratory—3 hours; discussion—2 hours. For graduate or professional students who desire teaching experience, but are not teaching assistants. May be repeated for credit. (S/U grading only.)

## Professional Courses

**410. Equine Locomotor Anatomy (2) III. Stover**  
Lecture—10 sessions; laboratory—10 sessions. Prerequisite: Veterinary Medicine 401 with a grade of C- or better. Normal anatomy of the equine fore and hind limb bones, joints, muscles, ligaments, tendons, nerves and vessels with emphasis on clinically applicable structures.

### 420. Physiology and Pathophysiology of the Liver (3) I. Bruss

Lecture—2.6 hours; laboratory—1.2 hours. Prerequisite: systemic physiology; biochemistry or physiological chemistry. Topics in functional morphology, physiology, intermediary metabolism, pharmacology, and disorders of the liver. Emphasis on bile formation; bile pigments; bile acids; drug and toxin metabolism; circulation; carbohydrate, lipid and protein metabolism; trace minerals; basic pathological processes; and function tests. (Same course as 220.)

**443. Behavior Clinic (1-2) I, II, III. Hart**  
Clinical activity—2-4 hours. Prerequisite: first-year standing in the School of Veterinary Medicine, course 458 and consent of instructor. Clinical training in behavioral therapy. Students work with clients and animal patients through the Behavioral Service Out-patient Clinic. Case record work-ups with selected presentations of cases during discussion sessions. May be repeated for credit. (S/U grading only.)

### 458. Behavioral Therapy (1) II. Hart

Lecture—1 hour. Prerequisite: first-year standing in the School of Veterinary Medicine or consent of instructor. Approved for graduate degree credit. Clinical application of management, conditioning procedures, hormonal manipulation and drug therapy to resolve common behavioral problems of dogs and cats.

### 484. Ruminant Nutrition and Physiology (3) III. Bruss, Morris

Lecture—2.7 hours, laboratory—0.9 hours. Prerequisite: graduate or veterinary student standing. Upper division nutrition courses (e.g., Nutrition 110), upper division systemic physiology (e.g., Neurobiology, Physiology and Behavior 110), biochemistry (e.g., Biological Sciences 102 and 103) or the equivalent. Basic and applied aspects of ruminant nutrition and physiology, nutritional and metabolic disorders of ruminants. (Same as course 284.)

## Anesthesiology

See Medicine, School of

## Animal Behavior (A Graduate Group)

Alexander H. Harcourt, Ph.D., Chairperson of the Group

Group Office, Center for Animal Behavior  
(530-752-4863; Fax: 530-752-8391;  
e-mail: jmtrevitt@ucdavis.edu)

World Wide Web:

<http://www.npb.ucdavis.edu/abggpage/abgg.htm>

**Faculty.** The Group includes faculty from 11 departments in three schools and colleges.

**Graduate Study.** The Ph.D. program in Animal Behavior is an interdepartmental program that trains students for teaching and research in a variety of areas, including anthropology, animal science, ecology, entomology, psychology, veterinary science, wildlife biology, and zoology. Students choose one of the five areas of specialization: (1) ethology and evolutionary bases of animal behavior, (2) physiological basis of animal behavior, and (3) behavior and conservation of wild animals, (4) behavior and management of domestic animals, and (5) integrative studies. All five specializations emphasize the adaptive and evolutionary bases of animal behavior. Resources available to students, in addition to various departmental facilities, include those of the California Regional Primate Research Center, Bodega Marine Laboratory, and the Agricultural Field Stations.

There is an early application deadline of January 15 for fall quarter.

**Preparation.** Appropriate preparation is a bachelor's or master's degree in a discipline relevant to the biology of behavior. In addition, at least one course from each of the following four areas must be taken before admission into the program or before the end of the first year in the program.

Ecology: e.g., Evolution and Ecology 101, Environmental Science and Policy 100 or Entomology 104

General genetics: Biological Sciences 101

Statistics: e.g., Statistics 149 or Psychology 103, or the equivalent

Evolution: Genetics 103 or Evolution and Ecology 100, or the equivalent

Animal behavior: Neurobiology, Physiology and Behavior 102

Systemic physiology: e.g. Neurobiology, Physiology and Behavior 110 or 119

Students are encouraged to engage in some form of research as early as possible during the first year. This pre-dissertation research may be pursued under the guidance of any faculty member of the Group, not necessarily the student's major professor.

**Breadth Requirement.** The following core courses or the equivalent (22 to 24 units) are required of all students.

Interdisciplinary topics in behavior: Animal Behavior 230A

Statistical analysis: one course from Psychology 205, 207A, 207B, Statistics 206, 106, 108 or 110

Methodology and grant writing: Animal Behavior 201 Seminar in animal behavior: Animal Behavior 290

College teaching: Biological Sciences 310 or Psychology 390A, 390B, Animal Behavior 390A, 390B

Comparative psychology: Psychology 250

**Specialization.** In addition to the requirements listed above, students must also take courses in one of the three areas of specialization with substitution as approved by the adviser.

## Courses in Animal Behavior (ANB)

### Graduate Courses

#### 201. Scientific Approaches to Animal Behavior Research (3) I. The Staff

Lecture—3 hours. Prerequisite: consent of instructor. Philosophical issues, goals, strategies and tools in field and laboratory research. May be repeated for credit when topics differ.

#### 220. Behavioral Aspects of Animal Domestication (3) III. Price (Animal Science)

Lecture—3 hours. Prerequisite: graduate standing and a course in animal behavior, or consent of instructor. History of animal domestication, the role of natural and artificial selection in domestication, the influence of environment and experience on domestic animal behavior and human-animal interrelations. Offered in alternate years.

**230A. Interdisciplinary Approaches to Animal Behavior** (3) II. The Staff

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Analysis of literature in behavior and an allied discipline or disciplines that offer the potential, in combination, to advance the understanding of a topic in animal behavior conceptually and empirically. Topics will vary from year to year.

**230B. Interdisciplinary Approaches to Animal Behavior** (5) III. The Staff

Workshop—4 days total; discussion—3 hours; term paper. Prerequisite: course 230A the previous quarter. Development of an empirical or theoretical interdisciplinary approach to research on a current topic in animal behavior.

**270. Research Conference in Behavioral Ecology** (1) I, II, III. Eadie, Page, Caro, Borgerhoff Mulder, Stamps

Conference—1 hour. Prerequisite: graduate standing and consent of instructor. Critical presentation and evaluation of current literature and ongoing research in behavioral ecology. Limited enrollment. May be repeated for credit. (S/U grading only.)

**290. Seminar in Animal Behavior** (1-3) I, II, III. The Staff

Seminar—1-3 hours. Prerequisite: consent of instructor. Selected topics in animal behavior. (S/U grading only.)

**298. Group Study** (1-5) I, II, III. The Staff

Prerequisite: graduate standing and consent of instructor.

**299. Research** (1-12) I, II, III. The Staff

Prerequisite: and consent of instructor. (S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum**

(1-4) I, II, III. The Staff (Chairperson in charge) Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Animal Biology

(College of Agricultural and Environmental Sciences)

**Faculty.** Faculty includes members of the Departments of Animal Science; Biological and Agricultural Engineering; Entomology; Nematology; and Wildlife, Fish, and Conservation Biology.

### The Major Program

The Animal Biology Major offers students training in the biological and natural sciences as they apply to animals. The major covers the basic biological sciences that explain animal evolution, systematics, ecology, physiology and molecular biology. Emphasis is on the application of these biological principals in solving societal problems associated with animals in agriculture, urban areas or natural environments.

**The Program.** The Animal Biology major consists of core courses in the biological sciences that build an understanding of animal biology from the molecular to the ecological and evolutionary levels of organizational. After completing these core courses, students have the option of specializing in various interdisciplinary aspects of animal biology, and plan their chosen emphasis of study in consultation with their adviser. This program includes a senior thesis, which the student designs to bridge the disciplines of the major.

**Internships and Career Alternatives.** The Animal Biology major offers on-campus and off-campus internship opportunities for study at field stations, with government agencies, with private industry, and in international programs. A degree in Animal Biology prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, pest management, agriculture, conservation, environmental management, and industry. Students in the major gain research experience and may

choose to continue their training at the graduate level in a variety of biological disciplines.

## B. S. Major Requirements

|                                                                                                                                       | UNITS |

**Advising.** For information about the major, contact G.P. Moberg, Dean's Office, 234 Mrak Hall (530-752-0233).

### Courses in Animal Biology (ABI)

#### Lower Division Courses

**50A. Animal Biology Laboratory** (2) III. Granett  
Lecture/laboratory—4 hours. Scientific methods for answering questions in animal biology by doing exercises to demonstrate hypothesis testing and reporting, short laboratory, population and field experiments. Maintain notebooks, analyze data, interpret results and write reports.

**50B. Animal Biology** (3) II. Page, Murray, Kaya  
Lecture—3 hours. Prerequisite: Biological Sciences 1B, course 50A. Basic biological disciplines important to an understanding of practical animal biology issues including the evolution of animal groups, genetic mechanisms, animal physiology as it relates to maintenance and production, and aspects of comparative anatomy, behavior and ecology.

**50C. Animal Biology** (3) III. Mench, Famula, Granett  
Lecture—3 hours. Prerequisite: Biological Sciences 1B, 1C, courses 50A, 50B. Animal management and conservation. Societal concerns arising from management and conservation issues, including economics, aesthetics, regulations, safety, public perspectives and advocacy.

#### Upper Division Courses

**102. Animal Biochemistry and Metabolism** (4) I. Calvert  
Lecture—4 hours. Prerequisite: Chemistry 2A-2B, 8A-8B. Water and biological buffers; thermodynamics of metabolism; structure and function of biomolecules; enzyme function; kinetics; membrane biology; control of digestion and absorption; carbohydrate metab-

olism. Not open for credit to students who have completed Biological Sciences 102 or Nutrition 110.

**103. Animal Biochemistry and Metabolism** (4) I. Calvert

Lecture—4 hours. Prerequisite: course 102. Transport, physiological function and metabolism of lipids and amino acids; nutritional requirements for carbohydrates, lipids and amino acids, structure and function of vitamins; mineral metabolism. Not open for credit to students who have completed Biological Sciences 103 or Nutrition 110.

**187. Animal Biology Seminar** (2) I. The Staff  
Seminar—1 hour; discussion—1 hour. Prerequisite: junior standing, courses 50A, 50B, 50C. Seminar leading to development of the Major Proposal for the Animal Biology major.

**189. Senior Practicum** (2) I, II, III. The Staff  
Independent study—6 hours. Prerequisite: junior standing, courses 50A, 50B, 50L, and 187; course 189D concurrently the first time course 189 is taken. The practicum may be an experimental research project, a library research project or some other creative activity that will serve as a capstone experience for the Animal Biology major. May be repeated once for credit. (P/NP grading only.)

**189D. Senior Practicum Discussion** (1) I, II, III. The Staff

Discussion—1 hour. Prerequisite: junior standing, courses 50A, 50B, 50C, and 187; course 189 required concurrently. Course helps prevent or solve problems during the students' senior practicum activity. (P/NP grading only.)

## Animal Genetics

(College of Agricultural and Environmental Sciences)

**Faculty.** See under Department of Animal Science.

**Major Program.** See the major in Animal Science.

**Related Courses.** See Agronomy 221, 224; Plant Pathology 215X; Plant Biology 154; Vegetable Crops 220.

### Courses in Animal Genetics (ANG)

*Questions pertaining to the following courses should be directed to the instructor or to the Animal Science Advising Center, 1202 Meyer Hall (530-752-6118).*

#### Upper Division Courses

**101. Animal Cytogenetics** (2) III. Delany  
Laboratory/discussion—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 101, 102. Principles and techniques of cytogenetics applied to animal systems; chromosome harvest techniques, analysis of mitosis and meiosis, karyotyping, chromosome banding, cytogenetic mapping, chromosome structure and function, comparative cytogenetics.

**107. Genetics and Animal Breeding** (5) I. Medrano

Lecture—4 hours; laboratory—3 hours. Prerequisite: Biological Sciences 101. Principles of quantitative genetics applied to improvement of livestock and poultry. Effects of mating systems and selection methods are emphasized with illustration from current breeding practices.

**108. Methods in Quantitative Animal Breeding** (3) II. Famula

Lecture—3 hours. Prerequisite: course 107. Methods and procedures in quantitative animal breeding, including: expected value, single and multiple trait selection index, restricted selection, embedded traits, categorical traits, and best linear unbiased prediction.

**109. Introduction to Parameter Estimation** (1) II. Famula

Lecture—1 hour. Prerequisite: course 107 or the equivalent; course 108 recommended. Procedures for estimation of repeatability, heritability, and genetic and environmental correlations. Concept of expected

value, estimation of variance components and the simulation of biological data.

### 111. Molecular Biology Laboratory Techniques (4) II. Oberbauer

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1C; Biological Sciences 101, 102, 103. Introduction to the concepts and techniques used in molecular biology; the role of this technology in both basic and applied animal research, and participation in laboratories using some of the most common techniques in molecular biology.

### 198. Directed Group Study (1-5) I, II, III.

The Staff (Chairperson in charge)  
Prerequisite: consent of instructor. Selected topics relating to animal genetics. (P/NP grading only.)

### 199. Special Study for Advanced

**Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate Courses

**\*204. Theory of Quantitative Genetics** (3) I. Gall  
Lecture—3 hours. Prerequisite: course 107 or the equivalent. Theoretical basis of quantitative genetics and the consequences of Mendelian inheritance. Concepts used to estimate quantitative genetic differences and basis for partitioning the phenotypic variance. Offered in alternate years.

### \*206. Advanced Domestic Animal Breeding (3) III. Famula

Lecture—3 hours. Prerequisite: course 107 and Animal Science 205; course 204 recommended. Procedures for the genetic evaluation of individuals to include selection indices and mixed model evaluation for single and multiple traits. Methods of estimating genetic trends. Offered in alternate years.

### \*208. Estimation of Genetic Parameters (3) III. The Staff (Animal Science)

Lecture—3 hours. Prerequisite: course 107 and Animal Science 205; courses 204 and 108 recommended. General methods for the estimation of components of variance and covariance and their application to the estimation of heritability, repeatability and genetic correlations are considered. Specific emphasis is given to procedures applicable to livestock populations under selection.

### \*211. Genetic Engineering of Animals (2) III. Murray

Lecture—1 hour; lecture/discussion—1 hour. Review of techniques for the genetic engineering of animals and their limitations and applications. Student-led discussions of recent papers in the field and possible future applications of genetically engineered animals in basic research and applied agricultural and medical research. Offered in alternate years. (S/U grading only.)

### 212. Sequence Analysis in Molecular Genetics (2) II. Medrano

Lecture/laboratory—2 hours. Prerequisite: Genetics 201A, 201B, 201C, or the equivalent. The use of computer algorithms and on-line databases to analyze nucleic acid and protein sequences in molecular genetics research. Offered in alternate years. (S/U grading only.)

### 298. Group Study (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. Lectures and discussions of advanced topics in animal genetics. (S/U grading only.)

### 299. Research in Animal Genetics (1-12) I, II, III. The Staff (Bradford in charge)

(S/U grading only.)

## The Major Program

Students in the Animal Science major develop skills and knowledge central to understanding the biological function of domestic animals and their care, management, and utilization by people for food, fiber, companionship and recreation. Domestic animals are an integral part of human societies. Advances in science and technology and an ever-growing human population have increased the complexity of issues surrounding the care and management of domestic animals. Students choose a specialization within the major that allows them to develop expertise on, and appreciation for, a particular class of animals, its functions for companionship, recreation, or in agricultural or aquacultural food production, or in laboratory research, and its influence on and contribution to the environment. Graduates from the Animal Science major will be able to advance the science and technologies of animal care and management in an objective and effective manner for the betterment of human society and domestic animals.

**The Program.** Study begins with introductory courses in animal science, biological science, chemistry, mathematics, and statistics, followed by advanced courses in animal behavior, biochemistry, genetics, nutrition, and physiology and the integration of these sciences to animal function, such as growth, lactation, and reproduction. Students complete the curriculum by choosing one of six specializations. In the *Animal Biology Discipline* specialization, students may focus on animal behavior, biochemistry, animal genetics, nutrition, or physiology. Five specializations in animal production focus on companion and captive animals, livestock and dairy production (beef, dairy, sheep, and swine), laboratory animals, horses, or aquatic animals. Students may also combine study of both a discipline area and an area of animal production within each specialization.

**Career Alternatives.** The Animal Science major prepares students for graduate study leading to the M.S. and Ph.D. degree, for professional study in medicine or veterinary medicine, and for careers in agricultural production, laboratory research, or the many related industries, including farming, ranching and animal management. Career opportunities also include positions in business, management, sales, financial services, health care, agricultural extension, consulting services, teaching, journalism, laboratory technology, and research.

## B.S. Major Requirements:

UNITS

**Written and Oral Expression**.....0-8  
See College requirements

**Preparatory Subject Matter**.....56-60

Animal science (Animal Science 1, 2, 41,

41L).....12

Biological science (Biological Sciences 1A,

1B, 1C).....15

Chemistry (Chemistry 2A, 2B and 8A, 8B or

118A, 118B).....16-18

Computer science (Agricultural Systems and

Environment 21).....3

Mathematics (Mathematics 16A, 16B or 21A,

21B).....6-8

Statistics (Agricultural Systems and Environ-

ment 120 or Statistics 100).....4

Note: Some professional and graduate

schools may require additional preparatory

subject matter. Please consult the

advising center.

**Breadth/General Education**.....16-24

See General Education requirement

**Depth Subject Matter**.....36-38

Biology (Biological Sciences 101, Animal

Genetics 107, Animal Biology 102, 103,

Neurobiology, Physiology and Behavior

101, Nutrition 110).....22

Integrative animal biology (Animal Science 123, 124, and Neurobiology, Physiology and Behavior 121 and 121L) .....12  
 Laboratory course (Select one from Animal Genetics 111, Animal Science 106, 135, Molecular Biology 120L, Neurobiology Physiology and Behavior 101L) .....2-4

**Area of Specialization.....20**  
 Choose one area of specialization below; the program of study must be approved in advance by your faculty adviser.

**Animal Biology Discipline .....20**  
 Select a minimum of 12 upper division units to form a series of disciplinary courses in one of animal behavior, biochemistry, genetics, nutrition, or physiology, in consultation with your faculty adviser.  
 Select an additional 8 upper division units of animal science courses related to the chosen discipline, in consultation with your faculty adviser.

**Aquatic Animal Management .....20**  
 Animal Science 18, 131 and 136; Nutrition 124; and one of Animal Science 118 or 119.  
 Select additional units from any Animal Genetics or Animal Science course, or other courses approved by your faculty adviser.  
 Students in this specialization may elect to substitute any of Biological Sciences 104, Evolution and Ecology 112, or Wildlife, Fish and Conservation Biology 120 and 121 for the 12-unit requirement under Integrative animal biology, with approval of your faculty adviser.

**Companion and Captive Animal Management .....20**  
 Animal Science 42, 142, Nutrition 123 and Veterinary Medicine 170.  
 Select additional units from any Animal Genetics or Animal Science course, or from Nutrition 115, 122, Avian Science 100, or other courses approved by your faculty adviser.

**Equine Management .....20**  
 Animal Science 15, 115, 141 and one of Animal Science 125, 126 or 127.  
 Select additional units from any Animal Genetics or Animal Science course, or from Nutrition 115, 122, or other courses approved by your faculty adviser.

**Laboratory Animal Management .....20**  
 Animal Science 42, 140, Nutrition 123 and Veterinary Medicine 170.  
 Select additional units from any Animal Genetics, Animal Science course, or from Nutrition 115, 122, or other courses approved by your faculty adviser.

**Livestock and Dairy Management .....20**  
 Select two of Animal Science 143, 144 and 146; one of Animal Science 145 and 147; Nutrition 115.  
 Select additional upper division units from any Animal Genetics or Animal Science course, or from Nutrition 122, 123, or other courses approved by your faculty adviser.

**Unrestricted Electives .....30-44**  
**Total Units for Degree .....180**

**Master Adviser.** J.G. Fadel.

**Advising Center** for the major, including peer advising, is located in 1202 Meyer Hall, 530-752-6118. *Students must secure their academic adviser through this office upon entering the major.*

## Minor Program Requirements

The Department of Animal Science offers five minor programs open to students majoring in other disciplines who wish to complement their study programs with a minor in Animal Science. Some courses have required prerequisites not included as part of the minor, and students should plan accordingly.

### UNITS

**Animal Science—Animal Biology .....20**  
 Animal Science 15, 42, or 41 and 41L.....3-4  
 Animal Science 103 or 104 .....3  
 Animal Science 123, 124, or Neurobiology, Physiology and Behavior 121 and 121L .....4  
 Additional upper division courses .....9-10  
 Select additional units to complete the 20-unit total from upper division Animal Science courses, Animal Genetics courses, Neurobiology, Physiology and Behavior 121, 121L, Nutrition 115, 122, 123.

**Animal Science—Animal Genetics .....20**  
 Animal Science 15, or 41 with 41L, or 42.....4  
 Animal Genetics 107, 111 .....9  
 Additional upper division courses .....7  
 Select additional units to complete the 20-unit total from upper division Animal Science courses, Animal Genetics courses, Avian Science 103, Neurobiology, Physiology and Behavior 121, 121L, Nutrition 115, 122, 123.

**Animal Science—Aquaculture .....20**  
 Animal Science 18 .....4  
 Animal Science 118, 119 .....8  
 Additional upper division courses .....8  
 Select additional units to complete the 20-unit total from upper division Animal Science courses, Animal Genetics courses, Applied Biological Systems Technology 161, Nutrition 124, Wildlife, Fish and Conservation Biology 121.

**Animal Science—Dairy/Livestock .....20**  
 Animal Science 41, 41L .....4  
 Animal Science 104 .....3  
 Additional upper division courses .....13  
 Select 4 or 8 units from Animal Science 143, 144, 146.  
 Select additional units to complete the 20-unit total from upper division Animal Science courses, Animal Genetics courses, Neurobiology, Physiology and Behavior 121, 121L, Nutrition 115, 122, 123.

**Animal Science—Equine .....21**  
 Animal Science 15 .....4  
 Animal Science 103 or 104 .....3  
 Animal Science 115, 141 .....8  
 Animal Science 125 or 126 .....3  
 One additional upper division course .....3  
 Select from from upper division Animal Science courses, Animal Genetics courses, Neurobiology, Physiology and Behavior 121, 121L, Nutrition 115, 122, 123.

**Minor Adviser.** J.G. Fadel.

**Graduate Study.** The Department of Animal Science offers a program of study and research leading to the M.S. degree. In addition, the Master of Agriculture and Management (M.A.M.) is offered by the Department of Animal Science in conjunction with the Graduate School of Management. Detailed information about each of these programs may be obtained by contacting the Advising Center listed above.

**Graduate Adviser.** T.R. Famula (M.S. degree); I. Garrett (M.A.M. degree).

## Courses in Animal Science (ANS)

### Lower Division Courses

**1. Domestic Animals and People (4) I.** Famula  
 Lecture—3 hours; laboratory—3 hours. Animal domestication and factors affecting their characteristics and distribution. Animal use for food, fiber, work, drugs, research and recreation; present and future roles in society. Laboratory exercises with beef and dairy cattle, poultry, sheep, swine, laboratory animals, fish, horses, meat and dairy products. GE credit: SciEng, Wrt.

**2. Introductory Animal Science (4) III.** Berger  
 Lecture—3 hours; laboratory—3 hours. Prerequisite: course 1 and Biological Sciences 1A recommended. Growth, reproduction, lactation, inheritance, nutrition, and disease control in domesticated animals and species used in aquaculture; the application of sciences to animal production. GE credit: SciEng, Wrt.

**15. Introductory Horse Husbandry (3) II.** Roser  
 Lecture—3 hours. Prerequisite: course 2 recommended. Introduction to care and use of light horses emphasizing the basic principles for selection of horses, responsibilities of ownership, recreational use and raising of foals.

**18. Introductory Aquaculture (4) I.** Conklin  
 Lecture—3 hours; discussion—1 hour. Historical and contemporary aquacultural practices. Interaction between the aqueous culture environment and the biology of aquatic animals. Impact of economics and governmental policies on the development of aquaculture. Interaction of aquacultural practices with larger societal goals. GE credit: SciEng.

**21. Livestock and Dairy Cattle Judging (2) III.** Van Liew  
 Laboratory—6 hours. Prerequisite: course 1 or 2 recommended. Evaluation of type as presently applied to light horses, meat animals and dairy cattle. Relationship between form and function, form and carcass quality, and form and milk production.

**\*22A. Animal Evaluation (2) I.** Van Liew  
 Laboratory—3 hours; discussion—1 hour. Prerequisite: course 21 or the equivalent. Study of domestic livestock species with emphasis on visual appraisal, carcass evaluation, and application of performance information. Accurate written and oral descriptions and occasional weekend field trips required. This course is prerequisite to intercollegiate judging competition. Offered in alternate years. (P/NP grading only.)

**\*22B. Animal Evaluation (2) II.** Liew  
 Laboratory—3 hours; discussion—1 hour. Prerequisite: course 22A or the equivalent. Continuation of course 22A with emphasis on specific species: visual appraisal, carcass evaluation, and application of performance information. Accurate written and oral descriptions and occasional weekend field trips required. This course is prerequisite to intercollegiate judging competition. Offered in alternate years. (P/NP grading only.)

**41. Domestic Animal Production (2) I.** DePeters  
 Lecture—2 hours. Principles of farm animal management, including dairy and beef cattle, sheep, and swine. Industry trends, care and management, nutrition, and reproduction.

**41L. Domestic Animal Production Laboratory (2) I, II.** DePeters  
 Laboratory—6 hours. Prerequisite: course 41 (may be taken concurrently). Animal production principles and practices, including field trips to dairy cattle, beef cattle, sheep and swine operations, and campus laboratories. (P/NP grading only.)

**42. Introductory Companion Animal Biology (4) II.** Oberbauer  
 Lecture—3 hours; discussion—1 hour. Companion animal domestication. Historical, contemporary perspectives. Legislation concerning companion animals. Selected topics in anatomy, physiology, genetics, nutrition, behavior and management. Scientific methods in studying the human-animal bond. Discussions: application of biological concepts to problems related to companion animals. GE credit: SciEng, Wrt.

**49. Animal Management Practices** (2) I, II, III.

Van Liew

Discussion—1 hour; laboratory—3 hours. The application of the principles of elementary biology; the art and science of management of a specific animal species. Each quarter students will be able to choose from the following sections: beef, dairy cattle, dairy goats, horses, sheep, swine, laboratory animals. May be repeated up to four times with a different species. (P/NP grading only.)

**92. Internship in Animal Science** (1-12) I, II, III.

The Staff (Department Chairperson in charge)

Internship—3-18 hours. Prerequisite: consent of instructor. Internship off and on campus in dairy, livestock, and aquaculture production, research and management; or in a business, industry, or agency associated with these or other animal enterprises. All requirements of Internship Approval Request form must be met. (P/NP grading only.)

**98. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses****103. Animal Welfare** (3) I. Mench

Lecture/discussion—3 hours. Prerequisite: basic course in general/animal biology (e.g., Animal Science 2 or Biological Sciences 1B or 10) and upper division standing. The application of principles of animal behavior and physiology to assessment and improvement of the welfare of wild, captive, and domestic animals. Topics include animal pain, stress, cognition, motivation, emotions, and preferences, as well as environmental enrichment methods.

**104. Principles of Domestic Animal Behavior** (3) III. Price

Lecture—3 hours. Prerequisite: Biological Sciences 1A or 1B or the equivalent. Basic principles of animal behavior as applied to domesticated species. Emphasis will be placed on behavioral development and social behavior. External (exogenous) and physiological mechanisms influencing behavior will be discussed. Offered in alternate years. GE credit: SciEng.

**\*105. Domestic Animal Behavior** (2) II. Price

Lecture—2 hours. Prerequisite: an introductory animal behavior course (e.g., course 104, Psychology 150, Neurobiology, Physiology and Behavior 102) or consent of instructor. Application of the principles of animal behavior in the management of domestic animals. Includes reproductive behavior, feeding behavior, agonistic behavior, animal handling and human-animal interactions. Offered in alternate years. GE credit: SciEng.

**\*106. Domestic Animal Behavior Laboratory** (2) II. Price

Laboratory—6 hours. Prerequisite: course 104 or the equivalent. Research experience with the behavior of large domestic animals. Experimental design, methods of data collection and analysis, and reporting of experimental results. GE credit: SciEng, Wrt.

**115. Advanced Horse Production** (4) I. Roser

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 15; Biological Sciences 101; Nutrition 110 or 115; Neurobiology, Physiology and Behavior 101; or consent of instructor. Feeding, breeding, and management of horses; application of the basic principles of animal science to problems of production of all types of horses. Designed for students who wish to become professionally involved in the horse industry. GE credit: SciEng.

**118. Fish Production** (4) II. Doroshov

Lecture—3 hours; discussion—1 hour. Prerequisite: Wildlife, Fish and Conservation Biology 120 and 121. Current practices in fish production; relationship between the biological aspects of a species and the production systems, husbandry, management, and marketing practices utilized. Emphasis on species currently reared in California.

**\*119. Invertebrate Aquaculture** (4) III. Conklin

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1B. Management, breeding and feeding of aquatic invertebrates; application of basic principles of physiology, reproduction, and nutrition to production of mollusks and crustaceans for human food; emphasis on interaction of species biology and managerial techniques on production efficiencies.

**120. Principles of Meat Science** (3) III.

Bandman (Food Science and Technology), Lee  
Lecture—3 hours. Prerequisite: Biological Sciences 1A. Anatomical, physiological, developmental, and biochemical aspects of muscle underlying the conversion of muscle to meat. Includes meat processing, preservation, microbiology, and public health issues associated with meat products. (Same course as Food Science and Technology 120.) GE credit: SciEng.

**120L. Meat Science Laboratory** (2) III. Lee,

Bandman (Food Science and Technology)  
Discussion—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1A; course 120 (may be taken concurrently). Laboratory exercises and student participation in transformation of live animal to carcass and meat, structural and biochemical changes related to meat quality, chemical and sensory evaluation of meat, and field trips to packing plant and processing plant. (Same course as Food Science and Technology 120L.)

**123. Animal Growth and Development** (4) III.

Sainz

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: Biological Sciences 1B; Biological Sciences 104 and Molecular and Cellular Biology 150 recommended. Growth and development of animals from conception to maturity, viewed from practical and biological perspectives; includes genetic, metabolic, nutritional control of cell and organism function. GE credit: SciEng.

**124. Lactation** (4) II. Baldwin

Lecture—3 hours; laboratory—3 hours. Prerequisite: Neurobiology, Physiology and Behavior 101; Nutrition 110; or the equivalent background knowledge. Consideration of the biochemical, genetic, physiological, nutritional, and structural factors relating to mammary gland development, the initiation of lactation, the composition of milk and lactational performance. GE credit: SciEng, Wrt.

**125. Equine Exercise Physiology** (3) II. Roser

Lecture—3 hours. Prerequisite: Neurobiology, Physiology and Behavior 101. Distance learning class broadcast from Cal Poly, Pomona, on basic and applied physiology of the exercising horse. Includes physiological systems, gait analysis, lameness, pharmacology, sports medicine; sport horse performance evaluation and conditioning. (Students and instructor have two-way communication capabilities.)

**126. Equine Nutrition** (3) I. Roser

Lecture—3 hours. Prerequisite: course 15; Nutrition 110 or 115. Distance learning class broadcast from Cal Poly, Pomona and CSU Fresno on equine nutrition. Includes equine digestion, digestive physiology, diet development and evaluation, and the relationship of the topics to recommended feeding practices and nutritional portfolios.

**127. Advanced Equine Reproduction** (3) III.

Roser

Lecture—3 hours. Prerequisite: an upper division physiology course (e.g., Neurobiology, Physiology and Behavior 101) and an advanced horse production and management course (e.g., course 115). Distance learning course that provides in-depth knowledge of the reproductive physiology, anatomy and endocrinology of the mare and stallion. Emphasis on structure/function relationships as they are applied to improving equine reproductive management and efficiency.

**128. Agricultural Applications of Linear Programming** (4) II. Fadel

Lecture—2 hours; laboratory—2 hours; discussion—1 hour. Prerequisite: upper division standing and Agricultural Systems and Environment 21 or the equivalent. Applications of linear programming in agriculture,

emphasizing resource allocation problems and decision making. Problems include crop production, ration formulation, and farm management. Hands-on experience in developing linear programs and interpreting the results.

**131. Reproduction and Early Development in Aquatic Animals** (4) III. Doroshov

Lecture—3 hours; laboratory—3 hours. Prerequisite: Molecular and Cellular Biology 150; Wildlife, Fish and Conservation Biology 120, 121; or consent of instructor. Physiological and developmental functions related to reproduction, breeding efficiency and fertility of animals commonly used in aquaculture.

**\*135. Experimental Biochemistry Laboratory** (4) I. Calvert

Lecture—2 hours; laboratory—6 hours. Prerequisite: one course each in biochemistry and physiology; consent of instructor. Course designed to introduce student to concepts of research. Experience in research animal care, tissue sampling and handling techniques, a variety of commonly used laboratory analytical methods, cost analysis, literature review and publication writing are provided. Not open to students who have received credit for Molecular and Cellular Biology 120L.

**136. Aquatic Animal Laboratory** (2) III. Hung

Lecture—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 102; basic understanding of general biology, chemistry and biochemistry. Care and maintenance of fish culture in research, production, and personal use. Students conduct an 8-week growth trial with proper experimental design, care and maintenance of fish, and data collection, interpretation and reporting.

**140. Management of Laboratory Animals** (4) I.

The Staff

Lecture—3 hours; laboratory—3 hours. Prerequisite: Animal Genetics 107; Nutrition 110 or 115; Neurobiology, Physiology and Behavior 101. Application of the concepts of nutrition, physiology, and genetics to maintenance of experimental animals. Management procedures will be examined in view of experimental needs, government regulations, and animal health.

**141. Equine Enterprise Management** (4) II.

Roser/Garnett

Lecture/discussion—4 hours. Prerequisite: course 115; Economics 1A, 1B recommended. Examination of the concepts and principles involved in the operation of an equine enterprise. Essential aspects of equine enterprise management, including equine law, marketing, cash flow analysis, and impact of state and federal regulations. GE credit: SocSci, Wrt.

**143. Pig and Poultry Care and Management** (4)

I. Garnett, Ernst, Berger

Lecture—3 hours; laboratory—3 hours; Saturday field trips. Prerequisite: Nutrition 115 or 110; Neurobiology, Physiology and Behavior 101. Care and management of swine, broilers and turkeys as related to environmental physiology, nutrition and metabolism, disease management and reproduction.

**144. Beef Cattle and Sheep Production** (4) I.

Sainz

Lecture—3 hours; laboratory—3 hours; one or two Saturday field trips. Prerequisite: course 41, Animal Genetics 107, Nutrition 115, or consent of instructor; a course in Range Science and a course in microcomputing are recommended. Genetics, physiology, nutrition, economics and business in beef cattle and sheep production. Resources used, species differences, range and feedlot operations. Emphasis on integration and information needed in methods for management of livestock enterprises.

**145. Meat Processing and Marketing** (4) II. Lee

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 143 or 144 or consent of instructor. Distribution, processing and marketing of meat and meat products. Meat and meat animal grading and pricing. Government regulations and social/consumer concerns. Future trends and impact on production management practices. Includes poultry.

**146. Dairy Cattle Production** (4) III. DePeters

Lecture—3 hours; laboratory—3 hours; one mandatory Saturday field trip. Prerequisite: course 124, Ani-

mal Genetics 107, and Nutrition 115, or consent of instructor. Scientific principles from genetics, nutrition, physiology, and related fields applied to conversion of animal feed to human food through dairy animals. Management and economic decisions are related to animal biology considering the environment and animal well-being. GE credit: SciEng, Wrt.

**147. Dairy Processing and Marketing (3) II.**  
Garnett

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 146 or consent of instructor. Examination of distribution systems, processing practices, product quality, impact of government policy (domestic and foreign), marketing alternatives, and product development.

**148. Enterprise Analysis in Animal Industries (4) III.** Garnett

Lecture/discussion—4 hours. Prerequisite: course 141 or 145 or 147 or consent of instructor. Examination and application of decision making and problem solving in the production enterprise. The areas of production analysis, problem solving, risk analysis and cost-benefit analysis will be examined in terms of the total enterprise. GE credit: SocSci, Wrt.

**190C. Research Group Conference (1) I, II, III.**  
The Staff (Chairperson in charge)

Discussion—1 hour. Prerequisite: advanced standing; consent of instructor. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. (P/NP grading only.)

**192. Internship in Animal Science (1-12) I, II, III.**  
The Staff (Chairperson in charge)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Internship off and on campus in dairy, livestock and aquaculture production, research and management; or in a business, industry, or agency associated with these or other animal enterprises. All requirements of Internship Approval Request Form must be met. (P/NP grading only.)

**\*193. Introduction to Animal Science Research (2) I, III.** Conklin

Lecture—1 hour; discussion—1 hour. Prerequisite: upper division standing. Consideration of ethics in animal research; basic elements of a research plan, project design, and literature review; preparation of a research proposal. Mid-term report and preparation of a brief research proposal. GE credit: Wrt.

**194. Research in Animal Science (3) I, II, III**  
The Staff

Laboratory—6 hours; discussion—1 hour. Prerequisite: upper division standing, course 193, one laboratory course in animal biology and consent of instructor. Research with a faculty mentor. Weekly discussion and laboratory on specific research topic. May include a seminar to research group. Choose from sections: (1) Animal Behavior; (2) Animal Genetics; (3) Animal Nutrition; (4) Animal Physiology. May be repeated for credit for a total of four times.

**\*194HA-194HB-194HC. Undergraduate Honors Thesis in Animal Science (4-4-4) I-II-III.**

The Staff (Chairperson in charge)  
Lecture—1 hour; laboratory—9 hours. Prerequisite: Neurobiology, Physiology and Behavior 101, Biological Sciences 102, 103 and Nutrition 110; minimum cumulative GPA of 3.2 and selection by the Honors Selection Committee. Students will carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, student will write a thesis and present a public seminar describing his/her research. (Deferred grading only, pending completion of sequence.)

**195. Senior Project in Animal Science (3) I, II, III.** The Staff (Chairperson in charge)  
Studio—6 hours. Prerequisite: senior standing in animal science and consent of instructor. Project analysis of a specific area of animal science; industry, communication, outreach, business and marketing, animal welfare, food safety and research are examples. May be repeated for credit for a total of three times. Limited enrollment.

**197T. Tutoring in Animal Science (1-2) I, II, III.**

The Staff (Chairperson in charge)  
Tutoring—1-2 hours. Prerequisite: Animal Science or related major; advanced standing; consent of instructor. Tutoring of students in lower division animal science courses; weekly conference with instructors in charge of courses; written critiques of teaching procedures. May be repeated once for credit. (P/NP grading only.)

**198. Directed Group Study (1-5) I, II, III.**  
The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5) I, II, III.** The Staff (Chairperson in charge.)

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses**

**200. Strategies in Animal Production (4) I.**  
Garnett

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Examines the forces and issues in animal agriculture through the strategic management process.

**206. Models in Agriculture and Nutrition (3) II.**  
Fadel

Lecture—2 hours; laboratory—3 hours. Prerequisite: Mathematics 16B; Statistics 108. Basic model building principles and techniques for statistical and systems simulation models. Optimization techniques for non-linear experimental designs and management models are presented. Quantitative analysis and evaluation of linear and non-linear equations used in agriculture and nutrition. Offered in alternate years.

**\*235. Advanced Techniques in Animal Nutrition Research (2) I,II,III.** The Staff (Calvert in charge)

Lecture—1 hour; laboratory—3 hours. Prerequisite: graduate standing and consent of instructor. Application of advanced laboratory techniques to animal nutrition research; use of mechanistic models for experimental design and data analyses; surgical preparations useful in nutrition research; review of current literature. May be repeated for credit when topics differ. (S/U grading only.)

**290. Seminar (1) I, II, III.** The Staff (Chairperson in charge)

Seminar—1 hour. Reports and discussions of topics of interest in genetics, nutrition, and physiology as they apply to animal science. (S/U grading only.)

**290C. Research Group Conference (1) I, II, III.**  
The Staff (Chairperson in charge)

Discussion—1 hour. Prerequisite: graduate standing. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. (S/U grading only.)

**291. Current Research in Animal Science (1) I, II, III.** The Staff (Chairperson in charge)

Seminar—1 hour. Prerequisite: graduate standing. Current research in animal science explored at weekly seminars presented by guest lecturers. Discussion of research presented. May be repeated for credit. (S/U grading only.)

**297. Supervised Teaching in Animal Science (2) I, II, III.** The Staff (Chairperson in charge)

Supervised teaching—6 hours. Prerequisite: consent of instructor. Practical experience in teaching Animal Science at the University level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. An evaluation letter sent to the Graduate Adviser with a copy to the student. (S/U grading only.)

**298. Group Study (1-5) I, II, III.** The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (Sect. 1, 2, 3—let-ter grading; from Sect. 4 on—S/U grading only.)

**299. Research (1-12) I, II, III.** The Staff (Chairperson in charge)

(S/U grading only.)

## Animal Science and Management

(College of Agricultural and Environmental Sciences)

### The Major Program

The animal science and management major combines a thorough education in the basic biology of domestic animal species with a strong background in managerial economics. Graduates of this interdisciplinary major will be well positioned to adjust to our rapidly changing world and job market.

**The Program.** The interdisciplinary program in animal science and management combines a fundamental background in the natural sciences (chemistry, biology, physiology, nutrition, genetics, mathematics, and behavior), with an understanding of economics and humanities. After completing preparatory courses, students focus on both the animal species that interest them (horses, cattle, sheep, companion animals, goats, fish, crustaceans or mollusks, among others) and principles of managerial economics (marketing, finance, business organization or systems analysis).

**Career Alternatives.** Job opportunities for successful graduates are plentiful and include positions with banking and financial institutions, agribusiness, Peace Corps, and farms of all scales. Most animal science and management graduates are well prepared for professional study (medical, law, veterinary, and graduate business schools) as well as graduate research programs leading to the M.S. or Ph.D. degrees. Advanced degrees open doors to work as extension specialists, farm advisers, and teachers, and prepare students for international service.

### B.S. Major Requirements:

For convenience in program planning, the *usual* courses taken to satisfy the requirements are shown in parentheses. Equal courses or more comprehensive courses on the same subjects are acceptable. Students preparing for medical or veterinary school can meet professional entrance requirements with those of this major if they plan ahead.

UNITS

|                                                                                                                                                                  |              |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| <b>English Composition Requirement</b> .....                                                                                                                     | <b>7-8</b>   |
| See College requirement .....                                                                                                                                    | 7-8          |
| <b>Preparatory Subject Matter</b> .....                                                                                                                          | <b>73-74</b> |
| Animal science (Animal Science 1 and 2, and either 15 or 18 or 41-41L or 42) .....                                                                               | 11-12        |
| Biological sciences (Biological Sciences 1A, 1B, 1C) .....                                                                                                       | 15           |
| Chemistry (Chemistry 2A, 2B, 8A, 8B) .....                                                                                                                       | 16           |
| Computer science (Agricultural Systems and Environment 21) .....                                                                                                 | 3            |
| Economics (Economics 1A, 1B, Management 11A, 11B) .....                                                                                                          | 18           |
| Mathematics (Mathematics 16A-16B or the more advanced mathematics courses) ..                                                                                    | 6            |

**Faculty**

- John M. Beaton, Ph.D., Associate Professor
- Robert L. Bettinger, Ph.D., Professor
- Monique Borgerhoff-Mulder, Ph.D., Associate Professor
- David J. Boyd, Ph.D., Associate Professor
- Richard T. Curley, Ph.D., Senior Lecturer
- Alexander H. Harcourt, Ph.D., Professor
- Lynne A. Isbell, Ph.D., Assistant Professor
- Suad Joseph, Ph.D., Professor (*Anthropology, Women's Studies*)
- Smadar Lavie, Ph.D., Associate Professor (*Anthropology, Critical Theory*)
- Martha J. Macri, Ph.D., Associate Professor (*Anthropology, Native American Studies*)
- Henry M. McHenry, Ph.D., Professor
- Peter S. Rodman, Ph.D., Professor
- Roger Rouse, Ph.D., Assistant Professor
- Suzana M. Sawyer, Ph.D., Assistant Professor
- G. William Skinner, Ph.D., Professor (*Anthropology, Center for Comparative Research*)
- Carol A. Smith, Ph.D., Professor
- David G. Smith, Ph.D., Professor
- Janet S. Smith, Ph.D., Professor
- Margaret B. Swain, Ph.D., Adjunct Assistant Professor
- Carolyn F. Wall, Ph.D., Senior Lecturer
- Aram A. Yengoyan, Ph.D., Professor

**Emeriti Faculty**

- William G. Davis, Ph.D., Professor Emeritus
- Jack D. Forbes, Ph.D., Professor Emeritus
- Sarah B. Hrdy, Ph.D., Professor Emerita
- David L. Olmsted, Ph.D., Professor Emeritus
- Delbert L. True, Ph.D., Professor Emeritus

## The Major Program

Anthropology is the systematic study of human beings as they live in groups. It is a diverse field and the courses at UC Davis are subdivided into four categories—biological, social/cultural, linguistics, and archaeology. The student of anthropology learns about human social life—past and present—and gains a broad understanding of humans and society.

**The Program.** Students interested in the scientific study of human origins, primate studies and the fundamentals of biology as these relate to *Homo sapiens* should enroll in the Bachelor of Science degree program. Students interested in ethnography and the ethnology of selected culture areas or linguistics (language in culture and society and linguistic field methods) should enroll in the Bachelor of Arts degree program. Students interested in archaeology (prehistory and the techniques and methods of archaeology) should consult an adviser before choosing one degree program or the other.

**Career Alternatives.** Although most practicing anthropologists teach in colleges and universities, a bachelor's degree in anthropology can lead to work in museums, in the Park Service, or in other aspects of public archaeology. A Bachelor of Science degree is a suitable major for premedical and predoctoral preparation. A degree in anthropology with appropriate courses in education also can be good preparation for high school teaching in social or natural sciences.

## A.B. Major Requirements:

|                                                                                                                                                                      | UNITS |

| One additional upper division Anthropology course chosen in consultation with A.B. degree undergraduate adviser.....2-5                                        |       |

**Honors Program.** Candidates for high or highest honors in Anthropology must write a senior thesis under the direction of a faculty member. The thesis project will have a minimum duration of two quarters. Honors candidates must take at least six units of Anthropology 194H. Only students who, at the end of their junior year (135 units), have attained a cumulative grade point average of 3.5 in Anthropology courses will be eligible for the honors program. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

**Teaching Credential Subject Representative.**  
See also the Teacher Education Program.

**Graduate Study.** The Department offers a program of study leading to the M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department Office and at Graduate Studies.

**Graduate Adviser.** C.A. Smith; J.S. Smith.

## Courses in Anthropology (ANT)

### Lower Division Courses

**1. Human Evolutionary Biology** (4) I. McHenry; II. Isbell; III. D. Smith

Lecture—3 hours; discussion—1 hour. Introduction to human evolution. Processes and course of human evolution; man's place in nature and the study of primates; the biological variability of living man and the genetic background. GE credit: SciEng, Div, Wrt.

**2. Cultural Anthropology** (4) I. Yengoyan; II. Boyd; III. Curley

Lecture—3 hours; discussion—1 hour. Introduction to cultural diversity and the methods used by anthropologists to account for it. Family relations, economic activities, politics, gender, and religion in a wide range of societies. Current problems in tribal and peasant societies. GE credit: SocSci, Div, Wrt.

**3. Introduction to Archaeology** (4) I, II, III. Elston  
Lecture—3 hours; discussion—1 hour. Development of archaeology as an anthropological study; objectives and methods of modern archaeology. GE credit: SocSci, Div.

**4. Introduction to Anthropological Linguistics** (4) I. J.S. Smith; II. Macri

Lecture—3 hours; discussion—1 hour. Exploration of the role of language in social interaction and world view, minority languages and dialects, bilingualism, literacy, the social motivation of language change. Introduction of analytical techniques of linguistics and demonstration of their relevance to language in socio-cultural issues. GE credit: SocSci, Div, Wrt.

**\*5. Proseminar in Biological Anthropology** (4) III. Rodman

Seminar—3 hours; term paper. Prerequisite: course 1 and consent of instructor. Course primarily for majors. Integration of related disciplines in the study of biological anthropology through discussion and research projects. Principal emphasis in human adaptation to the environment. GE credit: SciEng, Div, Wrt.

**15. Behavioral and Evolutionary Biology of the Human Life Cycle** (5) II. Harcourt

Lecture—3 hours; discussion—1 hour; term paper. Introduction to the biology of birth, childhood, marriage, the family, old age, and death. Examines comparative characteristics of nonhuman primates and other animals as well as cross-cultural variation in humans by study of selected cases. GE credit: SciEng, Div, Wrt.

**20. Comparative Cultures** (4) III. Curley

Lecture—3 hours; discussion—1 hour. Introduction to the anthropological study of cultural diversity. Case studies of eight societies will be presented to illustrate and compare the distinctive features of major cultural regions of the world. Concludes with a discussion of modernization. GE credit: SocSci, Div.

**\*21. Anthropological Perspectives on the Politics of Culture in the United States** (4) III. The Staff

Lecture—3 hours; discussion—1 hour. Primarily for non-majors. Examines what comparative anthropological analysis can contribute to an understanding of the high-profile issues of cultural politics (the so-called "culture wars") in our own society. Offered in alternate years. GE credit: SocSci, Div, Wrt.

**\*23. Introduction to World Prehistory** (4) III. Beaton

Lecture—3 hours; discussion—1 hour. Broadly surveys patterns and changes in the human species' physical and cultural evolution from earliest evidence for "humanness" to recent development of large-scale complex societies or "civilizations." Lectures emphasize use of archaeology in reconstructing the past. GE

credit: SocSci, Div, Wrt.

**98. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

Primarily intended for lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates**

(1-5) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

**101. Human Ecology** (4) II.

Richerson/Borgerhoff-Mulder

Lecture—3 hours; discussion—1 hour. Prerequisite: one course from course 1, 2, Environmental Studies 30, Genetics 10, or the equivalent. Critical variables in the processes that relate to humans and their environment. Emphasis on the biological, cultural, social, and psychological forces which encourage stability or change in human ecological relationships. (Same course as Environmental Science and Policy 101.) GE credit: SocSci.

#### (a) Anthropological Linguistics

**\*110. Elementary Linguistic Analysis** (4) III.

Macri

Lecture—3 hours; discussion—1 hour. Prerequisite: course 4 or Linguistics 1. Analytical techniques of articulatory phonetics, phonemics, morphophonemics, and morphology. GE credit: SocSci.

**\*112. Comparative Linguistics** (4) I.

Lecture—3 hours; discussion—1 hour. Prerequisite: course 110. Linguistic prehistory, historical linguistics, and reconstruction. GE credit: SocSci.

**\*113. Indigenous Languages of North America**

(4) II. Macri

Lecture—3 hours; discussion—1 hour. Prerequisite: course 4, Linguistics 1, or consent of instructor. Survey of indigenous languages of North America, including their classification, linguistic characteristics, areal features, and socio-cultural aspects. GE credit: SocSci, Div.

**117. Language and Society** (4) III. J.S. Smith

Lecture—3 hours; discussion—1 hour. Prerequisite: course 4, or Linguistics 1 and course 2. Consideration of language in its social context. Methods of data collection and analysis; identification of socially significant linguistic variables. Contributions of the study of contextualized speech to linguistic theory GE credit: SocSci, Div, Wrt.

**119. World Writing Systems** (4) I. Macri

Lecture—3 hours; discussion—1 hour. Prerequisite: course 4 or Linguistics 1. Survey of major world writing systems, including pictographic, syllabic, and alphabetic scripts used in both the Old and New Worlds in ancient and modern times, examined from linguistic and socio-political aspects. GE credit: SocSci.

**120. Language and Culture** (4) II. Yengoyan

Lecture—3 hours; discussion—1 hour. Prerequisite: course 4; or course 2 and Linguistics 1. Culture, cognition, meaning, and interpretation; language and the classification of experience; communication and learning in crosscultural perspective. GE credit: SocSci, Div, Wrt.

#### (b) Social-Cultural Anthropology

**\*121N. Indigenous Peoples and Resource Conservation** (4) III. Borgerhoff-Mulder

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or Geology 1 or Environmental Studies 30. Integration of the interests of resident and indigenous peoples with the conservation of natural resources and ecosystems, using case study examples from both the developing and developed world. Offered in alternate years. GE credit: SocSci.

**\*122. Economic Anthropology** (4) III. Davis

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Economic behavior in nonindustrial societies; its social and cultural setting and its modern changes. GE credit: SocSci, Div, Wrt.

**123A. Anthropology and Political Economy** (4) II. C. Smith

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Survey of anthropological approaches to the study of political organizations; interrelationships among political institutions, economic infrastructures and cultural complexity. GE credit: SocSci, Div, Wrt.

**\*123B. Resistance, Rebellion, and Popular Movements** (4) III. The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or the equivalent. Analysis of popular protest in Third World and indigenous societies ranging from covert resistance to national revolts. Comparative case studies and theories of peasant rebellions, millenarian movements, social bandits, Indian "wars", ethnic and regional conflicts, gender and class conflicts. GE credit: SocSci, Div, Wrt.

**123C. Multiculturalism and Minority Identity** (4) III. Lavie

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Recent developments in conceptions of minority identity from the point of view of minority populations in the Third World, Europe, and the United States. Challenges to existing categories of gender, race, and class, as well as to nationalism and imperialism. Offered in alternate years.

**124. Religion in Society and Culture** (4) II.

Curley

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Discussion of anthropological theories of religion with emphasis on non-literate societies. Survey of shamanism, magic and witchcraft, ritual and symbols, and religious movements. Extensive discussion of ethnographic examples and analysis of social functions of religious institutions. GE credit: SocSci, Div, Wrt.

**125A. Structuralism and Symbolism** (4) II.

Rouse

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Survey of anthropological approaches to understanding the logic of structuralism and symbolism in cultural analysis. Focus on how structural and symbolic interpretations relate to cultural and linguistic universals and to the philosophical basis of relativism in the social sciences. (Former course 125.) GE credit: SocSci, Div.

**125B. Postmodernism(s) and Culture** (4) I. Lavie

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. The U.S.–European postmodern condition. "Modernity" as an incomplete project for subordinated groups. The economic, social, technological and political conditions leading to postmodern aesthetics, in comparison with postcolonialism, feminism and minority discourse. GE credit: SocSci, Div, Wrt.

**126. Anthropology of Development** (4) I. Boyd

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Survey of theories of social and economic change. Social and economic consequences of technological innovation. Application of anthropological theory to case studies of rural economy and society. GE credit: SocSci, Div, Wrt.

**127. Urban Anthropology** (4) III. Walton

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Survey of approaches to urban living: political structures, organization of labor, class relations, world views. The evolution of urban life and its contemporary dilemmas. Cross-cultural comparisons discussed through case studies. GE credit: SocSci, Div, Wrt.

**128. Kinship and Social Organization** (4) I. Davis

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Theoretical discussion of social organization with primary emphasis on typology and classification of family and kinship systems. GE credit: SocSci, Div, Wrt.

**\*129. Self, Identity, and Family** (4) I. Joseph

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Exploration of self, identity, and family systems cross-culturally. Impact of class, gender, race, ethnicity, ruralization, urbaniza-

tion, and globalization on notions of selfhood in different social/cultural systems. Offered in alternate years. GE credit: SocSci, Div, Wrt.

**130. Gender and Sexuality (4) III.** The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Gender and sexuality in foraging bands, horticultural and pastoral tribes, agricultural and industrial states. Debates on cultural evolution and distribution of gender hierarchies. Impact of politics, economics, religion, social practices, women's movements on gender and sexuality. Culture, nature and sexuality. GE credit: SocSci, Div, Wrt.

**\*131. Women and Development (4) III.** Joseph  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Current Third World and Western development issues concerning women in agriculture, industry, international division of labor, political movements, revolutions, politics of health, education, family and reproduction. Impact of colonialism, capitalism, the world system, and international feminism on women and development. GE credit: SocSci, Div, Wrt.

**\*132N. Ethnohistory (4) I, II.** Walton  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 and one other course in either history or anthropology. Course focuses on method and interpretation involved in reconstructing the history and cultural experience of those "people without history" who left no documentary record (pre-literate societies, slaves, peasants). Emphasizes cross-cultural comparison and complementary methods (archaeology, demography, oral history, travel accounts). GE credit: SocSci, Wrt.

**133. Cultural Ecology (4) III.** Orlove  
Lecture—3 hours; discussion—1 hour. Comparative survey of the interaction between diverse human cultural systems and the environment. Primary emphasis given to people in rural and relatively undeveloped environments as a basis for interpreting more complex environments. (Same course as Environmental Science and Policy 133.) GE credit: SocSci, Div, Wrt.

**134N. Cultural Politics of the Environment (4) III.** Sawyer  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Political economy of environmental struggles. Relationship between social inequality (based on race, class and/or gender) and ecological degradation. Articulation of local peoples, national policy, and the international global economy in the contestation over the use of environmental resources. Offered in alternate years. GE credit: SocSci, Div.

**\*135. Peasant Society and Culture (4) III.** C.A. Smith  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Comparative study of peasant communities, utilizing historical and ethnographic sources; analysis of urban-rural relations; problems of economic development and culture change. GE credit: SocSci, Div, Wrt.

**136. Ethnographic Film (4) II.** Curley  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Overview of the use of film in anthropology and its advantages and limitations in comparison to written ethnographic descriptions. Essential features of ethnographic films. Film production in anthropological research and problems encountered in producing films in the field. GE credit: SocSci, Wrt.

**137. Theory in Social-Cultural Anthropology (4) I.** Yengoyan  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Comparative overview of major theoretical orientations in social-cultural anthropology, including evolutionary, historical, functional, ecological, psychological, structural, symbolic, and Marxian approaches. Selected controversies are examined to clarify strengths and limitations of extant theories. GE credit: SocSci.

**\*138. Ethnographic Research Methods in Anthropology (4) II.** Boyd  
Lecture—3 hours; discussion—1 hour. Prerequisite: courses 2 and 137. Basic concepts in and approaches

to ethnographic field research. Problem formulation, research design, qualitative and quantitative data collection procedures, and techniques for organizing, retrieving, and analyzing information. Ethnographic description and constructed inference. Students will organize and conduct individual research projects. GE credit: SocSci.

**139. Race, Class, Gender Systems (4) III.** C.A. Smith  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Comparative analysis of class/race/gender inequality, concentrating on the ways in which beliefs about descent, "blood," and biological difference interact with property and marital systems to affect the distribution of power in society. GE credit: SocSci, Div, Wrt.

**140A. Cultures and Societies of West and Central Africa (4) I.** Curley  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Ethnographic survey of West Africa and Congo Basin with analyses of representative societies which illustrate problems of general theoretical concern. Major consideration will be the continuities and discontinuities between periods prior to European contact and the present. GE credit: SocSci, Div, Wrt.

**\*140B. Cultures and Societies of East and South Africa (4) I.** Curley  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Ethnographic survey of Eastern and Southern Africa with analyses of selected societies which illustrate problems of interest to anthropologists. Major consideration will be given to continuities and discontinuities between periods prior to European contact and the present. GE credit: SocSci, Div, Wrt.

**\*141A. Indians of North America (4) II.** The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Introductory survey of the Indians of North America: origins, languages, civilizations, and history. GE credit: SocSci, Div, Wrt.

**\*141B. Ethnography of California and the Great Basin (4) III.** Bettinger  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Description and analysis of the native peoples of California and the Great Basin, and their lifeways at the time of European contact. (Former course 141C.) GE credit: SocSci, Div, Wrt.

**142. Peoples of the Middle East (4) II.** Lavie  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Peoples of the Middle East (including North Africa). Discussions of class relations, kinship organization, sex/gender systems, religious beliefs and behavior, ethnic relations, political systems. Impact of world systems, political and religious movements and social change. (Former course 136.) GE credit: SocSci, Div, Wrt.

**\*143A. Ethnology of Southeast Asia (4) II.** Yengoyan  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Patterns of culture and social organization from prehistory to the present, in the context of historical, ecological, economic, and political settings. Emphasis on the relation of ethnic minorities to national states. Offered in alternate years. GE credit: SocSci, Div, Wrt.

**\*143B. Philippine Societies and Culture (4) III.** Davis  
Laboratory/discussion—4 hours. Prerequisite: course 2. Introduction to the ethnology of the Philippines. Nature and distribution of ethnic groups, social organizations, cultural patterns and social issues. Emphasis on ethnic minorities, rural populations, effects of modernization, and relation of the state to local groups. GE credit: SocSci, Div, Wrt.

**144. Contemporary Societies and Cultures of Latin America (4) I.** Sawyer  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Introduction to contemporary social structure of Latin America. Origins, maintenance and changes in inequality: economic responses to poverty, socio-cultural responses to discrimination, and political responses to powerlessness. GE credit: SocSci, Div, Wrt.

**\*145. Colonialism and Ethnicity in the Caribbean (4) II.** The Staff  
Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 2 or Afro-American Studies 10. Examination of the contemporary Caribbean nations, sketching their diverse geography, history, and economic life, then showing how selected nations have attempted to solve the problems arising from ethnic diversity in nation-building. GE credit: SocSci, Div, Wrt.

**146. Indigenous Peoples of Mexico and Central America (4) II.** C.A. Smith  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Ethnographic survey of the native peoples of Mexico and Central America: their histories, socio-political organization, mythologies, languages, material culture, writing systems. GE credit: SocSci, Div, Wrt.

**147. Peoples of the Pacific (4) III.** Boyd  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Ethnographic survey of aboriginal cultures of Oceania. Comparison of origins, prehistory, and traditional social organization of peoples of Polynesia, Micronesia, and Melanesia. Consideration of recent changes associated with colonialism and national independence. GE credit: SocSci, Div, Wrt.

**148A. China: Anthropology of a Civilization (4) I.** Skinner  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. An analysis of the society, culture and political economy of late traditional China to 1949. Special attention is given to spatial differentiation and historically specific social/cultural change. Offered in alternate years. GE credit: SocSci, Div, Wrt.

**148B. Family, Gender, and Population in Contemporary China (4) II.** Skinner  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Analysis of family process, gender relations, and population dynamics in relation to state power in China since 1949. GE credit: SocSci, Div, Wrt.

**\*148C. Ethnic Diversity of China (4) III.** Swain  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Analysis of China's ethnic diversity through time and space. Interethnic relations in changing state systems examined among Han majority subethnic groups (e.g., Cantonese, Hakka) and borderlands minorities (e.g., Hmong, Tibetan). Emphasizes intersections of gender and class with race/ethnicity/nationality. Offered in alternate years. GE credit: SocSci, Div, Wrt.

**\*149A. Traditional Japanese Society (4) III.** J. S. Smith  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Patterns of culture and social organization from prehistoric to early twentieth-century Japan. Origins, prehistory, and traditional religious and political systems, marriage and kinship, language and culture. Changes and continuities in traditional and contemporary Japanese culture are addressed. Offered in alternate years. GE credit: SocSci, Div, Wrt.

**\*149B. Contemporary Japanese Society (4) III.** J. S. Smith  
Lecture—3 hours; discussion—1 hour. Introduction to contemporary Japanese social structure, social organization, and patterns of culture. Analysis of rural-urban cultural continuities and contrasts, class relations, political and economic systems, kinship, sex/gender systems, contemporary religious beliefs and behavior, conflict, consensus, and cultural stereotypes. Offered in alternate years. GE credit: SocSci, Div, Wrt.

### (c) Biological Anthropology

**151. Primate Evolution (4) III.** McHenry  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Biological Sciences 1B. Origin and relationships of the prosimians, monkeys, and apes. GE credit: SciEng, Wrt.

**152. Human Evolution (4) II.** McHenry  
Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 1 or Biological Sciences 1B. Nature and results of the evolutionary processes

## 144 Anthropology

involved in the formation and differentiation of humankind. GE credit: SciEng, Wrt.

### **153. Human Biological Variation (4)** I. D.G. Smith

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Biological Sciences 1B. Origin, adaptive significance and methods of analysis of genetic differences among human populations. Special attention will be given to racial differences such as those in blood groups, plasma proteins, red cell enzymes, physiology, morphology, pigmentation and dermatoglyphics. GE credit: SciEng, Wrt.

### **154A. The Evolution of Primate Behavior (5)** I. Harcourt

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 1. Examines ecological diversity and evolution of social systems of prosimians, monkeys, and apes, placing the social behavior of the primates in the context of appropriate ecological and evolutionary theory. GE credit: SciEng, Wrt.

### **154B. Ecology and Sociobiology of Primates (4)** III. Isbell

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 154A, Statistics 13 (or the equivalent), and consent of instructor. Continuation of course 154A for students interested in methods of studying, describing and analyzing the ecology and sociobiology of primates. Laboratory consists of direct observation of captive primates and local birds with quantitative analysis of observations. GE credit: SciEng, Wrt.

### **\*155. Comparative Primate Anatomy (4)** II. The Staff

Lecture—2 hours; laboratory—4 hours. Prerequisite: Biological Sciences 1B. The functional anatomy of monkeys, apes, and man. Emphasis on the anatomical evidence for human evolution. GE credit: SciEng, Wrt.

### **156. Human Osteology (4)** III. McHenry

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 1 or the equivalent. Introductory study of the human skeleton, including bone growth, pathology, radiology, evolution, dentition, and variations in race, sex, and age. GE credit: SciEng.

**\*157. Anthropological Genetics (3)** II. D.G. Smith  
Lecture—3 hours. Prerequisite: course 1 or Biological Sciences 1A, and Genetics 100, 103, 105, or 106. Processes of micro-evolution responsible for biological differences among human populations. Special attention will be given to the adaptive significance of genetic variation in blood group antigens, serum proteins and red cell enzymes. GE credit: SciEng.

### **\*157L. Laboratory in Anthropological Genetics (2)** I. D.G. Smith

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 1 or Biological Sciences 1A, and either Genetics 100 or enrollment in course 157 (concurrently or following). Methods for identifying genetic variation in human blood group antigens, serum proteins and red cell enzymes (hemagglutination), general electrophoresis on starch, cellulose acetate and polyacrylamide, immunodiffusion and immunoelectrophoresis on agarose. (P/NP grading only.) GE credit with concurrent enrollment in course 157: Wrt.

### **158. The Evolution of Females and Males: Biological Perspective (4)** I. Isbell

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Current theoretical frameworks for explaining the evolution of sex differences and for understanding the interrelationship between biological processes and cultural construction of gender roles. GE credit: SciEng, Div, Wrt.

#### *(d) Archaeology and Prehistory*

### **170. Archeological Theory and Method (4)** II. Delacorte

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1 and 3. Introduction to history and development of archeological theory and method, with particular emphasis on the basic dependence of the latter on the former. Stress is on historical development of archaeology in the New World. GE credit: SocSci, Div, Wrt.

### **\*171. Geoarcheology (4)** II. Beaton

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3. Theories, methods, and techniques for studying the geomorphic context of archeological sites. Particular attention to sediment and soil attributes and analyses for understanding important local landform features and developmental histories of archeological sites. Offered in alternate years. GE credit: SocSci, Wrt.

### **172. New World Prehistory: The First Arrivals (4)** III. Elston

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 or consent of instructor. Survey of data relating to the peopling of the New World. Cultural adaptation and development of early inhabitants of North and South America. Offered in alternate years. GE credit: SocSci, Div, Wrt.

### **\*173. New World Prehistory: Archaic Adaptations (4)** III. Bettinger

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 or consent of instructor; course 170 recommended. Introduction to and survey of prehistoric hunting and gathering adaptations across North America with particular emphasis on the East, Southeast, Midwest, Plains, Southwest, and Northwest. Offered in alternate years. GE credit: SocSci, Div, Wrt.

### **176. Prehistory of California and the Great Basin (4)** III. Delacorte

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 or consent of instructor. Description and analysis of the prehistoric peoples of California and the Great Basin from earliest times to European contact. GE credit: SocSci, Div, Wrt.

### **178. Hunter-Gatherers (4)** III. Bettinger

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Study and interpretation of the ancient and modern lifeway in which peoples support themselves with primitive technologies and without benefit of domesticated plants and animals. Offered in alternate years. GE credit: SocSci, Div, Wrt.

### **\*179. Ethnoarchaeology (4)** II. Beaton

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3. Relationships between behavior and its archeological consequences. Ethnography by archeologists examines residence patterning, site-formation processes, hunting/foraging behavior and other artifact creating activities and how these contribute to modern archeological thinking. GE credit: SocSci, Div, Wrt.

### **181. Field Course in Archeological Method (9)** Summer. The Staff

Lecture—6 hours; daily field investigation. Prerequisite: course 3. On-site course in archeological methods and techniques held at a field location in the western United States, generally California or Nevada. Introduces basic methods of archeological survey, mapping, and excavation. GE credit: SciEng.

### **\*183. Laboratory in Archeological Analysis (4)** III. Bettinger

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 181 or consent of instructor. Museum preparation, advanced field investigation, and guidance in preparation of museum material for publication. May be repeated for credit with consent of instructor. Limited enrollment. GE credit: SciEng, Wrt.

### **184. Prehistoric Technology: The Material Aspects of Prehistoric Adaptation (4)** I. Elston

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or 3. Examination of the role of lithic, ceramic, textile and wooden implements as elements in prehistoric survival and development. Emphasis is descriptive, but the significance of material resources as factors in prehistoric adaptation, settlement patterns, and culture change are discussed. GE credit: SocSci.

#### *(e) Special Study Courses*

### **\*191. Topics in Anthropology (4)** I. Bettinger

Lecture/discussion—3 hours; term paper. Prerequisite: junior or senior standing in anthropology. Intensive treatment of a special anthropological topic or problem. May be repeated once for credit when topic differs.

### **192. Internship in Anthropology (1-12)** I, II, III.

The Staff

Internship—3-36 hours. Prerequisite: Upper division standing; consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Anthropology under the supervision of a member of the faculty. Limited to Anthropology majors. May be repeated for a total of 12 units including 192 courses taken in other departments. (P/NP grading only.)

### **194H. Special Study for Honors Students (1-5)** I, II, III. The Staff (Chairperson in charge)

Prerequisite: open only to majors of senior standing who qualify for honors program. Independent study of an anthropological problem involving the writing of an honors thesis. May be repeated for a total of 12 units. (P/NP grading only.)

### **197T. Tutoring in Anthropology (1-5)** I, II, III. The Staff

Tutorial—1-5 hours. Prerequisite: upper division standing with major in Anthropology and consent of Department Chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.)

### **198. Directed Group Study (1-5)** I, II, III. The Staff (Chairperson in charge)

(P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)** I, II, III. The Staff (Chairperson in charge)

(P/NP grading only.)

## Graduate Courses

### **201. History of Anthropological Theory (4)** I. Yengoyan

Lecture—2 hours; discussion—1 hour; term paper. Historical development of the various fields of anthropology with emphasis upon their interrelationships.

### **\*202. History and Theory of Biological Anthropology (4)** II. McHenry

Seminar—3 hours; term paper. History of thought in biological anthropology and analysis of major theoretical problems in the field. Suggested for all first-year graduate students lacking intensive preparation in biological anthropology.

### **\*203. History and Theory of Archaeology (3)** I. Bettinger

Seminar—3 hours. History of thought in archaeology and analysis of research methods.

### **204. Contemporary Issues in Anthropological Theory (4)** II. C.A. Smith

Seminar—3 hours; term paper. Prerequisite: course 2, 137 or consent of instructor. Advanced consideration of fundamental issues in anthropological theory. Emphasis on critical examination of major contemporary debates between proponents of competing theories.

### **205. History and Theory in Anthropological Linguistics (4)** II. J.S. Smith

Seminar—3 hours; term paper. History of thought in anthropological linguistics. Consideration of the historical development of fundamental ideas in anthropological linguistics, of major theoretical issues, and of research methodology.

### **206. Research Design and Method in Social Anthropology (5)** III. Rouse

Seminar—4 hours; individual student-instructor session (in-depth work on proposal writing). Prerequisite: consent of instructor. Formulation of research problems and preparation of research proposals; relationships between theory and method, funding, pre-fieldwork preparations, entering the community, field research techniques, and problems of ethics; intensive work on proposal writing. May be repeated once for credit. Limited enrollment.

### **\*207. Ethnographic Writing (4)** II. Lavie

Seminar—3 hours; term paper. Prerequisite: courses 137, 201, or the equivalent. Relationship between conducting participant observation of others and writing it up, emphasizing the processual rift between the reality of fieldwork and its written representation. Study of various literary genres and textual strategies

used in cultural anthropology. May be repeated for credit. Offered in alternate years.

**209. Objectives and Methods for College Teaching of Anthropology** (2) I, II, III. The Staff Discussion—2 hours; assignments and reports. Prerequisite: normally limited to teaching assistants in anthropology. Analysis of the elements of effective teaching, drawing upon the student's experience in the classroom situation.

**210. Aspects of Culture Structure** (4) Seminar—3 hours; term paper. Analysis of various phases of culture, such as religion, economics, law, and folklore. May be repeated for credit when topic differs.

**211. Advanced Topics in Cultural Ecology** (3) I. Orlove  
Lecture—3 hours. Prerequisite: graduate standing; Anthropology/Environmental Science and Policy 133 or the equivalent or consent of instructor. Discussion and evaluation of theories which relate environment, culture, and social structure. The works of several major theorists will be examined with regard to analytical models, empirical data, research methodologies, and modes of explanation. Offered in alternate years. (Same course as Ecology 211.)

**212. Political Ecology** (4) III. Boyd  
Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary seminar evaluating contributions from ecological anthropology, political economy, cultural constructivism, postmodernism, and feminism towards development of theories of political ecology. Historical relationships between local/global power structures, environmental degradation, and resistance movements. Case studies of desertification, deforestation, mining, conservation, development. Offered in alternate years.

**216. Problems in Archeological Method** (4) II. Elston  
Seminar—3 hours; term paper. Techniques for analyzing archeological data; application to various prehistoric cultures. May be repeated for credit with consent of instructor.

**\*217. Andean Prehistory: Theory and Method** (4) II. Beaton  
Seminar—3 hours; term paper. Prerequisite: consent of instructor. Discussion and evaluation of prehistoric occupations in the Andean Region of South America. Emphasis upon Pre-ceramic and early farming peoples.

**218. Topics in North American Prehistory** (4) I. Bettinger  
Seminar—3 hours; term paper. Advanced study on current problems in North American prehistory and archaeology. May be repeated for credit only if material is unique for that student, and with consent of instructor.

**\*220. Field Course in Linguistics** (4) III. Macri  
Seminar—2 hours; laboratory—2 hours. Prerequisite: courses 110, 111. Techniques of eliciting, recording, and analyzing; work with a native speaker.

**\*221. Rural Transformation in Postcolonial Societies** (4) I. Orlove  
Seminar—3 hours; term paper. Prerequisite: courses 223, 265, or consent of instructor. Problems of rural transformation arising out of political and economic interaction between national elites and rural regional and local populations under varying conditions of induced change in postcolonial societies. Attention will be given to the implications of this interaction for rapid economic growth. May be repeated for credit.

**\*222. Problems in Urban Anthropology** (4) I. Walton  
Seminar—3 hours; one paper. Prerequisite: graduate status or consent of instructor. Study of selected critical problems in urban anthropology. Each quarter focuses on some of the following topics: class, minorities, poverty, migration, religion, politics, kinship, community, sex-roles, communication, ideology, consciousness in urban context. May be repeated for credit.

**\*223. Economic Anthropology** (4) III. Davis  
Seminar—3 hours; term paper. Prerequisite: course 122 or consent of instructor. Selected current methodological and theoretical problems in the analysis of nonindustrial economic systems.

**\*224. Problems in Comparative Religion** (4) I. Curley  
Seminar—3 hours; term paper. Advanced study of current problems in the anthropological study of religion.

**\*225. State and Nation in the Modern World** (4) III. C.A. Smith  
Seminar—3 hours; term paper. A presentation of current anthropological theories of the origins and nature of the modern nation-state in both the First and Third Worlds, with special reference to state ideology (nationalism) and forms of control. Offered in alternate years.

**\*226. Consciousness and Resistance** (4) I. Seminar—3 hours; term paper. Prerequisite: completion of first-year graduate work or consent of instructor. Consideration of approaches to the study of social inequality, and responses of subordinated groups. Emphasis on situating approaches to contemporary social theory, concrete research problems, and political strategies. Topics: formation of consciousness and identity; collective action, accommodation to frontal resistance. Offered in alternate years.

**227. Behavioral Ecology and Anthropology** (4) III. Borgerhoff-Mulder  
Seminar—3 hours; term paper. Prerequisite: graduate standing. An exploration of the links between behavioral ecology and the study of human cultural variation, focusing on social organization, marriage, reproduction, inheritance and subsistence in traditional and historical populations. May be repeated once for credit. Offered in alternate years.

**\*229. Gender, Identity, and Self** (4) III. Joseph  
Seminar—3 hours; term paper. Course covers intersections of gender, identity, and selfhood cross-culturally and historically. Explores how the self is feminized and masculinized, and interfaces with sexual, race, class, work, national, minority, and majority identities under different historical, cultural, and social structural conditions.

**230. Family Systems and Reproduction: Theory and Comparisons** (4) II. Skinner  
Lecture—1.5 hours; seminar—1.5 hours; term paper. Prerequisite: graduate standing in one of the social sciences including History. Comparative examination of family systems in historical context and of reproductive behaviors and strategizing. A major theme is how family-system norms specify the relative desirability of differently configured offspring sets. Cases are drawn from Western Europe and South and East Asia.

**\*232. Political Movements** (4) I. Walton  
Seminar—3 hours; term paper. Prerequisite: completion of first-year graduate work recommended. An interdisciplinary approach to political movements of protest, reform, and revolution emphasizing historical comparison and evaluation of major theoretical approaches including world systems, resource mobilization, state and culture, rational choice, moral economy, social class and gender.

**\*239. Problems in African Society and Culture** (4) I. Curley  
Seminar—3 hours; term paper. Diachronic analyses of traditional institutions in sub-Saharan Africa.

**\*240. Problems in Afro-American Studies** (4) III. Seminar—3 hours; term paper. Comparative studies of selected Black communities in the New World.

**\*241. Topics in North American Ethnology** (4) III. Forbes  
Seminar—3 hours; term paper. Advanced study on current problems in North American ethnography and culture history. May be repeated for credit with consent of instructor.

**\*245. Ethnology of Northern and Central Asia** (4) II.  
Seminar—3 hours; term paper. Prerequisite: a reading knowledge of German, Russian, Chinese, or Japanese. Lectures on the culture aboriginally found north of the Caucasus-Korea line. Supervised study of the primary and secondary sources. Work with informants when available.

**\*246. Ethnology of Europe** (4) II.  
Seminar—3 hours; term paper. Prerequisite: reading knowledge of a European language other than English. Supervised study of the primary and secondary sources dealing with the ethnography and ethnology of the peoples of Europe. Emphasis upon folk, peasant, and minority groups.

**\*252. Human Evolution Seminar** (4) II. McHenry  
Seminar—3 hours; term paper. Prerequisite: course 152 or the equivalent; consent of instructor. Study of selected topics in human evolutionary studies. Each year course will focus on one or more of the following: molecular evolution, primate evolutionary biology, Tertiary hominoids, *Australopithecus*, *Homo erectus*, archaic *Homo sapiens*, brain evolution. May be repeated for credit.

**253. Seminar in Human Biology** (4) I. D.G. Smith  
Seminar—3 hours; term paper. Prerequisite: course 153, 157, or consent of instructor. Study of selected topics in human biology. May be repeated for credit when topics vary. Offered in alternate years.

**254. Current Issues in Primate Sociobiology** (4) II. Isbell  
Seminar—3 hours; term paper. Prerequisite: course 154B or the equivalent. Analysis of primate behavior, with particular emphasis on preparation for field studies. May be repeated for credit when topic differs.

**\*258. Evolution and Human Behavior** (4) III. Isbell  
Seminar—3 hours; term paper. Prerequisite: courses 15; 101; 154 A or 154B; 158 or consent of instructor. Focus will be on reproductive strategies and parental investment. May be repeated for credit when topics vary.

**\*265. Concepts and Problems in Applied Anthropology** (4) II. The Staff  
Seminar—3 hours; term paper. Prerequisite: consent of instructor. Advanced study in culture change; case studies of directed culture change; problems of planning and evaluation; uses of anthropological theory and data in professional fields such as agriculture, public health, administration, and international technical assistance.

**270. Anthropology Colloquium Seminar** (1) I, II, III. The Staff  
Seminar—1 hour. Reports and discussions of recent advances in the four subfields of anthropology. To be presented by guest speakers. May be repeated twice for credit. (S/U grading only.)

**\*292. Seminar in Linguistic Anthropology** (4) II. J.S. Smith  
Seminar—3 hours; term paper. Selected topics in linguistic anthropology. May be repeated for credit when topic differs.

**298. Group Study** (1-4) I, II, III. The Staff (Chairperson in charge) (S/U grading only.)

**299. Research** (1-12) I, II, III. The Staff (Chairperson in charge) (S/U grading only.)

**299D. Dissertation Research** (1-12) I, II, III. The Staff (Chairperson in charge) (S/U grading only.)

## Applied Behavioral Sciences

See Community and Regional Development

# Applied Biological Systems Technology

(College of Agricultural and Environmental Sciences)

**Faculty.** See under Department of Biological and Agricultural Engineering.

**Minor Program.** The Department of Biological and Agricultural Engineering offers a minor in Applied Biological Systems Technology for non-engineering students interested in becoming familiar with engineering terminology and procedures. Course work provides knowledge of material properties, design procedures, fabrication principles, and hardware practices.

## Minor Program Requirements:

UNITS

### Applied Biological Systems Technology .....20

Materials requirement, choose one from  
Applied Biological Systems Technology  
15, 16, or 17 .....

Design requirement, Applied Biological Systems Technology 170 .....

Principles and Practices requirement .....

Select at least nine units from Applied Biological Systems Technology 101, 103, 110L, 121, 134, 142, 145, 147, 161, 163, 165, 175.

Select the remaining units from:

Agricultural Systems and Environment 110A, Animal Science 118, 119, 143, 146, Environmental Horticulture 125, Food Science and Technology 102A, 110A, 110B, 180, Hydrologic Science 110, Plant Biology 172, 172L, 196, Viticulture and Enology 140.

**Minor Advisor.** R.H. Piedrahita.

## Courses in Applied Biological Systems Technology (ABT)

### Lower Division Courses

#### 15. Wood Properties and Fabrication (2) III.

Grismer

Lecture—1 hour; laboratory—3 hours. Physical principles and properties of woods as related to strength, design procedures, and selection and use of wood-working equipment. Experience in working with wood. (P/NP grading only.)

#### 16. Metal Properties and Fabrication (2) I.

J. Rumsey

Lecture—1 hour; laboratory—3 hours. Study of metal properties and of techniques for fabricating in metal. Physical principles, design considerations, effects of techniques on quality and appearance, and evaluation procedures. Experience in working with metal. (P/NP grading only.)

#### 17. Plastic Properties and Fabrication (2) III.

Jenkins

Lecture—1 hour; laboratory—3 hours. Study of the properties of plastic materials and the fundamentals of fabrication techniques. Experience in working with common plastics, with applications to biological systems. (P/NP grading only.)

#### 49. Field Equipment Operation (2) I, III.

J. Rumsey

Lecture—1 hour; laboratory—3 hours. Operation, adjustment, and troubleshooting of farm tractors and field equipment. Principles of operation, equipment terminology and uses of tilling, cultivating, thinning, and planting equipment. Typical sequences in cropping practices. (P/NP grading only.)

#### 52. Field Equipment Maintenance (2) II.

J. Rumsey

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 16 or consent of instructor. Troubleshooting and major repair of field equipment. Intermediate welding to include hardfacing and inert gas welding.

Class projects on maintenance, repair and fabrication. (P/NP grading only.)

#### 90C. Research Conference for Lower Division Students (1) I, II, III. The Staff

Discussion—1 hour. Prerequisite: consent of instructor. Research conference for specialized study in applied biological systems technology. May be repeated for credit. (P/NP grading only.)

#### 98. Directed Group Study (1-5) I, II, III. The Staff (Hills in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 99. Special Study for Lower Division Students (1-5) I, II, III. The Staff (Hills in charge)

(P/NP grading only.)

### Upper Division Courses

#### 101. Engine Technology (3) II. The Staff

Lecture—2 hours; laboratory—3 hours. Prerequisite: upper division standing or consent of instructor. Principles of engine construction and operation. Ideal Otto and Diesel cycles. Engine efficiencies and power measurements. Study of valves, fuels, combustion, carburetion and fuel injection, conventional and electronic ignition, starting and charging, cooling, lubricating and emission control systems.

#### 103. Electric Power Applications (3) III.

The Staff

Lecture—2 hours; laboratory—3 hours. Prerequisite: Physics 1B or 5B. Principles of electric power involved in common home and light industrial applications; experience in techniques of wiring, motor and appliance selection, energy conservation and safety.

#### 110L. Experiments in Food Engineering (2) II.

Singh

Laboratory—6 hours. Prerequisite: Food Science and Technology 110B (may be taken concurrently). Use of temperature sensors; measurement of thermal conductivity and heat transfer in foods; refrigeration, freezing, concentration and dehydration of foods.

#### \*121. Animal Housing and Environment Management (2) II. Zhang

Lecture—2 hours. Prerequisite: Animal Science 1 or 2. Optimal structures and environments for animal growth and comfort; heat and moisture transfer principles; heating, cooling, ventilating principles and equipment; animal housing design; environmental regulations and waste management practices. Offered in alternate years.

#### 134. Pest Control Practices (2) II. Giles

Lecture—2 hours. Prerequisite: Botany 120 or Entomology 100 or Environmental Toxicology 101 or Plant Pathology 125 or the equivalent. Physical aspects of agricultural pest control. Mechanical systems for safe and effective application of pest control materials. Biological, legal and environmental considerations of pest control and pesticide application.

#### 142. Equipment and Technology for Small Farms (2) III. J. Rumsey, Plant

Lecture—1 hour; laboratory—3 hours. Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment. (Same course as International Agricultural Development 142.)

#### 145. Field Equipment Technology (2) III.

J. Rumsey

Lecture—1 hour; laboratory—3 hours. Prerequisite: upper division standing and Physics 1A or 5A. Function, construction, and operating principles of field equipment for harvesting fruit, nut, vegetable, and field crops. Principles of operation and construction of hydraulic systems. Function and application of pumps, motors, and valves for controlling field equipment.

#### 147. Field Equipment Management (2) I, II, III.

J. Rumsey

Lecture—2 hours. Prerequisite: course 49 (may be taken concurrently) or consent of instructor. Fundamentals of field machinery management to include machinery capacity, selection from capacity and economic standpoints, scheduling, acquisition options, and trade-in considerations. Estimation of operating costs of field machinery.

#### 161. Water Quality Management for Aquaculture (3) II. Piedrahita

Lecture—3 hours. Prerequisite: Biological Sciences 1B, Mathematics 16B, Chemistry 2B. Basic principles of water chemistry and water treatment processes as they relate to aquacultural systems.

#### 163. Aquaculture Systems Engineering (3) III. Piedrahita

Lecture—3 hours. Prerequisite: course 161. Design of aquacultural systems: design methodology, principles of fluid mechanics, site selection and facility planning, management operations, computer modeling.

#### 165. Irrigation Practices for an Urban Environment (2) III. Hills

Lecture—2 hours. Prerequisite: Physics 1A or 5A. Basic design, installation, and operation principles of irrigation systems for turf and landscape: golf courses, parks, highways, public buildings, etc. Emphasis on hardware association with sprinkler and drip/trickle systems.

#### 170. Design in Biological Systems Technology (3) II. Miles, Steinke

Lecture—2 hours; laboratory—3 hours. Prerequisite: Physics 1A or 5A and course 15, 16, or 17. Introduction and application of design procedures and tools. Techniques are presented for solving design problems and selecting appropriate materials. Catalog and handbook utilization, government safety regulations, and environmental considerations are discussed.

#### 175. Introduction to Precision Agriculture (3) I.

Upadhyaya

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Agricultural Systems and Environment 21 or the equivalent computer experience. Concepts of precision agriculture. Variability in yield, yield monitors and mapping, remote sensing, variability in plant and soil conditions, global positioning system (GPS), geographic information system (GIS), sensors and actuators, map controlled variable rate application (VRT), socio-economic aspects of precision agriculture.

#### 180. Introduction to Geographic Information Systems (5) I. Plant, Wallender

Lecture—2 hours; laboratory/discussion—6 hours. Prerequisite: Agricultural Systems and Environment 21; Mathematics 16A-16B, and Statistics 13, or the equivalents. Management and analysis of georeferenced data. Spatial database management and modeling. Applications of agriculture and biological resource management. Cartographic modeling. Vector-based geographic information system.

#### 181. Geographic Information Systems Modeling (5) II. Wallender

Lecture—2 hours; laboratory—9 hours. Prerequisite: course 180. Advanced topics in Geographic Information Systems (GIS), such as raster-based GIS (GRID), triangular irregular network (TIN), and networks. Use of GIS ARC/INFO for remote sensing and modeling of environmental terrain, transportation, hydrology, and site specific crop management.

#### 182. Environmental Analysis with Geographical Information Systems (GIS) (5) III.

M. Zhang

Lecture—2 hours; laboratory/discussion—6 hours. Prerequisite: course 180; course 181 recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment. Precision farming. Natural resource management. Spatial database structures. Remote sensing applications. Data quality and error analysis in GIS. (Same course as Hydrologic Science 182.)

#### 190C. Research Conference for Advanced Undergraduates (1) I, II, III. The Staff

Discussion—1 hour. Prerequisite: consent of instructor. Research conferences for specialized study in applied biological systems technology. May be repeated for credit. (P/NP grading only.)

#### 192. Internship in Applied Biological Systems Technology (1-5) I, II, III. The Staff (Hills in charge)

Internship—3-15 hours. Prerequisite: upper division standing; approval of project prior to period of intern-

ship. Supervised internship in applied biological systems technology. May be repeated for credit. (P/NP grading only.)

**197T. Tutoring in Applied Biological Systems Technology** (1-5) I, II, III. The Staff

Tutorial—1.5 hours. Prerequisite: upper division standing and consent of instructor. To provide teaching experience to upper division undergraduate students. Activities will vary depending on the nature of the course. May include (but not limited to) assistance in laboratory sessions, advising on projects, tutoring on course material, and grading of homework assignments. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III.

The Staff (Hills in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Hills in charge)

(P/NP grading only.)

**Graduate Courses**

**233. Advanced Pest Control Practices** (3) II. Giles

Lecture—2 hours; laboratory—3 hours. Prerequisite: introductory class in entomology, plant pathology, weed science or similar discipline. Practical and theoretical considerations of pest control systems and techniques. Design, selection and use of mechanical systems for field, orchard, greenhouse and vector control use. Biological, legal and environmental considerations in pest control and pesticide application.

**290C. Graduate Research Conference** (1) I, II, III. The Staff

Discussion—1 hour. Prerequisite: consent of instructor. Research problems, progress, and techniques in applied biological systems technology. May be repeated for credit. (S/U grading only.)

**298. Group Study** (1-5) I, II, III. The Staff (Hills in charge)

**299. Research** (1-12) I, II, III. The Staff (Hills in charge)  
(S/U grading only.)

**Professional Course**

**317. Teaching Agricultural Mechanics** (2) II. J. Rumsey

Lecture—1 hour; laboratory—3 hours. Prerequisite: a course in physics; 6 units related to agricultural mechanics; enrolled in Agricultural Education Teacher Credential Program. Preparation of the teacher to plan, organize, and conduct an agricultural mechanics program in secondary schools. Development of and presentation of lesson plans and teaching aids. Review of subject matter in metal fabrication, power and machinery and agricultural structures areas.

**Graduate Study.** Students prepare for careers where mathematics is applied to problems in the physical and life sciences, engineering, and management. The degree requirements consist of rigorous training in applied mathematics, including course work and a research dissertation under the direction of a member of the Applied Mathematics Graduate Group. The M.S. degree provides preparation for further study in applied mathematics or an application area, or for a career in industry or public service. The Ph.D. degree provides preparation for a career in research and/or teaching, or in industrial or national research laboratories. Areas of research in the program include differential equations, fluid mechanics, numerical analysis, operations research, systems theory, probability and stochastic processes, mathematical biology, and mathematical physics. Detailed information may be obtained by writing to the Graduate Coordinator, Department of Mathematics.

New applicants are admitted to the fall quarter only.

**Preparation.** The program encourages application from students who have prior training in engineering, physical and life sciences, mathematics, economics, and related fields. Applicants must have completed two years of undergraduate mathematics including linear algebra, differential equations, and vector calculus. A rigorous course in advanced calculus is strongly encouraged.

**Graduate Advisers.** A. Cheer (Mathematics); J. Hunter (Mathematics); A. Krener (Mathematics).

## Art History

(College of Letters and Science)  
Jeffrey Ruda, Ph.D., Program Director  
Department Office, 111A Art Building (530-752-0105)  
World Wide Web: <http://idea.ucdavis.edu/art>

**Faculty**

Dianne Sachko Macleod, Ph.D., Professor  
Jeffrey Ruda, Ph.D., Professor  
Diana Strazdes, Ph.D., Assistant Professor

**Emeriti Faculty**

Mary H. Fong, Ph.D., Professor Emerita  
Robert J. Grigg, Ph.D., Professor Emeritus  
Seymour Howard, Ph.D., Professor Emeritus

### The Major Program

Art History is the study of the visual arts in civilization. It examines changing aesthetic and cultural values and significant material and ideological developments as seen in works of art and architecture. It emphasizes visual as well as verbal intelligence, providing more than the standard advantages of liberal arts training.

**The Program.** The student majoring in art history begins with courses which survey the arts of Asia, Europe, and America. More specialized courses follow in ancient, Byzantine, medieval, Renaissance,

baroque, modern, Non-Literate, East Asian, and American art and architecture. At the same time students are encouraged to take classes in related disciplines such as religion, history, philosophy, literature, and foreign languages.

**Career Alternatives.** The major prepares students for advanced study in either graduate school or professional programs. It can also serve as the foundation for careers in teaching, research, museums, galleries, arts administration, art criticism, publishing, and art investment.

### A.B. Major Requirements:

|                                                                                                                 |           |
|-----------------------------------------------------------------------------------------------------------------|-----------|
|                                                                                                                 | UNITS     |
| <b>Preparatory Subject Matter</b> .....                                                                         | <b>20</b> |
| Three courses selected from Art History 1A, 1B, 1C, 1D.....                                                     | 12        |
| One art studio course in drawing, printmaking, painting, or photography.....                                    | 4         |
| One art studio course in sculpture or ceramics .....                                                            | 4         |
| <b>Depth Subject Matter</b> .....                                                                               | <b>36</b> |
| Nine upper division art history courses, which must be taken in at least four of the following five areas ..... | 36        |
| (a) Ancient/Medieval/Northern Renaissance,                                                                      |           |
| (b) Southern Renaissance/Baroque,                                                                               |           |
| (c) Modern,                                                                                                     |           |
| (d) China/Japan,                                                                                                |           |
| (e) Non-Literate                                                                                                |           |
| <b>Total Units for the Major</b> .....                                                                          | <b>56</b> |

### Minor Program Requirements:

|                                                                                                                                                                                |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
|                                                                                                                                                                                | UNITS     |
| <b>Art History</b> .....                                                                                                                                                       | <b>20</b> |
| Five upper division art history courses .....                                                                                                                                  | 20        |
| Courses must be chosen from at least three of the following subject areas with no more than two courses in any single area (one lower division substitute course permissible): |           |
| (a) Ancient/Medieval/Northern Renaissance,                                                                                                                                     |           |
| (b) Southern Renaissance/Baroque,                                                                                                                                              |           |
| (c) Modern,                                                                                                                                                                    |           |
| (d) China/Japan,                                                                                                                                                               |           |
| (e) Non-Literate                                                                                                                                                               |           |

**Honors Program.** An Honors Program is available to Art History majors who are seriously considering attending graduate school. To be eligible for the program, a student must have a grade point average of 3.7 in the major. In addition to meeting the standard major requirements, the honors student completes one quarter of language in German or Chinese, one seminar (courses 190 or 198), and writes an honors thesis (course 194H). Students participating in this Program are candidates for Departmental recommendation for graduation with High or Highest Honors. See the Academic Information chapter, Letters and Science honors section, of this catalog and consult the department for more information.

**Teaching Credential Subject Representative.** Department Chairperson. See also the Teacher Education Program.

**Graduate Study.** The Program in Art History offers studies leading to the Master of Arts degree in History of Art as preparation for further graduate study or professional work. Further information may be obtained by writing to the Graduate Adviser or consulting the *Graduate Announcement*.

### Courses in Art History (AHI)

**Lower Division Courses**

**1A. Ancient Art** (4) I. Roller  
Lecture—3 hours; discussion—1 hour. Art of the pagan Mediterranean world from the prehistoric caves to the fall of the Roman Empire. GE credit: ArtHum.

**1B. Medieval and Renaissance Art** (4) II. Grigg

---

## Applied Mathematics (A Graduate Group)

Angela Y. Cheer, Ph.D., Chairperson of the Group  
Group Office, 570 Kerr Hall (530-752-8131)

World Wide Web:  
<http://math.ucdavis.edu/~gehrmann/grad/ggambroc.html>

**Faculty.** Consists of members from a variety of departments whose research interests are mathematically oriented. Departments represented include Biological Sciences; Chemistry; Engineering; Computer Science, Chemical and Materials Science, Civil and Environmental, Electrical and Computer, and Mechanical and Aeronautical; Environmental Science and Policy; Epidemiology and Preventive Medicine; Evolution and Ecology; Land, Air and Water Resources; Management; Mathematics; Physics; Radiology; Statistics; and Wildlife, Fish and Conservation Biology.

Lecture—3 hours; discussion—1 hour. Christian, Barbarian, Moslem, and Classical traditions in European Art from the fourth through the sixteenth centuries. GE credit: ArtHum.

**1C. Baroque and Modern Art** (4) III. The Staff  
Lecture—3 hours; discussion—1 hour. Major styles and masters of the Western world after the Counter Reformation. GE credit: ArtHum, Div.

**1D. Asian Art** (4) II. The Staff  
Lecture—3 hours; discussion—1 hour. Introduction to the arts of Asia through a study of Oriental ink painting and architecture, Buddhist sculpture, Indian temples, Chinese ceramics, Japanese prints, and art in Mao's China. GE credit: ArtHum, Div.

**\*25. Introduction to Architectural History** (4) II. The Staff

Lecture—3 hours; discussion—1 hour. Formal and social history of architecture, examining design principles, major traditions, and concepts of architectural history with a focus on issues in Western architecture. Emphasis on nineteenth and twentieth centuries. GE credit: ArtHum.

**\*25G. Writing: Introduction to Architectural History** (1) II. The Staff  
Discussion—1 hour. Prerequisite: course 25 concurrently. Small group discussions and preparation of short papers for course 25. GE credit with concurrent enrollment in course 25: Wrt.

**98. Directed Group Study** (1-5) I, II, III. The Staff (Program Director in charge)  
Prerequisite: consent of instructor. Restricted to lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff (Program Director in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

**\*150. Arts of Sub-Saharan Africa** (4) III. The Staff  
Lecture—3 hours; term paper or gallery studies and review. Traditional arts and crafts of sub-Saharan Africa; particular attention to the relationships between sculpture and culture in West and Central Africa. GE credit: ArtHum, Div.

**\*151. Arts of the Indians of the Americas** (4) III. The Staff  
Lecture—3 hours; term paper or gallery studies and review. Development of art in North America, emphasizing ancient Mexico. South American relationships and parallels. Recent and contemporary Indian arts and crafts from Alaska to Chile. GE credit: ArtHum, Div.

**\*152. Arts of Oceania and Prehistoric Europe** (4) III. The Staff  
Lecture—3 hours; term paper. Traditional arts of aboriginal Australia, Melanesia, Polynesia, and Micronesia, as seen in their cultural contexts. Prehistoric art of Europe and the Near East. GE credit: ArtHum, Div.

**153. Art, Storytelling and Cultural Identity in the Pacific** (4) II. Flavell  
Lecture/discussion—3 hours; term paper. Representation of the cultural identities of indigenous and migrant groups of the Pacific in visual arts and storytelling. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**\*154A. Early Greek Art and Architecture** (4) II. Roller  
Lecture—3 hours; gallery study and term paper. Prerequisite: upper division standing. Examination of history and significance of major monuments in Greek art and architecture from the Homeric, Geometric Age to the Golden Age and the death of Socrates. GE credit: ArtHum, Wrt.

**154B. Later Greek Art and Architecture** (4) II. Roller  
Lecture—3 hours; gallery studies and term paper. Prerequisite: upper division standing. Examination of the history and significance of monuments in Greek art and architecture from the Silver Age of Aristotle to Alexander to the end of the Hellenistic Age and the death of Cleopatra. GE credit: ArtHum, Wrt.

**\*155. Roman Art** (4) III. Roller

Lecture—3 hours; term paper or gallery studies and review. The art of Republican and Imperial Rome. GE credit: ArtHum, Wrt.

**163A. Chinese Art** (4) I. The Staff  
Lecture—3 hours; term paper or gallery studies and review. A survey from the beginning to the twelfth century focusing on the major art forms that are traditionally known as well as newly discovered through archaeology in China. GE credit: ArtHum, Div, Wrt.

**163B. Chinese Painting** (4) II. The Staff  
Lecture—3 hours; term paper or gallery studies and review. The unique form of ink painting, with or without colors, depicting human and animal figures, flowers-and-birds, and landscape—the favorite and enduring theme of the Chinese scholar-painter. GE credit: ArtHum, Div, Wrt.

**163C. Painting in the People's Republic of China** (4) III. The Staff  
Lecture—3 hours; term paper. Prerequisite: course 1D or upper division standing. Analysis of the interaction between art and politics in the emergence of China into the modern world. Integration of Western influence, implementation of Mao Zedong's thought on art, and the formation of contemporary Chinese painting. GE credit: ArtHum, Div, Wrt.

**\*164. The Arts of Japan** (4) III. The Staff  
Lecture—3 hours; term paper and/or gallery studies and review (determined by instructor each quarter course offered). Study of the significant achievements in architecture, painting, sculpture, and decorative arts from prehistoric age to nineteenth century. GE credit: ArtHum, Div, Wrt.

**\*168. Great Cities** (4) I. The Staff  
Lecture—3 hours; term paper. Transformation in architecture and urban form in Paris, London, and Vienna in the context of varying social, political, and economic systems as well as very different cultural traditions, concentrating on the years 1830-1914. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*176A. Art of the Middle Ages: Early Christian and Byzantine Art** (4) I. The Staff  
Lecture—3 hours; term paper or gallery studies and review. Painting, sculpture and architecture of the early Christian era and Byzantine Empire: through the later Roman Empire in the West and to the final capture of Constantinople in the East. GE credit: ArtHum, Wrt.

**\*176B. Art of the Middle Ages: Early Medieval and Romanesque Art** (4) I. The Staff  
Lecture—3 hours; term paper or gallery studies and review. Painting, sculpture and architecture of western Europe in the early medieval era: from the rise of the barbarian kingdoms through the twelfth century. GE credit: ArtHum, Wrt.

**\*176C. Art of the Middle Ages: Gothic** (4) I. The Staff  
Lecture—3 hours; term paper or gallery studies and review. Painting, sculpture and architecture in northern Europe from the twelfth through the fifteenth centuries.

**\*177A. Northern European Art** (4) III. The Staff  
Lecture—3 hours; term paper or gallery studies and review. Painting and sculpture of the fifteenth century in Austria, Germany, France and the Lowlands, including such artists as Jan van Eyck and Hieronymus Bosch. GE credit: ArtHum, Wrt.

**\*177B. Northern European Art** (4) I. The Staff  
Lecture—3 hours; term paper or gallery studies and review. Painting and sculpture of the sixteenth century in Germany, France and the Lowlands, including such artists as Albrecht Dürer and Pieter Bruegel. GE credit: ArtHum, Wrt.

**178A. Italian Renaissance Art** (4) II. Ruda  
Lecture—3 hours; term paper or gallery studies and review. Giotto and the origins of the Renaissance; painting and sculpture in Italy from Nicola Pisano through Lorenzo Monaco, with emphasis on Duccio, Giotto, and other leading artists of the early fourteenth century. GE credit: ArtHum, Wrt.

**\*178B. Italian Renaissance Art** (4) II. Ruda  
Lecture—3 hours; term paper or gallery studies and review. Early Renaissance in Florence; fifteenth-century artists from Donatello and Masaccio through Botticelli, in their artistic and cultural setting. GE credit: ArtHum, Wrt.

**178C. Italian Renaissance Art** (4) III. Ruda  
Lecture—3 hours; term paper or gallery studies and review. The High Renaissance: Leonardo, Michelangelo, Raphael, and Titian in their artistic and cultural settings—Florence, Rome, and Venice in the early sixteenth century. GE credit: ArtHum, Wrt.

**179B. Baroque Art** (4) I. Ruda  
Lecture—3 hours; term paper or gallery studies and review. Seventeenth-century painting, including such artists as Caravaggio, Rubens, Rembrandt, and Velázquez. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*182. British Art (1750-1914)** (4) III. Macleod  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1C. Analysis of the place of art in British culture—1750 to 1914. Topics include influence of class and gender on art education, patronage, and exhibition societies. Artists: Hogarth, Turner, Pre-Raphaelites, and lesser-known advocates of military, social realist, and colonial themes. GE credit: ArtHum, Div, Wrt.

**183A. Art in the Age of Revolution** (4) I. Macleod  
Lecture—3 hours; discussion—1 hour. Prerequisite: at least one course in art or consent of instructor. Analysis of political and stylistic implications of European painting from 1750 to 1860. Artists studied include Goya, David, Delacroix, Constable, Turner, the Pre-Raphaelites, and Courbet. GE credit: ArtHum, Wrt.

**183B. Impressionism and Post-Impressionism** (4) II. Macleod  
Lecture—3 hours; discussion—1 hour. Prerequisite: at least one course in art or consent of instructor. Social and cultural study of major European art movements between 1860 and 1900, including an examination of the paintings of Manet, Monet, Renoir, Whistler, Gauguin, van Gogh, Cezanne, and Redon. GE credit: ArtHum, Wrt.

**183C. Modern Art: 1900-1945** (4) I. The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: at least one course in art or consent of instructor. Examination of modern movement in European art from Fauvism and Cubism to Surrealism and Abstract Expressionism (1900-1945). Artists studied include Picasso, Matisse, Kandinsky, Malevich, and Pollock. GE credit: ArtHum, Wrt.

**\*183D. Modern Sculpture** (4) III. The Staff  
Lecture—3 hours; term paper or gallery studies and review. Sculpture from Neo-Classicism to the present.

**183E. Contemporary Art: 1945 to the Present** (4) III. The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: at least one course in art or consent of instructor. Painting and sculpture in Europe and America from 1945 to the present, with emphasis on the New York school, Pop art, Op art, Earthworks, and Feminist art. GE credit: ArtHum, Div, Wrt.

**\*184. Twentieth Century Architecture** (4) I. The Staff  
Lecture—3 hours; term paper. Prerequisite: course 25 recommended. Major movements in architecture of the twentieth century in Europe and America. Formal innovations are examined within the social, political, and economic circumstances in which they emerged. GE credit: ArtHum, Wrt.

**188A. The American Home** (4) III. Strazdes  
Lecture/discussion—3 hours; term paper. Prerequisite: course 188B or any lower division course in Art History or Design; not open to freshmen. American domestic architecture and its responsiveness to changes in daily life from Colonial times to the present. Vernacular developments, effects of different socioeconomic conditions, and women's role in shaping the home receive special attention. GE credit: ArtHum, Div, Wrt.

**188B. Architecture of the United States** (4) I. Strazdes  
Lecture—3 hours; term paper. Prerequisite: course 25 recommended. American architecture from the first European settlers to Postmodernism. Technological and formal developments will be examined within the social, political, and economic context in which they emerged. Issues include ideals of domesticity and the development of the architectural profession. GE credit: ArtHum, Wrt.

**\*188C. Painting of the United States** (4) I. The Staff  
Lecture—3 hours; discussion—1 hour; term paper or gallery studies and review. American pictorial development from 1650 to the present, with emphasis on twentieth-century developments. GE credit: ArtHum, Wrt.

**188D. American Painting and Sculpture to the Civil War** (4) I. Strazdes  
Lecture/discussion—3 hours; term paper. Prerequisite: one lower division Art History course or junior standing. Major movements in American painting and sculpture to 1865. Colonial portraiture, development of history painting, rise of genre painting, and the Hudson River School of landscape painting. Emphasis on European cultural currents and their effects. GE credit: ArtHum, Wrt.

**188E. American Painting and Sculpture from the Civil War to World War II** (4) III. Strazdes  
Lecture/discussion—3 hours; term paper. Prerequisite: one lower division course in Art History or junior standing. Major developments in American painting and sculpture from 1865 to 1940. The American adaptations of Barbizon painting, French Impressionism, late 19th-century American Realism, the Ashcan School, Modernist Ideologies, Regionalism. GE credit: ArtHum, Wrt.

**\*190. Undergraduate Seminar** (4) II. The Staff (Program Director in charge)  
Lecture—3 hours; term paper. Prerequisite: consent of instructor. Intended primarily for senior and junior students in the history of art. Assigned readings, discussions, and a substantial paper in a particular area of art history will introduce the student to methodology and techniques of art historical research. May be repeated once for credit. Limited enrollment.

**192. Internship** (2-12) I, II, III. The Staff (Program Director in charge)  
Internship—term paper or catalogue. Supervised program of internships at professional art institutions such as museums, galleries, and art archives including collections of slides and photographs. May be repeated once for credit. (P/NP grading only.)

**194H. Special Study for Honor Students** (4) I, II, III. The Staff  
Independent study—12 hours. Prerequisite: course 190 or the equivalent, as determined by the major adviser. Open only to students in the Art History Honors Program. Independent study of an art historical problem culminating in the writing of an honors thesis under the supervision of a faculty guidance committee.

**198. Directed Group Study** (1-5) I, II, III. The Staff (Program Director in charge)  
(P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Program Director in charge)  
(P/NP grading only.)

**Graduate Courses**

**200. Introduction to Art Historical Research** (4) I. Macleod  
Seminar—4 hours. Introductory sampling of major writings, methods, and sources used for research in the discipline of art history.

**250. Problems in Art Historical Research** (4) I, II. Strazdes and staff  
Seminar—3 hours; term paper. Major topics in art historical research, emphasizing special methods of investigation, and of historical and critical analysis. May be repeated for credit.

**\*251. Seminar in Tribal Arts** (4) II. The Staff  
Seminar—3 hours; term paper. Selected topics in the art and aesthetics of small scale societies. May be repeated for credit when topic differs and with consent of instructor.

**\*254. Seminar in Classical Art** (4) III. The Staff  
Seminar—3 hours; term paper. Selected areas of special study in classical art of the Greek and Roman tradition. Course may be repeated for credit with consent of instructor.

**263. Seminar in Chinese Art** (4) III. The Staff  
Seminar—3 hours; paper. Selected areas of special study in Chinese Art. May be repeated for credit with consent of instructor.

**\*276. Seminar in Medieval Art** (4) III. Grigg  
Seminar—3 hours; term paper. Selected areas of special study in medieval art from Early Christian to late Gothic. May be repeated for credit with consent of instructor.

**278. Seminar in Italian Renaissance Art** (4) III. Ruda  
Seminar—3 hours; term paper. Selected areas of special study in Italian art from the fourteenth to the sixteenth century. May be repeated for credit with consent of instructor.

**283. Seminar in Modern European Art** (4) II. Macleod  
Seminar—3 hours; term paper. Selected areas of special study in art since 1800 in Europe. May be repeated for credit with consent of instructor.

**\*288. Seminar in European and American Architecture** (4) II. The Staff  
Seminar—3 hours; term paper. Exploration of selected topics in European and American architectural history with concentration on the Modern Period. May be repeated for credit with consent of instructor.

**299. Individual Study** (1-6) I, II, III. The Staff (Program Director in charge)  
(S/U grading only.)

**Professional Course**

**\*390. Introduction to Teaching Art History for Teaching Assistants** (1) I, II, III. The Staff  
Discussion—1 hour. Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of undergraduate art history. (S/U grading only.)

**396. Teaching Assistant Training Practicum** (1-4) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

**Professional Courses**

**401. Museum Training: Curatorial Principles** (4) II. Amerson  
Seminar—3 hours. Approved for graduate degree credit. Study of private and public collections. Museum personalities. Appraisal of works of art; ethics of appraisal. Auction and sales: methods and catalogues. Registration. Technical problems of the museum. Connoisseurship. Collateral reading. Visits to museums. Seminar with assigned papers.

**\*402. Museum Training: Exhibition Methods** (4) II. Amerson  
Seminar—3 hours; exhibition. Approved for graduate degree credit. History of exhibition methods in private and public collections. Comparisons of different types of museums and their exhibition problems. Lighting and techniques of display with emphasis on actual design. Experimentation with unusual presentation forms.

**Note:** *Various of the above courses are not offered each year; please check the quarterly Class Schedule and Room Directory.*

**Art Studio**

**Faculty**

L. Price Amerson, Jr., Ph.D., Lecturer (*Director, Nelson Gallery*)  
Conrad Atkinson, R.A.S. (honors), Professor  
Squeak Carnwath, M.F.A., Professor  
William Henderson, M.F.A., Professor  
Lynn Hershman, M.A., Professor  
Harvey Himelfarb, M.A., Professor, *Academic Senate Distinguished Teaching Award*  
David Hollowell, M.F.A., Professor  
Malaquias Montoya, M.A., Cooperating Professor  
Lucy A. Puls, M.F.A., Professor  
Annabeth Rosen, M.F.A., Assistant Professor  
Cornelia Schulz, M.F.A., Professor, *Academic Senate Distinguished Teaching Award*  
Baochi Zhang, M.F.A., Assistant Professor

**Emeriti Faculty**

Richard D. Cramer, M.F.A., Professor Emeritus  
Roy DeForest, M.A., Professor Emeritus  
Roland C. Petersen, M.A., Professor Emeritus  
Wayne Thiebaud, M.A., hon. D.F.A. (C.C.A.C., D.C.)  
Professor Emeritus, *UC Davis Prize for Teaching and Scholarly Achievement*

**The Major Program**

The studio art major provides the knowledge and experience necessary for a broad understanding of the visual arts.

**The Program.** For the beginning student, the major offers an introduction to drawing, composition, sculpture, and art history. Students may then advance to more specialization (drawing, painting, sculpture, printmaking, ceramics, photography, film making, electronic arts, as well as theory and criticism) in upper division work.

**Portfolios.** Portfolios are not required for admission to the major. However, admitted students, once at Davis, should keep a continuing portfolio of their art work, which is subject to faculty perusal at such times as when the student is declaring the major, requesting independent study courses, and scheduling an exhibition in the student gallery.

**Career Alternatives.** The studio art graduate is prepared for graduate work or continuing development as a professional artist or art teacher. Students who have career aspirations in the commercial aspects of the visual arts can acquire a broad general education and a creative foundation in the art studio major, establishing a basis for further specialization in commercial art.

**A.B. Major Requirements:**

|                                                                                                                                                                                                                                     |           |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
|                                                                                                                                                                                                                                     | UNITS     |
| <b>Preparatory Subject Matter</b> .....                                                                                                                                                                                             | <b>24</b> |
| Three courses from Art Studio 2, 3, 4, 5, 16; see prerequisites required for upper division courses .....                                                                                                                           | 12        |
| Three courses from Art History 1A, 1B, 1C, 1D, Art Studio 30 .....                                                                                                                                                                  | 12        |
| <b>Depth Subject Matter</b> .....                                                                                                                                                                                                   | <b>40</b> |
| Six courses, under three different instructors, chosen from Group A, Practice of Art ...24<br>Group A: Art Studio 101, 102, 103, 104, 110, 111, 113, 114, 115, 116, 117, 120, 125, 126, 127, 128, 141, 142, 143, 144, 145, 146, 171 |           |

Two courses from Group B, Theory and Criticism.....8  
*Group B:* Art Studio 131, 132A, 132B, 147, 148, 149, 150

Two upper division courses in art history....8

**Total Units for the Major** .....64

#### Recommended

- (a) Students interested in drawing and painting should take Art Studio 2, 3, 4 (course 5 is recommended);
- (b) Students interested in sculpture should take Art Studio 2, 3, 5 (course 4 is recommended); and
- (c) Students preparing for graduate work in any of the environmental design professions should take Art Studio 2, 5, 16.

**Major Advisers.** See the *Class Schedule and Room Directory*.

### Minor Program Requirements:

UNITS

**Art Studio**.....20  
 Prerequisite courses must be taken prior to enrollment in upper division courses. Independent study courses are not applicable.

Upper division art studio courses chosen in consultation with a faculty adviser (one lower division substitute course permissible).....20

**Teaching Credential Subject Representative.** Department Chairperson. See also the Teacher Education Program.

**Graduate Study.** The Department of Art offers programs of study and research leading to the M.F.A. degree in the practice of art. Detailed information regarding graduate study may be obtained from the Graduate Admissions Office or the Art Office.

### Courses in Art Studio (ART)

#### Lower Division Courses

**2. Drawing I** (4) I, II, III. Henderson, Atkinson, Carnwath, Schulz and staff  
 Studio—6 hours. Form and composition in black and white.

**3. Drawing II** (4) I, II, III. Henderson, Schulz  
 Studio—6 hours. Prerequisite: course 2. Form and composition in color.

**4. Life Drawing** (4) I, II, III. Hollowell, Zhang  
 Studio—6 hours. Prerequisite: course 2. Form in composition using the human figure as subject.

**5. Sculpture** (4) I, II, III. Puls, Zhang  
 Studio—6 hours. Form in space using plaster and other media.

**10. Introduction to Art Appreciation** (3) I, III. The Staff  
 Lecture—3 hours. The understanding and appreciation of painting, sculpture, architecture and industrial art. Illustrated lectures. Intended for non-majors. GE credit: ArtHum.

**16. Descriptive Drawing** (4) III. Schulz  
 Studio—6 hours. Objective drawing and rendering; representations of space.

**30. Introduction to Contemporary Visual Culture** (4) III. The Staff  
 Lecture—3 hours; discussion/laboratory—1 hour. Establishing visual literacy across the media of fine art, photography, advertising, television and film; media culture; focus on critical decoding of contemporary visual culture. GE credit: ArtHum, Div, Wrt.

**98. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)  
 Prerequisite: consent of instructor. Restricted to lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
 Prerequisite: consent of instructor. (P/NP grading only.)

#### Upper Division Courses

*Note:* Upper division courses are listed under three groups: **(A)** Practice of Art; **(B)** Theory and Criticism; **(C)** Special Study Courses.

Preenrollment in upper division courses is restricted to art majors. Art minors may obtain permission to preenroll by filling out a "Waiver of Restriction" form in the Art office.

**101. Painting: Materials and Carriers** (4) I, II, III. Atkinson, Carnwath, Schulz  
 Studio—6 hours. Prerequisite: courses 2, 3, 4, 5, or consent of instructor. Experimentation in media and their supports.

**102. Painting** (4) I, II. Henderson, Schulz  
 Studio—6 hours. Prerequisite: course 101 or consent of instructor. Advanced painting in various media including oil and polymers. May be repeated once for credit with consent of instructor.

**103. Advanced Drawing** (4) I. Zhang  
 Studio—6 hours. Prerequisite: course 2, 3, 4, 16, or consent of instructor. Advanced drawing, composition and form in black and white and color. May be repeated once for credit with consent of instructor.

**104. Figure Drawing and Painting** (4) I, III. Hollowell and staff

Studio—6 hours. Prerequisite: courses 4 and 101, or consent of instructor. Advanced figure drawing and painting using the human figure as subject. May be repeated once for credit with consent of instructor.

**110. Photography I** (4) I, II, III. The Staff  
 Studio—6 hours. Prerequisite: courses 2, 3, 4, or consent of instructor. Photography as an art form. Experiments with camera and light sensitive materials.

**111. Photography II** (4) II. The Staff  
 Studio—6 hours. Prerequisite: course 110 or consent of instructor. Art of camera and light sensitive materials: tonal control, multiple exposure, synthetic negatives, etc. May be repeated once for credit with consent of instructor.

**113. Interdisciplinarity** (4) I. Hershman  
 Studio—6 hours. Prerequisite: one course in Art History or Art Studio. Focus on the uses of two or more art forms to make a unique art work; also, ideas of collaboration and reconfigured and integrated forms as new methods of expression that do not solely depend on unique authorship.

**114. Identity and Technology** (4) II. Hershman  
 Studio—6 hours. Prerequisite: one course in Art History or Art Studio. The notion of "self", "portraiture" and "identity" as it is defined in an electronic world in which media alters perceptions of belief as individuals and society. Hands-on projects plus theoretical analysis of media.

**\*115. Film-making I** (4) I. The Staff  
 Studio—6 hours. Prerequisite: courses 2, 3, 4, or consent of instructor. Film-making as an art form; 8 and 16 mm. cameras and sound track. May be repeated once for credit with consent of instructor.

**\*116. Video Practice and Theory** (4) II. Hershman  
 Studio—6 hours. Prerequisite: 12 units of lower division art studio classes. Production techniques of video, including shooting, editing, lighting, sound and effects. A conceptual framework for video-art techniques.

**117. Experimental Documentary** (4) II. Hershman  
 Studio—6 hours. Prerequisite: upper division standing. Study of the documentary form with particular attention to hybrid forms of film, video and computer genres. May be repeated once for credit with consent of instructor when topic differs.

**\*120. Intermedia Art** (4) III. Zhang  
 Studio—6 hours. Prerequisite: three courses chosen from the following: courses 2, 3, 4, 5, and 16. Use of multiple media in artmaking. Human body as artistic medium. Non-traditional visual media. Problem solving on conceptual and technical levels. Visual metaphors, narrative, intuition, meaning and expression in art. May be repeated once for credit when topic differs and with consent of instructor.

**125. Printmaking: Relief** (4) III. Carnwath

Studio—6 hours. Prerequisite: courses 2, 3, 4, 5, or consent of instructor. Woodcut, linocut, metal-plate relief and experimental uses of other materials.

**126. Printmaking: Intaglio** (4) I. Atkinson  
 Studio—6 hours. Prerequisite: courses 2, 3, 4, 5, or consent of instructor. Metal plate etching, aquatint, hard- and soft-ground, burin engraving and related methods. May be repeated once for credit with consent of instructor.

**127. Printmaking: Lithography** (4) II. The Staff  
 Studio—6 hours. Prerequisite: courses 2, 3, 4, 5, or consent of instructor. Stone and metal-plate lithography and other planographic methods. May be repeated once for credit with consent of instructor.

**\*128. Printmaking: Serigraphy** (4) III. The Staff  
 Studio—6 hours. Prerequisite: courses 2, 3, 4, 5, or consent of instructor. Silk screen and related stencil methods. May be repeated once for credit with consent of instructor.

**\*131. Gender, Vision, and Difference** (4) II.

The Staff  
 Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 30 or Women's Studies 50. Examination of the way vision establishes power relations within cultures. How vision and visual culture determine who is visible and invisible, who is beautiful and who is ugly, and who is included and who is excluded within the languages of culture. GE credit: ArtHum, Div, Wrt.

**\*132A. The Tradition of Modernism** (4) I.

The Staff  
 Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: one of course 30, or Art History 183A, 183B, 183C or 184. The emergence of modernism in painting and sculpture, from the early twentieth century to the 1940s. Critical examination of the emergence of modernism, the ideologies it supported, and the exclusions it practiced. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*132B. The Theory of Modernism** (4) II. The Staff  
 Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 132A. Re-examination of materials of Modernist art through a set of critical analytical tools which will help in understanding what cultural and ideological beliefs these art forms sustained. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**141. Sculpture: Material Explorations** (4) II. Puls  
 Studio—6 hours. Prerequisite: course 5. Primary application and exploration of a single sculptural material. Examination of its properties, qualities and characteristics for three-dimensional expression. May be repeated twice for credit in different subject area with consent of instructor.

**142. Sculpture: Ceramics I** (4) I, II. Rosen  
 Studio—6 hours. Prerequisite: course 2, 3, 4 and 5, or consent of instructor. Introduction to ceramic forms and processes.

**143. Sculpture: Ceramics II** (4) II. Rosen  
 Studio—6 hours. Prerequisite: course 142 or consent of instructor. Introduction to color, as well as glazing and use of kiln. May be repeated once for credit with consent of instructor.

**144. Sculpture: Figure Modeling** (4) III. Zhang  
 Studio—6 hours. Prerequisite: courses 2, 3, 4, 5, or consent of instructor. Sculpture in various media using the human figure as subject. May be repeated once for credit with consent of instructor.

**145. Sculpture: Concepts** (4) III. Puls  
 Studio—6 hours. Prerequisite: course 5 or consent of instructor. Investigation through the creation of sculpture of the relationship of idea to form and material. May be repeated once for credit in different subject area with consent of instructor.

**146. Sculpture: Ceramics III** (4) III. Rosen  
 Studio—6 hours. Prerequisite: course 141, 143, 144, or 145. Advanced form and color. Clay sculpture in relief and round. May be repeated once for credit with consent of instructor.

**\*147. Theory and Criticism of Photography** (4) III. The Staff

Lecture—3 hours; term paper. Prerequisite: course 2 or 5 and one art lecture course. Development of camera vision, ideas, and aesthetics and their relationship to the fine arts from 1839 to the present. GE credit: ArtHum, Wrt.

**148. Theory and Criticism: Painting and Sculpture** (4) I, III. The Staff

Lecture—3 hours; term paper. Prerequisite: course 2 or 5, and one art lecture course. Study of forms and symbols in historic and contemporary masterpieces. GE credit: ArtHum, Wrt.

**\*149. Introduction to Critical Theory** (4) I. The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: two of Art History 1B, 1C, or 183F. An overview of 20th century critical theories of culture and their relation to visual art and mass media culture. GE credit: ArtHum, Div, Wrt.

**150. Theory and Criticism of Electronic Media** (4) I. Hershman

Lecture—3 hours; term paper. Prerequisite: course 116 or 117. The history of electronic media, stressing both critique, application and relationship to art practice. Analysis of the conceptual biases of electronic media as an artistic mode of expression. GE credit: ArtHum, Wrt.

**171. Mexican and Chicano Mural Workshop** (4) III. Montoya

Studio—8 hours; independent study—1 hour. Prerequisite: Chicana/o Studies 70 and/or written consent of instructor. The Mural: a collective art process that empowers students and people through design and execution of mural paintings in the tradition of the Mexican Mural Movement; introduces materials and techniques. May be repeated once for credit. (Same course as Chicana/o Studies 171.)

**Group C: Special Study Courses****192. Internship** (2-12) I, II, III. The Staff (Chairperson in charge)

Internship. Supervised program of internships in artists' studios and at professional art institutions such as museums, galleries, and art archives including collections of slides and photographs. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**193. Seminar in Art Practice** (4) I. Puls (Chairperson in charge)

Discussion/laboratory—8 hours; variable—4 hours. Prerequisite: courses 2 and 3; upper division standing; taking or having taken courses in upper division drawing, painting, and sculpture. Work (painting, sculpture, drawing, etc.) done for group discussion and criticism, as well as group discussion of contemporary topics in the visual arts. May be repeated once for credit.

**198. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)

(P/NP grading only.)

**Graduate Courses****290. Seminar** (4) I, II, III. Atkinson, Puls, Carnwarth and staff

Seminar—3 hours. Original works produced for group discussion and criticism; associated topics of a contemporary and historical nature. May be repeated for credit.

**291. Seminar: Critical Evaluation** (1) II. The Staff (Graduate Adviser in charge)

Seminar—1 hour. May be repeated for credit. (S/U grading only.)

**292. Seminar: Comprehensive Qualifying** (1) I. The Staff (Graduate Adviser in charge)

Seminar—1 hour. Further critical evaluation of the student's work to determine his eligibility to begin the Comprehensive Project. May be repeated for credit. (S/U grading only.)

**299. Individual Study** (1-6) I, II, III. The Staff (Chairperson in charge)

(S/U grading only.)

**299D. Comprehensive Project** (9) III. The Staff (Graduate Adviser in charge)

An original body of work accompanied by a catalog summarizing the student's aesthetic position. May be repeated for credit. (S/U grading only.)

**Professional Courses****401. Museum Training: Curatorial Principles** (4) II. Amerson

Seminar—3 hours; papers. Approved for graduate degree credit. Study of private and public collections. Museum personalities. Appraisal of works of art; ethics of appraisal. Auction and sales: methods and catalogues. Registration. Technical problems of the museum. Connoisseurship. Collateral reading. Visits to museums.

**\*402. Museum Training: Exhibition Methods** (4) II. Amerson

Seminar—3 hours; exhibition. Approved for graduate degree credit. History of exhibition methods in private and public collections. Comparisons of different types of museums and their exhibition problems. Lighting and techniques of display with emphasis on actual design. Experimentation with unusual presentation forms.

**Note:** *Various of the above courses are not offered each year; please check the quarterly Class Schedule and Room Directory.*

## Asian American Studies

(College of Letters and Science)

Stanley Sue, Ph.D., Program Director

Program Office, 3102 Hart Hall (530-752-3625)

**Committee in Charge**

Angela Y. Cheer, Ph.D. (*Mathematics*)

Roy H. Doi, Ph.D. (*Molecular and Cellular Biology*)

Rosa Linda Fregoso, Ph.D. (*Women's Studies*)

Isao Fujimoto, M.A. (*Asian American Studies, Human and Community Development*)

Darrell Y. Hamamoto, Ph.D. (*Asian American Studies*)

Wendy A. Ho, Ph.D. (*Asian American Studies, Women's Studies*)

Peter C.Y. Leung, M.S. (*Asian American Studies*)

Kent Ono, Ph.D. (*American Studies, Asian American Studies*)

Karen Shimakawa, Ph.D. (*Asian American Studies*)

Stanley Sue, Ph.D. (*Asian American Studies, Psychology*)

**Faculty**

Darrell Y. Hamamoto, Associate Professor

Wendy A. Ho, Ph.D., Assistant Professor

Peter C.Y. Leung, M.S., Senior Lecturer

Kent A. Ono, Assistant Professor

Karen Shimakawa, Ph.D., Assistant Professor

Stanley Sue, Ph.D., Professor

**Program of Study.** Currently, Asian American Studies does not offer a major. A minor program in Asian American Studies is available to students interested in this field of study.

**Minor Program Requirements:**

UNITS

**Asian American Studies** .....20

Asian American Studies 110 .....4

An additional four courses from Asian American Studies 100, 101, 111, 112, 120, 130, 136, 150, 155, 192 (No more than 4 units of 192 may be counted toward this total) .....16

**Minor Adviser.** P. Leung.

**American History and Institutions.** This university requirement can be satisfied by one of the following courses in Asian American Studies: 1, 2. (See also under University Requirements.)

**Related Courses.** For courses in Asian languages, see Cantonese (below) and Chinese and Japanese (under East Asian Languages and Cultures). For other Asian courses, see East Asian Languages and Culture and East Asian Studies.

**Courses in Asian American Studies (ASA)**

*Direct questions pertaining to the following courses to the instructor or to Asian American Studies Program, 3102 Hart Hall (530-752-3625).*

**Lower Division Courses****1. Historical Experience of Asian Americans** (4) I. Hamamoto

Lecture—3 hours; discussion—1 hour. Introduction to Asian American Studies through an overview of the history of Asians in America from the 1840s to the present within the context of the development of the United States. GE credit: SocSci, Div, Wrt.

**2. Contemporary Experience of Asian Americans** (4) II. Hamamoto

Lecture—3 hours; discussion—1 hour. Introduction to Asian American Studies through analysis of relationships between ethnicity, race, and culture. Identity development of Asian Americans and their communities in the context of contemporary American institutional practices. GE credit: SocSci, Div, Wrt.

**\*20. Calligraphic Expression in Asian American Culture** (3) II. Leung

Lecture—2 hours; studio—3 hours. Survey the legacy of calligraphy in Asian American families, festivals, temples, and schools. Understanding and appreciation of calligraphy through some basic writing. Trace origins, principles and styles of Chinese and Japanese calligraphy. Offered in alternate years.

**92. Internship** (1-3) I, II, III. The Staff (Director in charge)

Internship—3-9 hours. Prerequisite: enrollment dependent on availability of intern positions and consent of instructor. Supervised internship in community and institutional settings related to Asian American concerns. (P/NP grading only.)

**98. Directed Group Study** (1-5) I, II, III. The Staff (Director in charge)

Primarily intended for lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff (Director in charge)

(P/NP grading only.)

**Upper Division Courses****100. Asian American Communities** (4) I. The Staff

Lecture/discussion—4 hours. Prerequisite: course 110. Study of historical and contemporary experiences of various Asian American groups, with the community as the unit of analysis.

**\*101. Language and Educational Issues of Asian Immigrants** (4) I. The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or 2; upper division standing. Analysis of language diversity issues in American society, especially in public schools. Overview of public policies on language and programs, particularly for Asian language minority students. Offered in alternate years.

**110. Theoretical Perspectives in Asian American Studies** (4) I. Hamamoto

Lecture/discussion—4 hours. Prerequisite: course 1 or 2; upper division standing. Theories of race and ethnic relations as tools for understanding the Asian American experience with the society as the unit of analysis. GE credit: SocSci, Div.

**111. Ethnic Self and Identity** (4) III. Sue  
Lecture/discussion—4 hours. Prerequisite: course 101. Study of cultural and social psychological influences on Asian Americans, with the individual as the unit of analysis. GE credit: SocSci, Div.

**112. Asian/Pacific American Women** (4) II. Ho  
Lecture/discussion—4 hours. Prerequisite: course 1 or 2; upper division standing. Examination of the cultural, social, and political situation of Asian and Pacific American women using theoretical perspectives from social science disciplines: socialization, family dynamics, domestic and political power, economic production, and division of labor. GE credit: SocSci, Div.

**\*120. Biracial and Multiracial Asian Pacific American Experiences** (4) III. Ono  
Lecture/discussion—4 hours. Prerequisite: consent of instructor. Introduction to the experiences of biracial and multiracial Asian Pacific people in the U.S., concentrating on theories of race, racial identity formation, culture, media, and anti-racist struggles. Provides critical approaches to the analysis of popular media and academic representations. Offered in alternate years. GE credit: Div.

**130. Asian American Literature** (4) III. Ho  
Lecture/discussion—4 hours. Prerequisite: course 1 or 2, or consent of instructor. Analysis of Asian American writings as expressions of various cultural themes, psychological issues, interpersonal relationships and sociopolitical influences on the Asian American experience.

**136. Asian American Drama** (4) II. Shimakawa  
Lecture/discussion—4 hours. Prerequisite: courses 1, 2, or 130; or consent of instructor. Comparative introduction to the dramatic literature of Asian American playwrights such as Frank Chin, Philip Kan Gotanda, Velina Hasu Houston, David Henry Hwang, Wakako Yamauchi, and others from diverse socio-historical, artistic, and theoretical contexts.

**150. Filipino American Experience** (4) II. The Staff  
Lecture/discussion—4 hours. Prerequisite: course 1 or 2. Examination of the relationship between the Filipino-American community, the Philippine home community and the larger American society through a critical evaluation of the historical and contemporary conditions, problems and prospects of Filipinos in the U.S.

**155. Legal History and the Asian American** (4) II. Shimakawa  
Lecture/discussion—4 hours. Prerequisite: course 1 or 2; consent of instructor. Legal history of Asian Americans beginning with the experience of Chinese Americans in the mid-19th century. Includes an examination of laws affecting Asian American communities in immigration, economic activities, and World War II internment.

**192. Internship** (1-5) I, II, III. The Staff (Director in charge)  
Internship—3-15 hours. Prerequisite: enrollment dependent on availability of intern position with priority to Asian American Studies minors. Supervised internship in community and institutional settings related to Asian American concerns. (P/NP grading only.)

**197T. Tutoring in Asian American Studies** (1-5) I, II, III. The Staff (Director in charge)  
Tutoring—1-5 hours. Prerequisite: upper division standing and completion of appropriate course with distinction; consent of instructor. Tutoring in lower division Asian American Studies courses in small group discussion. Weekly meetings with instructor. May be repeated for credit once for a given course and also for a different course. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III. The Staff (Director in charge)  
Prerequisite: consent of instructor. Primarily intended for upper division students. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Director in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

## Courses in Cantonese (CAN)

### Lower Division Courses

**\*1-2-3. Elementary Cantonese** (5-5-5) I-II-III. Leung  
Lecture—3 hours; recitation—3 hours. Introduction to Cantonese grammar and development of conversational skills in a cultural context. Approximately 250 Chinese characters will be introduced during Cantonese 2 and 3. (Not open to native speakers.)

**\*4-5-6. Intermediate Cantonese** (3-3-3) I-II-III. Leung  
Lecture—2 hours; recitation—2 hours. Prerequisite: course 1-2-3 or the equivalent. Development of conversational skills in a cultural context. Community-oriented language materials in health care, social service, and bilingual education will be introduced.

## Asian Studies

See **Asian American Studies; East Asian Languages and Cultures; and East Asian Studies**

## Astronomy

See **Physics**

## Atmospheric Science

(College of Agricultural and Environmental Sciences)  
**Faculty.** See under Department of Land, Air and Water Resources.

### The Major Program

Atmospheric science is the study of the layer of air that surrounds the planet. It includes all weather phenomena, such as frontal systems and clouds, as well as severe weather events such as hurricanes and tornadoes. Concerns regarding the effects of human activity on the quality of the air we breathe, and on possible global warming are also central to this field of study.

**The Program.** Modern meteorology is a quantitative science that is becoming increasingly computer oriented. In addition to the study of daily weather events, the program deals with fundamental physical processes that involve the general circulation of the atmosphere; mass and energy transfers at the planetary surface and within the atmosphere; solar and terrestrial radiation; atmospheric interaction with the biosphere; climate variations; air pollution meteorology; and developments in modern meteorological instrumentation. As well as providing a broad background in meteorology, the major includes an informal minor area to be chosen from mathematics, computer science, environmental studies, resource management or a physical or biological science.

**Internships and Career Alternatives.** Atmospheric science students have participated in internships with the California Air Resources Board, various county Air Pollution Control Districts, and the National Weather Service. Numerous career opportunities exist in the federal and state governments, research and development in the private sector, and education. Examples of career areas are weather forecasting, agricultural meteorology, air-pollution forecasting and control, weather modification, hurricane and severe weather forecasting and research, weather satellite meteorology, environmental consulting, and weather research. About half of our graduates continue their

education by seeking the M.S. or Ph.D. degree in atmospheric science.

### B.S. Major Requirements:

(For convenience in program planning the *usual* courses taken to satisfy the requirements are shown in parentheses. Equal or more comprehensive courses are acceptable.)

|                                                                                                                                                                                                                                               |              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
|                                                                                                                                                                                                                                               | UNITS        |
| <b>English Composition Requirement</b> .....                                                                                                                                                                                                  | <b>0-8</b>   |
| See College requirement                                                                                                                                                                                                                       |              |
| <b>Preparatory Subject Matter</b> .....                                                                                                                                                                                                       | <b>62</b>    |
| Biological sciences courses selected with adviser's approval .....                                                                                                                                                                            | 8            |
| Chemistry (Chemistry 2A, 2B) .....                                                                                                                                                                                                            | 10           |
| Computer science (Engineering 5 or the equivalent in FORTRAN programming) .....                                                                                                                                                               | 3            |

**Major Adviser.** S. Soong (*Land, Air and Water Resources*).

**Advising Center** for the major, as well as for graduate studies, is located in 148 Hoagland Hall in the Land, Air and Water Resources Teaching Center (530-752-1669).

### Minor Program Requirements:

**Minor Program.** The minor in Atmospheric Science provides a broad treatment of weather and climate, with the option to focus on such topics as climate change, meteorological instrumentation, and satellite remote sensing. Students undertaking the minor should have completed minimum preparatory course work in calculus and physics (Mathematics 16A-16B, Physics 5A or 7A). Some upper division courses in Atmospheric Science have as prerequisites the Mathematics 21 and 22 series and the Physics 9 series.

|                                                                                                                                                                                                             |              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
|                                                                                                                                                                                                             | UNITS        |
| <b>Atmospheric Science</b> .....                                                                                                                                                                            | <b>20-24</b> |
| Atmospheric Science 60, 110 .....                                                                                                                                                                           | 8            |
| Four courses selected with the approval of the minor program adviser from the following: upper division Atmospheric Science courses (excluding 192 or 199) or Environmental and Resource Sciences 131 ..... | 12-16        |

**Minor Adviser.** S-T. Soong.

**Graduate Study.** You can specialize in particular areas of atmospheric science through graduate study and research leading to the M.S. and Ph.D. degrees.

\*Course not offered this academic year.

For details see under the Graduate Group in Atmospheric Science. See also the Graduate Studies section in this catalog.

**Related Courses.** See Environmental Science and Policy 150A; Physics 104A, 104B; Environmental and Resource Sciences 103, 131.

## Courses in Atmospheric Science (ATM)

*Questions pertaining to the following courses should be directed to the instructor or to the Land, Air and Water Resources Teaching Center, 148 Hoagland Hall (530-752-1669).*

### Lower Division Courses

#### 5. Global Climate (3) II. Shelton

Lecture—2 hours; discussion—1 hour. Introduction to the climate system and global climate patterns. Emphasis on principles, concepts, and fundamental processes underlying seasonal and regional climate differences. Examination of natural and human factors contributing to climate change. GE credit: SciEng, Wrt.

**10. Severe and Unusual Weather (3) III. Shelton**  
Lecture—2 hours; discussion—1 hour. Prerequisite: high school physics. Introduction to physical principles of severe and unusual weather: flood, blizzards, thunderstorms, lightning, tornadoes, and hurricanes. Emphasis on scientific perspective and human context. Not open to students who have received credit for course 100. (Former course 100.) GE credit: Sci-Eng, Wrt.

#### 30. Issues in Atmospheric Science (2) II.

Anastasio

Lecture—1 hour; discussion—1 hour. Prerequisite: high school physics. Introduction to selected topics in atmospheric science, such as: meteorological aspects of air pollution, use of computer models in weather forecasting, theories of global climate change, impact of satellites on meteorology, and modern meteorological instrumentation. (P/NP grading only.)

#### 60. Atmospheric Physics and Dynamics (4) I.

Shaw

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16A and Physics 5A. Composition and thermal structure of the atmosphere. Radiation and the heat budget of the earth and its atmosphere. Cloud formation and precipitation processes. The atmosphere in motion, thunderstorms and other severe weather phenomena.

#### 92. Atmospheric Science Internship (1-12) I, II, III. The Staff (Chairperson in charge)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty. (P/NP grading only.)

#### 98. Directed Group Study (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5) I, II, III. The Staff (Chairperson in charge)

(P/NP grading only.)

### Upper Division Courses

#### 110. Weather Observation and Analysis (4) II.

Soong

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 60. Acquisition, distribution and analysis of meteorological data. Vertical sounding analysis, stability indices, probability of local severe weather, weather map analysis. Use of National Weather Service analyses and forecast products. Laboratory makes use of computer-generated analyses.

#### 111. Weather Analysis and Prediction (5) I.

Grotjahn

Lecture—3 hours; laboratory—6 hours. Prerequisite: course 110, 121B, knowledge of FORTRAN (Engineering 5). Introduction to the tools used for analyzing and predicting mid-latitude weather systems. Quasi-geostrophic theory related to weather prediction and weather forecast model design and verification. Laboratory develops computer methods to illustrate topics in lecture.

#### \*115. Hydroclimatology (3) II. Shelton

Lecture—3 hours. Prerequisite: course 60. Examination of climate as the forcing function for the hydrologic system. Emphasis on seasonal variations in the relationship between precipitation and evapotranspiration for meso-scale areas. Watershed modeling of floods and drought for evaluating the effects of climatic fluctuations.

#### 116. Climate Change (3) II. Shelton

Lecture—3 hours. Prerequisite: course 60. Climate trends and patterns spanning the recent past and the future. Emphasis on natural processes that produce climate variations and human influence on these processes. Evidence of climate change and the role of global climate models in understanding climate variability.

#### 120. Atmospheric Thermodynamics and Cloud Physics (3) I. Weare

Lecture/discussion—3 hours. Prerequisite: Mathematics 21C; Physics 9A; course 60 (may be taken concurrently). Atmospheric composition and structure, thermodynamics of atmospheric gases, thermal properties of dry and moist air, atmospheric stability; cloud nucleation, cloud growth by condensation and collision, cloud models.

#### 121A. Atmospheric Dynamics (3) II. Nathan

Lecture—3 hours. Prerequisite: course 120, Mathematics 21D, Physics 9B. The atmosphere in motion: equations of motion for rotating atmospheres; pressure and density fields and their relations to atmospheric circulations; wave motion in the atmosphere; vorticity. The physical basis of modern numerical methods in meteorology.

#### 121B. Atmospheric Dynamics (3) III. Nathan

Lecture—3 hours. Prerequisite: course 121A. The dynamics of fluid motion in geophysical and laboratory systems: Rossby waves; Helmholtz waves; the effect of turbulence; boundary layers; the Ekman layer. The dynamics of convective motion: the Rayleigh problem; penetrative convection; convective plumes; cumulus models.

#### 124. Meteorological Instruments and Observations (3) I. Paw U

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 60; Physics 5C. Modern meteorological instruments and their use in meteorological observations and measurements. Both standard and micrometeorological instruments are included.

#### 128. Radiation and Satellite Meteorology (4) II.

Weare

Lecture/discussion—3 hours; discussion/laboratory—2 hours. Prerequisite: course 60, Physics 9B, Mathematics 22B, 21D. Concepts of atmospheric radiation and the use of satellites in remote sensing. Emphasis on the modification of solar and infrared radiation by the atmosphere. Estimation from satellite data of atmospheric variables such as temperatures and cloudiness.

#### 133. Biometeorology (4) II. Paw U

Lecture—3 hours; discussion—1 hour. Prerequisite: two courses in a biological discipline; Mathematics 16B and consent of instructor. Atmospheric and biological interactions. Physical and biological basis for water vapor, carbon dioxide and energy exchanges with the atmosphere associated with plants and animals, including humans. Microclimate of plant canopies and microclimatic modification such as frost protection and windbreaks.

#### 149. Introduction to Air Pollution (4) I.

Anastasio, Chang, Raabe (Civil Engineering)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 22B, 21D; Chemistry 2B; course 121A or Engineering 103A. Examination of physical and chemical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as Civil and Environmental Engineering 149.)

#### 150. Computer Methods in Meteorology (4) II.

Grotjahn

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: Engineering 5, Mathematics 22B, and a course in fluid dynamics (course 121A, Physics 104A or Engineering 103A), or consent of instructor. Numer-

ical techniques and their applications to meteorological problems. Finite differencing and spectral (Fourier transform) methods. Advection equation, simple forecast models, eigenvalue matrices, time series. Students will write and run FORTRAN programs to illustrate these topics.

#### 158. Boundary-Layer Meteorology (4) III. Shaw

Lecture—3 hours; discussion—1 hour. Prerequisite: course 121A. Growth, development and structure of the atmospheric layer directly influenced by the underlying surface and extending to a maximum of about two kilometers under convective conditions. Turbulent diffusion in the boundary layer. The microclimate at and near the ground surface.

#### 160. Introduction to Atmospheric Chemistry (3) II. Anastasio

Lecture—3 hours. Prerequisite: Chemistry 2A, 2B. Quantitative examination of current local, regional, and global problems in atmospheric chemistry. Topics include photochemical smog, acid deposition, climate change, and stratospheric ozone depletion. Basic chemical modeling of atmospheric reaction systems.

#### 192. Atmospheric Science Internship (1-12) I,

II, III. The Staff (Chairperson in charge)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty. (P/NP grading only.)

#### 198. Directed Group Study (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: three upper division units in Atmospheric Science. (P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: three upper division units in Atmospheric Science and at least an overall B average. (P/NP grading only.)

### Graduate Courses

#### \*200. Atmospheric Processes (3) I. Grotjahn

Lecture—3 hours. Prerequisite: Mathematics 22B-22C; Physics 9B. Advanced phenomenological and physical study of atmospheric structure and processes including radiation, statics, thermal structure and weather phenomena. Accelerated presentation of the major topics covered in courses 60, 110A-110B, 120, and 128. Credit not allowed to students having completed any two of these courses.

#### \*215. Advanced Hydroclimatology (3) III.

Shelton

Lecture—3 hours. Prerequisite: course 115. Theoretical and applied aspects of energy and mass fluxes linking the earth's surface, atmosphere, and hydrologic system. Emphasis on regional scale analysis and modeling, spatial data representation, and climate change influences on precipitation and its hydroclimatic expression. Offered in alternate years.

#### 221. Advanced Atmospheric Dynamics (3) II.

Nathan

Lecture—3 hours. Prerequisite: course 121B. Conditions for instability in stratified atmospheres; baroclinic instability; forced topographic Rossby Waves; wave-mean flow interaction theory; tropical dynamics; stratospheric dynamics.

#### \*223. Advanced Boundary-Layer Meteorology (3) III. Shaw

Lecture—3 hours. Prerequisite: course 230. Characteristics of the atmospheric boundary layer under convective and nocturnal conditions. Heat budget at the surface and boundary layer forcing. Similarity theory and scaling of the boundary layer. Measurement and simulation techniques. Offered in alternate years.

#### 230. Atmospheric Turbulence (3) III. Shaw

Lecture—3 hours. Prerequisite: course 121B or 158. Dynamics and energetics of turbulence in the atmosphere including vorticity dynamics. Statistical description of turbulence; Eulerian and Lagrangian scales, spectral analysis, conditional sampling techniques. Turbulent diffusion; the closure problem, gradient-diffusion and second-order methods. Offered in alternate years.

**\*231. Advanced Air Pollution Meteorology** (3) III. Carroll

Lecture—3 hours. Prerequisites: Course 149A, 160 and one course in fluid dynamics. Processes determining transport and diffusion of primary and secondary pollutants. Models of chemical transformation, of the atmospheric boundary layer and of mesoscale wind fields, as applicable to pollutant dispersion problems. Offered in alternate years.

**233. Advanced Biometeorology** (3) II. Paw U  
Lecture/discussion—3 hours. Prerequisite: course 133 or consent of instructor. Current topics in biometeorology. Physical and biological basis for water vapor, other gases, and energy exchange with the atmosphere. Topics include modeling and measuring turbulent transport from plant canopies, surface temperatures and energy budgets, bio-aerosol physics and aerobiology. Offered in alternate years.

**\*240. General Circulation of the Atmosphere** (3) II. Grotjahn

Lecture—3 hours. Prerequisite: course 121B. Large-scale, observed atmospheric circulations. Energy and momentum balances derived and compared with observations. Theoretical framework developed to synthesize observed features. Offered in alternate years.

**241. Climate Dynamics** (3) I. Weare  
Lecture/discussion—3 hours. Prerequisite: course 121B. Dynamics of large-scale climatic variations over time periods from weeks to centuries. Description of the appropriate methods of analysis of atmospheric and oceanic observations. Conservation of mass, energy and momentum. Introduction to the range of climate simulations.

**250. Meso-Scale Meteorology** (3) I. Soong  
Lecture—3 hours. Prerequisite: graduate standing, course 150, a course in partial differential equations; or consent of instructor. The study of weather phenomena with horizontal spatial dimensions between 2.5 and 2500 kilometers. Methods of observational study and numerical modeling of the structure and temporal behavior of these weather systems. Offered in alternate years.

**\*255. Numerical Modeling of the Atmosphere** (4) III. Soong

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 121B and Engineering 5; course 150 recommended. Principles of numerical modeling of the dynamic, thermodynamic and physical processes of the atmosphere. Hands-on experiments on model development using the shallow water equations and the primitive equations. Operational forecast models. Offered in alternate years.

**\*260. Atmospheric Chemistry** (3) III. Anastasio  
Lecture—3 hours. Prerequisite: course 160. Chemistry and photochemistry in tropospheric condensed phases (fog, cloud, and rain drops and aerosol particles). Gas-drop and gas-particle partitioning of compounds and effects of reactions in condensed phases on the fates and transformations of tropospheric chemical species. Offered in alternate years.

**270A-G. Topics in Atmospheric Science** (1-3) I, II, III. The Staff

Discussion—1-3 hours. Applications and concepts in (A) Meteorological Statistics; (B) Computer Modeling of the Atmosphere; (C) Design of Experiments and Field Studies in Meteorology; (D) Solar and Infrared Radiation in the Atmosphere; (E) Aerosol and Cloud Physics; (F) Atmospheric Chemistry; (G) General Meteorology.

**290. Seminar** (1) I, II, III. The Staff (Chairperson in charge)  
Seminar—1 hour. Prerequisite: graduate standing in Atmospheric Science or related field. Current developments in selected areas of atmospheric research. Topics will vary according to student and faculty interests. (S/U grading only.)

**291A-F. Research Conference in Atmospheric Science** (1-3) I, II, III. The Staff  
Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Review and discussion of current literature and research in: (A) Air Quality Meteorology; (B) Biometeorology; (C) Boundary Layer Meteorology; (D) Climate Dynamics; (E) General Meteorology; (F)

Atmospheric Chemistry. May be repeated up to a total of 6 units per segment. (S/U grading only.)

**298. Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

**299. Research** (1-12) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

## Atmospheric Science (A Graduate Group)

Terrence R. Nathan, Ph.D., Chairperson of the Group (530-752-1609)

Group Office, 151 Hoagland Hall (530-752-1406)

World Wide Web: <http://lawr.ucdavis.edu/gradprg.htm>

**Faculty.** Includes eighteen faculty members from the Departments of Land, Air and Water Resources, Mechanical Engineering, Civil and Environmental Engineering, Physics, the Institute of Toxicology and Environmental Health, and Environmental Science and Policy.

**Graduate Study.** The Graduate Group in Atmospheric Science offers both the M.S. and Ph.D. degree programs. The student can place emphasis on graduate work in one or more of the following fields: air quality meteorology, atmospheric chemistry, biometeorology, micrometeorology, numerical weather prediction, remote sensing, climate dynamics, large scale dynamics, and mesoscale meteorology. The diverse and extensive backgrounds of the faculty allow opportunities for interdisciplinary training and research.

**Preparation.** The Group encourages applications from all interested students with backgrounds in the physical or natural sciences. Basic qualifications for students entering the Atmospheric Science graduate program include mathematics to the level of vector calculus and differential equations, and one year of college-level physics. Considerable flexibility may be allowed for students with high academic potential, but it is expected that deficiencies in preparatory material and in key undergraduate atmospheric science courses be completed within the first year of graduate study.

**Graduate Adviser.** C. Anastasio (*Land, Air and Water Resources, 754-6095*).

**Graduate Admissions Officer.** T.R. Nathan (*Land, Air and Water Resources, 752-1609*).

## Avian Medicine

See **Medicine and Epidemiology**

## Avian Sciences

(College of Agricultural and Environmental Sciences)

**Faculty.** See under Department of Animal Science.

### The Major Program

Avian sciences is the study of birds and the ways in which they relate to and are useful to humans. The major combines the study of avian wildlife and their environments, production and marketing of domestic birds and eggs, caged exotic bird management, and basic and applied laboratory research on birds with a broad introduction to biological science.

**The Program.** The flexibility of the program and the close personal interaction between students, faculty, and specialists in the field give students a large role in selecting and designing their own course work. Students may specialize in a bachelor's program that qualifies them for a particular career or they may choose a program to meet other broader intellectual and cultural interests.

**Internships and Career Alternatives.** Independent study, undergraduate research, and internships are emphasized in the avian sciences program. Birds for laboratory or special study are housed within the main building as well as at the research farm and the experimental aviary. An avian sciences major has a variety of career options: health-oriented research, teaching biology, gamebird production, domestic and foreign agricultural extension and advisory services, governmental agencies, or the domestic or exotic bird industries. A recent survey has shown that the majority of avian sciences graduates enter graduate school or are employed by the domestic bird industry. The remainder of the graduates were evenly distributed in the categories of professional schools, avian biology agencies, educational fields, and individual jobs indirectly associated with birds.

### B.S. Major Requirements:

(For convenience in program planning, the *usual* courses taken to satisfy the requirements are shown in parentheses where possible. Equal or more comprehensive courses are acceptable.)

|                                                                                                                                                                                                       |              |

**Major Adviser.** K.L. Radke.

**Advising Center** for the major is located in 1202 Meyer Hall (530-752-6118).

### Minor Program Requirements:

|                                                                                      |           |
|--------------------------------------------------------------------------------------|-----------|
|                                                                                      | UNITS     |
| <b>Avian Sciences</b> .....                                                          | <b>18</b> |
| Choose one from Avian Sciences 11, 13, 14L, 15L, 16L.....                            | 2-3       |
| Choose remaining units from Avian Sciences 100, 103, 115, 121, 123, 149, 150, Animal |           |

\*Course not offered this academic year.

Science 143, Evolution and Ecology 137, Neurobiology, Physiology and Behavior 117, Wildlife, Fish and Conservation Biology 111.

**Graduate Study.** Further training is available through graduate or professional programs in animal physiology, genetics, nutrition, or veterinary medicine. The M.S. degree is offered in Avian Sciences. For details see under the Graduate Group in Avian Sciences. See also the Graduate Studies section in this catalog.

**Related Courses.** See Agricultural and Resource Economics 130; Animal Science 143; Food Science and Technology 120, 120L, 121; Molecular and Cellular Biology 150, 150L; Nutrition 123.

**Advising** for the major, minor, or the following courses is located in the Animal Science Advising Center, 1202 Meyer Hall (530-752-6118).

## Courses in Avian Sciences (AVS)

### Lower Division Courses

#### 11. Introduction to Poultry Science (3) II.

Bradley

Lecture—3 hours; one field trip required. The mosaic of events that have tied poultry science to other scientific disciplines and poultry to humans. Poultry science techniques and production methods from the time of domestication to the present. GE credit: SciEng, Wrt.

#### 13. Birds, Humans and the Environment (3) I.

Wilson, Morzenti

Lecture—2 hours; discussion—1 hour; half-day field trip. Interrelationships of the worlds of birds and humans. Lectures, discussions, field trips and projects focus on ecology, avian evolution, physiology, reproduction, flight, behavior, folklore, identification, ecotoxicology and conservation. Current environmental issues are emphasized. GE credit: SciEng, Wrt.

#### \*14L. Management of Captive Birds (2) II.

Morzenti

Fieldwork—3 hours; lecture/discussion—1 hour. Prerequisite: consent of instructor. One weekly discussion and field trip to study practical captive management (housing, feeding, equipment, marketing, diseases). Visit facilities rearing birds such as commercial parrots, hobbyist exotics, ostrich, raptors, waterfowl, game birds, poultry and pigeons.

#### 15L. Captive Raptor Management (2) I, III.

Morzenti

Laboratory—3 hours; independent study—3 hours; one field trip. Hands-on experience handling birds of prey. Students are taught all of the skills required to handle and care for raptors, including their husbandry, biology, habitat requirements, cage design, veterinary care, rehabilitation methods, research potential and long-term care requirements.

#### \*16LA-16LB-16LC. Raptor Migration and Population Fluctuations (2-2-2) I-II-III.

Morzenti  
Fieldwork—3 hours; discussion—1 hour; one Saturday field trip. Prerequisite: consent of instructor. Identify raptors; study effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data; compare with previous years. Species, observations, emphasis are different each quarter.

#### 92. Internship in the Avian Sciences (1-12) I, II, III.

The Staff (Chairperson in charge)

Internship—3-36 hours. Prerequisite: sophomore standing preferred; consent of instructor. Internship on and off campus in poultry, gamebirds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval Request form essential. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5) I, II, III.

The Staff (Chairperson in charge)

Prerequisite: consent of instructor. Problems in avian biology; nutrition, breeding, and physiology of poultry/wild birds and their products. (P/NP grading only.)

### Upper Division Courses

#### 100. Avian Biology (3) I. Weathers

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B. Survey of avian natural history and study of the diversity, functional morphology, behavior, ecology and evolution of birds.

#### 103. Avian Development and Genetics (3) I.

Delany

Lecture—2 hours; laboratory—3 hours. Prerequisite: Biological Sciences 101, Molecular and Cell Biology 150. Unique features of avian development and genetics. Development topics: gametogenesis, fertilization, pre- and post ovipositional development, morphogenesis, sex differentiation, specialized organ systems, incubations, hatching. Genetic topics: genome organization, inheritance, sex determination, avian models. Laboratory exercises: embryology, genetics, model systems.

#### 115. Raptor Biology (3) II. Morzenti

Lecture—3 hours; two Saturday field trips. Prerequisite: Biological Sciences 1A or the equivalent. Study of birds of prey: classification, distribution, habits and habitats, migration, unique anatomical and physiological adaptations, natural and captive breeding, health and diseases, environmental concerns, conservation, legal considerations, rehabilitation, and falconry.

#### 121. Avian Reproduction (2) II. Millam

Lecture—2 hours. Prerequisite: Biological Sciences 1A, 1B. Breeding cycles and reproductive strategies, egg and sperm formation, incubation, sexual development, imprinting, hormonal control of reproductive behavior and song. Species coverage includes wild and companion birds. Course has a physiological orientation. Offered in alternate years.

#### \*123. Management of Birds (3) II. Millam

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B. Captive propagation of birds, including reproduction, genetic management, health, feeding, artificial incubation, artificial insemination, and related legal aspects, including trade and smuggling. Emphasis on exotic species and the role of captive propagation in conservation. Offered in alternate years.

#### 149. Egg Production Management (2) III. Ernst

Lecture—2 hours; one Saturday field trip required. Prerequisite: course 11 or the equivalent, or consent of instructor. Management of commercial table egg flocks as related to environment, nutrition, disease control, economics, housing, equipment, egg processing and raising replacement pullets. Offered in alternate years.

#### \*150. Nutrition of Birds (1) III. Klasing

Lecture—1 hour. Prerequisite: Nutrition 110 (may be taken concurrently). Principles of nutrition specific to avian species, including feedstuffs, feed additives, nutrient metabolism, energy systems, and nutritional support of egg production and growth. Use of computers for feed formulation to support production. Offered in alternate years.

#### \*150L. Nutrition of Birds Laboratory (2) III. King

Laboratory—6 hours. Prerequisite: course 150. Feeding trials to show nutrient requirements. Metabolizable energy study and proximate analysis of feed. Determination of vitamins, minerals, fatty acids and other nutrients or substances in feed with emphasis on use of laboratory equipment.

#### 160. Designing and Performing Experiments in Avian Sciences (2) I, II, III. The Staff

Laboratory—6 hours. Prerequisite: course 100 or Wildlife, Fish and Conservation Biology 111 or Evolution and Ecology 137 or consent of instructor. Experiments in current problems in avian biology. Introduction to experimental design. Student choose a project, design a protocol, perform an experiment and report their findings. May be repeated for credit with consent of instructor.

#### 170. Advanced Avian Biology (4) II. Weathers

Lecture/discussion—3 hours; project—1 hour. Prerequisite: course 100 or Evolution and Ecology 137 or Wildlife, Fish and Conservation Biology 111. Ecology, behavior, functional morphology and life-history evolution of birds. Emphasis on the importance of body size as a principle determinant of most aspects of

avian performance from lifespan to reproduction and species abundance. Analytical synthesis and critical thought emphasized. Offered in alternate years.

#### 190. Seminar in Avian Sciences (1) I, II, III.

The Staff

Seminar—1 hour. Prerequisite: upper division standing in Avian Sciences and consent of instructor. May be repeated three times for credit. (P/NP grading only.)

#### 192. Internship in Avian Sciences (1-12) I, II, III.

The Staff (Chairperson in charge)

Internship—3-36 hours. Prerequisite: completion of a minimum of 84 units; consent of instructor. Internship on and off campus in poultry, gamebirds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval Request form essential. (P/NP grading only.)

#### 195. Topics in Current Research (1-3) I, II, III.

The Staff (Chairperson in charge)

Lecture/discussion—variable. Hours will depend on instructor with the number of units being commensurate with time in class. Prerequisite: consent of instructor. Discussion of topics of current interest in avian sciences. May be repeated three times for credit.

#### 197T. Tutoring in Avian Sciences (1-3) I, II, III.

The Staff (Chairperson in charge)

Hours and duties vary depending upon course being tutored. Prerequisite: Avian Sciences or related major; advanced standing; consent of instructor. Tutoring of students in lower division avian sciences courses; weekly conference with instructors in charge of course; written critiques of teaching procedures. (P/NP grading only.)

#### 198. Directed Group Study (1-5) I, II, III.

The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5) I, II, III.

The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

### Graduate Courses

#### 220. Cellular Proliferation and Oncogenes (4) I.

Radke, Oberbauer

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 101, 102, 103, 104; Genetics Graduate Group 201C or Molecular and Cellular Biology 221D or Microbiology 200C recommended. Regulation of growth and division of animal cells. The cell cycle, oncogenes, retroviruses and growth factors will be discussed in the context of normal and cancerous growth. Critical reading and writing are emphasized.

#### 290. Seminar (1) I, II, III. The Staff

Seminar—1 hour. Reports and discussions of recent advances and selected topics of current interest in avian genetics, physiology, nutrition, and poultry technology.

#### 290C. Research Conference (1) I, II, III. The Staff

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion. (S/U grading only.)

#### 297T. Supervised Teaching in Avian Sciences (1-4) I, II, III. The Staff (Chairperson in charge)

Tutoring—1-4 hours. Prerequisite: graduate standing and consent of instructor. Tutoring of students in lower, upper division, and graduate courses in Avian Sciences; weekly conference with instructor in charge of course; written critiques of teaching methods in lectures and laboratories. (S/U grading only.)

#### 298. Group Study (1-5) I, II, III. The Staff

(Chairperson in charge)

Prerequisite: consent of instructor.

#### 299. Research (1-12) I, II, III. The Staff

(Chairperson in charge)

Prerequisite: consent of instructor. (S/U grading only.)

## Avian Sciences (A Graduate Group)

J. R. Millam, Ph.D., Chairperson of the Group  
Group Office, 1202B Meyer Hall (530-752-2382)  
World Wide Web:  
<http://etx.ucdavis.edu/avs/avsdept.htm>

**Faculty.** Consists of members from several departments in the College of Agricultural and Environmental Sciences, Division of Biological Sciences, and the School of Veterinary Medicine.

**Graduate Study.** The Graduate Group in Avian Sciences offers the M.S. degree program to students who wish to pursue specialized advanced work on avian species. Specializations students may choose at present include nutrition, physiology, reproduction, pathology, toxicology, food chemistry, management, ecology, genetics, comparative incubation, environmental physiology, and cellular and developmental studies using wild and domestic birds as experimental animals. Both master's degree plans, thesis or comprehensive examination, are available.

**Preparation.** Applicants should have undergraduate preparation in a field appropriate to the course of study selected, including courses in most of the following subjects: general biology, general and organic chemistry, biochemistry, avian biology, genetics, nutrition, physiology, and statistics.

**Graduate Adviser.** C.C. Calvert (*Animal Sciences*).

## Biochemistry

See **Biological Sciences—Molecular and Cellular Biology; Biochemistry and Molecular Biology; Biophysics**

## Biochemistry and Molecular Biology (A Graduate Group)

Michael E. Dahmus, Ph.D., Chairperson of the Group  
Group Office, 188 Briggs Hall (530-752-9091)  
World Wide Web:  
<http://www-ggc.ucdavis.edu/ggc/bmb>

**Faculty.** Members of the group include faculty from the Colleges of Agricultural and Environmental Sciences and of Letters and Science, as well as the Schools of Medicine and of Veterinary Medicine.

**Graduate Study.** The Graduate Group in Biochemistry and Molecular Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. Strong preference is given to Ph.D. applicants. Graduate work involves a broad overview of biochemistry and molecular biology in addition to specialization in one or more areas. Examples of areas of emphasis include gene expression, molecular basis of development, protein structure, molecular virology, protein synthesis, enzymology, signal transduction, membrane transport and structural biology. For more information contact the chairperson of the group.

**Graduate Advisers.** E. Bandman (*Food Science and Technology*), D.J. Klionsky (*Microbiology*), P. Ronald (*Plant Pathology*), R. Fairclough (*Neurology*).

## Courses in Biochemistry and Molecular Biology (BMB)

### Graduate Courses

**290. Seminar** (1) I, II, III. The Staff Seminar—1 hour. Prerequisite: consent of instructor. (S/U grading only.)

**299. Research** (1-12) I, II, III. The Staff (S/U grading only.)

## Biological Chemistry

See **Medicine, School of**

## Biological and Agricultural Engineering

(College of Agricultural and Environmental Sciences)  
David J. Hills, Ph.D., Chairperson of the Department  
Department Office, 2030 Bainer Hall (530-752-0102)  
World Wide Web: <http://www.engr.ucdavis.edu/~bae>

### Faculty

Pictiaw (Paul) Chen, Ph.D., Professor  
Michael J. Delwiche, Ph.D., Professor  
D. Ken Giles, Ph.D., Professor  
Mark E. Grismer, Ph.D., Professor  
Bruce R. Hartsough, Ph.D., Professor  
David J. Hills, Ph.D., Professor  
Bryan M. Jenkins, Ph.D., Professor  
John M. Krochta, Ph.D., Professor  
Miguel A. Mariño, Ph.D., Professor  
Kathryn McCarthy, Ph.D., Associate Professor  
Michael J. McCarthy, Ph.D., Professor  
John A. Miles, Ph.D., Professor  
Ning Pan, Ph.D., Associate Professor  
Raul H. Piedrahita, Ph.D., Associate Professor  
Richard E. Plant, Ph.D., Professor  
James W. Rumsey, Ph.D., Lecturer  
Thomas R. Rumsey, Ph.D., Professor  
R. Paul Singh, Ph.D., Professor  
David C. Slaughter, Ph.D., Associate Professor  
Shrinivasa K. Upadhyaya, Ph.D., Professor  
Jean S. VanderGheynst, Ph.D., Assistant Professor  
Wesley W. Wallender, Ph.D., Professor  
Ruihong Zhang, Ph.D., Assistant Professor

### Emeriti Faculty

Norman B. Akesson, M.S., Professor Emeritus  
William J. Chancellor, Ph.D., Professor Emeritus  
Robert B. Fridley, Ph.D., Professor Emeritus  
Roger E. Garrett, Ph.D., Professor Emeritus  
John R. Goss, M.S., Professor Emeritus  
George F. Hanna, M.Ed., Lecturer Emeritus  
S. Milton Henderson, M.S., Sc.D., Professor Emeritus  
Robert A. Kepner, B.S., Professor Emeritus  
Coby Lorenzen, Jr., M.S., Professor Emeritus  
R. Larry Merson, Ph.D., Professor Emeritus  
Stanton R. Morrison, Ph.D., Professor Emeritus  
Michael O'Brien, Ph.D., Professor Emeritus  
Henry E. Studer, M.S., Professor Emeritus  
Wesley E. Yates, M.S., Professor Emeritus

### Affiliated Faculty

James M. Myers, Ph.D., Extension Specialist  
William E. Steinke, Ph.D., Extension Specialist  
James F. Thompson, M.S., Extension Specialist

**Major Programs and Graduate Study.** For the Bachelor of Science program see the major in Engineering; for graduate study see the Graduate Studies chapter in this catalog.

**Minor Programs.** The Department of Biological and Agricultural Engineering offers three minors through the College of Agricultural and Environmental Sciences: **Applied Biological Systems Technology**, **Geographic Information Systems** and **Precision Agriculture**.

The Applied Biological Systems program is for non-engineering students interested in engineering terminology and procedures. Course work provides knowledge of material properties, design procedures, fabrication principles, and hardware practices.

The minor in Geographic Information Systems is open to all majors, including those in engineering. This minor is for students interested in information processing of spatial data related to remote sensing for geographical and environmental planning and related areas.

The minor in Precision Agriculture is open to all majors, including those in engineering, and acquaints students with recent developments and their applications to agriculture, in geographic information systems, global positioning systems, and variable rate technologies.

**Courses.** Courses are listed under Applied Biological Systems Technology, and Engineering: Biological and Agricultural (Biological Systems Engineering).

## Biological Sciences

(College of Agricultural and Environmental Sciences and College of Letters and Science)

Mark G. McNamee, Ph.D., Dean of Biological Sciences

Thomas L. Rost, Ph.D., Associate Dean

Division Office, 202 Life Sciences Addition  
(530-752-0410)

World Wide Web: <http://www.dbs.ucdavis.edu>

The intercollege Division of Biological Sciences coordinates campuswide programs in basic biology and administers undergraduate programs in the core disciplines of biology on behalf of the College of Agricultural and Environmental Sciences and the College of Letters and Science.

The division has five sections that represent the major themes of modern biology: Evolution and Ecology; Microbiology; Molecular and Cellular Biology; Neurobiology, Physiology, and Behavior; and Plant Biology. Core courses in biological sciences, the Biological Sciences major, and the Bodega Marine Laboratory Program are offered jointly by the sections of the division. Each section also offers courses and one or more majors focusing on the core disciplines.

### Faculty

All faculty are primary members of one section and some faculty are secondary members of a second section as well. See "Sections of the Division," following, for a list of faculty in each section.

### The Major Programs

Four majors leading to an A.B. degree are offered in:

**Biological Sciences**  
**Evolution and Ecology**  
**Microbiology**  
**Plant Biology**

Eight majors leading to a B.S. degree are offered in:

**Biochemistry**  
**Biological Sciences**  
**Cell Biology**  
**Evolution and Ecology**  
**Genetics**  
**Microbiology**  
**Neurobiology, Physiology and Behavior**  
**Plant Biology**

**Choice of College.** The Bachelor of Arts degree is offered only by the College of Letters and Science. The Bachelor of Science degree is offered by both the

College of Letters and Science and the College of Agricultural and Environmental Sciences. The major requirements are the same in each college, but there are differences in the college requirements and policies. See the Undergraduate Education chapter college sections in this catalog for more information.

**Student Services.** Student affairs officers at the division's Dean's Office, 202 Life Sciences Addition, and advising staff in section offices provide information and counseling on the major programs and courses offered by the division.

### The Biological Sciences Major

(Sections of Evolution and Ecology; Microbiology; Molecular and Cellular Biology; Neurobiology, Physiology, and Behavior; and Plant Biology)

**The Program.** The Biological Sciences major is broad in concept, spanning the numerous core disciplines of biology. The Bachelor of Science program includes mathematics, general and organic chemistry, physics, and biology. While emphasizing breadth, the B.S. degree program also features an area of emphasis requirement that provides concentrated attention on one facet of biology at the upper division level. Each area of emphasis coincides with one of the sections of the division. The Bachelor of Arts program emphasizes biological diversity, evolution, and ecology, all built on a foundation of general and organic chemistry, physics and biology. Research and internships are encouraged in both programs.

**Career Alternatives.** Both degree programs prepare students for admission to graduate schools or professional schools, leading to either a variety of professional health careers or further study in basic and applied areas of biology. They provide suitable preparation for careers in teaching, biological and biotechnical research with various governmental agencies or private companies, government regulation agencies, environmental consulting, biological illustration and writing, pharmaceutical sales, biological/environmental law, and biomedical engineering.

The B.A. degree program is also appropriate for students interested in teaching biology at the secondary school level, and for careers that bear on the ecological problems that require the development of public policy.

### A.B. Major Requirements:

|                                                                                                                                                           |              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
|                                                                                                                                                           | UNITS        |
| <b>Preparatory Subject Matter</b> .....                                                                                                                   | <b>40-53</b> |
| Biological Sciences 1A-1B-1C.....                                                                                                                         | 15           |
| Chemistry 2A-2B.....                                                                                                                                      | 10           |
| Chemistry 8A-8B or 118A-118B-118C.....                                                                                                                    | 6-12         |
| Physics 1A-1B or 7A-7B-7C.....                                                                                                                            | 6-12         |
| Statistics 13, 32, 100, or 102.....                                                                                                                       | 3-4          |
| Recommended: Chemistry 2C and Mathematics 16A-16B.                                                                                                        |              |
| <b>Depth Subject Matter</b> .....                                                                                                                         | <b>38-47</b> |
| Biological Sciences 101 and 102.....                                                                                                                      | 7            |
| One course in evolution from Evolution and Ecology 100, 140; Geology 107; Plant Biology 116.....                                                          | 4            |
| One course in ecology from Environmental Science and Policy 100; Evolution and Ecology 101, 121; Evolution and Ecology/Plant Biology 117.....             | 3-4          |
| One course in philosophy of science from History and Philosophy of Science 130A, 130B; Philosophy 108.....                                                | 4            |
| One course in physiology from Environmental Horticulture 102; Entomology 101, 102; Neurobiology, Physiology and Behavior 101; Plant Biology 111, 112..... | 3-5          |
| One course each in animal, microbial and plant diversity.....                                                                                             | 9-15         |
| <i>Animal diversity:</i>                                                                                                                                  |              |
| Entomology 100, 107, 109; Evolution and Ecology 105, 112, 134, 137; Nematology 110; Wildlife, Fish and Conservation Biology 110, 111, 120.                |              |
| <i>Microbial diversity:</i>                                                                                                                               |              |
| Microbiology 105, 162; Pathology, Micro-                                                                                                                  |              |

biology and Immunology 127, 128; Plant Biology 118, 148; Soil Science 111.

*Plant diversity:*  
Evolution and Ecology 121, 140; Plant Biology 102, 108, 116, 121.

Additional upper division course work in biological sciences to achieve a total of 38 or more units (see "Approved Biology Electives" list below).

Upper division course work must include at least 2 units (6 hours per week) of laboratory and/or fieldwork.

**Note: Although courses may be listed in more than one category, each course may be offered in satisfaction of only one requirement.**

**Total units for the major** .....78-100

### B.S. Major Requirements:

|                                                                                                                                                                                                                                                                               |              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
|                                                                                                                                                                                                                                                                               | UNITS        |
| <b>Preparatory Subject Matter</b> .....                                                                                                                                                                                                                                       | <b>60-67</b> |
| Mathematics 16A-16B-16C.....                                                                                                                                                                                                                                                  | 9            |
| Chemistry 2A-2B-2C.....                                                                                                                                                                                                                                                       | 15           |
| Chemistry 8A-8B or 118A-118B-118C.....                                                                                                                                                                                                                                        | 6-12         |
| Biological Sciences 1A-1B-1C.....                                                                                                                                                                                                                                             | 15           |

| Biological Sciences 101, 102, 103, 104.....                                                                                                                                                                                                                                   | 13           |
| Restricted Electives.....                                                                                                                                                                                                                                                     | 32           |
| <b>Breadth in the major</b> is achieved by completing at least one course from each of the five field requirement lists, (a) through (e), below. See your area of emphasis for any specific course requirements.                                                              |              |
| <b>Depth in the major</b> is achieved by completing one area of emphasis listed below and additional upper division biology courses (see "Approved Biology Electives" list), as needed, to total to 32 units. See your faculty adviser regarding the choice of those courses. |              |
| Depth in the major must include at least 2 units (or 6 hours per week) of laboratory designated in the area of emphasis.                                                                                                                                                      |              |
| <b>Note: Although courses may be listed in more than one category, each course may be offered in satisfaction of only one requirement.</b>                                                                                                                                    |              |
| <b>Field Requirement Course List (Breadth):</b>                                                                                                                                                                                                                               |              |
| (a) <i>Evolution:</i> Anthropology 151, 152, 154A; Evolution and Ecology 100; Geology 107; Plant Biology 143.....                                                                                                                                                             | 3-5          |
| (b) <i>Ecology:</i> Anthropology 154B; Biological Sciences 122; Entomology 104, 156; Environmental Science and Policy 100, 121; Evolution and Ecology 101; Microbiology 120; Wildlife, Fish and Conservation Biology 151.....                                                 | 3-4          |
| (c) <i>Microbiology:</i> Food Science and Technology 104; Microbiology 102, 140, 150, 162; Pathology, Microbiology and Immunology 127, 128; Soil Science 111.....                                                                                                             | 3-5          |
| (d) <i>Neurobiology, physiology and behavior:</i> Anthropology 154A, 154B; Entomology 102, 104; Neurobiology, Physiology and Behavior 100, 101, 102, 141.....                                                                                                                 | 3-5          |
| (e) <i>Plant biology:</i> Environmental Horticulture 102, 105; Evolution and Ecology 117, 121, 140; Plant Biology 102, 105, 108, 111, 112, 113, 116, 117, 118, 121, 143, 144, 148, 176; Plant Pathology 120, 130.....                                                         | 3-5          |
| <b>Areas of Emphasis (Depth):</b>                                                                                                                                                                                                                                             |              |
| <b>Evolution and Ecology</b> emphasis.....                                                                                                                                                                                                                                    | <b>12-18</b> |
| Field requirement: Students must take Evolution and Ecology 100 to satisfy Field requirement (a), and Evolution and Ecology 101 to satisfy Field requirement (b). Evolution and Ecology 102 or 103.....                                                                       | 3-4          |

Biodiversity, six or more units, to include at least two units (or 6 hours per week) of laboratory, from the following: Entomology 100, 100L, 107, 109; Evolution and Ecology 112, 112L, 121, 134, 134L, 137, 137L; Geology 107, 107L; Microbiology 105; Nematology 110; Plant Biology 102, 108, 118, 148; Wildlife, Fish and Conservation Biology 110, 110L, 111, 111L, 120, 120L.....6-9

Restricted electives.....3-5

Select one course from: Biological Sciences 122, 122P; Entomology 103, 104, 156, 156L; Environmental Science and Policy 121, 123, 150A, 150B, 150C, 151, 151L; Evolution and Ecology 105, 117, 138, 140, 141, 147, 149, 170, 170L; Geology 107, 107L; Nematology 100; Neurobiology, Physiology and Behavior 102; Philosophy 108; Plant Biology 116, 117, 121; Wildlife, Fish and Conservation Biology 136.

### Microbiology emphasis.....13-15

Field requirement: Students must take Microbiology 102 to satisfy Field requirement (c).

Laboratory requirement: Students must take Microbiology 102L to satisfy the restricted elective lab requirement.

Clusters: Complete one of the four clusters (a-d) below, **or** complete an individual cluster with approval from your faculty adviser.

(a) *Microbial Physiology and Molecular Genetics*  
Microbiology 102L.....2  
Select two courses from Microbiology 140, 150, 160.....6  
Select six or more units from: Microbiology 155L, 177; Molecular and Cellular Biology 121, 123, 141, 161.....6

(b) *Microbial Diversity and Ecology*  
Microbiology 102L, 105, 162.....11  
Select three or more units from: Microbiology 120, 120L; Plant Biology 118; Soil Science 111.....3

(c) *Biotechnology and Applied Microbiology*  
Microbiology 102L.....2  
Microbiology 140 or 150.....3  
Select one course from: Food Science and Technology 102A, 104, or Viticulture and Enology 186.....3-4  
Select six or more units from: Chemical Engineering 161A; Microbiology 110, 155L; Molecular and Cellular Biology 121, 122, 123, 170L.....6

(d) *Medical Microbiology*  
Microbiology 102L.....2  
Pathology, Microbiology and Immunology 127 or Medical Microbiology 115-116.....5  
Microbiology 162 or Pathology, Microbiology and Immunology 128.....3-4  
Medical Microbiology 107 or Pathology, Microbiology and Immunology 126.....3-4

### Molecular and Cellular Biology emphasis....12-18

Molecular biology and gene expression: one course from Molecular and Cellular Biology 121, 141, 161.....3-4

Laboratory experience: one or more laboratory courses from Biological Sciences 120P; Molecular and Cellular Biology 120L, 140L, 160L; or other laboratory course that emphasizes cellular or molecular biology with approval of your adviser.....3-6

Restricted electives.....6-8

Select two or more courses from Biological Sciences 120; Medical Microbiology 107; Molecular and Cellular Biology 122, 123, 126, 141, 142, 150, 151L, 162, 163;

## 158 Biological Sciences (Major Programs)

Neurobiology, Physiology and Behavior 103; Pathology, Microbiology and Immunology 126; Plant Biology 113, 126; or other courses with adviser's approval.

### Neurobiology, Physiology and Behavior emphasis.....15

Select courses from at least two of the following three areas and include one laboratory from Neurobiology, Physiology and Behavior 101L, 104L, 141P, or 160L....15

#### (1) Neurobiology:

Neurobiology, Physiology and Behavior 100, 106\*, 112, 124, 125, 126, 160, 160L, 161, 163; Psychology 108, 124, 163.

#### (2) Physiology:

Entomology 102; Evolution and Ecology 170, 170L; Exercise Science 101, 101L, 102, 110, 111; Medical Microbiology 107; Neurobiology, Physiology and Behavior 101, 101L, 103, 104L, 105, 106\*, 111C, 111L, 113, 114, 117, 119, 119L, 121, 121L, 127, 128, 130, 140, 141, 141P; Pathology, Microbiology and Immunology 126; Wildlife, Fish and Conservation Biology 121.

#### (3) Behavior:

Anthropology 154A, 154B; Entomology 104; Neurobiology, Physiology and Behavior 102, 150, 152; Psychology 150.

\***Note:** Neurobiology, Physiology and Behavior 106 may be used only once to satisfy Area of Emphasis requirements.

### Plant Biology emphasis .....13-16

Select one course from each of the following four areas and include one laboratory course from Plant Biology 105, 108, 111L, 116, 118, 148, 161A, 161B; or two laboratory courses from Evolution and Ecology 140, Plant Biology 153, 158, 171, 172L.

#### (1) Anatomy and morphology:

Evolution and Ecology 140; Plant Biology 105, 116, 118.....4-5

#### (2) Physiology and development:

Plant Biology 111, 112, 113; Plant Pathology 130.....3

#### (3) Evolution and ecology:

Evolution and Ecology 100, 117; Plant Biology 117, 143.....3-4

#### (4) Applied plant biology:

Agricultural Systems and Environment 110A; Plant Biology 154, 160, 171, 172, 175.....3-4

### Total Units for the Major .....105-112

### Approved Biology Electives

These are courses which are accepted without petition for upper division units in the Biological Science major. Many other biologically related courses may be substituted with consent of your adviser.

Agricultural Systems and Environment 135

Anatomy, Physiology and Cell Biology 100

Anthropology 151, 152, 153, 154A, 154B, 155, 156, 157

Avian Sciences 100, 150

Biological Sciences—All upper division courses

Cell Biology and Human Anatomy 101, 101L

Chemistry 107A, 107B, 108, 150

Entomology—All upper division courses

Environmental Horticulture 105, 107

Environmental Science and Policy 100, 110, 121, 123, 124, 150C, 151, 151L

Evolution and Ecology—All upper division courses

Exercise Science 101, 102, 110, 111, 113

Geology 107, 107L, 150C

Medical Microbiology 107, 115

Microbiology—All upper division courses

Molecular and Cellular Biology—All upper division courses

Nematology 100, 110

Neurobiology, Physiology and Behavior—All upper division courses

Nutrition 101, 110, 111

Pathology, Microbiology and Immunology 101, 101L, 102, 126, 126L, 127, 128

Philosophy 108

Plant Biology—All upper division courses, except 188

Plant Pathology 120, 130

Psychology 108, 150

Wildlife, Fish and Conservation Biology 110, 111, 120, 120L, 121, 122, 130, 136, 140, 151

### Other Upper Division Courses

There is a limitation on variable-unit courses that may be counted toward the major. Of these courses, up to 4 units of 199 courses may be counted, and no units of 192 or 197T courses may be counted.

### Minor Program Requirements:

The minor in Biological Sciences acquaints students with the range and variety of modern biology, including work in two or three areas: animal biology, plant biology, and microbiology; and in four of the following five subdisciplines: organismal biology, ecology, evolution, physiology, and biochemistry and cell biology. The list of required courses is restricted to those that are acceptable for the major program in Biological Sciences but which do not require extensive upper division preparatory work. Substitutions of more advanced courses can be made, as appropriate, with the approval of an adviser for the minor.

### UNITS

### Biological Sciences .....24

Biological Sciences 1C .....5

Biological Sciences 101 .....4

Additional upper division units (as specified in the area requirements and group requirements below) .....15

**Area Requirement:** one course in two of the area requirements below: animal biology, microbiology, and plant biology.

#### (a) Animal biology:

Anatomy 100; Anthropology 151, 152, 153, 154A, 155, 156; Avian Sciences 100; Biological Sciences 120, 122; Cell Biology and Human Anatomy 101; Entomology 101, 102, 103, 104, 109, 116, 119, 153; Environmental Science and Policy 129; Evolution and Ecology 100, 101, 105, 112, 133, 134, 136, 137, 138, 147, 149, 170; Geology 111A; Molecular and Cellular Biology 150; Nematology 110; Neurobiology, Physiology and Behavior 102; Wildlife, Fish and Conservation Biology 110, 111, 120, 140, 151.

#### (b) Microbiology:

Entomology 156; Geology 111B; Medical Microbiology 107; all upper division Microbiology courses (excluding 190–199); Plant Biology 118, 119; Plant Pathology 120, 130; Veterinary Microbiology and Immunology 126, 127, 128, 132.

#### (c) Plant biology:

Environmental Horticulture 105, 107; Evolution and Ecology 121, 140, 144; all upper division Plant Biology courses, excluding 190–199 and Botany/Zoology 130; Plant Science 101, 103; Range Science 100; Vegetable Crops 105.

**Note:** Plant Biology 118 or 119 may be used for either microbiology or plant biology (not both).

**Group Requirement:** at least one course or course sequence from four of the five group requirements below:

#### (a) Organismal biology:

Evolution and Ecology 112, 136, 137; Microbiology 105; Molecular and Cellular Biology 150; Plant Biology 102, 105.

#### (b) Population biology and ecology:

Anthropology 154A; Environmental Science and Policy 100; Evolution and Ecology 101, 121; Wildlife, Fish and Conservation Biology 151.

(c) *Evolutionary biology:* Anthropology 151; Evolution and Ecology 100, 140, 149; Geology 107; Plant Biology 116.

#### (d) *Physiology:*

Neurobiology, Physiology and Behavior 101; Plant Biology 111, 112.

#### (e) *Biochemistry and cell biology:*

Biological Sciences 102 and 103, 104; Molecular and Cellular Biology 141.

**Note:** A course that appears on both the area and group requirement lists may be used toward satisfying both requirements. Both halves of sequential courses connected by a hyphen must be taken.

**Advisers and Advising:** Information on the Biological Sciences major or minor can be obtained from the Undergraduate Academic Programs Office, 202 Life Sciences Addition.

**Honors and Honors Programs.** Students who have met the minimum grade point average and the units-completed criteria, and who have obtained a sponsoring faculty supervisor may elect to participate in the Division of Biological Sciences Honors Program. The program entails completion of a research project and honors thesis through enrollment in course 194H.

The division additionally recommends students to the College of Letters and Science for the purpose of awarding High and Highest Honors at graduation.

**Citation for Outstanding Performance.** The Division of Biological Sciences confers Citations for Outstanding Performance on undergraduates majoring in Biological Sciences who have demonstrated superior academic performance and individual achievement in research. Students who wish to be considered for a citation must first meet or exceed a specified grade point average and participate in an appropriate research project.

**Teaching Credential Subject Representative.** Associate Dean (Biological Sciences). See also the Teacher Education Program.

## Majors in the Core Disciplines of Biology

### The Biochemistry Major Program

(Section of Molecular and Cellular Biology)

The Biochemistry major introduces students to the chemistry of living organisms and the experimental techniques that are used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology and who are comfortable with quantitative approaches to problem solving will find biochemistry a rewarding field of study.

**The Program.** The biochemistry program begins with the four-course, upper division common curriculum that provides an introduction to the principles of biochemistry, genetics, and cell biology. Biochemistry majors then take a comprehensive and rigorous laboratory course to familiarize them with the most important aspects of biochemical research. Additional upper division courses in biochemistry examine detailed aspects of modern biochemistry. Students also are required to take courses in other biological sciences and a full year of physical chemistry.

**Career Alternatives.** The biochemistry program provides a solid scientific background for students seeking a research, teaching, or service career in the life sciences. Positions are open to biochemists in biomedical, biotechnology, pharmaceutical, agricultural research and chemical industries. Also, university-affiliated research laboratories, hospital laboratories, and government-sponsored research facilities provide employment opportunities. The major provides excellent preparation for advanced study in graduate or professional schools.

**B.S. Major Requirements:**

|                                                                                                                                                                                                                                   |              |

| Upper division courses in biological sciences or chemistry. Students are encouraged to obtain additional laboratory experience; however, no more than 3 units of 192, 193 or 199 may be counted toward Restricted Elective units. |              |

**Total Units for the Major**.....**107-112**

**Master Adviser.** L.R. Sprechman (*Section of Molecular and Cellular Biology*), 126 Briggs Hall.

**Advising Center** for the major is located in 156 Briggs (530-752-9032).

**Graduate Study.** See Biochemistry and Molecular Biology (A Graduate Group); and the Graduate Studies chapter of this catalog.

**The Cell Biology Major Program**

(Section of Molecular and Cellular Biology)

The Cell Biology major program provides students with a comprehensive understanding of the cell, the basic structural and functional unit of all living organisms.

**The Program.** To understand living organisms, the biologist must understand the cell. Hence, cell biology lies at the core of the biological sciences. Students taking this major gain a solid foundation in biological principles. The major emphasizes the principles that govern how biomolecules interact with one another to organize themselves into higher order structures that comprise cells, and how cellular organization and function contribute to the development, maintenance and reproduction of adult organisms. The major illustrates the ways in which principles derived from the physical sciences, genetics, biochemistry and physiology are integrated in the study of living cells and emphasizes the experimental nature of the study of cell biology.

**Career Alternatives.** The major provides an excellent background for students wishing to enter postgraduate and professional programs in biological, medical or veterinary sciences, for students pursuing careers involving teaching or research in the biological sciences or careers related to the administrative, legal or commercial aspects of biomedical science.

**B.S. Major Requirements:**

|                                                                                                                                                         |              |

| Molecular and Cellular Biology 141 (recommended) or 121 or 161 .....                                                                                    | 3-4          |
| One additional upper division laboratory course from: Molecular and Cellular Biology 120L, 151L, 160L; Neurobiology, Physiology and Behavior 160L ..... | 4-6          |

Two additional courses from: Chemistry 108; Molecular and Cellular Biology 142, 146, 163; Neurobiology, Physiology and Behavior 160; Pathology, Microbiology, and Immunology 126; Plant Biology 125; or other courses in cell biology with the approval of the master adviser.....6-8

**Total Units for the Major**.....**108-113**

**Master Adviser.** D.G. Myles (Molecular and Cellular Biology), 3167 Life Sciences Addition.

**Advising Center** for the major is located in 156 Briggs (530-752-0202).

**The Evolution and Ecology Major Program**

(Section of Evolution and Ecology)

The major in Evolution and Ecology offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.

**The Program.** The program of study for the Evolution and Ecology major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in evolution and ecology and various more specialized courses that allow the student to focus his or her studies. Evolution and Ecology majors may earn either a Bachelor of Science or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

**Career Alternatives.** A degree in evolution and ecology prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, or business.

**A.B. Major Requirements:**

|                                                                                                                                                    |              |
|----------------------------------------------------------------------------------------------------------------------------------------------------|--------------|

| <b>Depth Subject Matter</b> .....                                                                                                                  | <b>36</b>    |
| Biological Sciences 101 .....                                                                                                                      | 4            |
| Biological Sciences 104 or Botany/Zoology 130 (fall quarter 1993 only) or Zoology 121A and Molecular and Cellular Biology 141 (1993-94 only) ..... | 4-8          |
| One course from Anthropology 151; Evolution and Ecology 100; Geology 107, 111A .....                                                               | 3-4          |
| Additional upper division course work in biological science to achieve a total of 36 or more units .....                                           | 20-25        |
| Include at least 15 units in Evolution and Ecology (or Zoology) and one course from two of the four areas of study (a-d).                          |              |
| <i>(a) Ecology and behavior:</i>                                                                                                                   |              |
| Environmental Science and Policy 100; Evolution and Ecology 101, 147, 149; Neurobiology, Physiology and Behavior 102.                              |              |
| <i>(b) Systematics, morphology, and natural history:</i>                                                                                           |              |
| Entomology 100; Evolution and Ecology 105, 112, 133, 134, 134L, 136, 136L, 137, 137L.                                                              |              |
| <i>(c) Developmental biology:</i>                                                                                                                  |              |
| Molecular and Cellular Biology 150, 150L, 151.                                                                                                     |              |

*(d) Physiology:*  
Molecular and Cellular Biology 142; Neurobiology, Physiology and Behavior 110, 110L, 142, 142L, 143.

**Note:** A maximum of 5 units of variable-unit courses (numbered 192, 198, 199) may be applied to upper division elective requirements. Evolution and ecology majors may not substitute course 192 for the upper division laboratory requirement. Courses numbered 197T are not applicable to the upper division elective unit requirement.

**Total Units for the Major**.....**77-81**

**Recommended**

Biological Sciences 102-103; Geology 3; Physics 7A.

**B.S. Major Requirements:**

|                                                                                                                       |              |
|-----------------------------------------------------------------------------------------------------------------------|--------------|
|                                                                                                                       | UNITS        |
| <b>Preparatory Subject Matter</b> .....                                                                               | <b>57-66</b> |
| Biological Sciences 1A-1B-1C .....                                                                                    | 15           |
| Chemistry 2A-2B-2C .....                                                                                              | 15           |
| Chemistry 8A-8B or 118A-118B-118C .....                                                                               | 6-12         |
| Mathematics 16A-16B-16C or 21A-21B-21C .....                                                                          | 9-12         |
| Physics 7A-7B-7C .....                                                                                                | 12           |
| <b>Depth Subject Matter</b> .....                                                                                     | <b>49</b>    |
| Biological Sciences 101, 102, 103, 104.....                                                                           | 13           |
| Evolution and Ecology 100, 101, and 102 or 103 .....                                                                  | 11-12        |
| Statistics 100 or 102 or 130A-130B .....                                                                              | 4-8          |
| Additional upper division course work in biological science to achieve a total of 49 or more units .....              | 16-21        |
| Include at least 2 units (6 hours per week) of laboratory and one course from each of the areas of study below (a-b). |              |

*(a) Biodiversity:*  
Entomology 100, 100L, 107, 109; Environmental Science and Policy 124; Evolution and Ecology 112, 112L, 121, 134, 134L, 137, 137L; Plant Biology 108, 118, 148; Wildlife, Fish and Conservation Biology 110, 110L, 111, 111L, 120, 120L.

*(b) Physiology and functional morphology:*  
Anatomy, Physiology and Cell Biology 100; Avian Sciences 100; Entomology 101, 102; Environmental Science and Policy 129, 129L; Evolution and Ecology 105, 170, 170L; Neurobiology, Physiology and Behavior 101, 141, 141P; Plant Biology 111, 111L, 112, 116; Wildlife, Fish and Conservation Biology 121.

**Note:** A maximum of 4 units of variable-unit courses (numbered 192, 198, 199) may be applied to upper division elective requirements. Evolution and ecology majors may not substitute course 192 for the upper division laboratory requirement. Courses numbered 197T are not applicable to the upper division elective unit requirement.

**Total Units for the Major**.....**106-115**

**Biological Sciences Electives**

The following courses are acceptable toward the fulfillment of the upper division biological sciences requirement in the A.B. and B.S. major programs and may be selected without adviser approval. Other elective courses are approved on an individual basis by petition through an adviser.

- Anatomy, Physiology and Cell Biology 100
- Anthropology 151, 152, 153, 154A, 154B, 155, 156
- Biological Sciences, all upper division courses
- Chemistry 107A, 107B
- Entomology, all upper division courses except 110, 115
- Environmental Science and Policy 110, 116, 121, 123, 150C, 151, 151L
- Geology 106, 107, 107L, 145, 146, 150C

## 160 Biological Sciences (Major Programs)

Microbiology, all upper division courses  
Molecular and Cellular Biology, all upper division courses  
Nematology 110  
Neurobiology, Physiology and Behavior, all upper division courses  
Nutrition 110, 111  
Pathology, Microbiology and Immunology 101, 101L, 126, 126L, 128  
Philosophy 108  
Plant Biology, all upper division courses  
Psychology 108, 129, 134, 150  
Wildlife, Fish and Conservation Biology 120, 120L, 121

**Major Advisers.** Students transferring to Davis from another institution and majoring in evolution and ecology must consult an adviser immediately upon matriculation so that their transfer credits can be applied to the major requirements. All new students in the major should contact the Section of Evolution and Ecology Office for adviser assignment. Substitutions of courses not on the above list for major requirements are arranged through the adviser.

**Advising Center** for the major is located in 2320 Storer Hall (530-752-8523). Pre-professional students should establish contact with the Health Sciences Advising Office, 111 South Hall, to learn what specific courses are required on their transcripts.

**Teaching Credential Subject Representative.** Students planning for a teaching career should consult the Department of Education in regard to preparation for certification. See also the section on the Teacher Education Program.

### The Genetics Major Program

(Section of Molecular and Cellular Biology)

The Genetics major provides a broad background in the biological, mathematical, and physical sciences basic to the study of heredity and evolution. The major is sufficiently flexible to accommodate students interested in the subject either as a basic discipline in the biological sciences or in terms of its applied aspects such as biotechnology, medicine, and agriculture.

**The Program.** The genetics program begins with the four-course, upper division common curriculum that provides an introduction to the principles of genetics, biochemistry, and cell biology. Students then take additional upper division courses in specialized areas of modern genetics including gene expression, evolution, development, and human genetics, as well as a laboratory course in the principles of genetics. Additional upper division courses in biological sciences are required, including a second laboratory course.

**Career Alternatives.** The genetics degree provides suitable preparation for a wide variety of careers, including teaching, research, work with biotechnology companies, medicine, and all the health sciences. It is also an excellent background for students wishing to enter a graduate program, a teacher-training program, medical school, veterinary school, or other professional schools.

| <b>Preparatory Subject Matter</b> .....                                                               | <b>60-70</b> |
| Biological Sciences 1A-1B-1C .....                                                                    | 15           |
| Chemistry 2A-2B-2C .....                                                                              | 15           |
| Chemistry 8A-8B or 118A-118B-118C ...                                                                 | 6-12         |
| Mathematics 16A-16B-16C or 21A-21B-21C .....                                                          | 9-12         |
| Physics 7A-7B-7C .....                                                                                | 12           |
| Statistics 13, 32, 100, or 102.....                                                                   | 3-4          |
| <b>Depth Subject Matter</b> .....                                                                     | <b>50-51</b> |
| Biological Sciences 101, 102, 103, 104.....                                                           | 13           |
| Molecular and Cellular Biology 160L, 162, 163, 164 .....                                              | 13           |
| Evolution and Ecology 100.....                                                                        | 4            |
| One course from the following: Molecular and Cellular Biology 121, 141, 161 .....                     | 3-4          |
| One course from the following: Microbiology 102-102L; Molecular and Cellular Biology 120L, 170L ..... | 6            |

Restricted Electives.....11  
Upper division courses in genetics or other fields relevant to the student's interest chosen in consultation with the adviser. No more than 4 units of 192, 193, 198, or 199 can be used for credit in this category.

**Total Units for the Major**.....**110-121**

**Master Adviser.** Contact R.S. Hawley (Molecular and Cellular Biology), 345 Briggs Hall.

**Advising Center** for the major is located in 156 Briggs Hall (530-752-0202).

**Graduate Study.** The Graduate Group in Genetics offers study and research leading to the M.S. and Ph.D. degrees in Genetics.

### The Microbiology Major Program

(Section of Microbiology)

Microbiology is the branch of biology that deals with bacteria, yeasts and other fungi, algae, protozoa, and viruses. These microorganisms are ubiquitous in nature and play a crucial role in areas such as agriculture, biotechnology, ecology, medicine, and veterinary science. The field of microbiology contributes to areas of fundamental inquiry such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis, and physiology. The ease and power of simultaneous genetic and biochemical analysis of microbes led to the emergence of the new disciplines of molecular biology and molecular genetics, and spawned the new industry of biotechnology.

**The Program.** Both undergraduate major programs provide a balance of studies in microbiology, with appropriate courses in mathematics and physical sciences. The A.B. degree program emphasizes the biology of bacteria, while the B.S. degree program includes more biochemistry and related course work. Either program, with judicious course selection, is appropriate for students contemplating a career in medicine or various allied health professions including medical technology, or teaching. The B.S. program is especially well suited for students who want a professional career in microbiology, or who wish to pursue graduate education in a biological science discipline. The choice of a major program and its suitability for particular career options should be discussed with a major adviser.

**Career Alternatives.** A bachelor's degree in microbiology is excellent preparation for a career in biotechnology, pharmacology, agriculture, and the food industry. It also provides a strong background for students wishing to continue on to professional studies in medicine and the other health sciences.

### A.B. Major Requirements:

**Master Adviser.** M.L. Wheelis (Section of Microbiology), 2202 Storer Hall.

**Honors and Honors Program.** M.L. Wheelis.

**Teaching Credential Subject Representative.** M.L. Wheelis. See also the Teacher Education Program.

**Graduate Study.** The Graduate Group in Microbiology offers programs of study and research leading to the M.S. and Ph.D. degrees in microbiology.

For detailed information regarding graduate study in microbiology, address the Graduate Group Chairperson, Section of Microbiology.

**Related Courses.** The offerings of the Section of Microbiology are augmented by courses and faculty of Evolution and Ecology; Food Science and Technology; Land, Air, and Water Resources; Medical Microbiology; Medicine and Epidemiology; Molecular and Cellular Biology; Pathology, Microbiology and Immunology; Plant Biology; Plant Pathology; Viticulture and Enology.

Faculty of the Section of Microbiology also teach or participate in the following courses: Biological Sciences 1A, 10, and 19.

### The Neurobiology, Physiology, and Behavior Major Program

(Section of Neurobiology, Physiology, and Behavior)

Neurobiology, Physiology, and Behavior is a major that emphasizes the understanding of vital functions common to all animals. All animals perform certain basic functions—they grow, reproduce, move, respond to stimuli, interact with their environment, maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and highly integrated through the actions of the nervous and endocrine systems to determine behavior and the interaction between organisms and their physical and social environments. Students in this major study functional mechanisms; the control, regulation, and integration of these mechanisms; and the behavior that relates to those mechanisms. They do so at the level of the cell, the organ system, and the organism.

**The Program.** In the freshman and sophomore years, students majoring in Neurobiology, Physiology, and Behavior build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics. As juniors or seniors, students can enroll in a variety of Neurobiology, Physiology and Behavior courses and related upper division courses. Students

can participate in a number of advanced laboratory courses or may design an individual, independent project guided by a member of the faculty.

**Career Alternatives.** Completion of the Neurobiology, Physiology, and Behavior major provides the foundations for a challenging career in physiology and/or neurobiology and also serves as a basis for further training in schools of human and veterinary medicine, medical technology, pharmacy, dentistry, optometry, and other health sciences. Students interested in high school teaching, research, and advanced teaching may use the program as preparation for continued study leading to advanced degrees.

**B.S. Major Requirements:**

|                                                                                                                                                                                     |                |

**Master Adviser.** J. Goldberg (*Section of Neurobiology, Physiology, and Behavior*), 191 Briggs Hall.

**Advising Center.** 196 Briggs Hall (530-752-9696)

**Graduate Study.** The Graduate Group in Physiology offers programs of study and research leading to the M.S. and Ph.D. degrees. Information on graduate study may be obtained by writing the Graduate Adviser, Graduate Group Complex. See also the graduate course offerings in Animal Behavior Graduate Group, Neuroscience Graduate Group, and Physiology Graduate Group. See also the Graduate Studies chapter of this catalog.

**The Plant Biology Major Program**

Plant biology is the study of plants as organisms. It includes the disciplines of cellular and molecular plant biology and the traditional areas of botany, such as anatomy, morphology, systematics, physiology, mycology, phycology, ecology, and evolution.

**The Program.** The Plant Biology major consists of core courses in applied plant biology, plant anatomy, plant physiology, and plant ecology, as well as biochemistry, cell biology, and genetics. In addition, students complete a set of courses in one of the following areas: (1) general botany; (2) applied plant biology; (3) plant evolution and ecology; (4) plant genetics and breeding; and (5) plant physiology, development, and molecular biology. The major provides breadth in diverse areas of plant biology and depth in one of several areas of specialization. Independent research opportunities in plant biology are available. Consult with an adviser.

**Career Alternatives.** A Plant Biology degree is an excellent credential for a wide range of career options, including domestic and international opportunities in business, research and teaching in both governmental and private sectors. Plant biologists can work in the field, in the forest, in the laboratory, in botanical gardens or nurseries, in food or seed companies, or in pharmaceutical, energy or chemical industries, and pursue rewarding careers in the areas of biotechnology, environmental protection, or agribusiness. The program is also an excellent background for students wishing to enter graduate or other professional schools, including medicine, law or journalism.

**A.B. Major Requirements:**

|                                                                                           |              |
|-------------------------------------------------------------------------------------------|--------------|
|                                                                                           | UNITS        |
| <b>Preparatory Subject Matter</b> .....                                                   | <b>35</b>    |
| Biological Sciences 1A-1B-1C .....                                                        | 15           |
| Chemistry 2A-2B, 8A-8B .....                                                              | 16           |
| Agricultural Systems and Environment 120 or Statistics 13 or 100 or 102 .....             | 4            |
| <b>Depth Subject Matter</b> .....                                                         | <b>41-42</b> |
| Biological Sciences 101 .....                                                             | 4            |
| Plant Biology 102 or 108 .....                                                            | 5            |
| Evolution and Ecology 140 or Plant Biology 116 .....                                      | 4            |
| Plant Biology 105, 111, 112, 117 .....                                                    | 15           |
| Additional upper division units in Plant Biology or related natural science courses ..... | 13-14        |
| <b>Total Units for the Major</b> .....                                                    | <b>76-77</b> |

**Recommended**

Chemistry 2C; Evolution and Ecology 100; Plant Biology 118, 119.

For students with interests in specialized areas of plant biology (e.g., agricultural botany, ecology, systematics and evolution, morphology, plant physiology, etc.), certain substitutions, including courses in other sections or departments, may be allowed on *prior* consultation with a Plant Biology major adviser.

**B.S. Major Requirements:**

|                                                                                                                                                                                                                                                                              |              |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
|                                                                                                                                                                                                                                                                              | UNITS        |
| <b>Preparatory Subject Matter</b> .....                                                                                                                                                                                                                                      | <b>60-61</b> |
| Biological Sciences 1A-1B-1C .....                                                                                                                                                                                                                                           | 15           |
| Chemistry 2A-2B-2C .....                                                                                                                                                                                                                                                     | 15           |
| Chemistry 8A-8B .....                                                                                                                                                                                                                                                        | 6            |

| Research experience through internships or special studies is recommended.                                                                                                                                                                                                   |              |
| <b>General Plant Biology option</b>                                                                                                                                                                                                                                          |              |
| Evolution and Ecology 100, Plant Biology 112 .....                                                                                                                                                                                                                           | 7            |
| Plant Biology 117 or 142 .....                                                                                                                                                                                                                                               | 4            |
| One course from the Applied Plant Biology course list (Plant Biology 175 recommended) .....                                                                                                                                                                                  | 3-5          |
| One course from the Evolution and Diversity course list .....                                                                                                                                                                                                                | 3-5          |
| Additional upper division course work from any of the four course lists, chosen in consultation with an adviser, to achieve a total of 24 or more units. At least one course chosen from the option course lists must include a formal laboratory or fieldwork section ..... | 3-7          |
| <b>Applied Plant Biology option</b>                                                                                                                                                                                                                                          |              |
| Plant Biology 112 .....                                                                                                                                                                                                                                                      | 3            |
| Plant Biology 142 or 143 .....                                                                                                                                                                                                                                               | 3-4          |
| Plant Biology 160, 175 .....                                                                                                                                                                                                                                                 | 8            |

Molecular and Cellular Biology 120L; Plant Biology 111L, 153, 158, 172L, 189, or Plant Pathology 120 .....

3-6

Additional upper division course work from the Applied Plant Biology course list to achieve a total of 24 or more units .....

3-7

**Plant Evolution and Ecology option**

Evolution and Ecology 100 .....

4

Plant Biology 117 or 142 .....

4

One course from the Applied Plant Biology course list (Plant Biology 175 recommended) .....

3-5

Additional upper division course work from the Ecology and/or Evolution and Diversity course list to achieve a total of 24 or more units. At least one course chosen must include a formal laboratory or fieldwork section .....

11-13

**Plant Genetics and Breeding option**

Plant Biology 108 or 143 .....

3-5

Plant Biology 154 .....

4

Plant Biology 112 or 113 or 160 .....

3

Plant Biology 161A or 161B .....

4

Addition course work from the Plant Genetics and Breeding course list to achieve a total of 24 or more units .....

8-10

**Plant Physiology, Development and Molecular Biology option**

Plant Biology 112 .....

3

Molecular and Cellular Biology 120L, 170L; Plant Biology 111L or 153 .....

3-6

One course from the Applied Plant Biology course list (Plant Biology 175 recommended) .....

3-5

One course from the Ecology course list (Plant Biology 117 recommended) .....

3-4

One course from the Evolution and Diversity course list .....

3-5

Additional upper division course work from the Plant Physiology, Development, and Molecular Biology course list to achieve a total of 24 or more units .....

1-9

**Total Units for the Major** .....

**105-106**

**Course Lists**

**Applied Plant Biology**

Agricultural Systems and Environment 100, 107, 110, 110L, 111, 112, 113, 118, 150, 170A, 170B, 195; Atmospheric Science 133; Entomology 100, 100L, 110, 119, 119L, 135; Environmental Horticulture 102, 105, 107, 120, 125, 130, 133; Environmental Toxicology 101; Hydrologic Science 124; International Agricultural Development 101; Nematology 100, 110; Plant Biology 121, 142, 143, 146, 151, 152, 153, 154, 157, 158, 160, 171, 172, 172L, 173, 174, 175, 176, 177, 178, 188, 196; Plant Pathology 120, 125, Pomology 103; Range Science 100, 105, 133, 134; Soil Science 100, 105, 109, 111; Viticulture and Enology 101A, 101B, 101C, 110, 115, 116, 118.

**Ecology**

Agricultural Systems and Environment 112; Environmental Science and Policy 121, 123, 124, 128, 128L, 150C, 151, 151L, 155, 155L; Evolution and Ecology 121, 138; Hydrologic Science 122, 122L, 124; Plant Biology 117, 121, 142, 146; Range Science 133, 134.

**Evolution and Diversity**

Evolution and Ecology 100, 102, 140, 144, 149; Plant Biology 102, 108, 116, 118, 143, 148.

**Plant Genetics and Breeding**

Agricultural Systems and Environment 118, 150; Entomology 110; Evolution and Ecology 100, 144; Molecular and Cellular Biology 161, 164; Plant Biology 116, 117, 142, 151, 153, 157, 175; Plant Pathology 120, 125.

**Plant Physiology, Development, and Molecular Biology**

Molecular and Cellular Biology 126; Plant Biology 113, 125, 153, 157, 158, 160; Plant Pathology 130.

**Master Adviser.** A. Stemler, Plant Biology Section Office, 2220 Life Sciences Addition.

**Minor Program Requirements:**

UNITS

**Plant Biology** .....23

Biological Sciences 1C (or equivalent introductory plant biology course) .....5

Upper division units, including at least one course from each of the following four groups .....18

*(a) Anatomy and morphology:*

Evolution and Ecology 140, Plant Biology 105, 116, 118.

*(b) Physiology and development:*

Plant Biology 111, 112, 125, Plant Pathology 130.

*(c) Evolution and ecology:*

Evolution and Ecology 100, Plant Biology 102, 117, 143.

*(d) Applied plant biology:*

Agronomy 100, Plant Biology 154, 160, 171, 172, 175.

**Minor Adviser.** Same as for major above.

**Honors and Honors Programs.** Students on the honors list may elect to substitute a maximum of 5 units of 194H for 5 upper division units of the regular major; however, recommendations for high honors and highest honors at graduation are not dependent on the completion of 194H. Refer to the Academic Information chapter and the appropriate College section for Dean's Honors List information.

**Teaching Credential Subject Representative.** R.M. Thornton (*Section of Plant Biology*), 278 Robbins Hall. See also the Teacher Education Program.

**Graduate Study.** Consult the Plant Biology Graduate Group listing.

**Divisionwide Programs and Courses****Bodega Marine Laboratory Program**

A full quarter of undergraduate course work in marine biology is available each spring quarter at the Bodega Marine Laboratory, located in Bodega Bay, California. Course offerings include lecture and laboratory instruction in the developmental biology of marine invertebrates, physiological adaptation of marine organisms, and population biology and ecology; a weekly colloquium; and an intensive individual research experience under the direction of laboratory faculty (Biological Sciences courses 120, 120P, 122, 122P, 123; Neurobiology, Physiology and Behavior 141, 141P).

The program is residential, with students housed on the laboratory grounds. Participants are assessed a room and board fee in addition to standard campus registration fees. An application is required. Obtain forms from the Division of Biological Sciences. Applications are due before RSVP Pass 1 registration begins for spring quarter. Additional information on the Bodega Marine Laboratory Program is available from the Undergraduate Programs Office, 202 Life Sciences Addition, or directly from Bodega Marine Laboratory, 707-875-2211, P.O. Box 247, Bodega Bay, CA 94923.

**Courses in Biological Sciences (BIS)****Lower Division Courses**

**1A. Introductory Biology** (5) I, II, III. The Staff  
Lecture—4 hours; discussion—1 hour. Prerequisite: Chemistry 2B (may be taken concurrently). Introduction to biological molecules, bioenergetics, cell structure and function, elements of molecular biology and genetics, and viruses. Interdisciplinary course for majors in the biological sciences.

**1B. Introductory Biology** (5) I. Keen; II.

The Staff; III. Keen, Stamps

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 1A. Topics covered include

transmission genetics, systematics, evolution, survey of the animal kingdom, comparative anatomy, physiology, and adaptation in animals.

**1C. Introductory Biology** (5) I. Thornton; II.

Stemler, Shackel/Labavitch; III. Thornton,

Sinha/Potter

Lecture—4 hours; laboratory—3 hours. Prerequisite: course 1A. Introduction to structure and function of plant tissues and organs; adaptive development and evolution of plants; survey of cyanobacteria, algae, fungi, and plants; principles of population and community ecology; and ecosystem analysis. GE credit: SciEng, Wrt.

**10. General Biology** (4) I. Goldberg; II. Marr; III.

Falk

Lecture—3 hours; discussion—1 hour. Consideration of the main features and principles of biology, with emphasis on biological processes and special reference to evolution, heredity, and the bearing of biology on human life. Designed for students not specializing in biology. Not open for credit to those who have had course 1A. GE credit: SciEng, Wrt.

**11A-11B. Issues in the Life Sciences** (2-2) I.

Holland, Villarejo; II. Goldberg

Lecture—1 hour; discussion—1 hour. Prerequisite: enrollment limited to BUSP students; consent of instructor required. Designed to broaden the students' understanding of biology by demonstrating the range of subjects and approaches included in the field of biology. Both basic biological research topics and applied biology will be studied.

**15. Biology of Aging** (3) I. McDonald

Lecture—3 hours. Biological basis of the aging process. Topics include the normal aging process, developmental influence on the rate of aging, diseases of the aged, theories of aging, and mechanisms for modifying aging. Designed for students with limited biology backgrounds.

**\*19. Biology of Cancer** (3) III. The Staff

Lecture—3 hours. Prerequisite: course 1A or 10, or Molecular and Cellular Biology 10 or Neurobiology, Physiology and Behavior 10. Interdisciplinary course offers an introduction to the biological, clinical and psycho-social aspects of cancer, and emphasizes basic understanding of biological principles and facts about the disease process. Designed for students with little scientific background. Offered in alternate years.

**92. Internship in Biological Sciences** (1-12) I, II, III. The Staff (Associate Dean in charge)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

**98. Directed Group Study** (1-5) I, II, III. The Staff (Associate Dean in charge)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff (Associate Dean in charge)

Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

**Upper Division Courses**

**101. Genes and Gene Expression** (4) I. Gottlieb (Evolution and Ecology), O'Neill (Plant Biology), Quiros (Vegetable Crops); II. Bowman (Plant Biology), Heyer (Microbiology), Rose; III. Dvorak (Agronomy and Range Science), Rodriguez and staff

Lecture—4 hours. Prerequisite: course 1B; Chemistry 8B or 118B or 128B (may be taken concurrently). Nucleic acid structure and function; gene expression and its regulation; replication; transcription and translation; transmission genetics; molecular evolution.

**102. Structure and Function of Biomolecules**

(3) I. Hilt, Scholey, Sprechman; II. Gasser, Hilt, Hjelmland; III. Hilt, Sprechman, Theg (Plant Biology)

Lecture—3 hours. Prerequisite: Chemistry 8B or 118B or 128B. Structure and function of macromolecules with emphasis on proteins; enzyme kinetics; supramolecular assemblies; membranes; cytoskeleton; cell motility and cell division.

**103. Bioenergetics and Metabolism** (3) I. Doi, Mitchell; II. I.H. Segel, Callis; III. Carlson, L.D. Segel

Lecture—3 hours. Prerequisite: course 102. Fundamentals of metabolism including glycolysis and oxidative pathways; photosynthesis; biosynthesis of amino acids, nucleic acids and proteins.

**104. Regulation of Cell Function** (3) I. Crowe,

Nuccitelli; II. Erickson, Myles, Wilson

(Neurobiology, Physiology and Behavior);

III. Etzler, McNally

Lecture—3 hours. Prerequisite: course 101 and 102; course 103 recommended. Membrane receptors and signal transduction; cell trafficking; cell cycle, cell growth and division; extracellular matrix and cell-cell junctions; cell development; immune system.

**\*120. Developmental Biology of Marine**

**Invertebrates** (4) III. The Staff (Molecular and Cellular Biology)

Lecture—30 hours total; laboratory—30 hours total. Prerequisite: Molecular and Cellular Biology 150-150L, Biological Sciences 102 and 103; course 123 concurrently. Phylogenetic patterns of reproduction and development among the marine invertebrates. Emphasis on both modern and classical approaches to understanding gametogenesis, gamete interaction and fertilization, cleavage, cell differentiation, morphogenesis, and larval development and metamorphosis. Course offered at Bodega Marine Laboratory. (See above description for Bodega Marine Laboratory Program.)

**\*120P. Developmental Biology of Marine**

**Invertebrates/Advanced Laboratory Topics** (6)

III. The Staff (Molecular and Cellular Biology)

Laboratory—150 hours total; discussion—10 hours total. Prerequisite: course 120 concurrently. Students pick a research topic for intense study. Research will be related to a topic covered in course 120 and will be conducted at the Bodega Marine Laboratory with close supervision of resident faculty. (See above description for Bodega Marine Laboratory Program.)

**122. Population Biology and Ecology** (4) III.

Strong (Evolution and Ecology)

Lecture—30 hours total; laboratory—30 hours total. Prerequisite: lower division core in biological sciences; course 123 concurrently. Population and community processes. Emphasis on biological and physical processes affecting plant and animal populations in the array of habitats at the ecological reserve. Modeling as a basis for designing experiments. Course offered at Bodega Marine Laboratory. (See above description for Bodega Marine Laboratory Program.)

**122P. Population Biology and Ecology/Advanced Laboratory Topics** (6) III.

Strong (Evolution and Ecology)

Laboratory—150 hours total; discussion—10 hours total. Prerequisite: course 122 concurrently. Students pick a research topic for intense study. Research will be related to a topic covered in course 122 and will be conducted at the Bodega Marine Laboratory with close supervision of resident faculty. (See above description for Bodega Marine Laboratory Program.)

**123. Undergraduate Colloquium in Marine**

**Science** (1) III. The Staff

Seminar—1 hour. Prerequisite: enrolled student at the Bodega Marine Laboratory. Series of weekly seminars by recognized authorities in various disciplines of marine science from within and outside the UC system. Includes informal discussion with speaker. Course will be held at Bodega Marine Laboratory. (P/NP grading only.) (See above description for Bodega Marine Laboratory Program.)

**192. Internship in Biological Sciences** (1-12) I,

II, III. The Staff (Associate Dean in charge)

Internship—3-36 hours. Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

**194H. Research Honors** (2) I, II, III. The Staff

(Associate Dean in charge)

Independent study—6 hours. Prerequisite: senior standing. Students majoring in Biological Sciences who have completed two quarters (3-5 units per quarter) of 199 and who qualify for the honors program as

defined by the current catalog. Opportunity for Biological Sciences majors to pursue intensive research culminating in the writing of a senior thesis with the guidance of faculty advisers. (P/NP grading only.)

**197T. Tutoring in Biological Sciences** (1-3) I, II, III. The Staff (Associate Dean in charge)  
Prerequisite: upper division standing; appropriate background in biological sciences. Assisting in courses in Biological Sciences under the direction of the faculty. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III. The Staff (Associate Dean in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study in Biological Sciences** (1-5) I, II, III. The Staff (Associate Dean in charge)  
Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

### Graduate Courses

**298. Group Study** (1-5) I, II, III. The Staff (Associate Dean in charge)  
Prerequisite: consent of instructor. Division of Biological Sciences staff members may offer group study courses under this number.

### Professional Course

**310. Effective Teaching of College Biology** (2) II. Thornton (Plant Biology)  
Informal lecture/discussion—2 hours. Teaching function of an academic career; objectives, nature, and methods of effective teaching; design of curricula and courses; lecturing and leading discussions; examinations and grading; evaluation; counseling; innovation. (S/U grading only.)

Peter L. Chesson, Ph.D., Associate Professor  
James A. Doyle, Ph.D., Professor  
John H. Gillespie, Ph.D., Professor  
Leslie D. Gottlieb, Ph.D., Professor  
Richard K. Grosberg, Ph.D., Professor  
Charles H. Langley, Ph.D., Professor  
Sergey V. Nuzhdin, Ph.D., Assistant Professor  
Robert W. Pearcy, Ph.D., Professor  
Marcel Rejmanek, Ph.D., Professor  
Michael J. Sanderson, Ph.D., Associate Professor  
Thomas W. Schoener, Ph.D., Professor  
H. Bradley Shaffer, Ph.D., Professor  
Arthur M. Shapiro, Ph.D., Professor, *Academic Senate Distinguished Teaching Award*  
Judy A. Stamps, Ph.D., Professor  
Maureen L. Stanton, Ph.D., Professor  
Sharon Y. Strauss, Ph.D., Assistant Professor  
Donald R. Strong, Ph.D., Professor  
Catherine A. Toft, Ph.D., Professor  
Michael Turelli, Ph.D., Professor

#### Emeriti Faculty

Daniel I. Axelrod, Ph.D., Professor Emeritus  
Milton Hildebrand, Ph.D., Professor Emeritus,  
*Academic Senate Distinguished Teaching Award*

Everett W. Jameson, Ph.D., Professor Emeritus  
Jack Major, Ph.D., Professor Emeritus  
Peter R. Marler, Ph.D., Professor Emeritus  
Milton A. Miller, Ph.D., Professor Emeritus  
Timothy Prout, Ph.D., Professor Emeritus  
Robert L. Rudd, Ph.D., Professor Emeritus  
George W. Salt, Ph.D., Professor Emeritus  
G. Ledyard Stebbins, Ph.D., Professor Emeritus  
Kenneth E. F. Watt, Ph.D., LL.D., Professor Emeritus  
Grady L. Webster, Ph.D., Professor Emeritus

#### Affiliated Faculty

Susan L. Keen, Ph.D., Lecturer

## Courses in Evolution and Ecology (EVE)

### Lower Division Courses

**92. Internship** (1-12) I, II, III. The Staff (Chairperson in charge)  
Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the Section of Evolution and Ecology. Internships supervised by a member of the faculty. (P/NP grading only.)

**99. Special Study for Lower Division Students** (1-5) I, II, III. The Staff (Chairperson in charge) (P/NP grading only.)

### Upper Division Courses

**100. Introduction to Evolution** (4) I. Langley; II. Nuzhdin; III. Stanton  
Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C, 101; Mathematics 16A, 16B, 16C or the equivalent; Statistics 13 or 100 (Statistics 100 recommended). A general survey of the origins of biological diversity and evolutionary mechanisms.

**101. Introduction to Ecology** (4) I. Strauss; II. Toft; III. The Staff  
Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C; Mathematics 16A, 16B, 16C or the equivalent. A general survey of the principles of ecology.

**102. Population and Quantitative Genetics** (4) II. Gillespie  
Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 101, and Statistics 100 or 102, and course 100. Evolution as caused by random mating, genetic drift, natural selection, inbreeding, migration, and mutation in theory and actuality. The resemblance between relatives and consequences of selection for quantitative traits. Application of these ideas to topics such as the evolution of sex.

**103. Phylogeny and Macroevolution** (3) II. Sanderson  
Lecture—3 hours. Prerequisite: course 100. Patterns and processes of evolution above the species level. Homology, homoplasy, and character evolution. Adaptive radiation; modes of rates of diversification. Evolution of complexity, and macroevolution of the genome. Principles of phylogeny reconstruction and their application to macroevolutionary studies.

**\*105. Phylogenetic Analysis of Vertebrate Structure** (4) I. The Staff  
Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B. The structure of the classes and subclasses of vertebrates is described and interpreted in terms of phylogeny.

**108. Systematics and Evolution of Angiosperms** (5) III. Doyle  
Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B and 1C. Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as Plant Biology 108.) GE credit: SciEng.

**\*112. Invertebrate Zoology** (4) II. The Staff  
Lecture—4 hours. Prerequisite: Biological Sciences 1A, 1B; course 112L (concurrently); courses in systematics, ecology, and evolution recommended. Sur-

vey of the invertebrate phyla emphasizing aquatic forms and focusing on morphology, development, natural history, and phylogenetic relationships.

**\*112L. Laboratory for Invertebrate Zoology** (3) II. The Staff  
Discussion—1 hour; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B; course 112 concurrently. Field and laboratory experience with representative members of the invertebrate phyla discussed in course 112. Emphasis on comparative morphology, natural history, ecology, and behavior of living invertebrates.

**117. Plant Ecology** (4) I. Pearcy  
Lecture—3 hours; three to five field trips. Prerequisite: Biological Sciences 1A, 1B, 1C; Plant Biology 112; Plant Biology 102 or 108 strongly recommended. The study of interactions between plant populations or vegetation types and their environment. Special emphasis on California. Students taking course 117 cannot receive credit for Plant Biology 101. (Same course as Plant Biology 117.)

**121. Survey of Plant Communities of California** (4) III. Barbour  
Lecture—2 hours; fieldwork—1 hour; term paper. Prerequisite: Biological Sciences 1C recommended; consent of instructor required. Structure of selected plant communities and the relationship of their component species to the environment. Especially recommended for non-majors. GE credit: SciEng, Wrt.

**134. Herpetology** (3) III. Shaffer  
Lecture—2 hours; term paper. Prerequisite: Biological Sciences 1A, 1B; Evolution and Ecology 100 recommended. The world-wide diversity of amphibians and reptiles with emphasis on behavior, ecology, functional morphology, and evolutionary history. Offered in alternate years.

**134L. Herpetology Laboratory** (2) III. Shaffer  
Laboratory—6 hours; two weekend field trips. Prerequisite: Biological Sciences 1A, 1B; course 134 concurrently. Diagnostic characteristics and functional attributes of amphibians and reptiles, emphasizing ecological, biogeographic and phylogenetic patterns. Field trips will acquaint students with techniques for identifying and studying amphibians and reptiles under natural conditions. Offered in alternate years.

**\*137. Ornithology** (2) II. The Staff  
Lecture—2 hours. Prerequisite: course 101 or the equivalent course in ecology. Systematics, distribution, physiology, and population dynamics of birds. Students who have had Wildlife, Fish and Conservation Biology 111 may not receive credit for this course.

**\*137L. Ornithology Laboratory** (3) II. The Staff  
Laboratory—6 hours. Prerequisite: course 101 or 137 (may be taken concurrently) and consent of instructor. Individual study and field trips strongly emphasized. Systematics, behavior, population dynamics, and reproduction of California birds.

**138. Ecology of Tropical Latitudes** (3) III. Shapiro  
Lecture—3 hours. Prerequisite: any one of the following: Biological Sciences 1A, 1B, or 10, Plant Biology 10, Geography 2 or 2G, or Wildlife, Fish and Conservation Biology 10. Biological, physical, and human-related aspects of the ecology of low latitudes. Distribution, numbers, and relationships of tropical organisms. Problems of development and conservation in the context of ecological and evolutionary theory. Offered in alternate years. GE credit: SciEng, Wrt.

**140. Paleobotany** (4) I. Doyle  
Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Introduction to plant fossil record, beginning with invasion of land in the Silurian, emphasizing origin and evolution of major groups and adaptations and changing composition and distribution of floras in relation to plate tectonics and climatic change.

**141. Principles of Systematics** (3) II. Shapiro  
Lecture—2 hours; biweekly research projects. Prerequisite: Biological Sciences 1B or 1C; course 100 recommended. Historical background, philosophical rationale, contemporary approaches, and working rules of biosystematics, including International Code of Zoological Nomenclature. Offered in alternate years.

**\*147. Biogeography** (4) I. Shapiro

Lecture—3 hours; term paper. Prerequisite: Biological Sciences 1A, 1B. Movements of terrestrial organisms. The role of geologic, climatic, and biologic changes in the geographic distribution of organisms. Offered in alternate years.

**149. Evolution of Ecological Systems** (4) I.

Shapiro

Lecture—3 hours; term paper. Prerequisite: course 101 or Environmental Studies 100 (or the equivalent), and course 100 (or the equivalent). Evolution as an organizing force in natural communities. Coadaptation in trophic and competitive relationships. Ecology of polymorphisms, clines, and speciation. Offered in alternate years.

**\*170. Comparative Biomechanics** (3) I. The Staff

Lecture—3 hours. Prerequisite: Physics 7A, 7B, Mathematics 16A, 16B, 16C, Biological Sciences 1B. Biomechanics and functional morphology of vertebrates and invertebrates. Emphasis on physical laws that provide design principles for a wide range of organisms. Principles from fluid and solid mechanics, acoustics and vibration. Locomotion, skeletal morphology, biological materials, and waves. Offered in alternate years.

**\*170L. Comparative Biomechanics Laboratory**

(3) I. The Staff

Laboratory—6 hours; term paper. Prerequisite: Physics 7A, 7B, Mathematics 16A, 16B, 16C, Biological Sciences 1B; course 170 recommended to be taken concurrently. Experimental techniques for measuring physical quantities relevant to organismal designs. Demonstration of principles in fluid, solid, and acoustical mechanics. Emphasis on use of electronic transducers and computerized data collection. Includes a student-designed research project. Offered in alternate years.

**189. Introduction to Biological Research** (1) I,

II, III. The Staff (Chairperson in charge)

Discussion—1 hour. Prerequisite: upper division standing in Evolution and Ecology or related biological science; consent of instructor. Introduction to research methods in biology. Presentation and discussion of research by faculty, graduate, and undergraduate students. May be repeated for credit up to a total of 3 units. (P/NP grading only.)

**190. Undergraduate Seminar** (2) I. Shapiro; II,

III. The Staff

Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.)

**192. Internship** (1-12) I, II, III. The Staff

(Chairperson in charge)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the Section of Evolution and Ecology. Internships supervised by a member of the faculty. (P/NP grading only.)

**194HA-194HB-194HC. Research Honors** (2-2-2)

I, II, III. The Staff

Laboratory—6 hours. Prerequisite: Students who have completed 135 units and qualify for the honors program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty adviser. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. (Deferred grading only, pending completion of sequence.)

**197T. Tutoring** (1-5) I, II, III. The Staff

Tutorial—1-5 hours. Prerequisite: upper division standing. Experience in teaching under guidance of the staff. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III.

The Staff (Chairperson in charge)

(P/NP grading only.)

**199. Special Study for Advanced****Undergraduates** (1-5) I, II, III. The Staff

(Chairperson in charge)

(P/NP grading only.)

**Graduate Courses****221. Behavioral Ecology** (3) I. The Staff

Lecture—3 hours. Prerequisite: course 101 or Neurobiology, Physiology and Behavior 102 or the equivalent, and graduate standing. Introduction to the main issues treated in modern behavioral ecology, the main experimental techniques used to treat these issues and the major theoretical methods used to develop predictive models. Offered in alternate years.

**240. Paleobotany and Angiosperm Evolution**

(4) II. Doyle

Lecture—3 hours; laboratory—3 hours. Prerequisite: Plant Biology 108, 116, or course 140. Critical analysis of the plant fossil record as a source of evidence on origin, evolution, and phylogeny of the angiosperms, Cretaceous and Tertiary climates, geographic history of modern taxa, and origin of modern vegetation types. Offered in alternate years.

**\*243. Palynology** (4) I. Doyle

Lecture—2 hours; laboratory—6 hours. Prerequisite: Plant Biology 108, 116, or course 140. Morphology of spores and pollen grains and their use in stratigraphy, plant systematics and evolution, and paleoecology. Techniques for study of modern spores and pollen and extraction and identification of fossil palynomorphs from sediments of Paleozoic to Quaternary age. Offered in alternate years.

**287. Seminar in Animal Behavior** (2) I. Stamps

Seminar—2 hours. Prerequisite: consent of instructor. Reports and discussion on the principles and recent developments in invertebrate and vertebrate animal behavior.

**290. Current Topics** (1) I, II, III. The Staff

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by guest lecturers describing their research activities. May be repeated for credit. (S/U grading only.)

**290C. Research Conference** (1) I, II, III. The Staff

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentation and discussion of faculty and graduate student research in biology. May be repeated for credit. (S/U grading only.)

**\*294. Seminar in Animal Ecology** (3) III.

The Staff

Seminar—3 hours. Prerequisite: course 101 and graduate standing. Readings and discussions of advanced topics in the population and community ecology of animals.

**298. Group Study** (1-5) I, II, III. The Staff

(Chairperson in charge)

(S/U grading only.)

**299. Research** (1-12) I, II, III. The Staff

(Chairperson in charge)

(S/U grading only.)

**Professional Course****390. Methods of Teaching** (2) I, II, III. The Staff

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching. Includes analyses of texts and supporting material, discussion of teaching techniques and preparing and conducting of laboratory and discussion sections. May be repeated for credit for a maximum of 8 units. (S/U grading only.)

David Pratt, Ph.D., Professor Emeritus

## Courses in Microbiology (MIC)

**Lower Division Courses****10. Natural History of Infectious Diseases** (4) II.

Manning

Lecture—3 hours; discussion—1 hour. Topics in the natural history of infectious diseases principally affecting humans. Introduction to infectious microbial agents, ecology, epidemiology, and induction of disease. Focus on diseases of a contemporary nature. Designed for students not majoring in the biological sciences. GE credit: SciEng, Wrt.

**\*20. Biology of Microorganisms** (4) II. The Staff

Lecture—3 hours; term paper. Prerequisite: Biological Sciences 10. Survey of the diversity of microorganisms (viruses, bacteria, protists), their metabolism, genetics, and habitats. Emphasis on importance to humans—role of microorganisms in global element cycles, in food production, and in disease. GE credit: SciEng, Wrt.

**98. Directed Group Study** (1-5) I, II, III. The Staff

(Chairperson in charge)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

**Upper Division Courses****102. General Bacteriology** (4) I, II, III. The Staff

Lecture—4 hours. Prerequisite: Biological Sciences 1A and Chemistry 8B or Chemistry 118 (may be taken concurrently). Survey of the biology of bacteria and viruses, including bacterial structure, metabolism, physiology, genetics, and evolution; viral structure and replication; the role of bacteria in global element cycles; and the role of microbes in infectious disease.

**102L. General Bacteriology Laboratory** (2) I, II,

III. The Staff

Laboratory—6 hours. Prerequisite: course 102 (may be taken concurrently) and consent of instructor. Introduction to principles and laboratory methods employed in working with microorganisms. For students planning to continue study of microbiology, or use microorganisms as tools for study of genetics and biochemistry.

**105. Bacterial Diversity** (5) II. Nelson

Lecture—3 hours; laboratory—6 hours. Prerequisite: courses 102, 102L, Biological Sciences 102 and consent of instructor; Biological Sciences 103 recommended. Survey of the major groups of bacteria emphasizing diversity of energy metabolism, morphology and natural history. Includes methods for determination of evolutionary relationships among groups. Isolation and characterization of bacterial strains from various habitats.

**\*110. Bacteriology of Insects** (3) II. Baumann

Lecture—3 hours. Prerequisite: course 102; Biological Sciences 102. Physiological basis of pathogenic and symbiotic associations between prokaryotic and eukaryotic organisms. Taxonomy, physiology, pathogenesis, and molecular biology of insect pathogens. Insect immunity. Nutritional associations between microorganisms

and insects. Pertinent entomological background information will be included.

**120. Microbial Ecology** (3) III. Meeks

Lecture—3 hours. Prerequisite: course 105, Biological Sciences 102. Interactions between non-pathogenic microorganisms and their environment, emphasizing physiological and metabolic characteristics of various groups and their adaptation to and modification of specific habitats.

**120L. Microbial Ecology Laboratory** (2) III.

Meeks

Laboratory—6 hours; one optional overnight weekend field trip. Prerequisite: course 120 (may be taken concurrently); consent of instructor. Study of prokaryotic microorganisms from certain habitats. One-half of laboratory effort will consist of organized experiments on ecologically important microbial activities. For remaining one-half, research projects will be done on student selected specific habitats of microorganisms. Limited enrollment.

**140. Bacterial Physiology** (3) I. Singer

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 103 (may be taken concurrently); course 102 recommended (may be taken concurrently). Fundamentals of bacterial growth and bacterial responses to environmental stresses. Topics will include carbon and nitrogen regulation, growth rate control, post-exponential growth, and motility and chemotaxis. Not open for credit to students who have completed course 130A.

**150. Bacterial Genetics** (3) II. Igo

Lecture—3 hours. Prerequisite: Biological Sciences 101 and 102; course 102 (may be taken concurrently) recommended. Fundamentals of bacterial and phage genetics. Topics will include generating mutations, phage genetics, classical bacterial genetics, molecular techniques to generate mutations and physical mapping techniques. Not open for credit to students who have completed course 130A.

**155L. Bacteriology Physiology Laboratory**

(3) III. Artz

Laboratory—9 hours. Prerequisite: course 140 or 150; course 102L; consent of instructor. Physiology and genetics of bacteria. Isolation and characterization of mutant strains. Mapping of mutations by conjugation and transduction studies of control of enzyme synthesis by induction, repression, and catabolite repression. Former course 130L. Not open for credit to students who have taken course 130L.

**\*160. Bacterial Regulatory Mechanisms**

(3) III. Kowalczykowski, Artz

Lecture—3 hours. Prerequisite: course 140 or 150 recommended. Fundamentals of bacterial regulatory mechanisms. Topics will include control of DNA, RNA, and protein synthesis, global regulatory mechanisms, recombination, DNA repair systems, and cell cycle control with emphasis on bacterial systems. Not open for credit to students who have taken course 130B. (Former course 130B.)

**162. General Virology** (4) II. Manning, Falk (Plant Pathology)

Lecture—4 hours. Prerequisite: Biological Sciences 1A, 102. Integrated presentation of the nature of animal, bacterial, and plant viruses, including their structure, replication and genetics.

**\*177. Metabolism of Anaerobic Bacteria** (3) II.

The Staff

Lecture—3 hours. Prerequisite: course 102; Biological Sciences 103 (may be taken concurrently). Various groups of anaerobic and facultatively anaerobic bacteria, a consideration of their natural environments and their metabolic characteristics, with emphasis on energy yielding catabolic pathways.

**\*177L. Laboratory in Metabolism of Anaerobic Bacteria** (2) II. The Staff

Laboratory—6 hours. Prerequisite: course 102L; course 177 (may be taken concurrently). Isolation of anaerobic bacteria from a number of different natural environments; experiments dealing with certain characteristic physiological and metabolic aspects of anaerobic bacteria. Offered in alternate years.

**190C. Undergraduate Research Conference** (1) I, II, III. The Staff (Chairperson in charge)

Discussion—1 hour. Prerequisite: upper division standing and consent of instructor, course 199 concurrently. Presentation and critical discussion of staff research activities: designed for advanced undergraduate students. May be repeated for credit. (P/NP grading only.)

**192. Internship** (1-12) I, II, III. The Staff

Internship—3-36 hours. Technical and/or professional experience on or off campus. Supervised by a member of the Microbiology Section faculty. (P/NP grading only.)

**194H. Microbiology Honors Research** (2) I, II, III. The Staff

Independent study—6 hours. Prerequisite: senior standing; eligibility for college honors; completion of six units of 199 in microbiology; consent of section. Continuation of an individual microbiological research project culminating in writing of a senior thesis under a faculty director. (P/NP grading only.)

**197T. Tutoring in Microbiology** (1-5) I, II, III.

The Staff (Chairperson in charge)

Tutoring—1-5 hours. Prerequisite: course 102L and 18 upper division units in Microbiology; consent of chairperson. Assist in undergraduate laboratory courses supervised by teaching assistants or faculty; in discussion sections supervised by faculty; and staffing "drop-in" offices for individual help. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III.

The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff

(Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses**

**200A-\*200B-\*200C. Microbiology for First-Year Graduate Students** (3-3-3) I-II-III. The Staff

(Graduate Group chairperson in charge)

Lecture—3 hours. Prerequisite: first-year graduate standing with interest in microbiology. A survey of general microbiology at the graduate level.

**201L. Advanced Microbiology Laboratory Rotations** (5) I, II. The Staff

Laboratory—15 hours. Prerequisite: course 200A (may be taken concurrently). Two five-week assignments in microbiology research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated twice for credit.

**210. Molecular Mechanisms in Microbial Pathogenesis** (3) III. Manning, Hirsh (Pathology, Microbiology and Immunology)

Lecture—3 hours. Prerequisite: course 105 or Veterinary Microbiology 127 and course 162 or Veterinary Microbiology 128 or the equivalent. Study of the molecular mechanisms involved in cytopathogenesis of higher eukaryotic organisms. Emphasis on the alteration or inhibition of cellular metabolism and function by bacteria and animal viruses.

**215. Recombinant DNA** (3) I. Privalsky

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 103 or the equivalent. Application of recombinant DNA technology to modern problems in biology, biochemistry, and genetics, emphasizing molecular cloning strategies, choice of vectors, preparation of insert DNA, and selection procedures.

**\*215L. Recombinant DNA Laboratory** (4) I.

Privalsky

Laboratory/discussion—10 hours. Prerequisite: course 130L or Molecular and Cellular Biology 120L; Biological Sciences 101; consent of instructor. Application of the recombinant DNA technology to modern problems in biology, biochemistry and genetics, emphasizing molecular cloning strategies, choice of vectors, preparation of insert DNA and selection procedures. (Submit application, available from Microbiology Section Office, two weeks prior to first day of class.)

**\*240. Biology of Autotrophic Prokaryotes** (3) I. Meeks, Wheelis

Lecture/discussion—3 hours. Prerequisite: Biological Sciences 103. Biochemistry and ecology of photo- and chemoautotrophic bacteria, and of methylotrophic bacteria, with special emphasis on the mechanisms of ATP and reductant generation. Offered in alternate years.

**\*250. Biology of Yeasts** (5) II. Bisson (Viticulture and Enology)

Lecture—3 hours; discussion—2 hours. Prerequisite: Biological Sciences 102, 103; course 102, 102L; course 215 recommended. Survey of the genetics, physiology, metabolism, regulatory mechanisms, structure, cell biology, ecology and diversity of yeasts and related organisms. Offered in alternate years.

**\*260. Bacterial Genetic Regulatory Mechanisms** (3) I. Artz

Lecture/discussion—3 hours. Prerequisite: general knowledge of nucleic acid biochemistry and bacterial genetics. Analysis at the molecular level of genetic regulation in selected bacterial systems. Specific systems discussed will include the following types of regulation: control of transcription initiation and termination; translational controls; tRNA modification effects; autoregulation; control circuits in bacterial viruses; supercontrols. Offered in alternate years.

**262. Advanced General and Molecular Virology** (3) III. Manning, Luciw (Medical Pathology), Bruening (Plant Pathology)

Lecture—3 hours. Prerequisite: graduate standing. Advanced integrated presentation of animal, bacterial, and plant viruses, including their structure, modes of regulation, expression and replication, and effects on host cells and organisms.

**\*263. Principles of Protein-Nucleic Acid Interactions** (3) III. Kowalczykowski

Lecture—3 hours. Prerequisite: advanced graduate standing and completion of one year of basic graduate course work in biochemistry, biophysics, chemistry, genetics, microbiology, or molecular biology. Physical basis of protein-nucleic acid interaction. Topics include nucleic acid recognition by proteins, thermodynamics of protein-nucleic acid stability, and kinetics of binding process for both non-specific and sequence-specific nucleic acid binding proteins. Emphasis on systems that represent paradigms in protein-nucleic acid interactions. Offered in alternate years.

**\*270. Advanced Animal Virology** (3) III.

Manning, Luciw (Medical Pathology)

Lecture—3 hours. Prerequisite: consent of instructor. Selected advanced topics on biological and biochemical properties of animal viruses. May be repeated for credit. Offered in alternate years.

**274. Seminar in Genetic Recombination** (1) I, II, III. Kowalczykowski

Seminar—1 hour. Prerequisite: graduate standing; consent of instructor. Biochemical and genetic aspects of genetic recombination in prokaryotes and eukaryotes. Mechanisms of recombination and biochemical and genetic characteristics of recombination proteins. Proteins include DNA strand exchange, DNA helicases, and Holliday junction resolving proteins. May be repeated for credit. (S/U grading only.)

**290C. Advanced Research Conference** (1) I, II, III. The Staff (Chairperson in charge)

Discussion/conference—1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and critical discussion of staff research activities. Designed for advanced graduate students. May be repeated for credit. (S/U grading only.)

**291. Selected Topics in Microbiology** (1) I, II, III. Singer

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Current progress in microbiology and cellular and molecular biology. May be repeated for credit. (S/U grading only.)

**292. Seminar in Bacterial Physiology, Genetics and Virology** (1) I, II, III. The Staff

Seminar—1 hour. Prerequisite: consent of instructor. Review and discussion of current literature and developments in bacterial physiology, genetics, and viro-

ogy with presentations by individual students. (S/U grading only.)

**\*293. Seminar in Protein Sorting** (1) I, II. Klionsky Seminar—1 hour. Prerequisite: consent of instructor. Current research papers on the topics of organelle biogenesis, protein sorting and secretion. May be repeated for credit. (S/U grading only.)

**296. Seminar in Animal Virology** (1) II. Manning Seminar—1 hour. Prerequisite: consent of instructor. Discussion of current topics in animal virology. (Same course as Pathology, Microbiology and Immunology 292A.) May be repeated for credit. (S/U grading only.)

**298. Group Study** (1-5) I, II, III. The Staff (Chairperson in charge) Prerequisite: consent of instructor. (S/U grading only.)

**299. Research** (1-12) I, II, III. The Staff (Chairperson in charge) (S/U grading only.)

### Professional Course

**396. Teaching Assistant Training Practicum** (1-4) I, II, III. The Staff (Chairperson in charge) Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Biological Sciences: Molecular and Cellular Biology

Michael E. Dahmus, Ph.D., Chairperson of the Section  
Section Office, 149 Briggs Hall (530-752-3611)  
World Wide Web: <http://www-mcb.ucdavis.edu>

### Faculty

#### Primary Section Members

Peter B. Armstrong, Ph.D., Professor  
Enoch Baldwin, Ph.D., Assistant Professor  
Ronald J. Baskin, Ph.D., Professor  
Kenneth C. Burtis, Ph.D., Associate Professor  
Judy Callis, Ph.D., Associate Professor  
Don M. Carlson, Ph.D., Professor  
James S. Clegg, Ph.D., Professor  
Richard S. Criddle, Ph.D., Professor  
John H. Crowe, Ph.D., Professor  
Michael E. Dahmus, Ph.D., Professor  
Roy H. Doi, Ph.D., Professor  
Carol A. Erickson, Ph.D., Professor  
Marilynn E. Etzler, Ph.D., Professor  
Charles S. Gasser, Ph.D., Professor  
Robert D. Grey, Ph.D., Professor, *Academic Senate Distinguished Teaching Award*  
R. Scott Hawley, Ph.D., Professor  
Jerry L. Hedrick, Ph.D., Professor  
Leonard M. Hjelmeland, Ph.D., Professor (*Ophthalmology*)  
John A. Kiger, Ph.D., Professor  
J. Clark Lagarias, Ph.D., Professor  
Francis J. McNally, Ph.D., Assistant Professor  
Mark G. McNamee, Ph.D., Professor  
Diana G. Myles, Ph.D., Professor  
Jeanette E. Natzle, Ph.D., Associate Professor  
Richard L. Nuccitelli, Ph.D., Professor  
Jodi Nunnari, Ph.D., Assistant Professor  
Raymond L. Rodriguez, Ph.D., Professor  
Leslie S. Rose, Ph.D., Assistant Professor  
Carl W. Schmid, Ph.D., Professor (*Chemistry*)  
Jonathan M. Scholey, Ph.D., Professor  
Irwin H. Segel, Ph.D., Professor  
Che-Kun J. Shen, Ph.D., Professor  
Larry R. Sprechman, Ph.D., Lecturer  
David K. Wilson, Ph.D., Assistant Professor

#### Secondary Section Members

Ernest S. Chang, Ph.D., Professor (*Animal Science*)  
Richard H. Falk, Ph.D., Professor  
Andrew Fisher, Ph.D., Assistant Professor (*Chemistry*)  
Leslie D. Gottlieb, Ph.D., Professor

John J. Harada, Ph.D., Professor  
Daniel J. Klionsky, Ph.D., Associate Professor  
Stephen C. Kowalczykowski, Ph.D., Professor  
William J. Lucas, Ph.D., Professor  
Brian Mulloney, Ph.D., Professor  
Sharman O'Neill, Ph.D., Associate Professor  
Pamela A. Pappone, Ph.D., Professor  
Martin L. Privalsky, Ph.D., Professor  
Steven M. Theg, Ph.D., Associate Professor  
Robert M. Thornton, Ph.D., Senior Lecturer, *Academic Senate Distinguished Teaching Award*  
Larry N. Vanderhoef, Ph.D., Professor  
Merna R. Villarejo, Ph.D., Professor  
Martin Wilson, Ph.D., Professor

### Emeriti Faculty

Paul A. Castellfranco, Ph.D., Professor Emeritus  
Sterling Chaykin, Ph.D., Professor Emeritus  
Eric E. Conn, Ph.D., Professor Emeritus, *Academic Senate Distinguished Teaching Award*, *UC Davis Prize for Teaching and Scholarly Achievement*  
David W. Deamer, Ph.D., Professor Emeritus  
Gordon J. Edlin, Ph.D., Professor Emeritus  
Melvin M. Green, Ph.D., Professor Emeritus  
Lloyd L. Ingraham, Ph.D., Professor Emeritus  
Paul K. Stumpf, Ph.D., Professor Emeritus

### Affiliated Faculty

Ruth E. Ballard, Ph.D., Lecturer  
Benjamin F. Edwards, Ph.D., Lecturer  
Robert Fairclough, Ph.D., Associate Professor (*Neurology*)  
Kenneth L. Hilt, Ph.D., Lecturer  
Donna M. Lagarias, Ph.D., Lecturer  
Leann L. Lindsay, Ph.D., Lecturer  
Ryan D. Mitchell, Ph.D., Lecturer  
Mark F. Sanders, Ph.D., Lecturer  
Leigh D. Segel, Ph.D., Lecturer  
Jimmy L. Spearow, Ph.D., Lecturer

## Courses in Molecular and Cellular Biology (MCB)

### Lower Division Courses

**10. Introduction to Human Heredity** (4) I. Hawley; III. Sanders  
Lecture—3 hours; discussion—1 hour. Topics in human heredity and human gene structure and function, including the genetic basis of human development, causes of birth defects, mental retardation, genetic diseases, sexual determination, development and behavior. GE credit: SciEng, Wrt.  
**99. Special Study** (1-5) I, II, III. The Staff  
Independent study—3-15 hours. Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

**120L. Biochemistry Laboratory** (6) I. Fairclough (Neurology), Hedrick, Hilt, Lindsay, Sprechman; II. Doi, Hilt, J. Lagarias, L. Segel, Sprechman; III. Criddle, Hilt, Lindsay, McNamee, Nunnari, Shen, Sprechman  
Laboratory—10 hours; lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: Biological Sciences 103 (may be taken concurrently). Introduction to laboratory methods and procedures employed in studying biochemical processes. Designed for students who need experience in the use of biochemical techniques as laboratory tools.

**121. Molecular Biology of Eukaryotic Cells** (3) II. Dahmus; III. Gasser, Hjelmeland  
Lecture—3 hours. Prerequisite: Biological Sciences 101, 103, course 120L. Structure, expression and regulation of eukaryotic genes. Chromosome structure and replication; gene structure, transcription and RNA processing; protein synthesis and translation control; development, immune system and oncogenes. Not open for credit to students who have completed course 141 or 161.

**122. Structure and Function of Proteins** (3) I. Criddle; II. Baldwin, Sprechman  
Lecture—3 hours. Prerequisite: course 120L, Biological Sciences 103. Correlation of structure and biolog-

ical function. Molecular models of enzymes that explain their physiological functioning. Physical and chemical methods used in determining protein structure. Function as measured by kinetic and binding models and as affected by physiological considerations.

**123. Behavior and Analysis of Enzyme and Receptor Systems** (3) III. I.H. Segel, Wilson  
Lecture—3 hours. Prerequisite: Biological Sciences 103. Introduction to the principles of enzyme kinetics and receptor-ligand interactions with emphasis on metabolic regulation and data analysis. Topics include simultaneous equilibria, chemical and steady-state kinetics, allosteric enzymes, multireactant systems, enzyme assays, membrane transport and computer-assisted simulations and analyses.

**126. Plant Biochemistry** (3) III. Abel (Vegetable Crops), Callis  
Lecture—3 hours. Prerequisite: Biological Sciences 1C or the equivalent, and Biological Sciences 103. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as Plant Biology 126.)

**138. Undergraduate Seminar in Biochemistry** (1) I. Carlson; II. Callis, Wilson; III. Etzler  
Seminar—1 hour. Prerequisite: Biological Sciences 103. Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated twice for credit when topic differs. (P/NP grading only.)

**140L. Cell Biology Laboratory** (4) II. Baskin, Myles  
Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 104 (may be taken concurrently). Exercises illustrating the principles of cell biology with emphasis on light microscopy.

**\*141. Cellular Regulation of Gene Expression** (4) III. Natzle  
Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 101 and 102; Biological Sciences 104 recommended. Molecular and cellular mechanisms for regulating the flow of information from genome to the cytoplasm, and from one generation to the next in eukaryotes and prokaryotes. Various levels of regulation will be discussed from an experiment-based perspective. Not open for credit to students who have completed course 121 or 161.

**142. Advanced Cell Biology: Contractile and Motile Systems** (4) III. Baskin  
Lecture—3 hours; term paper. Prerequisite: Biological Sciences 104; Mathematics 16B. Advanced cell biology with emphasis on molecular, biophysical and cellular properties of contractile and motile systems.

**\*146. Histology** (4) II. The Staff  
Lecture—3 hours; laboratory—2 hours. Prerequisite: Biological Sciences 104. Functional morphology of animal tissues and organs. Emphasis is placed on the use of structural studies in elucidating mechanisms underlying physiological and metabolic processes.

**\*148. Undergraduate Seminar in Cell Biology** (2) I, II, III. The Staff  
Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.)

**150. Embryology** (4) I. Armstrong; III. Erickson  
Lecture—4 hours. Prerequisite: Biological Sciences 1A-1B, and concurrent enrollment in course 150L. The events and mechanisms of embryonic development, including fertilization, morphogenesis, cell differentiation and organogenesis, with emphasis on vertebrates.

**150L. Laboratory in Vertebrate Embryology** (1) I. Armstrong, Edwards; III. Edwards, Erickson  
Laboratory—3 hours. Prerequisite: concurrent enrollment in course 150. The comparative analysis of the embryonic development of vertebrates. (P/NP grading only.)

**\*151L. Advanced Developmental Biology** (4) II. Erickson, Natzie, Jeffery, Nuccitelli  
Lecture—2 hours; laboratory—6 hours; written report required. Prerequisite: courses 150, 150L; Biological Sciences 103. Modern topics in developmental biology followed by sophisticated laboratory exercises that demonstrate lecture topics. Students conduct independent studies during last four weeks of quarter.

**158. Undergraduate Seminar in Developmental Biology** (2) I. Myles

Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.)

**\*159. Senior Colloquium in Developmental Biology** (3) II. Grey

Lecture—1 hour; seminar—2 hours. Prerequisite: course 150 with a grade of B or better; consent of instructor. Analysis of major topics in developmental biology, including fertilization and activation of development, morphogenesis, cell differentiation, and pattern formation. Limited enrollment.

**160L. Principles of Genetics Laboratory** (4) I, II. Sanders and staff; III. Kiger and staff  
Laboratory—6 hours; lecture—2 hours. Prerequisite: Biological Sciences 101. Laboratory work in basic and molecular genetics including gene mapping and isolation of mutants.

**161. Molecular Genetics** (3) I. Britt (Plant Biology), Shen

Lecture—3 hours. Prerequisite: Biological Sciences 101; Biological Sciences 103 (may be taken concurrently). Molecular genetics including DNA structure and replication, restriction analysis, sequencing, transcription, translation and gene regulation. Not open for credit to students who have completed course 121 or 141.

**162. Human Genetics** (3) II. Hawley

Lecture—3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Human molecular genetic variation, molecular basis of metabolic disorders, chromosome aberrations and consequences, diseases associated with the immune system, and statistical techniques for estimating genetic and environmental effects. GE credit: SciEng, Wrt.

**163. Developmental Genetics** (3) II. Burtis

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102; course 150 recommended. Current aspects of developmental genetics. Historical background and current genetic approaches to the study of development of higher animals.

**164. Advanced Eukaryotic Genetics** (3) III. Burtis, Hawley

Lecture—3 hours. Prerequisite: Biological Sciences 101. Concentration on the five basic operations of genetic analysis: mutation, segregation, recombination, complementation, and regulation. Special emphasis will be placed on the theory and practice both of isolating new mutations and of analyzing existing mutations.

**\*166. Advanced Developmental Genetics** (3) III. Kiger

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 161, 163. Topics of current interest in the area of genetic control of development. Focus on the genetic dissection of development in *Drosophila* and *Caenorhabditis*, with emphasis on transgenic and other novel techniques for the description and manipulation of developmental processes. (P/NP grading only.)

**\*170L. Advanced Molecular Genetics Laboratory** (6) II, III. The Staff

Laboratory—9 hours; lecture—1 hour; discussion—2 hours. Prerequisite: Biological Sciences 101; courses 120L or 160L; course 121, 141, or 161; and consent of instructor. Molecular analysis of gene structure and function. Isolation, manipulation, and characterization of DNA, RNA, and proteins using recombinant DNA technology. Limited enrollment.

**178. Undergraduate Seminar in Molecular Genetics** (1) I. Sanders; II. Hawley, Rodriguez, Sanders; III. Hawley, Rose

Seminar—1 hour. Prerequisite: upper division standing, completion of Biological Sciences 101, course 160L, and completion or concurrent enrollment in course 161. Discussion of current topics in molecular genetics to show advanced applications of basic principles and to highlight professional career opportunities. May be repeated for credit. (P/NP grading only.)

**190C. Undergraduate Research Conference** (1) I, II, III. The Staff

Discussion—1 hour. Prerequisite: upper division standing and consent of instructor; concurrent enrollment in course 193 or 199. Presentation and discussion of current research by faculty and students. May be repeated for credit. (P/NP grading only.)

**191. Introduction to Research** (1) I, II. L. Segel  
Seminar—1 hour. Prerequisite: Biological Sciences 102 (may be taken concurrently) or consent of instructor. Various topics in molecular and cellular biology including biochemistry, genetics, and cell biology will be discussed, along with ways undergraduates can participate in research projects of faculty members. May be repeated for credit. (P/NP grading only.)

**192. Internship** (1-12) I, II, III. The Staff  
Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Technical and/or practical experience on and off campus, supervised by a member of the Section of Molecular and Cellular Biology faculty. (P/NP grading only.)

**193. Advanced Research** (3) I, II, III. The Staff  
Laboratory—6 hours; discussion—1 hour. Prerequisite: upper division standing, completion of an upper division Molecular and Cellular Biology laboratory course and consent of instructor. Research project carried out under the supervision of a faculty sponsor. Discussion and analysis of results and proposed experiments on a weekly basis with faculty sponsor. May include presentation of a seminar to a research group. May be repeated for credit. (P/NP grading only.)

**194H. Research Honors** (3) I, II, III. The Staff  
Independent study—9 hours. Prerequisite: 6 units of course 193 and/or 199 with faculty director; senior standing; GPA of at least 3.25; consent of Section. Honors project. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.)

**197T. Tutoring** (1-5) I, II, III. The Staff  
Tutoring—1-5 hours. Prerequisite: upper division standing, completion of course to be tutored, and consent of instructor. To assist the instructor by tutoring students in one of the Section's regular courses. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III. The Staff  
Variable—1-5 hours. Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff  
Independent study—3-15 hours. Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate Courses

**200A. Current Techniques in Cell Biology** (2) I. Nuccitelli

Lecture—2 hours. Prerequisite: graduate standing; Biological Sciences 104 and course 141 or the equivalent courses. Current techniques used in cell biology research including microscopy, spectroscopy, electrophysiology, immunochemistry, histology, organelle isolation, calorimetry, tissue culture and gel electrophoresis. Lectures are presented by experts on each technique, with an emphasis on pitfalls to avoid when using the technique. (Same course as Cell and Developmental Biology 200.) (S/U grading only.)

**200B. Current Techniques in Biochemistry** (2) II. Hedrick

Lecture—2 hours. Prerequisite: Biological Sciences 103 and course 120L or the equivalent courses. Current techniques used in biochemical research

including protein and carbohydrate analyses, immunochemistry, recombinant DNA methods, electrophoretic and chromatographic methods.

**200C. Current Techniques in Biophysics** (2) III. Fairclough (Neurology)

Lecture—2 hours. Prerequisite: graduate standing; Biological Sciences 102 or 104 or the equivalent. Current techniques in biophysics research including diffraction, magnetic resonance spectroscopy, calorimetry, optical spectroscopy, and electrophysiology. (Same course as Biophysics Graduate Group 200.) (S/U grading only.)

**220L. Advanced Biochemistry Laboratory Rotations** (5) I, II, III. McNally, Nunnari

Laboratory—15 hours. Prerequisite: course 221A (may be taken concurrently) and 120L or the equivalent. Two five-week assignments in biochemistry research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated twice for credit.

**221A. Physical Biochemistry** (4) I. Baldwin, Schmid, Wilson

Lecture—4 hours. Prerequisite: Biological Sciences 103; Chemistry 107B-108 and 128C, 129C or 118C or the equivalents. Biochemical thermodynamics and chemical and physical properties of biomacromolecules, including enzyme kinetics and methods for determining size and shape of macromolecules.

**\*221B. Integration of Metabolism and Regulatory Phenomena** (3) I. The Staff

Lecture—3 hours. Prerequisite: course 221A or consent of instructor. Regulatory phenomena that occur in control of metabolism; e.g., regulation at enzyme level; integration of metabolic pathways including homeostasis, hormonal influences, turnover of enzymes, comparative aspects of metabolism, regulation of amino acids and lipid metabolism in living systems.

**221C. Molecular Biology** (4) III. Baldwin, Dahmus, Hershey (Biological Chemistry)

Lecture—4 hours. Prerequisite: course 221A. Structure and organization of DNA and chromatin; DNA replication, repair and modification; transcription and RNA processing; protein biosynthesis and turnover; transcriptional and post-transcriptional control mechanisms; examples of the above from eukaryotic and prokaryotic cells, and viruses.

**221D. Cellular Biochemistry** (4) II. Etzler, Hanley (Biological Chemistry), Scholey

Lecture—3 hours; discussion—1 hour. Prerequisite: course 221A. Molecular structure and biochemical function of cell membranes, cytoplasmic organization, organelle trafficking, signaling, mechanisms of intracellular transport, chromosome segregation and cell division with emphasis on biochemical principles.

**\*231. Membrane Biochemistry** (2) III. McNamee

Lecture—2 hours. Prerequisite: course 221D. Advanced topics in membrane biochemistry with emphasis on the structure and function of membrane proteins and lipids. Offered in alternate years.

**\*232. Chemical Modifications of Proteins** (3) III. Benisek (Biological Chemistry)

Lecture—3 hours. Prerequisite: Biological Sciences 103; Chemistry 128C or 118C or the equivalent courses. Chemical approaches for studying proteins, emphasizing the use of chemical modifications as a tool in the study of active sites, particularly of enzymes, and relating the structure of proteins to their functions. Offered in alternate years.

**241. Membrane Biology** (3) II. Crowe

Lecture—3 hours. Prerequisite: Biological Sciences 102 and 103, or Biological Sciences 104 and course 141, or consent of instructor. This course will emphasize biological aspects of membrane function and structure. The general approach will be to discuss cell biology from the viewpoint of membranous components of cells. Offered in alternate years.

**\*242. Muscle Biophysics** (4) I. Baskin

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: Biological Sciences 102, 103 and Mathematics 16B or 21B; or consent of instructor. The physical and chemical aspects of muscle function.

**248. Seminar in Cell Biology** (2) III. Scholey  
Seminar—2 hours. Prerequisite: consent of instructor. Discussion of recent literature on the physical and chemical aspects of organization and function of living systems, topics of current interest in ultrastructure and function of cells. Organizational and functional properties of the molecular and cellular levels of biological systems. May be repeated for credit.

**\*249. Literature in Cell Biology** (1) I, II, III.

The Staff

Seminar—1 hour. Prerequisite: consent of instructor. Presentation and critique of recent journal articles in cell biology. General topic area will change each quarter. May be repeated for credit. (S/U grading only.)

**\*250. Special Topics in Cell Biology** (3) I.

Deamer

Lecture—2 hours; discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Discussion and review of current topics in cell biology. May be repeated for credit.

**\*251. Biology of Fertilization** (3) I. Hedrick, Myles, Nuccitelli

Lecture—2 hours; term paper. Prerequisite: Biological Sciences 104 or the equivalent, and consent of instructor. The morphology, physiology, and biochemistry of gametes, and the mechanism and consequences of their union. Offered in alternate years.

**\*252. Cellular Basis of Morphogenesis** (4) III.

Armstrong

Lecture/discussion—3 hours; term paper. Prerequisite: course 150. Development of form and structure; morphogenetic movement, mechanisms of cellular motility, cell adhesion, intercellular invasion, interaction of cells and tissues in development. Offered in alternate years.

**\*253. Pattern Formation** (4) II. Nuccitelli

Lecture—3 hours; term paper. Prerequisite: course 150, Biological Sciences 104 or the equivalent, and consent of instructor. Morphology and mechanism of pattern formation beginning with ooplasmic segregation. Emphasis will be on cell polarity, but some multicellular systems will also be covered. Offered in alternate years.

**\*254. Mechanisms of Organogenesis** (4) II.

The Staff

Lecture—3 hours; term paper. Prerequisite: course 150. This course will demonstrate the various means by which several cell types become organized and differentiate to form a functional unit, using five selected organ systems. Offered in alternate years.

**\*255. Molecular Mechanisms in Animal Development** (3) I. Natzle

Lecture—1.5 hours; seminar—1.5 hours. Prerequisite: graduate standing or consent of instructor; introductory background in developmental biology and molecular genetics recommended. Analysis of the molecular mechanisms that control animal development, with a special focus on multiple levels of gene regulation. Experimental systems including *Drosophila*, amphibians, *C. elegans*, and mice will be discussed. Readings will be taken from current literature. Offered in alternate years.

**256. Cell and Molecular Biology of Cancer** (2) I. Armstrong

Lecture—1 hour; term paper. Prerequisite: course in cell or developmental biology (e.g., course 150, 141, 163, or Biological Sciences 104). Analysis at the cellular and molecular levels of the regulation of normal and neoplastic tissue growth; tumor dissemination; identification and characterization of oncogenic agents; characterization of oncogenes and tumor-suppressor genes.

**258. Seminar in Development** (2) II. Armstrong, Erickson

Seminar—2 hours. Prerequisite: consent of instructor. Reports and discussion on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit.

**259. Literature in Developmental Biology** (1) I, II, III. Armstrong, Erickson

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and analysis of recent journal

articles in developmental biology. May be repeated for credit. (S/U grading only.)

**262. Recombinant DNA and Genetic Engineering** (3) II. Rodriguez

Lecture—3 hours. Prerequisite: course 161 or Microbiology 130A-130B or consent of instructor. This course will explore the biology of necessary elements such as plasmids, transposons insertion sequences, prophages, etc. Both prokaryotic and eukaryotic moveable genetic elements will be discussed. The molecular biology of plasmid replication, illegitimate recombination, etc., will be considered. Offered in alternate years. (S/U grading only.)

**263. Biotechnology Fundamentals and Application** (2) II. Doi, Ryu, Privalsky

Lecture—2 hours. Prerequisite: Biological Sciences 101, 102, Microbiology 102, graduate student in good standing. To train graduate students interested in a biotechnology career track; to learn recombinant DNA, rate processes of biological systems, optimization of bioreactor performance, practical issues in biotechnology, and some case studies of the development of biotechnology products and processes. Offered in alternate years.

**282. Biotechnology Internship** (1-12) I, II, III.

Doi, Ryu

Internship/laboratory—3-36 hours. Prerequisite: graduate student in good academic standing or consent of instructor. Research at a biotechnology company for a minimum of three months as part of the Designated Emphasis in Biotechnology.

**290C. Research Conference** (1) I, II, III. The Staff  
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentations and critical discussions of faculty and graduate student research in molecular and cellular biology including biochemistry, genetics, and cell biology. May be repeated for credit. (S/U grading only.)

**291. Current Progress in Molecular and Cellular Biology** (1) I, II, III. The Staff

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subject of their own research activities. May be repeated for credit. (S/U grading only.)

**294. Current Progress in Biotechnology** (1) I, II, III. Doi, Ryu

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (Same course as Chemical Engineering 294.) (S/U grading only.)

**295. Literature in Molecular and Cellular Biology** (1) I. Privalsky (Microbiology); II. Radke

(Avian Sciences); III. Oberbauer (Animal Science)  
Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Critical reading and evaluation of current literature in molecular and cellular biology disciplines. Papers will be presented and discussed in detail. May be repeated for credit. (S/U grading only.)

**\*296. Research Seminar** (1) I, II, III. The Staff  
Seminar—1 hour. Prerequisite: course 221C or consent of instructor. Presentation and critical discussions of research activities of various members of the local molecular and cellular biology community; primarily designed for graduate students. May be repeated for credit. (S/U grading only.)

**298. Group Study** (1-5) I, II, III. The Staff  
Variable—1-5 hours. Prerequisite: consent of instructor. (S/U grading only.)

**299. Research** (1-12) I, II, III. The Staff  
Independent study—3-36 hours. (S/U grading only.)

### Professional Course

**390. Methods of Teaching** (1) I, II, III. The Staff  
Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching biochemistry/genetics/cell biology. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion and laboratory sections, formulating examinations under

supervision of instructor. Participating in the teaching program required for Ph.D. May be repeated for credit. (S/U grading only.)

## Biological Sciences: Neurobiology, Physiology, and Behavior

Leo M. Chalupa, Ph.D., Chairperson of the Section  
Section Office, 196 Briggs Hall (530-752-0203)  
World Wide Web: <http://www.npb.ucdavis.edu>

### Faculty

#### Primary Section Members

Thomas P. Adamson, Ph.D., Lecturer, *Academic Federation Excellence in Teaching Award*  
Marylenn S. Barkley, Ph.D., Associate Professor  
Kenneth H. Britten, Ph.D., Assistant Professor  
Earl E. Carstens, Ph.D., Professor  
Leo M. Chalupa, Ph.D., Professor  
Ernest S. Chang, Ph.D., Professor (*Animal Science*)  
Barbara Chapman, Ph.D., Assistant Professor  
Nicola S. Clayton, Ph.D., Assistant Professor  
Charles A. Fuller, Ph.D., Professor  
John D. Furlow, Ph.D., Assistant Professor  
Jack M. Goldberg, Ph.D., Lecturer  
Charles M. Gray, Ph.D., Assistant Professor  
Barbara A. Horwitz, Ph.D., Professor, *Academic Senate Distinguished Teaching Award, UC Davis Prize for Teaching and Scholarly Achievement*

Andrew T. Ishida, Ph.D., Associate Professor  
Joel E. Keizer, Ph.D., Professor  
Gary P. Moberg, Ph.D., Professor (*Animal Science*)  
Brian Mulloney, Ph.D., Professor  
Gabrielle A. Nevitt, Ph.D., Assistant Professor  
Pamela A. Pappone, Ph.D., Professor  
Gregg H. Recanzano, Ph.D., Assistant Professor  
Grace L. Rosenquist, Ph.D., Assistant Adjunct Professor  
Arnold J. Sillman, Ph.D., Professor, *Academic Senate Distinguished Teaching Award*  
Mitchell L. Sutter, Ph.D., Assistant Professor  
W. Jeff Weidner, Ph.D., Professor  
Martin Wilson, Ph.D., Professor  
Charles M. Winget, Ph.D., Lecturer  
Dorothy E. Woolley, Ph.D., Professor

#### Secondary Section Members

Ronald J. Baskin, Ph.D., Professor  
John H. Crowe, Ph.D., Professor  
Mark G. McNamee, Ph.D., Professor  
Judy A. Stamps, Ph.D., Professor

#### Emeriti Faculty

James M. Boda, Ph.D., Professor Emeritus  
Harry W. Colvin, Ph.D., Professor Emeritus  
John M. Horowitz, Ph.D., Professor Emeritus, *Academic Senate Distinguished Teaching Award*  
Frederick W. Lorenz, Ph.D., Professor Emeritus  
Peter R. Marler, Ph.D., Professor Emeritus  
Verne E. Mendel, Ph.D., Professor Emeritus  
Arthur H. Smith, Ph.D., Professor Emeritus

## Courses in Neurobiology, Physiology, and Behavior (NPB)

### Lower Division Courses

**10. Elementary Human Physiology** (4) III.

The Staff

Lecture—3 hours; discussion—1 hour. Introduction to physiology for non-science majors. Includes basic cell physiology and survey of major organ systems and how they function in homeostasis and human health. Not open for credit to students who have completed course 101. GE credit: SciEng.

**12. Human Nervous System** (3) III. Recanzone  
Lecture—3 hours. Organization and function of the human nervous system for non-science majors. Brain function discussed in relation to cognition, learning and memory, and neurological diseases. Not open for credit to students who have completed courses 100, 112 or Psychology 108. GE credit: SciEng.

**12G. Understanding the Human Nervous System** (1) III. Recanzone

Discussion—1 hour. Prerequisite: concurrent enrollment in course 12. For non-science majors. Scientific studies of brain function will be discussed in relation to ethical considerations, social, economic, and political implications and current and future research. GE credit with concurrent enrollment in course 12: Wrt.

**Upper Division Courses**

**100. Neurobiology** (4) I. Chapman, Sutter; III. Mulloney

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B; Physics 5C or 7C recommended. Brains and nervous systems, neurons and neural circuits. Vision, hearing, and feature extraction by the central nervous system. Development of nervous systems. Coordination of movement. The cell biology of learning and memory. Perception, cognition, and disorders of the brain. Not open for credit to students who have completed course 112, 160, 161 or 162, or Neuroscience 221 or 222.

**101. Systemic Physiology** (5) I, II, III. Adamson, Barkley, Fuller, Furlow, Ishida, Goldberg, Sillman, Weidner

Lecture—5 hours. Prerequisite: Biological Sciences 1B; Physics 1B or 7C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions.

**101L. Systemic Physiology Laboratory** (3) I. Adamson; III. Goldberg

Laboratory—3 hours; discussion—2 hours. Prerequisite: course 101 prior to taking 101L recommended, but 101 may be taken concurrently. Selected experiments to illustrate functional characteristics of organ systems discussed in course 101.

**102. Animal Behavior** (3) II. Clayton; III. Nevitt  
Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Basic principles of behavioral organization in vertebrate and invertebrate animals. Underlying physiological and ethological mechanisms. The evolution of behavior, with special emphasis on behavior under natural conditions. Not open for credit to students who have completed course 155. (Former course 155.)

**103. Cellular Physiology/Neurobiology** (3) II. Pappone

Lecture—3 hours. Prerequisite: Biological Sciences 103 and 104; Physics 7C recommended. Cellular physiology with emphasis on membrane transport processes and neuronal physiology. Fundamental physical-chemical and biological mechanisms of membrane transport will be considered in relation to cytoplasmic homeostasis, communication between cells, and the cellular mechanisms of sensory and motor transduction. Not open for credit to students who have completed course 100B. (Former course 100B.)

**104L. Cellular Physiology/Neurobiology Laboratory** (4) II. Horwitz

Lecture—1 hour; laboratory—five 6-hour sessions and discussion—five 2-hour sessions to alternate weekly; extensive writing. Prerequisite: course 100 or 101 and Biological Sciences 103 and 104. Experiments in the physical and chemical processes of cells and tissues. GE credit: Wrt.

**105. Introduction to Computer Models** (4) III. Keizer

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: Mathematics 16C or the equivalent, Physics 7C, Chemistry 2C, and course 100 or 101. Introduction to the ideas, mathematical techniques and computer tools required for developing models of cellular processes in physiology and neurobiology. Applica-

tions include membrane transport, ionic channels, action potentials,  $Ca^{2+}$  oscillations, respiration, and muscle contraction. Offered in alternate years.

**106. Experiments in Neurobiology, Physiology, and Behavior: Design and Execution** (3) I, II, III. The Staff

Laboratory—7.5 hours; discussion—0.5 hours. Prerequisite: Course 100, 101, or 102 and consent of instructor. Experiments in current physiological, neurobiological, or animal behavior problems. Discussion of experimental design. Students choose a project and, independently or in groups of 2-3, design a protocol, do the project and report their findings. May be repeated once for credit with consent of instructor. (P/NP grading only.)

**111C. Advanced Systemic Physiology Laboratory** (3) II. Sutter

Lecture—1 hour; laboratory—6 hours. Prerequisite: courses 101, 101L, Statistics 13; course 112, 113, or 114 recommended. Interfacing physiological recording equipment with microcomputers; data acquisition and analysis using the microcomputer; data interpretation within the framework of physiological concepts.

**111L. Advanced Systemic Physiology Laboratory** (3) I, III. Adamson

Lecture—1 hour; laboratory—6 hours; discussion—2 hours (laboratory and discussion alternate weekly). Prerequisite: courses 101, 101L. Selected comprehensive experiments in the autonomic nervous system, the cardiovascular, respiratory, and neuromuscular systems. Emphasis on conceptual and methodological approaches using several species in demonstrating the physiology of organ systems. Not open for credit to students who have completed courses 111A or 111B. (Former courses 111A, 111B.) GE credit: Wrt.

**112. Neuroscience** (3) I. Carstens; III. Gray

Lecture—3 hours. Prerequisite: course 100 or 101. Presentation of concepts in neuroscience including sensory systems, motor systems, and higher neural integration. Emphasis on mammalian nervous system.

**113. Cardiovascular, Respiratory, and Renal Physiology** (4) II. Goldberg

Lecture—4 hours. Prerequisite: course 101; Chemistry 8B, Physics 7B and 7C recommended. An intense and advanced presentation of concepts in cardiovascular, respiratory, and renal physiology including discussion of acid-base balance.

**114. Gastrointestinal Physiology** (3) III. Horwitz

Lecture—3 hours; term paper. Prerequisite: course 101; Biological Sciences 103 recommended. Advanced gastrointestinal physiology covering absorption, secretion, motility, and special emphasis on endocrinology and innervation. Emphasis will be on physiology of the gastrointestinal tract; some pathology and nutritional items will be covered. GE credit: Wrt.

**117. Avian Physiology** (3) III. Millam

Lecture—3 hours. Prerequisite: course 101 or Biological Sciences 1B. Physiology of the various systems of birds with emphasis on digestion, respiration, excretion, and endocrine systems.

**\*119. Invertebrate Physiology** (4) II. Crowe

Lecture—3 hours; term paper; individual conferences. Prerequisite: Evolution and Ecology 112, Chemistry 2A, 2B, Physics 7C; Biological Sciences 102 and 103 recommended. Comparative physiology of invertebrate organ systems.

**\*119L. Invertebrate Physiology Laboratory** (3) II. Crowe

Laboratory—6 hours (includes research project). Prerequisite: course 119 (may be taken concurrently). Experiments on the physiological mechanisms of invertebrate organ systems. Design and execution of a research project. Not open for credit to students who have completed course 142L. (Former course 142L.)

**121. Physiology of Reproduction** (3) II. Anderson

Lecture—3 hours. Prerequisite: course 101. Physiological mechanisms related to reproduction, breeding efficiency, and fertility, with special reference to domestic animals.

**121L. Physiology of Reproduction Laboratory**

(1) II. Anderson

Laboratory—3 hours. Prerequisite: course 121 recommended (may be taken concurrently). Experiments on the reproductive systems of domestic animals including male and female gametes. (P/NP grading only.)

**124. Comparative Neuroanatomy** (4) II. Krubitzer, Recanzone

Lecture—3 hours; laboratory—2 hours. Prerequisite: Psychology 101, or course 100 or 101. Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Psychology 124.)

**125. Comparative Physiology: Neurointegrative Mechanisms** (3) III. Woolley

Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: neurointegrative mechanisms of integration including aspects of phylogenetic development at both neuronal and systemic levels. Not open for credit to students who have completed course 120A. (Former course 120A.)

**126. Comparative Physiology: Sensory Systems** (3) II. Sillman

Lecture—3 hours. Prerequisite: course 100 or 101. Basic physiological mechanisms involved in sensory systems. Comparative approach to considerations of mechano-sensitive systems (audition, lateral lines, touch, echo location, equilibrium), chemosensitive systems (olfaction, taste, pheromones), photosensitive systems (vision, infrared detection, UV detection), electroreception, and pain. Emphasis on receptors. Not open for credit to students who have completed course 120F. (Former course 120F.)

**127. Comparative Physiology: Circulation** (3) II. Weidner

Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: circulation. Comparative approach to cardiovascular function in vertebrates and invertebrates.

**128. Comparative Physiology: Endocrinology**

(3) II. Moberg, Chang

Lecture—3 hours. Prerequisite: course 101. Comparison of physiological functions in the animal kingdom: animal hormones and their functions. Not open for credit to students who have completed course 120D. (Former course 120D.)

**\*129. Comparative Physiology: Respiration** (3) II. Cech

Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: respiration. Offered in alternate years. Not open for credit to students who have completed course 120E. (Former course 120E.)

**130. Physiology of the Endocrine Glands** (4) I. Adams

Lecture—4 hours. Prerequisite: course 101. Advanced presentation of concepts in endocrinology with emphasis on the role of hormones in reproduction, metabolism, and disease.

**140. Principles of Environmental Physiology**

(3) II. Fuller

Lecture—3 hours. Prerequisite: course 101; Biological Sciences 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed course 148. (Former course 148.)

**141. Physiological Adaptation of Marine Organisms** (4) III. Clegg (Molecular and Cellular Biology), Chang

Lecture—30 hours total; laboratory—30 hours total. Prerequisite: Biological Sciences 102 and 103; Biological Sciences 123 (concurrently); Physics 7A-7B-7C. Physiological adaptation to the environment among organisms in marine and estuarine habitats. Course offered at Bodega Marine Laboratory. (See "Division-wide Programs" for Bodega Marine Laboratory Program.)

**141P. Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics** (6) III. Clegg (Molecular and Cellular Biology), Chang Laboratory—150 hours total; discussion—10 hours total. Prerequisite: course 141 concurrently. Students pick a research topic for intense study. Research will be related to a topic covered in course 141 and will be conducted at the Bodega Marine Laboratory with close supervision of resident faculty. (See "Division-wide Programs" for Bodega Marine Laboratory Program.)

**150. Advanced Animal Behavior** (4) II. Owings, Clayton  
Lecture—3 hours; laboratory—2 hours. Prerequisite: Psychology 101 or course 102. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals. (Same course as Psychology 150.)

**152. Hormones and Behavior** (3) III. Barkley, Mendoza  
Lecture—3 hours. Prerequisite: course 101, and either course 102 or Psychology 101. Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Psychology 152.)

**\*160. Advanced Cellular Neurobiology** (4) II. Mulloney and Wilson  
Lecture—3 hours; independent study—1 hour. Prerequisite: Biological Sciences 101, 102, 104, course 100, or consent of instructor; Physics 7C recommended. Neuronal structure; ion channels; synapses, transmitters and transmitter pharmacology; receptors; neuronal modulation and circuit dynamics. Not open for credit to students who have completed course 143. (Former course 143.)

**\*160L. Advanced Cellular Neurobiology Laboratory** (4) II. Mulloney  
Laboratory—12 hours. Prerequisite: course 160, Physics 7C recommended. Students will learn to record neural activity, to interpret their recordings, and to label neurons with antibodies against neurotransmitters. Not open for credit to students who have completed course 143L. (Former course 143L.)

**161. Developmental Neurobiology** (3) III. Chalupa  
Lecture—3 hours. Prerequisite: course 100 or 101. Issues, theoretical concepts, and methodologies in developmental neurobiology. Topics include prenatal and postnatal differentiation of neurons, and plasticity in the mature and aging brain. Integration of neurochemical, structural, physiological and behavioral perspectives.

**162. Neural Mechanisms of Behavior** (3) III. Britten  
Lecture—3 hours. Prerequisite: course 100 or 101. The relationship between brain and behavior. Identification and analysis of the relevant neural circuits involved. Examples of systems to be considered are birdsong, locomotion, echolocation.

**163. Mathematical Models in Neuroscience and Psychology** (4) II. Olshausen, Sutter  
Lecture—3 hours; term paper. Prerequisite: Mathematics 16B, Physics 7B; course 100 or Psychology 101. Basic mathematical modeling techniques used in neuroscience and psychology. Specific topics include linear systems theory, Fourier transforms, neural networks, adaptive systems, probabilistic inference and information theory. Emphasis on understanding information processing in neural systems. (Same course as Psychology 163.)

**\*190. Proseminar in Physiology** (3) I, II, III. The Staff (Chairperson in charge)  
Seminar—3 hours. Prerequisite: course 101 and Biological Sciences 104, one additional upper division course in physiology or a related course in science, and consent of instructor. Student presentations, discussion, and critical evaluation of material in important areas of physiology. Topics may vary from year to year. Limited enrollment.

**190C. Introduction to Physiological Research** (1) I, II, III. The Staff (Chairperson in charge)  
Discussion—1 hour. Prerequisite: upper division standing in physiology or related biological science; consent of instructor. Introduction to research findings and methods in physiology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)

**192. Internship** (1-12) I, II, III. The Staff (Chairperson in charge)  
Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in physiology. (P/NP grading only.)

**194HA-194HB-194HC. Neurobiology, Physiology and Behavior-Honors** (1, 1-4, 2) I-II-III. The Staff  
Laboratory—3-12 hours. Prerequisite: senior standing; minimum 3.5 GPA in courses counted toward major; approval by the Master Adviser. Honors project in Neurobiology, Physiology and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. Course 194HB may be repeated for credit for a total of 8 units. (P/NP grading only.)

**\*196A. Voluntary Control of Physiological Processes** (2) I, II, III. Lorenz  
Seminar—1 hour; laboratory—3 hours. Prerequisite: adequate upper division preparation in at least one of the following: physiology, behavioral science, computer science, physics or electrical engineering; consent of instructor. Individual or team projects in voluntary control of physiological processes emphasizing application of microcomputer-assisted biofeedback techniques. (P/NP grading only.)

**\*196B. Voluntary Control of Physiological Processes** (1-4) I, II, III. Lorenz  
Laboratory—3-12 hours. Prerequisite: course 196A. Individual or team projects in voluntary control of physiological processes emphasizing application of microcomputer-assisted biofeedback techniques. May be repeated for credit with a maximum of 6 units for 196A-196B course sequence. (P/NP grading only.)

**197T. Tutoring in Neurobiology, Physiology and Behavior** (1-5) I, II, III. The Staff  
Discussion—2-6 hours. Prerequisite: upper division standing and consent of instructor. Assisting in courses in neurobiology, physiology and behavior under the direction of the faculty. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)  
(P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
(P/NP grading only.)

## Graduate Courses

**221. Cellular and Molecular Neuroscience** (4) I. Wilson  
Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Advanced course dealing with the cellular and subcellular organization of the nervous system. Membrane channels, sensory transduction, synaptic transmission and cellular aspects of development and learning will be covered. (Same course as Neuroscience 221.)

**222. Systems Neuroscience** (4) II. Britten  
Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Advanced course covering the integrative and information-processing aspects of nervous system organization. Specific topics to be covered include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as Neuroscience 222.)

**245. Computational Models of Cellular Signaling** (3) II. Keizer  
Lecture—3 hours. Prerequisite: consent of instructor. Computational and mathematical techniques in modeling of regulatory and signaling phenomena in neurobiology and cell physiology, focusing on linear and nonlinear ordinary differential equation models. Applications include ion channel kinetics, electrical activity, signal transduction, calcium oscillations, and simple neural circuits.

**263. Modeling in Systems Neuroscience** (4) II. Sutter  
Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: consent of instructor. Modeling as a tool in systems neuroscience. Mathematical techniques will be introduced and used to explore advanced topics in echolocation, sound localization, electroreception, communications, and motor systems. Other topics include transforms, modeling assumptions, scales and linearity. Offered in alternate years.

**291. Auditory Neuroscience** (1) I, II, III. Sutter, Recanzone  
Seminar—0.5 hours; discussion—0.5 hours. Prerequisite: course 100 or 112 or Neuroscience 222 or the equivalent. Exploration of various important aspects of auditory physiology, behavior and psychophysics through review of original literature. New topic each quarter. May be repeated for credit with consent of instructor. (S/U grading only.)

---

## Biological Sciences: Plant Biology

Deborah P. Delmer, Ph.D., Chairperson of the Section

Section Office, 1002 Life Sciences Addition  
(530-752-0617)

World Wide Web: <http://www-plb.ucdavis.edu>

### Committee in Charge of the Major

Deborah Canington, Ph.D. (*Plant Biology*)  
Judy Jernstedt, Ph.D. (*Agronomy and Range Science*), Chairperson  
John Labavitch, Ph.D. (*Pomology*)  
Alan Stemler, Ph.D. (*Plant Biology*)  
Thea Wilkins, Ph.D. (*Agronomy and Range Science*)  
Terence Murphy, Ph.D. (*Plant Biology*)

### Faculty

Faculty includes members of the Departments of Agronomy and Range Science; Environmental Horticulture; Land, Air and Water Resources; Plant Pathology; Pomology; Vegetable Crops; Viticulture and Enology; and the Sections of the Division of Biological Sciences.

### Primary Section Members

John L. Bowman, Ph.D., Assistant Professor  
Anne Britt, Ph.D., Assistant Professor  
Deborah P. Delmer, Ph.D., Professor  
Richard H. Falk, Ph.D., Professor  
John J. Harada, Ph.D., Professor  
William J. Lucas, Ph.D., Professor  
Terence M. Murphy, Ph.D., Professor  
Sharman O'Neill, Ph.D., Associate Professor  
Thomas L. Rost, Ph.D., Professor, *Academic Senate Distinguished Teaching Award*  
Neelima Sinha, Ph.D., Assistant Professor  
Alan J. Stemler, Ph.D., Professor  
Steven M. Theg, Ph.D., Professor  
Robert M. Thornton, Ph.D., Senior Lecturer, *Academic Senate Distinguished Teaching Award*  
Larry N. Vanderhoef, Ph.D., Professor

### Secondary Section Members

Judy Callis, Ph.D., Associate Professor  
Richard S. Criddle, Ph.D., Professor  
James A. Doyle, Ph.D., Professor (*Geology*)  
Marilynn E. Etzler, Ph.D., Professor  
Charles S. Gasser, Ph.D., Professor

R. Marc Learned, Ph.D., Assistant Professor  
 Marcel Rejmanek, Ph.D., Associate Professor  
 Raymond L. Rodriguez, Ph.D., Professor  
 Irwin H. Segel, Ph.D., Professor  
 Maureen L. Stanton, Ph.D., Professor  
 Donald R. Strong, Ph.D., Professor

### Emeriti Faculty

Fredrick T. Addicott, Ph.D., Professor Emeritus  
 Floyd M. Ashton, Ph.D., Professor Emeritus  
 Bruce A. Bonner, Ph.D., Professor Emeritus  
 Herbert B. Currier, Ph.D., Professor Emeritus  
 Emanuel Epstein, Ph.D., Professor Emeritus  
 Ernest M. Gifford, Ph.D., Professor Emeritus,  
*Academic Senate Distinguished Teaching Award*  
 Hendrick J. Ketellapper, Ph.D., Professor Emeritus  
 Donald W. Kyhos, Ph.D., Professor Emeritus  
 Norma J. Lang, Ph.D., Professor Emerita  
 C. Ralph Stocking, Ph.D., Professor Emeritus  
 John M. Tucker, Ph.D., Professor Emeritus  
 Grady Webster, Ph.D., Professor Emeritus  
 Kenneth Wells, Ph.D., Professor Emeritus

### Affiliated Faculty

Deborah Canington, Ph.D., Academic  
 Coordinator/Lecturer  
 Ellen Dean, Ph.D., Academic Coordinator/Lecturer

## Courses in Plant Biology (PLB)

### Lower Division Courses

#### 1. Plants for Garden, Orchard and Landscape

(2) I, III. Marrush (Vegetable Crops)  
 Lecture—1 hour; laboratory—3 hours. For non-majors. Hands-on experience with plants cultivated for food, environmental enhancement and personal satisfaction. Topics include establishing a vegetable garden, pruning and propagating trees and vines, growing flowers and ornamental plants, and the role of plants in human health and well-being. Not open for credit to students who have completed Agricultural Systems and Environment 2 or Plant Science 1. (Former course Plant Science 1.) (P/NP grading.)

**11. Plants and the Biosphere** (3) I. Falk  
 Lecture—3 hours; one weekend field trip (half-day); term paper. Ethnobotanical and ecological themes are emphasized in examining our dependence on plants, the ecological roles of plants, and the development of botany as a contemporary science. Intended primarily for non-science majors. GE credit: SciEng, Wrt.

**12. Plants and People** (3) I. Bradford; II. Bennett, Micheltore; III. Nevins (Vegetable Crops)  
 Lecture—3 hours. Prerequisite: high school biology. Plants as a resource for food, recreation, and environmental enhancement. Emphasis on how our relationship to plants has changed through history and how the growth and development of plants affect their utility. Not open for credit to students who have completed Plant Science 10. (Former course Plant Science 10.) GE credit: SciEng, Div, Wrt.

**90X. Plant Science Seminar** (1-4) I, II, III.  
 The Staff

Prerequisite: consent of instructor. Examination of a special topic in a small group setting. Not open for credit to students who have completed course Plant Science 90X. (Former course Plant Science 90X.)

**92. Internship** (1-12) I, II, III. The Staff  
 (Chairperson in charge)

Internship—3-36 hours. Prerequisite: consent of instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology faculty. (P/NP grading only.)

**98. Directed Group Study** (1-5) I, II, III. The Staff  
 (Chairperson in charge)  
 Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge.)  
 Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

For questions about courses numbered 102 through 125, see the Plant Biology Section Office, 1002 Life Sciences Addition. For questions concerning courses numbered 142 through 188, see the Plant Science Advising Center, 152 Hunt Hall.

**102. California Floristics** (5) III. Dean  
 Lecture—2 hours; lecture/discussion—1 hour; laboratory—6 hours (includes three one-day, weekend field trips). Prerequisite: Biological Sciences 1A, 1B, 1C or the equivalent in plant science. Survey of the flora of California, with emphasis on field recognition and identification of important vascular plant families and genera characterizing the major floristic regions. Lectures review the taxonomic diversity, evolutionary relationships, and geographical patterns of California flora.

**105. Developmental Plant Anatomy** (5) I. Rost  
 Lecture—3 hours; laboratory—6 hours. Prerequisite: introductory plant biology (for example, Biological Sciences 1C). Survey of vascular plant structure and development. Current ideas and experimental evidence for developmental concepts.

**108. Systematics and Evolution of Angiosperms** (5) III. Doyle  
 Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B and 1C. Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as Evolution and Ecology 108.) GE credit: SciEng.

**111. Plant Physiology** (3) I. Stemler  
 Lecture—3 hours. Prerequisite: Biological Sciences 1C; Chemistry 8B (may be taken concurrently); Physics 7A, 7B, 7C recommended. Fundamental activities of plants; the plant cell as a functioning unit. Processes of absorption, movement, and utilization of water and minerals. Water loss, translocation, photosynthesis, respiration.

**111D. Problems in Plant Physiology** (1) I. Stemler  
 Discussion—1 hour. Prerequisite: course 111 concurrently. Discussion of problems and applications relating to principles presented in course 111. Students will be assigned problems each week showing novel applications of principles described in course 111 and will prepare answers to be delivered orally during the class period. (P/NP grading only.)

**111L. Introductory Plant Physiology Laboratory** (5) III. Murphy  
 Lecture/discussion—1 hour; laboratory—9 hours; extensive writing. Prerequisite: course 111 (may be taken concurrently) or 112 or consent of instructor (both recommended). Introduction to basic experimental techniques and instruments used in the investigation of plant physiological processes, such as photosynthesis, water and solute transport, tissue cultures, and detection of hormones.

**112. Plant Growth and Development** (3) II. Thornton  
 Lecture—3 hours. Prerequisite: Biological Sciences 1C, Chemistry 8B. Introduction to the mechanisms and control systems that govern plant growth and development and the responses of plants to the environment. Strong emphasis on vegetative development of flowering plants. GE credit: SciEng.

**112D. Problems in Plant Growth and Development** (1) II. Thornton  
 Discussion—1 hour. Prerequisite: course 112 concurrently. Discussion of problems and applications relating to principles presented in course 112. Students will be assigned problems each week showing novel applications of the principles described in course 112 and will prepare answers to be delivered orally during class period. (P/NP grading only.)

**113. Molecular and Cellular Biology of Plants** (3) III. Harada  
 Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1C, 101; Biological Sciences 102 recommended. Molecular and cellular aspects of the growth and

development of plants and their response to biological and environmental stresses. Primary focus on processes unique to plants. Experimental approaches will be emphasized.

**113D. Problems in Molecular and Cellular Biology of Plants** (1) III. Harada  
 Discussion—1 hour. Prerequisite: course 113 concurrently. Discussion of topics and applications related to principles presented in course 113. Assigned topics each week show novel applications of the principles described in course 113; discussion of topics during class period. (P/NP grading only.)

**116. Plant Morphology and Evolution** (5) II. Jernstedt  
 Lecture—3 hours; laboratory—6 hours. Prerequisite: introductory plant biology (e.g., Biological Sciences 1C); plant anatomy recommended (e.g., course 105). Introduction to the form, development and evolution of vascular plants. Emphasis given to the form and development of reproductive structures in ferns and seed-producing plants as a basis for determining evolutionary relationships. GE credit: SciEng.

**117. Plant Ecology** (4) I. Pearcy  
 Lecture—3 hours; three to five field trips. Prerequisite: Biological Sciences 1A, 1B, 1C; course 112; course 102 or 108 strongly recommended. The study of interactions between plant populations or vegetation types and their environment. Special emphasis on California. Students taking course 117 cannot receive credit for Evolution and Ecology 121. (Same course as Evolution and Ecology 117.)

**118. Introductory Phycology and Bryology** (4) II. Canington  
 Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1C. Comparative morphology, physiology, development and reproduction of cyanobacteria, the major algal groups, and the bryophytes. Focus on structure-function and evolutionary relationships. Ecological factors and commercial uses considered. Laboratory includes study of living organisms and identification exercises.

**121. Biology of Weeds** (3) III. Rejmanek  
 Lecture—2 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Origin and evolution, beneficial and harmful aspects, reproduction and dispersal, seed germination and dormancy, growth and development, ecology, interaction of weeds and crops, natural succession, and herbicide-induced succession. Laboratories will emphasize taxonomy of weeds and demonstrate principles discussed in lectures.

**\*123. Plant-Virus-Vector Interaction** (3) I. Lucas, Gilbertson, Ullman  
 Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1C, 101; course 105, Plant Pathology 120, and Entomology 100 recommended. Analysis of the interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern experimental approaches to the interdiction of viral movement. Offered alternate years. (Same course as Entomology 123/Plant Pathology 123.)

**\*125. Molecular Biology of Plant Development** (3) III. The Staff  
 Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C; Biological Sciences 103; Molecular and Cellular Biology 161 or course 111. Gene expression and gene structure and their influence on growth and differentiation of higher plant tissues.

**126. Plant Biochemistry** (3) III. Callis, Abel  
 Lecture—3 hours. Prerequisite: Biological Sciences 1C or the equivalent, and Biological Sciences 103. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as Molecular and Cellular Biology 126.)

**141. Principles and Methods of Ethnobotany** (4) II. Potter (Pomology)  
 Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: Biological Sciences 1C or Agricultural Systems and Environment 2 or the equivalent; course

108 recommended. Examination of concepts, questions, and methods in ethnobotany, the study of human-plant interactions. Specific topics include traditional and scientific classification systems, uses of specific plants, plant evolution under domestication, and ethical issues related to ethnobotany. GE credit: SciEng or SocSci, Wrt.

**142. Ecology of Crop Systems** (4) II. Denison (Agronomy and Range Science)

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural Systems and Environment 2 or Biological Sciences 1C; Mathematics 16A or Physics 1A, or consent of instructor. Ecological processes governing the structure and behavior of managed ecosystems. Emphasis on mechanistic and systems views of the physical environment, photosynthetic productivity, competition, adaptation, nutrient cycling, energy relations and contemporary issues such as climate change. GE credit: SciEng.

**143. Evolution of Crop Plants** (3) III. Gepts (Agronomy and Range Science)

Lecture—3 hours. Prerequisite: Biological Sciences 1C or the equivalent. Origins of crops and agriculture, including methodological approaches, center of origin and diversity, crop dissemination pathways, and differences between wild and cultivated plants. Group studies of individual crops are published on the Internet. Not open for credit to students who have completed Plant Science 103 (Former course Plant Science 103.) GE credit: SciEng, Wrt.

**144. Trees and Forests** (3) I. Barbour, Berry (Environmental Horticulture), Bledsoe (Land, Air and Water Resources), DeJong (Pomology)

Lecture—3 hours. Prerequisite: Biological Sciences 1C and upper division standing. Biological structure and function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology; photosynthesis, respiration soil processes, life histories, dormancy, forest biodiversity, and agroforestry. (Same course as Environmental and Resource Sciences 144/Environmental Horticulture 144.) Not open for credit to students who have completed Plant Science 106. (Former course Plant Science 106.)

**146. Rhizosphere Ecology** (3) III. Phillips (Agronomy and Range Science)

Lecture—2 hours; discussion—1 hour. Prerequisite: Agricultural Systems and Environment 2 or Biological Sciences 1C. Effects of plant-microbe interactions on plant growth, soil formation, and agricultural sustainability. Physical, chemical and biological processes that occur at the surface of plant roots. Evolution and modification of the biochemical and genetic bases of rhizosphere ecology.

**148. Introductory Mycology** (5) I. MacDonald, Rizzo (Plant Pathology)

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Introduction to morphology, ontogeny, taxonomy and biology of the fungi. Not open for credit to students who have completed former course 119, Botany/Plant Pathology 119. (Former course 119, Botany/Plant Pathology 119.) (Same course as Plant Pathology 148.)

**\*151. Plant Genetic Resources for Global Crop Production** (3) I. Potter (Pomology)

Lecture—3 hours. Prerequisite: Biological Sciences 1B or 10. Biological and social factors that influence availability of plant genetic resources for discovery of useful new substances and improvement of cultivated plants. Effects of ethical issues, property rights and biological systems on conservation strategies in local and global contexts. GE credit: SciEng, Wrt.

**152. Plant Genetics** (4) I. Wilkins (Agronomy and Range Science)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: Biological Sciences 1A or consent of instructor. Basic principles of transmission genetics, cytogenetics, population and quantitative genetics, and molecular genetics. Practical aspects of genetic crosses and analysis of segregating populations. Not open for credit to students who have completed Plant Science 105. (Former course Plant Science 105.)

**\*153. Plant, Cell, Tissue and Organ Culture** (4) II. Sutter (Pomology)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1C or Agricultural Systems and Environment 2. Basic and applied aspects of plant tissue culture including media preparation, micropropagation, embryogenesis, anther culture, protoplast culture and transformation. Offered in alternate years. Not open for credit to students who have completed Plant Science 107. (Former course Plant Science 107.)

**154. Introduction to Plant Breeding** (4) II. St. Clair (Vegetable Crops)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 152, Biological Sciences 101 or consent of instructor. The principles, methods and applications of plant breeding and genetics to the improvement of crop plants. Illustration of how plant breeding is a dynamic, multidisciplinary, constantly-evolving science. Laboratory emphasizes hands-on experience in the basics of breeding through experiments. (Former course Plant Science 113.)

**157. Physiology of Environmental Stresses in Plants** (3) II. Richards, Läuchli, Silk (Land, Air and Water Resources)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 112 (may be taken concurrently) or the equivalent. Principles and selected topics in physiology of environmental stresses in plants. Areas emphasized are general stress concepts, physiological responses of plants to selected environmental stresses and integration of stresses. Not open for credit to students who have completed Plant Science 126. (Former course Plant Science 126.)

**158. Mineral Nutrition of Plants** (4) III. Richards (Land, Air, and Water Resources), Brown (Pomology)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 111 or the equivalent. Evolution and scope of plant nutrition; essential and other elements; mechanisms of absorption and translocation; mineral metabolism; deficiencies and toxicities; genetic and ecological aspects of plant nutrition. Not open for credit to students who have completed Plant Biology/Plant Science 135. (Former course Plant Biology/Plant Science 135.)

**160. Principles of Plant Biotechnology** (3) II. Dandekar (Pomology)

Lecture—3 hours. Prerequisite: Biological Sciences 1A and 101. Principles and concepts of plant biotechnology including recombinant DNA technology, plant molecular biology, plant cell and tissue culture, and crop improvement. Not open for credit to students who have completed Plant Science 140. (Former course Plant Science 140.)

**161A. Plant Genetics and Biotechnology Laboratory** (4) I. Dandekar (Pomology), Dubcovsky (Agronomy and Range Science)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 152 and/or 160. Techniques of genetic analysis at the molecular and organismal levels, including segregation and linkage analysis, cytogenetics and recombinant DNA. Not open for credit to students who have completed Plant Science 141A. (Former course Plant Science 141A.)

**161B. Plant Genetics and Biotechnology Laboratory** (4) II. Harada (Plant Biology), Wilkins, (Agronomy and Range Science)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 152 and/or 160. Advanced techniques of genetic analysis at the molecular and organismal levels, including transformation, gene expression, analysis of transgenic plants and QTL analysis. Not open for credit to students who have completed Plant Science 141B. (Former course Plant Science 141B.)

**171. Plant Propagation** (4) III. Sutter (Pomology)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Agricultural Systems and Environment 2 or Biological Sciences 1C. Principles and practices of propagating plants covering anatomical, physiological, and practical aspects. Not open for credit to students who have completed Plant Science 109. (Former course Plant Science 109.)

**172. Postharvest Physiology and Handling of Horticultural Commodities** (3) I. Kader (Pomology), Reid (Environmental Horticulture), Saltveit (Vegetable Crops)

Lecture—3 hours. Prerequisite: general plant science background recommended (e.g., Agricultural Systems and Environment 2, course 12 or Food Science and Technology 2); concurrent enrollment in course 172L recommended. Physiological processes related to the maturation and senescence of fruits, vegetables, and ornamentals; fundamentals involved in handling, transportation, storage, and marketing practices, e.g., temperature and humidity control, protective treatments, controlled atmospheres. Not open for credit to students who have completed Plant Science 112. (Former course Plant Science 112.)

**172L. Postharvest Physiology and Handling Laboratory** (2) I. Kader (Pomology), Saltveit (Vegetable Crops)

Discussion—1 hour; laboratory—3 hours. Prerequisite: course 172 (may be taken concurrently). Demonstrations and exercises following the subject matter of course 172. Not open for credit to students who have completed Plant Science 112L. (Former course Plant Science 112L.)

**173. Biological Applications in Fruit Tree Management** (2) II. DeJong (Pomology)

Lecture—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1C or Agricultural Systems and Environment 2 or the equivalents. Physiology, growth, development and environmental requirements of fruit trees and cultural practices used to maintain them. Emphasis on the application of biological principles in the culture of commercially important temperate zone fruit tree species. Not open for credit to students who have completed Plant Science 115. (Former course Plant Science 115.)

**174. Biological Applications in Fruit Production** (2) III. De Young, Polito (Pomology)

Lecture—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1C or Agricultural Systems and Environment 2; course 173 recommended. Reproductive biology of tree-crop species. Biological principles of fruit production, tree nutrition and orchard management. Laboratories emphasize hands-on work with orchard tree systems.

**175. Applied Plant Biology** (4) II. Brown, Labavitch (Pomology)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 111, and Biological Sciences 101 or course 152. Advanced concepts of plant biology with reference to the uses of plants for food, fiber, and environmental enhancement. Current research, applications, and issues in crop improvement, production and biotechnology will be presented and discussed. Not open for credit to students who have completed Plant Science 145. (Former course Plant Science 145.)

**176. Introduction to Weed Science** (3) II. Bayer

Lecture—2 hours; discussion—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C; Chemistry 8A, 8B. Principles of weed science including mechanical, biological, and chemical control methods. Weed control in crop, pasture, range, brush, forests, aquatic, and non-crop situations. Types of herbicides. Application of herbicides. Sight identification of common weeds and demonstrations to illustrate the principles. Not open for credit to students who have completed former course 120. (Former course 120.)

**177. Action of Herbicides** (3) III. Bayer/Falk

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 176; Soil Science 100; courses 111, 111D recommended. Influence of plants and soils on the action of herbicides. Absorption, translocation, fate, mechanism of action and symptoms of herbicides in plants. Effects of herbicides on plant populations. Physical and molecular fate of herbicides in soils. Not open for credit to students who have completed former course 122. (Former course 122.)

**\*178. Biology and Management of Freshwater Macrophytes** (3) I. Anderson (Weed Science)

Lecture—3 hours; two field trips. Prerequisite: Biological Sciences 1A, 1B, 1C, Chemistry 8B; course 111 or Hydrologic Science 122 recommended. Brief sur-

vey of common fresh water macrophytes, their reproductive modes, physiology, growth (photosynthesis, nutrient utilization), development (hormonal interactions), ecology and management. Offered in alternate years. Not open for credit to students who have completed former course 150. (Former course 150.)

**188. Undergraduate Research: Proposal (3) III.** Bloom, Yoder (Vegetable Crops)

Lecture/discussion—3 hours. Prerequisite: upper division standing and consent of instructor. Through lectures, class discussion and individual mentoring, students will define a problem, identify objectives, conduct a literature survey, generate testable hypotheses, design experiments, plan data analysis, prepare an outline, and write a scientific proposal. (Same course as Agricultural Systems and Environment 188.) Not open for credit to students who have completed Plant Science 191, Vegetable Crops 191. (Former course Plant Science 191.)

**189. Experiments in Plant Biology: Design and Execution (3) I, II, III.** The Staff.

Laboratory/discussion—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C or the equivalent courses in plant sciences, and consent of the instructor. Provides an opportunity for undergraduate students to formulate experimental approaches to current questions in plant biology and to carry out their proposed experiments. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**190C. Research Conference in Botany (1) I, II, III.** The Staff

Discussion—1 hour. Prerequisite: upper division standing in botany or related discipline; consent of instructor. Introduction to research methods in botany. Design of field or laboratory research projects, survey of appropriate literature, and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)

**192. Internship (1-12) I, II, III.** The Staff (Chairperson in charge)

Internship—3-36 hours. Prerequisite: upper division standing; consent of instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology Section faculty. (P/NP grading only.)

**194H. Special Study for Honors Students (1-5) I, II, III.** The Staff (Chairperson in charge)

Prerequisite: open only to majors of senior standing on honors list. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (P/NP grading only.)

**196. Postharvest Technology of Horticultural Crops (3) III.** Kader (Pomology) in charge

Lecture/discussion/demonstration—5 days; field trip—5 days. Prerequisite: upper division or graduate student standing. Intensive study of current procedures for postharvest handling of fruits, nuts, vegetables, and ornamentals in California. Scheduled first two weeks immediately following last day of spring quarter. Considered a spring course for pre-enrollment. Not open for credit to students who have completed Plant Science 196. (Former course Plant Science 196.) (P/NP grading only.)

**197T. Tutoring in Botany (1-5) I, II, III.** The Staff  
Tutoring—1-5 hours. Prerequisite: upper division standing and consent of instructor. Designed for undergraduate students who desire teaching experience. Student contact will be primarily in laboratory or discussion sections. (P/NP grading only.)

**198. Directed Group Study (1-5) I, II, III.** The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5) I, II, III.** The Staff (Chairperson in charge.)

Prerequisite: consent of instructor. (P/NP grading only.)

## Biomedical Engineering (A Graduate Group)

Maury L. Hull, Ph.D., Chairperson of the Group  
(530-752-6656 or 752-2611)

Group Office, 1050 Engineering II (Engineering Dean's Office, 530-752-2611)

World Wide Web: <http://www.engr.ucdavis.edu/college/departments/bme/>

**Faculty.** Includes faculty members from the three colleges, and the Schools of Medicine and of Veterinary Medicine.

**Graduate Study.** The Graduate Group in Biomedical Engineering offers programs of study and research leading to the M.S. and Ph.D. degrees. The programs of study prepare students for professional work in the effective integration of engineering with biology and medical sciences, including modeling of biological systems and the design of devices and procedures useful for human and veterinary medicine. This broad interdepartmental program is best suited for students who are capable and comfortable with considerable independence. Each student, together with an adviser, defines a specific course of study suited to individual goals.

**Preparation.** The Group regards strong competence in mathematics and engineering as necessary for successful completion of study. Prior course work in these areas is emphasized in the evaluation of applications. Some such training can be acquired after admission to the Group, but it generally necessitates one or more additional years of study.

**Faculty Advisers.** A. Barakat (*Mechanical Engineering*), M. Buonocore (*Radiology*), M.L. Hull (*Mechanical Engineering*), R. Smith (*Electrical and Computer Engineering*).

## Courses in Biomedical Engineering (BIM)

### Upper Division Course

**126. Tissue Mechanics (3) II.** Hawkins

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Exercise Science 103 and/or Engineering 45 and/or consent of instructor. Structural and mechanical properties of biological tissues, including bone, cartilage, ligaments, tendons, nerves, and skeletal muscle. (Same course as Exercise Science 126.)

### Graduate Courses

**\*210. Introduction to Biomaterials (4) II.**

Shackelford

Lecture—4 hours. Prerequisite: Engineering 45 or consent of instructor. Mechanical and atomic properties of metallic, ceramic, and polymeric implant materials; corrosion, degradation, and failure of implants; inflammation, wound and fracture healing, blood coagulation; properties of bones, joints, and blood vessels; biocompatibility of orthopaedic and cardiovascular materials. Offered in alternate years.

**215. Biomedical Fluid Mechanics and Transport Phenomena (4) III.** Barakat

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 103B or Chemical Engineering 150B or Civil Engineering 141. Application of fluid mechanics and transport to biomedical systems. Flow in normal physiological function and pathological conditions. Topics include circulatory and respiratory flows, affect of flow on cellular processes, transport in the arterial wall and in tumors, and tissue engineering. (Same course as Mechanical Engineering 215.)

**220. Research Topics in Biomechanics (3) III.**

Williams

Lecture—2 hours; seminar—1 hour. Prerequisite: graduate standing and consent of instructor; Exercise Science 115 recommended. Survey of current research

into diverse areas of the biomechanics of human movement. Topics will include locomotion, sport biomechanics, electromyography, musculoskeletal and tissue mechanics, advances in measurement technology, clinical biomechanics. (Same course as Exercise Science 220.) Offered in alternate years.

**223A. Multibody Dynamics I (3) II.** Eke, Hubbard  
Lecture—3 hours. Prerequisite: Engineering 102 or the equivalent, and graduate standing. Dynamics of coupled rigid bodies. Reference frames. Differentiation of vector functions. Multibody kinematics; configuration and motion constraints; holonomicity; non-holonomicity; generalized speeds; partial velocities. Mass and inertia properties, inertia tensor, inertia theorems. Angular momentum; angular momentum theorems. Force systems; generalized forces. (Same course as Mechanical Engineering 223A.) Offered in alternate years.

**223B. Multibody Dynamics II (3) III.** Eke, Hubbard

Lecture—3 hours. Prerequisite: course 223A. Kinematics and dynamics of coupled rigid bodies. Comparison of various methods for obtaining rigid multibody dynamical equations. Newton/Euler formalism. Energy functions; Lagrange's Equations; Kane's method. Computer-aided dynamics of multibody systems. Rigid body orientation; Euler angles; Euler parameters; Rodrigues parameters. (Same course as Mechanical Engineering 223B.) Offered in alternate years.

**225. Spatial Kinematics and Robotics (3) II.**

Cheng

Lecture—3 hours. Prerequisite: Mechanical Engineering 222. Spatial kinematics: Point and line coordinates and their transformations; concept of screw systems and instantaneous invariants for rigid body motion. Robotics: Solving for kinematics equations; differential relationships, motion trajectories. Application of dual-number matrices, screw calculus, and associated analytical methods. Offered in alternate years. (Same course as Mechanical Engineering 225.)

**227. Research Techniques in Biomechanics (4) II.** Williams, Hawkins

Lecture—2 hours; laboratory—4 hours; term paper/discussion—1 hour. Prerequisite: consent of instructor, Mathematics 22B; Exercise Science 115 recommended. Experimental techniques for biomechanical analysis of human movement are examined. Techniques evaluated include data acquisition and analysis by computer, force platform analysis, strength assessment, planar and three-dimensional videography, data reduction and smoothing, body segment parameter determination, electromyography, and biomechanical modeling. (Same course as Mechanical Engineering 227/Exercise Science 227.)

**228. Skeletal Muscle Mechanics: Form, Function, Adaptability (4) I.** Hawkins

Lecture—4 hours. Prerequisite: basic background in biology, physiology, and engineering; Engineering 35 and 45, Mathematics 21D; Neurobiology, Physiology and Behavior 101 recommended. Basic structure and function of skeletal muscle examined at the microscopic and macroscopic level. Muscle adaptation in response to aging, disease, injury, exercise, and disuse. Analytic models of muscle function are discussed. (Same course as Exercise Science 228.)

**\*231. Musculo-Skeletal System Biomechanics (3) III.** Hull

Lecture—3 hours. Prerequisite: Engineering 102, Mechanical Engineering 176. Mechanics of skeletal muscle and mechanical models of muscle, solution of the inverse dynamics problem, theoretical and experimental methods of kinematic and kinetic analysis, computation of intersegmental load and muscle forces, applications to gait analysis and sports biomechanics. Offered in alternate years. (Same course as Mechanical Engineering 231.)

**232. Skeletal Tissue Mechanics (3) III.** Martin  
Lecture—3 hours; laboratory—1 hour. Prerequisite: Engineering 104. Overview of the mechanical properties of the various tissues in the musculoskeletal system, the relationship of these properties to anatomic and histologic structure, and the changes in these properties caused by aging and disuse. The tis-

sues covered include bone, cartilage and synovial fluid, ligament and tendon. (Same course as Mechanical Engineering 232.)

#### 240. Computational Methods in Nonlinear Mechanics (4) II. Sarigul-Klign

Lecture—4 hours. Prerequisite: Applied Science Engineering 115 or Mathematics 128B or Engineering 180. Deformation of solids and the motion of fluids treated with state-of-the-art computational methods. Numerical treatment of nonlinear dynamics; classification of coupled problems; applications of finite element methods to mechanical, aeronautical, and biological systems. Offered in alternate years. (Same course as Aeronautical Science Engineering 240.)

#### 241. Introduction to Magnetic Resonance Imaging (2) I. Buonocore

Lecture—2 hours. Prerequisite: Physics 9D, Mathematics 22B. Introduction to equipment, methods, medical applications of magnetic resonance imaging (MRI). Lectures review basic, advanced pulse sequences, image reconstruction, display and technology and how these are applied clinically. Format: 35 mm slide presentation. Lecture complements more technical course 246, which may be taken concurrently.

#### 242. Survey of Medical Imaging Technology (2) II. Boone, Seibert

Lecture—2 hours; term paper. Prerequisite: graduate student in scientific field or consent of instructor. The various imaging technologies used in medical diagnosis will be studied. These include x-ray radiography, fluoroscopy, computed tomography, mammography, ultrasound imaging, nuclear magnetic resonance imaging, and nuclear medicine imaging. Offered in alternate years.

#### 246. Magnetic Resonance Technology (3) I. Buonocore

Lecture—3 hours. Prerequisite: Physics 9D, Mathematics 22B. Course covers MRI technology at an advanced level with emphasis on mathematical descriptions and problem solving. Topics include spin dynamics, signal generation, image reconstruction, pulse sequences, biophysical basis of T1, T2, RF, gradient coil design, signal to noise, image artifacts.

#### 247. Current Concepts in Magnetic Resonance Imaging I (3) II. Buonocore

Lecture—3 hours. Prerequisite: course 241 or 246 or consent of instructor. Modern pulse sequences, pulse sequence options, and biomedical/industrial applications; velocity encoded phase imaging and angiography, echo planar imaging, spiral imaging, computer simulation of MRI, fast spin echo, other topics.

#### 248. Current Concepts in Magnetic Resonance Imaging II (3) III. Buonocore

Lecture—3 hours. Prerequisite: course 247 or consent of instructor. Continuation of lecture coverage of modern pulse sequences, pulse sequence options, and biomedical/industrial applications: Control of tissue contrast by magnetization refocusing and spoiling, RF pulse design, diffusion and perfusion imaging, image artifact reduction methods, others.

#### 289A-E. Selected Topics in Biomedical Engineering (1-5) I, II, III. The Staff (Chairperson in charge)

Variable. Prerequisite: consent of instructor. Selected topics in (A) Bioinstrumentation and Signal Processing; (B) Biomedical Imaging; (C) Biofluids and Transport; (D) Orthopedic Biomechanics; (E) Analysis of Human Movement. May be repeated for credit.

#### 290. Seminar (1) I, II, III. The Staff

Seminar—1 hour. Seminar in biomedical engineering. (S/U grading only.)

#### 290C. Graduate Research Conference (1) I, II, III. The Staff (Hull in charge)

Discussion—1 hour. Prerequisite: consent of instructor. Individual and/or group conference on problems, progress, and techniques in biomedical engineering research. May be repeated for credit. (S/U grading only.)

#### 299. Research (1-12) I, II, III, IV. The Staff (S/U grading only.)

### Professional Course

#### 396. Teaching Assistant Training Practicum

(1-4) I, II, III. The Staff (Chairperson in charge) Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Biophysics (A Graduate Group)

Richard Nuccitelli, Ph.D., Chairperson of the Group  
Group Office, 188 Briggs Hall (530-752-9092)

World Wide Web:

<http://www-ggc.ucdavis.edu/ggc/bph>

**Faculty.** Includes faculty members from the Departments of Molecular and Cellular Biology, Chemistry, Physics, and others, and the School of Medicine.

**Graduate Study.** The Graduate Group in Biophysics offers programs of study leading to the Ph.D. degree. Biophysics is a broad interdepartmental program that is ideal for students who are comfortable with considerable independence. The emphasis is on molecular biophysics. The curriculum consists of certain core courses in biology, chemistry, and physics, followed by specialty courses related to research interests. Specific program requirements are decided upon by a curriculum committee consisting of a research supervisor, the graduate adviser, and a group member. The Committee meets to consider individual educational needs with the student.

**Graduate Adviser.** R.J. Baskin (*Molecular and Cellular Biology*).

### Courses in Biophysics (BPH)

#### Graduate Courses

#### 200. Current Techniques in Biophysics (2) III. The Staff

Lecture—2 hours. Prerequisite: graduate standing; Biological Sciences 102 or 104 or the equivalent. Current techniques in biophysics research including diffraction, magnetic resonance spectroscopy, calorimetry, optical spectroscopy, and electrophysiology. (Same course as Molecular and Cellular Biology 200C.) (S/U grading only.)

#### 200LA. Biophysics Laboratory (3) I, II, III.

The Staff (Chairperson in charge)  
Laboratory—18 hours. Prerequisite: course 200 (may be taken concurrently). One five-week laboratory assignment in the research laboratory of a Biophysics Graduate Group faculty member. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated for credit four times.

#### 200LB. Biophysics Laboratory (6) I, II, III.

The Staff (Chairperson in charge)  
Laboratory—two 18-hour rotations. Prerequisite: course 200 (may be taken concurrently). Two five-week laboratory assignments in the research laboratories of Biophysics Graduate Group faculty members. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated for credit two times.

#### 231. Biological Nuclear Magnetic Resonance

(3) I. Jue  
Lecture—3 hours. Prerequisite: Molecular and Cellular Biology 221A or the equivalent or consent of instructor. Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics. (Same course as Biological Chemistry 231.) Offered in alternate years.

#### 290C. Research Conference in Biophysics (1) I, II, III. The Staff (Chairperson in charge)

Discussion—1 hour. Prerequisite: graduate standing in Biophysics and/or consent of instructor; course 299 concurrently. Presentation and discussion of faculty and graduate-student research in biophysics. May be

repeated for credit. (S/U grading only.)

#### 298. Group Study (1-5) I, II, III. The Staff (Chairperson in charge)

(S/U grading only.)

#### 299. Research (1-12) I, II, III. The Staff (Chairperson in charge)

(S/U grading only.)

## Biotechnology

(College of Agricultural and Environmental Sciences)

**Faculty.** Faculty includes members of the Departments of Agronomy and Range Science; Animal Science, Environmental Horticulture; Food Science and Technology; Land, Air and Water Resources; Plant Pathology; Pomology; Vegetable Crops; Viticulture and Enology; and the Division of Biological Sciences.

### The Major Program

Every living organism, from the smallest and most primitive bacteria to every plant, insect, animal or human being, contains DNA as the primary genetic material. DNA directs all cellular processes, creating the incredible variety and diversity of living organisms in the biosphere. Biotechnology focuses on the mechanics of life processes and their application. Biotechnology means "life technology" and represents an integrated, multidisciplinary field, with a profound impact today on almost every aspect of human endeavor.

**The Program.** In the first two years, students develop a strong and general background in biological science with an emphasis on fundamental concepts and basic principles of genetics, molecular biology and cell biology. Three options, *Animal Biotechnology*, *Plant Biotechnology*, and *Fermentation/Microbial Biotechnology*, provide in-depth training and specialized knowledge in an aspect of biotechnology. Each option has a strong laboratory component to reinforce the theoretical concepts. Students also do an internship in biotechnology company or university or government laboratory.

**Internships and Career Opportunities.** In the last decade, more industries are turning to biotechnology to solve problems and improve products, creating a growing job market for individuals trained in biotechnology in the agricultural, food and beverage, health care, chemical, pharmaceutical and biochemical, and environmental and bioremediation industries. Graduates trained in the technologies designed for biotechnology will find their training applicable to advanced research in molecular biology, genetics, biochemistry, and the plant and animal sciences.

### B.S. Major Requirements

(For convenience in program planning, the usual courses taken to satisfy the requirements are shown in parentheses. Equivalent or more comprehensive courses are acceptable. Courses shown without parentheses are required.)

**English Composition Requirement** .....8  
See College requirement

#### Preparatory Subject Matter .....54-60

Biological Sciences 1A-1B-1C .....15  
Chemistry 2A-2B-2C .....15  
Chemistry 8A-8B or 118A-118B-118C or  
128A-128B-128C-129A .....6-12  
Mathematics 16A-16B .....6  
Physics 7A-7B .....8  
Statistics 13, 100, or Agricultural Systems and  
Environment 120 .....4

#### Breadth/General Education .....24

#### Depth Subject Matter .....25-28

Biological Sciences 101, 102, 103, 104 .....13  
Microbiology 102 .....4  
Molecular and Cellular Biology 161 .....3  
Genetics 296 or Plant Pathology 140 .....2-4

Internship or independent research, 192 or 199 .....3  
 Honors Undergraduate Thesis (optional)....1

#### Areas of Specialization (choose one)

##### Fermentation/Microbiology Biotechnology Option .....30-33

Microbiology 140, 150; Microbiology 102L or Food Science and Technology 104L; Molecular and Cellular Biology 160L; Viticulture and Enology 124 or 186.....15-18  
 Restricted Electives.....15  
 Select from: Chemical Engineering 161A, 161B, 161L, Food Science and Technology 104, 104L, 110A, 110B, Microbiology 105, 155L, Molecular and Cellular Biology 170L, Viticulture and Enology 124, 126, 128, 135, 140.

##### Plant Biotechnology Option.....28

Molecular and Cellular Biology 126, Plant Biology 152, 160, 161A, 161B .....18  
 Restricted Electives .....10  
 Select at least one course from each of the areas:  
 (a) *Pests, Pathogens and Production*  
 Agricultural Systems and Environment 118, Entomology 110, Nematology 100 or 110, Plant Pathology 120, Plant Biology 143, 146, 153, 154, 172  
 (b) *Growth and Development*  
 Molecular and Cellular Biology 170L, Plant Biology 105, 111, 112, 157, 158

##### Animal Biotechnology Option .....25

Animal Genetics 111, Neurobiology, Physiology and Behavior 101, Molecular and Cellular Biology 150, 150L .....14  
 Restricted Electives.....11  
 Select at least one course from each of the areas:  
 (a) *Animal cell biology/microbiology/immunology*  
 Animal Genetics 101, Environmental Toxicology 100L, Medical Microbiology 107, Microbiology 102L, Molecular and Cellular Biology 160L, Pathology, Microbiology and Immunology 126, 126L, 128  
 (b) *Animal reproduction and breeding*  
 Animal Genetics 107, Animal Science 131, 140, Avian Sciences 103, 121, Evolution and Ecology 102, Neurobiology, Physiology and Behavior 121, 121L

##### Unrestricted Electives .....27-44

##### Total Units for the Major .....180

**Major Adviser:** A.M. Dandekar (Pomology), 1059 Wickson Hall.

**Advising Center** for the major is located at 152 Hunt Hall.

## Botany

**See Biological Sciences—Plant Biology; Plant Biology; and Plant Biology (A Graduate Group)**

**See Asian American Studies**

## Cell and Developmental Biology (A Graduate Group)

Paul FitzGerald, Ph.D., Chairperson of the Group (530-752-7130)

Group Office, 188 Briggs Hall (530-752-9091)

World Wide Web:

<http://www-ggc.ucdavis.edu/ggc/cdb>

**Faculty.** The group includes 40 faculty members from 17 departments in the College of Agricultural and Environmental Sciences, College of Letters and Science, and the Schools of Medicine and Veterinary Medicine.

**Graduate Study.** The Graduate Group in Cell and Developmental Biology offers programs of study leading to the Ph.D. degree. Cell and Developmental Biology is a broad interdepartmental program. The curriculum consists of core courses in cell biology or developmental biology as well as courses jointly staffed with other graduate programs. Specific programs of study are decided upon by an advisory committee chaired by the student's research adviser, and the choice of major core courses will reflect the student's primary research interest.

**Preparation.** Appropriate preparation is an undergraduate degree in a biological or physical science. Preparation should include a year of calculus, physics, general chemistry and organic chemistry, and introductory courses in statistics, biochemistry, genetics and cell biology.

**Graduate Advisers.** J. Natzle (*Molecular and Cellular Biology*), C. Erickson (*Molecular and Cellular Biology*).

## Courses in Cell and Developmental Biology (CDB)

### Graduate Courses

#### 200. Current Techniques in Cell Biology (2) I. Nuccitelli

Lecture—2 hours. Prerequisite: graduate standing; Biological Sciences 104 and Molecular and Cellular Biology 141 or the equivalent courses. Current techniques used in cell biology research including microscopy, spectroscopy, electrophysiology, immunochimistry, histology, organelle isolation, calorimetry, tissue culture and gel electrophoresis. Lectures are presented by experts on each technique, with an emphasis on pitfalls to avoid when using the technique. (Same course as Molecular and Cellular Biology 200A.) (S/U grading only.)

#### 200LA. Cell and Developmental Biology Laboratory (3) I, II, III. The Staff

Laboratory—18 hours. Prerequisite: course 200 (may be taken concurrently). One five-week assignment in the research laboratory of a Cell and Developmental Biology Graduate Group member. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated for credit four times.

#### 200LB. Cell and Developmental Biology Laboratory (6) I, II, III. The Staff

Laboratory—18 hours. Prerequisite: course 200 (may be taken concurrently). Two five-week assignments in research laboratories of Cell and Developmental Biology Graduate Group members. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated for credit.

#### 205. Cell Biology of the Cytoskeleton (2) I. McNally

Lecture—1 hour and discussion 1/2 hour (course hours entered to run sequentially); student presents critical analysis of current journal article and submits written outline and reference list for that publication. General organization of the cytoskeleton; introduc-

tion to cytoskeletal proteins: actin, tubulin, intermediate filaments, myosin, and other associated proteins. Presentation of current problems related to specialized cytoskeletal systems. Topics vary. (S/U grading only.)

#### 290. Current Topics in Cell and Developmental Biology (1) I, II, III. The Staff (Chairperson in charge)

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by guest lecturers describing their research activities. May be repeated for credit. (S/U grading only.)

#### 290C. Research Conference in Cell and Developmental Biology

(1) I, II, III. The Staff (Chairperson in charge)

Discussion—1 hour. Prerequisite: graduate standing in Cell and Developmental Biology and/or consent of instructor; course 299 concurrently. Presentation and discussion of faculty and graduate-student research in cell and developmental biology. May be repeated for credit. (S/U grading only.)

#### 298. Group Study (1-5) I, II, III. The Staff (Chairperson in charge)

(S/U grading only.)

#### 299. Research (1-12) I, II, III. The Staff (Chairperson in charge)

(S/U grading only.)

 George S. Zweifel, Sc.D., Professor Emeritus

## The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

**The Program.** Two programs in chemistry are available, one leading to the Bachelor of Arts and the other to the Bachelor of Science. Students who are interested in chemistry as a profession normally elect the program leading to the B.S. degree, which is accredited by the American Chemical Society. The curriculum leading to an A.B. degree offers a less intensive program in chemistry and is appropriate for a student with a strong interest in chemistry, but who also has another goal such as professional school preparation or secondary school teaching.

**Career Alternatives.** Chemistry graduates with bachelor's degrees are employed extensively throughout industry in production supervision, quality control, technical marketing, and other areas of applied chemistry. Some of the firms employing these graduates are in the food and beverage processing industries, the petroleum industry, paper and textile production and processing, the chemical industry, pharmaceuticals, and the photographic industry. The bachelor programs also provide chemistry graduates with the rigorous preparation needed for the advanced degrees required for careers in research and education.

## A.B. Major Requirements:

|                                                                                                                         | UNITS        |
|-------------------------------------------------------------------------------------------------------------------------|--------------|
| <b>Preparatory Subject Matter</b> .....                                                                                 | <b>36-39</b> |
| Chemistry 2A-2B-2C or 2AH-2BH-2CH.....                                                                                  | 15           |
| Physics 5A-5B-5C or 7A-7B-7C .....                                                                                      | 12           |
| Mathematics 21A-21B-21C or 16A-16B-16C .....                                                                            | 9-12         |
| <b>Depth Subject Matter</b> .....                                                                                       | <b>39</b>    |
| Chemistry 110A, 110B, 110C, 124A, 128A, 128B, 128C, 129A, 129B .....                                                    | 25           |
| At least 14 additional upper division units in chemistry (except Chemistry 107A or 107B), biochemistry, or physics..... | 14           |
| Total Units for the Major .....                                                                                         | 75-78        |

## B.S. Major Requirements:

|                                                                                                    | UNITS     |
|----------------------------------------------------------------------------------------------------|-----------|
| <b>Preparatory Subject Matter</b> .....                                                            | <b>53</b> |
| Chemistry 2A-2B-2C or 2AH-2BH-2CH.....                                                             | 15        |
| Physics 9A, 9B, 9C, 9D .....                                                                       | 16        |
| Mathematics 21A, 21B, 21C, 21D, 22A, 22B .....                                                     | 22        |
| <b>Depth Subject Matter</b> .....                                                                  | <b>50</b> |
| Chemistry 110A, 110B, 110C, 111, 115, 124A, 124B or 124C, 128A, 128B, 128C, 129A, 129B, 129C ..... | 38        |

At least 12 additional upper division units in chemistry (except Chemistry 107A, 107B), including one course with laboratory work.....12  
 Total Units for the Major.....103

**Major Advisers.** W.H. Fink, R.E. Kepner, M. Nantz, N. True, K.P. Nambiar, N.E. Schore, S. Tucker, F.E. Wood.

**Honors and Honors Program.** The student must take courses 194HA, 194HB, and 194HC.

**Graduate Study.** The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by writing to the Graduate Adviser, Department of Chemistry. See also the Graduate Studies chapter of this catalog.

## Courses in Chemistry (CHE)

**Diagnostic Examinations.** To enroll in Chemistry 2A or 2AH, all students (including those with Advanced Placement examination credit or transfer units for any courses in chemistry or mathematics) must pass **both** the *Chemistry Diagnostic Test* and the *Precalculus Qualifying Examination* with satisfactory scores. Both exams are administered during Summer Advising and Orientation and during the orientation week of any quarter in which Chemistry 2A or 2AH is offered. Students who have not passed both exams will be administratively dropped from Chemistry 2A and 2AH.

If you do not achieve a satisfactory score on the Chemistry Diagnostic Test, you have two options. First, you may retake the test. The Learning Skills Center will provide you with the results of your test and details regarding self-directed study materials you may use to prepare to retake the test. The second option is to enroll in Sacramento City College's Chemistry 41C (listed in the *Class Schedule and Room Directory* as WLD 041C before the Chemistry courses). This course is given at UC Davis during fall quarter specifically for UC Davis students who require extra preparation for Chemistry 2A. WLD 41C provides 3 units of credit toward minimum progress and verification of full-time status, but provides **no units toward graduation or grade point average.** *You may not enroll in WLD 41C if you have passed the Chemistry Diagnostic Test or if you have not yet taken the Chemistry Diagnostic Test.*

### Lower Division Courses

**2A. General Chemistry (5) I.** Donnelly, True, —; II. Kaulzarich, Donnelly, Fisher, Stuchebukhov  
 Lecture—3 hours; laboratory/discussion—4 hours.  
 Prerequisite: High school chemistry and physics strongly recommended; satisfactory score on diagnostic examinations. Periodic table, stoichiometry, chemical equations, physical properties and kinetic theory of gases, atomic and molecular structure and chemical bonding. Laboratory experiments in stoichiometric relations, properties and collection of gases, atomic spectroscopy, and introductory quantitative analysis. Only 3 units of credit allowed to students who have completed course 9. GE credit: SciEng.

**2AH. Honors General Chemistry (5) I.** Tinti  
 Lecture—3 hours; laboratory/discussion—4 hours.  
 Prerequisite: High school chemistry and physics; satisfactory score on diagnostic examinations; Mathematics 21A (may be taken concurrently) or consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2A. Students completing course 2AH can continue with course 2BH or 2B.

**2B. General Chemistry (5) II.** Donnelly, Jessop; II. —; III. Land, —, —  
 Lecture—3 hours; laboratory/discussion—4 hours.  
 Prerequisite: course 2A or 2AH. Continuation of course 2A. Condensed phases and intermolecular forces, chemical thermodynamics, chemical equilibria, acids and bases, solubility. Laboratory experiments in thermochemistry, equilibria, and quantitative analysis using volumetric methods. GE credit: SciEng.

### 2BH. Honors General Chemistry (5) II.

Augustine  
 Lecture—3 hours; laboratory/discussion—4 hours.  
 Prerequisite: course 2A with consent of instructor or course 2AH with a grade of C or better; and Mathematics 21B (maybe taken concurrently) or consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2B. Students completing course 2BH can continue with course 2CH or 2C.

### 2C. General Chemistry (5) I.

Power, Tucker; III. Jackson, Kelly  
 Lecture—3 hours; laboratory—6 hours. Prerequisite: course 2B or 2BH. Continuation of course 2B. Kinetics, electrochemistry, spectroscopy, structure and bonding in transition metal compounds, application of principles to chemical reactions. Laboratory experiments in kinetics, electrochemistry, quantitative analysis using instrumental methods, qualitative analysis, and inorganic and organic synthesis. GE credit: SciEng.

**2CH. Honors General Chemistry (5) III.** Fawcett  
 Lecture—3 hours; laboratory—6 hours. Prerequisite: course 2B with consent of instructor or course 2BH with a grade of C or better; and Mathematics 21C (maybe taken concurrently) or consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2C.

### 8A. Organic Chemistry: Brief Course (2) I, III.

Lecture—2 hours. Prerequisite: course 2B with a grade of C- or higher. With course 8B, an introduction to the nomenclature, structure, chemistry, and reaction mechanisms of organic compounds. Intended for students majoring in areas other than organic chemistry.

### 8B. Organic Chemistry: Brief Course (4)

I, II. —  
 Lecture—3 hours; laboratory—3 hours. Prerequisite: course 8A or 118A. Continuation of course 8A. Laboratory concerned primarily with organic laboratory techniques and the chemistry of the common classes of organic compounds.

### \*9. Introduction to General Chemistry (2) I.

The Staff  
 Lecture/discussion—3 hours. Prerequisite: chemistry diagnostic examination; not open for credit to students who have passed the exam or completed course 2A or 2AH. Introduction to chemistry. Students who complete course 9 will receive only 3 units credit for course 2A. Course 9 must be taken for a letter grade and may not be repeated

### 10. Concepts of Chemistry (4) II.

Wood  
 Lecture—4 hours. A survey of basic concepts and contemporary applications of chemistry. Designed for non-science majors and not as preparation for Chemistry 2A. Course Not open for credit to students who have had Chemistry 2A; but students with credit for course 10 may take Chemistry 2A for full credit. GE credit: SciEng, Wrt.

**98. Directed Group Study (1-5) I, II, III.** The Staff (Chairperson in charge)  
 Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only)

**99. Special Study for Undergraduates (1-5) I, II, III.** The Staff (Chairperson in charge)  
 Prerequisite: consent of instructor. (P/NP grading only)

## Upper Division Courses

### 107A. Physical Chemistry for the Life Sciences (3) I.

Fink  
 Lecture—3 hours. Prerequisite: course 2C or consent of instructor. Mathematics 16C or 21C; one year of college level physics. A basic course in physical chemistry intended for majors in the life science areas. Introductory development of classical and statistical thermodynamics including equilibrium processes and solutions of nonelectrolytes. Kinetic theory of gases and liquids. Transport processes in liquids and solutions.

**107B. Physical Chemistry for the Life Sciences** (3) II. Fink, \_\_\_\_\_

Lecture—3 hours. Prerequisite: course 107A or 110A. Continuation of course 107A. Electrochemistry and the thermodynamics of simple electrolyte solutions. Chemical rate processes. Introduction to spectroscopy, atomic and molecular structure, x-ray crystallography, radiation and nuclear chemistry, and to surface chemistry and colloidal systems. Considerations on bioirreversible processes.

**108. Physical Chemistry of Macromolecules** (3) III. Schmid

Lecture—3 hours. Prerequisite: course 107B or 110C. Physical properties and characterization of macromolecules with emphasis upon those of biological interest. Structural thermodynamic, optical and transport properties of polymers in bulk and in solution. Physical characterization methods. Special topics on the properties of polyelectrolyte systems.

**110A. Physical Chemistry: Thermodynamics** (3) I. Lebrilla; III. Tinti

Lecture—3 hours. Prerequisite: course 2C, Mathematics 16C or 21C; one year of college physics. Development and application of the principles of chemical thermodynamics.

**110B. Physical Chemistry: Quantum Mechanics** (3) I. Jackson; II. True

Lecture—3 hours. Prerequisite: course 110A. Atomic and molecular structure and spectra.

**110C. Physical Chemistry: Kinetics** (3) II. Kelly; III. Tucker

Lecture—3 hours. Prerequisite: course 110B. Statistical thermodynamics, kinetic theory of gases, and chemical kinetics.

**111. Physical Chemistry: Methods and Applications** (4) I. Land; III. True

Lecture—2 hours; laboratory—6 hours. Prerequisite: courses 110C (may be taken concurrently) and 115. Introduction to the chemical literature, methods of data analysis, techniques of physical measurements, vacuum systems. Laboratory experiments from the areas of thermodynamics, spectroscopy, and kinetics. GE credit: SciEng, Wrt.

**115. Instrumental Analysis** (4) II. Fawcett

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 110A. Theory and practice of modern instrumental techniques of chemical analysis with emphasis on electroanalytical and spectroscopic methods and separation science. Introduction to instrumentation electronics. Laboratory focuses on trace analyses of samples having practical significance. GE credit: SciEng, Wrt.

**118A. Organic Chemistry for Health and Life Sciences** (4) I. \_\_\_\_\_, \_\_\_\_\_; II. Palmore

Lecture—3 hours; laboratory/discussion—1.5 hours. Prerequisite: course 2C with a grade of C- or higher. The 118A, 118B, 118C series is for students planning professional school studies in health and life sciences. A rigorous, in-depth presentation of basic principles with emphasis on stereochemistry and spectroscopy and preparations and reactions of nonaromatic hydrocarbons, haloalkanes, alcohols and ethers.

**118B. Organic Chemistry for Health and Life Sciences** (4) II. Schore, \_\_\_\_\_; III. \_\_\_\_\_

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 118A. Continuation of course 118A, with emphasis on spectroscopy and the preparation and reactions of aromatic hydrocarbons, organometallic compounds, aldehydes and ketones.

**118C. Organic Chemistry for Health and Life Sciences** (4) I. \_\_\_\_\_; III. \_\_\_\_\_

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 118B. Continuation of course 118B, with emphasis on the preparation, reactions and identification of carboxylic acids and their derivatives, alkyl and acyl amines,  $\beta$ -dicarbonyl compounds, and various classes of naturally occurring, biologically important compounds.

**\*120. Physical Chemistry Laboratory: Advanced Methods** (3) II. Kelly

Lecture—1 hour; laboratory—6 hours. Prerequisite: courses 110C and 111. Design of experiments;

experimental control and data acquisition using microcomputers. Laboratory emphasizes the use of microcomputers in advanced physical-chemical experiments. Offered in alternate years.

**121. Introduction to Molecular Structure and Spectra** (4) III. La Mar

Lecture—4 hours. Prerequisite: course 110B. Modern theoretical and experimental methods used to study problems of molecular structure and bonding; emphasis on spectroscopic techniques.

**124A. Inorganic Chemistry: Fundamentals** (3) I. Jessop

Lecture—3 hours. Prerequisite: course 2C. Symmetry, molecular geometry and structure, molecular orbital theory of bonding (polyatomic molecules and transition metals), solid state chemistry, energetics and spectroscopy of inorganic compounds.

**124B. Inorganic Chemistry: Main Group Elements** (3) II. Balch

Lecture—3 hours. Prerequisite: course 124A. Synthesis, structure and reactivity of inorganic and heteroorganic molecules containing the main group elements.

**124C. Inorganic Chemistry: d and f Block Elements** (3) III. Kauzlarich

Lecture—3 hours. Prerequisite: course 124A. Synthesis, structure and reactivity of transition metal complexes, organometallic and bioinorganic chemistry, the lanthanides and actinides.

**128A. Organic Chemistry** (3) I. Molinski; II. Nambiar

Lecture—3 hours. Prerequisite: course 2C with a grade of C or higher; chemistry majors should enroll in course 129A concurrently. Introduction to the basic concepts of organic chemistry with emphasis on stereochemistry and the chemistry of hydrocarbons. Designed primarily for majors in chemistry.

**128B. Organic Chemistry** (3) II. Nantz; III. Patten

Lecture—3 hours. Prerequisite: course 128A or consent of instructor, course 129A strongly recommended; chemistry majors should enroll in course 129B concurrently. Continuation of course 128A with emphasis on aromatic and aliphatic substitution reactions, elimination reactions, and the chemistry of carbonyl compounds. Introduction to the application of spectroscopic methods to organic chemistry.

**128C. Organic Chemistry** (3) I. Nantz; II. Schore

Lecture—3 hours. Prerequisite: course 128B, chemistry majors should enroll in course 129C concurrently. Continuation of course 128B with emphasis on enolate condensations and the chemistry of amines, phenols, and sugars; selected biologically important compounds.

**129A. Organic Chemistry Laboratory** (2) I, II. Nambiar

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2C with a grade of C or higher; course 128A (may be taken concurrently). Introduction to laboratory techniques of organic chemistry. Emphasis is on methods used for separation and purification of organic compounds.

**129B. Organic Chemistry Laboratory** (2) II. Kurth; III. Molinski

Laboratory—6 hours. Prerequisite: courses 128B (may be taken concurrently) and 129A. Continuation of course 129A. Emphasis is on methods used for synthesis and isolation of organic compounds.

**129C. Organic Chemistry Laboratory** (2) I. Schore; III. Shen

Laboratory—6 hours. Prerequisite: courses 128C (may be taken concurrently) and 129B. Continuation of course 129B.

**130. Qualitative Organic Chemistry** (4) III. Miller

Lecture—1 hour; laboratory—9 hours. Prerequisite: courses 128C, 129C. Application of physical and chemical techniques to the qualitative identification of organic compounds.

**131. Modern Methods of Organic Synthesis** (3) II. Zweifel

Lecture—3 hours. Prerequisite: course 128C. Introduction to modern synthetic methodology in organic chemistry with emphasis on stereoselective reactions and application to multistep syntheses of organic molecules containing multifunctionality.

**\*140. Synthetic Methods** (4) III. Power  
Lecture—1 hour; laboratory—9 hours. Prerequisite: courses 124A, 128C, 129C. Integrated inorganic-organic course in the preparation, purification and characterization of multifunctional organic, organometallic, and transition metal compounds using a wide range of methods. Offered in alternate years.

**150. Chemistry of Natural Products** (3) I. Shen  
Lecture—3 hours. Prerequisite: course 128C. Chemistry of terpenes, steroids, acetogenins, and alkaloids; isolation, structure determination, biosynthesis, chemical transformations, and total synthesis. GE credit: SciEng, Wrt.

**192. Internship in Chemistry** (1-6) I, II, III.

The Staff (Chairperson in charge)  
Internship—3-18 hours. Prerequisite: upper division standing; project approval by faculty sponsor prior to enrollment. Supervised internship in chemistry; requires a final written report. May be repeated for credit for a total of 6 units. (P/NP grading only.)

**194HA-194HB-194HC. Undergraduate Honors Research** (2-2-2) I-II-III. The Staff (Chairperson in charge)

Independent study—2 hours. Prerequisite: open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty adviser, culminating in the writing of an extensive report. (Deferred grading only, pending completion of sequence.)

**195. Industrial Chemistry** (1) I. Kurth  
Seminar—2 hours. Prerequisite: junior or senior standing in Chemistry. Designed to give Chemistry undergraduate students an in-depth perception of careers in the chemical industry. Professional chemists will give seminars describing both research and career insights. The research seminar will be technical while the career-oriented seminar will be more general. (P/NP grading only.)

**197. Projects in Chemical Education** (1-4) I, II, III. The Staff (Chairperson in charge)

Discussion and/or laboratory. Prerequisite: consent of instructor. Participation may include development of laboratory experiments, lecture demonstrations, autotutorial modules or assistance with laboratory sessions. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor based upon adequate preparation in chemistry, mathematics and physics. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor based upon adequate preparation in chemistry, mathematics, and physics. (P/NP grading only.)

**Graduate Courses****201. Chemical Uses of Symmetry and Group Theory** (3) I. Kelly

Lecture—3 hours. Prerequisite: course 124A and 110B, or consent of instructor. Symmetry elements and operations, point groups, representations of groups. Applications to molecular orbital theory, ligand field theory, molecular vibrations, and angular momentum. Crystallographic symmetry.

**205. Symmetry, Spectroscopy, and Structure** (3) II. Jackson

Lecture—3 hours. Prerequisite: course 201 or the equivalent. Vibrational and rotational spectra; electronic spectra and photoelectron spectroscopy; magnetism; electron spin and nuclear quadrupole resonance spectroscopy; nuclear magnetic resonance spectroscopy; other spectroscopic methods.

**210A. Quantum Chemistry: Introduction and Stationary-State Properties** (3) II. Tinti

Lecture—3 hours. Prerequisite: course 110B and 110C or consent of instructor. Stationary-state quantum chemistry: postulates of quantum mechanics, simple solutions, central field problems and angular

momenta, hydrogen atom, perturbation theory, variational theory, atoms and molecules.

**210B. Quantum Chemistry: Time-Dependent Systems** (3) III. Stuchebrukhov

Lecture—3 hours. Prerequisite: course 210A. Matrix mechanics and time-dependent quantum chemistry; matrix formulation of quantum mechanics, Heisenberg representation, time-dependent perturbation theory, selection rules, density matrices, and miscellaneous molecular properties.

**210C. Quantum Chemistry: Molecular Spectroscopy** (3) I. Augustine

Lecture—3 hours. Prerequisite: course 210B. Molecular spectroscopy: Born-Oppenheimer approximation, rotational, vibrational and electronic spectroscopy, spin systems, and molecular photophysics.

**211A. Advanced Physical Chemistry: Statistical Thermodynamics** (3) I. Britt

Lecture—3 hours. Prerequisite: consent of instructor. Principles and applications of statistical mechanics; ensemble theory; statistical thermodynamics of gases, solids, liquids, electrolyte solutions and polymers; chemical equilibrium.

**211B. Statistical Mechanics** (3) II. Tucker

Lecture—3 hours. Prerequisite: course 211A. Statistical mechanics of nonequilibrium systems, including the rigorous kinetic theory of gases, continuum mechanics transport in dense fluids, stochastic processes, brownian motion and linear response theory. Offered in alternate years.

**\*212. Chemical Dynamics** (3) II. The Staff

Lecture—3 hours. Prerequisite: consent of instructor. Introduction to modern concepts in chemical reaction dynamics for graduate students in chemistry. Emphasis will be placed on experimental techniques as well as emerging physical models for characterizing chemical reactivity at a microscopic level. Offered in alternate years.

**\*215. Theoretical and Computational Chemistry** (3) III. Fink

Lecture—3 hours. Prerequisite: courses 211A and 210B or consent of instructor. Mathematics of wide utility in chemistry, computational methods for guidance or alternative to experiment, and modern formulations of chemical theory. Emphasis will vary in successive years. May be repeated for credit when topic differs. Offered in alternate years.

**216. Magnetic Resonance Spectroscopy** (3) III. Dieckmann

Lecture—3 hours. Prerequisite: courses 210A, 210B (may be taken concurrently). Quantum mechanics of spin and orbital angular momentum, nuclear magnetic resonance, theory of chemical shift and multiplet structures, electron spin resonance, theory of g-tensor in organic and transition ions, spin Hamiltonians, nuclear quadrupolar resonance, spin relaxation processes. Offered in alternate years.

**217. X-Ray Structure Determination** (3) III. Fisher

Lecture—3 hours. Prerequisite: consent of instructor. Introduction to x-ray structure determination; crystals, symmetry, diffraction geometry, sample preparation and handling, diffraction apparatus and data collection, methods of structure solution and refinement, presentation of results, text, tables and graphics, crystallographic literature.

**\*218. Physical Principles of Macromolecular Structure** (3) III. Meares

Lecture—3 hours. Prerequisite: course 211A or the equivalent. Relationship of higher order macromolecular structure to subunit composition; equilibrium properties and macromolecular dynamics; physical-chemical determination of macromolecular structure. Offered in alternate years.

**\*219. Spectroscopy of Organic Compounds** (3) I. Patton

Lecture—3 hours. Prerequisite: course 128C or the equivalent. Identification of organic compounds and investigation of stereochemical and reaction mechanism phenomena using spectroscopic methods—principally NMR, IR, and MS. Offered in alternate years.

**\*221A-H. Special Topics in Organic Chemistry** (3) I. The Staff

Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course.

**226. Principles of Transition Metal Chemistry** (3) I. Balch

Lecture—3 hours. Prerequisite: course 124A or the equivalent. Electronic structures, bonding, and reactivity of transition metal compounds.

**228A. Bio-inorganic Chemistry** (3) III. The Staff  
Lecture—3 hours. Prerequisite: course 226 or consent of instructor. Defines role of inorganic chemistry in the functioning of biological systems by identifying the functions of metal ions and main group compounds in biological systems and discussing the chemistry of model and isolated biological compounds. Offered every third year.

**\*228B. Main Group Chemistry** (3) III.

Lecture—3 hours. Prerequisite: course 226 or consent of instructor. Synthesis, physical properties, reactions and bonding of main group compounds. Discussions of concepts of electron deficiency, hypervalency, and non-classical bonding. Chemistry of the main group elements will be treated systematically. Offered every third year (next offering Spring 1999).

**\*228C. Solid-State Chemistry** (3) III. Kauzlarich  
Lecture—3 hours. Prerequisite: courses 124A, 110B, 226, or the equivalent. Design and synthesis, structure and bonding of solid-state compounds; physical properties and characterization of solids; topics of current interest such as low-dimensional materials, inorganic polymers, materials for catalysis. Offered every third year (next offering Spring 2001).

**231. Organic Synthesis: Methods and Strategies** (3) III. Nantz

Lecture—3 hours. Prerequisite: course 131 or the equivalent. Provides a broadly based discussion of current strategies in synthetic organic chemistry. Focus on methods for constructing carbon frameworks, controlling relative stereochemistry, and controlling absolute stereochemistry. Retrosynthetic strategies will be discussed throughout the lectures.

**233. Physical-Organic Chemistry** (3) II. Palmore  
Lecture—3 hours. Prerequisite: courses 128A-128B-128C and 110A-110B-110C or the equivalent. Introduction to elementary concepts in physical-organic chemistry including the application of simple numerical techniques in characterizing and modeling organic reactions.

**\*235. Organometallic Chemistry in Organic Synthesis** (3) III. The Staff

Lecture—3 hours. Prerequisite: course 128C. Current trends in use of organometallics for organic synthesis; preparations, properties, applications, and limitations of organometallic reagents derived from transition and/or main group metals. Offered in alternate years.

**236. Chemistry of Natural Products** (3) II. Miller  
Lecture—3 hours. Prerequisite: course 128C or the equivalent. Advanced treatment of chemistry of naturally occurring compounds isolated from a variety of sources. Topics will include isolation, structure determination, chemical transformations, total synthesis, biological activity, and biosynthesis. Biosynthetic origin will be used as a unifying theme.

**\*237. Bio-organic Chemistry** (3) I. Nambiar  
Lecture—3 hours. Prerequisite: course 128C or the equivalent. Structure and function of biomolecules; molecular recognition; enzyme reaction mechanisms; design of suicide substrates for enzymes; enzyme engineering; design of artificial enzymes and application of enzymes in organic synthesis. Offered in alternate years.

**240. Advanced Analytical Chemistry** (3) I. Fawcett

Lecture—3 hours. Prerequisite: courses 110A and 115 or the equivalent. Numerical treatment of experimental data; thermodynamics of electrolyte and non-electrolyte solutions; complex equilibria in aqueous and non-aqueous solutions; potentiometry and spe-

cific ion electrodes; mass transfer in liquid solutions; fundamentals of separation science, including column, gas and liquid chromatography.

**241A-D. Special Topics in Analytical Chemistry** (3) III. Lebrilla

Lecture—3 hours. Prerequisite: consent of instructor. Series of advanced, research-oriented, special-topics courses in analytical chemistry. Topics will vary each time course is offered.

**261. Current Topics in Chemical Research** (2) I, II, III. The Staff

Lecture—2 hours. Prerequisite: graduate standing in Chemistry or consent of instructor. Designed to help chemistry graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit when topics differ.

**263. Introduction to Chemical Research Methodology** (3) I, II, III. The Staff

Laboratory/discussion—9 hours. Prerequisite: course 293 and graduate student standing in Chemistry; consent of instructor. Introduction to identification, formulation, and solution of meaningful scientific problems including experimental design and/or theoretical analyses of new and prevailing techniques, theories and hypotheses. May be repeated for credit when topic differs. (S/U grading only.)

**264. Advanced Chemical Research Methodology** (6) I, II, III. The Staff

Laboratory/discussion—18 hours. Prerequisite: course 263 or consent of instructor. Applications of the methodology developed in Chemistry 263 to experimental and theoretical studies. Advanced methods of interpretation of results are developed. Includes the preparation of manuscripts for publication. May be repeated for credit when topic differs. (S/U grading only.)

**290. Seminar** (2) I, II, III. Fisher

Seminar—2 hours. Prerequisite: consent of instructor. (S/U grading only.)

**293. Introduction to Chemistry Research** (1) I. The Staff (La Mar in charge)

Discussion—2 hours. Designed for incoming graduate students preparing for higher degrees in chemistry. Group and individual discussion of research activities in the Department and research topic selection. (S/U grading only.)

**295. Industrial Chemistry** (1) I. Kurth

Seminar—2 hours. Prerequisite: graduate standing in Chemistry. Designed to give Chemistry graduate students an in-depth perception of careers in the chemical industry. Professional chemists will give seminars describing both research and career insights. The research seminar will be technical while the career-oriented seminar will be more general. May be repeated for credit. (S/U grading only.)

**298. Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

**299. Research** (1-12) I, II, III. The Staff (Chairperson in charge)

The laboratory is open to qualified graduate students who wish to pursue original investigation. Students wishing to enroll should communicate with the department well in advance of the quarter in which the work is to be undertaken. (S/U grading only.)

**Professional Courses**

**390. Methods of Teaching Chemistry** (2) I, II, III. The Staff

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate student standing in Chemistry and consent of instructor. Practical experience in methods and problems of teaching chemistry. Includes analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting of discussion sessions and student laboratories. Participation in the teaching program required for Ph.D. in chemistry. May be repeated for credit. (S/U grading only.)

**392. Advanced Methods of Teaching Chemistry** (2) III. The Staff

Lecture—2 hours. Prerequisite: course 390. Advanced topics in teaching chemistry. Analysis and

discussion of curricular design, curricula materials, teaching methods and evaluation. For students who are planning a career in teaching chemistry. (P/NP grading only.)

## Chicana/Chicano Studies

(College of Letters and Science)

Yvette Flores-Ortiz, Ph.D., Program Director

Griselda Castro, Program Coordinator/Student Affairs (530-752-2492)

Program Office, Hart Hall, 2nd Floor (530-752-2421)

World Wide Web: <http://cougar.ucdavis.edu/chi>

### Committee in Charge

Richard Berteaux, Ph.D. (*Environmental Design*)

Angie C. Chabram-Dernersesian, Ph.D. (*Chicana/o Studies*)

Yvette Flores-Ortiz, Ph.D. (*Chicana/o Studies*)

Rosa Linda Fregoso, Ph.D. (*Women's Studies*)

Malaquias Montoya, B.F.A. (*Chicana/o Studies*)

Lorena Oropeza, Ph.D. (*History*)

Beatriz Pesquera, Ph.D. (*Chicana/o Studies*)

Adaljiza Sosa-Riddell, Ph.D. (*Chicana/o Studies*)

### Faculty

Angie C. Chabram-Dernersesian, Ph.D., Associate Professor

Yvette Flores-Ortiz, Ph.D., Associate Professor

Malaquias Montoya, Professor

Beatriz Pesquera, Ph.D., Associate Professor

Adaljiza Sosa-Riddell, Ph.D., Senior Lecturer

### The Major Program

The Chicana/Chicano Studies Program offers an interdisciplinary curriculum focusing on the Chicana/Chicano experience through an analysis of class, race, ethnicity, gender and sexuality, and cultural expression. The program offers a major leading to the Bachelor of Arts degree and a minor that can satisfy breadth requirements for the College of Letters and Science. Both the major and minor frame an analysis within the historical and contemporary experiences of Chicanas/os in the Americas. The major gives students an opportunity to specialize in one of two emphases: *Cultural Studies* or *Social/Policy Studies*. Students in the major are expected to read, write, and speak Spanish at a level suitable for future study and work in Chicana/o and Latina/o settings. There are no language requirements for the minor, and all Chicana/Chicano Studies courses are open to students in any major.

**The Program.** At the lower division level, the major curriculum provides an interdisciplinary overview of various topics. Students are advised to take courses that serve as prerequisites for certain upper division courses. At the upper division level, majors pursue advanced interdisciplinary course work in both the humanities/arts and the social sciences. At this level, students will find courses in Chicana/Chicano history, theory, and several courses taught from a variety of disciplinary perspectives. Majors may specialize in one of two emphases for the A.B. degree. The Cultural Studies emphasis integrates literature, culture, and artistic expression. Social/Policy Studies emphasizes social theory, research methods, area studies in community/political economy, family, society and health issues.

**Career Alternatives.** The Cultural Studies emphasis prepares students for professional work in cross-cultural education, cultural/art centers, artistic expression and communications. The Social/Policy Studies emphasis orients students towards professional work in human service delivery, community development, legal services assistance, health services, social welfare and education. Both emphases in the major prepare students for advanced graduate and/or professional studies in related fields.

## Chicana/Chicano (Mexican-American) Studies

### A.B. Major Requirements:

Cultural Studies Emphasis:

|                                                                                                                              | UNITS        |
|------------------------------------------------------------------------------------------------------------------------------|--------------|
| <b>Preparatory Subject Matter</b> .....                                                                                      | <b>16-31</b> |
| Chicana/o Studies 10, 50.....                                                                                                | 8            |
| Chicana/o Studies 21 or 30.....                                                                                              | 4            |
| One of Chicana/o Studies 60, 70, or 73.....                                                                                  | 4            |
| Spanish 1, 2, 3, or 28, 31, 32 or the equivalent.....                                                                        | 0-15         |
| <b>Depth Subject Matter</b> .....                                                                                            | <b>40</b>    |
| Chicana/o Studies 100.....                                                                                                   | 4            |
| History 169A or 169B.....                                                                                                    | 4            |
| Two courses from Chicana/o Studies 110, 111, 120, 122, 131, or 132.....                                                      | 8            |
| Comparative ethnicity/gender: two upper division courses selected from two of the following areas.....                       | 8            |

Four courses from Chicana/o Studies 110, 111, 120, 121, 122, 130, 131, 132, 154, 155, 156, 171, 172.....16

Minor Adviser. M. Montoya.

## Courses in Chicana/o Studies (CHI)

### Lower Division Courses

#### 10. Introduction to Chicana/o Studies (4) I.

Sosa-Riddell; III. Pesquera

Lecture—3 hours; discussion—1 hour. Analysis of the situation of the Chicana/o (Mexican-American) people, emphasizing their history, literature, political movements, education and related areas. GE credit: Div, Wrt.

#### 21. Chicana/o and Latina/o Health Care Issues (4) I.

Flores-Ortiz

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10. Overview of health issues of Chicanas/os and Latinas/os in the State of California; role of poverty/lack of education in limited access to health care. GE credit: Div.

#### \*30. United States Political Institutions and Chicanas/os (4) II.

Sosa-Riddell

Lecture/discussion—3 hours; term paper. Overview of the major political institutions and ideologies of the United States and the Chicana/o people's historical and contemporary role in, effects from, and responses to them. Theory, method and critical analysis. GE credit: Div.

#### 50. Chicana and Chicano Culture (4) II.

Chabram-Dernersesian; III. The Staff

Lecture—3 hours; discussion—1 hour. Interdisciplinary survey of Chicana/o cultural representation in the 20th century. Examines Chicana/o culture within a national and transnational context. Explores how Chicano cultural forms and practices intersect with social/material forces, intellectual formations and cultural discourses. (Former course 20.) GE credit: Div.

#### \*60. Chicana and Chicano Representation in Cinema (4) I, III.

Fregoso

Lecture—8 hours. Introductory-level study of Chicana and Chicano representation. The depiction of Chicana and Chicano experience by Chicana/o filmmakers, as well as by non-Chicanos, including independent filmmakers and the commercial industry. Offered in alternate years.

#### 70. Survey of Chicana/o Art (4) I.

Montoya

Lecture—4 hours. Survey of contemporary Chicana/o art in context of the social turmoil from which it springs. Includes political use of the poster and the mural, the influence of the Mexican mural and graphic movement, and social responsibility of the artist. GE credit: Div.

#### 73. Chicana/o Art Expression Through Silk Screen (4) I.

Montoya

Studio—8 hours; laboratory—4 hours. Introductory level studio course using silk screen and basic printing techniques to explore and develop images of Chicana/o cultural themes and expressions. Students will experiment with images and symbols from their immediate environment/culture. Integrated approach to Chicana/o philosophy of art.

#### 98. Directed Group Study (1-5) I, II, III.

The Staff (Chairperson in charge)

(P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5) I, II, III.

The Staff (Chairperson in charge)

(P/NP grading only.)

### Upper Division Courses

#### 100. Chicana/Chicano Theoretical Perspective (4) II.

Angie Chabram-Dernersesian (Director in charge)

Lecture/discussion—3 hours; term paper. Prerequisite: courses 10 and 50. Critical examination of emerging Chicana/o Studies theoretical perspectives in light of contemporary intellectual frameworks in the social sciences, arts, and humanities. Includes analysis of practices of self-representation, and socio-cultural developments in the Chicana/o community.

**110. Sociology of the Chicana/o Experience** (4) III. Pesquera

Lecture/discussion—4 hours. Prerequisite: course 10 or Sociology 1. The Chicana/o experience in the American society and economy viewed from theoretical perspectives. Immigration, history of integration of Chicana/o labor into American class structure, education inequality, ethnicity, the family and Chicana/o politics. (Former course Sociology 110.) GE credit: SocSci, Div, Wrt.

**111. Chicanas/Mexicanas in Contemporary Society** (4) II. Pesquera

Lecture/discussion—4 hours. Prerequisite: course 10 or 50, Women's Studies 50 or History 169B. Analysis of the role and status of Chicanas/Mexicanas in contemporary society. Special emphasis on their historical role, the political, economic and social institutions that have affected their status, and their contributions to society and their community. (Former course 102.) GE credit: ArtHum.

**120. Chicana/o Psychology** (4) III. Flores-Ortiz

Lecture—3 hours; discussion—1 hour. Prerequisite: course 21; introductory psychology course recommended. Introduction to the field of Chicana/o psychology. Analysis of socio-cultural context of Chicanas/os and Latinas/os. Special attention to issues of ethnic identity development, bilingualism, and development of self esteem. Impact of minority experience, migration, acculturation are examined. GE credit: SocSci, Div.

**121. Chicana/o Community Mental Health** (4) I. The Staff

Lecture—3 hours; term paper. Prerequisite: course 10 or 20. Mental health needs, problems, and service utilization patterns of Chicanas/os and Latinas/os will be analyzed. An analysis of social service policy, and the economic context of mental health programs. GE credit: SocSci, Div, Wrt.

**122. Psychology Perspectives Chicana/o and Latina/o Family** (4) II. Flores-Ortiz

Lecture—4 hours. Prerequisite: course 10; introductory psychology course highly recommended, and/or consent of instructor. Role of migration and acculturation on family structure and functioning. From a psychological and Chicana/o Studies perspective, contemporary gender roles and variations in family structures are examined. Special topics include family violence, addiction, family resilience and coping strategies.

**130. United States-Mexican Border Relations** (4) I. Sosa-Riddell

Lecture—3 hours; term paper. Prerequisite: upper division standing. Theories of U.S.-Mexican border relations, with an overview of the political, economic, and social relationships and an in-depth analysis of immigration issues, border industrialization, women's organizations, economic crises, and legal issues. GE credit: Div.

**131. Chicanas in Politics and Public Policy** (4) I. Sosa-Riddell

Lecture/discussion—4 hours. Prerequisite: course 30 or Political Science 1. Historical and political analysis of Chicana/Latina political involvement and activities in the general political system, women's movement, Chicano movement, and Chicana movement. Course also examines the public policy process and the relationship of Chicanas/Latinas to public policy formation. Offered in alternate years. GE credit: SocSci, Div.

**132. Political Economy of Chicana/o Communities** (4) I. Sosa-Riddell

Lecture—3 hours; term paper. Prerequisite: upper division standing; lower division Chicana/o Studies course recommended. Historical and contemporary study of political and economic forces which define and influence the development of Chicana/o communities. Includes critiques of traditional and Marxian theories and concepts applicable to Chicana/o communities, case studies of Chicana/o communities, especially in California and Texas.

**154. The Chicana/o Novel** (4) II.

Chabram-Dernersesian  
Lecture—4 hours. Prerequisite: intermediate Spanish or consent of instructor. Introduction to the forms and themes of the Chicana/o novel with special attention to the construction of gender, nationality, sexuality, social class, and the family by contemporary Chicana/o novelists. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course Spanish 126A.) GE credit: ArtHum, Div.

**155. Chicana/o Theater** (4) I. Dernersesian

Lecture—4 hours. Prerequisite: intermediate Spanish or consent of instructor. Examination of the formal and thematic dimensions of Chicana/o theater in the contemporary period with special emphasis on El Teatro Campesino and Chicana Feminist Theater. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course Spanish 126B.)

**\*156. Chicana/o Poetry** (4) III.

Chabram-Dernersesian  
Lecture—4 hours. Prerequisite: intermediate Spanish or consent of instructor. Survey of Chicana/o poetry with special emphasis on its thematic and formal dimensions. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course Spanish 126C.)

**\*165. Chicanas, Latinas and Mexicanas in Commercial Media** (4) I. Fregoso

Lecture/discussion—4 hours; laboratory—2 hours. Prerequisite: course 60 or other film or feminist theory course; conversational fluency in Spanish. The portrayal of Chicanas, Latinas and Mexicanas in commercial media. The relation between the representation of Chicana, Latina, and Mexicana women in commercial television and cinema and the role of women in Mexican and U.S. societies. Offered in alternate years.

**171. Mexican and Chicano Mural Workshop** (4) III. Montoya

Studio—8 hours; independent study—1 hour. Prerequisite: course 70 and/or written consent of instructor. The Mural: a collective art process that empowers students and people through design and execution of mural paintings in the tradition of the Mexican Mural Movement; introduces materials and techniques. May be repeated once for credit. (Same course as Art Studio 171.)

**172. Chicana/o Voice/Poster Silk Screen Workshop** (4) II. Montoya

Studio—8 hours; independent study—1 hour. Prerequisite: course 70 and/or 73 and/or written consent of instructor. The poster as a voice art form used by Chicanas/os and other people of color to point to the defects of social and political existence and the possibility for change, from the Chicana/o artists' perspective. May be repeated once for credit.

**192. Internship in Chicana/o and Latina/o Community** (4) I, II, III. The Staff (Chairperson in charge)

Discussion—1 hour; internship—11 hours. Prerequisite: one course from 10, 21, 50, Spanish 3, or the equivalent. Combines academic guidance with internship in community agencies serving Mexican/Latino/Chicano clients. Utilization of bilingual skills, knowledge of history, culture, economics, politics, social issues and work experience. Internship project required. May be repeated twice to a maximum of 12 units. (P/NP grading only.)

**194HA-194HB-194HC. Senior Honors Research Project** (2-5) I, II, III. The Staff

Independent study—6-15 hours. Prerequisite: senior standing in Chicana/o Studies major. Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics. (Deferred grading only, pending completion of sequence.)

**198. Directed Group Study** (1-5) I, II, III.

The Staff (Chairperson in charge)  
Prerequisite: upper division standing and consent of Program Chairperson. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff

(Chairperson in charge)  
Prerequisite: upper division standing and consent of Program Chairperson. (P/NP grading only.)

**Graduate Courses****230. Chicano/Latino Hispanic Politics** (4) III.

Riddell  
Seminar—3 hours; term paper. Prerequisite: two undergraduate courses in Chicana/o Studies or consent of instructor. Examination of Chicano/Latino political experiences. Evaluate theories, ideology, and practice of Chicano politics. Brief history of Chicano/Latino/Hispanic political activity, comparisons among political modes, gendered politics, and understanding relationships among Chicano, Mexican, American and world politics.

**298. Group Study for Graduate Students** (1-5) III. The Staff (Chairperson in charge)

Prerequisite: graduate standing, consent of instructor. May be repeated for credit when topic differs. (S/U grading only.)

**299. Special Study for Graduate Students** (1-12) I, II, III. The Staff (Chairperson in charge)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

## Child Development (A Graduate Group)

Keith Barton, Ph.D., Chairperson of the Group  
Group Office, 1303 Hart Hall (530-752-1926)

World Wide Web: <http://hcd.ucdavis.edu/caes/hcd/graduate/CDCContents.html>

**Faculty.** Includes faculty members from the division of Human Development and the departments of Anthropology, Education, Psychology, and the Schools of Law and of Medicine.

**Graduate Study.** The Graduate Group in Child Development offers a multidisciplinary program leading to an M.S. degree. The program provides students with an opportunity to pursue a coordinated course of postgraduate study in the field of child development which cuts across departmental boundaries. Students may work with children and families in the community, as well as the University's Center for Child and Family Studies. Recipients of the degree gain sufficient background to engage in professions that directly (e.g., preschool, 4-H) or indirectly (e.g., social policy) involve children and families, obtain positions in teaching or research settings, or pursue further study leading to a doctorate in child development, human development, clinical psychology, or related fields.

Admission applications must be in by *April 1*.

**Graduate Adviser.** Contact Group Office.

Stylios Spyridakis, Ph.D., Professor (*History*)

Michael Wedin, Ph.D., Professor (*Philosophy*)

## The Major Programs

Classical Civilization is an interdisciplinary major that examines the ancient Mediterranean cultures of Greece, Rome and the Near East, with courses offered on the history, literature, religions, myths, art and archaeology of these societies, their achievements in rhetoric and philosophy, and their political and social institutions. Minor programs in Classical Civilization, Greek, and Latin, and many General Education courses are offered also.

**The Program.** The major has two tracks: (1) *Classical and Mediterranean Civilizations*, and (2) *Classical Languages and Literatures*. The core of both major tracks consists of two years of Latin, Greek or Hebrew, the introductory sequence on the ancient Mediterranean world (Classics 1, 2, 3), the advanced seminar (Classics 190), and a number of electives. The *Classical and Mediterranean Civilization* track allows students to choose their electives from a broadly balanced program in history, art and archaeology, literature, philosophy and rhetoric. The *Classical Languages and Literatures* track focuses more intensively on language and literature, requiring the study of two languages and allowing fewer electives. Students planning to go on to graduate work in Classics should take Track 2 and choose Latin and Greek as their languages. They are also advised to acquire a reading knowledge of French or German.

**Career Opportunities.** A degree in Classical Civilization represents a solid liberal arts education that provides an excellent foundation for a wide variety of careers. In the last twenty-five years, many majors have applied to Law or Medical School and practically all have been accepted. Additional career options include library and museum work, teaching, journalism, and graduate study in Classics, art, archaeology, history, philosophy and religion.

## Classical Civilization

### A. B. Major Requirements:

UNITS

*Classical and Mediterranean Civilizations track*

#### Preparatory Subject Matter .....30-31

Latin 1-2-3, or Greek 1-2-3, or Hebrew 1-2-3 ..... 15

Two courses from Classics 1, 2, 3 ..... 8

Two additional courses from: Art History 1A; Classics courses 1 through 50 (except 30 and 31); Comparative Literature 1; Philosophy 21; Religious Studies 21, 40 ..... 7-8

#### Depth Subject Matter .....36

Upper division courses in Latin, Greek or Hebrew ..... 12

Five additional courses selected from at least three of the following groups ..... 20

##### (a) Literature:

Additional upper division courses in Latin, Greek and Hebrew; Classics 102, 140, 141, 142, 143; Religious Studies 141A, 141B, 141C

##### (b) History:

History 102A, 111A, 111B, 111C; Religious Studies 102, 122

##### (c) Art, Archaeology and Drama:

Classics 171, 174, 175; Art History 154A, 154B, 155

##### (d) Rhetoric, Philosophy and Political Theory:

Classics 110, 150; Political Science 118A; Philosophy 143, 160, 161, 162

Classics 190 ..... 4

#### Total Units for the Major .....66-67

(Classical and Mediterranean Civilizations track)

UNITS

*Classical Languages and Literatures track*

#### Preparatory Subject Matter .....34

Two of the following sequences: Latin 1-2-3; Greek 1-2-3; Hebrew 1-2-3 ..... 30

Classics 1, 2, or 3 ..... 4

#### Depth Subject Matter .....36

Six upper division courses in the two chosen languages, with at least two courses in each language ..... 24

Two additional courses selected from any of the following groups ..... 8

##### (a) Literature:

Additional upper division courses in Latin, Greek and Hebrew; Classics 102, 140, 141, 142, 143; Religious Studies 141A, 141B, 141C

##### (b) History:

History 102A, 111A, 111B, 111C; Religious Studies 102, 122

##### (c) Art, Archaeology and Drama:

Classics 171, 174, 175; Art History 154A, 154B, 155

##### (d) Rhetoric, Philosophy and Political Theory:

Classics 110, 150; Political Science 118A; Philosophy 143, 160, 161, 162

Classics 190 ..... 4

#### Total Units for the Major .....70

(Classical Languages and Literatures track)

Major Advisers. D.A. Traill, L.E. Roller.

### Greek

*Admission to the undergraduate major in Greek has been suspended. Courses in Greek continue to be offered and may be applied toward majors such as Classical Civilization.*

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter .....0-15

Greek 1, 2, 3 (or the equivalent) ..... 15

#### Depth Subject Matter .....36

Upper division units in Greek (two courses may be chosen from department-approved courses in related fields).

#### Total Units for the Major .....36-51

#### Recommended

Latin 1, 2, 3.

### Latin

*Admission to the undergraduate major in Latin has been suspended. Courses in Latin continue to be offered and may be applied toward majors such as Classical Civilization.*

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter .....15

Latin 1, 2, 3 (or the equivalent) ..... 15

#### Depth Subject Matter .....36

Latin 121 ..... 5

At least 31 additional upper division units in Latin ..... 31

Total Units for the Major ..... 36-51

## Minor Program Requirements:

The Department offers minors in Classical Civilization, Greek and Latin for those wishing to follow a shorter but formally recognized program of study in classics.

UNITS

#### Classical Civilization .....20

Classics 1, 2, or 3 ..... 4

One upper division course in Latin, Greek or Hebrew ..... 4

Three additional upper division courses selected from any of the groups (a) through (d) in the Classical Civilization major ..... 12

UNITS

#### Greek .....21

Greek 3 ..... 5

Four upper division courses in Greek ..... 16

Latin 3 ..... 5

Four upper division courses in Latin ..... 16

**Graduate Study.** The Department offers a master's degree in Classics with emphasis on either Greek or Latin; however, *admission into the graduate program has been suspended.*

**Prerequisite credit.** Credit will not normally be given for a lower division course in Latin or Greek if it is the prerequisite of a course already successfully completed. Exceptions can be made by the Program Director only.

## Courses in Classics (CLA)

### Lower Division Courses

#### 1. The Ancient Near East and Early Greece:

**3000-500 B.C.E.** (4) II. Roller

Lecture—3 hours; term paper. Introduction to the literature, art, and social and political institutions of ancient Mesopotamia, Egypt, Palestine, and early Greece from 3000 to 500 B.C.E. GE credit: ArtHum, Wrt.

#### 2. Ancient Greece and the Near East: 500 to

**146 B.C.E.** (4) III. Traill

Lecture—3 hours; term paper. Introduction to the literature, art and thought and the political and social institutions and values of Greece and its eastern Mediterranean neighbors—the Persians, Egyptians, and Judeans. GE credit: ArtHum, Wrt.

#### 3. Rome and the Mediterranean: 1000 B.C.E. to

**500 C.E.** (4) I. Abbott

Lecture—3 hours; term paper. Introduction to the history, literature and art and the political and social institutions and values of Roman civilization, with emphasis on Rome's interactions with its Mediterranean neighbors—Etruscans, Carthaginians, Greeks, Egyptians,

and Persians—and on the rise of Christianity. GE credit: ArtHum, Wrt.

**10. Greek, Roman, and Near Eastern Mythology** (3) I, III. Allan

Lecture—3 hours. Examination of major myths of Greece, Rome, and the Ancient Near East; their place in the religion, literature and art of the societies that produced them; their subsequent development, influence and interpretation. GE credit: ArtHum.

**15. Women in Classical Antiquity** (4) III. Allan  
Lecture—3 hours; term paper. Lives and roles of women in ancient Greece and Rome. Readings from history, philosophy, medical and legal documents, literature and myth. GE credit: ArtHum, Div, Wrt.

**\*20. Pompeii AD 79** (4) III. Traill

Lecture—3 hours; term paper. Roman life in an urban community at the time of the eruption of Vesuvius. Slide presentations of the archeological evidence will be supplemented by selected readings from Petronius' *Satyricon* and other ancient authors. Offered in alternate years. GE credit: ArtHum, Wrt.

**30. Greek and Latin Elements in English Vocabulary** (3) I, III. P. Schaeffer

Lecture—3 hours. Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected.

**\*31. Greek and Latin Elements in Technical Vocabulary** (3) III. The Staff

Lecture—3 hours. Knowledge of Greek and Latin not required. Elements of Greek and Latin vocabulary to increase understanding of English word formation in medical, scientific and technical terminology and improve ability to understand and retain unfamiliar terms.

**\*50. The Rise of Science in Ancient Greece** (4) II. Rosenstock

Lecture/discussion—3 hours; term paper. Prerequisite: Mathematics 16A or the equivalent. Study of the emergence of scientific rationality in ancient Greece and its political and social context; concentration on four areas: mathematics, medicine, cosmology, and psychology. Reading from the Presocratics, Hippocrates, Plato, Aristotle, and Hellenistic philosophers. GE credit: ArtHum, Wrt.

**Upper Division Courses**

**102. Film and the Classical World** (4) II. Albu  
Lecture—3 hours; film viewing—2.5 hours. Prerequisite: any Classics course except 30 or 31. The Classical World as portrayed in films. Viewings and discussions of modern versions of ancient dramas, modern dramas set in the Ancient Mediterranean world, and films imbued with classical themes and allusions. Supplementary readings in ancient literature and mythology. GE credit: ArtHum, Wrt.

**110. Origins of Rhetoric** (4) III. Abbott  
Lecture—3 hours; term paper. Prerequisite: one course in ancient history or consent of instructor. Issues in the development of rhetoric from its origins in ancient Greece to A.D. 430. Special attention to works of Plato, Aristotle, Cicero, and Quintilian. Role of grammar and rhetoric in schools of Roman Empire. The Christian rhetoric of Saint Augustine. Not open for credit to students who have completed Rhetoric and Communication 110 or Communication 110. (Former course Rhetoric and Communication 110.) GE credit: ArtHum, Wrt.

**\*140. Homer and Ancient Epic** (4) I. Schein  
Lecture—3 hours; term paper. Prerequisite: course 4A or 10 or Comparative Literature 1. Reading of *Iliad*, *Odyssey*, and *Aeneid* in English. Discussion of Homer's and Vergil's techniques of composition, the beliefs and values of their respective societies and the influence of Homer on Vergil. Offered in alternate years. GE credit: ArtHum, Wrt.

**141. Greek and Roman Comedy** (4) III. Albu  
Lecture—3 hours; conference—1 hour. Readings in Aristophanes, Menander, Plautus, and Terence; lectures on the development of ancient comedy. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*142. Greek and Roman Novel** (4) III. Schein  
Lecture—3 hours; term paper. Examination of the ancient Greek romances and their development into the grotesque realism of Petronius' *Satyricon*, and the religious mysticism of Apuleius' *The Golden Ass*. GE credit: ArtHum, Wrt.

**\*143. Greek Tragedy** (4) III. Traill

Lecture—3 hours; term paper. Prerequisite: course 4A or 10. Reading in English of selected plays of Aeschylus, Sophocles and Euripides. Lectures on the development and influence of Athenian tragedy. Offered in alternate years. GE credit: ArtHum, Wrt.

**150. Socrates and Classical Athens** (4) II. Traill  
Lecture/discussion—3 hours; term paper. Prerequisite: course 4A. Study of the major sources of our knowledge of Socrates to assess his role in the politics and culture of ancient Athens; his method of teaching and its place in Western thought. GE credit: ArtHum, Wrt.

**\*171. Mediterranean Bronze Age Archaeology** (4) I. Roller

Lecture—3 hours; extensive writing. Prerequisite: one of course 1, 2, 10, 15, Art History 1A, or Anthropology 3 recommended. Archaeological monuments of the ancient Near East, including Egypt and Mesopotamia, and of Greece and Crete during the Bronze Age. Special emphasis on the problems of state formation and on the co-existence and collapse of Bronze Age societies. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**\*174. Greek Religion and Society** (4) II. Roller

Lecture—3 hours; term paper. Prerequisite: a lower division Classics course, except Classics 3, 20, 30, or 31. Cults, festivals, and rituals of Greek religious practice and their relationship to Greek social and political institutions, and to Greek private life. Includes discussion of major sanctuaries at Olympia, Delphi, Athens, and others. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*175. Topography and Monuments of Ancient Athens** (4) III. Roller

Lecture/discussion—4 hours. Prerequisite: course 17A-17B or consent of instructor. The history of Athens as an urban center from the Bronze Age through the late Roman period. Student reports on major monuments with emphasis placed on restoration, chronology, and on the relating of documentary to excavation evidence. Offered in alternate years.

**190. Senior Seminar** (4) II. Schaeffer  
Seminar—3 hours; term paper. Prerequisite: completion of one upper division course in Latin, Greek or Hebrew or consent of instructor. Advanced interdisciplinary study of a problem in the ancient Mediterranean world using the techniques of history, archaeology, art history and philology. May be repeated for credit with consent of instructor. GE credit: ArtHum, Wrt.

**197TC. Community Tutoring in Classical Languages** (1-5) I, II, III. The Staff

Tutoring—1-5 hours. Prerequisite: consent of instructor. Supervised instruction of Greek or Latin in nearby schools by qualified students in department. May be repeated for credit up to 5 units. (P/NP grading only.)

**Graduate Courses**

**\*201. Introduction to Classical Philology** (4) I. Traill

Seminar—3 hours; term paper. Survey of major contemporary areas of classical scholarship with special attention devoted to current problems in literary and textual criticism.

**\*202. Homer** (4) II. Roller

Seminar—3 hours; term paper. Readings in the *Iliad* and *Odyssey*: the origins and transmission of the poems.

**\*203. Vergil** (4) I. Traill

Seminar—3 hours; term paper. Reading of selected books of the *Bucolics*, *Georgics*, and *Aeneid*. Emphasis will be placed on the study of Vergilean poetic language.

**\*204. Greek and Roman Comedy** (4) II. The Staff  
Seminar—3 hours; term paper. Historical and critical problems in Aristophanes or New Comedy. May be repeated for credit.

**\*205. Latin Lyric and Elegy** (4) III. Traill  
Seminar—3 hours; term paper. Critical examination of the works of Catullus, Horace, or Propertius. May be repeated for credit.

**\*206. Greek Historiography** (4) II.  
Seminar—3 hours; term paper. Development of historical writing in Greece. May be repeated for credit.

**\*207. Greek Drama** (4) II. The Staff  
Seminar—3 hours; term paper. Literary and philological analysis of the plays of Euripides, Sophocles, or Aeschylus. May be repeated for credit.

**299. Research** (1-12) I, II, III. The Staff  
Prerequisite: consent of instructor. (S/U grading only.)

**Courses in Greek (GRK)**

**Lower Division Courses**

**1. Elementary Greek** (5) I. Bulman, Traill  
Lecture—5 hours. Introduction to the basic grammar and vocabulary of Classical and New Testament Greek. Development of translation skills with emphasis on Greek-English. (Students who have successfully completed Greek 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)

**2. Elementary Greek** (5) II. Bulman  
Lecture—5 hours. Prerequisite: course 1. Continuation of course 1.

**2NT. Elementary New Testament Greek** (1) II. The Staff  
Lecture—1 hour. Prerequisite: course 2 (concurrently). Supplementary study of New Testament Greek.

**3. Intermediate Greek** (5) III. Traill  
Lecture—5 hours. Prerequisite: course 2. Continuation of course 2. Selected readings from Greek authors.

**3NT. Elementary New Testament Greek** (1) III. The Staff  
Lecture—1 hour. Prerequisite: course 3 (concurrently). Supplementary study of New Testament Greek.

**98. Directed Group Study** (1-5) I, II, III. The Staff (Program Director in Charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses**

**100. Attic Orators** (4) I. Albu  
Lecture—3 hours; term paper. Prerequisite: course 3. GE credit: ArtHum, Wrt.

**\*101. Plato** (4) I. Bulman  
Lecture—3 hours; term paper. Prerequisite: course 3. GE credit: ArtHum, Wrt.

**102. Euripides** (4) III. Roller  
Lecture—3 hours; term paper. Prerequisite: course 101. GE credit: ArtHum, Wrt.

**103A. Homer: Iliad** (4) II. Traill  
Recitation—3 hours; term paper. Prerequisite: course 3. GE credit: ArtHum, Wrt.

**\*103B. Homer: Odyssey** (4) III. Roller  
Recitation—3 hours; term paper. Prerequisite: course 3. GE credit: ArtHum, Wrt.

**\*104. Menander** (4) III. The Staff  
Lecture—3 hours; term paper. Prerequisite: course 3. GE credit: ArtHum, Wrt.

**\*105. Demosthenes** (4) III. The Staff  
Lecture—3 hours; term paper. Prerequisite: course 3. GE credit: ArtHum, Wrt.

**\*111. Sophocles** (4) II. Schein  
Lecture—3 hours; term paper. Prerequisite: course 103. GE credit: ArtHum, Wrt.

**\*112. Aristophanes** (4) III. The Staff  
Lecture—3 hours; term paper. Prerequisite: course 103. GE credit: ArtHum, Wrt.

**\*113. Thucydides** (4) III. Roller  
Lecture—3 hours; term paper. Prerequisite: course 103. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*114. Lyric Poetry** (4) III.  
Lecture—3 hours; term paper. Prerequisite: course 103. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*115. Aeschylus** (4) II. Schein  
Lecture—3 hours; term paper. Prerequisite: course 103. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*116. Herodotus** (4) II. Roller  
Lecture—3 hours; term paper. Prerequisite: course 103. Offered in alternate years. GE credit: ArtHum, Wrt.

**198. Directed Group Study** (1-5) I, II, III. The Staff (Program Director in charge) (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Program Director in charge) (P/NP grading only.)

**Courses in Latin (LAT)**

**Lower Division Courses**

**1. Elementary Latin** (5) I. The Staff  
Lecture—5 hours. Introduction to basic grammar and vocabulary and development of translation skills with emphasis on Latin to English. (Students who have successfully completed Latin 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)

**2. Elementary Latin** (5) II, III. The Staff  
Lecture—5 hours. Prerequisite: course 1. Continuation of course 1.

**\*2X. Intensive Latin** (10) III. The Staff  
Lecture—10 hours. Prerequisite: course 1. Intensive course that covers the ground of courses 2 and 3 in a single quarter. Those who have completed course 2 may receive only 5 units for course 2X.

**3. Intermediate Latin** (5) III. The Staff  
Lecture—5 hours. Prerequisite: course 2. Continuation of course 2. Selected readings from Latin authors.

**98. Directed Group Study** (1-5) I, II, III. The Staff (Program Director in charge) Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses**

**\*100. Ovid** (4) III. Traill  
Lecture—3 hours; paper. Prerequisite: course 3. Translation and discussion of selected readings from the works of Ovid. GE credit: ArtHum, Wrt.

**\*101. Livy** (4) II. Traill  
Lecture—3 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*102. Roman Comedy** (5) I. The Staff  
Lecture—4 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**103. Vergil: Aeneid** (4) II. Schein  
Lecture—3 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*104. Sallust** (4) II. The Staff  
Lecture—3 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*105. Catullus** (4) I. Allan  
Lecture—3 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**106. Horace: Odes and Epodes** (4) III. Albu  
Lecture—3 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*108. Horace: Satires and Epistles** (4) I. The Staff  
Lecture—3 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*109. Roman Elegy** (4) III. The Staff  
Lecture—3 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**110. Caesar** (4) I. Albu  
Lecture—3 hours; substantial paper. Prerequisite: course 3. Translation and discussion of selected readings from Caesar. Grammar review and introduction to Latin prose composition. Offered in alternate years. GE credit: ArtHum, Wrt.

**111. Silver Age Latin** (4) I. Albu  
Lecture—3 hours; term paper. Prerequisite: course 3. Selections from Tacitus, Pliny, Petronius, Juvenal, Martial, and other writers of the Silver Age. Offered in alternate years. GE credit: ArtHum, Wrt.

**112. Cicero: Political Writings** (4) II. Schaeffer  
Recitation—3 hours; term paper. Prerequisite: course 3. GE credit: ArtHum, Wrt.

**\*114. Cicero: Philosophical Works** (4) II. The Staff  
Lecture—3 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*115. Lucretius** (4) II. Schaeffer  
Lecture—3 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*116. Vergil: Eclogues and Georgics.** (4) II. Traill  
Lecture—3 hours; term paper. Prerequisite: course 3. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*121. Prose Composition** (5) I. Traill  
Lecture—4 hours; term paper.

**125. Medieval Latin** (4) III. Traill  
Lecture—3 hours; term paper. Prerequisite: course 3 and two upper division courses in Latin. Selected readings from the Vulgate and various medieval authors provide an introduction to the developments in the Latin Language and literature from the fourth to the fifteenth centuries. Offered in alternate years. GE credit: ArtHum, Wrt.

**198. Directed Group Study** (1-5) I, II, III. The Staff (Program Director in charge) (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Program Director in charge) (P/NP grading only.)

**The Major Program**

The major in communication focuses on the ways human beings produce and respond to verbal and nonverbal messages.

**The Program.** The program of study in communication examines communication processes at several different levels of analysis. Courses dealing with communication at the individual, interpersonal, organizational and societal levels of analysis are offered. Classes addressing such topics as communication and cognition, message systems, interpersonal communication, nonverbal communication, communication and persuasion, organizational communication, mass media effects and public communication campaigns explore communication at these levels of analysis. Related social science courses are also part of the major.

**Career Alternatives.** Communication graduates have found careers in such fields as broadcast and print journalism, administration, sales, management, politics and government, education, social work, and public relations. A communication degree is also excellent preparation for law school or other graduate programs.

**A.B. Major Requirements:**

|                                                                                                                                                                                                         |           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
|                                                                                                                                                                                                         | UNITS     |
| <b>Preparatory Subject Matter</b> .....                                                                                                                                                                 | <b>21</b> |
| Anthropology 4 or Linguistics 1 .....                                                                                                                                                                   | 4         |
| Communication 1 or 3 .....                                                                                                                                                                              | 4         |
| Psychology 1 .....                                                                                                                                                                                      | 4         |
| Sociology 1 .....                                                                                                                                                                                       | 5         |
| Statistics 13 .....                                                                                                                                                                                     | 4         |
| <b>Depth Subject Matter</b> .....                                                                                                                                                                       | <b>44</b> |
| Communication theory, Communication 114 .....                                                                                                                                                           | 4         |
| Message codes and research methods, Communication 115 and one of 103 or 105 or 135 .....                                                                                                                | 8         |
| Social interaction studies, Communication 134 and one of 130 or 136 .....                                                                                                                               | 8         |
| Mass communication processes and effects, Communication 141, and one of 143 or 145 or 152 .....                                                                                                         | 8         |
| Select four of the following additional courses with approval of faculty adviser (the four courses must be other than those chosen to fulfill the above requirements) .....                             | 16        |
| Communication 103, 105, 130, 135, 136, 138, 140, 142A, 142B, 143, 145, 152, 161, Anthropology 117, 120, Linguistics 163, 171, Political Science 164, 165, Psychology 132, Sociology 126, 128, 135, 148. |           |

**Graduate Study.** The Department of Communication offers programs of study and research leading to the M.A. degree in Communication. Detailed information may be obtained from the Graduate Adviser, Department of Communication.

**Graduate Adviser.** R. Bell.

**Subject A.** Students must have satisfied the Subject A requirement before taking any course in Communication.

## Courses in Communication (RCM)

(Formerly courses in Rhetoric and Communication.)

### Lower Division Courses

**1. Introduction to Public Speaking** (4) I, II, III. Williams

Lecture—1 hour; discussion—3 hours. Practice in the preparation and delivery of speeches based on contemporary principles and strategies of informing and persuading audiences. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously).

**3. Interpersonal Communication Competence** (4) I, II, III. Vohs

Lecture—2 hours; discussion—2 hours. Communication in interpersonal contexts. Sender, receiver, and message variables, and their interaction with communication competence. Participation in simulations and experiential exercises.

**\*90X. Lower Division Seminar** (1-4) I, II, III. The Staff (Chairperson in charge)

Seminar—1-4 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Communication through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May not be repeated for credit. Limited enrollment.

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

**103. Analysis of Message Systems** (4) I, II. Williams

Lecture—4 hours. Examination of elements of the communication process, including sources, messages, media, and receivers. Study of the role of these elements as they are influenced by various communicative situations. GE credit: SocSci.

**105. Semantic and Pragmatic Functions of Language** (4) II. Williams; III. Motley

Lecture—4 hours. Prerequisite: course 115. The role of language in shaping attitudes and perceptions of self and others. The use and abuse of verbal symbols in communicative situations. Concepts of meaning in discourse. GE credit: SocSci.

**114. Contemporary Theories of Human Communication** (4) I, III. Williams

Lecture/discussion—4 hours. Rhetoric as a social science, characteristics of social theories, components of theories, development and testing of hypothesis, general models, theories, and research. GE credit: SocSci.

**115. Empirical Methods in Communication** (4) I, II, III. Bell, Motley

Lecture—4 hours. Prerequisite: course 114 and Statistics 13 or the equivalent. Survey of social scientific research methods commonly employed in the communication discipline. Topics include research design, measurement, sampling, questionnaire construction, survey research, experimental research, content analysis, and interaction analysis. GE credit: SocSci.

**130. Group Communication Processes** (4) I. Vohs

Lecture—4 hours. Examination of current theories of group formation, goals, structure, and leadership, as they relate to communication processes. GE credit: SocSci.

**134. Interpersonal Communication** (4) I. Berger; III. Motley

Lecture—4 hours. Prerequisite: course 1 or 3, or 10 or the equivalent. Communication between two individuals in social and task settings. One-to-one communication, verbal and nonverbal, in developing relationships. Consideration of theory and research on relevant variables such as shyness, self-disclosure, reciprocity, games, and conflict. GE credit: SocSci.

**135. Nonverbal Communication** (4) II. Berger  
Lecture—4 hours. Examination of the interaction between nonverbal communication and verbal communication channels in influencing outcomes in interpersonal and mass mediated communication contexts. Underlying functions served by nonverbal communication will also be considered. GE credit: SocSci, Div.

**136. Organizational Communication** (4) II. Vohs  
Lecture—4 hours. Examines communication in various organizational situations. Focuses on the use of effective communication strategies for achieving organizational and individual goals. Emphasis is placed on identifying and amending ineffective communication within organizations. GE credit: SocSci.

**138. Communication and Cognition** (4) I. Berger

Seminar—4 hours. Prerequisite: upper division standing. Relationships between communication and cognition. Models of discourse comprehension and production, the influence of language attitudes on social judgments, and the effects of information processing on decision making are explored. Offered in alternate years. GE credit: SocSci.

**140. Mass Communication and the Public** (4) I, III. Theobald

Lecture—4 hours. Current issues in mass communications policy, with emphasis on the broadcast media. Examination of the economic and legal influences on media performance; the role of public broadcasting; the social impact of technological advances, including cable television and communication satellites. GE credit: SocSci.

**141. Mass Communication Theory and Research** (4) I, II, III. Theobald

Lecture—4 hours. Prerequisite: course 115, or the equivalent course in social science research methods. Recent developments in the study of mass communications content and effects, with emphasis on the broadcast media. Special attention to the function of television for selected audiences: children, minorities, the aged. GE credit: SocSci.

**\*142A. News Policies and Practices in Television** (2) II. The Staff (Chairperson in charge)  
Lecture—2 hours. Prerequisite: course 140 or 141, or consent of instructor. Processes and constraints in gathering, editing and reporting the news in the broadcast media, as examined by a practicing professional.

**\*142B. News Policies and Practices in the Press** (2)

Lecture—2 hours. Prerequisite: course 140 or 141, or consent of instructor. Processes and constraints in gathering, editing, and reporting the news in the print media, as examined by a practicing professional.

**143. Media Criticism: Broadcast** (4) I, II. Theobald

Lecture—1 hour; discussion—3 hours; one or two major writing assignments. Analysis, interpretation and evaluation of broadcast media content, employing various critical frameworks including genre studies, mythological and dramaturgical criticism, linguistic analysis, iconographic criticism, and theories of popular culture. GE credit: SocSci.

**145. Mass Communication and Social Change** (4) III. Alcalay

Lecture—4 hours. Prerequisite: course 115 or the equivalent. Study of communication campaigns as a way to effect social change. Effect on people's behaviors which occur via mass media and interpersonal communication channels. Focus on theory and practice of campaigns in such areas as health, intercultural and international communication. GE credit: SocSci.

**152. Theories of Persuasion** (4) I, II. Bell  
Lecture—4 hours. Prerequisite: course 115. Survey of communication and social psychological theories of persuasion. Examination of influence tactics and message design. Contexts of application include product advertising, propaganda campaigns, and health promotion. GE credit: SocSci.

**161. Cultural Perspectives on Health Communication** (4) III. Alcalay

Lecture—4 hours. Prerequisite: upper division standing. Study of various cultures through health communication campaigns and representative media and cultural products (e.g., literary artifacts, films). Exploration of health promotion campaigns as manifestations of cultural values and beliefs about sexuality, human relations, religion, morality, illness, and health.

**\*180. Current Topics in Communication** (4) II, III. The Staff

Seminar—4 hours. Prerequisite: upper division standing with a major in Communication or consent of instructor. Groups study of a special topic in communication. May be repeated once for credit. Enrollment limited.

**\*190X. Upper Division Seminar** (1-4) I, II, III. The Staff (Chairperson in charge)

Seminar—1-4 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Communication. Emphasis upon student participation in learning. May not be repeated for credit. Limited enrollment.

**192. Internship in Communication** (1-6) I, II, III. The Staff

Internship—3-18 hours. Prerequisite: declared major in Communication and 20 units of upper division Communication courses. Work-research projects, usually at off-campus sites, under departmental supervision. May be repeated for credit up to 12 units. Units do not count toward major requirements. (P/NP grading only.)

**\*194H. Senior Honors Thesis** (4) I, II, III. The Staff (Chairperson in charge)

Seminar—1 hour; individual tutoring on research project—3 hours. Prerequisite: senior standing and approval by Honors Committee. Directed reading, research, and writing culminating in the preparation of honors thesis under direction of faculty adviser.

**197T. Tutoring in Communication** (2-4) I, II, III. The Staff (Chairperson in charge)

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing with major in Communication and consent of Department Chairperson. Tutoring in undergraduate Communication courses, including leadership of discussion groups affiliated with departmental courses. May be repeated for credit up to a total of six units. (P/NP grading only.)

**\*198. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
(P/NP grading only.)

### Graduate Courses

Seniors may take graduate courses with consent of instructor.

**\*213. Theory Development in Communication Inquiry** (4) I. Berger

Seminar—4 hours. This course explores meta-theoretical approaches to developing social-scientific theories of human communication. Perspectives include covering-laws, systems, rules, axiomatic theory construction, causal modeling, scientific realism and grounded theory. Research design and measurement implications of these perspectives are examined.

**\*214. Mass Communication Theory and Research** (4) I. Alcalay

Seminar—4 hours. Prerequisite: course 220 or the equivalent. Examines the basic theories, models, and assumptions of mass communication. Reviews the current state of this discipline and major research developments. Special emphasis on research regard-

ing media and violence, women and minorities, political communication, and new technologies.

**\*215. Mass Communication and Social Change** (4) I. Alcalay

Seminar—4 hours. Prerequisite: courses 220 and 214, or the equivalent. To gain an understanding of current theories and concepts in persuasion and mass communication. To explore how principles of persuasion are used in communication campaigns. To acquire skills in the planning, implementation, and evaluation of campaigns. Offered in alternate years.

**\*220. Empirical Methods in Communication** (4) I. Motley

Lecture—4 hours. Prerequisite: course 115 or consent of instructor. Introduction to the use of experimental and descriptive research methods in communication research. Topics include survey research, interviewing, experimental and quasi-experimental design, and statistics.

**\*240. Advocacy in Contemporary Society** (4) III. The Staff

Seminar—4 hours. Prerequisite: course 151 or the equivalent. Rhetorical and communication theories of argumentation and advocative stance. Analysis of the persuasive impact of argumentation occurring in current public controversies. Offered in alternate years.

**\*242. Proseminar in Symbolic Behavior** (4) I. Motley

Seminar—4 hours. Prerequisite: course 220. Examination of language and/or other symbolic codes in communication. Investigated phenomena may include stylistic variation, speech arts, cognitive processing, communication rules, and audience effects. Offered in alternate years.

**\*243. Persuasion Theory** (4) I. Bell

Lecture/seminar—4 hours. Prerequisite: course 152 or consent of instructor. Major scientific theories of persuasion. Research programs related to persuasion theories.

**\*244. Organizational Communication** (4) III. Vohs

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Theory and research on communication processes in organizations.

**\*246. Perspectives on Relational Communication** (4) II. The Staff

Seminar—4 hours. Prerequisite: course 212. Critical survey of the current state of inquiry on communication in personal relationships, i.e., friendship, romantic, and marital relationships. Issues examined include the role of communication in constructing, maintaining, and dissolving relationships.

**\*248. Media Criticism** (4)

Seminar—4 hours. Prerequisite: a course in criticism. Examines broadcast, print, and visual media by means of rhetorical, psychological, semiological, sociological, and cultural studies and perspectives. Comparison of media and of critical theory scope in understanding media messages. Offered in alternate years.

**\*249. Interpersonal Communication Theory** (4) I. Bell

Lecture/seminar—4 hours. Prerequisite: course 134 or consent of instructor. Major theories of interpersonal communication and related research.

**\*251. Special Topics in Interpersonal Communication** (4) III. Berger

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Selected topics in interpersonal communication. May be repeated for credit when topic differs.

**\*252. Special Topics in Mass Communication** (4) III. Alcalay

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Selected topics in mass communication theory and research. May be repeated for credit when topic differs.

**\*253. Negotiation** (4) Vohs

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Theory and research on negotiating. Offered in alternate years.

**\*260. Communication Applications** (2-4) I, II, III. The Staff (Chairperson in charge)

Discussion—1 hour; supervised field work—3-9 hours. Prerequisite: course 220. Fieldwork in communication. Organization and implementation of a research project for a specific application of a communication program. May be repeated once for credit. (S/U grading only.)

**\*298. Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

Lecture—3 hours.

**\*299. Individual Study** (1-12) I, II, III. The Staff (Chairperson in charge)

(S/U grading only.)

**\*299R. Thesis Research** (1-12) I, II, III. The Staff (Chairperson in charge)

Independent study—3-36 hours. Prerequisite: graduate standing in Communication. (S/U grading only.)

**Professional Course**

**396. Teaching Assistant Training Practicum**

(1-4) I, II, III. The Staff (Chairperson in charge) Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

**Community Health**

See **Epidemiology and Preventive Medicine; and Family and Community Medicine, under Medicine, School of**

**Community and Regional Development**

(College of Agricultural and Environmental Sciences) **Faculty.** See the Department of Human and Community Development.

**The Major Program**

The Community and Regional Development major (formerly Applied Behavioral Sciences) is concerned with the study of communities and the people in them. The program focuses on community and organizational development, the role of culture and ethnicity in shaping community life, and the ways that knowledge can be used to solve social problems and improve the quality of life.

**The Program.** Principal subjects of study within the major are community and organizational development, social change processes, the role of culture and ethnicity in shaping community life, community research methodologies, the impacts of innovation and technology on community development, and the effects of social, economic and political systems on communities. In addition, the major includes a student-designed field of concentration to complement the student's academic and career interests. Examples of recently approved areas of concentration are organizational planning and management, aging and community development, health care in ethnic communities, community design and planning, socio-environmental planning, and community education.

**Internships and Career Alternatives.** Community and Regional Development students are required to complete an internship in their field before graduation. Internships have been arranged with local, county, and state planning units, health departments, schools, housing offices, and community education programs. Community and Regional Development graduates are prepared for occupations in community development, social research, program evaluation, organizational and educational consulting, city and

regional planning, and community health. The major also provides effective preparation for graduate or professional study in the social and behavioral sciences.

**B.S. Major Requirements:**

|                                                                                                                                                                                                                                                                                                 |              |

*Counseling* (Communication 134, 135, Education 160, 163, Human Development 121, 130, Psychology 143, 145, 168)

*Youth* (American Studies 152, Human Development 100A, 100B, 101, 102, 103, 130, 131, 140, 140L, 141, 142, 151, Psychology 112, Sociology 122, 152)

*The Family* (Human Development 110, 131, 135, Sociology 134, 135)

*Education* (Community and Regional Development 173, 175, Agricultural Education 100, 160, 163, Education 100, 110, 114, 120, Psychology 136, Sociology 124)

*Bilingual Education* (Education 151, 152, 153, Psychology 132)

**Unrestricted Electives .....39-50**  
**Total Units for the Degree .....180**

**Major Adviser.** M. Kenney

**Advising Center** for the major is located in 1303 Hart Hall (530) 752-2244.

**Minor Program Requirements:**

The Community and Regional Development faculty offers the following minor program:

UNITS

**Community Development .....24**  
 Community and Regional Development 1, 151, 152, 164 .....16

Two courses selected from the following:  
 Community and Regional Development 140, 157, 158, 162, 168, 171, 172, 173, 175, 176 .....8

**Minor Adviser.** M. Kenney.

**Graduate Study.** Refer to the Graduate Studies chapter of this catalog.

**Related Courses.** See Environmental Science and Policy 10, 101, 133.

**Courses in Community and Regional Development (CRD)**

(Formerly courses in Applied Behavioral Sciences.)

**Lower Division Courses**

**1. The Community** (4) I. Tarallo; III. The Staff  
 Lecture—4 hours. Basic concepts of community analysis and planned social change. The dynamics of community change through case studies of communities including peasant, urban ghetto, suburban mainline, and California farm workers. GE credit: SocSci, Div, Wrt.

**2. Ethnicity and American Communities** (4) II. Guarnizo; III. The Staff  
 Lecture—3 hours; discussion—1 hour. Historical and cultural survey of the role of various ethnic groups in the development of American communities. Examines ethnicity as a cultural factor, ethnicity as power and issues related to selected American ethnic groups. GE credit: SocSci, Div, Wrt.

**\*17. Population and Community** (2) I. The Staff  
 Lecture—2 hours. Dynamics and challenges offered by demographic changes in California and the world community. Implications for individuals and communities. Special emphasis on the possible contributions each individual can make towards resolving global problems related to human ecology through local community action. (P/NP grading only.)

**47. Orientation to Community Resources** (2) II. Fujimoto; III. The Staff  
 Field work—40 hours (4-day field trip); seminar—three 2-hour sessions. (Course given between quarters.) Intensive field course in either San Francisco or the California Central Valley. Students interact with agencies and individuals who address the range of human service, educational and social needs in the city. Advance reservations required. (P/NP grading only.)

**92. Internship** (1-12) I, II, III. The Staff (Chairperson in charge)  
 Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)

**98. Directed Group Study for Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
 Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
 (P/NP grading only.)

**Upper Division Courses**

**118. Technology and Society** (4) I. Kenney  
 Lecture—3 hours; discussion—1 hour. Prerequisite: course 18 or consent of instructor. Impact of technol-

ogy on labor relations, employment, industrial development and international relations. The internal relations of technology development and deployment. GE credit: SocSci, Wrt.

**140. Dynamics of Regional Development** (4) II. Kenney

Lecture—4 hours. Prerequisite: one undergraduate social science course or consent of instructor. Political economy of domestic regional development. Technology, labor relations and interfirm linkages. California and other regions as case studies. GE credit: SocSci, Wrt.

**141. Organization of Economic Space** (4) II. Momsen

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. The globalization of economic activity focusing on new spatial patterns of production and circulation and their implications for particular countries and regions.

**142. Rural Change in the Industrialized World** (4) III. Momsen

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Geography of rural environment with special emphasis on rural restructuring. The regional focus is on the developed world and comparisons are drawn between Europe (Eastern and Western) and North America.

**151. Community Field Research: Theory and Analysis** (3) II. The Staff; III. Smith

Lecture—3 hours. Prerequisite: course 151L must be taken concurrently; course 1 and any upper division Community and Regional Development course are recommended. Design and analysis of research at the community level with a focus on the relationship between practice and theory. Focus will be on conducting community research using structural analysis, elite interviewing, ethnographic research, and other such research methods. GE credit: SocSci, Div, Wrt.

**151L. Laboratory in Community Research and Analysis: Field Experience** (1-3) II. The Staff; III. Smith

Fieldwork—3-9 hours. Prerequisite: course 151 concurrently. Field research focused on community or organizational issues and their resolution. Includes assignment with local agencies or community-based organizations. The focus will be conducting community research using such methods as structural analysis, elite interviewing, ethnographic research, and comparative community studies.

**152. Community Development** (4) III. Bradshaw  
 Lecture—4 hours. Prerequisite: course 1 or 151, Sociology 2, Anthropology 2, Asian American Studies 100, Chicano Studies 132, Geography 5, or African American Studies 101. Introduction to principles and strategies of community organizing and development. Examination of different citizen participation movements and the role of change agents in the development process. Students work in teams and conduct fieldwork in local communities. GE credit: SocSci, Wrt.

**\*153. International Community Development** (4) III. Fujimoto

Lecture—4 hours. Prerequisite: course 1, Anthropology 2, International Agricultural Development 10. Examination of community development efforts worldwide. Analysis of impact of global forces on community development in different settings. Alternative strategies with emphasis on self-reliance and locally controlled development.

**154. Social Theory and Community Change** (4) II. Hirtz

Lecture—4 hours. Prerequisite: course 1, Sociology 1, or Anthropology 2. A comparative overview of the dominant social science paradigms for the study of community development and change. Among the paradigms discussed are functionalism, conflict theory/Marxism, structuralism, and methodological individualism. GE credit: SocSci, Div, Wrt.

**156. Community Economic Development** (4) III. Bradshaw

Lecture—4 hours. Prerequisite: course 1 or a lower division course in Sociology, Political Science, or Economics; course 152 recommended. How government and community organizations help firms grow and

create jobs through local economic development corporations, small business centers, revolving loan funds, incubators, and many other programs. Techniques to analyze community economic potential and identification of appropriate intervention tools.

**157. Politics and Community Development (4) II.** Smith

Lecture—4 hours. Prerequisite: prior course work in sociology or political science recommended. Analyzes political, economic and sociocultural forces shaping the form and function of local communities in the U.S. Considers theories of the state, the community and social change and case studies of actual community development in comparative historical perspective. GE credit: SocSci, Div, Wrt.

**\*158. Small Community Governance (4) II.** Sokolow

Lecture/discussion—3 hours; fieldwork—3 hours. Prerequisite: course 151 or 160 or Political Science 100. Governing institutions and political processes in rural and small urban places. Local government organization, community autonomy, leadership, political change, policy development, and select policy issues including public finance. Field research on political processes or policy issues in select communities. Offered in alternate years.

**160. Research Design and Method in Community Studies (4) I.** Goldman

Lecture—4 hours. Prerequisite: course 1; Statistics 13 or the equivalent. Application of behavioral science research methodology to multidisciplinary problems confronting communities and community organizations. Focuses on design, sampling, measurement and analysis.

**161. Ethnographic Research in America (4) III.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of 8 units of course work in Anthropology, Sociology, or Community and Regional Development. Methodologies, ethics and goals of qualitative research. Emphasis on analyzing and conducting ethnographic research in American communities; problem formulation, analytic modes, data correction and interpretation. Offered in alternate years.

**162. People, Work and Technology (4) I.** Wells  
Lecture—4 hours. Prerequisite: course work in the social sciences (e.g., Sociology 1, 3, Anthropology 137, Economics 1A, 1B) or labor history. Relationship between work, technology, and people's lives. Such topics as industrialization, bureaucratization, automation, the structure of work-linked communities, education and the labor market, work and the economic system and the future of work.

**\*163. Behavior of Community Organizations (4) I.** The Staff

Lecture—4 hours. Prerequisite: introductory social sciences course. How community organizations function and how members of organizations interact with each other, the organization, and those people who are clients of the organization. Effects of leadership, motivation, group dynamics, communications, and power.

**164. Theories in Organizational Change (4) II.** The Staff

Lecture—4 hours. Prerequisite: course 1 or 2. Development of approaches to planned change including normative re-educative, applied systems, and developmental strategies.

**168. Program Evaluation and the Management of Organizations (4) III.** Goldman  
Lecture—4 hours. Prerequisite: courses 160, 161. Role of program evaluation in organizational and program management. Impact of internal evaluation in program planning, improvement, and accountability.

**171. Housing and Social Policy (4) II.** The Staff  
Lecture—4 hours. Social impact, economics, and politics of housing in the United States. Special attention given to alternative policy strategies at the national and local levels.

**172. Social Inequality: Issues and Innovations (4) III.** Wells  
Lecture—4 hours. Prerequisite: upper division standing; 8 units of sociology or anthropology or combina-

tion. Study of the phenomenon of inequality in the U.S. Various approaches to inequality examined, including structural and historical explanations, prejudice and discrimination, the "culture of poverty," and arguments concerning race, sex, and genetic potential.

**173. The Continuing Learner (4) I.** The Staff  
Lecture—4 hours. Prerequisite: upper division standing. Theories of adult learning and teaching emphasizing the role of adult education in the community. Designing of adult education programs.

**\*174. Communication for Community Change (4) I.** The Staff  
Lecture—4 hours. Prerequisite: course 1. Communication as a mechanism and method for creating change in communities. Theories and practices; impact of message on attitudes and behavior; ethics of change induced through communication. Offered in alternate years.

**\*175. Education in the Community (4) I.** The Staff  
Lecture—4 hours. Prerequisite: upper division standing and course work in the social sciences; course 1 or Sociology 1 recommended. Function of education in the community. Relationships of community and non-formal education to formal education, schooling and to individual, community and national development. Planning process and role of education in social and community change. Offered in alternate years.

**176. Comparative Ethnicity (4) I.** Guarnizo  
Lecture—4 hours. Prerequisite: upper division standing, 8 units of sociology or anthropology or combination. Exploration of the role of ethnicity in shaping social systems and interaction. Examination of analytical approaches to and issues arising from the study of ethnicity, through utilization of data from a range of different societies. GE credit: SocSci, Div, Wrt.

**\*190. Current Issues in Applied Behavioral Sciences (1) I, II, III.** The Staff  
Seminar—1 hour. Current social, political, and economic issues affecting communities and individuals. One-hour presentations by guest speakers on research topics and contemporary issues in Community Development. (P/NP grading only.)

**192. Internship (1-12) I, II, III.** The Staff (Chairperson in charge)  
Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)

**198. Directed Group Study (1-5) I, II, III.** The Staff (Chairperson in charge)  
(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5) I, II, III.** The Staff (Chairperson in charge)  
(P/NP grading only.)

**Graduate Courses**

**240. Community Development Theory (4) I.** Bradshaw  
Lecture/discussion—4 hours. Introduction to theories of community development and different concepts of community, poverty, and development. Emphasis on building theory, linking applied development techniques to theory, evaluating development policy, and examining case studies of community development organizations and projects.

**241. The Economics of Community Development (4) II.** Kenney  
Lecture—4 hours. Prerequisite: course 240. Economic theories and methods of planning for communities. Human resources, community services and infrastructure, industrialization and technological change, and regional growth. The community's role in the greater economy.

**242. Community Development: Program Management (4) III.** Hirtz  
Seminar—4 hours. Prerequisite: course 241. Planning, organization, financing and administration of social change projects or programs at the community or city level.

**\*244. The Political Economy of Domestic Development (4) III.** Kenney  
Lecture—4 hours. Prerequisite: course 241. Examination of the politics and institutions affecting the economic growth of regions. Theories of development and change are examined with specific reference to case study material.

**\*245. The Political Economy of Urban and Regional Development (4) II.** Smith  
Lecture—4 hours. Prerequisite: course 157, 244, or the equivalent. How global politics and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California.

**246. The Political Economy of Transnational Migration (4) II.** Guarnizo  
Lecture—4 hours. Prerequisite: graduate standing. Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy.

**247. Transformation of Work (4) I.** Wells  
Lecture/discussion—4 hours. Prerequisite: graduate standing in history or social science degree program or consent of instructor. Exploration of the ways that the experience, organization, and systems of work are being reconfigured in the late twentieth century. The impacts of economic restructuring on local communities and workers.

**290. Seminar (1) I.** Wright and staff; II, III. Wright  
Seminar—1 hour. Analysis of research in applied behavioral sciences. (S/U grading only.)

**292. Graduate Internship (1-12) I, II, III.** Staff  
Internship—3-36 hours. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. (S/U grading only.)

**298. Group Study (1-5) II.** Guarnizo

**299. Research (1-12) I, II, III.** The Staff (Chairperson in charge)  
(S/U grading only.)

**Professional Course**

**440. Professional Skills for Community Development (4) III.** The Staff  
Seminar—4 hours. Prerequisite: course 240. The intersection of theory and case studies to develop practical skills needed to work as a professional community developer, program administrator, and/or policy consultant.

---

## Community Development (A Graduate Group)

Michael P. Smith, Ph.D., Chairperson of the Group  
Group Office, 1303 Hart Hall (Human and Community Development; 530-752-1926)

**Faculty.** The interdisciplinary faculty includes a core group of faculty from the Community and Regional Development unit of Human and Community Development, as well as a broad group of faculty from Agricultural and Resource Economics, American Studies, Communication, Environmental Science and Policy, Environmental Design/Landscape Architecture, the Graduate School of Management, Political Science, and Sociology. The graduate faculty also includes members from the campus Ethnic Studies programs, Education, Environmental Horticulture, Psychology, Statistics, Textiles and Clothing, Vegetable Crops, and from University Extension.

**Graduate Study.** The Graduate Group in Community Development offers a multidisciplinary program of study which leads to the M.S. degree. The program prepares students for professional roles as administrators, designers, planners, or researchers, with emphasis upon urban and rural communities and human service organizations. Graduate study in community development also prepares individuals to work within government or non-profit organizations in the realm of social and economic change. Students have the opportunity to specialize in (1) urban and rural development, (2) community economic development, (3) community design and planning, (4) ethnic and cultural diversity, (5) gender and community development, (6) community health and human services, and (7) environmental planning.

**Preparation.** Applicants to this program can prepare themselves by enrolling for upper division courses in the social or behavioral sciences, e.g., anthropology, economics, sociology, psychology, cultural geography, or political science, and courses in community studies.

**Graduate Advisers.** Contact the Group Office.

## Community Nutrition

(College of Agricultural and Environmental Sciences)

### The Major Program

Community nutrition teaches students the identification of nutrition-related health problems and the biological, behavioral, economic, and sociocultural factors that influence the nutrition of individuals and groups. The aim of community nutrition is to apply this knowledge to the development of programs that improve the nutritional status in the community.

**The Program.** The community nutrition major is for students who seek to combine a foundation in the biological and nutritional sciences with study in the social sciences. All students in the major are required to complete a common core of preparatory and depth subject matter courses. Students select one of three subject matter options emphasizing sociocultural, psychological, or economic aspects of food, diet, and nutrition, and an additional area of concentration in consultation with the adviser.

**Career Alternatives.** The community nutrition major prepares students for jobs in administrative, teaching, research, or public health/public service positions or for graduate or professional training in nutrition and other health sciences. Students who complete the academic requirements for an internship in dietetics are also qualified for careers in dietetics, following completion of an internship.

### B.S. Major Requirements:

(For convenience in program planning, the *usual* courses taken to satisfy the requirements are shown in parentheses. Equal or more comprehensive courses are acceptable. *Courses shown without parentheses are required.*)

Brenda Schildgen, Ph.D., Lecturer

Robert M. Torrance, Ph.D., Professor

### Emeriti Faculty

Ruby Cohn, Ph.D., Professor Emerita

Roland W. Hoermann, Ph.D., Professor Emeritus

### The Major Program

Comparative literature encourages students to read, think about, and compare books from different national languages and from different parts of the world. Comparative literature enlarges students' horizons by bridging the divisions between national cultures instead of concentrating on a single tradition.

**The Program.** Both the major and minor programs in comparative literature allow students to combine courses in one or more national literature departments with courses in comparative literature. The introductory course sequence, "Great Books of Western Culture" and "Major Books of the Contemporary World," provides both an overview of European literary culture

from ancient times to the present and intensive practice in analytical thought and English composition. All readings in undergraduate comparative literature courses are in English, but majors take upper division courses in at least one foreign literature in the original language.

**Career Alternatives.** Careers directly related to comparative literature include teaching, journalism, publishing, and translating. Because many professional schools consider a literature major an excellent background for their graduate disciplines, comparative literature provides valuable preparation (supplemented with courses outside the major) for careers in business, government, medicine, or law.

## A.B. Major Requirements:

|                                                                                                                                                                                                                                                   | UNITS        |

| <b>Preparatory Subject Matter</b> .....                                                                                                                                                                                                           | <b>15-46</b> |
| Comparative Literature 1, 2, 3.....                                                                                                                                                                                                               | 12           |
| One lower division course other than Comparative Literature 1, 2, 3, and 10A-N.....                                                                                                                                                               | 3-4          |
| Foreign language: sufficient preparation to insure satisfactory performance at the upper division level.....                                                                                                                                      | 0-30         |
| <b>Depth Subject Matter</b> .....                                                                                                                                                                                                                 | <b>40</b>    |
| Five upper division courses (including at least three in a language other than English) distributed between the first and second literatures of concentration with the approval of the adviser.....                                               | 20           |
| Comparative Literature 141.....                                                                                                                                                                                                                   | 4            |
| Two additional upper division Comparative Literature courses, including at least one in a major literary period (such as 164A, 161B, 161C, 161D), genre (such as 160A-160B, 161A-161B, or 166A-161B), or movement (such as 168A-168B or 169)..... | 8            |
| Two additional upper division courses in one or both literatures of concentration or in Comparative Literature, selected with the approval of the adviser.....                                                                                    | 8            |
| <b>Total Units for the Major</b> .....                                                                                                                                                                                                            | <b>55-82</b> |

### Recommended

Anthropology 2; Classics 10; English 171A, 171B; French 114; History 4A-4B-4C, 101; Linguistics 1, 4, 163; Philosophy 24, 123; Religious Studies 2.

**Major Adviser.** The Staff.

## Minor Program Requirements:

The minor in Comparative Literature allows students to combine courses in Comparative Literature with courses in one or two national literatures, including English and foreign literatures in translation. There is no foreign language requirement for the minor.

|                                                                                                                                  | UNITS     |
|----------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Comparative Literature</b> .....                                                                                              | <b>24</b> |
| Comparative Literature 1, 2, 3, or 4.....                                                                                        | 4         |
| At least two upper division Comparative Literature courses (Comparative Literature 141 strongly recommended).....                | 8         |
| Three additional upper division courses in one or two national literatures (including English) or in Comparative Literature..... | 12        |
| Courses should form a coherent program and should be chosen in consultation with, and with the approval of, the adviser.         |           |

**Minor Adviser.** Same as Major Adviser.

**Advising.** All Comparative Literature majors and minors must consult with their adviser, individually, at least once at the beginning and once at the end of each academic year.

**Honors Program.** Candidates for high or highest honors in Comparative Literature must write a senior thesis under the direction of a faculty member approved by the Program Director. For this purpose, *in addition* to fulfilling all other major requirements, honors candidates must enroll in 6 units of Comparative Literature 194H during the first two quarters of the senior year. Only students who have attained a cumulative GPA of 3.5 in all courses satisfying the major (except elementary foreign language courses) at the

end of the junior year will be eligible for the honors program.

**Teaching Credential Subject Representative.** The Staff. See also the Teacher Education Program.

**Graduate Study.** Refer to Comparative Literature (A Graduate Group). See also the Graduate Studies chapter of this catalog.

## Courses in Comparative Literature (COM)

### Lower Division Courses

**1. Great Books of Western Culture: The Ancient World** (4) I, II, III. Director in Charge  
Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. An introduction, through class discussion and frequent written assignments, to some of the great books of western civilization from *The Epic of Gilgamesh* to St. Augustine's *Confessions*. GE credit: ArtHum, Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously).

**2. Great Books of Western Culture: From the Middle Ages to the Enlightenment** (4) I, II, III.  
Director in charge  
Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. An introduction, through class discussion and frequent written assignments, to some of the great books of western civilization from Dante's *Inferno* to Swift's *Gulliver's Travels*. GE credit: ArtHum, Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously).

**3. Great Books of Western Culture: The Modern Crisis** (4) I, II, III. Director in charge  
Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. An introduction, through class discussion and frequent written assignments, to some of the great books of western civilization from Goethe's *Faust* to Beckett's *Waiting for Godot*. GE credit: ArtHum, Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously).

**4. Major Books of the Contemporary World** (4) I, II, III. The Staff  
Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. Comparative study of selected major Western and non-Western texts composed in the period from 1945 to the present. Intensive focus on writing about these texts, with frequent papers written about these works. GE credit: ArtHum, Div, Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously).

**5. Fairy Tales, Fables, and Parables** (4) I, II, III. Reed, Schildgen and staff  
Lecture—3 hours; discussion—1 hour. An introduction to fairy tales, fables, and parables as recurrent forms in literature, with such readings as tales from Aesop and Grimm, Chaucer and Shakespeare, Kafka and Borges, Buddhist and Taoist parables, the Arabian Nights, and African American folklore. GE credit: ArtHum, Div, Wrt.

**6. Myths and Legends** (4) I. McLean  
Lecture—3 hours; discussion—1 hour. Introduction to the comparative study of myths and legends, excluding those of Greece and Rome, with readings from Near Eastern, Teutonic, Celtic, Indian, Japanese, Chinese, African and Central American literary sources. GE credit: ArtHum, Div, Wrt.

**7. Literature of Fantasy and the Supernatural** (4) II, III. Reed, Allosso  
Lecture—3 hours; discussion—1 hour. The role of fantasy and the supernatural in literature: tales of magic, hallucination, ghosts, and metamorphosis, including diverse authors such as Shakespeare, P'u Sung-Ling, Kafka, Kawabata, Fuentes, and Morrison. GE credit: ArtHum, Div, Wrt.

**8. Utopias and their Transformations** (4) I. Schein  
Lecture/discussion—3 hours; term paper. Prerequisite: English A. A consideration, in literary works from

different ages, of visionary and rational perceptions of a lost paradise, Golden Age, or Atlantis—and of the inhuman nightmares that can result from perversions of the utopian dream of perfection. GE credit: ArtHum, Wrt.

**9. The Short Story and Novella** (4) III. Bulman  
Lecture/discussion—3 hours; term paper. An introduction to shorter forms of prose fiction by major authors of different countries, with special emphasis on the modern period. GE credit: ArtHum, Div, Wrt.

**10A-N. Master Authors in World Literature** (2) I, II, III. The Staff (Director in charge)  
Lecture/discussion—1 two-hour session. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: **(A)** *Gilgamesh*, *Ramayana*, *Beowulf*, *Nibelungenlied*; **(B)** *Metamorphoses*, *Decameron*, *Arabian Nights*, *Canterbury Tales*; **(C)** *Chanson de Roland*, *El Cid*, *Igor's Campaign*, *Morte D'Arthur*; **(D)** *Sakuntala*, *Tristan and Isolde*, *Aucassin and Nicolette*, *Gawain and the Green Knight*; **(E)** Swift, Rabelais, *La Celestina*, *Simplicissimus*; **(F)** Cervantes, Saikaku, Fielding, Voltaire; **(G)** Machiavelli, Shakespeare, Lope de Vega, Calderón, Molière/Racine, Lessing/Schiller; **(H)** Goethe, Byron, Stendhal, Pushkin, Lermontov; **(I)** Hoffmann, Gogol, Poe, Hawthorne, Maupassant, Chekhov, Melville; **(J)** Flaubert, Twain, Turgenyev, Galdós, Ibsen; **(K)** Balzac, Dostoevski/Tolstol, Hardy, Shaw, Strindberg; **(L)** Unamuno, Svevo, Conrad, Gide, Kafka, Faulkner; **(M)** Rilke/Yeats, Joyce/Woolf, Mann/Céline, Bulgakov/Tanizaki, O'Neill/Brecht, Lorca/Pirandello; **(N)** Camus/Sartre, García Márquez/Grass, Borges/Sarraute, Bellow/Nabokov, Beckett/Pinter, Genet/ Dürrenmatt. May be repeated for credit in different subject area. Limited enrollment. (P/NP grading only.)

**\*12. Introduction to Women Writers** (4) The Staff  
Lecture/discussion—3 hours; term paper. Prerequisite: completion of Subject A requirement. Survey of fiction, drama, and poetry by women writers from all continents. Concerns of women compared in light of their varied social and cultural traditions. Students will practice literary analysis of voice, imagery, narrative strategies and diction. GE credit: ArtHum, Div, Wrt.

**\*13. Dramatic Literature** (3) III. The Staff  
Lecture—3 hours. Prerequisite: Subject A or the equivalent. Introduction, through careful reading of selected plays, to some of the major forms of Western drama, from the earliest tragedies of ancient Greece to the contemporary American theater. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*14. Introduction to Poetry** (3) III. The Staff  
Lecture/discussion—3 hours. Prerequisite: completion of Subject A requirement. Comparative study of poetry in a variety of lyric and other poetic forms from different historical periods and different linguistic, national, and cultural traditions. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*15. The Spiritual Quest** (3) I. The Staff  
Lecture/discussion—3 hours. An exploration of the unending search to discover—or to create—a transcendent meaning and purpose in human life, as reflected in such works as the *Bhagavad Gita*, *The Quest of the Holy Grail*, Dante's *Purgatory*, and Melville's *Moby Dick*. GE credit: ArtHum, Wrt.

**20. Man and the Natural World** (4) II. McLean  
Lecture/discussion—3 hours; term paper. Examination of the changing relationship between the individual human being and his "natural" environment, whether cultivated or wild, as reflected in literary works from ancient times to the present by such authors as Hesiod, Virgil, Rousseau, Wordsworth, and Thoreau. GE credit: ArtHum, Wrt.

**\*25. Ethnic Minority Writers in World Literature** (4) The Staff  
Lecture—3 hours; term paper. Consideration of a broad range of writers who speak from an ethnic perspective different from the nominally or politically dominant culture of their respective countries and who explore the challenges faced by characters significantly affected by their ethnic minority status. GE

credit: ArtHum, Div, Wrt.

**\*53A. Literature of China and Japan (3)**

The Staff

Lecture—2 hours; discussion—1 hour. Introduction to representative masterpieces of East Asia with readings from such works as *The Story of the Stone*, *The Peach Blossom Fan*, Tang and Sung poetry, classical Japanese poetry, drama, and travel diaries, and *The Tale of Genji*. GE credit: ArtHum, Div, Wrt.

**53B. Literature of India and Southeast Asia (3)**

III. Schildgen

Lecture—2 hours; discussion—1 hour. Introduction to representative masterpieces of South Asia with readings from such works as the *Mahabharata* and *Ramayana*, *The Cloud Messenger*, *Shakuntala*, *The Little Clay Cart*, and the stories and poems of both ancient and modern India and Southeast Asia. GE credit: ArtHum, Div, Wrt.

**90X. Lower Division Seminar (1-2) I, II, III.**

The Staff

Seminar—1-4 hours. Prerequisite: consent of instructor. Examination of a special topic in a small group setting.

**98. Directed Group Study (1-5) I, II, III.** The Staff (Director in charge)

Restricted to lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5) I, II, III.** The Staff (Director in charge)

(P/NP grading only.)

**Upper Division Courses**

**\*120. Writing Nature: 1750 to the Present (4) I.**

The Staff

Lecture/discussion—3 hours; term paper. Prerequisite: completion of Subject A requirement and at least one course in literature. Study of representations, descriptions, and discussions of humankind's problematical relationship with the non-human world in texts written in a variety of European and American traditions between 1750 and the present. Offered in alternate years. GE credit: ArtHum, Wrt.

**135. Women Writers (4) II.** Reed

Lecture/discussion—3 hours; term paper. An exploration of women's differing views of self and society as revealed in major works by female authors of various times and cultures. Readings, principally of fiction, will include such writers as Lady Murasaki, Mme de Lafayette, and Charlotte Bronte. GE credit: ArtHum, Div, Wrt.

**138. Gender and Interpretation (4) III.** Schiesari

Lecture/discussion—3 hours; term paper. Prerequisite: completion of Subject A requirement and at least one course in literature. Study of the representation of gender roles and gender hierarchy in literary texts from various periods, societies, and cultures in light of research and theory on gender, with attention to gender as a topic for literary interpretation. GE credit: ArtHum, Div, Wrt.

**139. Shakespeare and the Classical World (4)**

III. Schein

Lecture/discussion—3 hours; term paper. Prerequisite: at least one course in literature. Shakespeare's representations of the classical world in the light of selected ancient texts and Renaissance conceptions of Antiquity, with special attention to the depiction of politics and history. Offered in alternate years.

**\*140. Thematic and Structural Study of Literature (4) II.** The Staff

Lecture/discussion—3 hours; term paper. Interpretation of selected works illustrating the historical evolution of themes, as well as of formal and structural elements. May be repeated for credit when substance of course varies. GE credit: ArtHum, Wrt.

**141. Literary Theory and Criticism (4) I.**

Torrance

Lecture/discussion—3 hours; term paper. Exploration of literary theories with emphasis on specific objectives and possibilities of comparative literature. GE credit: ArtHum, Wrt.

**\*142. Critical Reading and Analysis (4)**

The Staff (Director in charge)

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Close reading of selected texts; scrutiny of very limited amount of material, with attention to the problems of texts in translation.

**144. The Grotesque (4) III.** Lokke

Lecture/discussion—3 hours; term paper. Prerequisite: completion of Subject A requirement and at least one course in literature. Study of the "grotesque" in selected texts from the Renaissance to the 20th century, with attention to the "grotesque" as a means of social, cultural, and political commentary, as well as of aesthetic innovation. Offered in alternate years. GE credit: ArtHum, Wrt.

**145. Representations of the City (4) II.** Finney

Lecture/discussion—3 hours; term paper. Examination of the portrayal of the modern city in 19th and 20th century western literature. Readings include works by Balzac, Dickens, Poe, Baudelaire, Dostoevsky, Whitman, Zola, T.S. Eliot, and William Carlos Williams. GE credit: ArtHum, Wrt.

**\*146. Myth in Literature (4) II.** The Staff

Lecture—3 hours; term paper. Prerequisite: course 6 recommended. Comparative study of different versions of one or more central myths, with attention to their cultural settings, artistic and literary forms of representation, as well as to their psychological dimensions. GE credit: ArtHum, Wrt.

**147. Modern Jewish Writers (4) III.** The Staff

Lecture/discussion—3 hours; term paper. Prerequisite: completion of the Subject A requirement and one lower division literature course. Problems of the modern Jewish experience from the perspective of the writer's construction of the self in relation to the future and to the non-Jew. Draws upon Russian, German, Yiddish, and American traditions. GE credit: ArtHum, Div, Wrt.

**\*151. Colonial and Postcolonial Experience in Literature (4) III.** The Staff

Lecture—3 hours; term paper. Prerequisite: completion of Subject A requirement and at least one course in literature. A literary introduction to the cultural issues of colonialism and postcolonialism through reading, discussing and writing on narratives which articulate diverse points of view. GE credit: ArtHum, Div, Wrt.

**\*152. Literature of the Americas (4) I.** The Staff

Lecture/discussion—3 hours; term paper. Prerequisite: completion of Subject A requirement and at least one course in literature. Study of the various stylistic, historical, social and cultural factors that contribute to a hemispheric vision of American literature, encompassing works by Canadian, United States, Caribbean, Brazilian, and Spanish-American writers. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**\*153. The Forms of Asian Literature (4)**

The Staff

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing. Introduction to distinctive Asian literary forms, such as *haiku*, *noh*, the Chinese novel and tale, through reading of major works. Comparison with Western genres and study of native and Western critical traditions. GE credit: ArtHum, Div, Wrt.

**\*154. African Literature (4)** The Staff

Lecture—3 hours; term paper. Prerequisite: completion of Subject A requirement and at least one course in literature. Pre- and post-colonial sub-Saharan African literature and the African oral traditions from which it emerged. Genres and themes of African literature in the 19th and 20th centuries. GE credit: ArtHum, Div, Wrt.

**\*157. War and Peace in Literature (4)** The Staff

Lecture/discussion—3 hours; term papers. Prerequisite: course 1, 2, or 3, or consent of instructor. Through study of a few major works from Western and non-Western literature the course seeks to illuminate the way in which literature from antiquity to the present has dealt with the antinomy peace/war through the ages. GE credit: ArtHum, Wrt.

**\*158. The Detective Story as Literature (4)**

The Staff

Lecture—3 hours; term paper. Study of the origins, literary and social background, development and implications of the literature of detection in a comparative context. GE credit: ArtHum, Wrt.

**\*159. Women in Literature (4)** The Staff

Lecture—3 hours; term paper. Prerequisite: course 1, 2, 3, or 4 or the equivalent recommended. Portrayals of women in literature, comparing selected heroines who represent a particular theme, period, or genre. Texts range around the globe and from ancient to modern works, such as *Lysistrata*, *Emma*, *Hedda Gabler*, *The Makioka Sisters*, and *Top Girls*. GE credit: ArtHum, Div, Wrt.

**160A. The Modern Novel (4) II.** Torrance

Lecture/discussion—3 hours; term paper. The changing image of man and his world as seen in novels by such writers as Joyce, Proust, and Mann. GE credit: ArtHum, Wrt.

**\*160B. The Modern Drama (4)** The Staff

Lecture/discussion—3 hours; term paper. Readings in representative authors such as Ibsen, Strindberg, Chekhov, Pirandello and Brecht. GE credit: ArtHum, Wrt.

**161A. Tragedy (4) III.** Bulman

Lecture/discussion—3 hours; term paper. Persistent and changing aspects of the tragic vision in literature from ancient times to the present. GE credit: ArtHum, Wrt.

**\*161B. Comedy (4)** The Staff

Lecture/discussion—3 hours; term paper. Comic attitudes towards life in literary works of different ages. GE credit: ArtHum, Wrt.

**163. Biography and Autobiography (4) I.** Kuhn

Lecture/discussion—3 hours; term paper. Portrayals of a human life in biographies and/or autobiographies of different countries and ages. Offered in alternate years. GE credit: ArtHum, Wrt.

**164A. The Middle Ages (4) I.** Schildgen

Lecture/discussion—3 hours; term paper. Readings in heroic epics, chivalric romances, and such major authors as Dante and Chaucer, with emphasis on shared assumptions concerning man's place in the world. GE credit: ArtHum, Wrt.

**164B. The Renaissance (4) II.** Torrance

Lecture/discussion—3 hours; term paper. Readings in major authors such as Petrarch, Machiavelli, Erasmus, Montaigne, Rabelais, Cervantes, and Shakespeare, with particular emphasis on changing conceptions of the possibilities and limitations of man. GE credit: ArtHum, Wrt.

**\*164C. Baroque and Neoclassicism (4)**

The Staff

Lecture/discussion—3 hours; term paper. Readings in major authors such as Calderón, Corneille, Pascal, Racine, Milton, and Grimmelshausen, with consideration of the tension between the expansive energies of the "baroque" and the restraints of dogma and reason. GE credit: ArtHum, Wrt.

**164D. The Enlightenment (4) III.** Kusch

Lecture/discussion—3 hours; term paper. Readings in major authors such as Swift, Voltaire, Rousseau, Sterne, and Kant, with emphasis on philosophical ideas and literary forms. GE credit: ArtHum, Wrt.

**166A. The Epic (4) I.** Schein

Lecture/discussion—3 hours; term paper. Study of various forms of epic poetry in both the oral and literary traditions. May be repeated for credit in different subject area. GE credit: ArtHum, Wrt.

**166B. The Novel (4) I.** Flavell

Lecture/discussion—3 hours; term paper. Readings in various forms of the novel such as the picaresque, the developmental, and the confessional, with emphasis on the evolution of the genre. May be repeated for credit in different subject area. GE credit: ArtHum, Wrt.

**\*167. Comparative Study of Major Authors (4)**

The Staff

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Pivotal works of artists in the Western mainstream, such as Dante, Shakespeare,

Cervantes, Goethe, Tolstoj, Proust, and Joyce. GE credit: ArtHum, Wrt.

**168A. Romanticism** (4) III. McLean

Discussion—3 hours; term paper. Prerequisite: any introductory course in literature. Introduction to the Romantic movement with emphasis upon Romantic concepts of the self, irony, love, the imagination and artistic creativity, and the relationship of the individual to nature and society. GE credit: ArtHum, Wrt.

**\*168B. Realism and Naturalism** (4) The Staff

Discussion—3 hours; term paper. Prerequisite: consent of instructor. Novels and plays by Dickens, Zola, Flaubert, Dreiser, Ibsen, and Strindberg investigate marriage and adultery, the city and its perils, the hardships of industrialization, the war between the sexes, the New Woman, and other 19th-century themes. Offered in alternate years. GE credit: ArtHum, Wrt.

**\*169. The Avant-Garde** (4) The Staff

Lecture/discussion—3 hours; term paper. Studies in movements such as surrealism, expressionism and the absurd. GE credit: ArtHum, Wrt.

**\*170. The Contemporary Novel** (4) The Staff

Lecture—3 hours; term paper. Study of important novels from different parts of the world, including Asia, Africa, Latin America, Europe, and the United States, in the period from the Second World War to the present. GE credit: ArtHum, Wrt.

**\*180. Selected Topics in Comparative Literature** (4) The Staff

Lecture/discussion—3 hours; term paper. Prerequisite: completion of Subject A requirement and at least one course in literature. Study of a selected topic or topics appropriate to student and faculty interests and areas of specialization of the instructor. May be repeated once for credit when the topic differs. GE credit: ArtHum, Wrt.

**194H. Special Study for Honors Students** (1-5) I, II, III. The Staff (Director in charge)

Independent study—1-5 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a comparative topic. May be repeated for credit. (P/NP grading only.)

**195. Seminar in Comparative Literature** (4) II. Schiesari

Seminar—3 hours; term paper. Prerequisite: junior standing and major in Comparative Literature, or consent of instructor. Advanced comparative study of selected topics and texts, with explicit emphasis on the theoretical and interpretive approaches that define Comparative Literature as a discipline and distinguish it from other literary disciplines. May be repeated once for credit when topic differs. Offered in alternate years.

**197T. Tutoring in Comparative Literature** (1-5) I, II, III. The Staff (Director in charge)

Discussion—2-4 hours. Prerequisite: upper division standing with declared major in Comparative Literature. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with current courses offered by Comparative Literature. May be repeated for credit for a total of 6 units. (P/NP grading only.)

**198. Directed Group Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Director in charge)

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Director in charge)

(P/NP grading only.)

**Graduate Courses**

**210. Topics and Themes in Comparative Literature** (4) I, II, III. Schein, Torrance

Discussion—3 hours; term paper. Prerequisite: graduate standing in Comparative Literature, English, or a foreign-language literature, or consent of instructor. Comparative, interpretive study of the treatment of specific topics and themes in literary works from various periods, societies, and cultures, in light of these

works' historical and sociocultural contexts. May be repeated for credit when topic differs.

**214. Approaches to Lyric Poetry** (4) III. Schiesari

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Analysis and interpretation of poetic texts in different historical periods and national literatures, with consideration of major theoretical developments in the understanding of poetic discourse. Offered in alternate years.

**\*215. Forms of the Spiritual Quest** (4) The Staff Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor; knowledge of at least one foreign language. An exploration, culminating in a research paper, of changing forms of the quest for transcendence in different cultures, mainly in major works of Western literature, but also in other traditions and from the perspectives of other disciplines.

**220. Literary Genres** (4) III. Murav

Discussion—3 hours; term paper. Prerequisite: graduate standing in Comparative Literature, English, or a foreign-language literature, or consent of instructor. Comparative literature of major works in a particular genre from various linguistic, national, and cultural traditions, with particular attention to historical developments within the genre and to genre theory. May be repeated for credit when topic differs.

**238. Gender and Interpretation** (4) II. Schein

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of how literary texts from different periods, societies, and cultures represent gender roles and gender hierarchy, building on recent work on gender in anthropology, literature, psychology, and women's studies.

**250A. Research in Comparative Literature** (4) I, II, III. The Staff (Director in charge)

Individual instruction—1 hour. Prerequisite: course 200. Individually guided research, under the supervision of a faculty member, in a comparative topic culminating in a term paper. Required of M.A. and Ph.D. candidates.

**250B. Research in Comparative Study of Author, Period, or Genre** (4) I, II, III. The Staff (Director in charge)

Individual instruction—1 hour. Prerequisite: courses 200 and 201. Individually guided research, under the supervision of a faculty member, in the specialized study of an individual author, historical period, or literary genre culminating in a term paper. Required of Ph.D. candidates.

**250C. Basic Research for the Dissertation** (4) I, II, III. The Staff (Director in charge)

Individual instruction—1 hour. Prerequisite: courses 200 and 201. Individually guided research, under the supervision of a faculty member, in preparation for the dissertation in Comparative Literature. Required of Ph.D. candidates.

**\*255. Colloquium** (2) I, II, III. The Staff

Lecture/discussion—2 hours. Prerequisite: graduate standing. Oral presentation and critique of research papers; discussion of current problems in teaching and research in Comparative Literature. May be repeated for credit. (S/U grading only.)

**260. Contexts of the 19th-Century Novel** (4) I. Murav

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Development in 19th-century history, culture, and society in relation to major trends in the 19th-century novel. Offered in alternate years.

**298. Directed Group Study** (1-5) I, II, III. Prerequisite: graduate standing. (S/U grading only.)

**299. Individual Study** (1-12) I, II, III. The Staff (Director in charge)

(S/U grading only.)

**299D. Special Study for the Doctoral Dissertation** (1-12) I, II, III.

(S/U grading only.)

**Professional Courses**

**390. Teaching Comparative Literature in College** (3) I. Schildgen

Lecture—1 hour; discussion—2 hours. Methods of teaching Comparative Literature with specific application to the introductory courses 1, 2, and 3, in relation to major cultural and social developments. Discussion also of ways to teach analytical writing. (S/U grading only.)

**392. Teaching Internship in Comparative Literature** (1) I, II, III. Schildgen

Discussion—1 hour. Regular consultations between the student instructor teaching Comparative Literature courses and a supervisor. In-class evaluation of teaching. May be repeated for credit after consultation with supervisor. (S/U grading only.)

**396. Teaching Assistant Training Practicum** (1-4) I, II, III. The Staff (Chairperson in charge)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Comparative Literature (A Graduate Group)

Kari Lokke, Ph.D., Chairperson of the Group  
Group Office, 522 Sproul Hall (530-752-2239)

**Faculty.** The interdisciplinary faculty come from Comparative Literature, English, French, Italian, German, Russian, and Spanish.

**Graduate Study.** The Comparative Literature Program offers the M.A. and Ph.D. degrees with a strong emphasis on individual research under the supervision of a faculty member. Candidates for the M.A. combine study of Comparative Literature with study of two literatures (one of which may be English or American) in the original languages. Ph.D. candidates, in addition to further research of a comparative nature, study three literatures (one of which may be English and/or American) in the original languages, acquiring an extensive knowledge of the overall development of one. Within this framework, each student's program will be tailored to individual interests, and may center on a major historical period, such as the Renaissance or the modern age; a genre, such as lyric poetry, epic, drama, or the novel; or any other special emphasis approved by the Graduate Adviser.

**Preparation.** For admission to the Program, M.A. candidates should have an undergraduate major in literature and reading ability in one foreign language. Ph.D. candidates should have an undergraduate major in literature and reading ability in two foreign languages. The Group requires three letters of recommendation and a sample of recent written work, and it is recommended that students submit their GRE scores.

**Graduate Adviser.** S. Schein (*Comparative Literature*).

## Comparative Pathology (A Graduate Group)

Dennis W. Wilson, D.V.M., Ph.D., Chairperson of the Group

Group Office, 1042 Haring Hall (530-752-2657)

World Wide Web: <http://www.vetmed.ucdavis.edu/pmi/comppath/homecp.htm>

**Graduate Study.** The Graduate Group in Comparative Pathology offers the M.S. and Ph.D. degrees for graduate study in disciplines concerned with disease processes. The group's focus is the study of the

causes and nature of disease processes in animals and humans, with major emphasis on the mechanisms responsible for the development of diseases at the level of organ systems, the cell, or subcellular mechanisms. The group brings a wide array of scientific knowledge to this study, so that students with divergent interests can be accommodated in programs designed for individual needs. Beyond core courses selected from disciplines such as anatomy, bacteriology, genetics, immunology, parasitology, pathology, physiology, and virology, course programs are intentionally flexible.

**Preparation.** This program is primarily for students who have a professional medical degree, i.e., D.V.M., M.D., D.D.S. Students without a professional degree will not be considered unless they have an especially strong background in basic biomedical sciences.

**Graduate Adviser.** J.G. Zinkl (*Pathology, Microbiology and Immunology*), D.H. Hinton (*Anatomy, Physiology and Cell Biology*), R.B. Le Febvre (*Pathology, Microbiology and Immunology*), K.M. Lam (*Population Health and Reproduction*), S.M. Stover (*Anatomy, Physiology, and Cell Biology*).

3. Have a UC Davis grade point average of 2.75 or better in the courses listed above. Students who have completed courses at another institution equivalent to those listed above must have a grade point average of 3.0 or better in the equivalent course work. All courses must be taken for a letter grade.

**Career Alternatives.** The computer science program prepares students for advanced work in computer science or in other disciplines requiring advanced knowledge of the use of computers.

**B.S. Major Requirements:**

168, 170, 172, 175, 177, 178, 189A-L, combined maximum of 3 units from approved 192 and 199 courses.

**Graduate Study.** See the Graduate Studies chapter of this catalog.

**Computer Science (A Graduate Group)**

Charles U. Martel, Ph.D., Chairperson of the Group  
 Group Office, 2063 Engineering II (Department of Computer Science)  
 (530-752-7004; gradinfo@cs.ucdavis.edu)  
 World Wide Web: <http://www.cs.ucdavis.edu>

**Faculty.** Consists primarily of faculty members from the Departments of Computer Science, Electrical and Computer Engineering, Applied Science (Livermore), Mathematics, and the Graduate School of Management.

**Graduate Study.** The Graduate Group in Computer Science offers programs of study leading to the M.S. and Ph.D. degrees in Computer Science. The varied nature of the faculty brings a wide variety of research interests to the program. Research strengths lie in algorithms, artificial intelligence, computer architecture, computer graphics, computer systems design, database systems, computer security, computer networks, fault tolerance, program specifications and verification, programming languages and compilers, parallel and distributed systems, operating systems, performance evaluation, robotics, scientific computation, and software engineering. Interdisciplinary research in computer science is encouraged.

**Preparation.** Normal preparation for the program is a bachelor's degree in either computer science or in a closely related field (such as electrical engineering or mathematics, with substantial course work in computer science). Applications are also considered from students with outstanding records in other disciplines. M.S. students may either complete a thesis or pass written examinations in three areas of specialization as defined by the Graduate Group. Ph.D. candidates must pass preliminary written examinations in three areas of specialization as defined by the Graduate Group. Ph.D. candidates must also pass a qualifying oral examination and complete a dissertation demonstrating original research in an area approved by the Graduate Group.

**Graduate Advisers.** N.S. Matloff, N. Max, R. Pandey.

**Conservation Biology**

**See Ecology (A Graduate Group); Environmental Biology and Management; and Wildlife, Fish, and Conservation Biology**

**Consumer Science**

(College of Agricultural and Environmental Sciences)

**Faculty.** See under the Division of Textiles and Clothing.

**Major Programs.** The Consumer Food Science option under the Food Science major is a related program. See also Food Science and Technology, Nutrition, and Textiles and Clothing.

**Graduate Study.** For graduate study, see the Graduate Studies chapter of this catalog.

**Computer Science**

Ronald A. Olsson, Ph.D., Vice Chairperson of the Department

Department Office, 2063 Engineering II (530-752-7004)

World Wide Web: <http://www.cs.ucdavis.edu>

**Faculty.** For complete faculty listing, please see Engineering: Computer Science.

**The Major Program**

The computer science major prepares students for careers involving the design of computer systems and their application to science, industry, and management.

**The Program.** Students taking this major receive solid grounding in fundamentals of computer languages, operating systems, and the formal mathematical tools required to use the computer in solving complex tasks. Emphasis in the major is on software, although introductory architecture is included. For students interested in the engineering aspects of computer science, see Engineering: Computer Science.

**Preparatory Requirements.** All continuing UC Davis students must meet the following requirements prior to requesting a change of major to computer science or double major with computer science:

1. Be a registered student at UC Davis at least one quarter prior to petitioning for change of major or double major.
2. Have completed the following courses or their equivalents:  
 Mathematics 21A, 21B, 21C, 22A . . . . . 15 units  
 Computer Science Engineering 20, 30, 40, and either 50 or Electrical and Computer Engineering 70 . . . . . 16 units

\*Course not offered this academic year.

## Courses in Consumer Science (CNS)

Questions pertaining to the following courses should be directed to the Division of Textiles and Clothing Advising Office, 129 Everson Hall.

### Lower Division Courses

**92. Internship in Consumer Science** (1-12) I, II, III. Rucker  
Internship—3-36 hours. Prerequisite: consent of instructor. Internship on and off campus in a consumer science related area. (P/NP grading only.)

### Upper Division Courses

**\*100. Consumer Behavior** (3) II. Rucker  
Lecture—3 hours. Prerequisite: preparation in areas of psychology or sociology and economics recommended. Provides a set of behavioral concepts and theories useful in understanding consumer behavior on the part of the individual, business, and social organizations. Conceptual models to help guide and understand consumer research will be presented. GE credit: SocSci, Div, Wrt.

**192. Internship in Consumer Science** (1-12) I, II, III. Rucker  
Internship—3-36 hours. Prerequisite: completion of a minimum of 84 units; consent of instructor. Internship on and off campus in a consumer science related area. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III. Rucker (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. Rucker (P/NP grading only.)

### Graduate Course

**299. Research** (1-12) I, II, III. Rucker (S/U grading only.)

### Professional Course

**396. Teaching Assistant Training Practicum** (1-4) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

which may be Critical Theory 201), and a special examination.

**Graduate Adviser.** Consult Critical Theory Program Office.

## Courses in Critical Theory (CRI)

### Graduate Courses

**200A. Approaches to Critical Theory** (4) I, II, III. The Staff (Director in charge)  
Seminar—3 hours; term paper. Prerequisite: graduate standing in a participating program. The problem of interpretation in 20th-century thought with a critical overview of various theoretical approaches (e.g., semiotics, hermeneutics, deconstruction, social and cultural critique, feminist theory, psychoanalysis).

**200B. Problems in Critical Theory** (4) I, II, III. The Staff (Director in charge)  
Seminar—3 hours; term paper. Prerequisite: course 200A with a grade of B+ or better. Focused study of a particular critical theoretical approach, school or perspective. Topics will vary. May be repeated for credit with consent of instructor when topic differs.

**200C. History of Criticism** (4) I. The Staff  
Seminar—3 hours; term paper. Critical analysis and discussion of pre-20th century theories of literary and cultural criticism. Topics will vary. May be repeated for credit with consent of instructor when topic differs.

**201. Critical Theory Special Topics** (4) I, II, III. The Staff (Director in charge)  
Seminar—3 hours; term paper. Prerequisite: course 200A. Application of theoretical principles to one specific research topic. May be repeated for credit with consent of instructor when topic differs.

**202. Visual Culture** (4) II. The Staff  
Lecture/discussion—4 hours. Prerequisite: course 200A strongly recommended. Analysis of image production in the contemporary world (photography, film, television, advertising, etc.) and their effects on individual subjectivities and collective social identities.

**298. Directed Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

**299. Individual Study** (1-12) I, II, III. The Staff (Chairperson in charge) (S/U grading only.)

## Critical Theory

Marc E. Blanchard, Ph.D., Program Director  
(530-752-1038)

Program Office, 522 Sproul Hall (530-752-5464)

World Wide Web: <http://crittheory.ucdavis.edu/>

### Committee in Charge

Marc E. Blanchard, Agrégé de Lettres (*Comparative Literature, French*)

Elizabeth Constable, Ph.D. (*French*)

Joanne Diehl, Ph.D. (*English*)

Linda Egan, Ph.D. (*Spanish*)

M. Kay Flavell, Ph.D. (*Critical Theory*)

Smadar Lavie, Ph.D. (*Anthropology, Critical Theory*)

Janelle Reinelt, Ph.D. (*Dramatic Art*)

Irit Rogoff, Ph.D. (*Art, Critical Theory*)

Juliana Schiesari, Ph.D. (*Italian*)

**Graduate Study.** The program in Critical Theory offers study and research leading to the Ph.D. with a *designated emphasis* in Critical Theory. The program provides theoretical emphasis and interdisciplinary perspective to students already preparing for the Ph.D. in one of 13 participating departments (Anthropology, Comparative Literature, Dramatic Art, Education, English, French and Italian, German and Russian, History, Music, Philosophy, Psychology, Sociology, and Spanish). Students complete all requirements for the Ph.D., including the dissertation, in one of the participating departments. The additional requirements leading to the designated emphasis consist of two core courses (200A, 200B) offered by the program in Critical Theory, two additional graduate courses (one of

## Crop Science and Management

(College of Agricultural and Environmental Sciences)

**Faculty.** See under Departments of Agronomy and Range Science; Agricultural and Resource Economics; Environmental Horticulture; Land, Air and Water Resources; Plant Pathology; Pomology; Vegetable Crops; and Viticulture and Enology.

**Related Major Programs.** The major relies on courses taught in conjunction with numerous other major programs, particularly Plant Biology, Agricultural Systems and Environment, and Agricultural and Resource Economics.

### The Major Program

The Crop Science and Management major trains students in biological and natural sciences and economics as they apply to the production, protection, and maintenance of crop plants, and their quality following harvest.

**The Program.** Students majoring in crop science and management spend the first two years of study developing the scientific and general background necessary for upper division work. The science courses include chemistry, biology, botany, physics, and mathematics. Management courses include economics and accounting. General background is provided by courses in the social sciences/humanities (English, rhetoric, and the general education program). At the

upper division level, students take courses in areas supportive of crop science and farm management, such as entomology, weed science, water and soil science, plant pathology, nematology, plant physiology and agricultural economics. Students may specialize by electing courses pertinent to specific crop types (vegetables, fruits and nuts, small grains, or nursery crops).

**Internships and Career Alternatives.** This program prepares graduates for careers in farm management and various other technical and management positions in agricultural business and associated enterprises, such as banking and equipment and supply companies, as well as private, state and federal service in consulting and research. Graduates are also qualified to pursue graduate studies in sciences such as plant biology, horticulture, agronomy, agroecology, pest management, economics or business management. Internships are available in local companies involved in farm production and in extension work with farm advisers.

### B.S. Major Requirements:

(For convenience in program planning, the usual courses taken to satisfy the requirements are shown in parentheses. Equivalent or more comprehensive courses may be taken with your adviser's approval. Courses shown without parentheses are required.)

**English Composition Requirement** .....8  
See College Requirement

**Preparatory Subject Matter** .....62-64  
Biological Sciences (Biological Sciences 1A, 1B, 1C) .....15  
Chemistry (Chemistry 2A, 2B, 8A, 8B) .....16  
Calculus (Mathematics 16A, 16B) .....6  
Physics (Physics 1A-1B or 7A-7B) .....6-8  
Computer science (Agricultural Systems and Environment 21) .....3  
Economics (Economics 1A, 1B) .....10  
Statistics (Agricultural Systems and Environment 120, Statistics 13 or 102) .....4  
Field equipment operations (Applied Biological Technology 49) .....2

**Breadth/General Education** .....24  
See General Education Requirement and consult your adviser

**Depth Subject Matter** .....61-63  
Crop and Soil Science Component .....22-24  
Plant Biology 111 or Environmental Horticulture 102; Plant Biology 142; Soil Science 100; Hydrologic Science 110 or 124 .....14-16

In consultation with adviser select a minimum of 8 additional units from Agricultural Systems and Environment 110A, 110B, 110C, 110L, Environmental Horticulture 125, Plant Biology 173, 174, Viticulture and Enology 115, 116 .....8

Pest Management Component .....16  
Entomology 110, Nematology 100, Plant Biology 176, Plant Pathology 120

Economics and Business Management Component .....23  
Agricultural and Resource Economics 100A, 130, 140, Management 100 .....16

In consultation with adviser select a minimum of 7 additional units from Agricultural and Resource Economics 100B, 112, 120, 145, 147M, 150 or 157 .....7

**Restricted Electives** .....12  
In consultation with adviser select a minimum of 12 units from the following:

Agricultural Systems and Environment 101, 105, 107, 112, 118, 120, 121, 122, 150, 170A, 170B, 192, 194H, 195, Applied Biological Technology 52, 134, Entomology 119, 119L, 135, Environmental Horticulture 102, 105, 120, 125, 130, Plant Biology 111L, 112, 117, 121, 146, 152, 153, 154, 157, 158, 160, 171, 172, 172L, 175, 177, 196, Plant Pathology

125, Soil Science 109, Viticulture and Enology 101A, 101B, 101C, 110, 111, 118.

**Unrestricted Electives** .....9-13  
(Internship and Spanish Recommended)

**Total Units for the Major** .....180

**Major Adviser.** T. DeJong.

**Advising Center** for the major is located in 152 Hunt Hall (530-752-1715).

**Related Courses.** See under Departments of Agronomy and Range Science, Agricultural and Resource Economics, Plant Biology, Plant Pathology, and Viticulture and Enology.

## Courses in Crop Science and Management (CSM)

### Lower Division Courses

**92. Internship in Crop Science and Management** (1-12) I, II, III. The Staff Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship in crop production, research or management. (P/NP grading only.)

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff  
Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

**192. Internship in Crop Science and Management** (1-12) I, II, III. The Staff Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship off or on campus in crop production, research or management; or in a business, industry, or agency associated with these or other crop science enterprises. (P/NP grading only.)

**194H. Special Study for Honors Students** (1-5) I, II, III. The Staff (Master Adviser in charge) Independent study—3-15 hours. Prerequisite: senior standing, Crop Science and Management major, overall GPA of 3.25 or higher, and consent of Master Adviser. Two or three successive quarters of guided research on crop science and management related subject of special interest to the student. (P/NP grading only; deferred grading only, pending completion of thesis.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff  
Prerequisite: consent of instructor. (P/NP grading only.)

## The Major Program

The design program offers a creative, challenging, and flexible approach to the study of design. The philosophy of the program encourages self-direction and independent thinking, not only in design work but also in planning the overall undergraduate education.

**The Program.** Foundation courses, Design and Visual Culture; Design, Creativity and Fantasy; Design Drawing; Design Media; and Visual Use of Computers in Design, are required of all design majors. Beyond these, students take courses in their depth subject matter emphasizing their interests. Students select one of three areas of emphasis to focus undergraduate study: *Textile and Costume Design*, *Interior Architecture*, and *Visual Communication and Presentation*. These areas can also be combined into a fourth area of emphasis, *Comprehensive Design*, through an individualized study plan developed with a faculty adviser. The selected emphasis determines the required core of courses; all emphases are strongly complemented by classes in related design history. A more detailed explanation is available through the Design Advising Center, 152 Walker Hall.

**Portfolio.** Students are required to keep a continuing portfolio of their creative work to be evaluated by faculty for the purposes of declaring the major, enrolling in overflow courses, and requesting independent study, internship, or other similar courses. Incoming first-year and transfer students with a strong background in art or design are encouraged to submit a portfolio to waive some of the preparatory studio courses.

**Internships and Career Alternatives.** As part of their preparation, design students are encouraged to supplement their education with internships in design firms, museums, art galleries, textile galleries, and in interior designers' and architects' offices. Design graduates go directly from this program into further graduate study, clothing and interior design and architectural firms, exhibit and display work in galleries and museums, and theatrical and textile companies. In addition, students have become entrepreneurs through freelance and commissioned work in many related areas.

| <b>Preparatory Subject Matter</b> .....                                                                                          | <b>20</b>    |
| Select one course from Art History 1A, 1B, 1C or 1D .....                                                                        | 4            |
| Design 1, 14, 15, 16 .....                                                                                                       | 16           |
| <b>Breadth/General Education</b> .....                                                                                           | <b>32</b>    |
| Sixteen units in natural science and 16 units in social sciences (to include satisfaction of General Education requirement)..... | 32           |
| <b>Depth Subject Matter</b> .....                                                                                                | <b>56-57</b> |
| Design 100 .....                                                                                                                 | 4            |
| Design history, select from Design 140, 142A, 142B, 143, 144 .....                                                               | 12           |
| Select one area of specialization (option) below .....                                                                           | 40-41        |
| <b>Interior Architecture</b> option.....                                                                                         | <b>41</b>    |
| Architectural drawing, Design 21 .....                                                                                           | 4            |
| Materials and specifications, Design 138 ...                                                                                     | 2            |
| Fundamentals of interior architecture, Design 134A-134B-134C .....                                                               | 12           |
| Advanced interior architecture, Design 180A-180B .....                                                                           | 8            |
| Senior project, Design 180C .....                                                                                                | 4            |
| Senior project preparation and documentation, Design 193A-193B .....                                                             | 3            |
| Two courses from Design 121, 135A, 135B, 136, 150 .....                                                                          | 8            |

\*Course not offered this academic year.

**Textile and Costume Design** option .....

Lower division courses selected with adviser approval from Design 18, 23, 24, 77A, 77B .....

Upper division courses selected with adviser approval from Design 124, 125, 131, 132A, 132B, 132C, 160A, 160B, 170A, 170B, 177 .....

**Visual Communication and Presentation** option .....

Three courses from Design 13, 18, 21, 22 .....

**Comprehensive Design** option .....

Three-dimensional design, Design 18 .....

**Restricted Electives** .....

Two courses from American Studies 1A, Anthropology 2, Communication 1, 3, Geology 1, Psychology 1, Sociology 1, 25 .....

Courses selected from the list of Restricted Electives with approval of adviser.....

**Unrestricted Electives** .....

**Total Units for the Degree**.....

**Additional Requirement**

Development of a course of study, in consultation with an adviser, upon completion of 90 units or prior to transferring into the major.

**Major Adviser.** R. Berteaux.

**Graduate Study.** The graduate program in Textile Arts and Costume Design leading to the Master of Fine Arts degree offers students opportunities for independent, creative, innovative interdisciplinary study combining design with anthropology, critical theory, consumer issues, art, engineering, the sciences and theater. Faculty work closely with students to build individual programs based upon a student's specialized goals and interests in textile and costume design. Study in new technologies and experimental approaches are encouraged. Areas of emphasis include constructed textiles (off loom and woven), surface design, computer-integrated textile design, and functional, ethnographic, and aesthetic costumes. The Textile and Costume Study Collection, which houses over 8,500 artifacts, is a valuable resource in enriching studies emphasizing multi-cultural expression. For information about specific requirements, please contact the Advising Center at 530-752-1165.

**Graduate Adviser.** Please contact department at 530-752-6223.

## Courses in Design (DES)

Questions pertaining to the following courses should be directed to the instructor or to the Advising Center for the major, 152 Walker Hall (530-752-1165).

### Lower Division Courses

**1. Design and Visual Culture** (4) I. Shawcroft  
Lecture—4 hours. Introduction to design awareness; role of designer in contemporary culture; emphasis on visual literacy and perception, creative problem solving, and design vocabulary. GE credit: ArtHum, Wrt.

**13. Photographic Media Studio (4) I, II, III.** Sylva in charge

Studio—8 hours. Prerequisite: course 1; course 3 concurrently; priority enrollment to Design majors. Film and videotape for description, simulation, analytical research, and design development.

**14. Design Drawing (4) I.** Laky, Wagner

Studio—8 hours. Priority given to Design majors. Students with a background in drawing or Advanced Placement Art Studio units are encouraged to submit a portfolio for review to waive this course. Develop freehand drawing skills to graphically communicate ideas and form. Basic skills in objective observation and representation. Color as a transition from value. Range of media used. Not open for credit to students who have taken course 11.

**15. Design Media (4) II.** Palmer and staff

Lecture—2 hours; studio—4 hours. Priority given to Design majors. Understand color, composition and form as ways of communicating design concepts and content. Media and photography as tools for all design students: color theory and mixing, variety of materials and media, introduction to the camera. Not open for credit to students who have taken course 12.

**16. Visual Use of Computers in Design (4) I.**

Sylva in charge

Lecture—2 hours; studio—6 hours. Prerequisite: courses 14, 15. Introduction to the computer as a visual design tool. Use of the Macintosh platform and exploration of specific software used in design. Practical instruction combined with theoretical perspective to investigate the impact of visual computing on the design process.

**18. Three-Dimensional Design (4) I.** Shawcroft

Studio—8 hours. Principles of three-dimensional design through creative experimentation in a variety of media. Exploration of structural, perceptual, and spatial properties of form.

**21. Drafting and Perspective (4) I.** Olsen in charge

Studio—8 hours. Prerequisite: course in drawing recommended. Creation of three-dimensional designs on two-dimensional surfaces.

**22. Visual Communication: Image and Type (4) II.** Sylva

Studio—8 hours. Prerequisite: courses 13, 14, 15, 16 or consent of instructor. Priority given to Design majors. Presentation of the fundamentals of design. Specific focus will be on gestalt principles of design, balance and visual hierarchy; integration of text and image on the two-dimensional page; and introduction to typographic exploration using Macintosh platform.

**\*23. Personal Adornment (4) I.** The Staff (Stabb in charge)

Studio—8 hours; field trip. Exploration of the human image altered through ornament and its relation to the human structure.

**24. Hand Constructed Textiles (4) I.** Laky

Studio—8 hours; one or two field trips. Prerequisite: courses 14, 15. Contemporary approach to textile techniques of construction such as netting, plaiting, knotting and basketry.

**77A. Soft Product Development (4) II.** The Staff

Studio—8 hours. Prerequisite: courses 14, 15 recommended. Basic theories and principles of soft product development from two-dimensional shapes to three-dimensional forms. Approaches include flat pattern, draping, as well as processes of joining and building. Structural development of clothing in relation to bodies is emphasized.

**77B. Soft Product Development (4) III.** The Staff  
Studio—8 hours. Prerequisite: course 77A. Study and practice of designing clothing for the human body through pattern development and structural joining sequences. Problems emphasize advanced theories and principles of soft product development.

**99. Special Study for Undergraduates (1-5) I, II, III.** The Staff (Stabb in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division Courses

**100. Design, Creativity, and Fantasy (4) III.**

Gotelli

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. To explore and develop personal creativity and imagination utilizing fantasy as a methodology for design. Examples of fantasy as found in the designed environment. Use of fantasy as problem solving tool in design. (Former course 3.) GE credit: ArtHum, Wrt.

**121. Design Delineation (4) III.** Olsen in charge  
Studio—8 hours; field trip. Prerequisite: courses 14, 15, and 21. Exploration of the process of delineation, including principles of perspective drawing, rapid visualization techniques (the quick sketch), rendering, and graphic presentation methods.

**124. Textile Structures (4) III.** Laky  
Studio—8 hours; field trip. Prerequisite: course 24. Art and science of hand building structures in flexible materials. Studio projects in experimental two- and three-dimensional forms with some emphasis on relationships to architecture, furniture and interiors.

**125. Textiles in the Landscape (4) III.** Shawcroft  
Studio—8 hours. Prerequisite: courses 24 and 124 or consent of instructor. Structuring organic and mathematical forms in textiles, working with the symbiotic relationship of these textiles and their immediate placement in the outdoor landscape.

**126A. Visual Presentation: Visual Merchandising (4) II.** The Staff

Studio—8 hours; field trips. Prerequisite: courses 14, 15 or consent of instructor. Principles and practice of visual communication of ideas through non-verbal presentations. The study of three-dimensional objects in a spatial context with an emphasis on visual merchandising.

**126B. Visual Presentation: Exhibition Design (4) I.** Gotelli

Studio—8 hours; field trips. Prerequisite: course 14, 15 or consent of instructor. Principles and practice of visual communication of ideas through non-verbal presentations. The study of three-dimensional objects in a spatial context with an emphasis on the museum and gallery environment.

**126C. Visual Presentation: Installation and Design (4) III.** Gotelli

Studio—8 hours; field trips. Prerequisite: course 126A and 126B or consent of instructor. Advanced principles and practice of visual communication of ideas through non-verbal presentations. The study of three-dimensional objects in a spatial context with an emphasis on self-expression and alternative exhibition spaces.

**131. Layered Textiles and Costumes (4) III.**

Rivers

Studio—8 hours; field trip required. Prerequisite: courses 14, 15, 23, and 24 recommended. Exploration of surface embellishments and structural techniques derived from historic and contemporary world cultures. Emphasis on unique qualities of handmade textiles/costumes and individual expression. Topics included mola and applique, piecing and quilting, beadwork, embroidery, and dimensional surfaces. Offered in alternate years.

**132A. Loom-Constructed Textile Design (4) I.**

The Staff

Studio—8 hours. Prerequisite: course 23 or 24. Foundation course in handwoven textile structure and design, emphasizing yarn identification, basic drafting, basic weaves and their derivatives explored in context of original color effects and yarn combinations.

**132B. Loom-Constructed Textile Design (4) II.**

The Staff

Studio—8 hours. Prerequisite: course 132A. Intermediate level study of complex fabric structure with emphasis on pattern in relation to surface, dimension, and material.

**132C. Computer-Aided Textile Design (4) III.**

The Staff

Studio—8 hours. Prerequisite: course 132B. Micro-computer applications to the structure, design, and weaving of fabrics, emphasizing advanced composi-

tions, drafting, and plotting of multi-dimensional, original weave structures.

**134A. Introduction to Interior Architecture (4) I.** Olsen

Studio—8 hours; required field trips. Prerequisite: courses 14, 15, 21 and upper division standing. The design process through simple space planning problems focused on residential and small commercial spaces.

**134B. Introduction to Interior Architecture (4)**

II. Berteaux

Studio—8 hours; required field trips. Prerequisite: course 134A. Problems in interior architecture emphasizing environmentally conscious design concepts and issues. Includes thermal comfort, issues in sustainable design, reduction of waste, "green materials," and resource recycling.

**134C. Introduction to Interior Architecture (4)**

III. Harrison

Studio—8 hours; required field trips. Prerequisite: course 134B. Focus on technical environments such as laboratories, medical facilities, child care facilities, school facilities, computer installations. Includes instruction in model making and presentations in the form of models or photographic presentations derived from computer modeling.

**135A. Furniture Design (4) II.** Olsen

Studio—8 hours; required field trip. Prerequisite: course 21; course 134A recommended. Development of designs for contemporary furniture. Consideration of behavioral and physical requirements, cultural and historic expression, and structural and aesthetic qualities. Process includes research, drawings, and construction of scale models.

**135B. Furniture Design (4) III.** Olsen in charge

Studio—8 hours; required field trip. Prerequisite: course 135A or consent of instructor. Design and construction of full size prototype furniture based on preliminary work completed in course 135A. Material technology, construction methods, and finishes discussed. Process includes development of shop drawings and furniture construction.

**136. Recording Historic Structures (4) III.**

Berteaux

Studio—8 hours; field trip required. Prerequisite: courses 14, 15, and 21 or the equivalent. A studio course of individual and group projects that introduces students to historic preservation. A major component of the course is on-site study of a historic building and the production of measured drawings.

**138. Materials and Specifications for Interior Architecture (2) I.** Harrison

Lecture—2 hours; Field trips required. Prerequisite: course 21; course 134A recommended. Introduction to construction and finish materials used in interior architecture. Supplementary course for studio courses 134A, 134B, 134C and 180A, 180B, 180C.

**140. History of Design (4) II.** The Staff (Stabb in charge)

Lecture—4 hours. Prerequisite: Art History 1A or the equivalent. Historical survey of the changing relationship of society to its practices and techniques of making and using tools and objects; technological changes, development of design terminology, consumer goods, hand workmanship, and industrial design. GE credit: ArtHum, Wrt.

**142A. World Textiles: Far East and Pacific (4) I.**

Rivers

Lecture—4 hours, field trip. Prerequisite: courses 132A, 132B, 160A, or 170A (concurrently) highly recommended: course 1, Art History 1A, 1B, or 1C also recommended. Textile arts of Japan, China, Africa, India, Oceania, Indonesia, and the Pacific Islands with emphasis on the aesthetic and stylistic qualities of textiles from these cultures. GE credit: ArtHum, Wrt.

**142B. World Textiles: Middle East, Europe and the Americas (4) III.** The Staff

Lecture—4 hours; two field trips. Prerequisite: course 1; a studio class highly recommended: course 24, 124, 131, 132A, 132B, 160A-160B-160C or 170A-170B-170C (concurrently). Study of concepts and methods significant in the historical, social, esthetic

and stylistic development of the textile arts. GE credit: ArtHum, Wrt.

**143. History of Costume Design (4) II.** Stabb  
Lecture—4 hours; field trip. Prerequisite: Art History 1A or the equivalent; background in art or design history recommended. History of costume design from the earliest times to the present with emphasis on both aesthetic and functional aspects. GE credit: ArtHum, Wrt.

**144. History of Interior Design (4) III.** Plummer  
Lecture—4 hours. Prerequisite: course 140 and Art 1C or the equivalent. History of interior design in Europe and America from the classical period to modern times. Emphasis on the dwelling in its cultural setting and the development of the theory of modern interior design. GE credit: ArtHum, Wrt.

**150. Computer-Assisted Drawing for Designers (4) II, III.** The Staff  
Studio—8 hours. Prerequisite: courses 21, 121. Computer-assisted drafting for interior architecture and design.

**152A. Visual Communication: Graphic Design Production (4) I.** Sylva in charge  
Studio—8 hours. Prerequisite: course 22 or consent of instructor. Priority given to Design majors. Focus on the understanding of symbolism and representation as essential components to the development of effective logos and identity systems. Emphasis on the need to incorporate these design strategies within the context of computer-generated prepress limitations. Not open for credit to students who have taken course 25.

**152B. Visual Communication: Message Campaign Design (4) II.** Sylva in charge  
Studio—8 hours. Prerequisite: course 152A or consent of instructor. Priority given to Design majors. By analyzing and utilizing strategies used in advertising, this class explores the power of visual media to change public opinion on issues of social concern and human rights. Visual designs will be created on Macintosh platforms. Not open for credit to students who have taken course 133A.

**153. Visual Communication: Internet and Interactive Design (4) III.** Sylva  
Studio—8 hours. Prerequisite: course 22 or consent of instructor; course 152B highly recommended. Priority given to Design majors. Introduction to computer-based interactive design for World Wide Web, Intranet systems, CD-ROM, or kiosks. Emphasis in development of strategies for content development; visual cohesiveness between content and interface design; and graphic production techniques using Macintosh platform. Not open for credit to students who have taken course 133B.

**160A. Textile Design: Patterning and Resists (4) II.** Rivers  
Studio—8 hours; required field trip. Prerequisite: courses 1, 14, 15 or the equivalent. Open to senior majors in Design and Textiles and Clothing. Exploration of the design, dyeing and patterning of hand-printed textiles; emphasis on the unique qualities of the individual producer. Techniques include tie-dye, direct dyeing (with fiber-reactive dyes and indigo) and batik resists.

**160B. Textile Design: Screen Printing and Advanced Technique (4) III.** Rivers  
Studio—8 hours; required field trip. Prerequisite: course 160A. Open to senior majors in Design and Textiles and Clothing. Exploration of the design, dyeing and patterning of hand-printed textiles; emphasis on the unique quality of the individual producer. Techniques include silk screen printing, photo silkscreen, and advanced dyeing processes.

**170A. Costume Design (4) I.** Stabb  
Studio—8 hours; required field trip. Prerequisite: courses 1, 14, 15, 77B (or the equivalent); course 142A taken concurrently recommended. Open to Design and Textiles and Clothing majors. Exploration of costume design as an expression of contemporary and projected individual image. Emphasis on one-of-a-kind garments in relationship to surface design and archetypal forms.

**170B. Apparel Design (4) III.** Stabb  
Studio—8 hours; required field trip. Prerequisite: courses 77B, 170A. Exploration of apparel design processes for industry within the social and physical context. Emphasis on two-dimensional conceptualization of ideas utilizing commercial textiles for ready-to-wear.

**\*177. Apparel Design for Consumer Cultures (4) III.** The Staff  
Studio—8 hours. Prerequisite: course 170B. Principles and processes of designing apparel for various user groups. The relationship among clothing, the body, and the environment is addressed in meeting functional and aesthetic concerns.

**180A. Advanced Interior Architecture (4) I.** Berteaux  
Studio—8 hours; field trip. Prerequisite: course 134C and senior standing. Advanced problems in interior architectural design emphasizing re-use of existing buildings. Focus is on commercial and retail environments, code requirements, color and lighting.

**180B. Advanced Interior Architecture (4) II.** Harrison  
Studio—8 hours; field trip. Prerequisite: course 180A. Advanced problems in interior architectural design emphasizing space planning for corporate and institutional environments.

**180C. Senior Project in Interior Architecture (4) III.** Berteaux  
Studio—8 hours. Prerequisite: course 180B, 193A; course 193B concurrently. A comprehensive design project defined and carried out individually by each student as a senior project, working from a detailed program developed winter quarter of a subject in interior architecture of special interest to the student.

**\*190. Proseminar (1) II, III.**  
Seminar—1 hour. Prerequisite: design major or consent of instructor. Philosophies of design explored through discussion and presentation of research results. May be repeated three times for credit. (P/NP grading only.)

**191A-D. Workshops in Design (4-12) I, II, III.** The Staff (Stabb in charge)  
Seminar—1 hour; studio or field experience—3 hours per unit (units determined by instructor and student); field trip. Prerequisite: course 14, 15; upper division standing and consent of instructor. Faculty initiated workshops featuring advanced studies and applications of original work in Design: **(A)** Costume; **(B)** Environment; **(C)** Graphics; **(D)** Textiles. Credit limited to 12 units in one section or a combination of sections. Letter grading by contract.

**192. Internship (1-6) I, II, III** summer. The Staff (Stabb in charge)  
Internship—3–18 hours. Prerequisite: completion of 84 units and consent of instructor. Supervised internship, off and on campus, in areas of design including environmental, costume, textile, museum, display and interior design. Enrollment limited to 3 units per quarter or 6 units per summer session. (P/NP grading only.)

**193A. Research for Senior Project in Interior Architecture (2) II.** Berteaux  
Lecture/discussion—2 hours. Prerequisite: course 180A; course 180B concurrently. Problem-focused research for senior students in interior architecture. Selection and research of a topic for a senior project in course 180C and the development of a preliminary program for the selected project. (P/NP grading only.)

**193B. Senior Project Documentation (1) III.** Berteaux  
Lecture/discussion—1 hour. Prerequisite: course 193A, 180B; course 180C concurrently. Revision and completion of research begun in course 193A and the documentation of the completed senior project in course 180C. Documentation to be done on the computer and produced in tabloid-sized booklet. (P/NP grading only.)

**197T. Tutoring in Design (1-5) I, II, III.** The Staff (Stabb in charge)  
Discussion—3–15 hours. Prerequisite: upper division standing and consent of instructor. Leading of small discussion groups or studio meetings affiliated with

one of the department's regular courses. (P/NP grading only.)

**198. Directed Group Study (1-5) I, II, III.** The Staff (Stabb in charge)  
Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

**199. Special Study of Advanced Undergraduates (1-5) I, II, III.** The Staff (Stabb in charge)  
(P/NP grading only.)

## Graduate Courses

**221. Experimental Approaches to Textile and Costume Design Media and Methods (4) I.** The Staff  
Lecture/discussion—2 hours; seminar—1 hour; term paper required. Prerequisite: graduate standing in Textile Arts and Costume Design or consent of instructor. Covers perspectives on theoretical and aesthetic issues such as methodology in historical, contemporary and ethnographic fiber/fabric media. Students apply theories to their creative explorations for presentation and discussion.

**\*222. Seminar in Costume and Textile Design Criticism (4) II.** The Staff  
Seminar—2 hours; discussion—1 hour; variable—1 hour. Prerequisite: course 221, graduate standing in Textile Arts and Costume Design or consent of instructor. An open forum which addresses criticism and communication in relation to creative work in textile arts and costume design through seminar, readings, field trips and discussion.

**224. Seminar in Textile and Costume Design Research (4) I, II, III.** The Staff  
Lecture—4 hours; discussion—1 hour. Prerequisite: course 222; to be taken concurrently with course 142A (fall), 142B (spring) or 143 (winter) with separate discussion section; graduate standing in Textile Arts and Costume Design or consent of instructor. Required of first-year students. Students utilize existing historical and ethnographic materials as a point of departure for creative work through research and examination of textile/costume specimens with oral and written presentation of findings. May be repeated for credit.

**290. Seminar in Design (4) II, III.** The Staff  
Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Selected topics in design methodology, research, communication, and education. May be repeated for credit.

**292. Practicum in Textile Arts/Costume Design (1-12) I, II, III.** The Staff  
Prerequisite: graduate standing in Textile Arts and Costume Design or consent of instructor. Interaction with a working professional in the student's field of interest to apply theories and concepts to working practice. (S/U grading only.)

**298. Directed Group Study for Graduate Students (1-5) I, II, III.** The Staff  
Studio. Prerequisite: consent of instructor. (S/U grading only.)

**299. Individual Focused Study (1-12) III.** The Staff  
Prerequisite: graduate standing in Textile Arts and Costume Design or consent of instructor. Advanced study in studio practice on independent projects with faculty consultation. May be repeated for credit.

**299D. Project Concentration (1-12) I, II, III.** The Staff  
Prerequisite: graduate standing in Textile Arts and Costume Design or consent of instructor. A minimum of 22 units must be taken in Project Concentration and Individual Focused Study. Student creates a body of original work at a professional level, with written and visual documentation of process and concepts underlying the project, culminating in public presentation. May be repeated for credit. (S/U grading only.)

## Professional Course

**396. Teaching Assistant Training Practicum (1-4) I, II, III.** The Staff (Chairperson in charge)  
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Dietetics

(College of Agricultural and Environmental Sciences)

### The Major Program

The Dietetics major provides students with training in normal and therapeutic nutrition, biological and social sciences, food science, communication, business management and food service management. This major fulfills the academic requirements for admission into a dietetics internship or the equivalent, which must be completed before qualifying for registration as a dietitian.

**The Program.** The Dietetics major takes the same basic core of nutrition classes as the Nutrition Science major, but includes additional courses such as food service management, education, sociology, and communication skills to prepare for work with the public. Dietetics students spend the first two years completing preparatory course work in the basic biological sciences, along with several of the social sciences. In the final two years, students take courses in normal and clinical nutrition, food science, biochemistry, and management techniques.

Entering freshman or transfer students are assumed to have basic computer skills and to demonstrate mathematics competency adequate to pass the Pre-calculus Qualifying Examination with a minimum score of 27, or have taken calculus at a community college or other four-year institution.

**Career Alternatives.** The Dietetics major qualifies students to apply for the American Dietetics Association "accredited internship," enabling them to become a Registered Dietitian, the professional credential necessary to work in a clinical setting. Once dietitians are registered, they generally seek employment in administrative, therapeutic, teaching, research, or public health/public service positions in clinics, hospitals, schools, or other similar institutions. There is a growing role for dietitians working in settings outside of the traditional hospital (for example, in state and federal nutrition programs, nutrition education, Peace Corps and Cooperative Extension work). Students who complete the undergraduate preparation in dietetics are also qualified to enter graduate programs in dietetics, nutrition science, public health nutrition, and food service management.

### B.S. Major Requirements:

(For convenience in program planning, the *usual* courses taken to satisfy the requirements are shown in parentheses. Equal or more comprehensive courses are acceptable. *Courses shown without parentheses are required.*)

|                                                                                                           | UNITS        |
|-----------------------------------------------------------------------------------------------------------|--------------|
| <b>Written/Oral Expression</b> .....                                                                      | <b>8</b>     |
| Written expression (English 1 or 3) .....                                                                 | 4            |
| Oral expression (Communication 1).....                                                                    | 4            |
| (Above courses simultaneously satisfy College requirement.)                                               |              |
| <b>Preparatory Subject Matter</b> .....                                                                   | <b>56-58</b> |

## Dramatic Art

### Programs in Dance

(College of Letters and Science)

Janelle Reinelt, Ph.D., Chairperson of the Department

Department Office, 222 Dramatic Art Building (530-752-0888)

#### Faculty

Sarah Pia Anderson, Professor  
Bobbie J. Bolden, M.A., Lecturer (*Dramatic Art, African American and African Studies*)  
Sue Ellen Case, Ph.D., Professor  
Susan Foster, Ph.D., Professor  
Phyllis J. Kress, M.A., Lecturer  
Janelle Reinelt, Ph.D., Professor  
Barbara Sellers-Young, Ph.D., Associate Professor  
Karen Shimakawa, Ph.D., Assistant Professor (*Dramatic Art, Asian American Studies*)  
Darrell F. Winn, M.A., Lecturer  
William B. Worthen, Ph.D., Professor (*Dramatic Art, English*)

#### Emeriti Faculty

Ruby Cohn, Ph.D., Professor Emerita  
Harry C. Johnson, M.A., Professor Emeritus  
William E. Kleb, D.F.A., Professor Emeritus  
Robert K. Sarlós, Ph.D., Professor Emeritus  
Daniel E. Snyder, Professor Emeritus  
Alan A. Stambusky, Ph.D., Professor Emeritus

### The Major Program

The A.B. degree in Dramatic Art provides students with an appreciation for and understanding of performance and its role in culture and society and provides a strong foundation in all aspects of drama, theater, and dance performance and production. While this is not a pre-professional program with a high degree of specialization, students can build significant skills in specific areas as well as achieving the broad goals of the degree.

**Productions and Facilities.** Productions each year are separated into two "seasons." The University Theatre Season usually consists of five or six major productions of established plays and dance productions. The Studio Season consists of smaller productions of new student-written plays and established plays. Also included in the production program are occasional major presentations of an experimental works and many class-related projects.

**Career Alternatives.** The program enables students to pursue a variety of opportunities after graduation, including graduate education, public sector arts employment, advanced professional training programs, and, in some cases, professional work.

### A.B. Major Requirements:

|                                                                                                                                                                                                                           | UNITS     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Preparatory Subject Matter</b> .....                                                                                                                                                                                   | <b>26</b> |
| Dramatic Art 20, 24, 25, 26 .....                                                                                                                                                                                         | 14        |
| Dramatic Art 21A or 14.....                                                                                                                                                                                               | 4         |
| Additional units to achieve a total of 26 lower division units chosen from Dramatic Art 21B, 40A, 40B, 41A, 41B, 98, 99, African American and African Studies 51 or courses in other departments with adviser's approval. |           |
| <b>Depth Subject Matter</b> .....                                                                                                                                                                                         | <b>40</b> |
| Dramatic Art 127A, 156A, 156B, 156C .....                                                                                                                                                                                 | 16        |
| Dramatic Art 127B, 160A .....                                                                                                                                                                                             | 4         |
| Two courses chosen from Dramatic Art 124B, 124C, 124D .....                                                                                                                                                               | 8         |
| Two courses chosen from Dramatic Art 150, 153, 154, 155, 159 .....                                                                                                                                                        | 8         |
| A minimum of 4 elective units chosen from the following: Dramatic Art 121A, 121B, 122A, 122B, 124A, 124B, 124C, 124D, 125, 127B, 130, 140A, 140B, 143, 170, or courses in other departments with adviser's approval ..... | 4         |
| <b>Additional Requirements</b> .....                                                                                                                                                                                      | <b>14</b> |

During the undergraduate career, majors are to participate in University Theatre Season and Studio productions. Participation must include work in three of the following four areas: acting/dance, design, studio (scenic, costume, lighting, painting, props, sound), directing/ playwriting/stage management. In addition, majors are expected to serve on a running crew a minimum of one quarter per academic year. Majors are also expected to attend theatre performances.

Total Units for the Major.....80

**Major Adviser.**

### Minor Program Requirements:

|                                           | UNITS     |
|-------------------------------------------|-----------|
| <b>Dramatic Art</b> .....                 | <b>20</b> |
| Dramatic Art 156A, 156B, 156C.....        | 12        |
| One of Dramatic Art 124B, 124C, 124D..... | 4         |
| (Plus prerequisites)                      |           |
| <b>Additional Requirements</b> .....      | <b>4</b>  |

During the undergraduate career, minors are to participate in University Theatre Season and Studio productions. Participation must include work in two of the four areas required by the major. Minors are expected to attend theatre performances.

**Transfer Students.** As described above, all students completing a major in Dramatic Art must participate in dramatic productions, including work in at least three of the following four areas: acting/dance, design, studio (scenic, costume, lighting, painting, props, sound), directing/play writing/stage management. Such experience gained prior to transfer to UC Davis may count toward partial satisfaction of this requirement; transfer students should see the major adviser for an evaluation of your previous experience. While in residence at UC Davis, transfer students are required to participate in a minimum of five dramatic productions and that participation must include work in at least three of the four areas specified above.

**Guest Artists.** The Granada Visiting Artists Program brings distinguished professional British directors to the campus each year, teaching and directing in residence for a quarter. These working professional artists take the role of professor, interacting closely with students in the classroom and rehearsal halls and providing them excellent pre-professional experiences of theater practice.

**Graduate Study.** The Department of Dramatic Art offers programs of study and research leading to the M.F.A. (acting) and Ph.D. (performance and culture) degrees. Detailed information may be obtained by contacting the Graduate Adviser.

**Graduate Adviser.** W.B. Worthen.

## Courses in Dramatic Art (DRA)

### Lower Division Courses

#### 1. Theatre, Performance and Culture (4) I, II, III. The Staff

Lecture/discussion—4 hours. Introductory investigation of the nature of all performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, dance, sports, political rallies and demonstrations, religious celebrations, civic pageants and "occasions." Investigation of the border between ritual and performance. GE credit: ArtHum, Div, Wrt.

**10. Introduction to Acting (3) I, II, III.** The Staff  
Laboratory/discussion—4 hours; term paper. Fundamentals of movement, speech, theatre games, and improvisation. Selected reading and viewing of the theatre productions. Intended for students not specializing in Dramatic Art.

**14. Introduction to Contemporary Dance (2) I, II, III.** Bolden  
Laboratory/discussion—4 hours. Introduction to basic movement skills used in contemporary dance. Focus on holistically preparing the body for dance. Basic techniques and terminology used in ballet, modern or jazz dance and short combinations emphasizing use of space, quality, and rhythm.

**20. Introduction to Dramatic Art (4) I, III.** The Staff  
Lecture—3 hours; discussion—1 hour. Understanding and appreciation of both the distinctive and collaborative contributions of playwright, actor, director, and designer to the total work of dramatic art. Study of plays from the major periods of dramatic art in their cultural contexts. GE credit: ArtHum.

**21A. Fundamentals of Acting (4) II.** The Staff  
Lecture—2 hours; laboratory—4 hours. Prerequisite: course 20. Physical and psychological resources of the actor. Experience in individual and group contact and communication, theatre games, advanced improvisation, sound and movement dynamics. Viewing of the theatre productions. Limited to those planning to major in Dramatic Art.

**21B. Fundamentals of Acting (4) III.** The Staff  
Lecture—2 hours; laboratory—4 hours. Prerequisite: course 21A and consent of instructor. Theory and practice of acting with emphasis on character analysis, interpretation, and development. Acting in a student-directed project. Viewing of theatre productions. Limited to those planning to major in Dramatic Art.

**24. Visual Aspects of Dramatic Art (4) I.** The Staff  
Lecture—3 hours; laboratory—2 hours. Understanding and appreciation of the visual aspects of dramatic art: theatre architecture, scenery, lighting, costume, and makeup.

**25. Technical Aspects of Dramatic Production (3) III.** The Staff  
Lecture—3 hours. Technical principles of dramatic production emphasizing the three areas of scenic, costume and lighting studios. Subjects covered include basic tools, materials and equipment, production practices; and the interdisciplinary and collaborative nature of dramatic production.

**26. Performing Arts Production Management (3) I.** Winn  
Lecture—3 hours. Theoretical study of performing arts administration and backstage operations from audition through performance. Techniques of scheduling, production management, stage management, technical direction, audience control, box office, promotion, safety, accommodations for persons with disabilities and emergency procedures.

**30. Theatre Laboratory (1-5) I, II, III.** The Staff  
Prerequisite: course 25 or consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit up to a total of 8 units.

**40A. Beginning Modern Dance (2) I.** Bolden  
Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of modern

dance focusing primarily on the development of techniques and creative problem solving. Basic anatomy, dance terminology, and a general overview of modern dance history. May be repeated once for credit with consent of instructor.

**40B. Intermediate Modern Dance (2) II.** Bolden  
Laboratory/discussion—4 hours. Prerequisite: course 40A. Modern dance techniques. Basic anatomy, dance terminology, and a general overview of modern dance history.

**41A. Beginning Jazz Dance (2) II.** Bolden  
Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminology and general overview of jazz dance history. May be repeated once for credit with consent of instructor.

**41B. Intermediate Jazz Dance (2) III.** Bolden  
Laboratory/discussion—4 hours. Prerequisite: course 41A. Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and a general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers. May be repeated once for credit with consent of instructor.

**42A. Beginning Ballet (2) III.** The Staff  
Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of ballet, focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history. May be repeated once for credit with consent of instructor.

**42B. Intermediate Ballet (2) I.** The Staff  
Laboratory/discussion—4 hours. Prerequisite: course 42A or consent of instructor. Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythmic, and qualitative understanding. Anatomy, ballet terminology, and dance history. May be repeated once for credit with consent of instructor.

**98. Directed Group Study (1-5) I, II, III.** The Staff (Chairperson in charge)  
Primarily for lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5) I, II, III.** The Staff (Chairperson in charge)  
(P/NP grading only.)

### Upper Division Courses

**\*115. Advanced Study of Major Film Makers (4) III.** The Staff  
Lecture/discussion—3 hours; film viewing—2 hours. Prerequisite: course 15. Analysis of the contribution of some outstanding film creators. Study of diverse aesthetic theories of the cinema and their application to selected films. May be repeated for credit when different film creator studied.

**\*121A. Advanced Acting: Mask, Myth, and Tragedy (4) I.** The Staff  
Lecture/laboratory—6 hours. Prerequisite: course 21B and consent of instructor. Theory and practice of acting focused on the performance skills necessary to enact verse plays. Specific concentration on language as vocal and physical metaphor. Offered in alternate years.

**\*121B. Advanced Acting: Comedy from Farce to Manners (4) II.** The Staff  
Lecture/laboratory—6 hours. Prerequisite: courses 21B, 121A and consent of instructor. Theory and practice of acting in comic plays. Specific issues addressed will be comic characterization, physical mask, and timing. Offered in alternate years.

**122A. Advanced Acting: Realism (4) I.** The Staff  
Lecture/laboratory—6 hours. Prerequisite: course 21B and consent of instructor. The issues of Stanislavski realism are explored through selected plays. Script analysis using improvisation and emotional scoring. Offered in alternate years.

**122B. Advanced Acting: Non-Realism (4) II.** The Staff  
Lecture/laboratory—6 hours. Prerequisite: courses 21B, 122A and consent of instructor. Exploration of

the acting techniques needed to perform a non-realistic script. Different avant-garde movements will be examined through performance of the scripts. Offered in alternate years.

**124A. Principles of Theatrical Design: Scenery (4) II.** The Staff  
Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Scene design processes, working drawings, sketching techniques, scale models, methods and materials of scenery construction.

**124B. Principles of Theatrical Design: Scenery (4) III.** The Staff  
Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Analysis of plays in terms of scene design, elements of design, execution of designs for modern and period plays.

**124C. Principles of Theatrical Design: Lighting (4) III.** Winn  
Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Theories of lighting the stage, equipment and control systems, execution of lighting plots.

**124D. Principles of Theatrical Design: Costume (4) II.** Kress  
Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Source materials for theatrical costuming, selecting fabrics, elements of design, analysis of plays in terms of costume design, execution of designs for modern and period plays.

**125. Scenic Painting: Studio (4) II.** The Staff  
Lecture—2 hours; studio—3 hours; laboratory—3 hours. Prerequisite: upper division standing in Dramatic Art, Art Studio, or Design; or course 24 or 25, or consent of instructor. Scene painting techniques, practices and materials. Course satisfies production requirement in studio category. May be repeated once with consent of instructor. Offered in alternate years.

**127A. Principles of Directing (4) I.** Anderson  
Lecture—2 hours; laboratory—4 hours. Prerequisite: courses 21A, 26; two of 156A, 156B, 156C; or consent of instructor. The director's creative approach to the play and to its staging.

**127B. Principles of Directing (4) II.** Anderson  
Lecture—2 hours; laboratory—4 hours; rehearsal. Prerequisite: course 127A and consent of instructor for non-majors. The director's creative approach to the actor.

**\*130. Approaches to Theatrical Design: Practice and Theory (4) II.** Hunt  
Seminar—2 hours; studio—4 hours. Prerequisite: upper division standing in Dramatic Art, Art Studio or Design. Advanced scenic design study in specific areas including but not limited to: research, design styles and concepts, new materials and techniques, photography, projections, computer technology, spectacle and special effects, and alternative theatre forms and genres. Course satisfies Dramatic Art production requirement in Design. Offered in alternate years.

**140A. Dance Composition I (3) II.** Bolden  
Lecture/laboratory—5 hours. Prerequisite: courses 40A, 41A, and 42A, or consent of instructor. Introduction to the craft of choreography. Students will compose phrases and present movement studies based on the elements of choreography: motivation, space, time, force/energy.

**140B. Dance Composition II (3) III.** Bolden  
Lecture/laboratory—5 hours. Prerequisite: course 140A. Continuation of the study of choreography, focusing on the development of group choreography: duets, trios, quartets and group work, form, and accompaniment.

**140C. Dance Composition III (3) I.** The Staff  
Lecture/laboratory—5 hours. Prerequisite: courses 140A, 140B. Continuation of study of choreography focusing on sequencing movements for groups. The relation between dance and allied mediums of music, sets, costumes and lighting. Students conceptualize a choreographic issue and explore it through creation of short dance studies.

**141. Introduction to the Fundamentals of Movement** (3) I. Sellers-Young

Lecture/discussion—3 hours. Introduction to fundamentals of movement that combines intellectual and kinesthetic understanding of the body's skeletal and muscular systems. Explorations based on theories of body mind specialists Feldenkrais, Bartenieff and Sweigard as well as the eastern discipline of Yoga.

**143. Dance and Movement Studio** (1-4) I, II, III. Bolden

Laboratory/discussion—2-8 hours. Prerequisite: course 14 or consent of instructor. Special studies in dance and movement such as African, Balinese, Baroque, Chinese, European, and stage combat. Offered as needed for stage productions. May be repeated for credit for a total of 8 units.

**145. Directed Choreography Projects** (4) II. The Staff

Lecture/laboratory—6 hours. Prerequisite: courses 140A, 140B, 140C or consent of instructor. Conceptualization, creation, casting, rehearsing, and concert presentation of complete dances, with students integrating elements of stagecraft and directing the on-stage rehearsals.

**150. American Theatre and Drama** (4) II. The Staff

Lecture—4 hours. The history of the theatre from Colonial times to the present. Readings of selected plays. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**154. Asian Theatre and Drama: Contexts and Forms** (4) II. Sellers-Young

Lecture/discussion—4 hours. Prerequisite: upper division standing. Selected Asian plays and performance forms in their cultural and artistic contexts; myth, ritual and the theatre; performance training, visual presentation of the text; political theatre; intercultural performance—the fusion of Asian and Western traditions. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**\*155. Representing Race in Performance** (4) III. The Staff

Lecture—4 hours. Examination of how "race" is represented and performed in American culture. Course will feature different sub-headings such as "African American Theatre" or "Asian-Americans on Stage." May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**155A. African American Dance and Culture in the United States, Brazil and the Caribbean** (4) I. Bolden

Lecture/discussion—4 hours. A comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as African American and African Studies 155A.) Offered in alternate years.

**156A. History of Theatre and Dance: Ancient to 1650** (4) I. Worthen

Lecture—4 hours. Overview of theatre and dance as it has come to be recognized in ancient societies through to 1650. Performance traditions studied include Greek, Indian, Aztec, Roman, Japanese (Noh), through the Renaissance. GE credit: ArtHum, Div, Wrt.

**156B. History of Theatre and Dance: 1650-1900** (4) III. Reinelt

Lecture—4 hours. Overview of theatre and dance between 1650 and 1900. Dance and theatre are related to the specific social and political organizations of court society in 17th and 18th century France, Germany and England, and to Japanese society. GE credit: ArtHum, Div, Wrt.

**156C. History of Theatre and Dance:**

**The Twentieth Century** (4) II. Shimakawa  
Lecture—4 hours. Overview of theatre and dance in the twentieth century. Although largely focused on Western theatrical practices, the relationship between East and West performance practices will be studied and contemporary Japanese theatre will be included. GE credit: ArtHum, Div, Wrt.

**159. Contemporary Experimental Theatre and Drama** (4) I. Case

Lecture—4 hours. Examination and evaluation of the "New Theatre." Course includes attending theatre events. May be repeated once with consent of instructor.

**160A-160B. Principles of Playwriting** (4-4) I-II. The Staff

Lecture/seminar—4 hours. Prerequisite: two courses in Dramatic Art or related courses in other departments; course 160A prerequisite for 160B or consent of instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays.

**\*170. Media Theatre** (3) I. The Staff  
Lecture—1 hour; rehearsal—2 hours; performance—1 hour. Prerequisite: upper division standing in Dramatic Art, Music, Art Studio, Design, Computer Science, or Engineering; Computer Science, or consent of instructor. New media and application of theatre design and performance. Emphasis on collaborative process in relationship to integration of emerging technologies and formation of new theatrical works. Development of collaborative performance through lecture, demonstration, improvisation and experimentation. May be repeated once for credit.

**180. Theatre Laboratory** (1-5) I, II, III. The Staff  
Prerequisite: upper division standing and course 25, or consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit.

**192. Internship in Dramatic Art** (1-12) I, II, III.

The Staff (Chairperson in charge)  
Internship—3-36 hours. Prerequisite: upper division or graduate work in dramatic art; upper division course related to the project; consent of instructor and Department Chairperson. Internship outside the academic department enabling students to practice their skills. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**194HA-194HB. Special Study for Honors Students** (3-3) I, II, III. The Staff

Independent study—9 hours. Prerequisite: qualification for Letters and Science Honors Program and admission to Dramatic Art Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Dramatic Art. (Deferred grading only, pending completion of sequence.)

**197T. Tutoring in Dramatic Art** (1-5) I, II, III.

The Staff (Chairperson in charge)  
Tutoring—1-5 hours. Prerequisite: upper division or graduate standing with major in dramatic art; consent of department chairperson. Leading of small voluntary groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III.

The Staff (Chairperson in charge)  
Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses****\*200. Methods and Materials in Theatre Research** (4) I. The Staff

Seminar—3 hours; term paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field.

**211. Advanced Voice and Speech** (2) I, II, III.

The Staff  
Laboratory—4 hours. Open to advanced undergraduates with consent of instructor. Voice production and speech related to specific acting problems in classical plays, particularly in verse. May be repeated for credit.

**212. Advanced Stage Movement** (2) I, II, III.

Sellers-Young  
Laboratory—4 hours. Prerequisite: open to advanced undergraduates with consent of instructor. Rhythmic

movement patterns relating to acting problems in classic and modern plays. May be repeated for credit.

**221. Special Problems in Advanced Acting** (4)

I, II, III. Granada Artist, The Staff  
Seminar—2 hours; laboratory—4 hours. Prerequisite: consent of instructor. Advanced acting problems arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit.

**\*228. Seminar in Directing Theory: Non-Realism** (4) III. Granada Artist

Seminar—3 hours; term paper. Modern directing theory as it applies to non-realistic theatre; development of directorial concepts for production of selected non-realistic plays—Greek to the present; emphasis on textual analysis. Offered in alternate years.

**\*229. Special Problems in Directing** (5) I, II, III.

The Staff and Granada Artist  
Seminar—2 hours; laboratory—2 hours; rehearsal—4 hours. Prerequisite: consent of instructor. Projects in directing scenes selected from plays from ancient Greece to the present. May be repeated for credit.

**\*250. Modern Theatre** (4) II. The Staff

Seminar—3 hours; term paper. The theatre of Europe and America, 1860-1940, with emphasis on the relationship of the dramas of the period to the physical circumstances under which they were produced. Offered in alternate years.

**259. Topics in Contemporary Theatre and Performance** (4) I. Cohn

Seminar—3 hours; term paper. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship (e.g., "Brecht and After," "British Theater," "Race and Gender in Performance." May be repeated five times for credit.

**\*265A. Theory of Dramatic Art: Modes of Production** (4) II. The Staff

Seminar—3 hours; term paper. Introduces students to literature of theatrical practice, cultural and aesthetic theory, as related to practical stage performance. Offered in alternate years.

**265B. Theory of Dramatic Art: Signification and the Body** (4) III. Reinelt

Seminar—3 hours; term paper. Introduce students to analysis of the body in performance, drawing on theoretical models from various fields. Offered in alternate years.

**265C. Theory of Dramatic Art: Technologies of Difference** (4) I. The Staff

Seminar—3 hours; term paper. Introduce students to history, theory, practice of staging social and cultural difference. Offered in alternate years.

**\*265D. Theory of Dramatic Art** (4) II. The Staff  
Seminar—3 hours; term paper. Theory and aesthetic principles of dramatic art as a fine art. Offered in alternate years. (Former course 265.)

**280. Theatre Laboratory** (1-12) I, II, III. The Staff  
Advanced practice in acting, designing, directing, playwriting, and technical theatre. May be repeated for credit.

**298. Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor.

**299. Individual Study** (1-12) I, II, III, The Staff (Chairperson in charge)

(S/U grading only.)

**299D. Dissertation Research** (1-12) I, II, III. The Staff (Chairperson in charge)

(S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum** (1-4) I, II, III. The Staff (Chairperson in charge)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

**Professional Course**

**413. Stage Make-up (1) II.** The Staff  
Lecture/laboratory—2 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Lectures, demonstrations, and practical work in aspects of theatrical make-up.

- Tianwei Xie, Coordinator (*Chinese*)

### The Major Program

The department offers a core language program in both Chinese and Japanese and courses in literature and culture. The core language program has two tracks: one for students who have no background whatsoever in Japanese or Chinese, and one for students with prior language background.

**The Program.** A student elects to major in either Japanese or Chinese. Practical language skills are taught using the most modern methods so that upon entering the upper division a student will have attained substantial fluency in the spoken language (hearing and speaking) and the written language (reading and writing). Upper division courses balance the need to further language skills with the need to understand and appreciate the cultural richness of either Chinese or Japanese civilization. All students are encouraged to combine their study of Japan's or China's language and literature with courses in related fields, and to study abroad through the UC International Summer Session programs, the Education Abroad Program, or through internships.

**Career Opportunities.** UC Davis graduates have learned that a major in Chinese or Japanese is a genuine, earned distinction that facilitates entrance to graduate programs and professional schools. In addition, job opportunities abound in virtually all career paths, especially for those who have completed study abroad.

**Chinese**

### A.B. Major Requirements:

**Preparatory Subject Matter .....19/34**  
Chinese 1, 2, 3, 4, 5, 6; or 1BL, 2BL, 3BL; or 1CN, 2CN, 3CN; and one 4-unit lower division Chinese literature course; Chinese 1A may be substituted for courses 1 and 2.

Recommended:  
Chinese 10, 11, 50, Comparative Literature 14, Japanese 10, Linguistics 1, History 9A.

**Depth Subject Matter .....36**  
Chinese 106, 107, 111, 112, 113, 114 .....24  
Three courses selected from Chinese 104, 105, 108, 109A-I, 110, 115, 116, 120, 130, 131, 132, 140, 160 .....12

Recommended:  
Japanese 101, 102, 103, 104, 105, 106; Anthropology 148A-148B; Art History 163A-163B; East Asian Studies 113; History 190A-190B-190C, 191A-191B; Religious Studies 172; or other advanced literature and culture courses selected in consultation with the undergraduate adviser.

**Total Units for the Chinese Major .....55/70**

**Japanese**

### A.B. Major Requirements:

**Preparatory Subject Matter .....15/30**  
Japanese 1, 2, 3, 4, 5, 6; or 8, 18, 28; Japanese 1A may be substituted for courses 1 and 2; Japanese 1B may be substituted for courses 1, 2, and 3.

Recommended:  
Japanese 10, 15, 25, Chinese 10, 11, 50, Linguistics 1, History 9B.

**Depth Subject Matter .....40**  
Japanese 101, 102, 103, 111, 112, 113 .....24  
Eight units selected from Japanese 104, 105, 106, 107, 108, 115, 131, 132, 133, 134, 135, 136, 201† .....8

Eight units selected from Chinese 104, 105, 106, 107, 109A-I, 110, 132; Anthropology 149A-149B; Art History 164; Comparative Literature 153; History 194A-194B-194C; Religious Studies 172; or other advanced literature and culture courses selected in consultation with the undergraduate adviser .....8

**Total Units for the Japanese Major .....55/70**

†See College procedures governing undergraduate enrollment in a graduate course.

**Major Advisers.** R. Borgen (*Japanese*), C.N. Chang (*Japanese*), K. Kim (*History, Japanese*), S. Volpp (*Chinese*), M. Yeh (*Chinese*).

### Minor Program Requirements:

Minors are offered in Chinese and in Japanese for students wishing to follow a formally recognized program of study in those languages and their literatures.

UNITS

**Chinese .....20**  
**Japanese .....20**

All upper division courses, including both language courses and literature in translation courses, may be used to meet this

requirement. One approved lower division course (Chinese 10, 11, 50; Japanese 10, 15, 25, 50) may also be used. In addition, students must demonstrate their language proficiency, normally through completion of Chinese 111 or Japanese 111. Only four units from 192, 197T, 198, and 199 may be applied to the minor. For details, consult the undergraduate advisers.

**Education Abroad Program.** The university maintains study abroad programs in China, Japan, Hong Kong, and Taiwan. They offer excellent opportunities for students to polish their language skills and experience Asian cultures firsthand. Students are encouraged to participate. Appropriate courses taken abroad can be applied toward the major or the minor. For details, see the department's undergraduate adviser and the Education Abroad Program office.

**Related Courses.** See East Asian Studies course list.  
**Prerequisite Credit.** No student may repeat a course if that course is a prerequisite for a course that has already been completed with a grade of C- or better.

**Placement.** Chinese 1 and Japanese 1 are intended for beginning students with no prior knowledge of those languages. Students who do have some knowledge but wish to improve their skills should meet with one of the advisers to discuss appropriate placement. Students must follow departmental guidelines for placement in all language courses and instructor approval is required for enrollment.

## Courses in Chinese (CHN)

### Lower Division Courses

**1. Elementary Chinese (5) I.** The Staff  
Lecture/discussion—5 hours. Introduction to Chinese grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed Chinese 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)

**\*1A. Intensive Elementary Modern Chinese (10) II.** The Staff  
Lecture—5 hours; discussion—5 hours. Combines the work of courses 1 and 2 into a single quarter. Those who complete this course may go on to course 3.

**1BL. Accelerated Written Chinese I (5) I.** The Staff  
Lecture—5 hours. Prerequisite: ability to speak and understand oral Chinese (Mandarin or dialect). Designed for students who already have some degree of fluency in spoken Chinese, but who cannot read Chinese characters. Concentrates on developing reading ability and accelerates progress to upper division. Not open for credit to students who have completed course 8. (Former course 8.)

**\*1CN. Mandarin for Cantonese Speakers I (5) I.** The Staff  
Lecture—5 hours. Prerequisite: ability to read and write Chinese characters at the elementary school level. Accelerated training in spoken Mandarin, particularly in the phonetic transcription system known as pinyin, for students who already can read and write Chinese. Course assumes no knowledge of spoken Mandarin Chinese. Not open for credit to students who have completed course 7. (Former course 7.)

**2. Elementary Chinese (5) II.** The Staff  
Lecture/discussion—5 hours. Prerequisite: course 1. Continuation of course 1 in the areas of grammar and basic language skills.

**2BL. Accelerated Written Chinese II (5) II.** The Staff  
Lecture—5 hours. Prerequisite: course 1BL. Continuation of course 1BL. Designed to accelerate the progress of students who already know spoken Mandarin or a dialect but cannot read or write Chinese characters. Not open for credit to students who have completed course 18. (Former course 18.)

**\*2CN. Mandarin for Cantonese Speakers II (5) II.** The Staff

Lecture—5 hours. Prerequisite: course 1CN. Continuation of course 1CN. Training in spoken Mandarin for students who already can read and write Chinese. Not open for credit to students who have completed course 17. (Former course 17.)

**3. Elementary Chinese (5) III.** The Staff

Lecture/discussion—5 hours. Prerequisite: course 2. Continuation of course 2. Completion of grammar sequence and continuing practice of all language skills.

**\*3A. Situational Chinese (2) I, III.** The Staff

Discussion—2 hours. Prerequisite: course 3 (may be taken concurrently). Instructor and students create a specific social situation and establish roles for student-participants. Using techniques of drama and substitution drills, students have greater opportunities to develop spoken skills than is possible in course 3.

**3BL. Accelerated Written Chinese III (5) III.**

The Staff

Lecture—5 hours. Prerequisite: course 2BL. Advanced written styles and syntax in Chinese. Students completing this course proceed to course 111, which starts the third-year Chinese, or to some other appropriate upper-division course. Not open for credit to students who have completed course 28. (Former course 28.)

**\*3CN. Mandarin for Cantonese Speakers III (5) III.** The Staff

Lecture—5 hours. Prerequisite: course 2CN. Continuation of course 2CN. Prepares students for entering upper division courses in Chinese. Not open for credit to students who have completed course 27. (Former course 27.)

**4. Intermediate Chinese (5) I.** The Staff

Lecture/discussion—5 hours. Prerequisite: course 3 or the equivalent. Intermediate-level training in spoken and written Chinese in cultural contexts, based on language skills developed in course 3.

**5. Intermediate Chinese (5) II.** The Staff

Lecture/discussion—5 hours. Prerequisite: course 4 or the equivalent. Intermediate-level training in spoken and written Chinese in cultural contexts, based on language skills developed in course 4.

**6. Intermediate Chinese (5) III.** The Staff

Lecture/discussion—5 hours. Prerequisite: course 5 or the equivalent. Intermediate-level training in spoken and written Chinese in cultural contexts, based on language skills developed in course 5.

**\*6A. Situational Chinese (2) I, III.** The Staff  
Discussion—2 hours. Prerequisite: course 6 (may be taken concurrently.) Instructor and students create a specific social situation and establish roles for student-participants. Using techniques of drama and oral repetition, students develop spoken fluency and appropriateness of expression as skills requisite to internships and study in China.

**10. Modern Chinese Literature (In English) (4) II.** The Staff

Lecture—3 hours; discussion—1 hour. Introductory course requiring no knowledge of Chinese language or history. Reading and discussion of short stories and novels and viewing of two films. Designed to convey a feeling for what China has experienced in the twentieth century. GE credit: ArtHum, Div, Wrt.

**11. Great Books of China (in English) (4) II.** The Staff

Lecture—3 hours; discussion—1 hour. Selected readings in English translation are supplemented with background information on periods, authors and the interrelationships of culture, literature and social change. Methods of analysis are introduced and applied in class discussions. GE credit: ArtHum, Div, Wrt.

**\*50. Introduction to the Literature of China and Japan (3) II.** Yeh

Lecture—3 hours. Methods of literary analysis and their application to major works from the various genres of Chinese and Japanese literature (in translation), including film. East Asian cultural traditions will also be introduced. (Same course as Japanese 50.) GE credit: ArtHum, Div, Wrt.

**98. Directed Group Study (1-5) I, II, III.** The Staff (Chairperson in charge)

(P/NP grading only.)

**99. Special Study for Undergraduates (1-5) I, II, III.** The Staff (Chairperson in charge)

(P/NP grading only.)

**Upper Division Courses****\*104. Twentieth-Century Chinese Fiction (in English) (4) I.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or a course in Chinese history recommended. English language survey of Chinese fiction as it evolved amidst the great historical, social and cultural changes of the twentieth century. Thorough study of the most influential writers and genres. GE credit: ArtHum, Div, Wrt.

**\*105. Western Influences on Twentieth-Century Chinese Literature (in English) (4) III.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or History 9A recommended. Introduction of Western literary thought into modern China, the experimentation with Western literary forms and techniques, and the development of Marxism in contemporary literary writing. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**106. Chinese Poetry (in English) (4) III.** Yeh

Lecture—3 hours; discussion—1 hour. Prerequisite: History 9A or any course on traditional China recommended. Organized topically and chronologically, the lyric tradition is explored from the dawn of folk songs down to modern expressions of social protest. Topics include friendship, love, oppression, war, parting, death, ecstasy and beauty. All readings are in English. GE credit: ArtHum, Div, Wrt.

**107. Traditional Chinese Fiction (in English) (4) I.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or a course in Chinese history. English-language course studying the dawn of Chinese fiction and its development down to modern times. Combines survey history with close reading of representative works such as *The Story of the Stone* and famous Ming-Qing short stories. GE credit: ArtHum, Div, Wrt.

**\*108. Poetry of China and Japan (in English) (4) II.** Yeh

Lecture—3 hours; discussion—1 hour. A comparative approach to Chinese and Japanese poetry, examining poetic practice in the two cultures; includes a general outline of the two traditions, plus study of poetic forms, techniques, and distinct treatments of universal themes: love, nature, war, etc. Offered in alternate years. (Same course as Japanese 108.) GE credit: ArtHum, Div, Wrt.

**\*109A-I. Topics in Chinese Literature (in English) (4) III.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: depending on topic, course 10, 11, 104, 106, 107, or a course in Chinese history. Topics in Chinese literature may include: (A) crime and punishment; (B) love in poetry; (C) women writers; (D) the knight-errant; (E) the city in fiction; (F) the recluse; (G) the literature of twentieth-century Taiwan; (H) popular literature; (I) the scholar and the courtesan. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**\*110. Great Writers of China: Texts and Context (in English) (4) I, II.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: any course from the General Education Literature Preparation List, or consent of instructor. Examination of major theoretical concepts and interpretive methods in the study of literature by using examples from the Chinese tradition; discussions of classical and modern works with an emphasis on the relations between literature, author, society, and culture. GE credit: ArtHum, Div, Wrt.

**111. Modern Chinese: Reading and Discussion (4) I.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 6 or the equivalent. Readings in modern Chinese newspaper articles, essays, and short stories,

based on language skills developed in courses 1 through 6.

**112. Modern Chinese: Reading and Discussion (4) II.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 111. Readings in modern Chinese newspaper articles, essays, and short stories, based on language skills developed in course 111.

**113. Modern Chinese: Reading and Discussion (4) III.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 112. Readings in modern Chinese newspaper articles, essays, and short stories, based on language skills developed in course 112.

**114. Introduction to Classical Chinese: Confucius (4) I.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 6 or consent of instructor. Texts from the Confucian canon are read with the assistance of prepared word glossaries so that while learning to read classical Chinese, the students also experience the most influential books in the history of China in their original texts.

**115. Introduction to Classical Chinese: Mencius (4) II.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 114. Continues course 114 by reading selections from the text of the Mencius.

**116. Introduction to Classical Chinese: Narrative Styles (4) III.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 115. Continues course 115 by reading selections from the Records of the Grand Historian and other early, influential works.

**120. Advanced Chinese (4) I, III.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 113 or consent of instructor. Selected readings from all genres to develop advanced skills in reading, writing, aural comprehension, and translation. May be repeated once for credit.

**\*130. Readings in Traditional Chinese Fiction (4) II.** The Staff

Lecture—1 hour; discussion—3 hours. Prerequisite: course 112 or the equivalent; course 114 recommended. Close reading in Chinese of representative works from the Tang Dynasty (618-907) to modern times. May be repeated once for credit when content varies.

**131. Readings in Traditional Chinese Poetry (4) I.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 6 or consent of instructor. Traditional Chinese poetry from its beginnings to the golden ages of Tang and Song, surveying forms and poets that best reveal the Chinese poetic sensibility and the genius of the language of Chinese poetry.

**\*132. Readings in Modern Chinese Poetry (4) II.** Yeh

Lecture—3 hours; discussion—1 hour. Prerequisite: course 6 or consent of instructor. Chinese poetry from the Literary Revolution of 1917 to the present, surveying works that embody exciting innovations and reflect the modernity of twentieth-century Chinese society and culture.

**\*140. Readings in Classical Chinese (4) I, II, III.** The Staff

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Study and philological analysis of selected texts from the first millennium of Imperial China. May be repeated twice for credit.

**\*160. The Chinese Language (4) III.** The Staff

Lecture/discussion—4 hours. Prerequisite: course 6 (may be taken concurrently); Linguistics 1 recommended. The Chinese language viewed in its linguistic context, synchronically and diachronically. Historical phonology, classical and literary language, rise of written vernacular, descriptive grammar of modern standard Chinese, dialectal variation, and sociolinguistic factors.

**192. Chinese Internship (1-12) I, II, III.** The Staff  
Internship—3-36 hours to be arranged. Prerequisite: upper division standing and consent of instructor.

Work experience in the Chinese language, with analytical term paper on a topic approved by instructor. (P/NP grading only.)

**197T. Tutoring in Chinese** (1-5) I, II, III. The Staff  
Tutoring—1-5 hours. Prerequisite: consent of Department chairperson. Leading of small voluntary discussion groups affiliated with one of the Department's regular courses. May be repeated for credit, but only 2 units may be applied to the minor. (P/NP grading only.)

**198. Directed Group Study**  
(1-5) I, II, III. The Staff (Chairperson in charge)  
(P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff  
(Chairperson in charge)  
(P/NP grading only.)

### Graduate Course

**299. Research** (1-12) I, II, III. The Staff  
(S/U grading only.)

## Courses in Japanese (JPN)

### Lower Division Courses

**1. Elementary Japanese** (5) I. The Staff  
Lecture/discussion—5 hours. Introduction to spoken and written Japanese in cultural contexts, with emphasis on communication. (Students who have successfully completed Japanese 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)

**\*1A. Intensive Elementary Japanese** (10) II. The Staff  
Lecture—5 hours; discussion—5 hours. Combines the work of courses 1 and 2 into a single quarter. Those who complete this course may go on to course 3.

**\*1B. Accelerated Intensive Elementary Japanese** (15) Summer special session. The Staff  
Lecture/discussion—15 hours. Combines the work of courses 1, 2, and 3, into a single 12-week summer session. Those who complete this course may go on to course 4 in the fall.

**2. Elementary Japanese** (5) II. The Staff  
Lecture/discussion—5 hours. Prerequisite: course 1 or the equivalent. Continuation of training in basic spoken and written skills.

**3. Elementary Japanese** (5) III. The Staff  
Lecture/discussion—5 hours. Prerequisite: course 2 or the equivalent. Continuation of training in basic spoken and written skills.

**4. Intermediate Japanese** (5) I. The Staff  
Lecture/discussion—5 hours. Prerequisite: course 3 or the equivalent. Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in course 3.

**5. Intermediate Japanese** (5) II. The Staff  
Lecture/discussion—5 hours. Prerequisite: course 4 or the equivalent. Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in course 4.

**6. Intermediate Japanese** (5) III. The Staff  
Lecture/discussion—5 hours. Prerequisite: successful completion (C- or better) of course 5 or the equivalent. Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in course 5.

**8. Accelerated Japanese for Bilingual Students I** (5) I. The Staff  
Lecture—5 hours. Prerequisite: bilingual background in Japanese. A special course for students with some bilingual background in Japanese. Emphasis is on speaking at an educated level and learning to read and write Japanese. First of a three-course sequence accelerating advancement to upper division courses.

**\*10. Masterworks of Japanese Literature (In English)** (4) III. The Staff  
Lecture—3 hours; discussion—1 hour. An introduction to Japanese literature: readings and discussion in

English of important works from earliest times to the present. GE credit: ArtHum, Div, Wrt.

**\*15. Introduction to Traditional Japanese Culture** (3) II. Borgen  
Lecture—2 hours; discussion—1 hour. General introduction to Japanese culture from its beginnings through 1850, focusing on religion, thought, and the arts (visual and performing). Indigenous traditions and the assimilation of foreign influences will be discussed. Readings and discussions in English. GE credit: ArtHum, Div, Wrt.

**18. Accelerated Japanese for Bilingual Students II** (5) II. The Staff  
Lecture—5 hours. Prerequisite: course 8. Continues course 8. A special course for students with some bilingual background in Japanese. Emphasis is on increasing knowledge of kanji and on reading and writing longer passages. Second of a three-course sequence accelerating advancement to upper division courses.

**\*25. Japanese Language and Culture (in English)** (4) I. Smith  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Linguistics 1 or Anthropology 4 recommended. Classification and communication of experience in Japanese culture; principles of language use in Japanese society. Speech levels and honorific language, language and gender, minority languages, literacy. Role of Japanese in artificial intelligence and computer science. Offered in alternate years.

**28. Accelerated Japanese for Bilingual Students III** (5) III. The Staff  
Lecture—5 hours. Prerequisite: course 18. Continues course 18. A special course for students with some bilingual background in Japanese. Emphasis is on advanced training in formal and informal speech styles, discourses strategies in spoken and written Japanese, and on reading authentic works. Third of a three-course sequence accelerating advancement to upper division courses.

**\*50. Introduction to the Literature of China and Japan** (3) II. Borgen  
Lecture—3 hours. Methods of literary analysis and their application to major works from the various genres of Chinese and Japanese literature (in translation), including film. East Asian cultural traditions will also be introduced. (Same course as Chinese 50.) GE credit: ArtHum, Div, Wrt.

**98. Directed Group Study** (1-5) I, II, III. The Staff  
(Chairperson in charge)  
(P/NP grading only.)

**99. Special Study for Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)  
(P/NP grading only.)

### Upper Division Courses

**101. Japanese Literature in Translation: The Early Period** (4) I. Borgen  
Lecture—3 hours; discussion—1 hour. Early Japanese literature from the Nara to the end of the Heian period through a broad survey of the major literary genres such as lyric poetry, court diaries, prose narratives, poem-tales, and classical Chinese writings. GE credit: ArtHum, Div, Wrt.

**102. Japanese Literature in Translation: The Middle Period** (4) II. The Staff  
Lecture—3 hours; discussion—1 hour. The major literary genres from the twelfth century to the second half of the nineteenth century including poetry, *renga*, military chronicles, *no* drama, Buddhist literature, *haiku*, *haibun*, *kabuki*, *bunraku*, plays and Edo prose narratives. GE credit: ArtHum, Div, Wrt.

**103. Japanese Literature in Translation: The Modern Period** (4) I. Chang  
Lecture—3 hours; discussion—1 hour. Modern Japanese literature from the 1870s to the 1970s. Surveys representative literary works and ideas against the social and intellectual background of the Meiji, Taisho, and Showa periods. GE credit: ArtHum, Div, Wrt.

**\*104. Modern Japanese Literature: War and Revolution** (3) I. Chang  
Lecture/discussion—3 hours. Perspectives and sensibilities with which major modern Japanese writers

have interpreted the traumatic and often poignant experiences of war and socio-political upheavals from the late nineteenth century to the 1970s. Lectures, discussions, and readings in English. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**\*105. Modern Japanese Literature: Hero and Anti-hero** (3) II. Chang  
Lecture/discussion—3 hours. The ways in which representative heroes and anti-heroes in modern Japanese literature perceive, confront, struggle with, and resolve a wide array of social, moral, and intellectual problems in their times. Lectures, discussions, and readings in English. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**106. Japanese Culture Through Film** (4) II. The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing. Aspects of Japanese culture such as love, the family, position of women, growing up, death, and the supernatural as portrayed in films by Kurosawa, Mizoguchi, Ichikawa, Ozu, and Itami. Lectures, discussion, and readings in English. Films with English subtitles. GE credit: ArtHum, Div, Wrt.

**\*107. Modern Japanese Autobiographies (in English)** (4) I. Chang  
Lecture—3 hours; term paper/discussion—1 hour. Prerequisite: upper division standing. Exploring the modern and contemporary Japanese social and cultural landscape through critical analysis of modern Japanese autobiographies by prominent and other authors in the 19th and 20th centuries. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**\*108. Poetry of China and Japan (in English)** (4) II. Borgen  
Lecture—3 hours; discussion—1 hour. A comparative approach to Chinese and Japanese poetry, examining poetic practice in the two cultures; includes a general outline of the two traditions, plus study of poetic forms, techniques, and distinct treatments of universal themes: love, nature, war, etc. Offered in alternate years. (Same course as Chinese 108.) GE credit: ArtHum, Div, Wrt.

**111. Modern Japanese: Reading and Discussion** (4) I. The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 6. Readings in modern Japanese short stories, newspaper articles, and essays; conversation practice based on these readings.

**112. Modern Japanese: Reading and Discussion** (4) II. The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 111. Continuation of course 111.

**113. Modern Japanese: Reading and Discussion** (4) III. The Staff  
Lecture—3 hours; discussion—1 hour. Prerequisite: course 112. Continuation of course 112.

**\*114A. Spoken Japanese** (2) I. The Staff  
Discussion—2 hours. Prerequisite: course 6 or the equivalent. Training in spoken Japanese for students with a basic working knowledge of the language. (P/NP grading only.)

**\*114B. Spoken Japanese** (2) II. The Staff  
Discussion—2 hours. Prerequisite: course 114A or consent of instructor. Continuation of course 114A. Training in spoken Japanese for students with a basic working knowledge of the language. (P/NP grading only.)

**\*114C. Spoken Japanese** (2) III. The Staff  
Discussion—2 hours. Prerequisite: course 114B or consent of instructor. Continuation of course 114B. Training in spoken Japanese for students with a basic working knowledge of the language. (P/NP grading only.)

**\*115. Japanese Composition** (2) I. The Staff  
Lecture—2 hours. Prerequisite: course 6 or consent of instructor. Development of skills in the techniques of writing Japanese. Practice in short essay writing with an aim toward mastery of the vocabulary and syntax of written style Japanese.

**\*131. Readings in Modern Japanese Literature: 1920-1945** (4) III. Chang

Lecture—3 hours; discussion—1 hour. Prerequisite: course 113 or the equivalent. Fourth-year level reading of representative works of modern Japanese literature including short stories, novellas, diaries, memoirs, poetry and excerpts from novels and plays from 1920 through the militaristic era, to the end of the war years in 1945.

**132. Readings in Modern Japanese Literature: 1945-1970** (4) III. Chang

Lecture—3 hours; discussion—1 hour. Prerequisite: course 113 or the equivalent. Continuation of course 131, but may be taken independently. Covers selected texts from the immediate post-war years beginning in 1945 down to 1970 and the post-war recovery.

**\*133. Readings in Modern Japanese Literature: 1970 to Present** (4) II. The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 113 or the equivalent. Covers selected texts from 1970 to the present. Offered in alternate years.

**\*134. Readings in the Humanities: Traditional Culture** (4) II. Borgen

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 113. Fourth-year level reading of modern works by major specialists on traditional Japanese culture: history, religion, thought, art, international relations, and literary history and criticism. Focus is equally on developing reading skills and learning about Japanese culture.

**\*135. Readings in the Humanities: The Modern Period** (4) III. Chang

Lecture—3 hours; term paper. Prerequisite: course 113. Fourth-year level reading of authentic modern writings on Japanese culture, history, philosophy, society, religion, law, politics, international relations, aesthetics, and comparative culture by prominent critics, commentators, and scholars.

**136. Readings in Newspapers and Magazines** (4) I. The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 113 or the equivalent. Fourth-year level reading of newspaper and magazine reports, articles, and editorials on domestic and international affairs relating to contemporary Japan. Offered in alternate years.

**\*141. Introduction to Classical Japanese** (4) III. Borgen

Lecture/discussion—4 hours. Prerequisite: one advanced Japanese reading course such as Japanese 131, 132, or the equivalent reading knowledge of Japanese. The basic features of classical Japanese grammar through careful reading of selected literary texts such as *Hojoki* or *Tsurezuregusa*. Offered in alternate years.

**192. Japanese Internship** (1-12) I, II, III. The Staff  
Internship—3-36 hours to be arranged. Prerequisite: upper division standing and consent of instructor. Work experience in Japanese language, with analytical term paper on a topic approved by instructor. (P/NP grading only.)

**197T. Tutoring in Japanese** (1-5) I, II, III. The Staff  
Tutoring—1-5 hours. Prerequisite: consent of Department chairperson. Leading of small voluntary discussion groups affiliated with one of the Program's regular courses. May be repeated for credit, but only 2 units may be applied to the minor. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III.  
The Staff (Chairperson in charge)  
(P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff  
(Chairperson in charge)  
(P/NP grading only.)

**Graduate Courses**

**\*291. Seminar in Modern Japanese Literature: Major Writers** (4) III. Chang  
Seminar—4 hours. Prerequisite: any one of courses 131, 132, 133, 134, 135, or the equivalent. In-depth reading and critical analyses of major works by and critical literature on one or two prominent modern or

contemporary writers such as Natsume Soseki, Mori Ogai, Shimazaki Toson, Akutagawa Ryunosuke, Tanizaki Junichiro, Abe Kobo and Oe Kenzaburo. Offered in alternate years.

**299. Research** (1-12) I, II, III. The Staff  
(S/U grading only.)

## East Asian Studies

(College of Letters and Science)

Michelle Yeh, Ph.D., Program Director

Program Office, 522 Sproul Hall (530-752-4995)

**Faculty**

Beverly Bossler, Ph.D., Associate Professor (*History*)

Robert Borgen, Ph.D. Professor (*East Asian*

*Languages and Cultures, History*)

Lee Branstetter, Ph.D., Assistant Professor

(*Economics*)

Chia-ning Chang, Ph.D. Associate Professor (*East*

*Asian Languages and Cultures*)

Xiaojia Ge, Ph.D., Associate Professor (*Human and*

*Community Development*)

Kyu Hyun Kim, Ph.D. Assistant Professor (*East Asian*

*Languages and Cultures, History*)

Whalen W. Lai, Ph.D. Professor (*East Asian*

*Languages and Cultures, Religious Studies*)

Ming-cheng Lo, Ph.D. Assistant Professor

(*Sociology*)

Susan Mann, Ph.D., Professor (*History*)

Don C. Price, Ph.D., Professor (*History*)

Scott Rozelle, Ph.D., Associate Professor

(*Agricultural and Resource Economics*)

Barbara Sellers-Young, Ph.D., Associate Professor

(*Dramatic Art*)

Xiaoling Shu, Ph.D., Assistant Professor (*Sociology*)

G. William Skinner, Ph.D. Professor (*Anthropology*)

Janet S. Smith, Ph.D., Professor (*Anthropology*)

Sophie Volpp, Ph.D., Assistant Professor (*Chinese*)

Michelle Yeh, Ph.D., Professor (*East Asian*

*Languages and Cultures*)

**Emeriti Faculty**

Mary H. Fong, Ph.D., Professor Emerita

Donald Gibbs, Ph.D., Associate Professor Emeritus

Joyce K. Kallgren, Ph.D., Professor Emerita

Kwang-Ching Liu, Ph.D., Professor Emeritus

Benjamin Wallacker, Ph.D., Professor Emeritus

### The Major Program

The East Asian Studies major gives the student an understanding of East Asia (especially China and Japan) through interdisciplinary studies that combine sustained work in an East Asian language with courses on East Asian countries.

**The Program.** The program offers core courses in East Asian history, humanities, social sciences, and languages. After taking the core courses in conjunction with two years or more of either Chinese or Japanese language study, the student chooses additional courses focusing on a special field of interest, such as anthropology or history. Since six quarters of language work are required, students normally should apply to the East Asian studies program no later than their sophomore year.

**Career Alternatives.** The program provides preparation either for a career that involves working with East Asian affairs and people (e.g., journalism, business, government service, teaching, and counseling), or as preparation for graduate studies in the East Asian field.

### A.B. Major Requirements:

UNITS  
**Preparatory Subject Matter** .....41-42  
History 9A, 9B .....8  
One course from Art History 1D, Chinese 10,  
11, Comparative Literature 53A, Japanese  
10, 25, Religious Studies 70, 75 .....3-4

Two years (or the equivalent) of Chinese or Japanese language study (Chinese 1-2-3-4-5-6; Japanese 1-2-3-4-5-6).....30

**Depth Subject Matter** .....36  
Must include at least 8 units of core courses from each of the following three categories.

*History:*

History 191A, 191B, 191C, 191D, 191E, 191F; 194A-194B or 194B-194C

*Social Science:*

Anthropology 148A, 148B, 149A, 149B; Economics 171; \*Geography 127; Political Science 148A, 148B; \*Sociology 147

*Humanities:*

Art History 163A, 163B, 163C, 164; Chinese 104, 106, 107, 109, 131, 132; Japanese 101, 102, 103; Religious Studies 172

At least 12 additional units must be selected from the above courses, or from the following:

Anthropology 110, 112, 117, 119, 120, 122, 123, 124, 128; Chinese (any upper division course); Economics 115A, 115B, 116, 160A, 160B, 162; Geography 143; History 102G, 102H, 102N; Japanese (any upper division course); Linguistics 100; Political Science 127, 133, 138, 145, 148C; Sociology 118, 141, 170, 183. (Or other appropriate courses, including individual and group study courses (198, 199), as approved by the Committee in charge.)

**Total Units for the Major** .....77-78

**Recommended**

Students are strongly urged to take a substantial number of courses in Euro-American civilization as a basis for comparison for a deeper understanding of America's relations with East Asia.

**Major Adviser.** K. Kim.

### Minor Program Requirements:

Courses taken for the minor are expected to reflect a predominant interest in either China or Japan, but also to provide some exposure to the other of the two countries. All courses counting towards the East Asian Studies major, including individual and group study courses (198, 199), may be used to fulfill the requirements for the minor program, as long as they deal predominantly with China, Japan, or both.

UNITS

**East Asian Studies** .....22

History 9B and 18 upper division units, of which at least 12 must be in courses focusing on China; OR History 9A and 18 upper division units, of which at least 12 must be in courses focusing on Japan .....22

**Courses in East Asian Studies.** The following courses count toward the major and are open to students throughout the campus. Refer to departmental listings for course descriptions.

**Anthropology**

148A. Traditional Chinese Society  
148B. Family, Gender, and Population in Contemporary China

\*149A. Traditional Japanese Society  
\*149B. Contemporary Japanese Society

**Art History**

1D. Asian Art  
163A. Chinese Art  
163B. Chinese Painting  
163C. Painting in the People's Republic of China  
164. The Arts of Japan

**Chinese**

All courses.

**Comparative Literature**

53A. Literature of China and Japan  
153. Forms of Asian Literature

**Economics**

171. Economy of East Asia

**History**

9A. History of East Asian Civilization (China)

9B. History of East Asian Civilization (Japan)

102G. Undergraduate Proseminar: China to 1800

\*102H. Undergraduate Proseminar: China since 1800

102N. Undergraduate Proseminar: Japan

\*191A. Classical China

191B. High Imperial China

191C. Late Imperial China

191D. Nineteenth-Century China

191E. The Chinese Revolution

191F. History of the People's Republic of China, 1949 to the Present

194A. Aristocratic and Feudal Japan

194B. Early Modern Japan

194C. Modern Japan

\*194D. Business and Labor in Modern Japan

\*194E. Education and Technology in Modern Japan

**Japanese**

All courses.

**Linguistics**

\*100. Languages of Eastern Asia

**Political Science**

\*133. The American Role in East Asia

\*138. International Relations: East Asia

148A. Government and Politics in East Asia: China

\*148B. Government and Politics in East Asia: Pacific Rim

148C. Government and Politics in East Asia: Southeast Asia

**Religious Studies**

\*70. Introduction to Buddhism

\*75. Chinese Philosophy: An Introduction

\*172. Ch'an (Zen) Buddhism

**Sociology**

\*147. Sociological Perspectives on East Asia

**Courses in East Asian Studies (EAS)****Upper Division Courses**\*113. **Cinema and Society in China** (4) III.

The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: one course from History 190C, 193, or consent of instructor. Knowledge of Chinese not required. Viewing and analysis of one Chinese film with English subtitles each week, followed by discussion and short essays. Cinematic technique, social values and film topics from 1930s to today. Not open for credit to students who have completed Chinese 113. GE credit: ArtHum, Div, Wrt.

192. **East Asian Studies Internship** (1-12) I, II, III. The Staff

Internship—3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor. Work experience in the East Asian Studies field, with analytical term paper on a topic approved by the instructor. (P/NP grading only.)

194H. **Special Study for Honors Students** (1-5)

I, II, III. The Staff (Chairperson in charge)

Independent study—1-5 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in East Asian Studies culture, society, or language. (P/NP grading only.)

196A-196B. **Honors Seminar** (4-4) I-II. The Staff Seminar—2 hours; conference—2 hours. Prerequisite: a GPA of 3.5 in the major, senior standing, and consent of instructor. A two-quarter research project culminating in an Honors thesis. A grade of B or higher must be earned to qualify the student for honors distinction at graduation. (Deferred grading only, pending completion of sequence.)

198. **Directed Group Study** (1-5) I, II, III.

The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**Ecology (A Graduate Group)**

J. H. Lieth, Ph.D., Chairperson of the Group

Group Office, 2148 Wickson Hall (530-752-6752)

**Faculty.** The Group includes faculty from 26 departments in five schools and colleges, and the Bodega Marine Laboratory.

**Graduate Study.** The Graduate Group in Ecology offers the M.S. and Ph.D. degrees in several areas of specialization within the spectrum of ecology. The Ecology program is one of the most diverse on the Davis campus. In order to accommodate varied student interests, the Group depends on close consultation between students and faculty for program development. Several curricular plans are now available in the following areas of emphasis: agricultural ecology, conservation ecology, ecosystems and landscape ecology, ecotoxicology, environmental policy analysis, human ecology, integrative ecology, physiological ecology, and restoration ecology. For further details, contact the group office.

**Preparation.** Appropriate preparation is undergraduate work in any of the biological, social or behavioral, and physical sciences, mathematics or engineering. Applicants will normally be expected to have completed two courses each in introductory biology, general chemistry and physics; one course each in calculus, ecology and evolution, statistics, are also required. Applicants in human ecology areas may substitute quantitative social science courses for up to two courses of chemistry or physics. Each of the three broad areas requires certain advanced preparation appropriate to the option. Details may be found in the Group Announcement.

**Graduate Advisers.** J.H. Lieth, K.M. Scow.**Courses in Ecology (ECL)****Graduate Courses**200A. **Principles and Application of Ecological Theory** (4) I. Foin

Lecture—3 hours; discussion—1 hour. Prerequisite: first course in ecology; Statistics 102; Mathematics 16A, 16B. Critical evaluation of ecological theory and applications to ecological management. Historical development of ecological theory is emphasized. Critical evaluation of ecological principles pertaining to the structure and dynamic properties of ecological systems, their organization and evolution.

200B. **Principles and Application of Ecological Theory** (4) II. Foin

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A. Continuation of course 200A. Critical evaluation of theory and application in the areas of ecological adaptation and system plasticity, spatial and temporal scales, ecological energetics, and system dynamics. Synthesis of ecological theory into testable principles.

201. **Ecosystems and Landscape Ecology** (4) III. Ustin

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A and 200B. Overview of ecosystem and landscape principles (structure, energy, nutrient flow, species diversity, landscape heterogeneity, change and stability), building on ecological principles and theory. Introduction to analysis tools (remote sensing, geographic information systems, modeling) applied to landscape systems. Offered in alternate years.

203. **Physiological Ecology** (3) III. Cech, Doroshov

Lecture—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Studies 100; Neurobiology, Physiology and Behavior 110 or Plant Biology 111 or Environmental Studies 129; elementary calculus. A comparative examination of several animal groups addressing fundamental physiological mechanisms that shape the ecology of each animal group.

\*204. **Population and Community Ecology** (4) I. E. Caswell-Chen

Lecture—3 hours; discussion—1 hour. Prerequisite: Environmental Studies 100 or Evolution and Ecology 101, Mathematics 21A-21B or consent of instructor; Mathematics 22B recommended. Review of major concepts of population ecology and community ecology, with emphasis on the rationale of theory and use of theory as applied in the ecology of natural and managed systems.

205. **Community Ecology** (4) II. Karban, Lawler  
Lecture—2 hours; discussion—2 hours. Prerequisite: Environmental Studies 100, Evolution and Ecology 101, or Plant Biology 117. Introduction to literature and contemporary research into processes structuring ecological communities.

**206. Concepts and Methods in Plant**

**Community Ecology** (4) I. Rejmanek, Barbour  
Lecture—3 hours; laboratory—4 hours. Prerequisite: introductory courses in statistics and plant ecology; consent of instructor. Principles and techniques of vegetation analysis, including structure, composition, and dynamics. Emphasis given to sampling procedures, association analysis, ordination, processes and mechanisms of succession, and classification. Most techniques are demonstrated or conducted during field trips and laboratories.

207. **Plant Population Biology** (3) II. Rice (Agronomy)

Lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: advanced undergraduate ecology course (e.g., Environmental Studies 100, Zoology 125, Botany 117, or Entomology 104) and advanced undergraduate course in genetics and/or evolution (e.g., Genetics 100, 103, or Botany 100). Provides entry-level graduate students and advanced undergraduates with an introduction to both theoretical and empirical research in plant population biology. Emphasis will be placed on linking ecological and genetic approaches to plant population biology. Offered in alternate years. (Same course as Agronomy 207.)

208. **Issues in Conservation Biology** (4) II.

Moyle

Lecture—3 hours; discussion—1 hour. Prerequisite: one of Environmental Studies 100, Zoology 125, Botany 117, or Entomology 106. Graduate-level introduction to current research in conservation biology. Course will emphasize reading and discussing primary literature. Specific topics will reflect the research interests of UCD conservation biology faculty.

210. **Advanced Topics in Human Ecology** (4) III.

Orlove

Lecture—2 hours; discussion—2 hours. Prerequisite: graduate standing. Course stresses the commonalities that human ecologists have as social scientists who specialize in problems relating human populations and environmental variables. General epistemological issues and theoretical models are reviewed. Similarities and differences of human and biological ecology are examined. Offered in alternate years.

211. **Advanced Topics in Cultural Ecology** (3) I.

Orlove

Lecture—3 hours. Prerequisite: graduate standing. Discussion and evaluation of theories which relate environment, culture and social structure. The works of several major theorists will be examined with regard to analytical models, empirical data, research methodologies, and modes of explanation. Offered in alternate years. (Same course as Anthropology 211.)

212A. **Environmental Policy Process** (4) III.

Sabatier

Lecture—3 hours; discussion—1 hour. Prerequisite: course in public policy (e.g., Environmental Studies 160) or environmental law (e.g., Environmental Stud-

ies 161); course in bureaucratic theory (e.g., Political Science 187 or Environmental Studies 166); course in statistics (e.g., Sociology 106 or Agricultural and Resource Economics 106). Introduction to selected topics in the policy process, applications to the field of environmental policy. Develops critical reading skills, understanding of frameworks of the policy process and political behavior, and an ability to apply multiple frameworks to the same phenomena. Offered in alternate years. (Same course as Environmental Science and Policy 212A.)

#### 212B. Environmental Policy Evaluation (4) II.

Schwartz

Lecture—1 hour; discussion—1 hour; seminar—2 hours. Prerequisite: intermediate microeconomics (e.g., Economics 100); Statistics 108 or Agricultural and Resource Economics 106; policy analysis (e.g., Environmental Studies 168A or the equivalent); Agricultural and Resource Economics 176. Methods and practices of policy analysis; philosophical and intellectual bases of policy analysis and the political role of policy analysis. (Same course as Environmental Science and Policy 212B.)

#### 213. Population, Environment, and Social Structure (4) II. Cramer

Seminar—3 hours; term paper. Prerequisite: at least one course in population or human ecology, or in environment and resources. Relationships among population dynamics, resource scarcity and environmental problems, and social structure; focus on demographic content of global ecological models and simulations, ecological content of modern demographic theories, and debates about scarcity, inequality, and social conflict and change. Offered in alternate years.

#### \*214. Use of Temporal/Spatial Landscape

##### Analysis in Conservation (4) II. Schonewald

Lecture/discussion—3 hours; laboratory—3 hours. Multi-disciplinary analysis of geometric and temporal landscape change applied to conservation. Population and economic change are examined in the context of the spread of urban, rural and transportation systems in fragmentation of habitat. Laboratory applies methodologies to analysis of specific sites. Offered in alternate years.

#### 215. Thermal Ecology and Energetics (3) II.

Weathers

Lecture—2 hours; discussion—1 hour. Prerequisite: general chemistry and physics and ecology (e.g., Environmental Studies 100). Review of principles that govern thermal and energy relations of organisms and the application of energy budget analysis to diverse ecological problems. Scaling (allometric analyses) and comparative methods emphasized as techniques for developing empirical ecological theories. Offered in alternate years.

#### 216. Ecology and Agriculture (3) I. Foin

Lecture/discussion—3 hours. Prerequisite: Plant Biology 142 or consent of instructor. Ecological principles and relationships as applied to agriculture. Integration of ecological approaches into agricultural research to develop environmentally sound management practices. Topics include crop autoecology, biotic interactions among crops and pests, and crop systems ecology. (Same course as Vegetable Crops 216.)

#### 217. Conservation and Sustainable Development in Third World Nations (4) III.

Orlove

Lecture/discussion—3 hours; fieldwork—2 hours. Prerequisite: at least one course from two of these three groups: (a) Environmental Studies 160, 161, 168A, 168B; (b) Environmental Studies 101, 133, International Agricultural Development 103, Geography 142; (c) Anthropology 126, 131, Geography 141, Sociology 144, 145A, 145B. Examination of the patterns of resource ownership, control and management in agricultural lands, extractive zones (fisheries, forests) and wildlands, with emphases on conservation and sustainability. Comparison of industrial democracies and poorer nations. (Same course as International Agricultural Development 217.)

#### 219. Ecosystem Biogeochemistry (4) III.

Dahlgren, Bledsoe

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: introductory courses in ecology/biology and soils are recommended; undergraduates accepted with consent of instructor. Multi-disciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere, and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as Soil Science 219.)

#### 222. Human Ecology of Agriculture (4) III.

Brush

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division course work in environmental sciences, cultural anthropology, economics, international agricultural development or sociology, or consent of instructor. Social and cultural factors relating to agricultural adaptation and evolution. Ethnobiological knowledge systems, rules and customs of resource allocation, impact of population growth, technological change, states and markets. Social and cultural contexts of biological diversity and agricultural resource conservation.

#### 225. Terrestrial Field Ecology (4) III. Karban

Seminar—1 hour; field work—12 hours. Prerequisite: introductory ecology and introductory statistics or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results will be stressed. (Same course as Entomology 225/Population Biology 225.)

#### 231. Mathematical Methods in Population

##### Biology (3) I. Hastings

Lecture—3 hours. Prerequisite: Mathematics 16C or 21C or the equivalent. Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as Population Biology 231.)

#### 232. Theoretical Ecology (3) II. Hastings

Lecture—3 hours. Prerequisite: course 204 or the equivalent, and Mathematics 16C or 21C; or one of courses 100 or 121 or Evolution and Ecology 101, and a strong mathematics background (Mathematics 22A-22B-22C or the equivalent). Examination of major conceptual and methodological issues in theoretical ecology. Model formulation and development will be emphasized. Topics will vary from year to year. May be repeated for credit. Offered in alternate years.

#### 290. Seminar in Ecology (1-4) I, II, III. The Staff

(Chairperson in charge)

Seminar—1-4 hours. Prerequisite: consent of instructor. Topics in biological, human, physical, and chemical ecology. Students are expected to present an oral seminar on a particular aspect of the general topic under consideration. (S/U grading only.)

**291. Biological Conservation (3) II. Schonewald**  
Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. Examines characteristics of populations that make them vulnerable to extinction and examines various methods that can be used in the restoration process. Although both plants and animals are of interest, emphasis will be on vertebrates. Offered in alternate years.

#### 296. Topics in Ecology and Evolution (1) I, II, III. The Staff

Seminar—1 hour. Prerequisite: graduate standing. Seminars presented by visiting lecturers, UCD faculty, and graduate students. May be repeated for credit. (Same course as Population Biology 292.) (S/U grading only.)

#### 297T. Tutoring in Ecology (1-4) I, II, III. The Staff

(Chairperson in charge)

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing in ecology; consent of instructor. Teaching ecology including conducting discussion groups for regular departmental courses under direct

guidance of staff. May be repeated for credit. (S/U grading only.)

#### 298. Group Study (1-5) I, II, III. The Staff

(Chairperson in charge)

(S/U grading only.)

#### 299. Research (1-12) I, II, III. (Chairperson in charge)

Prerequisite: graduate standing. (S/U grading only.)

---

Elias H. Tuma, Ph.D., Professor Emeritus  
Leon L. Wegge, Ph.D., Professor Emeritus

## The Major Program

Economics is the study of how individuals, organizations, and societies choose among alternative uses of resources and how these resources are turned into the things people want.

**The Program.** Economics majors complete an introductory course sequence in economics, in addition to several courses in quantitative methods. Intermediate theory and economic history are taken on the upper division level and then students are free to concentrate the remainder of their units in various areas of interest, including more courses in economic theory or history, international economics, labor, industry, alternative economic systems, economic development, public finance, econometrics, or mathematical economics.

**Internships and Career Alternatives.** Internships for economics majors have been arranged at banks, brokerages, other business enterprises, and governmental units. The internships must complement the student's course work. A degree in economics is excellent preparation for students who want to go on to law school, business school, advanced work in economics, or graduate work in international relations. It is also a good background for careers in management and positions with the government.

**A.B. Major Requirements:**

|                                                                                                                                                                                                 | UNITS        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| <b>Preparatory Subject Matter</b> .....                                                                                                                                                         | <b>19-22</b> |
| Economics 1A-1B.....                                                                                                                                                                            | 10           |
| Statistics 13, 32, or 102.....                                                                                                                                                                  | 3-4          |
| Mathematics 16A-16B or 21A-21B.....                                                                                                                                                             | 6-8          |
| <b>Depth Subject Matter</b> .....                                                                                                                                                               | <b>42</b>    |
| Economics 100, 101.....                                                                                                                                                                         | 10           |
| One course from Economics 110A, 110B, 111A, 111B.....                                                                                                                                           | 4            |
| Select 16 units from Economics 103, 116, 121A, 121B, 125, 130, 131, 134, 136A, 136B, 140, 151A, 151B, 160A, 160B, 194HA, 194HB, Agricultural and Resource Economics 106, 139, 156, 175, 176.... | 16           |
| Additional upper division Economics courses.....                                                                                                                                                | 12           |
| <b>Total Units for the Major</b> .....                                                                                                                                                          | <b>61-64</b> |

**Recommended**

Students considering graduate study in economics are strongly urged to take Mathematics 21A-21B-21C and 22A.

The Economics Department suggests that Economics 100 and 101 be taken as soon as possible after the introductory courses.

**Major Advisers.** Contact Department Office.

**Minor Program Requirements:**

|                                                                                                                                                                                   |           |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Economics</b> .....                                                                                                                                                            | <b>22</b> |
| Economics 100, 101.....                                                                                                                                                           | 10        |
| Select 8 units from Economics 103, 116, 121A, 121B, 125, 130, 131, 134, 136A, 136B, 140, 151A, 151B, 160A, 160B; Agricultural and Resource Economics 106, 139, 156, 175, 176..... | 8         |
| Select 4 units from upper division Economics courses.....                                                                                                                         | 4         |

**Preparation.** Economics 1A and 1B; Statistics 13, 32, or 102; Mathematics 16A and 16B or 21A and 21B. Mathematics 16A and 16B or 21A and 21B should be completed before taking Economics 100 and 101. Students need to complete Economics 100 and 101 before taking the advanced courses.

**Course Limits.** Except under extraordinary circumstances, not more than three economics courses may be taken in any one quarter. In special cases, the department will accept a limited number of related upper division courses from other departments in satisfaction of the economics upper division course requirements. Approval from a departmental adviser is required in all such cases.

**Graduation with High or Highest Honors.** To be eligible for departmental recommendation for High or Highest Honors in Economics at graduation, a student must take all upper division courses in Economics for a letter grade, earn at least a 3.5 grade-point average in those courses, and complete at least eight units of course work that result in the submission of an Honors project. Consult the College of Letters and Science section of this catalog and contact the Department for more information.

**Graduate Study.** Students who meet the admission requirements of Graduate Studies and the Department of Economics may pursue studies leading to the M.A. and Ph.D. degrees. Fields of emphasis for graduate study include: Economic Theory, Monetary Economics, Economic Development, Economic History, International Economics, Labor Economics, Industrial Organization, Economic Systems, Public Finance, Mathematical Economics, and Quantitative Methods (Econometrics). For information on admission to graduate study, degree requirements, and financial aid, consult the *Graduate Announcement* and contact the chairperson of the departmental graduate committee.

**Graduate Advisers.** Contact Department Office.

**American History and Institutions.** This University requirement can be satisfied by completion of Economics 111A, 111B. (See also under University requirements.)

**Courses in Economics (ECN)****Lower Division Courses****1A. Principles of Microeconomics** (5) I, II, III.

The Staff

Lecture—3 hours; discussion—2 hours. Courses 1A and 1B may be taken in either order. Analysis of the allocation of resources and the distribution of income through a price system; competition and monopoly; the role of public policy; comparative economic systems. GE credit: SocSci.

**1B. Principles of Macroeconomics** (5) I, II, III.

The Staff

Lecture—3 hours; discussion—2 hours. Courses 1A and 1B may be taken in either order. Analysis of the economy as a whole; determinants of the level of income, employment, and prices; money and banking, economic fluctuations, international trade, economic development; the role of public policy. GE credit: SocSci.

**\*90X. Lower Division Seminar** (1-2) I. The Staff  
Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Economics through shared readings, discussions, and written assignments. May not be repeated for credit. Limited enrollment.

**92. Internship and Field Work** (1-12) I, II, III.

The Staff

Internship—3-36 hours; term paper. Prerequisite: junior or senior standing; availability of internship position or approved field work project; stock-brokerage interns must have completed Management 11A-11B; consent of instructor. Intensive study of practical application of concepts in economics, stressing research methods and empirical analysis. (P/NP grading only.)

**98. Group Study for Undergraduates** (1-5) I, II, III. The Staff (Chairperson in charge)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

**99. Individual Study for Undergraduates** (1-5) I, II, III, The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses****100. Intermediate Micro Theory** (5) I, II, III.

The Staff

Lecture—4 hours; discussion—1 hour. Prerequisite: courses 1A, 1B; Mathematics 16A-16B or 21A-21B with a grade of a C- or better in each course. Price and distribution theory under conditions of perfect and imperfect competition. General equilibrium and welfare economics. Not open for credit to students who have completed Agricultural and Resource Economics 100A or 100B. Only 2 units of credit will be allowed to students who have credit for course 104.

**101. Intermediate Macro Theory** (5) I, II, III.

The Staff

Lecture—4 hours; discussion 1 hour. Prerequisite: courses 1A, 1B; Mathematics 16A-16B or 21A-21B with a grade of a C- or better in each course. Theory of income, employment and prices under static and dynamic conditions, and long term growth. Only 2 units of credit will be allowed to students who have credit for course 105.

**103. Economics of Uncertainty and Information** (4) II. Bonnano

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or 104, Mathematics 16A and 16B or Mathematics 21A and 21B. Optimal decisions under uncertainty, expected utility theory, economics of insurance, asymmetric information, signalling in the job market, incentives and Principal-Agent theory, optimal search strategies and the reservation price principle.

**\*104. Intermediate Microeconomics** (4) I.

Cameron

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A, 1B and Mathematics 16A or 21A. Price and distribution theory under conditions of perfect and imperfect competition. Not open for credit to stu-

dents who have completed course 100 or Agricultural and Resource Economics 100A or 100B. Intended for non-majors. GE credit: SocSci.

**105. Intermediate Macroeconomics** (4) I.

Bergin; II. Sheffrin; III. Jorda

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A, 1B and Mathematics 16A or 21A. Theory of income, employment and prices, with policy implications. Not open for credit to students who have completed course 101. Intended for non-majors. GE credit: SocSci.

**\*110A. European Economic History Before 1700** (4) I. Clark

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B or consent of instructor. Topics in economic change in Europe prior to year 1700; reference to other regions of the Eastern Hemisphere; implications for contemporary economic development. GE credit: SocSci, Div.

**110B. European Economic History Since 1700** (4) III. Clark

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1A-1B or consent of instructor. Topics in economic change in Europe from the year 1700 to the present; reference to other regions of the Eastern Hemisphere; implications for contemporary economic development. GE credit: SocSci.

**111A. Economic History** (4) I. Walton

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B or consent of instructor. Survey of economic change in the United States from Colonial times to 1865; reference to other regions in the Western Hemisphere. GE credit: SocSci.

**111B. Economic History** (4) II. Lindert

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B, or consent of instructor. Survey of economic change in the United States from 1865 to the post World War II era. GE credit: SocSci.

**115A. Economic Development** (4) I, II. Rozelle (Agricultural and Resource Economics)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A and 1B. Major issues encountered in emerging from international poverty, including problems of growth and structural change, human welfare, population growth and health, labor markets and internal migration. Important issues of policy concerning international trade and industrialization. (Same course as Agricultural and Resource Economics 115A.) GE credit: SocSci, Div.

**115B. Economic Development** (4) II, III.

The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A and 1B. Major macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries. (Same course as Agricultural and Resource Economics 115B.) GE credit: SocSci.

**\*116. Comparative Economic Systems** (4) II.

Roemer

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or 104, Mathematics 16A and 16B, or 21A and 21B. Economic analysis of the relative virtues of capitalism and socialism, including welfare economics. Marxian exploitation theory, the socialist calculation debate (Hayek and Lange), alternative capitalist systems (Japan, Germany, U.S.) and contemporary models of market socialism. GE credit: SocSci.

**121A. Industrial Organization** (4) II. Bonanno

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B, 100 or 104, or consent of instructor. An appraisal of the role of competition and monopoly in the American economy; market structure, conduct, and economic performance of a variety of industries. GE credit: SocSci.

**\*121B. Industrial Organization** (4) III. Borenstein

Lecture—3 hours; discussion—1 hour. Prerequisite: course 121A. Public policy in a private enterprise economy; antitrust and other policies toward industry; economies of regulated industries. GE credit: SocSci.

**122. Theory of Games and Strategic Behavior**

(4) III. Bonanno

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or 104, Mathematics 16B or 21B or consent of instructor. Introduction to game theory. Explanation of the behavior of rational individuals with interacting and often conflicting interests. Non-cooperative and cooperative theory. Applications to economics, political science and other fields.

**130. Public Microeconomics** (4) III. The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or 104, or consent of instructor. Public expenditures; theory and applications. Efficiency and equity of competitive markets; externalities, public goods, and market failures; positive and normative aspects of public policy for expenditure, including benefit-cost analysis. Topics include consumer protection, pollution, education, poverty and crime.

**131. Public Finance** (4) I. Helms

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or 104. Assessing the economic burden of taxation; equity and efficiency considerations in tax design; structure and economic effects of the U.S. tax system (including personal income tax, corporation income tax, and property tax); tax loopholes; recent developments; tax reform proposals.

**134. Financial Economics** (4) II. Nehring; III. Quinzii

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A, 1B, and 100 or 104; Mathematics 16A; Statistics 13. General background and rationale of corporation; finance as resource allocation over time; decision making under uncertainty and the role of information; capital market and interest rate structure; financial decisions. Students who have completed Agricultural and Resource Economics 171A may not receive credit for this course.

**\*135. Money, Banks and Financial Institutions** (4) III. Hoover

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B. Monetary institutions, the banking system, money creation, the Federal Reserve System, the tools of monetary policy.

**136A. Monetary Theory** (4) I. Makowski

Lecture—3 hours; discussion—1 hour. Prerequisite: course 101 or 105. Monetary theory; the impact of changes in the quantity of money and of liquid assets on money income.

**136B. Monetary Policy** (4) II. Salyer

Lecture—3 hours; discussion—1 hour. Prerequisite: course 136A. Analysis of the role of financial intermediaries in the economy and the theory and practice of monetary policy.

**140. Econometrics** (4) II. Jorda

Lecture—3 hours; laboratory—2 hours. Prerequisite: courses 100 or 104, and 101 or 105; Mathematics 16A-16B or 21A; Statistics 13. Introduction of problems of observation, estimation and hypotheses testing in economics through the study of the theory and application of linear regression models, critical evaluation of selected examples of empirical research and exercises in applied economics.

**151A. Economics of the Labor Market** (4) I. Cameron

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or 104. Theory of labor supply and demand; determination of wages and employment in the labor market. Economic theories of labor unions. Policy issues: labor force participation by married women; minimum wages and youth unemployment; effect of unions on wages.

**151B. Economics of Human Resources** (4) II. Page

Lecture—3 hours; discussion—1 hour. Prerequisite: course 151A. Human resource analysis; introduction to human capital theory and economics of education; the basic theory of wage differentials, including theories of labor market discrimination; income distribution; poverty. Policy issues; negative income tax; manpower training programs; incomes policy.

**160A. International Microeconomics** (4) I.

Feenstra; II. Branstetter

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A, 1B, 100 or 104, or consent of instructor. International trade theory: impact of trade on the domestic and world economies; public policy toward external trade. Only 2 units of credit allowed to students who have completed course 162.

**160B. International Macroeconomics** (4) I.

Swenson; III. Bergin

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A, 1B, and 100 or 104, and course 101 or 105, or consent of instructor. Macroeconomic theory of an open economy. Balance of payments adjustment mechanism, international monetary economics issues; international financial institutions and their policies. Only 2 units of credit allowed to students who have completed course 162.

**162. International Economic Relations** (4) I.

Swenson; II. Branstetter

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B or consent of instructor. International trade and monetary relations, trade policy, exchange rate policy, policies toward international capital migration and investment. Emphasis on current policy issues. Course intended especially for non-majors. Not open for credit to students who have completed course 160A or 160B. GE credit: SocSci.

**171. Economy of East Asia** (4) III. Branstetter

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B or consent of instructor. Intensive reading, discussion and research on selected topics from the economies of the countries of East Asia. Consult department for course scheduling.

**190. Topics in Economics** (4) II. Cameron,

Lindert; III. Nehring, Clark

Lecture/discussion-seminar—4 hours. Selected topics in economic analysis and public policy. Variable content. May be repeated for credit.

**\*190X. Upper Division Seminar** (1-4) I. The Staff

Seminar—1-4 hours. Prerequisite: courses 100 or 104; and 101 or 105; and consent of instructor. In-depth examination at an upper division level of a special topic in Economics. Emphasis on focused analytical work. May not be repeated for credit. Limited enrollment.

**192W. Internship in the Davis-in-Washington Program** (6-8) I, III. The Staff

Internship—18-24 hours. Prerequisite: junior or senior standing in Economics; completion of 84 units of credits with a minimum grade-point average of 3.00; admission to the Davis-in-Washington Program. Internship in Washington, DC with associated research project. Students must arrange for a faculty sponsor before embarking on the internship. Maximum of 3 units will count toward satisfying Economics major requirements. (P/NP grading only.)

**194HA-194HB. Special Study for Honors**

Students (4-4) I-II-III. The Staff (Lindert in charge)

Independent study—3 hours; seminar—1 hour. Prerequisite: major in Economics with senior standing; consent of instructor and completion of 135 units with a minimum GPA of 3.5 in courses counted toward the major. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of course.)

**197T. Tutoring in Economics** (1-5) I, II, III.

The Staff (Chairperson in charge)

Tutoring—3-15 hours. Prerequisite: consent of instructor and chairperson. Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses. Units may not be counted toward satisfaction of major requirements. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III.

The Staff (Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced**

Undergraduates (1-5) I, II, III. The Staff

(Chairperson in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses****200A. Microeconomic Theory** (5) I. Silvestre

Lecture—4 hours; discussion—1 hour. Prerequisite: graduate standing. Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer. (Same course as Agricultural and Resource Economics 200A.)

**200B. Microeconomic Theory** (5) II. Quinzii

Lecture—4 hours; discussion—1 hour. Prerequisite: course 200A. Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failure. (Same course as Agricultural and Resource Economics 200B.)

**200C. Microeconomic Theory** (5) III. Makowski

Lecture—4 hours; discussion—1 hour. Prerequisite: course 200B. Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed. (Same course as Agricultural and Resource Economics 200C.)

**200D. Macroeconomic Theory** (5) II. Sheffrin

Lecture—4 hours; discussion—1 hour. Prerequisite: course 101, Mathematics 21A, 21B, and 21C. Macro static theory of income, employment, and prices.

**200E. Macroeconomic Theory** (4) III. Salyer

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200B (may be taken concurrently) and 200D. Macrodynamical theory of income, employment, and prices.

**\*201A. History of Economic Thought** (4) III.

Hoover

Lecture—3 hours; discussion—1 hour. Economic thought from the classical Greece era to modern times. Offered in alternate years.

**201B. History of Economic Thought II** (4) III.

Hoover

Lecture—3 hours; discussion—1 hour. Origins and emergence of modern economic analysis. Offered in alternate years.

**\*203A. Advanced Economic Theory** (4) I. Quinzii

Lecture—4 hours. Prerequisite: course 200A, 200B. Advanced topics in general equilibrium theory and welfare economics: existence, determinateness and efficiency; intertemporal economies; uncertainty.

**\*203B. Advanced Economic Theory: Game**

Theory (4) II. Roemer

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A, 200B, 200C. Covers the most recent developments in game theory, with the focus changing from year to year. Main topics are: refinements (or Nash equilibrium, repeated games, evolution, social situations, bounded rationality, and bargaining theory.

**\*203C. Topics in Economic Theory** (4) III.

Nehring

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A, 200B, 200C. Selected topics in contemporary microeconomic theory. May be repeated for credit with the consent of the Graduate Studies Committee.

**204. Microeconomic Analysis** (5) I. Sexton

(Agricultural and Resource Economics)

Lecture—4 hours; discussion—1 hour. Prerequisite: course 100 or Agricultural and Resource Economics 100A-100B; Mathematics 21A, 21B and 21C (or Mathematics 16A, 16B and 16C); open to advanced undergraduates with consent of instructor. Economic reasoning and social choice: behavior of firms and households, theory of markets, partial and general equilibrium analysis, welfare economics, illustrations and applications. (Same course as Agricultural and Resource Economics 204.)

**\*207. Contemporary Economics Seminar** (1) I,

II, III. The Staff

Seminar—1 hour. Prerequisite: graduate standing in Economics. Seminar series on topics of current interest. May be repeated for credit. (S/U grading only.)

**\*209A. Economics of Distributive Justice** (4) I.

Roemer

Lecture—4 hours. Prerequisite: course 200B. Introduction to social choice theory; envy-free allocations; axiomatic bargaining theory; axiomatic characterizations of resource allocation. Applications to modeling of the distributive theories of political philosophers J. Rawls, R. Dworkin, R. Nozick, and G.A. Cohen. Offered in alternate years.

**\*209B. Public Ownership Economics (4) III.**

Silvestre

Lecture—4 hours. Prerequisite: course 200B. Public ownership from the viewpoint of microeconomics, in particular general equilibrium and welfare economics. Topics include returns to scale and firm ownership, common-pool resources, externalities, and solution concepts for economies with public and private ownership. Offered in alternate years.

**\*209C. Foundations of Decision Theory (4) II.**

Nehring

Lecture—4 hours. Prerequisite: course 200B. Rigorous exposition of subjective expected utility theory; foundations, normative and empirical challenges. Topics include intertemporal decision; learning; incompleteness and ambiguity; individual and social choice; game theory as interactive decision theory; bounded rationality. Offered in alternate years.

**210A. Economic History (4) III.** Clark

Lecture/discussion—4 hours. Economic history of the eastern hemisphere in the modern period. Medieval Europe or other regions may be studied, depending on student interest.

**210B. Economic History (4) I.** Olmstead

Lecture/discussion—4 hours. The United States from Colonial times to the present. Other areas of the western hemisphere may be studied, according to student interest.

**210C. Economic History (4) II.** Lindert

Seminar—4 hours. Prerequisite: a graduate course in economic history. Selected topics and issues, emphasis on current research. (Quarter offered to be flexible.)

**214. Development Economics (4) I.** Rozelle

(Agricultural and Resource Economics)

Lecture—4 hours. Prerequisite: Agricultural and Resource Economics 100A, 100B, course 101; Agricultural and Resource Economics/Economics 204 and course 160A-160B recommended. Review of the principal theoretical and empirical issues whose analysis has formed development economics. Analysis of economic development theories and development strategies and their application to specific policy issues in developing country contexts. (Same course as Agricultural and Resource Economics 214.)

**215A. Agriculture and Economic Development (4) I.** Taylor (Agricultural and Resource Economics)

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics/Economics 200A or 204 and 214. Agricultural development theory and application. Analysis of rural-urban linkages and their role in economic development, food price policy, and interactions between economic development and the environment. Analytical focus on household-farm and intersectoral models. (Same course as Agricultural and Resource Economics 215A.)

**\*215B. Open Macroeconomics of Development (4) II.** Woo

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics/Economics 200A or 204, 200D or 205, and 214 or 215A. Models and policy approaches regarding trade, monetary and fiscal issues, capital flows and debt are discussed in the macroeconomic framework of an open developing country. The basic analytical focus is real exchange rate and its impact on sectoral allocation of resources. (Same course as Agricultural and Resource Economics 215B.)

**\*215C. Empirical Approaches to Development Analysis (4) III.** Taylor (Agricultural and Resource Economics)

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics/Economics 215A, 215B. Extension of development models for policy analysis including Household-Farm models, models of resource allocation under uncertainty.

Social Accounting Matrix and Computable General Equilibrium models. Analysis and case studies of methods of project evaluation with and without income-distribution weights. (Same course as Agricultural and Resource Economics 215C.)

**\*215D. Environment and Economic Development (4) III.** Farzin (Agricultural and Resource Economics)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 200A, 204 or Agricultural and Resource Economics 275. Interdisciplinary course drawing on theoretical and empirical research on interactions between environmental resource use and economic development processes. Analysis of issues emerging at the interface of environmental and development economics. (Same course as Agricultural and Resource Economics 215D.)

**\*221A. Industrial Organization (4) I.** Bonanno

Lecture—3 hours; to be arranged—1 hour. Analysis of market structure, business behavior, and economic performance under conditions of limited governmental interference.

**\*221B. Industrial Organization (4) II.** Branstetter

Lecture—2 hours; seminar—2 hours. Social standards and public policies toward the business sector of the economy.

**\*221C. Topics in Industrial Organization (4) III.**

The Staff

Lecture—3 hours; seminar—1 hour. Prerequisite: course 221A. Advanced topics in industrial organization and in applied microeconomics. Emphasis on current research. Content may vary from year to year.

**\*225. Urban Economics (4) III.** The Staff

Lecture—2 hours; discussion—2 hours. Prerequisite: course 200A or 204. Explains development of cities and land-use patterns within cities. Explores efficiency and equity effects of local spending and taxes. Analysis of urban problems such as transportation (congestion, pollution, mass transit), crime, and inadequate housing.

**230A. Public Economics (4) I.** Helms

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A or 204. Measures of deadweight loss and consumer surplus; optimal commodity and income taxation; tax incidence; policy issues in personal taxation, corporate taxation, and social insurance; evaluation of effective tax rates.

**230B. Public Economics (4) II.** Page

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A or 204. Effects of tax policies on economic behavior; production, consumption, savings, investment, and labor supply. Distribution and equity; social welfare evaluation and the measurement of inequity.

**230C. Public Economics (4) III.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A or 204. Advanced topics in economics of the public sector, with emphasis on current research. Content may vary from year to year.

**235A. Alternative Approaches to Monetary Analysis (4) II.** Hoover

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200D (may be taken concurrently). Focuses on relation between changes in money supply and changes in nominal GNP. Also discusses the effect of changes in money supply on interest rates.

**235B. Monetary Theory (4) III.** Salyer

Lecture—3 hours; discussion—1 hour. Prerequisite: course 235A. Emphasizes problem of finding an appropriate place for money in microeconomic/general equilibrium models. Consideration given to meaning of money, its relation to inflation and the real economy and to its role in models of finance.

**\*235C. Monetary Policy (4) II.** The Staff

Lecture—3 hours; discussion—1 hour. Organization of the Federal Reserve Bank, the definition of money, goals and tools of monetary policy, alternative targets for monetary policy, impact of monetary policy, the problem of lags, alternative policies.

**240A. Econometric Methods (4) II.** Green

(Agricultural and Resource Economics)

Lecture—4 hours. Prerequisite: Statistics 133 and a course in linear algebra or the equivalent. Least squares, instrumental variables, and maximum likelihood estimation and inference for single equation linear regression model; linear restrictions; heteroskedasticity; autocorrelation; lagged dependent variables. (Same course as Agricultural and Resource Economics 240A.)

**240B. Econometric Methods (4) III.** Chalfant

(Agricultural and Resource Economics)

Lecture—4 hours. Prerequisite: course 240A. Topics include analysis of variance, pooled time-series, cross-section estimation, seemingly unrelated regression, classical hypothesis tests, and identification and estimation of simultaneous equation models. (Same course as Agricultural and Resource Economics 240B.)

**240C. Econometric Theory (4) II.** Jorda

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240B. Finite sampling theory; nonlinear and dynamic econometric models; asymptotic distribution theory. (Same course as Agricultural and Resource Economics 240C.)

**240D. Topics in Econometrics (4) I.** Cameron

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240B. Advanced topics in nonlinear econometric modelling. Contents may vary from year to year. (Same course as Agricultural and Resource Economics 240D.)

**\*250A. Labor Economics (4) II.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 150A-150B or the equivalent. Philosophy, theory and history of American and foreign labor movements; union structure, organization and collective bargaining under changing labor market conditions; current labor market issues.

**\*250B. Labor Economics (4) III.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: course 151A or consent of instructor; course 204 or 200A recommended. Microeconomic theory of labor supply and labor demand, estimation of labor supply and demand functions; human capital theory; labor market analysis.

**256. Applied Econometrics (4) II.** Heien

(Agricultural and Resource Economics)

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics 106 or Economics 140, or the equivalent. Application of statistical tools to economic and business analysis. Emphasis on regression analysis, problems of specification, and model development. (Same course as Agricultural and Resource Economics 256.)

**260A. International Economics (4) I.** Feenstra

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A or 204. Theory of trade determinants; gains from trade; tariffs and effective protection; economic unions.

**260B. International Economics (4) II.** Woo

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 200D and 200E. Balance of payments adjustment mechanisms; foreign exchange markets' theories of balance of payments policy and international monetary mechanisms.

**260CN. International Investment and Trade (4) II,**

III. Swenson

Seminar—4 hours. Prerequisite: course 260A. Analysis of foreign investment and its links to trade; theories of the firm as they relate to firm's export and investment decisions; and an introduction to the political economy of trade policies.

**260D. Topics in International Macroeconomics (4) III.** Bergin

Seminar—4 hours. Prerequisite: course 260B or consent of instructor. Survey of current literature in international macroeconomic theory.

**260E. Topics in International Trade (4) III.**

Swenson

Seminar—4 hours. Prerequisite: course 260A, 260B. Current literature in international trade theory.

**\*280. Orientation to Economic Research (2) I.**

The Staff

Discussion—2 hours. Course tries to bridge the gap between students' classwork and their subsequent research. It deals with topics such as the origination of a research project, some mechanics of empirical research and hints on the submission of research papers. (S/U grading only.)

**290. Topics in Economics (4) I, II, III.** The Staff Seminar—4 hours. Prerequisite: consent of instructor. Selected topics in economic analysis and public policy, focusing on current research. May be repeated for credit.

**298. Group Study (1-5) I, II, III.** The Staff (Chairperson in charge) Discussion—1-5 hours. Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

**299. Individual Study (1-12) I, II, III.** The Staff (Chairperson in charge) Prerequisite: consent of instructor and graduate standing. (S/U grading only.)

**299D. Dissertation Research (1-12) I, II, III.** The Staff (S/U grading only.)

**Professional Course**

**397. Teaching of Economics (2) I.** Walton Lecture/discussion—2 hours. Prerequisite: graduate standing in economics. Teaching of economics: methods of instruction, organization of courses, examination and evaluation procedures. (S/U grading only.)

## Economy, Justice, and Society

John E. Roemer, Ph.D., Program Director and Professor of Economics  
Program Office, 1135 Social Sciences and Humanities Building (530-752-0743)

**Committee in Charge**

Josephine Andrews, Ph.D. (*Political Science*)  
Fred Block, Ph.D. (*Sociology*)  
David Copp, Ph.D. (*Philosophy*)  
Gerald Dworkin, Ph.D. (*Philosophy*)  
Scott Gartner, Ph.D. (*Political Science*)  
Robert Jackman, Ph.D. (*Political Science*)  
Klaus Nehring, Ph.D. (*Economics*)  
Marianne E. Page, Ph.D. (*Economics*)  
John Roemer, Ph.D. (*Economics*)  
Joaquim Silvestre, Ph.D. (*Economics*)

**Programs of Study.** Undergraduates may elect the minor in Economy, Justice, and Society. The Program on Economy, Justice, and Society also offers a *designated emphasis* in Economy, Justice, and Society open to students pursuing a doctoral degree in philosophy, political science, or economics (see below).

**Minor Program Requirements:**

A central concern of many citizens in modern societies is the inequality of income and life changes characteristic of them. In the United States, this concern has recently deepened, as income inequality has worsened substantially. The minor in Economy, Justice, and Society studies economic, political, sociological, and philosophical perspectives on such inequality.

UNITS

**Economy, Justice, and Society .....24**

Six upper division courses selected from Economics 116, 130, Philosophy 116, 118, Political Science 124, 142, 174, Sociology 118, 138, 140.

No more than two courses from a single department of program may be offered in satisfaction of the minor requirements.

When a listed course has prerequisites, they too must be taken, although they do not count toward the six-course requirement.

**Graduate Study.** The Program on Economy, Justice, and Society offers a *designated emphasis* in Economy, Justice, and Society open to students pursuing a doctoral degree in philosophy, political science, or economics. The designated emphasis provides interdisciplinary training in related aspects of economic theory, political theory, and political philosophy. Students take one or two core courses offered by the program, a designated field in their home department, a choice of two designated courses in the other two departments, and attend an advanced workshop/seminar run by the program. For students choosing the emphasis, these requirements will be in lieu of some requirements for the Ph.D. in the participating departments. Upon graduation, students receive a Ph.D. in their major with a designated emphasis in Economy, Justice, and Society.

**Graduate Adviser.** Consult program office or a program graduate adviser in one of the three departments listed above.

## Courses in Economy, Justice, and Society (EJS)

**Upper Division Course**

**\*100. Microeconomic Theory (4) III.** Nehring Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A or graduate standing. Basic concepts, modes of reasoning and fundamental results in modern microeconomics. Emphasis on, first, Utility Theory; second, the logic of the equilibrium method; third, welfare economics and public policy.

**Graduate Courses**

**207. Interdisciplinary Social Analysis (3) III.** The Staff

Lecture—2 hours; term paper. Prerequisite: graduate standing in Economics, Philosophy, or Political Science; course 100, Philosophy 117, or the equivalents. Analysis of practical and theoretical social problems with tools of economic theory, philosophy, and political theory, e.g., the welfare state, risk and public policy, equality of opportunity, individual rationality and cooperation.

**\*209A. Economic Models of Distributive Justice (4) I.** Roemer

Lecture—4 hours. Prerequisite: course 100 or the equivalent, and graduate standing. Introduction to social choice theory; envy-free allocations; axiomatic bargaining theory; axiomatic characterizations of resource allocation. Applications to modeling of the distributive theories of political philosophers. Offered in alternate years.

**\*209B. Economic Models of Public Ownership (4) III.** Silvestre

Lecture—4 hours. Prerequisite: course 100 or the equivalent and graduate standing. Public ownership from the viewpoint of microeconomics, in particular, general equilibrium and welfare economics. Topics include returns to scale and firm ownership, common-pool resources, externalities, and solution concepts for economies with public and private ownership. Offered in alternate years.

**\*209C. Foundations of Decision Theory (4) II.** Nehring

Lecture—4 hours. Prerequisite: course 100 or the equivalent and graduate standing. Rigorous exposition of subjective expected utility theory; foundations, normative and empirical challenges. Topics include intertemporal decision; learning; incompleteness and ambiguity; individual and social choice; game theory as interactive decision theory; bounded rationality. Offered in alternate years.

## Education

(Intercollege Division)

Fred H. Genesee, Ph.D., Director of the Division (2079 Academic Surge)

Robert A. DeVillar, Ph.D., Director of the UC Educational Research Center, Fresno and UC Co-Director of the UCD/CSU Fresno Joint Doctoral Program in Educational Leadership, Fresno

Barbara J. Merino, Ph.D., Director of Teacher Education

Barbara G. Goldman, Ph.D., Associate Director of Teacher Education

Sandra M. Murphy, Ph.D., Director, CRESS Center  
Jill Wilson, Ph.D., Executive Director, CRESS Center  
Division Office, 2074 Academic Surge  
(530-752-8258; Fax: 530-752-5411)

Student Services, 2078 Academic Surge  
(530-752-0757)

CRESS Center Office, 2060 Academic Surge  
(530-752-0281; Fax: 530-752-6135)

UCD/CSU Fresno Joint Doctoral Program Office,  
5005 North Maple Ave., Fresno, CA 93740-  
0117 (209-278-0427; Fax: 209-278-0457)

UC Educational Research Center, Fresno, 351 East  
Barstow Ave., Suite 101, Fresno, CA 93710  
(209-228-2050; Fax: 209-228-2055)

**Faculty**

Robert A. DeVillar, Ph.D., Associate Professor  
Sharon S. Dugdale, Ph.D., Professor  
Richard A. Figueroa, Ph.D., Professor  
Patricia C. Gandara, Ph.D., Associate Professor  
Fred H. Genesee, Ph.D., Professor  
Barbara G. Goldman, Ph.D., Lecturer in and  
Supervisor of Teacher Education (*Education,  
Human and Community Development*)

Pauline V. Holmes, M.A., Supervisor of Teacher Education

Anna T. Kato, Ed.D., Supervisor of Teacher Education

Maureen McMahon, Ph.D., Assistant Professor  
Barbara J. Merino, Ph.D., Professor

Sandra M. Murphy, Ph.D., Professor  
J. Richard Pomeroy, M.A., Supervisor of Teacher Education

Jonathan H. Sandoval, Ph.D., Professor  
Robert M. Van Dyne, Ed.D., Supervisor of Teacher Education

Jon Wagner, Ph.D., Professor

David R. Wampler, Ph.D., Lecturer in and Supervisor of Teacher Education

Karen A. Watson-Gegeon, Ph.D., Professor

**Emeriti Faculty**

Donald G. Arnstine, Ph.D., Professor Emeritus  
Hugh C. Black, Ph.D., Professor Emeritus  
G. Phillip Cartwright, Ph.D., Professor Emeritus  
Concha Delgado-Gaitan, Ph.D., Professor Emerita  
Douglas L. Minnis, Ed.D., Lecturer Emeritus  
Julius M. Sassenrath, Ph.D., Professor Emeritus  
Carlton J. Spring, Jr., Ph.D., Professor Emeritus  
George D. Yonge, Ph.D., Professor Emeritus

**Cooperative Research and Extension Services for Schools (CRESS) Staff**

Pam Castori, M.A., Director, California Science Project—Sacramento; Education Extension Specialist for Science

Kathy Dixon, Ph.D., Publications Coordinator  
Barbara Hoffman, M.A., Director, Sierra North Arts Project

Pauline Holmes, M.A., Associate Director for Inservice Programs, Area 3 Writing Project

Judith Kysh, M.A., Education Extension Specialist for Mathematics; Co-Director, College Preparatory Mathematics; Director, Northern California Mathematics Project

Rachel Lodge, M.A., Associate Director, Healthy Start Field Office  
 Jayne Marlink, M.A., Director, Area 3 Writing Project  
 Rollie Otto, Ph.D., Director of the California Science Project  
 Keith Prior, B.A., Systems Analyst, Healthy Start Field Office  
 Tom Sallee, Ph.D., Co-Director, College Preparatory Mathematics Project  
 Lisa R. Villarreal, M.A., Director, Healthy Start Field Office  
 Jill Wilson, Ph.D., Associate Director, CRESS Center

**Affiliated Faculty**

Kathy Medina, M.A., Director, Area 3 History and Cultures Project

**Major Program and Graduate Study.** The Division of Education offers a minor and programs of graduate study described below. There is no undergraduate major in education.

**Minor Program Requirements:**

Education theory is considered to be the foundation for undergraduates to elect as a minor if they wish to (1) major in an allied program, (2) obtain a teaching credential, (3) obtain a master's degree in education or related field, (4) obtain a Ph.D. degree in education, (5) enter a profession that focuses on work with people, (6) seek employment in a governmental or industrial training program, or (7) obtain a better understanding of the issues and concerns of public and private education.

At least 16 units of the 20-unit minimum for the minor must be in Education. One course in a related field is acceptable for the minor.

|-------------------------------|-----------|
| Education.....                | <b>20</b> |
| Education 100, 110, 120 ..... | 12        |
| Elective courses .....        | 8         |

The remaining 8 units may be taken from the following courses in Education, with the option of selecting one course from the list of approved elective courses outside of Education:

*Education:*

Education 115, 130, 151, 152, 153, 163

*Approved courses outside of Education:*

Agricultural Education 100, 160, Human Development 100A, 100B, 101, 103, Linguistics 163, 166, 167, Psychology 130, 132, 136

**Minor Advisers.** A designated faculty member in the Division of Education may advise students and give final approval on the minor. For additional advising and information, contact D. Wampler (530-752-3196; e-mail: drwampler@ucdavis.edu), or the Student Services Office, 2078 Academic Surge.

**Graduate Study**

The Division of Education, in conjunction with the Graduate Group in Education, offers programs of study and research leading to the M.A. and Ph.D. degree in Education. The Ph.D. is offered by the Education Graduate Group. Detailed information regarding graduate study may be obtained by writing the Graduate Coordinator, Division of Education, 2078 Academic Surge.

**Graduate Coordinator.** K. Bray.

**Graduate Advisers (M.A. and Ph.D. degree).** J. Sandoval, P. Gandara, J. Wagner.

**Teacher Education—Credentialing**

For a statement of complete requirements and appointments with credential advisers, contact the Student Services, 2078 Academic Surge. Interested students are urged to do this as early as possible in their academic career.

Applicants to the elementary or secondary teaching credential programs should contact Student Services for forms and procedural information early in the **fall quarter** of their senior year.

**Teacher Education Faculty Advisers—Elementary.** D.R. Wampler.

**Bilingual Emphasis.** B.J. Merino.

**Teacher Education Faculty Advisers—Secondary.** P. Holmes, R. Van Dyne.

**Graduate Adviser.** B. Merino, B. Goldman (Teaching Credential Program).

**UCD/CSU Sacramento Collaborative Elementary Credential Program**

Barbara Goldman (UC Davis) and René Merino (CSU Sacramento), Program Directors

Program Office, 2078 Academic Surge  
 (530) 1-888-smr-2-1rn;  
 e-mail: smrtolrn@ucdavis.edu

The Collaborative Elementary Credential Program offers accelerated course work for the CLAD or BCLAD elementary credential during the summers; the supervised field experience is completed during the academic year. This program is designed to meet the needs of emergency credential holders and working professionals who are changing careers.

**UCD/CSU Fresno Joint Doctoral Program (Ed.D.)**

Karen Carey, (CSU Fresno) and Robert DeVillar (UC Davis), Program Directors

UC Davis Office, 2078 Academic Surge  
 (530-752-0761; Fax, 530-752-5411);  
 e-mail: kbray@ucdavis.edu

CSU Fresno Program Office  
 (209-278-0427; Fax: 209-278-0457);  
 e-mail: diane\_rivera-pasillas@csufresno.edu

The joint (UCD/CSU Fresno) doctoral program leads to the Doctorate in Education (Ed.D.) in Educational Leadership. Contact the CSU Fresno Program Office for information and application materials.

**Courses in Education (EDU)**

**Lower Division Course**

**98. Directed Group Study (1-5) I, II, III.** The Staff (Director in charge)  
 Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

**Upper Division Courses**

**100. Introduction to Schools (4) I, II, III.**

Wampler  
 Lecture—3 hours; field work—3 hours. Prerequisite: upper division standing. Study of occupational concerns of teachers; skills for observing classroom activities; school organization and finance; school reform movement; observing, aiding, and tutoring in schools.

**110. Educational Psychology: General (4) I, II, III.** The Staff (Director in charge)  
 Lecture/discussion—4 hours. Prerequisite: Psychology 1; upper division standing. Learning processes, cognitive development, individual differences, testing and evaluation. GE credit: SocSci, Wrt.

**\*114. Quantitative Methods in Educational Research (4) I.** The Staff (Director in charge)  
 Lecture/discussion—4 hours. Prerequisite: two years of high school algebra. Problems and methods in data analysis. Design of research projects. Some consideration of procedures suited to digital computers.

**115. Educating Children with Disabilities (2) II, III.** Figueroa, Sandoval  
 Lecture—2 hours. Prerequisite: upper division standing. Educational issues and processes involved in teaching children with disabilities. The course will focus on the structure of special education, with an emphasis on meeting the educational needs of children who are mainstreamed in regular classes.

**120. Philosophical and Social Foundations of Education (4) III.** Wagner  
 Lecture—2 hours; discussion—2 hours. Prerequisite: upper division standing. Philosophical, historical, and sociological study of education and the school in our society. GE credit: SocSci, Wrt.

**130. Issues in Higher Education (4) III.** The Staff (Director in charge)  
 Discussion—3 hours; field work—3 hours. Prerequisite: upper division standing or consent of instructor. Analysis of current issues in higher education and of some practical implications of varying philosophical approaches to the role of the university.

**151. Language Development in the Chicano Child (3) I.** Merino  
 Lecture—3 hours. Prerequisite: some knowledge of Spanish and linguistics recommended. Bilingualism, first and second language acquisition, bilingual education, language assessment, Chicano Spanish, and the role of dialect varieties in the classroom.

**152. Communication Skills for Bilingual Teachers (3) III.** The Staff (Merino in charge)  
 Lecture—2 hours; field work—3 hours. Prerequisite: course 151; Spanish 2, 8A-8B. The development of communication skills of prospective educators with an emphasis on the study and use of standard Spanish and Southwest Spanish dialects in teaching science, mathematics, social science, music, art, and language arts to bilingual elementary school pupils.

**\*153. Cultural Diversity and Education (2) III.** The Staff (Director in charge)  
 Lecture/discussion—2 hours. Prerequisite: upper division standing. Analysis of research on learning styles among culturally-diverse students with review and evaluation of responsive curricula and classroom teaching techniques. The ethnographic interview as a research tool.

**160A. Introduction to Peer Counseling (2) I, II.** Counseling Center Staff  
 Lecture/discussion—2 hours. Prerequisite: upper division standing and consent of instructor. Introduction to peer counseling techniques and development of peer counseling skills. (P/NP grading only.)

**160B. Issues in Peer Counseling (2) I, II, III.** Counseling Center Staff  
 Lecture/discussion—2 hours. Prerequisite: upper division standing and consent of instructor; course 160A recommended. In-depth review and development of skills for specific counseling topics. May be repeated once for credit when topic differs. (P/NP grading only.)

**\*163. Guidance and Counseling (4) III.** Figueroa, Sandoval  
 Lecture—4 hours. Prerequisite: course 110 (may be taken concurrently). Nature and scope of pupil personnel services; basic tools and techniques of guidance; theory and practice of counseling psychology, with emphasis on educational and vocational adjustment.

**\*180. Computers in Education (3) I, II, III.** Dugdale  
 Lecture—1 hour; seminar—1 hour; laboratory—1 hour. Prerequisite: upper division standing or graduate student. Applications of computers in education as instructional, intellectual, and communication tools. Not open for credit to students who have taken course 181 or 182.

**\*181. Instructional Applications of Computers (2)**  
 Lecture/discussion—1 hour; seminar—1 hour. Prerequisite: Agricultural Systems and Environment 21 or appropriate microcomputer course, and consent of instructor. Applications of computers in K-12 instruction, with emphasis on software selection and use, subject and grade level focus, and curricular integration. Intended for students who already possess experience and skill with a variety of microcomputer applications, this course does not include the more general topics covered in course 180. Not open for credit to students who have completed course 180 or 182.

**\*182. Computer Project for Curricular Integration (1)**  
 Seminar—1 hour. Prerequisite: Agricultural Systems and Environment 21 or appropriate microcomputer course, experience with instructional computing and consent of instructor. Design and implementation of a curricular unit to integrate computer technology into a K-12 classroom setting. A project-based seminar intended for students with substantial prior experi-

\*Course not offered this academic year.

ence with instructional use of computers and related technologies. Not open for credit to students who have completed course 180 or 181.

**192. Internship** (1-3) I, II, III. The Staff  
Internship—2-8 hours; discussion—1 hour. Prerequisite: upper division standing and consent of instructor. Internship as a tutor, teacher's aide, or peer counselor in a school or educational counseling setting under the supervision of a faculty member. May be repeated once for credit. (P/NP grading only.)

**197T. Tutoring in Education** (1-2) I, II, III.  
The Staff (Director in charge)

Tutoring—1-2 hours. Prerequisite: upper division standing and consent of instructor. Leading of small voluntary discussion groups affiliated with the Division's upper division courses under the supervision of, and at the option of, the course instructor, who will submit a written evaluation of the student's work. May be repeated once for credit for a total of 4 units. (P/NP grading only.)

**198. Directed Group Study** (1-5) I, II, III.  
The Staff (Director in charge)

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff (Director in charge)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

### Graduate Courses

**200. Educational Research** (4) III. Sandoval  
Lecture—2 hours; discussion—2 hours. Prerequisite: introductory statistics and graduate standing in education or consent of instructor. Defining educational research questions, reviewing relevant literature, developing research designs, developing research instruments, selecting appropriate data analysis procedures, and writing research projects. A case problem will provide practice in designing and reporting research.

**201. Qualitative Research in Education** (4) III.  
Wagner

Seminar—2 hours; lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Examines the design and conduct of educational research using non-numerical data (e.g., text, discourse, imagery and artifacts). Focuses on issues (e.g., validity, reliability, generalizability, ethics) and reporting genres (e.g., narrative accounts, case studies, and arguments). (Former course 203.)

**\*202. Philosophy of Education: Models and Methods** (4) III. The Staff (Director in charge)

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Examples of some major philosophical points of view about educational aims, illustrations of several types of philosophical discourse and argumentation, and an opportunity for students to locate and critique some contemporary studies in the philosophy of education. Offered in alternate years.

**203. Educational Testing and Evaluation** (4) II.  
Gandara

Lecture/discussion—4 hours. Prerequisite: graduate standing or consent of instructor. Introduces the theoretical assumptions underlying traditional test construction, as well as the basic statistical principles involved in the design, evaluation, and interpretation of standardized tests. Also introduces the debates surrounding the uses of different kinds of tests and evaluation tools.

**205A. Ethnographic Research in Schools I: Current Theory and Practice** (4) I.  
Watson-Gegeo

Lecture—4 hours. Prerequisite: graduate standing. Current literature from anthropology and society related to schools. Emphasis on the organizational structure of institutions, and the analysis of face-to-face interaction. Will explore the relationship between field-based research and theory development on the acquisition of knowledge in specific social and cultural contexts. (Former course 201A.)

**205B. Ethnographic Research in Schools II: Field-Based Research Projects** (4) II.

Watson-Gegeo

Discussion—4 hours. Prerequisite: graduate standing and course 205A. Student research projects in specific schools with cooperative critical analysis of the design, data collection, and inferring by researchers. Students will continue to meet with instructor as a group throughout the quarter to discuss specific projects. (Former course 201B.)

**207. Concepts of the Curriculum** (4) I. The Staff (Director in charge)

Lecture—2 hours; discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Development of the skills of philosophical analysis and argument for the establishment of a point of view, in the consideration of curriculum theory and practice. Classical and contemporary approaches to subject matter and activity emphases, hidden curriculum, and moral education.

**210. The Psychology of School Learning** (4) I.  
Sandoval

Lecture/discussion—4 hours. Study of human learning theory and research related to learning in school. Classical approaches of scholars such as Ausubel, Brunner, Gagne, Piaget, Vygotsky, Skinner. Review of contemporary issues of constructivism, metacognition, problem solving, learning strategies, science and mathematics learning.

**\*211. Psychopedagogics** (4) II. The Staff (Director in charge)

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Phenomenological approach to the psychological aspects of the educational situation (psychopedagogics). A critical consideration of how psychopedagogics contributes to the theory and practice of education.

**\*213. Individual Assessment** (4) III. Sandoval

Lecture—4 hours. Prerequisite: courses 114 and 219, admission to school psychology credential program. Theories of intellectual functioning and the measurement of cognitive abilities in school-aged children. Supervised practice in administration and scoring of contemporary tests for children including the WISC-R, the WAIS-R, the Stanford Binet, the McCarthy Scales of Children's Ability.

**\*214. Assessment of Children's Personality** (4) III. Sandoval

Lecture—3 hours; field work—3 hours (minimum). Prerequisite: admission to school psychology credential program; courses 213 and 218; and familiarity with basic personality theory and theories of motivation. Study of the projective hypothesis; concepts of personality and its measurement; legal and ethical issues in personality assessment; interviewing techniques in assessment of social and affective functioning; specific measures in personality assessment; reporting on personality assessments; school interventions. Offered in alternate years.

**215. Research on Achievement Motivation in Education** (4) II. Spring

Seminar—3 hours; term paper. Prerequisite: graduate standing in Education or consent of instructor. Analysis and critique of recent research on cognitive processes related to achievement motivation in school settings. Topics include self-determination theory, attribution theory, goal theory, intrinsic and extrinsic motivation, learned helplessness, psychological reactance, gender and culture, and research design.

**\*216. School-Based Prevention Programs** (4) III. Sandoval

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Promotion of health and mental health in schools. Topics include the theoretical base, prevention models, specific examples of techniques and programs designed to prevent learning and adjustment problems, and evaluation issues. Offered in alternate years.

**\*218. Testing Minority Children** (4) I. Figueroa

Lecture—3 hours; field work—3 hours. Prerequisite: admission to school psychology program or to M.A. bilingual education program or consent of instructor. Emphasizing tests and techniques that are appropriate

for use with Hispanic students. The use of multicultural pluralistic assessment. Review studies and guidelines on use of tests with minority children. Offered in alternate years.

**221. Culture and Social Organization of Schools** (4) I. Wagner, Gandara

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Culture and social organization of schools. Examines perspectives of social researchers, educational policy-makers, and school members and their implications for educational research, policy and practice.

**\*222. School Change and Educational Reform** (4) II. Wagner

Lecture/discussion—2 hours; seminar—2 hours. Prerequisite: graduate standing in Education with course 120 or the equivalent. Analysis of models, processes, and case studies of school change and educational reform with respect to variable characteristics of schools and schooling, planned and unplanned change, the moral evaluation of school change, and the role of educational research. (Former course 204.)

**\*223. Education and Social Policy** (4) III.  
Gandara

Seminar—4 hours. Prerequisite: graduate standing in Education or consent of instructor. Focuses on understanding the social and political context of education in the U.S. and California and how education policy is formed in the broader public arena. Develops skills in educational policy analysis. Offered in alternate years. (Former course 237.)

**226. Culture and Social Organization of Higher Education** (4) II. Wagner, Sandoval, Gandara

Seminar—3 hours; field work—1 hour. Prerequisite: graduate standing or consent of instructor. Critical study of culture and social organization of higher education institutions policies and functions in the U.S., with some attention to other countries. Offered in alternate years.

**\*231. Culture and Learning** (4) II.  
Delgado-Gaitan

Seminar—4 hours. Prerequisite: graduate standing in Education with course 120 or the equivalent, or consent of instructor. Analysis of major theories of relationships between learning and the sociocultural context in which learning takes place, issues related to the academic achievement of different language groups, and implications for research and pedagogical reform.

**\*232. Families and Communities as Educational Contexts** (4) I. Delgado-Gaitan

Seminar—4 hours. Prerequisite: graduate standing in Education or consent of instructor. Families and cultural communities are important social contexts of education for children. An interdisciplinary perspective is presented in an attempt to understand how learning in these social contexts influences the schooling of children.

**\*233. Anthropology of Education** (4) I.  
Delgado-Gaitan

Seminar—3 hours; term paper. Prerequisite: one of the following courses: Anthropology 117, 127, 129, or 222, or course 231, 201A, or 201B, or consent of instructor. Uses concepts of anthropology to examine education in such settings as family, community, and formal institutions of schooling. Course goal is to raise questions about educational issues often taken for granted and provide a perspective from which problems may be analyzed. Offered in alternate years. (P/NP grading only.)

**\*235. Critical Pedagogy** (4) III. Delgado-Gaitan  
Seminar—4 hours. Prerequisite: Critical Theory 200A and graduate standing. A sociocultural critique, from an interdisciplinary perspective, of educational reform and change. The critique will include an analysis of the influence of text content on the perpetuation of social power differences.

**\*241. Research on Reading and Spelling Acquisition** (4) III. Murphy

Seminar—4 hours. Prerequisite: graduate standing in Education or consent of instructor. Analysis and critique of research on psychological processes in learning to read and spell. Topics include writing sys-

tems, theories of processes and acquisition, emergent reading, readiness, decoding, word reading, oral text reading, spelling stages, instructional methods, disability, dialect. Offered in alternate years.

**242. Research on Text Comprehension (4) III.** The Staff (Director in charge)  
Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Analysis of recent research related to cognitive processing of written texts. Topics include word decoding, schema theory, background knowledge, assimilation, accommodation, working memory, processing depth, vocabulary acquisition, sentence-level processes, text-level processes, text structure, implications for curriculum and instruction.

**243. Research on the Teaching and Learning of Writing (4) III.** Murphy  
Seminar—4 hours. Prerequisite: graduate standing in Education or consent of instructor. Study of issues in research on composition; history of composition studies; data analysis techniques; product and process approaches; cognitive and social perspectives. Offered in alternate years.

**249. Discourse Analysis in Educational Settings (4) II.** Watson-Gegeo  
Seminar—3 hours; term paper. Prerequisite: graduate standing and at least one previous course in linguistics or sociolinguistics, or consent of instructor. Examines form and type in discourse (e.g., narration, conversation, routines), approaches to discourse analysis, and research on classroom discourse (lessons, teaching/learning interactional sequences). Final term paper is an analysis of discourse data tape-recorded by student in a field setting. (Former course 239.)

**\*251. Research in Bilingual and Second Language Education (3) III.** Merino  
Seminar—3 hours. Prerequisite: course 151; knowledge of a foreign language. Discussion and analysis of recent research in bilingual and second language education. Topics include: language acquisition in second language learners and bilinguals, second language teaching methods, language-use models in bilingual education, interaction analysis in bilingual/

cross-cultural classrooms, use of the vernacular in classrooms. Offered in alternate years.

**\*252. Multicultural Teaching and Curriculum (3) III.** Merino  
Seminar—2 hours; field work—3 hours. Prerequisite: graduate standing or consent of instructor. Cross-cultural research on socialization, motivation, language acquisition and cognition and its application to effective classroom strategies and curriculum development for minority students. Students will develop and implement multicultural curriculum as well as use ethnographic research techniques in an educational setting. Offered in alternate years.

**253. Language and Literacy in Linguistic Minorities (3) II.** Merino, Watson-Gegeo  
Seminar—2 hours; field work—3 hours. Prerequisite: familiarity with another language and culture; graduate standing. Analysis and application of research on oral language development and literacy in language minority students, through the development, implementation, and evaluation of research-based language arts curriculum.

**255. Curriculum Development and Evaluation in Mathematics (4) I.** Dugdale  
Seminar—4 hours. Prerequisite: graduate standing in Education with upper division course work in mathematics or consent of instructor. Analysis of curricular issues and goals in mathematics education, including long-term trends, current status and influences, proposed changes, and evaluation issues. Selected curriculum projects will be examined.

**256A. Research in Mathematics Education (4) II.** Dugdale  
Seminar—4 hours. Prerequisite: graduate standing in Education with upper division course work in mathematics, or consent of instructor. Examination of research process in mathematics education; review of critical productive problems identified by researchers;

evolution of trends, issues, theories and hypotheses in various areas of mathematics education research. Course emphasizes foundations. Offered in alternate years.

**\*256B. Research in Mathematics Education (4) II.** Dugdale  
Seminar—4 hours. Prerequisite: graduate standing in Education with upper division course work in mathematics, or consent of instructor. Current research issues and activities in mathematics education: status, trends, theories and hypotheses. Formulation of research questions and design of studies. Projection of future directions for research. Offered in alternate years.

**\*257. Computer Technology in Mathematics Education (4) III.** Dugdale  
Seminar—4 hours. Prerequisite: graduate standing in Education with mathematics course work; or consent of instructor. The roles of calculators, computers, and graphing calculators in mathematics education will be addressed, with emphasis on the impact of these technologies on curriculum reform. Selected efforts to integrate technology into mathematics instruction will be examined. Offered in alternate years.

**\*275. Effective Teaching (4) I.** The Staff (Director in charge)  
Seminar—4 hours. Review of research on the relationship of effective teacher behavior and student learning. Use of research on teacher effectiveness to develop teaching strategies. Ways to decide on the most appropriate instructional strategies in specific teaching situations.

**290C. Research Conference in Education (1) I, II, III.** The Staff (Director in charge)  
Discussion—1 hour. Prerequisite: graduate standing. Presentations and critical discussions of research in education by graduate students with their major professor. May be repeated twice for credit. (S/U grading only.)

**291. Proseminar in Education (3) I, II.** Sandoval  
Seminar—3 hours. Prerequisite: admission to the Ph.D. graduate program in Education. Seminar for first-year education doctoral students. The study of multi-disciplinary research approaches to educational issues. Reports and discussions of recent advances in education. Speakers from the graduate group faculty in Education. May be taken twice for credit.

**292. Special Topics in Education (2-4) I, II, III.** The Staff (Director in charge)  
Variable—2-4 hours. Prerequisite: completion of doctoral core courses in Education or consent of instructor. Selected topics in education. Designed to facilitate preparation for the qualifying examination or dissertation. Students will critically analyze scholarly work including their own works in progress. May be repeated for credit.

**\*293. Topical Seminar in School Psychology (3) I, III.** Sandoval  
Seminar—3 hours. Prerequisite: graduate standing in Education and consent of instructor. Critical study of selected issues in education and school psychology related to the learning and mental health of children and adolescents in schools. May be repeated once for credit.

**298. Group Study (1-5) I, II, III.** The Staff (Director in charge)  
(S/U grading only.)

**299. Individual Study (1-6) I, II, III.** The Staff (Director in charge)  
Independent study—3-18 hours. Individual study under the direction of a faculty member. (S/U grading only.)

**299D. Research (1-12) I, II, III.** The Staff (Director in charge)  
Independent study—3-36 hours. Research for individual graduate students. (S/U grading only.)

**Professional Courses**

**300. Reading in the Elementary School (4) III.** The Staff (Merino in charge)  
Lecture—3 hours; field work—3 hours. Prerequisite: graduate standing. Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas.

**301. Reading in the Secondary School (4) I, II.** Murphy  
Discussion—4 hours. Prerequisite: graduate standing, enrollment in the secondary credential program, or consent of instructor. Principles, procedures, and materials to help secondary school teachers improve the reading competence of students. Strategies for enhancing learning through reading and writing in all disciplines, with special attention to linguistically diverse populations.

**302. Language Arts in the Elementary School (2) I.** The Staff (Merino in charge)  
Lecture—2 hours. Prerequisite: graduate standing. Principles, procedures, and materials for the teaching of oral and written expression, listening skills, drama, and children's literature in elementary schools.

**303. Art Education (3) III.** The Staff (Merino in charge)  
Lecture/discussion—2 hours; laboratory—2 hours. Prerequisite: admission to multiple subject credential program. Understanding the principles of education in the arts through participation. Development of concepts, introduction to media, and techniques suitable for the elementary school with emphasis on cross-discipline exploration.

**304A. Teaching in the Elementary Schools (2-18) I.** Director of Teacher Education in charge  
Lecture/discussion—2 hours; fieldwork—9-48 hours. Prerequisite: acceptance into a teacher education program. Supervised teaching in regular classrooms in elementary schools. Selection and organization of teaching materials. Introduction to techniques of diagnosing school achievement of children.

**304B. Teaching in the Elementary Schools (2-18) II.** Director of Teacher Education in charge  
Lecture/discussion—2 hours; fieldwork—9-48 hours. Prerequisite: acceptance into a teacher education program. Supervised teaching in regular classrooms in elementary schools. Current conceptions of elementary school curriculum, emphasis on contributions from the social, biological, and physical sciences. Emphasis on effective teaching methods.

**304C. Teaching in the Elementary Schools (2-18) III.** Director of Teacher Education in charge  
Lecture/discussion—2 hours; fieldwork—9-48 hours. Prerequisite: acceptance into a teacher education program. Supervised teaching in regular classrooms in elementary schools. Evaluation of teaching materials including instructional technology. Current elementary school curriculum with emphasis on contributions from fine arts and humanities.

**\*305A. Teaching in the Middle Grades (5-8) I.** The Staff (Merino in charge)  
Lecture—2 hours; seminar—2 hours; student teaching—15-30 hours. Prerequisite: acceptance into a teacher education program. Supervised teaching in regular or special education classrooms in middle grades. Current conceptions of the middle-grades curriculum with emphasis on social, biological, and physical sciences. Effective teaching methods.

**\*305B. Teaching in the Middle Grades (5-8) II.** The Staff (Merino in charge)  
Lecture—2 hours; seminar—2 hours; student teaching—15-30 hours. Prerequisite: course 305A; acceptance into a teacher education program. Supervised teaching in regular or special education classrooms in intermediate grades. Selection, organization, and evaluation of teaching materials including audio-visual aids. Effective teaching methods in grades 4-9.

**\*305C. Teaching in the Middle Grades (5-8) III.** The Staff (Merino in charge)  
Lecture—2 hours; seminar—2 hours; student teaching—15-30 hours. Prerequisite: course 305B; accep-

\*Course not offered this academic year.

tance into a teacher education program. Supervised teaching in regular or special education classrooms in junior high school. Current conceptions of the junior high school with emphasis on effective teaching methods, and selection of curriculum materials. Alternative programs.

**306A–306B–306C. Teaching in the Secondary Schools** (2-18) I-II-III. Director of Teacher Education in charge

Lecture/discussion—2 hours; fieldwork—9-48 hours. Prerequisite: acceptance into a teacher education program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology.

**307. Methods in Elementary Science** (2) III. Wampler

Lecture/discussion—2 hours. Prerequisite: acceptance into teacher education program. Principles, procedures, and materials for teaching the biological and physical sciences in elementary schools.

**308. Methods in Elementary Social Studies** (2) III. Wampler

Lecture/discussion—2 hours. Prerequisite: acceptance into a teacher education program. Principles, procedures, and materials for teaching history and the social sciences in elementary schools.

**309. The Teaching of Mathematics, K–9** (3) I. Dugdale

Lecture/discussion—3 hours. Prerequisite: acceptance into a teacher education program. Mathematics curriculum and teaching methods for K–9 reflecting the needs of California's diverse student populations.

**\*322. Methods in Secondary Social Studies** (4) I. The Staff (Merino in charge)

Lecture—4 hours. Prerequisite: acceptance into credential program or consent of instructor. Methods and materials of teaching concepts and thinking skills. Recent developments in applying basic skills to the teaching of social studies.

**323A. Physical Science in the Secondary School** (3) I. The Staff (Merino in charge)

Laboratory/discussion—2 hours; discussion/laboratory—1 hour. Prerequisite: acceptance into a teacher education program. Activity-based overview of concepts and processes in secondary school physical sciences. Emphasis upon philosophy, appropriate teaching methods, materials, assessment and evaluation of learning.

**323B. Life Sciences in the Secondary School** (3) II. The Staff (Merino in charge)

Laboratory/discussion—2 hours; discussion/laboratory—1 hour. Prerequisite: acceptance into a teacher education program. Activity-based overview of concepts and processes in secondary school biology and life sciences. Emphasis on philosophy, appropriate teaching methods, materials, assessment and evaluation of learning, and issues.

**324A. Methods and Technology in Secondary Mathematics I** (4) I. Dugdale, Van Dyne

Lecture/discussion—4 hours. Prerequisite: admission into a teacher education program or consent of instructor. Introduction to methods and curriculum for teaching mathematics at the secondary level. Introduction to applications of computer technology as instructional, intellectual, and communication tools for mathematics teachers.

**324B. Methods and Technology in Secondary Mathematics II** (4) II. Dugdale, Van Dyne

Lecture/discussion—4 hours. Prerequisite: admission into a teacher education program or consent of instructor. Expansion of methods and curriculum for teaching mathematics at the secondary level. Intermediate applications of computer technology as instructional, intellectual, and communication tools in mathematics teaching.

### 325. Research and Methods in Secondary

**English Language Arts** (4) III. The Staff  
Discussion—4 hours. Prerequisite: admission to graduate standing or credential program in Education or consent of instructor. Research on teaching and learning in the language arts. Principles, procedures and materials for improving the writing, reading and oral language of secondary students, with special attention to students from culturally and linguistically diverse populations.

**326. Teaching Language Minority Students in Secondary Schools: Methods and Research** (4) II. Merino

Seminar—3 hours; field work—3 hours. Prerequisite: graduate standing in Education or consent of instructor. Research on principles, procedures and curricula for teaching discipline-specific concepts to language-minority students in secondary schools. Second-language acquisition principles and instructional strategies.

**\*351. Advanced Fieldwork in Bilingual Education: Teaching** (3-5) I. The Staff (Merino in charge)

Seminar—2 hours; field work—3-9 hours. Prerequisite: acceptance into a bilingual education specialist program. Discussion, analysis, and implementation of methods, techniques, and material in the bilingual/cross-cultural classroom, including team teaching with paraprofessionals, implementation of language-use models in the classroom, lesson planning, selection and use of bilingual/cross-cultural materials.

**\*352. Advanced Fieldwork in Bilingual Education: Evaluation and Supervision** (3-5) II. Merino

Seminar—2 hours; field work—3-9 hours. Prerequisite: upper division standing; acceptance into a bilingual/cross-cultural specialist credential program. Provides opportunity to acquire evaluation and supervisory skills in the field under the supervision of University staff and an experienced program evaluator/supervisor in bilingual/cross-cultural education.

**\*361A-361B-361C. School Psychology:**

**Introduction** (3-3-3) I-II-III. Sandoval and staff  
Seminar—2 hours; field work—3 hours (minimum). Prerequisite: admission to school psychology credential program. History and theory of school psychology. Application of psychological theory to educational problems. Reading and mathematics curriculum for school psychologists. Crisis intervention and counseling in the schools. Fieldwork in schools and other institutions serving children. (S/U grading only.)

**\*362A-362B-362C. School Psychology:**

**Advanced** (3-3-3) I-II-III. Sandoval, Figueroa, Gandara  
Seminar—2 hours; field work—4 hours. Prerequisite: courses 361A-361B-361C, 213, 218, 219. Theory and techniques of school-based mental health consultation and non-biased assessment. Legal principles related to special education practice and school psychology. Advanced case study techniques. (S/U grading only.)

**\*363A-363B-363C. School Psychology:**

**Internship** (8-12) I, II, III. Sandoval, Figueroa, and staff  
Seminar—2 hours; internship—18-32 hours. Prerequisite: admission to school psychology credential program; courses 361A-361B-361C, 362A-362B-362C, 213, 218, 219. Individual assessment and program evaluation, mental health consultation, intervention strategies to promote the school learning and adjustment of children. Selected topics in school psychology. (S/U grading only.)

**398. Group Study** (1-5) I, II, III. The Staff (Director in charge)  
(S/U grading only.)

**399. Individual Study** (1-5) I, II, III. The Staff (Director in charge)  
(S/U grading only.)

## Education (A Graduate Group)

Jonathan H. Sandoval, Chairperson of the Group  
Group Office, 2078 Academic Surge (530-752-0761;  
Fax: 530-752-5411); e-mail: kbray@ucdavis.edu

**Faculty.** Faculty are drawn from 12 departments in the Colleges of Letters and Science, and of Agriculture and Environmental Sciences.

**Graduate Study.** The Graduate Group in Education offers programs of study and research leading to the Ph.D. degree. Students may study topics in mathematics education, science education, and language and literacy education including bilingual education. Students may also concentrate in educational/school psychology, educational anthropology, and educational sociology and policy studies. Detailed information regarding graduate study may be obtained by writing the group administrative assistant.

**Preparation.** Students should have earned an M.A. degree or the equivalent in a discipline relevant to their proposed emphasis program. For example, students applying for the Instructional Studies emphasis in mathematics should have earned the M.A. or M.A.T. degree in mathematics; students applying to the Psychological Studies program should have an M.A. in psychology, or educational psychology.

**Graduate Adviser.** Consult the Education Graduate Group Office.

**Courses.** See Education for courses.

## Education Abroad Program

Dennis Dutschke, Ph.D., E.A.P. Campus Director  
Program Office, 1514 Kerr Hall  
(530-752-3014; Fax: 530-754-8311)

World Wide Web:

### Programs of Study

The University of California offers overseas study programs in cooperation with more than 100 host universities and colleges in over 34 countries throughout the world. More than 1,800 UC students, primarily undergraduates, will take part in this program in 1998-99. Participating students remain registered at their home campuses while studying abroad and receive full academic credit for their work. Nearly 800 international students will attend UC campuses under the auspices of the Education Abroad Program (EAP) in 1998-99, often with scholarships provided through UC and their home institutions. As an academic program, EAP at UC Davis is dedicated to serving students and faculty by providing global educational and internship opportunities.

Full-year study programs are available in Australia, Austria, Barbados, Brazil, Canada, Chile, China, Costa Rica, Denmark, Egypt, England, France, Germany, Ghana, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Korea, Mexico, New Zealand, Scotland, Singapore, Spain, Sweden, Taiwan, and Thailand.

EAP also offers short-term and special-focus programs. One-semester options are available in Brazil, Canada, Chile, Costa Rica (quarter also), Denmark, Germany, Hungary, India, Indonesia, Italy, Sweden, and Thailand. One-term intensive language programs are available in Denmark, France, Germany, Italy, and Mexico. A field research program is offered in Mexico, three Tropical Biology programs in Costa Rica, a Global Security and Development Studies and an Engineering spring program in Japan.

UC faculty, who serve as directors at most Study Centers, provide academic advising to students while abroad. Full credit is granted for courses satisfactorily completed, and approved courses are recorded on official UC transcripts. With careful planning, most EAP students make normal progress toward their UC degrees. Students may earn credit abroad towards their major, minor, general education, or graduation requirements, with approval of their UC major and college.

Participants pay the same fees as at UC Davis. Additional costs and fees include room and board, books and personal travel, round-trip transportation, on-site orientation and intensive language program (where applicable) and miscellaneous expenses. The cost of studying abroad is often comparable to that of studying on a UC campus, although costs vary from country to country.

Financial assistance is available to EAP students. Those already receiving UC financial aid maintain their eligibility for grants, loans, and scholarships while studying on EAP. Financial aid is based on the cost of studying at each EAP location. Students who might not normally be eligible for financial aid may qualify for the period they are in EAP. In addition to UC financial aid, EAP provides support through various scholarships and grants. Campus scholarships may also be available based on the country, academic merit, or academic field of study. Students should contact the campus EAP and Financial Aid office for additional information.

An EAP adviser can provide full details about the academic programs abroad, requirements, and application procedures. Staff will put students in touch with recent participants and academic advisers. Academic catalogs and detailed course listings are available.

### Selection

Selection of UC undergraduates is subject to the following minimum qualifications: 3.0 cumulative grade point average at the time of application and maintained through departure (some programs only require "good academic standing," such as the language and culture short-term programs); endorsement of the UC Davis EAP selection committee; and completion of language courses as required. Many countries do not have a language requirement. Only half of the programs require two years of college-level training in the language of the host country.

EAP opportunities are also open to qualified graduate students who have completed at least one full year of graduate work and have support of their graduate program and graduate dean. A detailed statement of the projected program of study is required.

Students are selected by a committee of UC Davis faculty and staff familiar with the host country. EAP applicants must participate in a Conversation/Culture partnership: EAP applicants meet with international students or scholars for a minimum of five hours to exchange language, culture and information about their respective countries before departure. In addition, the committee strongly recommends that prospective participants familiarize themselves with the country of their interest in preparation for the year abroad, through appropriate courses, books, magazine or journal articles, or newspapers. Lists of suggested courses and reading materials are available in the EAP Office.

Once the completed application materials have been filed, an applicant will be interviewed by a selection committee consisting of faculty and EAP returnees. Among other things, academic goals, some knowledge of the host country (and the United States) and proficiency in the language (when applicable), will receive considerable attention during the interviews.

Files of applicants receive the endorsement of the interview committee and the EAP director and are forwarded to the Systemwide Office of the EAP on the Santa Barbara campus, where further selection considerations are made.

### Academic Program

In most situations, students from the University of California live as the students of the host country do, and in some cases students attend the same courses, taught by faculty of the host country in their own language. Thus, language skills are very important for about half of the EAP programs. To aid adjustment of UC students, tutorials are a part of the academic program at some centers. Tutorials assist in overcoming language problems and differences in educational practices and provide cultural background information presupposed in the courses. Tutorials are taught by graduate students or junior staff of the host university and are offered in association with courses in which a sufficient number of UC students have enrolled.

To assist in the adjustment and the academic work of the students, faculty members of the University of California serve as Directors and/or Associate Directors at most of the study centers abroad.

The academic program of each student includes: (1) an intensive preparatory course in the language of the host country (except for the programs in the Australia, Canada, Egypt, Ghana, Hungary, Ireland, and New Zealand, United Kingdom); (2) a quarter, a semester or a full year of academic courses; (3) broad opportunity to audit courses within the host university. It is expected that students will complete a minimum of 36 units during the academic year or 24 semester units in addition to units earned in the intensive language program.

### Graduation Requirements

All prospective applicants, particularly students who intend to study abroad during their senior year, should carefully plan their course programs for Davis and abroad in order to satisfy university, college, and major/minor requirements for their degree. The provisional planning form in the application packet addresses these concerns.

Although units and grade points earned in the EAP are incorporated into the University transcript and GPA, departments and majors retain the right to determine which EAP courses will be accepted in satisfaction of major and minor requirements. Several major and minor programs have identified key upper division courses which must be completed in residence at Davis. Academic advisers should be consulted early so that the pre-departure program at Davis will be planned appropriately.

All degree candidates must meet the University residence requirement. Students planning to graduate immediately upon completion of participation in the EAP may satisfy college residence requirements within the final 45 units preceding entrance into the EAP. In addition, subject to prior approval of the major department or program concerned, the requirement may be satisfied as follows: Within the final 90 units earned toward the degree, 35 units must be completed in residence in the student's college or university, 12 units of which must be completed after returning from EAP participation. With this option, no more than 55 units taken abroad may be applied toward the unit requirement for graduation. The applicant's college dean is the source of information on the university residence requirement.

Students may satisfy GE requirements while on EAP. GE credit is determined by the student's college. Participants who satisfy all degree requirements while abroad and expect to graduate upon completion of the year abroad should file for candidacy to receive their degree in September (candidacy filing dates are established by the Office of the Registrar). In some cases, transcripts from abroad may not be received in time to be posted on the student's Davis transcript for EAP returnees to be included on the June degree list. Such returning students may participate in the June commencement ceremony; however, their graduation date will be in September.

## Courses in Education Abroad Program (EAP)

### Lower Division Course

#### 90X. International Education Seminar (1) I, II, III. Dutschke

Seminar—1 hour. Prerequisite: open to lower division applicants for EAP or UC Davis study abroad and international internship programs. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only.)

### Upper Division Course

#### 190X. International Education Seminar (1) I, II, III. Dutschke

Seminar—1 hour. Prerequisite: open to upper division applicants for EAP or UC Davis study abroad and international internship programs. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only.)

## Study Centers

At any one center, the courses and fields of study open to UC students may be limited. Each host institution has special areas of excellence and strength. The listing below incorporates selected information concerning course work available at each study center. More detailed information is available in the flyers describing each of the centers and from the EAP advisers in 154 Kerr Hall.

In addition to the programs listed below, Davis students have access to a variety of non-UC programs of study and work abroad opportunities. Information can be obtained at the EAP Office in 154 Kerr Hall.

## Europe

**Denmark.** A compulsory summer intensive language program precedes the academic year or semester and continues through the fall semester. Most students concentrate on their major or a closely related field; independent study under tutorial supervision is expected. Students may also apply to the Summer Intensive Language Program to bring their level of language up to participate in courses taught in Danish during spring semester.

*University of Copenhagen.* Courses in European Studies, political science and law. Other courses: art history, English literature, anthropology, sociology, mathematics and natural sciences. Students may also take a human biology program in English.

**France.** A compulsory intensive language course precedes the beginning of the academic year. All courses in the universities are taught in French. UC faculty directors are in residence at the Bordeaux, Lyon and Paris study centers in France.

A French language and culture Fall quarter program is available at the *Centre International d'Etudes Françaises*, at Lyon.

*Ecole Normale Supérieure*, Paris. Course work in natural sciences, humanities, French and foreign literature, geography, and social sciences.

*Ecole Normale Supérieure at Fontenay-Saint Cloud*, Paris Region. Course work in social sciences and the humanities.

*Ecole Polytechnique at Palaiseau*, Paris Region. Course work in natural sciences and mathematics.

*University of Bordeaux.* Broad areas of the humanities and social sciences. The Institute of Political Science and the Institute of Prehistory (Anthropology) are well known.

*University of Grenoble.* Mainly in the social sciences through the *Université des Sciences Sociales* (Grenoble II); some humanities. Offerings in anthropology and psychology are limited. Not suitable for physical or life sciences.

*University of Lyon.* Social sciences, art history; modern languages and linguistics; Arabic studies.

*Paris Center for Critical Studies.* Film theory, literary criticism, philosophy, theater (literature, criticism, and history), historiography, and limited art history.

*Paris Critical Studies Program.* Offers multidisciplinary curriculum in theoretical aspects of the arts, humanities, and social sciences. For advanced undergraduate and graduate students.

*University of Toulouse.* EAP students take regular university courses at Toulouse I (Social Sciences) and Toulouse II (Humanities). Of particular note are courses in business/management studies, comparative literature, economics, international relations, and political science.

**Germany.** A compulsory intensive language and culture program precedes the beginning of the academic year. All courses are taught in German.

*Language and Society Program, Bayreuth.* Short Term program available for Spring quarter.

*Georg-August University, Göttingen.* Year or Spring quarter, or Göttingen Fall and Berlin Spring. Broad curriculum covering most majors. Excellent science programs, with substantial strength in biology, chemistry, and physics.

**Hungary.** *Eötvös Loránd University, Budapest.* A fall semester or a year-long program are offered with an emphasis on Central European studies. Students take courses especially designated for EAP, and the courses are taught in English.

**Italy.** A compulsory intensive program in language and history precedes the beginning of the academic year. Students who have completed only one year of Italian may become eligible for participation by attending a summer intensive-language program in Siena, Italy, in order to attain the second-year level, followed by the normal compulsory intensive-language program at the study center in Italy. A UC faculty director resident in Italy administers the program. All courses are taken in Italian.

*Siena Language and Culture Program.* Spring or fall quarter (Siena) or spring semester. Open to beginning (no prior language study required) and intermediate (at least one year of language study) Italian language students. Sophomores may apply. Good academic standing required.

*Bocconi University, Milan.* Fall semester. This institution offers studies in business administration, with a special emphasis on Italian and European entrepreneurial systems.

*University of Bologna.* Humanities, social sciences, economics, history. Also, literature, art/music performance, communications, European history, film, studio art.

*University of Padua.* History of art (including archaeology), Italian literature/linguistics, and political science, history, social science, geography, and demography. Students may also take performance classes for piano, violin, cello, and voice. The Medical School will open to EAP students in 1998.

*University Institute of Architecture, Venice.* Students may study the scientific aspects of architecture, design, and restoration.

**Spain.** A compulsory intensive language program precedes the beginning of the academic year. All instruction is in Spanish.

*University of Alcalá de Henares.* Spanish language and literature, history and economics.

*University of Barcelona.* Humanities (with emphasis on Spanish art, history, literature, linguistics) and some social sciences. EAP students are required to take at least two regular year-long courses at the University of Barcelona. (This is a cooperative program with the University of Illinois.)

*University of Granada.* EAP students take at least three courses each semester. Students will also take special program tutorials.

*Complutense University of Madrid.* Humanities and some social sciences. The core program, developed for the UC Study Center and other American pro-

grams, concentrates on Spanish studies in the broadest sense. Core and Study Center courses are taught by Spanish faculty. EAP students are required to take two regular year-long courses at the University of Madrid.

*Autonomous University of Barcelona.* Courses in most majors including Catalán studies, International Relations, and Environmental/Ecological studies.

*Autonomous University of Madrid.* Courses in natural sciences, physics, chemistry and biology, economics, history, geography, literature, and psychology.

**Sweden.** Fall term or year participation. Compulsory intensive language course during the summer for students who are not already fluent in Swedish. Language study continues during the fall semester for all students until the student has gained the equivalent of two years of Swedish. Many courses are taught in English. Previous knowledge of Swedish is not required.

*University of Lund.* Broad curriculum. Excellent science programs.

**United Kingdom and Ireland.** The program, which includes 19 institutions listed below, is administered by a director and associate director located in London. Following selection for participation by the EAP administration, a student must still be accepted by a specific department in one of the host institutions. In many host institutions, the student can pursue studies in that department only.

England: *Bristol University, King's College, Nottingham University, University of Birmingham, University of East Anglia, University of Essex, Colchester, University of Exeter, University of Hull, University of Kent at Canterbury, University of Lancaster, University of Leeds, University of London (Queen Mary and Westfield College), University of Sheffield, University of Sussex, University of Warwick, University of York.*

Ireland: *University College, Cork, University College, Galway.*

Scotland: *University of Edinburgh, University College, Glasgow, University of St. Andrews, University of Stirling.*

Generally, the host universities offer a broad curriculum that includes most liberal arts majors. Life sciences and physical sciences are available.

**Russia.** One semester-long (fall only) program available at the *European University of Moscow.* Intensive language study at the intermediate or advanced level for at least half of the units earned, and four core courses in English: Art and History, Politics, Literature, Rise and Fall of Communism in Russia. Some course work will be available in English. Graduate student opportunities will be available for students with advanced Russian language training.

## Middle East

**Egypt.** All courses are taught in English, except courses in Arabic language and literature.

*The American University of Cairo.* A broad curriculum offered by the Faculty of Arts and Sciences. All students are required to take at least one year-long course in Arabic. Offerings in science are limited.

**Israel.** A required, 10-week summer intensive language and cultural immersion program at the University in Haifa or Jerusalem precedes the academic year.

*Hebrew University, Jerusalem.* Broad curriculum; emphasis on Israel and Middle Eastern studies. UC students enroll in a special program for foreign students, taught in English at the Hebrew University's Rothberg School for Overseas Students. The program offers courses in Judaic, Israeli, Middle Eastern studies, and a few courses in the general social sciences and humanities, science and business. Students with command of Hebrew have access to a broad curriculum throughout the Hebrew University.

*Ben-Gurion University of the Negev, Beersheva.* Intensive study abroad experience focusing on research. Two tracks are available: social-scientific study of Israel's ethnic minorities (Bedouin, Russian, Ethiopian) or laboratory study in the health sciences and the nat-

ural sciences in areas related to Israel's environment. Opportunities will be available for students to spend several hours per week in internship positions in various educational, social, community and health institutions in the Bedouin, Ethiopian, Russian and Israeli communities.

## Asia

**Hong Kong.** A selection of courses is offered in English. Knowledge of Chinese is not required for acceptance; however, all students are required to complete at least two courses in Chinese culture, history, or language prior to departure. A compulsory intensive Cantonese program precedes the beginning of the academic year. All students are required to include 18 units of Mandarin or Cantonese in their annual program abroad.

*Chinese University of Hong Kong.* Humanities and social sciences, with emphasis on Chinese studies. Art studio and music performance courses are available.

*Hong Kong University of Science and Technology.* Fall, spring or year-long options taught in English. Focus on business, engineering or science.

**India.** Fall Semester. Instruction is in English. A compulsory intensive language program in conversational Hindi precedes the academic year. Students can take courses in economics, history, linguistics, philosophy, political science, psychology, social work, and sociology. Limited courses in history of art, conversation, and museology.

*University of Delhi.* Humanities and social sciences are well represented, with some offerings in fine arts and mathematics.

*Jawaharlal Nehru University, New Delhi.* EAP students majoring in economics, development studies, environmental studies, political science, and social sciences will find extensive course work in these areas.

**Indonesia.** Fall semester or year program. Instruction is in English. An eight-week summer intensive-language program at *Gadjah Mada University* in Yogyakarta is required for all students. Those with less than two years of University-level Indonesian must then take a ten-week inter-term program of continued study of the language, with additional courses in Indonesian history and culture, taught in English. Students enroll in regular courses at one of five institutions for the second semester. Tutorial assistance may be available.

*Gadjah Mada University.* Agriculture, anthropology, biology, economics, geography, mathematics, philosophy, psychology, political science.

*Institute Seni Indonesia (ISI).* The Indonesian Institute of the Arts: visual arts, music, dance, theater, fine arts, ethno-musicology.

**Japan.** A variety of study opportunities are available to UC students. Language requirements vary depending upon the host institution and the academic focus of the program. A summer intensive language course prepares students for year-long programs. The programs are administered by a director located in Tokyo.

*Doshisha University, Kyoto.* Humanities and social sciences; emphasis on Japanese language and culture. This center serves students having more advanced study of Japanese; at least two, preferably three, years of UC Japanese language study.

*Global Security Studies Program, Meiji Gakuin University, Yokohama.* This spring quarter program provides students the opportunity to study economics, political science, world peace and security issues. Previous Japanese language study is preferred, but not required.

*Inter-University Center for Japanese Language Studies (IUC), Yokohama.* This program offers an intensive program of training for graduate students in Japanese language. The prerequisite is two years of university-level Japanese.

*International Christian University, Mitaka (Tokyo).* Humanities and social sciences; emphasis on Japanese language and intercultural communication. A lim-

ited number of courses taught in English are available. At least one year of university-level Japanese language study is required.

*Nagoya University, Nagoya.* This program is for graduate level economics students. The academic program includes intensive Japanese language study and research conducted under the supervision of a Japanese professor. The prerequisite is two years of university-level Japanese.

*Osaka University, Osaka.* Undergraduate students study Japanese language and a set program of economics courses. Instruction is in English during the fall semester and in Japanese during the spring. A minimum of two years of university-level Japanese is required.

*Sophia University, Tokyo.* Comparative culture studies, Japanese language and literature, history, political science, economics and business are available. Many are taught in English. The prerequisite is one year of university-level Japanese.

*Tohoku University, Sendai.* This program is primarily for graduate students in most fields with well-developed research projects. Participants will study Japanese language, in addition to working on their research projects under the guidance of a Japanese professor. Graduate study in Engineering may also be available. Undergraduates at the advanced level in Japanese may be able to participate in a language and culture program. The prerequisite is two to three years of university-level Japanese.

*Tokyo Institute of Technology.* Graduate students proficient in Japanese may do research and take courses in science and engineering.

*Tsukuba University.* Studies in the humanities, social and natural sciences and engineering.

*University of Tokyo, Komaba campus.*

**Korea.** Year or summer-plus-fall term with a required six-week intensive language program at Yonsei University. Students who are not fluent in Korean will take courses taught in English at Yonsei's Division of International Education. Courses in art history, business, economics, law, literature, philosophy, political science, and sociology are available.

**People's Republic of China.** EAP offers a full-year program in Beijing and a fall semester program at *Beijing Normal University in Beijing*. Intensive language study in Chinese is the primary emphasis of all programs.

*Beijing University of Science and Technology.* Students receive a half-year of academic credit and financial support for studying standard Chinese and teaching English to Chinese students. The prerequisite is two years of Chinese language and one course in teaching English as a foreign language.

*Beijing Normal University in Beijing.* This fall semester program includes Chinese language study and courses taught in English on Chinese culture and civilization. The prerequisite is one year of college-level Chinese. Students must take an intensive language program in July and August prior to the start of the semester.

*Peking University.* A year-long program focused on advanced-level instruction in Chinese language and literature. Courses are conducted by the Chinese Language Teaching to Foreigners Division of Peking University. The prerequisite for the program is two years of college-level Chinese.

**Singapore.** Semester or year program. Courses in biology (botany and zoology), business, economics, sociology, and Southeast Asian Studies.

**Taiwan, Republic of China.** Fall semester or year program. Students who participate in this program will receive Chinese language instruction, special course work in Chinese studies (taught in English) and the opportunity to take regular courses if language requirement is met.

*National Taiwan University.* (This is a cooperative program with California State University International Programs.)

**Thailand.** Fall semester or year program. An eight-week summer intensive language program at *Chiangmai University* is required for all students. This is followed by a seven-week inter-term program of continued study of the Thai language, with additional courses in Thai history and culture, taught in English. Most students will remain at *Chiangmai University* for the second semester and continue taking courses in Thai language and area studies classes taught in English. Students with sufficient language background (more than two years of University-level Thai language) have the option of enrolling at *Chulalongkorn University* in Bangkok for the second semester. Instruction is in Thai, though English-speaking tutors are available.

It is possible to apply for the summer intensive-language program only. Students may take more advanced language courses in subsequent years.

## Africa

**Ghana.** *University of Ghana, Legon-Accra.* Open to undergraduate and graduate students. Instruction is in English. As in the British system, students take a year-long program of study in a single area. End-of-year examinations are given only once and are mandatory for credit to be awarded.

Offerings include humanities and social sciences, with emphasis on African studies. There is a strong program in ethnomusicology.

## Latin America

**Argentina.** Semester or year-long program. University of Cuyo, Mendoza. Study agriculture, economics, geography, music, political science, and Spanish language and literature.

**Brazil.** Language requirement for admission to this program is two years of college-level Portuguese or the equivalent; or one year of college Spanish and one year of college Portuguese; or two years of college Spanish and intensive language course preceding the beginning of regular course work.

*Pontifical Catholic University of Rio de Janeiro (PUC-Rio).* A semester or year academic program which consists of Portuguese study and regular university courses in a wide range of fields.

**Chile.** Semester (Winter and Spring quarter equivalent) and year program. *Catholic University of Chile, or University of Chile, Santiago de Chile.* A semester or year program is offered. Courses in Chilean history and society; Spanish language; Latin American development, ecology and the environment; and interdisciplinary women's studies are available.

**Costa Rica.** Semester (Winter and Spring quarter equivalent) and year program. *University of Costa Rica, San Jose.* As is appropriate in this hemisphere, the academic year extends from early March through December. UC participants leave in January. Applications for participation in this program are due in May for a January departure.

A mandatory intensive language program precedes the academic year. During the academic year, courses in Central American studies (history, literature, political science, etc.) form half of the curriculum, with the remaining courses taken from any of the faculties at the University of Costa Rica.

*Costa Rica Tropical Biology Quarter at Monteverde and at Las Cruces.* This Spring and Fall quarters program provides an unusual opportunity for undergraduates to study and do field research in a tropical cloud forest. Applicants should have completed a year of biology, including one upper division organismal biology course.

## Central America

**Barbados.** Emphasis in Caribbean studies. Semester or one-year program.

**Mexico.** *Universidad Nacional Autonoma de Mexico (UNAM), Mexico City.* Semester or year. A required intensive language program precedes the beginning of the school year, augmented by courses in contemporary Mexico (history, art, literature, etc.). Students have the option of spending one semester (two UC quarters) at UNAM, or a full year. All instruction is in Spanish.

*Field Research Program (FRP) in Mexico.* Available for either Fall or Spring semester, the FRP program begins in Mexico City with six weeks of intensive language courses and a course on contemporary Mexico. The final weeks of the program are spent doing research work in a city in Mexico to complement formal course work. Students must have completed a minimum of two years of university-level Spanish, or the equivalent, and have at least sophomore standing with good academic standing at the time of departure.

*Language Program in TAXCO.* Winter quarter available for language study at the 2nd-year level or advanced. At least sophomore standing with good academic status at the time of departure.

*Summer Intensive Language Quarter in Morelia.* This program provides total immersion in Mexican society and Spanish language instruction for students who have completed one year of university-level Spanish with a 3.0 GPA before departure. It is not appropriate for advanced students in Spanish. At least sophomore standing with a cumulative GPA of at least 3.0.

## Canada

Students may enroll for a Fall semester or a full year. Studies on the major or a closely allied field are expected.

*University of British Columbia (UBC), Vancouver.* Most academic disciplines are available. Areas of special interest include Pacific Rim and Canadian Studies.

## Australia and New Zealand

As is appropriate in the Southern Hemisphere, the academic year extends from the beginning of instruction in late February through the examination period, which ends in early December. UC participants leave in early February, and will be unable to attend classes during the winter term preceding departure. Applications for participation in these programs are due in May for a February departure. The universities follow the British system of higher education.

The Australian program includes the *University of Queensland* in Brisbane; the *Australian National University* in Canberra; three institutions in the Melbourne area, *University of Melbourne, Monash University* and *La Trobe University*; the *University of Sydney*, and the *University of New South Wales* in Sydney; University of Western Australia; *Australian National University* in Canberra. *University of Adelaide* and *Flinders University* in Adelaide; and the *University of Wollongong*. A full range of academic programs is available. The Study Center accommodates a limited number of students. A UC faculty member in Melbourne directs all programs.

The New Zealand program includes the *University of Auckland, University of Canterbury, Christchurch; Lincoln University of Canterbury; the University of Otago* in Dunedin, *Massey University* in Palmerston North, *Victoria University* in Wellington and the *University of Waikato* in Hamilton. All academic disciplines are available; programs in textiles and engineering and a variety of agricultural sciences are of special interest.

## Endocrinology (A Graduate Group)

Judith Turgeon, Ph.D., Chairperson of the Group  
Group Office, 4136 Tupper Hall (Human Physiology,  
752-3230)

**Faculty.** The Group includes faculty from the Schools of Medicine and Veterinary Medicine, the Division of Biological Sciences, and the College of Agricultural and Environmental Sciences.

### Courses in Endocrinology (EDO)

#### Graduate Courses

**\*210. Methods in Endocrine Research** (4) I, II, III. The Staff

Laboratory—9 hours; discussion—1 hour. Prerequisite: consent of instructor. Ten-week assignment in endocrinology research laboratory. Individual research problem with emphasis on experimental design and methodological/analytical experience. Exposure to and experience with a range of endocrinology faculty research activities. May be repeated three times for credit. (S/U grading only.)

#### 218. Mammalian Endocrinology and Homeostasis

(4) III. Turgeon, Walsh  
Lecture—4 hours. Prerequisite: Biological Sciences 102 and 103, Neurobiology, Physiology and Behavior 101, and consent of instructor. Biochemical, physiological, and regulatory properties of the mammalian endocrine system, at the molecular, cellular and systemic level. Signal transduction mechanisms and hormonal actions. Principles that regulate homeostasis, especially in organ-organ interrelationships, metabolism and minerals, fluids and electrolytes. Reproductive endocrinology.

#### 220. Endocrinology Literature Critique

(1) I, II. Turgeon  
Discussion—1 hour. Prerequisite: consent of instructor. Critical reading and evaluation of current original publications in endocrinology. Selected papers will be presented and discussed in detail by faculty and students. May be repeated for credit. (S/U grading only.)

#### 235. Personal Computing in the Life Sciences

(3) III. Matthews  
Lecture—1 hour; laboratory—6 hours. Prerequisite: consent of instructor. Current and near-future uses of "state-of-the-art" personal computers, including the Internet and local area networks. Application in the life sciences. Running programs on Macintosh and PC-compatible computers and on Windows NT local area network in Endocrinology Graduate Group computer laboratory.

**240. Biochemical Endocrinology** (3) III. Adams  
Lecture—3 hours. Prerequisite: graduate standing or consent of instructor. Examination of recent advances in biochemical endocrinology and molecular and cell biology of endocrine systems with emphasis on processes of hormone and receptor synthesis, second messenger phenomena, and hormonal control of gene expression.

#### 290. Seminar

(1) I, II, III. The Staff (Chairperson in charge)  
Seminar—1 hour. Prerequisite: consent of instructor. Discussion and critical evaluation of advanced topics and current trends in research in endocrinology. May be repeated for credit.

**298. Group Study** (1-5) I, II, III. The Staff (Chairperson in charge)  
Prerequisite: consent of instructor.

**299. Research** (1-12) I, II, III, IV. The Staff (Chairperson in charge)  
(S/U grading only.)

### Undergraduate Study

The four-year undergraduate program is divided into two parts: the **Lower Division Program** and the **Upper Division Program**. If you enter the College of Engineering with *fewer than 90* quarter units of credit, follow the lower division program specified for your major.

If you enter the College with 90 or more quarter units of credit, you must fulfill the requirements outlined in the Undergraduate Education chapter of this catalog, under "College of Engineering, Unit Requirements."

### Graduate Study

Graduate degrees are offered in Engineering (M.Engr, M.S., D.Engr., Ph.D.) and Engineering—Applied Science (M.S., Ph.D.). For additional information refer to the *College of Engineering Bulletin*, obtainable from the UCD Bookstore, or phone the Graduate Study Office (530-752-0592). See also the Graduate Studies chapter of this catalog.

### The Major Programs

Eleven majors are offered leading to the B.S. degree:

**Aeronautical Science and Engineering**  
**Biological Systems Engineering**  
**Chemical Engineering**  
**Chemical/Biochemical Engineering**  
**Civil Engineering**  
**Computer Engineering**  
**Computer Science and Engineering**  
**Electrical Engineering**  
**Food Engineering**  
**Materials Science and Engineering**  
**Mechanical Engineering**

Four double majors are offered leading to the B.S. degree:

**Chemical Engineering/Materials Science and Engineering**  
**Civil Engineering/Materials Science and Engineering**  
**Electrical Engineering/Materials Science and Engineering**  
**Mechanical Engineering/Materials Science and Engineering**

### The Aeronautical Science and Engineering Major Program

(Mechanical and Aeronautical Engineering)

Aeronautical Science and Engineering is the branch of engineering that applies scientific knowledge to the design, manufacture and operation of aircraft. Our

Bachelor of Science degree in Aeronautical Science and Engineering provides a broad background and fundamental education in mathematics, the physical sciences, and the engineering sciences. These fundamentals, when complemented by the required technical courses, prepare you for employment in government or industry, while simultaneously establishing an excellent foundation for graduate studies.

The fundamental disciplines of this branch of engineering apply to all bodies and vehicles whose applied loads are influenced by aerodynamic forces. Within this context, aeronautical engineers are involved with automobiles, trains, ships and submarines, aircraft, rockets and missiles, sports equipment, and a variety of energy systems.

Courses in fundamental engineering principles are supplemented with courses in aircraft propulsion, aerodynamics, performance, stability and control, aircraft preliminary design, aeronautical structures, and aeroelasticity.

### Aeronautical Science and Engineering Curriculum

*The Aeronautical Science and Engineering curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.*

#### Lower Division Program

|                                                                                                                                                                                                                   | UNITS     | QUARTER<br>USUALLY<br>TAKEN |

#### Upper Division Program

A broad range of technical elective courses is available. Some students choose these electives from one area of study in order to begin developing a specialty. Others choose from several areas in order to broaden their background in the sciences and engineering. Typical aeronautical science and engineering specialties include aero-thermodynamics, propulsion systems, aircraft performance, stability and control, aeronautical structures, aeroelasticity, flight testing, or component and mechanism design. While you should consult with your adviser before selecting your technical electives, there are a number of electives that could be recommended to all aeronautical science

and engineering students regardless of their chosen area of specialization.

Suggested technical electives:

Aeronautical Science and Engineering 131, 137, 139  
Mechanical Engineering 172

**Suggested advisers:** J.J. Chattot, M.M. Hafez, R.A. Hess, L.W. Rehfield, N. Sarigul-Klijn, S.A. Snell, C.P. van Dam, B.R. White.

**Upper Division Requirements**

| Subject Areas and Courses                                                                                                                                                                                                                                    | UNITS      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Electronic circuits—Engineering 100 .....                                                                                                                                                                                                                    | 3          |
| Applied mechanics—Engineering 102, 104, 104L .....                                                                                                                                                                                                           | 9          |
| Applied thermodynamics—Engineering 105A, 105B, Mechanical Engineering 165 .....                                                                                                                                                                              | 10         |
| Fluid mechanics—Engineering 103A, 103B, 107 .....                                                                                                                                                                                                            | 9          |
| Aerodynamics—Aeronautical Science and Engineering 126, 127 .....                                                                                                                                                                                             | 8          |
| Aircraft propulsion, performance, stability and control—Aeronautical Science and Engineering 128, 129, 138 .....                                                                                                                                             | 12         |
| Aircraft preliminary design—Aeronautical Science and Engineering 130 .....                                                                                                                                                                                   | 4          |
| Aerospace structures—Aeronautical Science and Engineering 133, 135 .....                                                                                                                                                                                     | 7          |
| Measurement systems—Mechanical Engineering 176 .....                                                                                                                                                                                                         | 3          |
| Controls and system analysis—Mechanical Engineering 171 .....                                                                                                                                                                                                | 4          |
| Applied mathematics—Select one course from Engineering 180, Applied Science Engineering 115 or Mathematics 128C .....                                                                                                                                        | 3          |

**Biological Systems Engineering**

(Biological and Agricultural Engineering)

Biological Systems Engineering is the branch of engineering that builds strongly on biology as a scientific base. In the coming age of biology and biotechnology, engineers will be needed to work side by side with life scientists to bring laboratory developments into commercial production. Industries in plant and animal production, tissue culture, bioprocessing, biotechnology, food processing, aquaculture, agriculture, and forest production will all need engineers with strong training in biology. Concern for our environment is opening new engineering opportunities as society strives to maintain a balance within the biosphere.

In the freshman and sophomore years, the Biological Systems Engineering major requires sequences of courses usual in all engineering programs, including mathematics, physics, chemistry, engineering science, and humanities. Unlike other majors, the Biological Systems Engineering major also requires fundamental courses in the biological sciences and the integration of engineering with biology.

**Biological Systems Engineering Curriculum**

*The Biological Systems Engineering curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc.*

**Lower Division Program**

| Required Courses                                                                                                                                                                               | UNITS        | QUARTER USUALLY TAKEN |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------------|
| Calculus—Mathematics 21A-21B-21C-21D .....                                                                                                                                                     | 16           | 1-2-3-4               |
| Linear algebra—Mathematics 22A .....                                                                                                                                                           | 3            | 5                     |
| Differential equations—Mathematics 22B .....                                                                                                                                                   | 3            | 6                     |
| General physics—Physics 9A-9B-9C .....                                                                                                                                                         | 12           | 3-4-5                 |
| General chemistry—Chemistry 2A-2B .....                                                                                                                                                        | 10           | 2-3                   |
| Biological Sciences 1A, 1B, 1C .....                                                                                                                                                           | 15           | 4-5-6                 |
| Introduction to biological systems and food engineering—Biological Systems Engineering 1 .....                                                                                                 | 3            | 1                     |
| Biosystems engineering graphics design laboratory—Biological Systems Engineering 2L .....                                                                                                      | 1            | 1                     |
| Applications of computers—Engineering 5 or Introduction to programming—Computer Science Engineering 30 .....                                                                                   | 3 or 4       | 2                     |
| Circuits—Engineering 17 .....                                                                                                                                                                  | 4            | 6                     |
| Statics—Engineering 35 .....                                                                                                                                                                   | 3            | 4                     |
| Properties of biological materials—Biological Systems Engineering 75 .....                                                                                                                     | 4            | 5                     |
| Expository writing—English 1 or 3, or Comparative Literature 1, 2, 3, or 4, or Native American Studies 5 .....                                                                                 | 4            | 1                     |
| Introduction to public speaking or group communication—Communication 1 or 3 (or an acceptable substitute as approved by the Undergraduate Study Committee of the College of Engineering) ..... | 4            | 2                     |
| Humanities—Social Sciences electives and General Education electives .....                                                                                                                     | 8            | 3, 6                  |
| <b>Total Lower Division Units .....</b>                                                                                                                                                        | <b>93-94</b> |                       |

**Upper Division Program**

In the junior and senior years, the Biological Systems Engineering major requires courses that focus on the integration of biology and physical sciences with engineering. Depending on your area of interest, you may select elective courses from six specializations:

- Agricultural Engineering
- Aquacultural Engineering
- Biotechnical Engineering
- Ecological Systems Engineering
- Forest Engineering
- Premedical/Biomedical Engineering

You may also develop your own specialization in consultation with your adviser. The upper division requirements are listed following the areas of specialization.

**Areas of Specialization**

**Agricultural Engineering.** Students specializing in agricultural engineering integrate engineering analysis and design with applied biology to solve problems in production, transportation and processing of agricultural products. Agricultural engineers design machinery, processes, and systems for managing a productive plant and animal culture, including environment, nutrient, and waste. The recommended electives provide students with the fundamental principles of agricultural production and a broad background in engineering. Agricultural engineers are employed as practicing professionals and managers with large and small agricultural producers, equip-

ment manufacturers, food processors, consulting engineering firms, and government agencies.

Recommended biological science electives:

*Plant Emphasis*  
Plant Biology 111  
Soil Science 100

Select one course from Agricultural Systems and Environment 110A, Entomology 100, Plant Biology 174, Environmental Horticulture 102

*Animal Emphasis*

Neurobiology, Physiology and Behavior 101

Soil Science 100

Select one course from Avian Sciences 100, Animal Science 143, 144, 146

Recommended engineering electives:

Biological Systems Engineering 114, 132, 145  
Civil and Environmental Engineering 141, 141L  
Engineering 180

**Aquacultural Engineering.** Aquacultural engineers design, build, and manage equipment and systems for the production of aquatic plants and animals. Aquacultural engineers must have a solid understanding of biology, especially processes related to water quality, to be able to work with the wide variety of systems used for aquaculture production. Systems range from sophisticated indoor plants with water treatment and recirculation to low-input earthen ponds. The recommended electives include fish biology and production as well as water quality and treatment. Employment opportunities for aquacultural engineers include engineering consulting companies and government agencies. The aquaculture industry is expanding rapidly in various areas around the world, creating international employment opportunities for aquacultural engineers.

Recommended biological science electives:

Applied Biological Systems Technology 161  
Animal Science 118  
Wildlife, Fish and Conservation Biology 121

Recommended engineering electives:

Applied Biological Systems Technology 163  
Civil and Environmental Engineering 140, 140L, 141, 141L, 148A, 148B

**Biotechnical Engineering.** This specialization is for students interested in the developing biotechnology industries. Core engineering courses are combined with training in genetics, biochemistry, microbiology, and molecular biology. Modern laboratory techniques in biochemistry are also included in the specialization to provide hands-on skills. Biotechnology is an emerging area of industrial growth in the U.S. and will increasingly need engineers to transfer laboratory developments to large scale production. Present industrial activities include the production of genetically altered plants, plant materials and food products, production and packaging of biocontrol agents for plant pests and diseases; microbial production of biological products; tissue culture; and bioremediation.

Recommended biological science electives:

Biological Sciences 101, 102, 103  
Microbiology 102  
Molecular and Cellular Biology 120L

Recommended engineering electives:

Biological Systems Engineering 132, 175  
Chemical Engineering 161B, 161L  
Engineering 180

**Ecological Systems Engineering.** Specialists in ecological systems engineering are concerned with the design, development, and management of ecosystems. Typical applications include the rehabilitation of disturbed ecosystems, the design of mitigation areas, the incorporation of ecologically sustainable features into land developments, and the design and management of public and private landscapes. An understanding of ecology and the interaction of ecological communities, coupled with knowledge of engineering design and economics, are stressed in this specialization. Employment opportunities include environmental consulting firms, government regulatory agencies, and agencies involved in wildland resource management.

\*Course not offered this academic year.

Recommended biological science electives:

- Entomology 100
- Environmental Science and Policy 100
- Soil Science 100
- Select one course from Atmospheric Science 133, Plant Biology 121, Environmental Toxicology 101 or 112A

Recommended engineering electives:

- Applied Biological Systems Technology 180
- Biological Systems Engineering 115, 135, 145
- Civil and Environmental Engineering 148A or 149, 152
- Hydrologic Sciences 100

Recommended course:

- Landscape Architecture 40 (no technical elective credit will be granted for this course in any engineering major)

**Forest Engineering.** Forest engineers apply engineering principles to solve problems in managing forest lands. Forestry has evolved from an emphasis on wood production toward multiple use, ecosystem management and consideration of noneconomic objectives such as retaining biodiversity. Forest engineers help to develop the equipment and techniques to plan and carry out forest operations that can meet these changing requirements. Examples include reforestation, harvesting, forest residue management, and development of roads and recreation facilities.

Following the sophomore year, students are strongly encouraged to attend an eight-week field course sequence at the UC Forestry Camp near Quincy. This is followed by a semester at UC Berkeley, as an inter-campus visitor, taking suggested forestry courses. This sequence provides a strong background in forest ecology, planning, and operations. Students complete their engineering programs at UC Davis, taking courses in planning methods, equipment development, and road design. Forest engineers are employed by the US Forest Service and other public agencies, the forest industry, consulting firms, and equipment manufacturers.

Recommended biological science electives:

- ESPM 129\* 3 (Forest and Range Soils) or Soil Science 100
- ESPM 182\* 4.5 (Forest Harvest Systems)
- ESPM 185\* 6 (Silviculture)

Recommended engineering electives:

- Applied Biological Systems Technology 180
- Biological Systems Engineering 114, 115, 116
- Civil and Environmental Engineering 141, 141L, 145

Recommended Courses:

- ESPM 101\* 15 (Forestry Summer Program)
- ESPM 172\* 4.5 (Forest Photogrammetry and Photo Interpretation) or Geography 106
- ESPM 175\* 4 (Forest Influences)
- Plant Biology 120

\*ESPM courses are offered at UC Berkeley campus.

**Pre-Medical/Biomedical Engineering.** The pre-medical/biomedical specialization is for students planning to attend medical school after graduation or to work in the biomedical industries. Course work in biology, chemistry, organic chemistry, biochemistry, microbiology, and physiology satisfies typical entrance requirements for medical school. Early in their academic programs, pre-medical engineering students should consult with an adviser from the School of Medicine to plan for successful admission, including appropriate summer experience. Biomedical engineering is primarily a field of study at the graduate level, and may have a chemical, mechanical, or electrical emphasis. The core Biological Systems Engineering program—plus additional course work in fluid mechanics, rheology, and dynamics—provides a broad foundation for graduate specialization.

Recommended biological science electives—Biomedical:

- Biological Sciences 102
- Microbiology 102
- Neurobiology, Physiology and Behavior 101

Recommended biological science electives—Premedical:

- Biological Sciences 101, 102
- Microbiology 150, 150L

Recommended engineering electives:

- Biological Systems Engineering 175
- Engineering 102, 102L, 103B, 103L, 180

Recommended for medical school:

- Chemistry 2C, 118C

Upper Division Requirements

UNITS

Subject Areas and Courses

- Probabilistic systems analysis for civil engineers—Civil and Environmental Engineering 114 .....3
- Organic chemistry—Chemistry 8A or 118A...2-4
- Organic chemistry—Chemistry 8B or 118B (recommended for Aquacultural, Biotechnical, and Pre-Medical/Biomedical Engineering specializations) or Surveying—Civil and Environmental Engineering 10 (recommended for Agricultural, Ecological, and Forest Engineering specializations).....4 or 3
- Dynamics—Engineering 102.....4
- Electrical circuits and systems—Engineering 100 .....3
- Elementary fluid mechanics—Engineering 103A .....3
- Mechanics of materials—Engineering 104 (recommended for Agricultural, Pre-Medical/Biomedical, Ecological, and Forest Engineering specializations) or Chemical Engineering 161A (recommended for Aquacultural and Biotechnical Engineering specializations) .....3-4
- Thermodynamics—Engineering 105A .....3
- Engineering economics—Engineering 106...3
- Power sources and transmission—Biological Systems Engineering 120 or Unit Operations in Biological and Food Engineering—Biological Systems Engineering 132.....4
- Psychrometrics, heat and mass transfer—Biological Systems Engineering 125.....4
- Dynamic modeling of processes in biological systems—Biological Systems Engineering 130 .....4
- Bioinstrumentation and control—Biological Systems Engineering 165 .....4
- Engineering design and professional responsibilities—Biological Systems Engineering 170A .....3
- Engineering projects: Design—Biological Systems Engineering 170B .....2
- Engineering projects: Design Laboratory—Biological Systems Engineering 170BL ...1
- Engineering projects: Design Evaluation—Biological Systems Engineering 170C .....1
- Engineering projects: Design Evaluation Laboratory—Biological Systems Engineering 170CL.....2
- Engineering electives†—Select a minimum of 10 units (to bring the overall total to at least 180 units) from all upper division College of Engineering courses (exclusive of Applied Science Engineering 137, Engineering 160, and courses numbered 190–197); Applied Biological Systems Technology 163, 180; and Hydrologic Science 100. A maximum of 4 units of Biological Systems Engineering 199 may be offered in satisfaction of the Engineering electives requirement.....10
- Biological science electives†—Select a minimum of 9 units from all upper division courses in the Division of Biological Sciences (excluding courses numbered 190–199); Applied Biological Systems Technology 161, Animal Science 118, 143, 144, 146; Agricultural Systems and Environment 110A; Atmospheric Science 133; Avian Sciences 100; Entomology 100; Environmental Horticulture 102; ESPM 129,

- 182, 185 (ESPM courses are offered at UC Berkeley campus); Environmental Science and Policy 100; Environmental Toxicology 101, 112A; Plant Biology 174; Soil Science 100; Wildlife, Fish and Conservation Biology 121. Students may choose other upper division courses with substantial biological content offered in the College of Agricultural and Environmental Sciences; consultation with a faculty adviser and approval by petition is required .....9
- Humanities—Social Science electives and/or General Education electives .....16

**Total Upper Division Units.....87-91**

**Minimum Units Required for Major .....180-185**

†Refer to specialization descriptions for course recommendations.

Master Undergraduate Adviser: M. Delwiche.

Chemical Engineering

Chemical engineers apply the principles of chemistry and engineering to produce useful commodities, ranging from antibiotics to zirconium. Chemical engineers are increasingly concerned with chemical and engineering processes related to the environment, food and pharmaceutical production, and medicine, working in areas as diverse as integrated circuits and integrated waste management. Preparation for a career in chemical engineering requires an understanding of both engineering and chemical principles to develop proficiency in conceiving, designing, and operating new processes.

The Chemical Engineering curriculum has been planned to provide a sound knowledge of engineering and chemical sciences so that you may achieve competence in treating not only current technical problems but also those that will arise in the technologies of the future.

Chemical Engineering Curriculum

The Chemical Engineering curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc.

Lower Division Program

Requirements for majors in Chemical Engineering and the double majors, Chemical Engineering/Materials Science and Engineering and Chemical Engineering/Biochemical Engineering.

|                                                                                               | UNITS | QUARTER USUALLY TAKEN |
|-----------------------------------------------------------------------------------------------|-------|-----------------------|
| <b>Required Courses</b>                                                                       |       |                       |
| Calculus—Mathematics 21A-21B-21C-21D.....16                                                   |       | 1-2-3-4               |
| Linear algebra—Mathematics 22A...3                                                            |       | 5                     |
| Differential equations—Mathematics 22B .....3                                                 |       | 6                     |
| General physics—Physics 9A-9B-9C .....12                                                      |       | 3-4-5                 |
| General chemistry—Chemistry 2A, 2B, 2C (Chemistry 2AH, 2BH, 2CH strongly recommended) .....15 |       | 1-2-3                 |
| Organic chemistry—Chemistry 128A, 128B.....6                                                  |       | 4-5                   |
| Organic chemistry laboratory—Chemistry 129A.....2                                             |       | 4                     |
| Biological Sciences 1A.....5                                                                  |       | 6                     |
| (required only for Chemical/Biochemical majors)                                               |       |                       |
| Engineering—Applications of computers—Engineering 5 .....3                                    |       | 2 or 5                |
| Circuits—Engineering 17.....4                                                                 |       | 6                     |
| Statics—Engineering 35.....3                                                                  |       | 5                     |

## 220 Engineering

|                                                                                                                                                                                                |        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Properties of materials—Engineering 45 (required only for Materials Science and Chemical Engineering/Materials Science and Engineering majors).....0 or 4                                      | 6      |
| Expository writing—English 1 or 3, or Comparative Literature 1, 2, 3 or 4, or Native American Studies 5...4                                                                                    | 2 or 3 |
| Introduction to public speaking or group communication—Communication 1 or 3 (or an acceptable substitute as approved by the Undergraduate Study Committee of the College of Engineering).....4 | 2 or 3 |
| Humanities—Social Sciences electives and/or General Education electives .....                                                                                                                  | 16     |
| <b>Total Lower Division Units.....91-96</b>                                                                                                                                                    |        |

### Upper Division Program

In your junior year, you focus on basic engineering courses, particularly thermodynamics, fluid mechanics, and energy transfer. In your senior year, you draw these fundamentals together and apply them in a study of mass transfer phenomena, process design, and process dynamics and control. The program is strengthened and broadened with introductory courses in the electrical and mechanical sciences.

The curriculum includes 12 units of technical electives and 6 units of advanced chemistry electives that allow you to strengthen specific areas in chemical engineering, explore new areas, or pursue areas of specialization. The most popular areas of specialization, together with lists of **suggested** technical electives, are identified and discussed in the following paragraphs. Please talk to the instructors of the courses listed about possible prerequisites before enrolling.

The *premedical* and *prebiomedical engineering* areas of specialization have been specifically designed to prepare the student for graduate work in biomedical engineering or to meet the undergraduate requirements for entrance into medical school. Because of the emphasis on the natural sciences and the application of fluid mechanics, mass transport, heat transfer, thermodynamics, reaction kinetics, and process dynamics to problems in natural science, you are well prepared to understand problems in living systems. Many biological phenomena, such as blood flow, solute transport, and energy exchange, can be dealt with using the theoretical tools you learned as an undergraduate.

### Areas of Specialization

**Applied Chemistry.** The Chemical Engineering curriculum includes an important core of chemistry courses. You can take advantage of this background to build a strong program in chemistry by choosing electives from among advanced undergraduate chemistry courses.

Suggested technical electives:

Chemistry 110B, 111, 115, 121, 128C, 129B, 129C, 130, 131, 150  
Fiber and Polymer Science 100, 110

**Applied Mathematics.** The mathematics specialization strengthens your understanding of the foundations of engineering science and improves your ability to treat complex engineering problems. Courses in abstract algebra, advanced calculus, and the theory of differential equations provide a sound theoretical background, while courses in analytical and numerical analysis provide the techniques for solving a wide range of engineering problems.

Suggested technical electives:

Applied Science Engineering 115, 116  
Mathematics 118A, 118B, 118C, 119A, 119B, 121A, 121B, 128A, 128B, 128C, 131, 132A, 132B, 185A, 185B

**Biochemical Engineering.** This area of specialization prepares you to do graduate work in biochemical engineering and to find employment in the biotechnology, pharmaceutical, and food industries.

Suggested technical electives:

*Strongly recommended*

Microbiology 102, 102L  
Biological Sciences 1A, 102  
Chemical Engineering 161A, 161B, 161L

*Also recommended*

Biological Sciences 1B, 101, 103, 104  
Biological Systems Engineering 175  
Chemical Engineering 170  
Food Science and Technology 123, 123L  
Microbiology 140, 150, 155L, 160  
Molecular and Cellular Biology 120L, 123, 160L, 161, 170L  
Neurobiology, Physiology and Behavior 100B, 100L  
Plant Science 140  
Viticulture and Enology 140, 186

**Computers and Automation.** This specialization offers you the opportunity to master various computational techniques to formulate, solve, and analyze chemical engineering problems. In addition, you are exposed to the theory and practice of monitoring and operating chemical processes using microprocessor-based control systems. The common ingredient in these studies is the use of computers. Development of expert systems for detecting process failures, using computer-aided design (CAD) packages to optimize product yields, solving large numbers of equations on supercomputers to assess transient behavior of processes, and implementation of plantwide control systems are all examples of chemical engineering endeavors based on the extensive use of computers. The suggested elective courses help you obtain the necessary background in these areas.

Suggested technical electives:

Artificial Intelligence and Computer Graphics:

Computer Science Engineering 170, 175

Numerical Analysis and Optimization:

Applied Science Engineering 115, 116

Mathematics 128B-128C, 168

Civil and Environmental Engineering 153

Automatic Control:

Biological Systems Engineering 165

Electrical and Computer Engineering 150B, 157B, 174

Mechanical Engineering 176

Food Science and Technology 156

**Advanced Materials Processing.** Because the manufacture of semiconductor devices, integrated circuits, magnetic memories, tapes, disks, and other devices involves the application of chemical and engineering principles, chemical engineers are finding productive careers in the electronics industry. The electronics processing specialization introduces you to the analysis and design of modern circuits and devices and provides a strong background in the layout and fabrication of such devices.

Suggested technical electives:

Electrical and Computer Engineering 140A, 140B, 145A, 145B, 146A, 146B

Physics 140A, 140B

Materials Science and Engineering 138, 144, 146, 155

**Energy Conversion and Fuels Processing.** This area of specialization introduces you to energy sources, energy conversion methods, and the manufacture of fuels.

Suggested technical electives:

Biological Systems Engineering 120  
Engineering 111

Environmental and Resource Sciences 103

Environmental Science and Policy 167

Mechanical Engineering 161, 162

**Environmental Engineering.** Many activities of chemical engineers are motivated by environmental protection. This option prepares you to deal with environmental issues by developing knowledge of fundamental chemical and transport phenomena: chemical reaction processes coupled with fluid mechanics, heat transfer, and mass transfer. Such a foundation in basic chemical engineering science, plus the usual chemical engineering analysis and design courses and courses on environmental topics, prepares you to

seek employment with industry or government. For this specialization, select six courses from the following list:

Suggested technical electives:

**Air Environment**

*Strongly recommended*

Civil and Environmental Engineering 149

*Recommended*

Atmospheric Science 121A, 121B, 158

Civil and Environmental Engineering 150

Environmental Science and Policy 110

Environmental Toxicology 101, 112A, 112B, 131

**Water Environment**

*Strongly recommended*

Chemical Engineering 161A, 161B, 161L

Civil and Environmental Engineering 140, 140L, 148A, 148B

Microbiology 102

*Recommended*

Biological Sciences 102, 103

Civil and Environmental Engineering 147

Environmental Science and Policy 110, 150A, 151

Environmental Toxicology 101, 112A, 112B

Hydrologic Science 124

Soil Science 100, 102, 107

**Food Process Engineering.** This area of specialization prepares you to do graduate work in food science and technology and to work in the food processing industry.

Suggested technical electives:

*Strongly recommended*

Microbiology 102

Biological Sciences 102, 103, 104

Chemical Engineering 161A, 161B, 161L

Biological Systems Engineering 132

Food Science and Technology 100A, 104, 104L

*Recommended*

Food Science and Technology 150, 150L, 151

**Marketing.** Specialty chemical and product manufacturers need chemical engineers who have training in market management, which involves the application of economics, psychology, and statistics in market planning and forecasting and in strategically developing and promoting new products.

Suggested technical electives:

Management 250, 251

Agricultural and Resource Economics 113, 130, 136

Statistics 103

**Polymer Science.** Polymer materials and their applications are dependent on the use of chemical and engineering principles to process such materials to meet the end-use functional and environmental requirements. The polymer science specialization also prepares you for graduate work in the interdisciplinary field of polymer science and engineering.

Suggested technical electives:

Chemistry 108, 128C, 129B, 129C

Fiber and Polymer Science 100, 150

Chemical Engineering 150C

Materials Science and Engineering 147

**Prebiomedical Engineering.** This area of specialization prepares you for graduate work in biomedical engineering. Early planning of a complete course schedule in consultation with a Chemical Engineering adviser is important to schedule necessary Biological Sciences courses into your program.

Suggested technical electives:

Four to six courses from

Anatomy, Physiology and Cell Biology 100, Bio-

logical Sciences 1A, 1B, 1C, 101, 102, 103,

104, Molecular and Cellular Biology 140L, 141,

142, Neurobiology, Physiology and Behavior

101, 111A, 111B, 112, 113, 114

**Premedical.** Inclusion of both organic and physical chemistry in the curriculum allows you to complete the premedical requirements while satisfying the requirements of the Chemical Engineering major. If you elect the premedical (including preveterinary)

area of specialization, you should verify the specific preparation requirements with the Health Sciences Advising Office before making a final decision on your electives. To ensure that you have provided room in your program for the necessary biology courses, prepare a course schedule with a Chemical Engineering adviser early in your freshman year.

Suggested technical electives:

- Anatomy, Physiology and Cell Biology 100
- Chemistry 128C, 129B, 129C
- Six biology or biochemistry courses, such as
  - Biological Sciences 1A, 1B, 1C, 101, 102, 103, 104, Microbiology 102, Molecular and Cellular Biology 140L, 141, 142, 150, Neurobiology, Physiology and Behavior 101, 112, 113, 114

**Chemical Engineering  
Upper Division Requirements**

UNITS

**Subject Areas and Courses**

- Chemical engineering—Chemical Engineering 150A, 150B, 151, 152A, 152B, 153, 154A, 154B, 155A, 155B, 156A, 156B, 157, 157L, 158A, 158B, 158C, 159 .....61
- Chemistry—Chemistry 110A, 110C .....6
- Quantum mechanics—Physics 9D or Chemistry 110B .....4 or 3
- Advanced chemistry electives .....6
  - Select from upper division courses in Chemistry; Biological Sciences 101, 102, 103; Chemical Engineering 150C, 161A, 161B, 161L, 166, 170; Civil and Environmental Engineering 140, 140L; Materials Science Engineering 134, 144, 147; Environmental Toxicology 112A-112B; Food Science and Technology 100A-100B, 104, 119; Molecular and Cellular Biology 120L, 123, 126; Plant Biology 160; Fiber and Polymer Science 150.
- Technical electives .....12
- Humanities—Social Sciences/General Education electives .....8

**Total Upper Division Units.....96-97  
Minimum Units Required for Major .....187-188**

**Chemical Engineering/Materials Science and Engineering Upper Division Requirements**

UNITS

**Subject Areas and Courses**

- Chemical engineering—Chemical Engineering 150A, 150B, 151, 152A, 152B, 153, 154A, 154B, 155A, 155B, 156A, 156B, 157, 157L, 158A, 158B, 158C, 159 .....61
- Chemistry—Chemistry 110A, 110C .....6
- Quantum mechanics—Physics 9D or Chemistry 110B .....4 or 3
- Materials science—Materials Science and Engineering 130, 132, 134, 138, and two courses chosen from Materials Science and Engineering 140, 142, 144, 146, 147, 148, 149, 155, and two laboratory courses chosen from Materials Science and Engineering 132L, 134L, and 138L.....22
- Humanities—Social Sciences and/or General Education electives .....8

**Total Upper Division Units.....100-101  
Minimum Units Required for Major .....195-196**

**Chemical Engineering/Biochemical Engineering Upper Division Requirements**

UNITS

**Subject Areas and Courses**

- Chemical engineering—Chemical Engineering 150A, 150B, 151, 152A, 152B, 153, 154A, 155A, 156A, 157, 157L, 158A, 158C, 159, 161C .....51
- Biochemical engineering—Biological Sciences 102, Microbiology 102, Chemical Engineering 161A, 161B, 161L .....17
- Chemistry—Chemistry 110A, 110C .....6

Biochemical Engineering electives .....10  
Choose two laboratory courses from the laboratory electives list and choose additional courses from the lecture elective list to provided at least 10 units total.

*Laboratory elective list:*

Food Science and Technology 123L, Microbiology 102L, 177L, Molecular and Cellular Biology 120L (this course counts as two laboratory courses and completely satisfies the laboratory requirement), 160L, Neurobiology, Physiology and Behavior 104L, Plant Biology 153, 161A, 161B, 192/199 (Students may replace one laboratory course with a laboratory internship (192) or independent study (199) with approval of the chairperson).

*Lecture elective list:*

Biological Sciences 1B, 101, 103, 104, Biological Systems Engineering 175, Chemical Engineering 170, Food Science and Technology 123, Microbiology 140, 150, 177, Molecular and Cellular Biology 123, Neurobiology, Physiology and Behavior 103, Plant Biology 111, 112, 152, Viticulture and Enology 140, 186.

Humanities—Social Sciences electives and/or General Education electives .....8

**Total Upper Division Units .....92  
Minimum Units Required for Major.....188**

**Civil and Environmental Engineering**

(Civil and Environmental Engineering)

Civil and environmental engineering is devoted to the improvement of the human environment to make our activities productive, safe, and enjoyable, and our surroundings aesthetically pleasing. The profession contributes directly to humanity's continued health and well-being by the planning and design of systems that provide plentiful supplies of potable water; management and control of waste streams; land-water-air transportation; housing and other structures; flood control; and large recreational facilities.

**Civil Engineering Curriculum**

*The Civil Engineering curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc.*

**Lower Division Program**

*Requirements for Civil Engineering and the double major, Civil Engineering/Materials Science and Engineering.*

|       | QUARTER<br>USUALLY<br>TAKEN |
|-------|-----------------------------|
| UNITS |                             |

**Required Courses**

- Calculus—Mathematics 21A-21B-21C-21D .....16 1-2-3-4
- Linear algebra—Mathematics 22A...3 5
- Differential equations—Mathematics 22B .....3 6
- General physics—Physics 9A-9B-9C-9D .....16 3-4-5-6  
(Students majoring in Civil Engineering or Civil Engineering/Materials Science and Engineering are required to complete 12 units of physics including Physics 9A, 9B and 9C. In addition, either Physics 9D, Chemistry 2C or 2CH, Biological Science 1A or Geology 50-50L is required.)
- General chemistry—Chemistry 2A-2B or 2AH-2BH .....10 2-3 or 4-5
- Introduction to Civil and Environmental Engineering systems—Civil and Environmental Engineering 3 .....3 1 or 2  
(Civil and Environmental Engineering 3 is designed for freshman students. More

- advanced students may petition to substitute 3 units of technical electives for Civil and Environmental Engineering 3.)
  - Engineering graphics in design—Engineering 4 .....3 1 or 2
  - Applications of computers—Engineering 5 .....3 4
  - Introduction to Surveying—Civil and Environmental Engineering 10 ...3 3 or 6
  - Circuits—Engineering 17 .....4 6
  - Statics—Engineering 35 .....3 5
  - Properties of materials—Engineering 45 .....4 5
  - Expository writing—English 1 or 3, or Comparative Literature 1, 2, 3 or 4, or Native American Studies 5.....4 1 or 2
  - Introduction to public speaking or group communication—Communication 1 or 3 (or an acceptable substitute as approved by the Undergraduate Study Committee of the College of Engineering) .....4 6
  - Humanities—Social Sciences electives and/or General Education electives .....12
- Total Lower Division Units.....91**

**Upper Division Program**

Areas of specialization within civil and environmental engineering include (1) Civil Engineering Planning; (2) Environmental Engineering; (3) Structural Engineering, Structural Mechanics, and Geotechnical Engineering; (4) Transportation Planning and Engineering; and (5) Water Resources Engineering. You may specialize in one or more of these areas by selecting appropriate technical electives. Such specialization is not required. You are urged to consult an adviser when developing your individual program.

Because of the direct concern of professional civil engineers for the quality of human life, you are encouraged to consider among your technical electives, courses such as Economics 125, Environmental Science and Policy 160 and 166; Political Science 108. Additional information concerning the areas of specialization and suggested courses are given in the following paragraphs.

**Areas of Specialization**

**Civil Engineering Planning.** This specialization focuses on the planning of resources utilization and development of projects on an urban or regional scale. Civil engineering planning requires an understanding of the basic principles of engineering, economics, law, planning concepts and techniques, environmental sciences, public administration, and politics. You are encouraged to plan your program early with the aid of a faculty adviser and to complement the suggested technical electives with course work in the humanities and social sciences.

- Suggested technical electives:
- Agricultural and Resource Economics 147, 148, 175, 176
  - Civil and Environmental Engineering 137, 146, 147, 153, 155, 160, 161, 162
  - Economics 100, 125, 130, 131
  - Engineering 160 (only one unit of credit towards Technical Elective requirement), Environmental Science and Policy 160, 161, 166, 167, 168A, 168B, 171, 173, 179
  - Geography 155, 162
  - Geology 134
  - Hydrologic Science 150, 186
  - Political Science 100, 101, 102, 107, 108
- Suggested advisers: J.R. Lund, P. Mokhtarian, D. Sperling.

**Environmental Engineering.** Specialists in this area are concerned with improving and maintaining the qualities of the air, land, and water environments that affect our health and well-being in the face of increasing population and expanding industrial activity. The program is firmly based on fundamental science and civil engineering and emphasizes the design of water-

borne, solid, and airborne waste management systems; the design of potable water-supply systems; and environmental monitoring.

Suggested technical electives:

- Applied Science Engineering 116
- Atmospheric Science 120, 121A, 121B, 158
- Biological Sciences 102, 103
- Chemical Engineering 154A, 154B, 156A, 156B, 161A, 161B, 170
- Chemistry 107A, 107B, 110A, 128A, 128B
- Civil and Environmental Engineering 140, 140L, 142, 143, 144, 145, 146, 147, 148B, 149, 150
- Engineering 180
- Environmental Science and Policy 150A, 150B, 150C, 151, 166
- Mathematics 128A, 128B, 128C
- Mechanical Engineering 161
- Microbiology 102, 105, 130A
- Soil Science 111
- Statistics 130A, 130B

Suggested advisers: D.P.Y. Chang, J. Darby, T. Ginn, S.G. Schladow, E.D. Schroeder, G. Tchobanoglous, T.M. Young.

**Structural Engineering, Structural Mechanics, and Geotechnical Engineering.** This area is concerned with the conception, design, analysis, economics, and construction of structures such as buildings, bridges, highways, and dams. Structural Engineering encompasses structures made from metals, reinforced concrete, or timber. Geotechnical Engineering encompasses natural and man-made structures, such as foundations or slopes that are composed of rock or soil. Structural mechanics emphasizes more theoretical aspects of structures, such as mathematical analysis and characterization of material properties.

Suggested technical electives:

- Aeronautical Science and Engineering 133, 135, 137
- Civil and Environmental Engineering 130, 131, 132, 134, 136, 137, 138, 173, 174, 176
- Engineering 122, 180
- Materials Science and Engineering 138
- Mathematics 128A, 128B, 128C

Suggested advisers: K. Arulanandan, J. Bolander, R. Boulanger, R. Chai, Y.F. Dafalias, L.R. Herrmann, I.M. Idriss, B. Kutter, G.H. Paulino, M.R. Ramey, M.M. Rashid, K.M. Romstad.

**Transportation Planning and Engineering.** Specialists in this area are concerned with the development, coordination, and management of transportation systems for the movement of people and goods in a manner compatible with societal demands. Transportation planning blends knowledge of the basic concepts of engineering, economics, and planning in the development of policies, programs, and projects. Transportation systems engineering blends knowledge of many engineering disciplines in the design, construction, operation, and maintenance of transportation facilities in the form of an integral system. Students should also acquire an awareness of the social sciences and environmental sciences through course work in these areas.

Suggested technical electives:

- Civil and Environmental Engineering 137, 149, 153, 160, 161, 162
- Engineering 160 (only one unit of credit towards Technical Electives requirement)
- Environmental Science and Policy 167, 168A, 168B, 171, 173, 178, 179

Suggested advisers: P. Mokhtarian, D. Niemeier, D. Sperling.

**Water Resources Engineering.** This area includes hydrology, hydraulics, and water resources systems planning and design. Hydraulics is the study of flow in pipe and open-channel water-distribution systems and through hydraulic structures. Water resources system planning and design is concerned with the comprehensive development of water resources for multiple use. This specialization emphasizes principles of planning, analysis, and engineering design and operation as related to the water needs of industry, agriculture, recreation, and other activities.

Suggested technical electives:

- Agricultural and Resource Economics 148, 176
  - Atmospheric Science 120, 121A, 121B
  - Civil and Environmental Engineering 142, 144, 145, 146, 148B, 153, 155
  - Electrical and Computer Engineering 150A, 150B
  - Environmental Science and Policy 128, 150A, 151
  - Geography 162
  - Hydrologic Science 110, 150
- Suggested advisers: T. Ginn, M.L. Kavvas, I.P. King, B.E. Larock, J.R. Lund, M.A. Mariño, S.G. Schladow.

| Civil engineering design—Civil and Environmental Engineering 135; one course from Civil and Environmental Engineering 134, 136, 145, 148B, 162, or 173; and two additional courses chosen from Civil and Envi- | 13    |

ronmental Engineering 132, 134, 136, 145, 147, 148B, 150, 155, 162, or 173.....

Economics—Engineering 106.....3

Engineering mathematical analysis—Applied Science Engineering 115, Civil and Environmental Engineering 114, and one course from Applied Science Engineering 116, Civil and Environmental Engineering 153, Mathematics 118A, 121A, Statistics 108...9

Materials science—Materials Science and Engineering 132, 134, 138, and two courses from Materials Science and Engineering 140, 142, 144, 147 148, 149, 155; and two laboratory courses chosen from Materials Science and Engineering 132L, 134L, 138L.....19

Humanities—Social Sciences electives and/or General Education electives.....12

(Civil and Environmental Engineering 137 recommended.)

**Total Upper Division Units.....93**  
**Minimum Units Required for Major.....184**

†Civil Engineering 10 is a required prerequisite to Civil Engineering 171.

**Computer Science and Engineering**

(Computer Science and Engineering)

The Department of Computer Science administers two curricula: Computer Science and Engineering in the College of Engineering, and Computer Science in the College of Letters and Science. It also administers a minor in the College of Letters and Science. For information on the Computer Science curriculum and minor, see "Computer Science" in this catalog.

The field of Computer Science and Engineering encompasses the organization, design, analysis, theory, programming, and application of digital computers and computing systems. It develops versatile engineers with backgrounds spanning a broad computer hardware/software spectrum.

The Computer Science and Engineering major provides students with a solid background in mathematics, physics, chemistry, and electronic circuits and systems, all supporting the computer hardware and computer software courses which form the focus of the curriculum.

An integrated B.S./M.S. plan in Computer Science allows Davis students in Computer Science, Computer Science Engineering, or Computer Engineering to complete a master's degree in Computer Science in one year. Formal course work for the master's degree is reduced by 6 units for students. Students can begin graduate studies immediately after completing their B.S. degree. More information is available in the graduate section of the *College of Engineering Bulletin*, or on the Internet at <www.cs.ucdavis.edu/instruction/announcements.html#master>.

**Computer Science and Engineering Curriculum**

*The Computer Science and Engineering curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology and the Computer Science Accreditation Commission of the Computing Science Accreditation Board.*

**Upper Division Program**

A key theme of this curriculum is the hardware/software interaction in today's computer systems design, a theme reflected in the balance between computer hardware and computer software aspects in the course requirements. The key theme of hardware/software interaction is also reflected in the orientation of the courses themselves. The Computer Science and Engineering major also requires additional humanities and social science electives, helping to develop the verbal skills and intellectual breadth demanded by today's employers.

The Computer Science and Engineering program prepares students to do further work in hardware, software, or electronics, either in industry or post-graduate study.

| Unrestricted elective.....1                                   |  |
| <b>Total Upper Division Units.....90</b>                      |  |
| <b>Minimum Units Required for Major.....180</b>               |  |

† Completion of both Computer Science Engineering 120 and 122A will satisfy the computer science theory requirement and a computer elective requirement.

‡ Completion of both Computer Science Engineering 150 and 151A will satisfy a portion of the computer software operative system requirement and a computer elective requirement.

**Electrical and Computer Engineering**

(Electrical and Computer Engineering)

The Department of Electrical and Computer Engineering administers three curricula in the College of Engineering: (1) the Electrical Engineering curriculum, (2) the Computer Engineering curriculum, and (3) the Electrical Engineering/Materials Science curriculum.

The Integrated Degree Program (IDP) leads to both the bachelor's and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical and Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in the Electrical Engineering, Computer Engineering, or Electrical Engineering/Materials Science curricula. Applicants in their junior year must apply for IDP by March 31. Further information on IDP is listed in the *College of Engineering Bulletin*.

*The Electrical Engineering, Computer Engineering, and Electrical Engineering/Materials Science and Engineering curricula are all accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.*

**Electrical Engineering Curriculum**

Electrical Engineering involves the design, analysis, and effective use of electrical systems including electronic computers. Electrical systems and computers play a central role in nearly all aspects of modern life, including communication, medicine, education, environmental protection, space exploration, defense, and home entertainment.

Students who complete the Electrical Engineering curriculum will obtain a Bachelor of Science in Electrical Engineering, one of the engineering degrees recognized in all fifty states as eligible for registration as a Professional Engineer.

**Lower Division Program**

*Requirements for Electrical Engineering and Electrical Engineering/Materials Science and Engineering majors.*

**Upper Division Programs**

Upper division requirements for the degrees in Electrical Engineering, Computer Engineering, and Electrical Engineering/Materials Science are described below.

**Electrical Engineering Curriculum**

The Electrical Engineering curriculum prepares students for careers in electrical engineering or for graduate studies by providing a solid background in mathematics, physical sciences, and traditional electrical engineering subjects of (1) physical electronics, (2) electromagnetics, (3) analog electronics, (4) digital electronics, and (5) signal processing and communication. Through the proper choice of 29 units of flexible design, technical, and unrestricted electives, you may focus on any of these four specialty areas or distribute the 29 units of electives among these areas.

**Areas of Specialization**

**Physical Electronics** includes the areas of solid-state circuits and fabrication, and the theory courses supporting those subjects.

Recommended elective courses:

Core electives: Electrical and Computer Engineering 130B, 140B

Design electives: Electrical and Computer Engineering 110B, 118, 135, 146A, 146B, 218A

Technical electives: Electrical and Computer Engineering 112, 114, 145A, 145B, 148, 150B, 240

Suggested advisers: R.W. Bower, J.P. Collinge, C.E. Hunt, R.L. Smith.

**Electromagnetics** involves microwave circuits and fiber optical systems.

Recommended elective courses:

Core electives: Electrical and Computer Engineering 130B, 140B

Design electives: Electrical and Computer Engineering 110B, 132A, 132B, 132C, 135

Technical electives: Electrical and Computer Engineering 112, 131A, 131B, 131C, 145A, 145B, 148, 150B, 195A-195B-195C

Suggested advisers: G.R. Branner, A.J. Dienes, J.P. Heritage, O. Solgaard.

**Analog electronics** involves the transistor-level analog circuit design, including electronic amplifiers, analog-to-digital converters, communication circuits, and filters.

Recommended elective courses:

Core electives: Electrical and Computer Engineering 140B, 150B

Design electives: Electrical and Computer Engineering 110B, 112, 114, 118, 160 or 195A-195B-195C, 210

Technical electives: Electrical and Computer Engineering 130B and 146A, or 157A or 194A-194B-194C or 146B or 218A

## 224 Engineering

Suggested advisers: K.W. Current, P.J. Hurst, S.H. Lewis, R.R. Spencer.

**Digital electronics** involves transistor-level design of digital circuits, including logic gates, RAM and ROM, and programmable logic arrays.

Recommended elective courses:

Core electives: Electrical and Computer Engineering 140B, 150B

Design electives: Electrical and Computer Engineering 110B, 114 or 194A-194B-194C or 195A-195B-195C; 118, 170, 180B, 218A

Technical electives: Electrical and Computer Engineering 130B and 146A, or 112 or 146B or 157A or 160 or 210

### Signal Processing and Communications

Recommended elective courses:

Core electives: Electrical and Computer Engineering 130B, 150B

Design electives: Electrical and Computer Engineering 106, 110B, 157A or 160; 157B or 112; 174, 180B

Technical electives: Electrical and Computer Engineering 114, 135, 140B, 166, 167, 172, 194A-194B-194C, 195A-195B-195C

Suggested advisers: K.A. Abdel-Ghaffar, T.S. Chang, K. Feher, G.E. Ford, B. Friedlander, W.A. Gardner, A.N. Gündes, T.C. Hsia, T.R. Reed, M.A. Soderstrand, S. Wang.

### Electrical Engineering Upper Division Requirements

UNITS

#### Required Courses

Electrical engineering core—Electrical and Computer Engineering 100, 110A, 130A, 140A, 150A, 180A, plus two courses from 110B†, 130B, 140B, 150B.....34

Probability theory—Statistics 120, 131A, or Mathematics 131.....4

Professional responsibilities—Engineering 160, 190 or Applied Science Engineering 137 or Computer Science Engineering 188.....3

Design electives.....18

Select six courses, at least two with laboratories, from:

Electrical and Computer Engineering 106, 110B†, 112, 114, 118, 132A, 132B, 132C, 135, 146A, 146B, 157A, 157B, 160, 166, 170,‡ 172, 174, 180B, 194A-194B-194C (must be taken together to count as one design elective), 195A-195B-195C (must be taken together to count as one design elective);  
Computer Science Engineering 110, 122B, 140A, 140B, 142, 150, 151A, 151B, 153, 158, 160, 163, 165A, 165B, 168, 175, 177.

May also include approved Electrical and Computer Engineering or Computer Science Engineering 192 or 199 courses.

Technical electives—Select courses from the College of Engineering Technical Electives list, plus Engineering 35 and 45, with at least 4 units from courses in Electrical and Computer Engineering.....11

Humanities—Social Sciences/General Education electives.....12

Unrestricted electives.....8

**Total Upper Division Units.....90**

**Minimum Units Required for Major.....180**

† Electrical and Computer Engineering 110B may not be counted toward both the Electrical Engineering Core requirement and the Electrical Engineering Design Electives.

‡ Electrical Engineering students may substitute Computer Science Engineering 154B for Electrical and Computer Engineering 170.

### Computer Engineering Curriculum

The program in Computer Engineering provides the student with a broad and well-integrated background in the concepts and methodologies that are needed for the analysis, design, development, organization, theory, programming, and applications of information processing systems. Although such systems are popularly called "computers," they involve a far wider range of disciplines than merely computation, and the Computer Engineering curriculum is correspondingly broad. The program presents the essential material in electronic circuits, digital logic, discrete mathematics, computer programming, data structures, and other topics. Students who complete the Computer Engineering curriculum receive a Bachelor of Science in Computer Engineering.

### Lower Division Program

|                                                                                                                                                                                                                  | QUARTER<br>USUALLY<br>UNITS | TAKEN   |

### Upper Division Program

The Computer Engineering curriculum prepares students for careers in computer engineering or for graduate studies by providing a solid background in mathematics, physical sciences, and the traditional computer engineering subjects: electronics, computer hardware, and computer software. Here electronics refers to the five Electrical Engineering specialty areas: (1) physical electronics, (2) electromagnetics, (3) analog electronics, (4) digital electronics, and (5) signal processing and communication. The 63 upper division units in electronics, computer hardware and computer software consist of 13 units in electronics courses, 18 units in computer hardware courses, and 12 units in computer software courses. The remaining 20 units consist of 9 units of design electives and 11 units of technical electives. By carefully selecting these 20 design and technical electives, students can focus on electronics, computer hardware, or computer software, or can distribute these units among the three areas.

### Areas of Specialization

**Computer Systems and Software** involves computer architecture, computer design, computer interfacing, and computer software.

Recommended elective courses:

Design electives: Computer Science and Engineering 140A, 142, 160

Technical electives: Electrical and Computer Engineering 106, 150B, 174, 194A-194B-194C, 195A-195B-195C, Computer Science and Engineering 122B, 140B, 152A, 152B, 153, 158, 163, 165A, 165B, 168, 175, 177

Suggested advisers: V. Akella, S. Bakshi, V.G. Oklobdzija, G.R. Redinbo, M.A. Soderstrand, K.D. Wilken.

**Logic Design** involves the design of computer circuits at various levels, including the use of CAD systems, VHDL, and the design and fabrication of transistor-level digital circuits.

Recommended elective courses:

Design electives: Electrical and Computer Engineering 110B, 112, 118

Technical electives: Electrical and Computer Engineering 140A, 174, 194A-194B-194C, 195A-195B-195C, 218A

Suggested advisers: V. Akella, S. Bakshi, V.G. Oklobdzija, G.R. Redinbo, M.A. Soderstrand, K.D. Wilken.

### Computer Engineering Upper Division Requirements

UNITS

#### Required Courses

Electrical engineering core—Electrical and Computer Engineering 100, 110A, 140A, 180A, 180B.....23

Computer hardware—Electrical and Computer Engineering 170\*, 172.....8

Computer software—Computer Science Engineering 150 or 151A.....4

Data structures and algorithms—Computer Science Engineering 110, 122A.....8

Probability theory—Statistics 120, 131A, or Mathematics 131.....4

Professional responsibilities—Engineering 160, 190, Applied Science Engineering 137, or Computer Science Engineering 188.....3

Design electives.....9

Select three courses from:

Electrical and Computer Engineering 106, 110B, 112, 114, 118, 132A, 132B, 132C, 135, 146A, 146B, 157A, 157B, 160, 166, 174, 194A-194B-194C (taken together may count as one design elective), 195A-195B-195C (must be taken together to count as one design elective);  
Computer Science Engineering 122B, 140A, 140B, 142, 151B, 153, 158, 160, 163, 165A, 165B, 168, 175, 177.

May also include approved Electrical and Computer Engineering or Computer Science Engineering 192 or 199 courses.

Technical electives—select courses from the College of Engineering Technical Electives list, plus Engineering 35 and 45, with at least 4 units from courses in Electrical and Computer Engineering.....11

Humanities/Social Sciences/General Education electives.....12

Unrestricted electives.....8

**Total Upper Division Units.....90**

**Minimum Units Required for Major.....180**

\* Computer Science Engineering 154B may be substituted for the Electrical and Computer Engineering 170 requirement.

**Electrical Engineering/Materials Science and Engineering Curriculum**

The Electrical Engineering/Materials Science curriculum is a combined major, including portions of the Electrical Engineering curriculum in the Department of Electrical and Computer Engineering and the Materials Science curriculum in the Department of Chemical Engineering and Materials Science. In the past decade, the fields of solid-state electronics, optoelectronics, magnetics, and superconductors have developed to the point that demand for new materials now sets the pace for progress in these fields. Materials scientists with an electronics background are key to continued progress in these areas. The Electrical Engineering/Materials Science curriculum provides students with the background necessary to pursue careers in electrical engineering or materials science or to go on to graduate study. Students who complete the Electrical Engineering/Materials Science curriculum will receive a Bachelor of Science in Electrical Engineering/Materials Science.

**Minimum Units Required for Major.....188**

**Food Engineering**

(Biological and Agricultural Engineering)

There is a strong demand for food engineering graduates in the food industry, which is the largest industrial sector of the U.S. and California economies. Food engineers help develop new food products and conceive, design and operate food processes, equipment and plants for effective production of foods with minimal impact on the environment. Food engineers may work for food companies in process research and development, equipment and facilities design, or management of production operations. Research and regulatory positions are also available with state and federal agencies. Summer internships are usually available, and students are encouraged to make use of these opportunities.

Food engineering involves the application of engineering principles and concepts to the handling, storage, processing, packaging, and distribution of food and related products. In addition to engineering principles, the food engineering degree provides an understanding of the chemical, biochemical, microbiological, and physical characteristics of foods. Concepts of food refrigeration, freezing, extrusion, drying, packaging, handling, and other food operations are studied.

The food engineering curriculum provides a strong foundation in mathematical, physical, biological, and food sciences, with courses from the biological and food sciences, and from biological systems, chemical, and mechanical engineering. These courses introduce students to methods that account for material and energy uses; methods for analyzing and designing processes, equipment and operations (e.g. fluid flow and heat transfer); and methods for predicting, monitoring and controlling performance of operations in a manner most relevant to food and food systems.

Food engineers are key contributors in optimizing food quality and safety, and in maintaining high nutritional standards. In the development of food products like low-fat foods, food engineers design the processes and equipment to manufacture the new food and assist in the food formulation.

**Total Upper Division Units .....**91

**Minimum Units Required for Major .....**180-181

**Master Undergraduate Adviser:** T. Rumsey.

### Materials Science and Engineering

(Chemical and Materials Science Engineering)

Materials science and engineering is directed toward an understanding of the structure, properties, and behavior of materials. Society demands new and improved materials with capabilities far superior to common metals, alloys, and ceramics. New materials are needed for high-speed transportation systems, surgical and dental implants, new generations of power plants, and solid-state electronic devices in computer and communication technology.

Both the development of new materials and the understanding of present-day materials demand a thorough knowledge of basic engineering and scientific principles including crystal structure, elastic and plastic behavior, thermodynamics, phase equilibria and reaction rates, and physical and chemical behavior of engineering materials.

Materials engineers study phenomena found in many different engineering operations, from fracture behavior in automobiles to fatigue behavior in aircraft frames; from corrosion behavior in petro-chemical refineries to radiation-induced damage in nuclear power plants; and from fabrication of steel to design of semiconductors. Materials engineers are also increasingly involved in developing the new materials needed to attain higher efficiencies in existing and proposed energy conversion schemes, and will play a central role in the development of new technologies based on composites and high temperature superconductivity.

The undergraduate program in Materials Science and Engineering provides the background for activities in research, processing, and the design of materials. A common core of courses basic to engineering are taken during your first two years and provide a strong foundation in fundamental engineering concepts.

#### Materials Science Curriculum

*The Materials Science and Engineering curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc.*

#### Lower Division Program

#### Upper Division Program

In your third year, you will take "fundamentals" courses (Materials Science and Engineering 130, 132, 134, 138). With this background, you are then ready for the "applications" courses (Materials Science and Engineering 140, 142, 144, 146, 147, 148, 149, 155) during the fourth year.

Technical electives, selected from other engineering or physical and natural science disciplines, give you some degree of specialization at the bachelor's degree level. They also provide preparation for research in a selected area at the graduate level. You may select 12 technical elective units to complete the undergraduate Materials Science and Engineering program. By selecting the appropriate technical electives and Humanities and Social Science/General Education electives, you may orient the program to suit your interests and career objectives: production and development, applied research, basic research, teaching, and/or management.

Upper division courses in engineering, chemistry, physics, mathematics, and biological sciences are generally acceptable as technical electives in Materials Science and Engineering.

The following list of suggested areas of specialization is given to assist you and your adviser in the preparation of study lists.

Suggested technical electives:

#### Aerospace Structures:

Aeronautical Science and Engineering 130, 133, 135, 137, 139

#### Automatic Control and Systems Analysis:

Mechanical Engineering 171, 172, 185, 187, 188  
Electrical and Computer Engineering 157A, 157B, 174

#### Biomedical Engineering:

Chemistry 107A, 107B  
Biological Sciences 1A, 1B  
Neurobiology, Physiology and Behavior 111L, 112, 113  
Exercise Science 101, 102

#### Chemical Corrosion:

Chemistry 110A, 110B, 110C or 107A, 107B  
Chemical Engineering 151, 152A, 152B

#### Computers:

Applied Science Engineering 115  
Computer Science Engineering 110, 122A, 122B, 142, 151A, 151B  
Electrical and Computer Engineering 170, 172, 180A, 180B  
Mathematics 128A, 128B, 168  
Statistics 130A, 130B

#### Electronic Materials:

Electrical and Computer Engineering 140A, 140B, 145A, 145B, 146A, 146B, 148  
Materials Science and Engineering 146  
Physics 121, 140A, 140B

#### Environmental Engineering:

Engineering 160 (only one unit of credit towards Technical Elective requirement)  
Atmospheric Science 120  
Biological Sciences 102, 103  
Hydrologic Science 21  
Chemistry 8A, 8B  
Civil and Environmental Engineering 149

#### Heat Transfer:

Engineering 105B  
Mechanical Engineering 165  
Chemical Engineering 150A, 153

#### Materials Design and Processing:

Aeronautical Science and Engineering 137  
Engineering 106  
Materials Science and Engineering 146, 148, 155  
Mechanical Engineering 50, 150, 150A, 150B, 151, 152, 185A, 185B  
Civil and Environmental Engineering 135

#### Physics of Solids:

Physics 115A, 115B, 140A, 140B  
Electrical and Computer Engineering 145A, 145B, 148

Suggested advisers: J.C. Gibeling, J.R. Groza, D.G. Howitt, A.K. Mukherjee, Z.A. Munir, A. Navrotsky, S.H. Risbud, J. F. Shackelford.

## Mechanical Engineering

(Mechanical and Aeronautical Engineering)

The mechanical engineer uses basic science in the design and manufacture of complex engineering systems requiring the application of physical and mechanical principles to the development of machines, energy conversion systems, materials, and equipment for guidance and control.

Work in this broad field of engineering requires a thorough knowledge of mathematics, physics, chemistry, fluid mechanics, thermodynamics, heat transfer, mass transfer, electricity, manufacturing processes, and economics.

### Mechanical Engineering Curriculum

The Mechanical Engineering curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

#### Lower Division Program

Requirements for Mechanical Engineering and the double major Mechanical Engineering/Materials Science.

#### Upper Division Programs

You spend your third year in further study of fundamental courses, and in the fourth year you may tailor your studies to your own interests by selecting courses in controls and systems analysis, fluid mechanics, heat transfer, mechanical design or thermodynamics. You can either prepare for graduate study in Mechanical Engineering or obtain a broad background for entering engineering practice at the bachelor's level.

You are encouraged to select elective courses from among the areas of specialization listed below.

### Areas of Specialization

**Mechanical Design.** The creation and improvement of products, processes, or systems that are mechanical in nature are the primary activities of a professional mechanical engineer. The development of a product from concept generation to detailed design, manufacturing process selection and planning, quality control and assurance, and life cycle considerations are areas of study and specialization in the area of mechanical design.

Solutions to such major social problems as environmental pollution, lack of mass transportation and raw materials, and energy shortages, will depend heavily on the engineer's ability to create new types of machinery and mechanical systems.

The engineer-designer must have a solid and relatively broad background in the basic physical and engineering sciences and have the ability to solve a variety of problems. In addition to having technical competence, the designer must be able to consider the socioeconomic consequences of a design and its possible impact on the environment. Product safety, reliability, and economics are other considerations.

Suggested technical electives:

Aeronautical Science and Engineering 130, 133,  
137, 139

Biological Systems Engineering 165

Applied Science Engineering 115

Engineering 111, 122, 160 (only one unit of credit  
towards Technical Electives requirement)

Materials Science and Engineering 140, 142, 155

Mechanical Engineering 134, 150B, 151, 152, 161,  
162, 172, 184A with 184B (both courses must  
be taken), 185A with 185B (both courses must  
be taken), 187, 188

Suggested advisers: A. Barakat, H.H. Cheng, A.A.  
Frank, M.L. Hull, B. Ravani, S. Velinsky, K. Yamazaki.

**Biomedical and Engineering Fluid Mechanics.** This field of study is based on the fundamentals of fluid mechanics and their broad range of applications in the biomedical and engineering areas. Areas of current research include blood circulation and its potential role in the regulation of normal physiological function and in the development of disease; groundwater and atmospheric flows and their implications for pollutant transport and environmental concerns; aerodynamic flow around transportation vehicles and its impact on vehicle performance; and flow in combustion engines and other energy systems with considerations of efficiency and environmental impact. These areas are investigated both experimentally and computationally.

Suggested technical electives:

Aeronautical Science and Engineering 138

Engineering 160 (only one unit of credit towards  
technical requirements); Engineering 180

Chemical Engineering 161A, 161B

Civil and Environmental Engineering 144, 149

Mechanical Engineering 161, 162, 163, 186

Suggested advisers: R.C. Aldredge, A.I. Barakat,  
J.W. Baughn, J.-J. Chattot, H.A. Dwyer, M.M. Hafez,  
I.M. Kennedy, W. Kollmann, L.W. Rehfield, B.D. Shaw,  
C. van Dam, B.R. White.

**Combustion and the Environment.** Combustion is widely used for energy generation, propulsion, heating, and waste disposal, as well as for many other applications. Mechanical engineers are often heavily involved with the design of combustion systems (internal combustion engines, gas turbines, furnaces, etc.) and deal with aspects of combustion ranging from increasing efficiencies to reducing pollutant emissions. This specialization is for those who would like to work in fields that use combustion, or that deal with pollution related to combustion. With the current increased emphasis on reducing pollutants while maintaining or increasing efficiency, the efforts of mechanical engineers in designing and improving combustion systems are becoming more important.

Suggested technical electives:

Mechanical Engineering 161, 163, 184A with 184B

(both courses must be taken)

Civil and Environmental Engineering 149, 150

Suggested advisers: R.C. Aldredge, H.A. Dwyer, I.M.  
Kennedy, W. Kollmann, B.D. Shaw.

**Heat Transfer, Thermodynamics, and Energy Systems.** This specialization emphasizes the fundamentals of heat transfer and thermodynamics and their application to the design of advanced engineering systems. The program introduces students to the fundamental processes of heat transfer and thermodynamics in complex engineering systems so that they are able to design more efficient, cost effective, and reliable systems with less environmental pollution and impact. An understanding of heat transfer and thermodynamics is required for the design of efficient, cost-effective systems for power generation (including advanced energy conversion systems), propulsion (including combustion engines and gas turbines), heat exchangers, industrial processes, refining, and chemical processing. This area of specialization is important to many industries—aerospace, defense, automotive, metals, glass, paper, and plastic—as well as to the thermal design of electronic and computer packages.

Suggested technical electives:

Aeronautical Science and Engineering 138

Engineering 111

Mechanical Engineering 161, 162, 163, 165, 186

Suggested advisers: R.C. Aldredge, J.W. Baughn,  
H.A. Dwyer, H.A. Hoffman, I.M. Kennedy, W. Kollmann,  
B.D. Shaw.

**Manufacturing.** Manufacturing is the process of converting raw materials into products. A major activity of mechanical engineers is studying and working with various production methods and techniques, integrating creative design activities into actual fabricated products.

The emphasis in the manufacturing program is to provide hands-on experience with state-of-the-art and computer-integrated manufacturing methods and processes. Laboratories have been established that have state-of-the-art manufacturing equipment for conventional and non-traditional machining, three-dimensional measurement, and plastic injection molding. Computer-oriented manufacturing is also an emphasis of the program. A manufacturing engineer will have a solid background in manufacturing processes and systems as well as in statistics, design, controls and applications of microprocessors.

Suggested technical electives:

Electrical and Computer Engineering 160, 174

Materials Science and Engineering 140, 155

Mechanical Engineering 151, 153, 154, 172

Suggested advisers: H.H. Cheng, B. Ravani, K.  
Yamazaki.

**Systems Dynamics and Control.** Engineers are increasingly concerned with the performance of integrated dynamics systems in which it is not possible to optimize component parts without considering the overall system.

Systems Dynamics and Control specialists are concerned with the modeling, analysis, and simulation of all types of dynamic systems and with the use of automatic control techniques to change the dynamic characteristics of systems in useful ways. The emphasis in this program is on the physical systems that are closely related to mechanical engineering, but the techniques for studying these systems apply to social, economic, and other dynamic systems.

Graduate research includes projects on continuously variable transmissions, active and semi-active suspension systems, anti-skid braking systems, electro-mechanical actuator design, design and control of walking machines, electronically controlled steering, mathematical models of motorcycle dynamics, the analysis of fuel management systems, and the design of flight-control systems for the modeling of human pilot and vehicle dynamics.

An Automotive System Dynamics Laboratory is being developed for testing components such as engines, transmissions, brakes, and steering systems as well as testing completed test vehicles. As plans for on-campus laboratories and a test track proceed, 10 experimental vehicles are housed in a rented facility,

and research on vehicle components proceeds in various Mechanical Engineering laboratories.

Suggested technical electives:

Aeronautical Science and Engineering 128, 129, 131, 139  
Engineering 122

Mechanical Engineering 134, 152, 172, 184A with 184B (both courses must be taken), 187

Suggested advisers: F.O. Eke, A.A. Frank, R.A. Hess, M. Hubbard, D.C. Karnopp, S.A. Snell.

**Ground Vehicle Systems.** An aspect of mechanical engineering is the design of surface vehicles. The emphasis is on the design of more environmentally benign vehicles that can provide transportation while using fewer resources. Innovations in the field require competence in vehicle dynamics, propulsion and engine concepts, control of power transmission, and construction of lightweight manufacturable structures and systems. Alternatively fueled power systems, including electric drives, are also studied.

**Transportation Systems.** An important aspect of Mechanical Engineering is the planning, design, and operation of transportation systems. As society recognizes the increasing importance of optimizing transportation systems to minimize environmental degradation and energy expenditure, engineers will need to consider major innovations in the way people and goods are moved. Such innovations will require competence in vehicle dynamics, propulsion and control, and an understanding of the problems caused by present-day modes of transportation.

Suggested technical electives:

Aeronautical Science and Engineering 127, 128, 129  
Civil and Environmental Engineering 131A, 149, 160  
Engineering 122, 160 (only one unit of credit towards Technical Electives requirement)

Mechanical Engineering 134, 152, 162, 172, 184A with 184B (both courses must be taken), 187

Suggested advisers: A.A. Frank, M. Hubbard, D.C. Karnopp, D.L. Margolis, S. Velinsky.

**Mechanical Engineering  
Upper Division Requirements**

UNITS

**Subject Areas and Courses**

Electronic circuits—Engineering 100 .....3  
Applied mechanics—Engineering 102, 104 ...8  
Applied thermodynamics—Engineering 105A, 105B; Mechanical Engineering 165 .....10  
Fluid mechanics—Engineering 103A, 103B .....6  
Mechanical engineering design—Mechanical Engineering 150A, and either 150B or 172; and one course chosen from 184A with 184B (both courses must be taken), 185A with 185B (both courses must be taken in consecutive quarters), 186, 187 .....12  
Controls and systems analysis—Mechanical Engineering 171 .....4  
Measurements and laboratory—Engineering 107, Mechanical Engineering 176 .....6  
Professional responsibilities—Engineering 190 .....3  
Applied mathematics—Select one course from Engineering 180; Applied Science Engineering 115; Mathematics 128C, 131; Statistics 120, 131A; Civil and Environmental Engineering 114 .....3  
Technical electives .....25

Eighteen of the 25 units must be selected from upper division courses in engineering; of these units, three courses must be chosen from the following design courses: Aeronautical Science and Engineering 128, 129, 130, 137, 138, 139, Materials Science and Engineering 140, 148, Mechanical Engineering 134, 151, 152, 154, 161, 163, 188.

You may also choose from Mechanical Engineering 150B, 172, 184A with 184B (both courses must be taken in consecutive quarters), 185A with 185B (both

courses must be taken in consecutive quarters), 186, 187, if these courses are not used for a core design requirement above.

A combined maximum of 4 units may be selected from project/independent study courses (184–188, 192, 199) not used in satisfaction of core degree requirements.

Humanities—Social Sciences electives and/or General Education electives .....9

**Total Upper Division Units.....89**

**Minimum Units Required for Major.....180**

**Mechanical Engineering/Materials  
Science and Engineering  
Upper Division Requirements**

UNITS

Electronic circuits—Engineering 100 .....3  
Applied mechanics—Engineering 102, 104 ...8  
Applied thermodynamics—Engineering 105A, 105B; Materials Science and Engineering 130; Mechanical Engineering 165 .....13  
Fluid mechanics—Engineering 103A, 103B ...6  
Mechanical engineering design—Mechanical Engineering 150A, and either 150B or 172; and one course chosen from 184A with 184B (both courses must be taken in consecutive quarters), 185A with 185B (both courses must be taken in consecutive quarters), 186, 187 .....12  
Controls and systems analysis—Mechanical Engineering 171 .....4  
Materials science—Materials Science and Engineering 132, 134, 138, and two courses chosen from Materials Science and Engineering 140, 142, 144, 146, 147, 148, 155; and two laboratory courses chosen from Materials Science and Engineering 132L, 134L, 138L .....19  
Measurements and laboratory—Engineering 107, Mechanical Engineering 176 .....6  
Applied mathematics—Select one course from: Engineering 180, 182; Applied Science Engineering 115; Mathematics 128C, 131; Statistics 120, 131A; Civil and Environmental Engineering 114 .....3  
Professional responsibilities—Engineering 190 .....3  
Technical electives .....6

In order to satisfy design requirements, two courses must be chosen from Aeronautical Science and Engineering 128, 129, 130, 137, 138, 139, Materials Science and Engineering 140, 148, 149, 155; Mechanical Engineering 134, 151, 152, 154, 161, 162, 163, 188.

You may also choose from Mechanical Engineering 150B, 172, 184A with 184B (both courses must be taken in consecutive quarters), 185A with 185B (both courses must be taken in consecutive quarters), 186, 187, if these courses are not used for a core design requirement above.

A maximum of 4 units of courses numbered 184–188 may be applied to the technical elective degree requirement.

Humanities—Social Sciences electives and/or General Education electives .....9

**Total Upper Division Units.....92**

**Minimum Units Required for Major.....183**

**Courses in Engineering (ENG)**

**Lower Division Courses**

**4. Engineering Graphics in Design (3) I, II.**  
Yamazaki

Lecture—2 hours; laboratory—3 hours. Introduction to engineering design, descriptive geometry, pictorial sketching, computer-aided graphics, and their application in the solution of engineering problems.

**5. Applications of Computers (3) I, II, III.**

The Staff

Lecture—2 hours; discussion—1 hour. Prerequisite: Mathematics 16A or 21A. Digital computation and computer programming in FORTRAN. Algorithms and their description. Basic programming; debugging of programs; approximate computing-accuracy and significance; solving simple numerical and nonnumerical problems.

**6. Engineering Problem Solving (4) II, III.**

The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16B or 21B (may be taken concurrently). Methodology for solving engineering problems. Engineering computing and visualization based on MATLAB. Engineering examples and applications.

**11. Issues in Engineering (1) I.** Shackelford

Lecture—1 hour; discussion—1 hour. Prerequisite: participation in the Minority Engineering Program (MEP) or consent of instructor. Designed to broaden students' understanding of the engineering profession: its methods, principles, design, and development process; career opportunities; and professional resources.

**17. Circuits I (4) I, II, III.** The Staff

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 22B (may be taken concurrently); Physics 9C. Basic electric circuit analysis techniques, including electrical quantities and elements, resistive circuits, transient and steady-state responses of RLC circuits, sinusoidal excitation and phasors, and complex frequency and network functions.

**\*25. Introduction to Physical Devices and Systems (3) II.** The Staff

Lecture/discussion—2 hours; laboratory—3 hours. Prerequisite: lower division standing in Engineering and consent of instructor. Introduction to and experience with common hardware and physical devices with the overall goal of enriching the students' understanding of physical devices and systems. (P/NP grading only.)

**35. Statics (3) I, II, III.** The Staff (Chairperson in charge)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Mathematics 21D (may be taken concurrently); Physics 9A. Force systems and equilibrium conditions with emphasis on engineering problems.

**45. Properties of Materials (4) I, II, III.** The Staff

Lecture—3 hours; laboratory—3 hours. Prerequisite: open only to students in the College of Engineering. Introductory course on the properties of engineering materials and their relation to the internal structure of materials. GE credit: Wrt.

**Upper Division Courses**

**100. Electronic Circuits and Systems (3) II, III.**

The Staff

Laboratory—3 hours; lecture—1 hour; discussion—1 hour. Prerequisite: course 17. Introduction to analog and digital circuit and system design through hands-on laboratory design projects. Students who have completed Electrical and Computer Engineering 100 may receive only 1.5 units of credit.

**102. Dynamics (4) I, II, III.** Hess, Hubbard, Karnopp

Lecture—4 hours. Prerequisite: course 35, Mathematics 22B; open to College of Engineering students only. Topics in three-dimensional rigid body dynamics; elementary dynamics of vibrating systems; introduction to energy methods.

**103A. Elementary Fluid Mechanics (3) I, II, III.**

Barakat, Chattot, Dwyer, Kollman

Lecture—3 hours. Prerequisite: course 102 (may be taken concurrently). Fluid properties; fluid statics; continuity and linear momentum equations for control volumes; flow of incompressible fluids in pipes; dimensional analysis.

**103B. Elementary Fluid Mechanics (3) I, II, III.**

Chattot, Hafez, van Dam

Lecture—3 hours. Prerequisite: course 103A; open to College of Engineering students only. Incompressible viscous flow; boundary layer flow; potential flows; compressible flows.

\*Course not offered this academic year.

**104. Mechanics of Materials** (4) I, II, III. The Staff Lecture—4 hours. Prerequisite: course 35, Mathematics 22B. Open to Engineering majors only. Uniaxial loading and deformation. General concepts of stress-strain-temperature relations and yield criteria. Torsion of shafts. Bending of beams. Deflections due to bending. Introduction to stability and buckling.

**104L. Mechanics of Materials Laboratory** (1) II, III. Chai Laboratory—3 hours. Prerequisite: course 104. Experiments which illustrate the basic principles and verify the analysis procedures used in the mechanics of materials are performed using the basic tools and techniques of experimental stress analysis.

**105A. Thermodynamics** (3) I, II, III. Capece, Dwyer, Kennedy, Shaw Lecture—3 hours. Prerequisite: Mathematics 21D, 22B; open to College of Engineering students only. Fundamental concepts of thermodynamics: heat energy and work, properties of pure substances, First Law and Second Law for closed and open systems, reversibility, entropy, thermodynamic temperature scales; power cycles: Carnot, Rankine, Brayton; and applications of thermodynamics to engineering systems.

**105B. Thermodynamics** (3) I, II, III. Aldredge, Hoffman, Kennedy Lecture—3 hours. Prerequisite: course 105A; open to College of Engineering students only. Irreversibility and availability, thermodynamic relations, gas and vapor mixtures, and chemical reactions.

**106. Engineering Economics** (3) II, III. Hartsough, Slaughter Lecture—3 hours. Prerequisite: upper division standing in Engineering. The analysis of problems in engineering economy; the selection of alternatives; replacement decisions. Compounding, tax, origins and cost of capital, economic life, and risk and uncertainty are applied to methods of selecting most economic alternatives.

**107. Thermal Fluids Laboratory** (3) I, II, III. The Staff Lecture—2 hours; laboratory—3 hours. Prerequisite: courses 103B and 105B. Experiments to illustrate the first and second laws of thermodynamics thermodynamic cycles, combustion, and principles of thermal and flow measurements.

**111. Electric Power Equipment** (3) I. Delwiche, Hartsough Lecture—2 hours; laboratory—3 hours. Prerequisite: course 17. Principles of AC and DC electric motors and generators, their control systems and power sources. Selection of electric power equipment components based on their construction features and performance characteristics.

**122. Introduction to Mechanical Vibrations** (4) I. Hubbard Lecture—4 hours. Prerequisite: course 102. Free and forced vibrations in lumped-parameter systems with and without damping; vibrations in coupled systems; electromechanical analogs; use of energy conservation principles.

**130. Introduction to Biomedical Engineering** (3) I. Hull Lecture—3 hours. Prerequisite: courses 36, 45, 100 or consent of instructor. An introduction to the primary fields of specialization in biomedical engineering. Fields include the following: (1) sensors, instrumentation, and signal processing; (2) orthopaedic biomechanics; (3) whole body biomechanics; (4) imaging, and (5) biofluids and transport.

**160. Environmental Physics and Society** (3) I. Jungerman, Craig Lecture—3 hours. Prerequisite: Physics 9D, 5C, or 10 or 1B and Mathematics 16B or the equivalent. Impact of humankind on the environment will be discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications will be considered. (In the College of Engineering, students may receive only one unit of credit towards the Technical Electives requirement.) (Same course as Physics 160.) GE credit: SciEng or SocSci.

**180. Engineering Analysis** (3) I. Hafez Lecture—3 hours. Prerequisite: Mathematics 22B, course 5. Analysis of steady-state and nonsteady-state problems for discrete and continuous systems; analytic and approximate solutions. Typical engineering problems in heat transfer, fluid mechanics, electrical networks, mechanical vibrations, and elasticity.

**190. Professional Responsibilities of Engineers** (3) II, III. Sanders Lecture—3 hours; laboratory—1 hour. Prerequisite: upper division standing. Organization of the engineering profession; introduction to contracts, specifications, business law, patents, and liability; discussion of professional and ethical issues; oral presentations on the interactions between engineering and society.

### Lower Division Courses

**90C. Research Group Conference for Lower Division Students** (1) I, II, III. The Staff (Chairperson in charge) Discussion—1 hour. Prerequisite: lower division standing; consent of instructor. May be repeated for credit. (P/NP grading only.)

**98. Directed Group Study** (1-5) I, II, III. The Staff Prerequisite: consent of instructor and lower division standing. (P/NP grading only.)

**99. Special Study for Lower Division Students** (1-5) I, II, III. The Staff (Chairperson in charge) Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

**115. Introduction to Numerical Methods for Engineers and Scientists** (3) I, II, III. Yeh, Cramer, De Groot Lecture—3 hours. Prerequisite: Engineering 5, Mathematics 22B. Introduction to error analysis, roots of equations, interpolation, quadrature, eigenproblems, systems of linear algebraic equations, ordinary differential equations, and deterministic and stochastic algorithms. Lectures and computational assignments on the application of digital computers to problems in engineering and science.

**116. Computer Solution of Physical Problems** (3) III. Cramer, De Groot Lecture—3 hours. Prerequisite: course 115 or consent of instructor. Application of computers to solution of physical problems. Numerical solution of elliptic, parabolic, and hyperbolic partial differential equations; eigenvalue problems, Monte Carlo methods, linear programming.

**137. Science and Technology of Nuclear Arms Effects and Control** (3) I. Jungerman (Physics), Craig

Lecture—3 hours. Prerequisite: upper division standing; one course from Physics 1B, 5C, 9D, or 10. Scientific and technical aspects of nuclear arms effects and nuclear arms control including the nuclear physics of atomic and hydrogen bombs, blast and radiation effects, radioactivity, electromagnetic pulse, ICBM accuracy, laser weapons, verification safeguards, biological and ecological effects. Emphasis on order of magnitude calculations. (In the College of Engineering, students may receive only one unit of credit towards the Technical Electives requirement.) (Same course as Physics 137.) GE credit: SciEng or SocSci.

**165A. Quantum Optics I** (3) II. Yeh Lecture—3 hours. Prerequisite: Physics 110A-110B or the equivalent. Quantum nature of light and matter. Statistics of photons in chaotic, coherent and mixed states. Concepts of photon coherence and correlation. Development of a coherent state from a chaotic photon distribution.

**165B. Quantum Optics II** (3) III. Yeh Lecture—3 hours. Prerequisite: course 165A or the equivalent. Quantum nature of interaction between light and matter: photoelectric counting statistics. Photon distributions in scattering processes and in nonlinear optical processes.

**166A. Quantum Optics Laboratory** (1) II. Yeh Laboratory—3 hours. Prerequisite: course 165A concurrently. Hands on experience in working with lasers, photon spectroscopy, electro-optical devices and photoelectric counting statistics.

**166B. Quantum Optics Laboratory** (1) III. Yeh Laboratory—3 hours. Prerequisite: course 165B concurrently. Continuation of course 166A.

**171. Scanning Probe Microscopy** (4) III. Yeh Lecture—3 hours; laboratory—3 hours. Prerequisite: Electrical and Computer Engineering 130A, Engineering 102, Chemistry 110B or the equivalent. Physics of scanning microprobe techniques, scanning tunneling microscope and atomic force microscope will be studied, as will their applications to surfaces and structural biology. Operational STM and AFM will further students' experience in nano-scale science and technology.

**180. Introduction to Plasma Physics and Controlled Fusion** (3) I. The Staff Lecture—3 hours. Prerequisite: Physics 110B and 112A, or consent of instructor. Equilibrium plasma properties, plasma sources, plasma diagnostics, magnetohydrodynamics, kinetic theory, plasma stability, plasma confinement systems and approaches to controlled thermonuclear fusion.

**181. Plasma Physics Laboratory** (1) I. De Groot Laboratory—3 hours. Prerequisite: course 180 concurrently. Langmuir probes, plasma sources, Landau

damping of ion acoustic waves, ion acoustic shocks, ion-ion two-stream instability.

**190C. Research Group Conference for Advanced Undergraduates** (1) I, II, III. The Staff (Chairperson in charge)

Discussion—1 hour. Prerequisite: advanced standing; consent of instructor. Weekly conference on research problems, progress and techniques in applied science. May be repeated for credit. (P/NP grading only.)

**198. Group Study** (1-5) I, II, III. The Staff  
Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff  
Prerequisite: consent of instructor. (P/NP grading only.)

### Graduate Courses

**228A-228B-228C. Properties of Matter** (3-3-3)  
I-II-III. Freeman, Yeh, Baldis, McCurdy  
Lecture—3 hours. Prerequisite: Mathematics 22B and Physics 112B. Microscopic and macroscopic descriptions of matter; thermodynamics and kinetics; constitutive, electrical, mechanical and thermal properties.

**230A-230B-230C. Structure of Matter** (3-3-3)  
I-II-III. Yeh, Freeman, Orel, Krol  
Lecture—3 hours. Prerequisite: courses 205A, 205B, 205C (may be taken concurrently). Classical properties of matter; introduction of quantum mechanics by the correspondence principle; perturbation theory; electron theory of atoms, molecules, and solids; quantum theory of cooperative effects.

**234A-234B-234C. Electromagnetic Theory** (3-3-3) I-II-III. Luhmann, Hwang, Freeman  
Lecture—3 hours. Prerequisite: Electrical and Computer Engineering 131B. Review basic electromagnetic field theory. Special relativity. Charges in fields. Radiation from charges: generation, scattering, diffraction. Electrodynamics of continuous media: conductors, dielectrics, superconductors, magnetic materials, plasmas. Transmission of electromagnetic waves through material. Modern applications of theory.

**271. Optical Methods in Biophysics** (3) I. Yeh, Matthews  
Lecture—3 hours. Prerequisite: Physics 110A-110B-110C, Chemistry 110A, 110B, or the equivalent. Physics of light-matter interactions used in biophysical research. Techniques of absorption, ellipsometry, fluorescence, phosphorescence, elastic and inelastic scattering, diffraction, and nonlinear optics are applied to the studies of proteins, nucleic acids, lipids, and supra-molecular organizations in biological systems. Offered in alternate years.

**280A-280B-280C. Plasma Physics and Controlled Fusion** (3-3-3) I-II-III. Luhmann, Hwang  
Lecture—3 hours. Prerequisite: course 234B or consent of instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion.

**285A. Physics and Technology of Microwave Vacuum Electron Beam Devices I** (4) III. Luhmann  
Lecture—4 hours. Prerequisite: B.S. degree in physics or electrical engineering or the equivalent background. Physics and technology of electron beam emissions, flow and transport, electron gun design, space charge waves and klystrons. Offered in alternate years.

**285B. Physics and Technology of Microwave Vacuum Electron Beam Devices II** (4) I. Luhmann  
Lecture—4 hours. Prerequisite: 285A. Theory and experimental design of traveling wave tubes, backward wave oscillators, and extended interaction oscillators. Offered in alternate years.

**285C. Physics and Technology of Microwave Vacuum Electron Beam Devices III** (4) II. Luhmann  
Lecture—4 hours. Prerequisite: 285B. Physics and technology of gyrotrons, gyro-amplifiers, free elec-

tron lasers, magnetrons, crossfield amplifiers and relativistic devices. Offered in alternate years.

**285D. Physics and Technology of Microwave Vacuum Electron Beam Devices IV** (4) III. Luhmann

Lecture—4 hours. Prerequisite: 285C. Computational models of vacuum electron beam devices. Offered in alternate years.

**289A-K. Special Topics in Applied Science** (1-5) I, II, III. The Staff

Lecture, laboratory, or combination. Prerequisite: consent of instructor. Special topics in the following areas: (A) Atomic and Molecular Physics; (B) Chemical Physics; (C) Computational Physics; (D) Digital Media; (E) Materials Science; (F) Imaging Science and Photonics; (G) Nonlinear Optics; (H) Plasma Physics; (I) Quantum Electronics; (J) Solid State; (K) Microwave and Millimeter Wave Technology. May be repeated for credit up to a total of 5 units per segment when topic differs.

**290. Seminar** (1-2) I, II, III. The Staff  
Seminar—1-2 hours. (S/U grading only.)

**290C. Graduate Research Group Conference** (1) I, II, III. The Staff  
Discussion—1 hour. Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only.)

**298. Group Study** (1-5) I, II, III. The Staff  
(S/U grading only.)

**299. Research** (1-12) I, II, III. The Staff  
(S/U grading only.)

## Courses in Engineering: Applied Science—Livermore (EAL)

### Upper Division Course

**199. Special Study for Advanced Undergraduates** (1-5) I, II, III. The Staff  
Prerequisite: consent of instructor. (P/NP grading only.)

### Graduate Courses

**201. Software Engineering** (3) I. Blattner  
Lecture—3 hours. Prerequisite: data structures, elementary knowledge of software development methodology; knowledge of an object-oriented language is desirable. First part of course examines the development of large production-quality programs, project management techniques, software design methodologies. The second part covers automated and integrated software tools and object-oriented methods of design. Problems associated with user interface management systems are discussed. (Former course 201A.)

**203. Computer Architecture** (3) III. Vemuri  
Lecture—3 hours. Prerequisite: Computer Science Engineering 250A. Topics in computer communication, hardware features to enhance operating systems, advanced architectures, memory hierarchy, parallel architectures, and vector computing.

**204. Knowledge Representation** (3) III. Blattner  
Lecture—3 hours. Prerequisite: Computer Science Engineering 270 and 222A, or the equivalent. Course explores expressive adequacy, computational efficiency, non-deductive and non-monotonic reasoning associated with some knowledge representation schemes. Offered in alternate years.

**205A. Mathematical Methods** (3) I. Orel, Rodrigue, Freeman  
Lecture—3 hours. Prerequisite: calculus. Complex variables, theory of convergence, evaluation of definite integrals, factorial function (gamma function), asymptotic expansions, fourier analysis.

**205B. Mathematical Methods** (3) II. Orel, Rodrigue, Freeman  
Lecture—3 hours. Prerequisite: course 205A. Laplace transforms, Sturm-Liouville theory, solution of second order linear ODE, approximate solutions of ODE, calculus of variations, characteristics.

**205C. Mathematical Methods** (3) III. Orel, Rodrigue, Freeman  
Lecture—3 hours. Prerequisite: course 205B. Spherical harmonics, Bessel functions, conformal mapping, hypergeometric functions, elliptic functions.

**207. Compiler Construction** (3) I. Blattner  
Lecture—3 hours. Prerequisite: Computer Science Engineering 240. Syntax-directed translation techniques are used to implement a compiler for a high-level programming language. Emphasis on semantic analysis and code generation and optimization.

**210A. Numerical Methods in Applied Science** (3) I. Rodrigue, Vemuri  
Lecture—3 hours. Prerequisite: calculus through differential equations and vector analysis. Numerical techniques used in a wide variety of applications of digital computers to problems in applied science. Emphasis placed on the common mathematical elements of the techniques developed.

**210B. Numerical Methods in Applied Science** (3) II. Rodrigue, Vemuri  
Lecture—3 hours. Prerequisite: course 210A. Numerical methods applicable to the solution of partial differential equations. Emphasis on finite-difference, finite-element, and spectral methods for linear hyperbolic, parabolic, and elliptic systems and nonlinear hyperbolic systems.

**210C. Numerical Methods in Applied Science** (3) III. Rodrigue, Vemuri  
Lecture—3 hours. Prerequisite: course 210B. Computational methods in various fields including: fluid mechanics, kinetic theory, solid mechanics, quantum mechanics.

**211A. Numerical Solution of Partial Differential Equations I** (3) I. Rodrigue  
Lecture—3 hours. Prerequisite: course 210A, 210B. Fundamentals of parallel computers, grid generation, domain decomposition, Poisson's equation, elliptic PDEs, Galerkin methods, numerical linear algebra, iterative acceleration.

**211B. Numerical Solution of Partial Differential Equations II** (3) II. Rodrigue  
Lecture—3 hours. Prerequisite: course 211A. Parabolic PDEs, stability, preconditioned time differencing, hyperbolic PDEs, modified differential equation, advection-diffusion equations, wave equation, Burgers' equation, reaction-diffusion equations.

**211C. Numerical Solution of Partial Differential Equations III** (3) III. Rodrigue  
Lecture—3 hours. Prerequisite: course 211B. Conservation laws, fluid equations, turbulence, elasticity equations, electromagnetic equations, transport equations.

**213A. Computer Graphics** (3) II. Max  
Lecture—3 hours. Prerequisite: consent of instructor. Development of algorithms for perspective line drawings of three-dimensional objects, as defined by polygons or bicubic patches.

**213B. Computer Graphics** (3) III. Max  
Lecture—3 hours. Prerequisite: course 213A or Computer Science Engineering 175. Algorithms to produce color raster renderings of three-dimensional models.

**214. Scientific Visualization** (3) II. Max  
Lecture—3 hours. Prerequisite: Computer Science Engineering 175 or consent of instructor. Visualization of 3D data, including scalar fields, vector fields, and molecular structures. Primary emphasis on volume visualization algorithm.

**215. Computer Animation** (3) III. Max  
Lecture—3 hours. Prerequisite: Computer Science Engineering 175A or course 213A. Control of camera and object motion necessary to produce computer animation, modeling of articulated objects made from jointed segments, and of deformable objects. Students will complete a final animation project. (Same course as Computer Science Engineering 279). Offered in alternate years.

**216A-G. Special Topics in Computer Science** (1-5) I, II, III. The Staff  
Lecture, laboratory, or combination. Prerequisite: consent of instructor. Special topics in the following areas:

(A) Architecture; (B) Software Systems; (C) Language Translation; (D) Language Design; (E) Operating Systems; (F) Foundations of Computing; (G) Computational Mathematics. May be repeated for credit for a total of 5 units per segment if topic differs.

**217A-217B. Computational Science** (3-3) I, II. Rodrigue

Lecture—3 hours. Prerequisite: courses 205A and 205B (may be taken concurrently). Designed for physical scientists. Topics in computer science with applications to computational science. Computer organization and architecture, data structures, algorithms and complexity, software environments for scientific visualization, symbolic computation.

**218. Signal Processing** (3) I. Blattner, Dowla  
Lecture—3 hours. Prerequisite: Mathematics 121A, 121B or the equivalent. Discrete-time and continuous-time signal processing. Fourier transforms, Laplace transforms, sampling and reconstruction. LTI systems: convolution. Discrete-time transforms: DFT, FFT, and Discrete wavelet transforms. Filters and filter designs.

**219. Wavelets and Their Applications** (3) II. Dowla

Lecture—3 hours. Prerequisite: Electrical and Computer Engineering 150A, Mathematics 167. Fourier transforms and digital filters; sampling theorem and analog-to-digital conversion, multirate signal processing; wavelet transforms and filter banks; fast algorithms: FFT, DWT, and pyramid; data compression with wavelets; spectral factorization; designing application-specific wavelets. Offered in alternate years.

**220A. Artificial Neural Nets-I** (3) I. Vemuri  
Lecture—3 hours. Prerequisite: Mathematics 167; ability to use computers to solve problems using a traditional language or via tools like Matlab or Mathematica. Biological and Computational motivations. Models of neurons. Supervised and unsupervised learning. Correlation matrix memories. Discrete and continuous Hopfield nets. Self organization. Kohonen Net. Counter propagation. Perceptron. LMS methods. Back propagation. Offered in alternate years.

**220B. Artificial Neural Nets-II** (3) II. Vemuri  
Lecture—3 hours. Prerequisite: course 220A. Growing and pruning algorithms for multi-layer perceptrons, acceleration of convergence, conjugate gradient methods. RBF networks. Temporal processing. Modular networks. Reinforcement learning. Neurodynamics. Case studies. Offered in alternate years.

**221. Genetic Algorithms and Optimization** (3) III. Vemuri  
Lecture—3 hours. Prerequisite: Mathematics 145 or the equivalent; graduate standing; ability to program in one of the modern programming languages. Introduction to genetic algorithms. Fundamental theorem; schema processing; genetic operators; applications to function optimization, scheduling, VLSI circuit layout. Implementation on parallel computers; genetic programming; evolutionary algorithms.

**222. User Interfaces** (3) II. Blattner  
Lecture—3 hours. Prerequisite: Computer Science Engineering 110. Design and evaluation of the interface between systems and users. Covers user interaction styles and techniques, display formats, user guidance, and methodologies for designing and evaluating user interfaces. Offered in alternate years.

**223. Multimedia Interfaces** (3) I. Blattner  
Lecture—3 hours. Prerequisite: course 222 recommended. Examines basic paradigms of multimedia interfaces and time-varying systems, navigation through the multimedia system, hypermedia as well as study of interaction devices such as audio, gesture, video, pen-based systems, and audio input and output. Virtual reality systems and intelligent interfaces will conclude the course. Offered in alternate years.

**224. Theories of Human-Computer Interaction** (3) I. Blattner  
Lecture—3 hours. Prerequisite: data structures and basic statistics; a course in user interfaces is desirable. Some basic cognitive science pertaining to computer usage is introduced (such as memory, sensory limits, and problem solving) followed by models of human activity; task analysis; different paradigms

for computer use; models of cooperative activity; cultural differences in human-computer interaction; users with disabilities; and adaptive interfaces. Offered in alternate years.

**225. Computational Structures for Signal and Image Processing and Graphics** (3) III. Vemuri  
Lecture—3 hours. Prerequisite: Computer Science Engineering 40; course 210A. Tools for research in digital media. Relevant computer architectures, algorithms and languages for signal processing, image processing and graphics. Hardware and software issues in parallelism. Programming in SISAL, Parallel C and Parallel Fortran. Parallel algorithms using SISAL on parallel computers. Offered in alternate years.

**226. Practical Data Communications in Digital Media** (3) II. Vemuri, Dowla  
Lecture—3 hours. Prerequisite: Computer Science Engineering 152. Tools for research in digital media. Communication protocols, algorithms and architectures suitable in modern networked environment. Transmission of digital data over voice-grade channels, telecommunications networks for data transport, Broadband multimedia communications, ATM, and Broadband ISDN. Offered in alternate years.

**227. Chaos, Fractals and Nonlinear Phenomena** (3) III. Hoover  
Lecture—3 hours. Prerequisite: courses 205A and 205B. A computational treatment of pervasive instabilities in simulation—"sensitive dependence on initial conditions"—called "Chaos." Connecting the Second Law of Thermodynamics to nonlinear dynamics with "strange attractors;" these are generally "fractal" objects with great aesthetic and intellectual appeal.

**228A-228B-228C. Statistical Mechanics** (3-3-3) I-II-III. Freeman, Yeh, Baldis, McCurdy  
Lecture—3 hours. Prerequisite: Mathematics 22B and Physics 112B. Microscopic and macroscopic descriptions of matter; thermodynamics and kinetics: constitutive, electrical, mechanical and thermal properties.

**230A-230B-230C. Quantum Mechanics** (3-3-3) I-II-III. Freeman, Orel, Krol  
Lecture—3 hours. Prerequisite: courses 205A-205B-205C (may be taken concurrently). Classical properties of matter; introduction to quantum mechanics by the correspondence principle; perturbation theory; electron theory of atoms, molecules and solids; quantum theory of cooperative effects.

**233A-233B-233C. Theory and Applications of Solid-State Physics** (3-3-3) I-II-III. Wooten, Terminello  
Lecture—3 hours. Prerequisite: course 230C or the equivalent. Structure and properties of crystals; theory of dielectrics, metals and alloys; magnetism, superconductivity, and semiconductors. Applications to various solid-state devices.

**234A-234B-234C. Electromagnetic Theory** (3-3-3) I-II-III. Luhmann, Hwang, Freeman  
Lecture—3 hours. Prerequisite: Electrical and Computer Engineering 131B. Review basic electromagnetic field theory. Special relativity. Charges in fields. Radiation from charges: generation, scattering, diffraction. Electrodynamics of continuous media: conductors, dielectrics, superconductors, magnetic materials, plasmas. Transmission of electromagnetic waves through material. Modern applications of theory.

**255. Classical Mechanics** (3) I. Baldis, Yeh  
Lecture—3 hours. Prerequisite: consent of instructor. General principles of analytical mechanics; variational principles; Lagrange's and Hamilton's equations; kinematics; collisions.

**256. Continuum Mechanics** (3) II. Christensen  
Lecture—3 hours. Prerequisite: course 205C. Hydrodynamics of incompressible and compressible flows in two and three dimensions; problems of hydrodynamic instability; viscous hydrodynamics; boundary layer theory.

**257. Computational Continuum Mechanics** (3) Hoover  
Lecture—3 hours. Prerequisite: Mathematics 121A, 121B and 128C. Fundamental conservation and constitutive equations for continua, together with numeri-

cal techniques for their solution, including Eulerian, Lagrangian, and particle methods.

**262A-262B-262C. Atomic and Molecular Interactions** (3-3-3) I-II-III. Orel, Freeman  
Lecture—3 hours. Prerequisite: course 230A-230B-230C or the equivalent. Atomic structure and spectra, molecular structure and spectra, classical and quantum mechanical collision theory of electron and heavy particle scattering.

**265A-265B. Laser Physics** (3-3) I-II. Freeman, Krol, Kolner  
Lecture—3 hours. Prerequisite: courses 230A-230B-230C, 234A-234B-234C. Theory of generation of laser radiation and its interaction with matter. Dynamics of laser media, oscillators/amplifiers. Short pulse generation and propagation. Coherence properties of laser radiation. Fourier optics, resonators, and holography. Characteristics of laser devices. Laser spectroscopy.

**266A-266B. Laser Physics Laboratory** (3-3) I-II. Kolner, Krol  
Lecture—1 hour; laboratory—6 hours. Prerequisite: course 265A-265B (may be taken concurrently). Experiments exploring principles of generation and propagation of laser radiation. Laser measurement techniques. Dynamics of laser media. Oscillators and amplifiers. Generation of short pulses. Coherence properties of laser radiation. Holography. Characteristics of laser devices. Laser spectroscopy.

**267. Nonlinear Optics** (3) III. Krol  
Lecture—3 hours. Prerequisite: course 265A-265B. Theory of the nonlinear interaction of radiation and matter. Nonlinear optical properties of materials. Crystal optics, electro-optics, and acousto-optics. Parametric oscillation and amplification. Harmonic conversion. Stimulated Raman and Brillouin scattering, self-focusing, four-wave mixing, phase conjugation and spectroscopy.

**267L. Nonlinear Optics Laboratory** (3) III. Krol  
Lecture—1 hour; laboratory—6 hours. Prerequisite: course 265A-265B. Experiments exploring the principles of nonlinear optics. Phenomena studied selected from: crystal-optics, electro-optics, acousto-optics, parametric oscillation and amplification, harmonic conversion, stimulated Raman and Brillouin scattering, self-focusing, four-wave mixing, phase conjugation. Laser spectroscopy.

**280A-280B-280C. Plasma Physics and Controlled Fusion** (3-3-3) I-II-III. Hwang, Luhmann  
Lecture—3 hours. Prerequisite: course 234B or consent of instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion.

**285A. Physics and Technology of Microwave Vacuum Electron Beam Devices I** (4) III. Luhmann  
Lecture—4 hours. Prerequisite: B.S. degree in physics or electrical engineering or the equivalent background. Physics and technology of electron beam emissions, flow and transport, electron gun design, space charge waves and klystrons. Offered in alternate years.

**285B. Physics and Technology of Microwave Vacuum Electron Beam Devices II** (4) I. Luhmann  
Lecture—4 hours. Prerequisite: 285A. Theory and experimental design of traveling wave tubes, backward wave oscillators, and extended interaction oscillators. Offered in alternate years.

**285C. Physics and Technology of Microwave Vacuum Electron Beam Devices III** (4) II. Luhmann  
Lecture—4 hours. Prerequisite: 285B. Physics and technology of gyrotrons, gyro-amplifiers, free electron lasers, magnetrons, crossfield amplifiers and relativistic devices. Offered in alternate years.

**285D. Physics and Technology of Microwave Vacuum Electron Beam Devices IV** (4) III.

Luhmann

Lecture—4 hours. Prerequisite: 285C. Computational models of vacuum electron beam devices. Offered in alternate years.

**289A-K. Special Topics in Applied Science**

(1-5) I, II, III. The Staff

Lecture, laboratory, or combination. Prerequisite: consent of instructor. Special topics in the following areas: **(A)** Atomic and Molecular Physics; **(B)** Chemical Physics; **(C)** Computational Physics; **(D)** Digital Media; **(E)** Materials Science; **(F)** Imaging Science and Photonics; **(G)** Nonlinear Optics; **(H)** Plasma Physics; **(I)** Quantum Electronics; **(J)** Solid State; **(K)** Microwave and Millimeter Wave Technology. May be repeated up to a total of 5 units per segment when topic differs.**290. Seminar.** (1-2) I, II, III. The Staff (Chair in charge)

Seminar—1-2 hours. (S/U grading only.)

**290C. Graduate Research Group Conference**

(1) I, II, III. The Staff

Discussion—1 hour. Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only.)

**298. Group Study** (1-5) I, II, III. The Staff

(S/U grading only.)

**299. Research** (1-12) I, II, III. The Staff (Chair in charge)

(S/U grading only.)

### Courses in Engineering: Biological Systems (EBS)

**Lower Division Courses****1. Introduction to Biological Systems and Food Engineering** (3) I. Giles

Lecture—2 hours; laboratory—3 hours. Introduction to engineering and the engineering design process, with examples drawn from the fields of agriculture, biological and food engineering. Emphasis on the relationship of engineering principles to biological systems. Laboratories include small group design projects and presentations.

**2L. Biosystems Engineering Graphics Design Laboratory** (1) II, III. The Staff (Chairperson in charge)

Laboratory—3 hours. Prerequisite: course 1 concurrently. Restricted to students in Biological Systems Engineering or Food Engineering. Introduction to the graphical communication techniques of computer-aided design (CAD). Laboratory exercises in CAD techniques for the visualization and communication of three-dimensional objects with applications in design of agricultural, biological and food systems.

**25. Biosystems Engineering in Industry** (2) III.VanderGheynst, Giles, Thompson  
Lecture—1 hour; laboratory—3 hours. Prerequisite: course 1, Biological Sciences 1A, Physics 9B. Introduction to industrial applications of engineering design applied to food production, energy and environmental systems and biotechnology. Focus on the application of calculus, science and basic engineering fundamentals to the design of biological processes. Emphasis on team work, written and oral communication skills.**75. Properties of Materials in Biological Systems** (4) II. Slaughter

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A; Physics 9C (may be taken concurrently). Properties of typical biological materials; composition and structure with emphasis on the effects of physical and biochemical properties on design of engineered systems; interactions of biological materials with typical engineering materials. GE credit: SciEng.

**90C. Research Group Conference in Biological Systems Engineering** (1) I, II, III. The Staff (Chairperson in charge)

Discussion—1 hour. Prerequisite: lower division standing in Biological Systems Engineering or Food Engineering; consent of instructor. Research group conference. May be repeated for credit. (P/NP grading only.)

**90X. Lower Division Seminar** (1-4) I, II, III.The Staff  
Seminar—1-4 hours. Prerequisite: consent of instructor. Examination of a special topic in a small group setting.**92. Internship in Biological Systems****Engineering** (1-5) I, II, III. The Staff (Hills in charge)

Internship. Prerequisite: lower division standing; project approval prior to period of internship. Supervised work experience in biological systems engineering. May be repeated for credit. (P/NP grading only.)

**98. Directed Group Study** (1-5) I, II, III. The Staff (Hills in charge)

Prerequisite: consent of instructor. Group study of selected topics; restricted to lower division students. (P/NP grading only.)

**99. Special Study for Lower Division Students**(1-5) I, II, III. The Staff (Hills in charge)  
(P/NP grading only.)**Upper Division Courses****114. Principles of Field Machinery Design** (3)

III. Chen

Lecture—2 hours; laboratory—3 hours. Prerequisite: Engineering 102, 104. Traction and stability of vehicles with wheels or tracks. Operating principles of field machines and basic mechanisms used in their design.

**115. Forest Engineering** (3) III. Hartsough

Lecture—3 hours. Prerequisite: Engineering 104, Biological Sciences 1C. Applications of engineering principles to problems in forestry including those in forest regeneration, harvesting, residue utilization, and transportation.

**116. Forest Engineering Field Problems** (2) I.

Miles

Lecture—1 hour; three weekend field trips to Blodgett Forest. Prerequisite: course 114 or 115. A field study and critical analysis of operations, techniques, and equipment common in forest management, with particular consideration to measurements, data analysis, safety of operations, and maintenance practices.

**120. Power and Energy Conversion** (4) II.

Jenkins

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 17, 102, 103A, 105A. Fundamentals of energy conversion with applications to biological and agricultural systems. Design and performance characteristics of power devices and systems including combustion engines, electric generators and motors, fluid power systems, fans, pumps, mechanical transmissions, and others. Selection of units for power matching and optimal performance.

**125. Heat and Mass Transfer in Biological****Systems** (4) II. VanderGheynst

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 75, Engineering 105A. Heat and mass transfer and psychrometrics with principal applications to biological, food, and environmental processes. Steady and transient heat and mass transfer. Analysis of heat conduction, convection and radiation, and material diffusion and convection. Analysis of heat and mass transfer with non-Newtonian fluid flow.

**130. Dynamic Modeling of Processes in****Biological Systems** (4) II. Rumsey

Lecture/discussion—4 hours. Prerequisite: Engineering 5 or the equivalent. Techniques for modeling processes through mass and energy balance, rate equations, and equations of state. Computer problem solution of models. Example models include package design, evaporation, respiration heating, thermal processing of foods, and plant growth.

**132. Unit Operations in Biological and Food****Engineering** (4) III. Piedrahita, VanderGheynst

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 125, 130. Mechanical unit operations which involve non-Newtonian flow, size reduction and mixing. Thermal operations related to drying, sterilization, freezing, and refrigeration. Mass transfer operations applied to membrane separations, adsorption, and absorption processes.

**135. Bioenvironmental Engineering** (4) III.

Zhang

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 125, 130. Biological responses to environmental conditions. Principles and engineering design of environmental control systems. Overview of environmental pollution problems and legal restrictions for biological systems, introduction of environmental quality assessment techniques, and environmental pollution control technologies.

**143. Analytical Hydrology and Watershed****Management** (3) II. The Staff

Lecture—3 hours. Prerequisite: Engineering 103A or Hydrologic Science 103, and working knowledge of FORTRAN. Introduction to watershed hydrology modeling. Techniques in precipitation, evaporation, infiltration, subsurface and overland flow, non-point source pollution, snowmelt, and their formulation in watershed model design and programming. (Same course as Hydrologic Science 143.)

**145. Irrigation and Drainage Systems** (4) II.

Wallender, Grismer, Hills

Lecture—4 hours. Prerequisite: Engineering 103A or Hydrologic Science 103. Engineering and scientific principles applied to the design of surface, sprinkle and micro irrigation systems and drainage systems within economic, biological, and environmental constraints. Interaction between irrigation and drainage will be emphasized. (Same course as Hydrologic Science 115.)

**165. Bioinstrumentation and Control** (3) I.

Delwiche

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 100. Instrumentation and control for biological production systems. Measurement system concepts, instrumentation and transducers for sensing physical and biological parameters, data acquisition and control.

**170A. Engineering Design and Professional Responsibilities** (3) III. Miles

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 1, Engineering 102, 104. Engineering design including professional responsibilities. Emphasis on project selection, data sources, specifications, human factors, biological materials, safety systems, and professionalism. Detailed design proposals will be developed for courses 170B and 170BL.

**170B. Engineering Projects: Design** (2) I, II.

Miles

Discussion—2 hours. Prerequisite: course 170A, course 170BL required concurrently. Individual or group projects involving the design of devices, structures, or systems to solve specific engineering problems in biological systems. Project for study is jointly selected by student and instructor. (Deferred grading only, pending completion of course 170C.)

**170BL. Engineering Projects: Design**

Laboratory (1) I, II. The Staff (Chairperson in charge)

Laboratory—3 hours. Prerequisite: course 170B required concurrently. Individual or group projects involving the design of devices, structures, or systems to solve specific engineering problems in biological systems. (Deferred grading only, pending completion of course 170CL.)

**170C. Engineering Projects: Design Evaluation** (1) II, III. Miles

Discussion—1 hour. Prerequisite: course 170B; required to enroll in course 170CL concurrently. Individual or group projects involving the fabrication, assembly and testing of components, devices, structures, or systems designed to solve specific engineering problems in biological systems. Project for study previously selected by student and instructor in course 170B.

**170CL. Engineering Projects: Design**

Evaluation (2) II, III. The Staff (Chairperson in charge)

Laboratory—6 hours. Prerequisite: required to enroll in course 170C concurrently. Individual or group projects involving the fabrication, assembly and testing of components, devices, structures, or systems designed to solve specific engineering problems in biological systems.

**175. Rheology of Biological Materials** (3) II. K.

McCarthy

Lecture—3 hours. Prerequisite: Chemical Engineering 150A or Engineering 103A; and Engineering 105A or Chemical Engineering 152A. Introduction to fluid and solid rheology, viscoelastic behavior of foods and other biological materials, and application of rheological properties to food and biological systems (i.e., pipeline design, extrusion, mixing, coating).

**189A-G. Special Topics in Biological Systems**

Engineering (1-5) I, II, III. The Staff (Chairperson in charge)

Variable—3-15 hours. Prerequisite: upper division standing in engineering; consent of instructor. Special topics in: (A) Agricultural Engineering; (B) Aquacultural Engineering; (C) Biomedical Engineering; (D) Biotechnical Engineering; (E) Ecological Systems Engineering; (F) Food Engineering; and (G) Forest

Engineering. May be repeated for credit when topic differs.

**190C. Research Group Conference in Biological Systems Engineering** (1) I, II, III.

The Staff (Chairperson in charge)

Discussion—1 hour. Prerequisite: upper division standing in Biological Systems Engineering or Food Engineering; consent of instructor. Research group conference. May be repeated for credit. (P/NP grading only.)

**190X. Upper Division Seminar** (1-4) I, II, III.

The Staff

Seminar—1-4 hours. Prerequisite: consent of instructor. In-depth examination of a special topic in a small group setting.

**192. Internship in Biological Systems**

Engineering (1-5) I, II, III. The Staff (Hills in charge)

Internship. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in biological systems engineering. May be repeated for credit. (P/NP grading only.)

**197T. Tutoring in Biological Systems**

Engineering (1-5) I, II, III. The Staff

Tutorial—1-5 hours. Prerequisite: upper division standing in engineering; consent of instructor. Tutoring of students in undergraduate biological systems engineering courses. May be repeated for credit. (P/NP grading only.)
