Neil J. A. Sloane

Dear Mr Sloane,

Thank you very much for your letter. I shall be coming over by Icelandair, arriving N.Y. 18:30 on 29 March. I expect to be staying with Mr RORY MARCATO in New York

and then to visit a friend at Montreal. I shall visit the libraries at Providence and Manhattan so many of your references are not available in Dublin libraries

I am intrigued by your sequence 470.6. I have not had time to consider whether it is the same as one suggested based on the "blasons" of Ste-Lucie (Avec des Montres et des lignes f. 146). If so, I would have expected 482.5

to read 1, 2, 4, 12, 39, 202. Blasons differ from patterns in that they are non-equivalent when rotation thro 90°, 180°, 270° is allowed. Hope you can illuminate this point.

Many of the series can be strengthened by taking account of information in others that are closely related. A few of these I give in letter attached

Looking forward eagerly to seeing you
yours sincerely
Victor Meally
