Qualified Service Technician Certification Application

(Revised 2/2020)

OPS requires that certain tasks be performed by a Qualified Service Technician (QST), including but not limited to:

- Installation, repair, replacement, maintenance, and calibration of all UST leak detection monitoring equipment
- Repair or maintenance work on in-use operating UST systems, including the tank and all ancillary components
- Annual monitoring system functionality and certification
- Secondary containment testing, including initial testing of newly installed secondary containment systems

To obtain OPS certification, service technicians must submit this completed application along with completion certificates from Petroleum Equipment Institute (PEI) indicating results of **70% or greater** for their online Service Technician Training Manual - Level I and RP900 Test.
