

Supplementary Figure 1. Distribution of somatic mutations within *FBXW7* and *CHD4* in uterine carcinosarcomas. Individual mutations (squares) and their positions within the encoded proteins are displayed. Domain abbreviations: DD (Dimerization Domain), F-box (Phenylalanine-box), WD repeat (Tryptophan-Aspartic acid repeat), NLS (nuclear localization signal), PHD (Plant homeodomain), DUF (Domain of Unknown Function), CHDCT2 (Chromodomain Helicase DNA-binding C-Terminal 2).
