

Committee Member Profile

Zach Hope

Zach Hope currently serves as the Petroleum Program Manager at the Division of Oil and Public Safety. The Petroleum Program regulates underground and aboveground liquid fuel storage tanks and propane and retail natural gas storage tanks. Petroleum Program responsibilities and goals include performing thousands of tank inspections each year, preventing petroleum releases, providing education and guidance to tank owners, ensuring equity in the marketplace through weights and measures inspections, and effectively enabling remediation of releases to the environment.

Zach received a bachelor's degree in Environmental Engineering from the Colorado School of Mines and maintains a Professional Engineer license in Colorado. His professional experience included construction observations and materials testing, geotechnical consulting, and environmental site assessments before he joined the Petroleum Program at the Division of Oil and Public Safety in 2008.
